In view of the fact that Congress in providing for flexibility must bestow some exceptional powers upon the President, I should very much prefer that in the same act the Congress definitely name the Tariff Board as the source of information and recommendation upon which the President may proclaim changes in rates of duty. If the power to modify rates were given to the President, I should immediately proclaim the Tariff Board as the agency of investigation and recommendation, because the President could not deal with the situation in any other practical manner. I think it more seemly, therefore, to have the Congress definitely designate the Tariff Board as the agency to be employed by the President in the exercise of Executive power which it is proposed to bestow.

Very truly yours,

WARREN G. HARDING.

Mr. WALSH of Montana obtained the floor.

Mr. LENROOT. Mr. President, will the Senator yield to me for a moment?

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Wisconsin?

Mr. WALSH of Montana. I do.

Mr. LENROOT. My attention has been called to one change which has been made in the amendment. Originally the amendment read, "The commission shall prepare its findings in the case of each proceeding under this section, and such findings shall be published." I note in the copy handed me that the words "such findings shall be published" have been stricken out, and that there has been inserted "and the President is authorized to make such findings public."

Mr. McCUMBER. I expected to discuss that when we reached that point. It is one of the last provisions.

Mr. LENROOT. We will treat the amendment separately?

Mr. McCUMBER. Yes. I will simply state to the Senator now the thought which actuated the committee. We believed that if the Tariff Commission daily or monthly sent out its own reports, without consideration by the President, it would create a constant turmoil and uncertainty in the business of the country, and we thought it was best that the Tariff Commission do just what it is doing now; investigate, make its annual report of what it is doing, as it does now, and allow the President to say, after he has received the result of the investigation, whether the report should be made public. Of course, he has to make public his findings, but we simply do not want the Tariff Commission constantly giving out information to interested parties.

Mr. LENROOT. I quite agree in that view to that extent; but does not the Senator think that when the President does change a rate, when he does make a proclamation, then the recommendation and finding of the Tariff Commission as to that particular item should be made public?

Mr. McCUMBER. It will be, under the form of the bill. The President presents his reasons for the change. But we will take that up when we reach it.

Mr. WALSH of Montana. Mr. President, before the letter of the President of the United States was read I was not aware that he was particularly interested in the feature of the bill under consideration. In view of the disclosures in the letter, however, there is pertinency in that part of the record which I read this morning giving the views expressed by the President when the so-called Overman bill was before the Senate, namely, that if the bill were passed the Senate might as well confer upon the President the taxing power and go home.

Before the Senator from North Dakota [Mr. McCUMBER] leaves the Chamber I want to say that on yesterday he adverted to what he conceived to be the great advantages to the farmers of this country by reason of the duty upon wheat, saving them from competition from the other side of the international line, the growers of wheat in the Canadian Provinces.

I offer, and ask the Secretary to read, a brief article which will appear in the forthcoming number of the Farm and Home, an agricultural journal of very wide circulation, having, as shown by the Newspaper Directory, a circulation of 572,000, being allied also with the Northwest Farmstead, published in Minneapolis, Minn., having a circulation of 97,000, and the Dakota Farmer, published at Aberdeen, S. Dak., having a circulation of 57,000, the aggregate circulation of these three papers being 627,000. The Farm and Home is published in Chicago. I ask that the article may be read.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The reading clerk read as follows:

[Advance proof from the September number of Farm and Home, Chicago, August 7, 1922.]

INTERNATIONAL SCANDAL IN LOW PRICES FOR WHEAT—GROWERS GETTING FAR BELOW A DOLLAR A BUSHEL FOR WHEAT THAT IS WORTH MORE, OR OTHER COMMODITIES AND WAGES MUST COME DOWN TO A LIKE BASIS.

America has less wheat, old and new, than a year ago. Canada's crop may be a large one, but the wheat-importing nations of Europe are harvesting 100,000,000 fewer bushels of wheat even than last year if our Commerce Department's report is correct.

It is too early to forecast the harvests of the southern hemisphere that come in December-February, but the acreage throughout those countries apparently is only moderate. New corn will make only a fair total, oats short, world's rye crop medium in bulk. All data exclude Russia.

Yet for weeks wheat has sold on the Chicago market at not much above a gold dollar per bushel, which means to the grower somewhere from 90 cents down to almost as low as 60 cents, according to quality, distance from market, and railroad freight rate. August prices picked up some in view of probable further cuts bringing ocean freight down to pre-war.

Agriculture is back to the basis of dollar wheat, but railroaders strike against going only part way down to this basis emphasizes Farm and Home. The coal strike also had an unsettling effect upon business generally and upon prices, grain included.

THE REAL TROUBLE.

Even worse is Europe's apparently increasing inability to pay for such of our surplus foodstuffs and fibers as she needs. She has little gold to spare and her paper money is worthless. She can not readily exchange her raw materials or manufactures for our wheat or other goods because of our higher tariff.

Hence the decline with a dull thud in exports of grain and other farm products from the United States during recent months. Our shipments of wheat and flour to foreign markets since January 1 shows a colossal decline in quantity and still more in value. Corn exports continue larger than a year ago, but at best cut small figure. Farm and Home repeats that as the sale is curtailed of our surplus abroad it backs up and depresses prices here.

STATESMEN ARE BLIND.

Congress is blind to the situation. The higher it builds its prohibitory tariff, the more our exports decline and the less able are foreigners to pay for what they want to buy from us, not to mention interest on the fifteen or twenty billions they owed us previously.

Meanwhile Europe continues her outlay for war, Government debts increase. Those people fail to do what they must do to be saved—quit militarism, reduce expenses, balance budgets, lower taxes, live within their means, barter until their money's value is restored. Except that our money is better than gold, we Americans are equally at fault.

Grievous indeed that these errors of statesmen and politicians have to be borne by our farmers in lower prices for wheat, declares Farm and Home. Wheat comes so near being now the virtual standard of values that conditions which tend to depress the price of wheat below that of labor and of other commodities constitute an international scandal.

Mr. WALSH of Montana. In view of the statement made in the article to the effect that the pending tariff bill will so restrict our foreign markets, shutting off the outlet for our surplus products, and thus necessarily reduce the price of wheat, I call attention to an article by Agnes C. Laut in the current number of the magazine entitled "Our World," the article being entitled "The farmer's stake abroad." Miss Laut, as is well understood, is a writer on economic questions and is herself a farmer. I read briefly from her article, as follows:

Are the farmers of the United States and Canada interested in Europe's comeback to normal? Charitably, of course, we are interested when we feed Russia and help to rehabilitate Palestine and extend the time for repayment of loans that are war debts; but as a matter of interest to our own pocketbooks and daily incomes, can we stand back self-sustained and self-sustaining and let Europe stew through her own muss? If we do let Europe go her way to destruction, will it come back on us, so that we shall be no longer self-sustained and self-contained?

* * * * * * *

One has only to take a quick glance at the basic farm products to see where the farmer stands on Europe's comeback.

Cotton first. Often America supplies 60 per cent of the foreign world's cotton needs. Always she supplies at least half of the foreign world's needs. That touches every Southern State from Georgia to Texas. Cotton exports fell off three-quarters of a billion pounds between 1920 and 1921. Of the exports of cotton, one-third usually goes to English mills, two-thirds to continental mills. What caused the falling off in exports? Paralysis of Europe's buying power. If Europe were buying all the cotton she needs for her mills now closed the South would be humming with the prosperity of war prices for cotton.

Take grains next. Before the war—as you will find if you will read the agricultural reports from 1908 to 1913—Europe required 500,000,000 bushels of outside wheat. Russia was the great supply granary for Germany. Russia is off the map. So is Rumania for a year, for she has just placed an embargo on all exports of wheat to insure food enough for herself. Argentina, India, and Australia have never supplied more than half this shortage. Cut off this avenue of foreign sales for wheat by the paralysis of Europe's buying power, and you cramp the prosperity of every wheat area from Texas and California to Manitoba and Alberta. After the slump of exchange in July and August farmers in the far West were receiving 80 cents to 60 cents for their wheat. As exchange improved wheat went out a hundred and seventy million more bushels than the preceding year, and the price went up to the farmer from 60 cents and 80 cents to $1.40. Unfortunately the most of the wheat had already been sold by the hard-pressed farmers, so that the benefit went to the pocket of the speculator, but the fact of improved European conditions sending the price up 40 cents a bushel proves that the farmer is interested in Europe's comeback. While Europe was literally starving to death for plain, old-fashioned oatmeal in the winter of 1921–22 oats were selling from Winnipeg to Peace River and St. Paul to Montana at from 32 cents to 18 cents.

I pause to remark that I had some oats to sell in the State of North Dakota last fall, which I sold for 15 cents a bushel. I continue reading:

Why? Paralysis of Europe's buying power. Oat exports had fallen off as between 1921 and 1920 nearly 30,000,000 bushels, as between 1921 and 1918, 92,000,000 bushels; and the difference to the farmer was as from 18 cents and 28 cents a bushel and 60 cents and $1.25. Is the oat farmer interested in Europe's comeback?

Take meat products next. The total falling off in exports of meat products of all kinds—beef, oleo, bacon, ham—as between 1921 and 1920 was 400,000,000 pounds; as between 1920 and 1919, a billion and a half pounds; and cattle values fell from $50 and $90 net to the farmer to $3 and $1—less than the feed for five days. Why? Paralysis of Europe's buying power.

Take dairy products next. Exports of butter, cheese, and condensed milk fell off from 2,643,000,000 pounds in 1919 to 330,000,000 pounds in 1921—nearly seven-eighths; and values of dairy cattle fell from $200 and $150 to $80 and $50. Said one of the best dairy farmers in the East to me, "I never dropped so much money so suddenly without cause in all my life. Two years ago my herd cost me $20,000. I've just sold it by auction for $2,500; and that loss takes no account of labor and feed. The funny thing was—my herd produced as much as ever; but milk returns went down from 8 cents and 9 cents to 3 cents and 1 cent; and the value was no longer in the herd." Why? Paralysis of Europe's buying power.

Hides have been burned in the West this year from Alberta to New Mexico because they could not be sold. Wool is eating its head off in storage and interest charges; and the values of lambs and sheep have fallen from half to two-thirds.

In 1921—as brought out in the agricultural conference—only 10 per cent of the farmers paid costs of operation; and their returns were only 3 per cent on the outlay. Farm earnings in 1920–21 represented between $416 and $460 a family for each working farmer—less than any wage in the union scale of labor.

With over seventy-eight billions invested in the farm plants of the United States and the farm values cut from 60 per cent to 50 per cent by the paralysis of Europe's buying power, does one need to ask, Is the farmer interested in Europe's comeback?

Mr. SIMMONS. Mr. President, following the article just read by the Senator from Montana, I desire to read an extract from an article entitled "Truth about the tariff," which I find in the Locomotive Engineers' Journal of August, 1922. The subhead line is "Fooling the farmer," and the article reads:

This argument of "protecting infant industries" is especially dishonest when applied to the farmer. He is told that a high tariff on grain products will bring him an increased income, when the fact is that we export far more grain and food than we import, and that for every dollar the farmer gets through such protection he pays out $5 to manufacturers of farm implements, paint, cement, clothing, and other articles which carry a fat tariff profit. In brief, the protection argument is simply a bribe to secure the farmer's consent to a tariff enriching the big manufacturing monopolies. And the shame of it is that millions of American farmers have been gullible enough to swallow the bait.

The PRESIDING OFFICER. The Chair desires to see that the parliamentary situation is understood. As the Chair understands it, the Senator from North Dakota [Mr. MCCUMBER], on behalf of the committee, withdraws the amendment heretofore proposed by the committee and substitutes for it the amendment as modified which has been presented.

Mr. TRAMMELL. I propose an amendment to the amendment as perfected.

The PRESIDING OFFICER. The Senator from Florida proposes an amendment to the amendment, which will be stated.

Mr. LENROOT. Just a moment, Mr. President. I did not quite understand it that way. With reference to the power of the Tariff Commission, the Senator from North Dakota indicated that that would be offered as a separate matter.

Mr. SMOOT. Each of the proposed amendments to the amendment as a whole will be treated as a separate matter.

Mr. LENROOT. That is all right. I thought the Chair stated the committee had withdrawn the entire substitute and offered this as a modified amendment.

The PRESIDING OFFICER. The Chair understood that the amendment to section 315 as first printed was withdrawn and presented in a modified form.

Mr. SMOOT. The Senator from North Dakota stated that each one of the items would be considered separately, and I think that is very necessary.

The PRESIDING OFFICER. Let the Chair ask the Senator from Utah if it is the intention to propose the modifications as separate amendments to the amendment heretofore presented by the committee?

Mr. SMOOT. That is the program.

The PRESIDING OFFICER. The Chair merely wanted to understand the situation.

Mr. SMOOT. Each one will be presented separately.

The PRESIDING OFFICER. As that is the case, the amendment proposed by the Senator from Florida is not now in order, because there is an amendment pending to the amendment of the committee, which the Secretary will report. The first change proposed by the Senator from North Dakota to the amendment of the committee will be stated.

The READING CLERK. On page 1 of the amendment as printed, in lines 8 and 9, strike out the words "conditions of competition in the principal markets of the United States" and insert in lieu thereof "costs of production," so as to read:

SEC. 315. (a) That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in costs of production of articles wholly or in part the growth or product of the United States and of like or similar articles wholly or in part the growth or product of competing foreign countries, etc.

Mr. GOODING. Mr. President, there is no question that the American people are tired of having the business interests of the country made a political football. I believe that 90 per cent of all the American people would welcome the elimination of the tariff question from politics, and I hope the time will come when there will not be any disagreement in this Chamber on that question; in other words, when we shall have a commission that will find out the honest difference in the cost of production between this country and abroad, and there will not be any opposi-

tion from any Senator or any Member of Congress to giving to every industry of the country that honest difference in the cost of production between this and foreign countries; but this can not be done until we take the tariff question out of politics.

But the amendment that is now proposed by the committee, which might be called properly the Lenroot amendment, to my mind makes it impossible for the President to take into consideration at all the freight rates in arriving at the difference in the cost of production between this and foreign countries. If the Senator from Wisconsin lived as far west as many of the other Senators and realized more what the excessive freight rates mean and how large a part they play as they enter into the cost of production so far as what the farmer gets in the markets for his products, I think he might then look at the matter in an entirely different light; but living, as he does, in the great State of Wisconsin, bordering upon the Great Lakes, his State has a rail-and-lake freight rate of about one-third of the rate that we have from Idaho or that obtains from Washington and many of the other Western States, so the question of freight rates is not such a serious matter to Wisconsin.

I want to ask how it is going to be possible for the President to take into consideration the difference in the cost of production as to a ton of manganese produced in Colorado or in any other Western State if the pending amendment is accepted. I know that for weeks, ever since that schedule was accepted, the steel people have been here fighting the tariff bill which is at the present time before the Senate simply because the Senate finally accepted the House rate on manganese, which would make possible the development of the manganese mines of the West.

Now, the President is denied the right to take into consideration the freight rates in the cost of production of a ton of manganese, and so it goes through the bill as to every other product that we produce in the West, where, in some cases, like potatoes, two years ago the farmer paid 77 cents for freight out of every dollar that he received for his potatoes. The freight rates are still 53 per cent, on an average, higher than they were before the war. And yet in considering the tariff bill we are going to deny to the President the right to take into consideration freight rates increased to the extent of 53 per cent. Every farmer from the West must pay that to-day. I do not think we have any protection. I think on any question which the President is forced to consider and which he investigates to find the difference in the cost of production between this and foreign countries that when the freight rate is eliminated in considering it there is nothing left and the people of the West can make up their minds that they had better not get ready to develop any manganese mines until this schedule is settled. I expect it will be one of the first that will be called to the attention of the President.

This country never elected anybody but an honest man to the Presidency, and I do not think ever will. I have great confidence in the President we have in the White House to-day. But I do know that the organized forces here in America have a tremendous influence on the Government, and especially some departments of the Government. I am sorry to say that I have not any confidence in that department of the Government which is going to furnish the President with information as to the difference in the cost of production between this country and abroad. Why, the most ridiculous spectacle imaginable occurred during all the consideration of the bill right here in the Senate. We have had experts from the Tariff Commission advising Democrats on the one side as to what was a reasonable tariff and we have had experts from the Tariff Commission advising Republicans on the other side as to what was the difference in the cost of production in this country and abroad. We have had experts sitting with the committee all the forenoon coming back into the Senate Chamber and dividing, one going on one side of the Chamber and the other on the other side, and we do know that the Senators do not agree as to the facts which were found by the different experts. Yet this is the instrumentality upon which the President must rely for his information as to what is a just tariff rate.

The Senator from Wisconsin would have a dead line in the country. He would fix the dead line at which the farmer or the miner from the West should stop. He is perfectly safe, bordering on the Great Lakes. He is not affected by freight rates, and it is perfectly appropriate that the Senator from Wisconsin should introduce the amendment. I had been looking upon the Senator from Wisconsin as a friend of the farmer and a friend of the West, but the amendment that he has now offered, if it is followed out to its fullest conclusion, will destroy every particle of protection that has been given to the agricultural interests of the West. I am forced to the conclusion that the Senator does not understand the excessive freight rates that we pay, or that I am mistaken in his friendship for the farmers of the country.

We have 22,000,000 people living in America who can be reached by foreign transportation without the use of any of our railroads. Twenty-two million people in great cities can be reached by ocean transportation. If we are going to deny the agricultural interests of the country an opportunity to furnish those great cities with the necessities of life, then I want to say that so far as the West is concerned we had better give up the struggle and let them be fed from foreign countries, because this is true: There is not a farmer in all the world who lives anywhere in touch with a railroad in his own country who can not feed the people of New York City more cheaply than can the farmer in my State or in any of the Western States, so far as that is concerned. It is all right for the farmers of the West to ship the raw material which has built up the great manufacturing industries and the great cities of the seaboard, but the Senator from Wisconsin would deny us the right to feed the people to whom we have given employment by producing and sending to them the raw materials. It is all right to pay the freight rate on raw materials to New York and to Boston and to other great industrial centers and then pay the freight rate back to the Western States, but we are not permitted to feed those who dwell in those industrial centers. That is what the amendment means—that and nothing more and nothing less.

The Senator must understand that in levying duties on imports coming from foreign countries freight rates are not to be taken into consideration. The duty is levied only on the cost of article, not on the freight rates between foreign ports and this country. So the foreigner will have that advantage or more to commence with.

Mr. LENROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Wisconsin?

Mr. GOODING. I yield.

Mr. LENROOT. That is not an advantage to the foreigner; that is an advantage to the American, because, in addition to the difference in the cost of production, the foreigner before he can get into our market will have to pay the freight rate.

Mr. GOODING. The Senator from Wisconsin is mistaken. The foreigner does not pay a duty on the freight rate. That is the point I wish to make.

Mr. LENROOT. If the duty is fixed on the difference in the cost of production, the foreigner has got to pay, in addition to that duty, measuring the difference in the cost of production, the freight rate to this country.

Mr. GOODING. In paying duties, the foreigner never pays a duty on the freight rates; he never has, and I presume that he never will. It is not a part of the costs of the article which is landed in this country. In any event the freight rate in foreign countries is a small item as compared with the freight rate the farmer must pay from the West.

Mr. President, let me say that there are 40,218,416 people living in States that border upon the great oceans and rivers that may be reached by water transportation, and there are 22,453,716 people living in seaports and cities on great rivers accessible to ocean transportation. I have prepared two tables giving the figures in detail, which I ask may be printed in the RECORD as a part of my remarks.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The tables referred to are as follows:

Population of seaboard States, 1920.

Maine	768,014
New Hampshire	443,083
Massachusetts	3,852,356
Connecticut	1,380,631
Rhode Island	604,397
New York	10,384,829
New Jersey	3,155,900
Delaware	233,003
Maryland	1,449,661
Virginia	2,309,187
North Carolina	2,559,123
South Carolina	1,683,724
Georgia	2,895,832
Florida	968,470
Alabama	2,348,174
Mississippi	1,790,618
Louisiana	1,798,509
Texas	4,663,228
Washington	1,356,621
Oregon	783,389
California	3,426,861
Total	40,218,416

UNITED STATES GREAT LAKES PORTS.

The locks of the Welland Canal connecting Lake Erie with Lake Ontario are 45 feet wide, with an available length of 255 feet; vessels passing through this canal are limited therefore by these dimensions. Maximum draft for vessels, 14 feet.

	Population.

(Office of staff assistant in charge of statistical department, United States Shipping Board, June 22, 1922.)

Mr. GOODING. Mr. President, I want to show some of the freight rates from foreign countries to the United States. Sugar may be shipped to New York City from the southern side of Cuba for 17 cents a hundred pounds; from the northern side of Cuba it may be shipped to New York for 13 cents a hundred pounds. Wool is shipped from Argentina to Boston and New York for 22 cents a hundred pounds, while we are paying something like $3 a hundred to ship it from the Western States. Wheat is shipped from the Argentine for 15 cents a hundred pounds, and from the up-river points of the Argentine for 18 cents a hundred. So, when it comes to the question of freight rates, I ask what chance the West has to live at all when the countries which I have mentioned have to pay freight rates which are practically nothing as compared with those which the West must pay?

Mr. President, I wish to say to those who have stood together here in the interests of agriculture in framing the pending tariff bill, affording for the first time in the history of this country a square deal to agriculture, that when they vote for the Lenroot amendment or for any of the amendments containing a provision delegating this proposed power to the President there is grave danger that they will have lost all that they have won.

I would go so far, Mr. President, at this time, in view of the serious condition that exists in the world, if this amendment could be limited to one year and it were so drawn that freight rates might be taken into consideration, possibly to vote for the amendment. I do not know whether or not the House of Representatives is going to send the bill back with the American valuation restored, but I hope they are, for I do not think we shall have any protection without it; but fearing that they might not do that, I might even run the element of risk that I apprehend there is in this amendment and vote for it if it could be amended so that this power would be delegated to the President for only one year, but with the Lenroot amendment I can not vote for it at all under any consideration.

Mr. LENROOT. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Wisconsin?

[1] Ports "under 2,000" total, as 2,000 in the State and grand totals.

Mr. GOODING. Yes; I yield.

Mr. LENROOT. Would the Senator be willing to vote for this provision if the President were compelled to take into consideration the question of freight rates?

Mr. GOODING. No; not unless the time were limited. Unless that were done, I should not be willing to vote for the amendment.

Mr. LENROOT. With the time limited, would the Senator be willing to vote for the amendment?

Mr. GOODING. Yes; with the time limited to one year, I think I should.

Mr. LENROOT. I understand the Senator from Idaho thinks the President should be compelled to give consideration to the question of freight rates?

Mr. GOODING. Absolutely; there is not any question about it, to my mind.

Mr. LENROOT. Very well.

Mr. GOODING. Without it, I do not think we shall have any protection to any industry in the West, so far as that is concerned, because that is a part of the cost of the farmer's production. I do not know of any farm product that goes to market on which the farmer does not pay the freight. If the Senator from Wisconsin does, he understands the question in a different light than do I, and I have been paying a great many freight bills for many years.

Mr. President, I am not going to occupy much longer the time of the Senate in discussing this question, but I desire to say that to my mind the Senator from Wisconsin has not been fair to agriculture in his discussion of the tariff bill which is now before the Senate. When it came to the fixing of duties, however, for his own State he did not hesitate to ask for 60 per cent on floor matting, which is manufactured in Wisconsin. I understand that the Senator from Wisconsin appeared before the Finance Committee and made quite an effort to have the committee grant a duty of 60 per cent on that commodity, which is produced in his own State. If I am mistaken, I hope the Senator will correct me, for I do not wish to make an erroneous statement.

I understand, furthermore, that the Senator asked for a duty of $200 on foxes imported into this country for breeding purposes, although it has always been the policy of all parties to permit any animal for breeding purposes to come in free. Then the Senator from Wisconsin advocated taking from the free list cream separators and imposing upon them an ad valorem duty of 35 per cent, and was successful in his effort.

While I can hardly say that the Senator held me up to ridicule, at least he censured my position in standing for high protective duties here and suggested that my attitude was that the sky was the limit. Mr. President, in my advocacy of protective tariff rates I have not stopped with the industries in the State of Idaho. I have advocated high protective duties for the manufacturers as well as for the farmers and the miners of the United States. The Senator from Wisconsin would have given the woolgrowers a duty on the lower grades of wool which would have permitted the foreigner to lay that class of wool down in Boston at 25 cents a pound on the cleaned content, or about 25 per cent of the cost of production of the wool in the West.

I hope I have been mistaken and that the Senator is a real friend of the farmer. I have wanted to feel that that has been his attitude all the time, but I am unable to find any support for that idea in the amendment which he has presented to the pending proposition which would deny to the President in fixing the duties on any product under the power proposed to be delegated to him the right to take into consideration the question of freight rates.

Mr. LENROOT. Mr. President, my friend from Idaho is an earnest friend of the farmer and desires to benefit the farmer in every possible way; there is no doubt about that; and in some of the attitudes which he has assumed, instead of benefiting the farmer would really injure him, the Senator has done so most innocently and not with any intent to do any injustice to the farmer.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Idaho?

Mr. LENROOT. Yes.

Mr. GOODING. I wonder if the Senator would be willing to let the farmers answer that question, whether I am their friend or their enemy?

Mr. LENROOT. I have just said——

Mr. GOODING. I may say that I have several telegrams which I may put into the RECORD this evening from practically all of the organizations interested in the farmer's welfare which refer to me as their friend in this fight.

Mr. LENROOT. Of course the Senator from Idaho is the farmer's friend. I have said that, and I have said that in so far as any attitude he has taken has been injurious to the farmer it has been innocent upon his part.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin further yield to the Senator from Idaho?

Mr. LENROOT. Yes.

Mr. GOODING. This country is full of men who do not feel that the farmer understands what is best for his interest. Those men are always free with their advice. I hope the time will come when the farmer will be permitted to speak for himself.

Mr. LENROOT. Mr. President, I do not yield further.

Mr. GOODING. Very well.

Mr. LENROOT. I thought I was doing a measure of justice to my friend from Idaho in the statement which I made. Of course, if the Senator claims to be infallible, that he can make no mistake, that nothing which he has proposed could possibly be wrong, of course the Senator may assume that position. All I have said is that, in so far as some positions which he has assumed are concerned, if they have been injurious to the farmer, as I believe them to be, they have been assumed in the utmost good faith upon the part of the Senator from Idaho, with the best of intentions to benefit the farmer. That was my statement, and I thought it was fair and just to the Senator.

The Senator from Idaho, however, has called attention to two or three duties in which I took an interest involving industries in my own State. Mr. President, in my discussions upon this floor I have not asked for anything for my State which I have not been willing to accord to every other State, and it does not come with good grace from the Senator from Idaho to make such a charge against me. When he himself called my attention to the fact, thinking perhaps I was ignorant of it, that in my State there are more than half a million sheep——

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield further to the Senator from Idaho?

Mr. LENROOT. I yield.

Mr. GOODING. The Senator and I occupy entirely different positions on the tariff question. I call his attention to the fact that, in his opinion, a duty of 60 per cent ad valorem on floor matting was none too high for that industry in Wisconsin.

Mr. LENROOT. Mr. President, I am not going to yield again. The Senator has charged me with standing upon this floor and advocating high duties for my State which I was not willing to accord to other States. The Senator knows that he himself impressed upon me the fact, and tried to get me to change my position upon coarse wool upon the plea made by him, that a great deal of coarse wool was produced in my State.

Mr. GOODING. Will the Senator let me finish my question?

Mr. LENROOT. Did the Senator succeed by making that appeal to me in having me change the position which he is now criticizing? The Senator knows perfectly well that he did not; that I took that position believing that the rate I advocated was a fair protective duty for the people of my State and the people of every State.

The Senator refers to cream separators. I would not have said what I am about to say had the Senator not called attention to it; but every farmer buys and must use cream separators upon his farm. Separators were upon the free list. I called the attention of the committee to it. I called the attention of the Senator from Idaho to it.

Mr. GOODING. Mr. President, will the Senator yield at this point?

Mr. LENROOT. No; I am not yielding now.

Mr. GOODING. All right.

Mr. LENROOT. The Senator from Idaho stated that they ought not to be upon the free list. The committee stated that they ought not to be upon the free list. A rate of duty was suggested of 35 per cent, which the manufacturers were asking for. The Senator from Wisconsin, however, stated that he believed 25 per cent was a sufficient duty; and the Senator from Idaho, the friend of the farmer, tried to get the Senator from Wisconsin to stand for 35 per cent, which he refused to do.

I would not have said that, Mr. President, but I am perfectly justified in making that statement in view of the statement made by the Senator from Idaho that I have been looking after the industries of my State and asking for undue advantages for them, and have not been willing to accord reasonable protection to others.

Mr. GOODING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Idaho?

Mr. LENROOT. Now I will yield.

Mr. GOODING. The Senator is absolutely correct. I said to him that I did not believe that 25 per cent on cream separators was enough to give a proper protection; but that has been my position on all industries, as the Senator will remember. There is not any question of doubt about that. The point I am making with the Senator is that he did, before the committee, request and demand 60 per cent for manufacturing industries in his State, and that he has fought almost every other manufacturer who has a protection in this bill. That 60 per cent he is reducing wherever he can on woolens and cottons and many other schedules. That is the point I am making.

Mr. LENROOT. I will come to that in just a moment. The only purpose that the Senator could have had in mind was to endeavor to show that I was asking for unreasonable protection for my State while denying reasonable protection to other States.

Now we will come to the grass rugs. The Tariff Commission found that the cost of making a 9 by 12 grass rug in this country was $7.45. They found that the cost of the Japanese rice rug, competing with that rug, was about $5. After that time those same rugs were laid down here in the United States in the city of New York for $3.42, and a 60 per cent duty would not have covered the difference. They have driven the American grass rug practically out of the market. I did ask for 60 per cent. I did not get it. I got 45 per cent. I got a lower rate of duty than I have been willing to accord to other manufacturers.

I stood here upon the floor with reference to cotton gloves, and I stated that I did not believe that the duties proposed upon those cotton gloves, if considered from the standpoint of difference in cost of production, were excessive, but that I believed there was a point beyond which, as a matter of public policy, we ought not to ask users of American gloves to go, and I proposed here a maximum of 75 per cent myself. I never asked for any such duty upon any product of my own State.

The Senator from Idaho may attempt to convince other Senators that I have been unfair in the attitude I have occupied upon this floor, that I have been looking after the interests of my own State only, but he will not be successful; and, Mr. President, I would not occupy the position that the Senator from Idaho has occupied, honest as he is in it, for my seat in the United States Senate.

Now let us see what kind of a friend of a farmer the Senator is in the opposition that he now pronounces against this amendment that the committee has accepted.

He says that he wants the President to take into consideration freight rates. If the President is to take into consideration the freight rate of the American producers to the principal markets, he must also take into consideration the freight rate of the foreign producer to the principal market. The Senator can not stand on this floor and say that the President shall take into consideration American freight rates and ignore the freight rates that the foreign producer must pay.

Mr. GOODING. Mr. President, I think the Senator understands that when any commodity or any article is bought from a foreign country the freight rate goes into the cost of production of that article. There is not any question about that; and so, of necessity, it will be taken into consideration. That is the point I make.

Mr. LENROOT. So far as the difference in cost of production is concerned, the freight rate of the foreigner has nothing to do with it, and that will all be to the advantage of the American producer. If an article costs in Europe 50 cents at the place where it is produced and that article costs in the United States $1, the difference in the cost of production is 50 cents; but if that article is made in New York, we will say, the American producer will have the 50-cent duty covering the difference in the cost of production, but before the foreigner can get into New York in addition to that 50 cents he has to pay the freight and insurance charges, so the advantage is all with the American producer.

Now we will come to the farmer.

The language is, as it originally stood, "conditions of competition in the principal markets." We will take cattle, if you please. What is the principal market for cattle in the United States? It is Chicago; it is Kansas City; it is Omaha; it is St. Paul. If the President is compelled to take into consideration freight rates, what must he do? He will first find the difference in cost of production of raising cattle in South America and in the United States. Then he will add the freight rate from Wyoming or Nebraska to Chicago, and then he will have to add to the final cost of production the cost from Argentina, not to New York, not to a port of entry, but to the city of Chicago, and that may entirely wipe out the protection to the American producer.

Mr. STANFIELD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Oregon?

Mr. LENROOT. I do.

Mr. STANFIELD. The Senator's comparison is hardly proper there, for the reason that while the cattle of the West are shipped to Chicago as the marketing place for the purpose of slaughtering, New York is the principal center of the consumptive market.

Mr. LENROOT. The language as originally proposed is "the principal market," and that is not New York. New York is not the principal market for cattle.

Mr. STANFIELD. It is the principal center of the field of consumption.

Mr. LENROOT. That is another thing entirely. Of course, the field of consumption is 110,000,000 of people, and, of course, the State that has the largest population has the largest field of consumption, but it may not be the principal market at all.

Mr. STANFIELD. It would be for South America.

Mr. LENROOT. It would not be for South America.

Mr. STANFIELD. It always has been.

Mr. LENROOT. The principal market for live stock in the United States is Chicago, as the Senator knows.

Mr. STANFIELD. The Senator surely does not need to be enlightened on the fact that no live cattle are shipped from the Argentine Republic or from South America to this country, because it is an impracticable thing to do.

Mr. LENROOT. Exactly.

Mr. STANFIELD. They are slaughtered and shipped in dressed, and the dressed market is along the Atlantic seaboard.

Mr. LENROOT. Exactly so.

Mr. STANFIELD. That is the market; and in the case of the cattle that are slaughtered at Chicago, it is only a matter of conversion. Their principal market is the Atlantic seaboard, to which they are shipped.

Mr. LENROOT. Then we will go to wheat. Again, the principal market for wheat is Chicago, Minneapolis, Kansas City; and where would the farmer be with reference to a protective duty on wheat if the theory of the Senator from Idaho should be written into this law? The difference in cost of production is the first item, and then the Senator from Idaho would compel the President to add the freight rate, and the freight rate from South America not to New York but to the city of Chicago, to the city of Minneapolis, to the city of Kansas City; and he would wipe out, perhaps, every vestige of protection that the wheat grower of America has or would have under "difference in cost of production."

The Senator from Idaho has not appreciated that. He has not realized that. I know it. He is only thinking of one side of the question; and when you speak of the consumptive market, sir, as the Senator from Oregon did a moment ago, the Senator from Idaho put into the RECORD a few moments ago the fact that 22,000,000 of our people were along the coast, near ports of entry. Is a tariff rate to be made for 22,000,000 or for 110,000,0000 people? Under this direction, as originally proposed by the committee, must not the President take in the entire field of consumption? And if he does—if he should add freight rates to the American consumer—he would likewise be compelled to add freight rates to the foreign cost of production, not to New York, not to Philadelphia, but to some point in the interior.

I did not intend to go into these things, but the Senator from Idaho was trying to charge me with being an enemy of the farmer, and if he had thought this out a little further he would have seen that instead of benefiting the farmer by his proposition he would injure him and deprive him of a part of the protection to which he is entitled.

Again, taking wheat from Canada, the freight rate from Canada to Chicago or Minneapolis is more than the freight rate on wheat from North Dakota and Minnesota to Minneapolis; but the Senator would have the President add the freight rate and he would add a higher freight rate to the foreign cost than he would to the American cost in the case of wheat.

So, I might go on here, Mr. President, at great length; but I am not going to take further time, because it is so apparent that I am sure every other Senator sees it even if the Senator from Idaho does not.

With reference to this series of amendments I want to say further, merely to repeat in a sentence what I said yesterday, that Congress has no power to delegate power to the President to consider freight rates in one case and disregard them in the other. He can not constitutionally be given any such option. There can not be any doubt about that.

The Senator has referred to manganese. I referred to barytes ore yesterday, where, if you take into consideration the freight rate, you have to have over 100 per cent ad valorem. The Senator from Idaho is willing to do it. The Senator from Idaho is willing to build a wall so high that nothing can come in. The Senator from Idaho, in so doing, would unwittingly injure a very large proportion of the farmers of America in depriving them of any market for their surplus agricultural products. He seems to have the idea that if a foreign country wants to buy from us it can buy; it does not need gold, and it does not need to ship goods.

He says, "Why, they can establish credits here." Mr. President, we could sell every bushel of wheat and every bushel of corn to a lot of those bankrupt countries over there in Europe to-day if we were willing to give them the credit, but one of our troubles has been that they have not had the credit. When we finally stopped giving them the credit, trouble came on in this country, our prosperity ceased, and we can not have a market for our surplus products, whether agricultural or manufactured, unless those who buy from us are permitted to pay us for what they buy either in goods or in gold. The Senator from Idaho does not seem to understand that. Yet it is clear, as clear as anything that can be, and the difficulty we are in to-day is that we are now for the first time a creditor nation, when before the war the balance of trade was always against us.

With reference to this amendment, I am very glad, indeed, that the committee has offered these amendments. There is one amendment, however, which has not been offered, which I think is highly necessary, and I assume it has not been offered through inadvertance. In subdivision (c), page 4, the amendment as now proposed will read:

> That in ascertaining the differences in costs of production, under the provisions of subdivisions (a) and (b) of this section, the President, in so far as he finds it practicable, shall take into consideration (1) the differences in the costs of production, including wages, costs of material, and other items in costs of production of such or similar merchandise in the United States and in competing foreign countries.

Then they propose, inadvertently, I hope, to retain the next clause:

> The differences in the wholesale selling prices of domestic and foreign merchandise in the principal markets of the United States, but in considering prices as factors in ascertaining differences in costs of production, only reasonable profits shall be allowed.

Surely, I do not think the committee could have intended that.

Mr. McCUMBER. Mr. President, I had the matter in mind, and was intending, when we reached that, to ask that that portion be stricken out.

Mr. LENROOT. That will harmonize the whole. Then, Mr. President, I have only one other suggestion to make, and inasmuch as that will be discussed later, as the chairman of the committee stated that he would discuss the question of the recommendations of the Tariff Commission, I will reserve my comment until that is reached.

I heartily support the amendments of the committee, except that I would like to ask this question with reference to this amendment: Will the committee be willing, purely as a constitutional safeguard, to strike out the words "in so far as he finds it practicable," on page 4, lines 20 and 21? There is no reason for leaving it to be inferred that he is not to be required to take those things into consideration.

Mr. McCUMBER. Let me answer the Senator right now. The provision reads:

> That in ascertaining the differences in costs of production, under the provisions of subdivisions (a) and (b) of this section, the President, in so far as he finds it practicable, shall take into consideration (1) the differences in conditions in production, including wages, costs of material, and other items in costs of production of such or similar merchandise in the United States and in competing foreign countries.

He must find the difference in conditions in production. Suppose there are some of these things he can not find out. We have been trying for many years, through our consuls, and in other ways, to get the costs of production of articles in foreign countries, and we have failed in a great many instances. We have no control over the foreign manufacturer. We can not compel him to submit his books to the investigation of our officials. We tried it in France under a law which we never put into operation. There was such a storm of protest that it was abandoned. It may be that there are many instances in which it will become impossible. The President might be able to find the difference in the selling prices in the two countries; that is very simple. In most instances he would have no difficulty in doing that, and he would take that into consideration. He might find that, and yet he could not, possibly, find the other. Therefore we use the words "in so far as practicable." I have no objection to saying "in so far as possible," but I do not want to tie his hands and provide that if he fails to find every one of these things he may not take into consideration

those things which he is able to ascertain; because, after all, the Senator will agree with me that they are merely evidential, or sort of advisory, facts. They do not change the fact that he has to arrive at the difference between the costs of production at home and abroad.

Mr. LENROOT. I do not think the Senator quite gets my point. Of course, I appreciate all that the Senator has said; but there is no one to question the final result or conclusion the President comes to. But when you use the words "if he finds it practicable," you lodge an option with the President, instead of laying down an absolute rule, and my only point is to safeguard, to the fullest extent possible, the constitutional question involved.

Mr. SMOOT. There is one other situation I want to call to the Senator's attention, and I think more than likely this is a condition we will have the most trouble with and perhaps the only one we will have trouble with. Let us consider patented articles, for instance, which fall in the chemical schedule—and, by the way, the Senator will see that those are the most difficult we have to reach—it is an utter impossibility to find the cost of production. Neither the President, the Tariff Commission, nor any other living soul, outside of the manufacturer, can tell just what the production cost of those articles is, and the manufacturer is not going to divulge it. In such a case I think the only thing to do is to use the plan as outlined here and come as near to the cost of production as possible.

Mr. LENROOT. Does the Senator think anybody can question the conclusion the President comes to?

Mr. SMOOT. I am not quite certain about it. I think more than likely it will be undertaken at least, and I am not certain but that it could be carried into court.

Mr. LENROOT. I am very much more afraid that they will go to court with this option left with the President and defeat the entire proposition.

Mr. SMOOT. The Senator can see the object the committee had in view. I do know that there are articles that it is absolutely impossible to secure the cost of production of.

Mr. LENROOT. Let me make a suggestion. Suppose we use the words "in so far as he finds it possible to secure information with reference thereto." I think that would clear it up.

Mr. SMOOT. I am not particular whether the word "practicable" or the word "possible" is used. I think they both mean the same. But I will ask the Senator to pass that now.

Mr. LENROOT. I am going to let it pass and be considered fully in conference.

Mr. SMOOT. I think that is the best way to handle it, because I know there are articles—few in number, I admit—where it will be difficult to get the costs of production. But whether there are few or many, we must not lay down a rule for the President to follow which he can not follow.

Mr. GOODING. Mr. President, the position of the Senator from Wisconsin and my position on the tariff question have been entirely different, I am quite sure, and every one understands that very fully. I should have been glad to vote for his 60 per cent rate on grass rugs if the committee had concluded to give the Senator the 60 per cent he asked for. There is no doubt in my mind that that industry needs a 60 per cent rate based on foreign valuation. The point I want to make clear is that the Senator from Wisconsin did ask for a high duty as far as manufacturing industries in his own State were concerned, but when it came to other industries, the wool industry, for instance, although they have a few sheep in Wisconsin, he was not willing to give within 50 per cent of the difference in the cost of production of a pound of coarse wool in this country and foreign countries. No argument would persuade him to see that a 60 per cent ad valorem duty on wool, which was worth 15 cents a pound landed here at 25 cents, would come anywhere near the difference in the cost of production abroad and at home. That is what I am finding fault with. I think the Senator has been unfair toward agriculture, and I am forced to that conclusion by the amendment he has now offered, because if the farmers of the West are not going to be permitted to ship their food products into New York City, the time is never coming in this country when the consumption of this country will catch up with the production.

We do not need to find a foreign market for farm products if we will encourage the production of those farm products which are not developed up to our own requirements. It would require 2,000,000 acres more of farm land to produce all the sugar we need in this country for our own use. If we bring about a balanced condition upon the farms here, we will not need to go abroad for a market for farm products any longer. That is just what the Senator from Wisconsin has been opposing. We have a long line of railroads in this country, manned by the most expensive labor in all the world, with freight rates, of necessity, high, and if the freight rates are not to be taken into consideration, then there is not much left for the farmer on any rate that is to be reconsidered by the Tariff Board and the President.

I made the statement upon this floor the other day that a friend of the farmer could not stay in the employ of the present Tariff Commission, and I repeat that statement, and there is plenty of proof of it. I am not going to take up time now to discuss that, but before we get through with this tariff bill I am going to show to the Senate that this commission is not friendly to agriculture. Yet they are to furnish the information upon which the duties in this bill are finally going to be based.

Again, I want to commend those who have made a fight and have given agriculture, for the first time in the whole history of this country, fair duties on farm products; not great protection, only 18 per cent on an average, eliminated, if you please, by the increase in freight rates.

Mr. SIMMONS. Mr. President, I do not criticize the Chair for being so much interested in the little quarrel that is going on upon the other side of the Chamber that he does not always see us on this side when we rise to speak. I am very much interested myself in that quarrel. The quarrel that is going on over there is a great tribute to the position we have taken from the beginning upon the pending bill. It is extremely gratifying to find, although it is late in the day, that it has been discovered by many already and is being discovered by still others on the other side of the Chamber that the bill is unbearable and that it must be greatly mended, and that otherwise it will meet the almost universal condemnation of the people of the country, without regard to party and without regard to class or occupation.

It is a very good rule when the opposition becomes an unhappy family and begins to quarrel among themselves that outsiders should not interfere. I have not any disposition to interfere or in any way to throw any obstacle in the way of the controversy and the conflict of opinion and the disagreement that is developing on the Republican side. I hope that out of it some good may come, although I know how impossible it is to amend this bill so as to make it acceptable to the people of the United States. It is very rarely that a minority political party in its opposition to legislation proposed by the majority party has found so quickly a justification of its criticisms and of its condemnations of the proposed legislation as has happened with reference to the pending bill. But it is now too late to make the pending measure a good bill. We could not by ever so much amendment of the later provisions of it remedy the wrongs in the earlier provisions already adopted.

I think the situation ought to suggest to the Republicans in the Senate the wisdom and the propriety of right now recommitting the bill to the Finance Committee in order that it may be rewritten. Of course, I can not say even if it were recommitted whether the committee would rewrite it so as to make it a good bill, even from the protection standpoint, or one that would be satisfactory to the other side of the Chamber or satisfactory to the country. But in the light of all the information we have furnished during the discussion I am confident they would write a more conservative bill from a Republican standpoint and one that might possibly meet the approval of a larger percentage of their own party than does the pending bill. At present the bill seems to be a sort of bastard that nobody is willing to father, not even the committee itself, because constantly after the committee have had meetings and made changes, when it comes to a discussion of the proposed changes in the original amendment they have to change even those three or four times before they can get them in shape at all palatable to Senators on their own side of the Chamber.

What is going on now on the other side of the Chamber is nothing but this: The committee find that they are in a situation where, unless they yield here and there to the demands of this particular faction and that particular faction on that side of the Chamber, they may have some difficulty in passing the bill and they are trying as best they can to so change the measure as to meet the views of all the elements on their side of the Chamber, at least to an extent that may save the bill from utter wreck and defeat.

I am not, as I said, disposed to interfere. We have the amendments here offered by the Senator from Wisconsin [Mr. LENROOT]. They are wise amendments. They at least modify the drastic and almost unlimited powers which the bill would confer upon the Executive. They impose some limitations upon that power. The first amendment proposes to substitute for the rule by which the President is to be governed when he goes to increase a rate the requirement that he shall base his final decision upon the difference in the cost of production here and abroad instead of, as in the committee amendment first

proposed, upon the theory of equalizing conditions of competition here and abroad.

From the very inception of the bill we have insisted on this side of the Chamber that the real measure of protection, according to the theory of the Republican Party and all the champions and advocates of protection heretofore in the country, was the difference in the costs of production here and abroad. We have complained that a committee of that party, framing the tariff legislation under their mandate from the people, was ignoring that principle and was establishing a rate based upon the difference in the selling price in this country and abroad, and that that meant nothing more than a guarantee to the producers of the United States of present high prices and an opportunity further to advance their prices without incurring the danger of foreign competition. That was not only a radical change in the Republican theory of tariff making and the Republican formula of tariff bills, but it was a dangerous theory to adopt in levying taxes upon the people.

Mr. WALSH of Montana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Montana?

Mr. SIMMONS. I yield.

Mr. WALSH of Montana. I observe there is constant accession and constant enlargement of the rule. Originally the rule was the difference in the cost of production here and abroad. The Republican platform in 1908 added to that "reasonable profits," so it gave the cost of production with a reasonable profit to the American manufacturer. Now it is boldly proclaimed that the rule should be the difference in the cost of production here and abroad, the difference in the cost of transportation from the interior to the consuming point, and, in addition to that, a reasonable profit.

Mr. SIMMONS. Yes; all the possible elements of wrong and oppression to the people are inherent in this scheme of framing a tariff bill as brought in by the committee.

Mr. President, the bill was framed upon the principle of equalizing the prices of products produced in this country as compared with products produced in other countries when sold in this country. Every rate that the committee made has been upon that theory. That meant a much higher rate in many instances than the rate based upon the difference in the costs of production here and abroad. But that principle still remains in the bill. It is a part of every item in the bill.

Now the proposition is to confer the additional power upon the President to increase the rates to the extent of 50 per cent, in his discretion. As the bill was originally written the President was permitted to increase them upon the same theory that the rates were written in the bill, but the Senator from Wisconsin [Mr. LENROOT] comes now and says, "That is all wrong; the rates ought to be fixed upon the basis of the difference in the cost of production; the President ought to be limited to that rule." If the President ought to be limited to that rule in the raising of the rates, the committee ought to be limited to that rule in the making of the rates. Therefore I say the bill ought to be recommitted. The amendment offered by the Senator from Wisconsin greatly improves the elastic tariff provision because it denies the President an opportunity to fix the additional rate upon an elastic sort of formula and requires him to fix it upon a fixed formula.

That is an improvement to the extent that it applies to the presidential powers. It is to that extent a return to the Republican theory of tariff protection. But does it not inject into the situation a strange anomaly? It does this, Mr. President, and I call special attention to it: We shall have the rates of the bill made upon one theory, and if they are increased we shall have them increased by Executive fiat upon an entirely different theory. Was there ever any proposition more absurd than that?

Having framed their bill upon one theory fundamentally different from the theory of the difference in the cost of production the committee now come here and, under the exigencies of the situation, in order to save their faces, in order to prevent an insurgency in their own ranks, with reference to the increase of the rates by the President under the authority they have given consent to the application of an entirely different principle than that upon which they have written the bill. But, Mr. President, notwithstanding that, it is better than the original proposition and I am ready to support the modification.

Now, Mr. President, it is also proposed as a part of the compromise arrangement to be forced through here—not by us but by the other side of the Chamber to prevent insurgency in their own ranks—to limit the application of the American valuation scheme which the President is authorized almost at will to proclaim and to limit it to articles which are either related to the dyestuffs industry or to the chemical substances which are in some way or other connected with the dyestuffs business.

That is an improvement. Anything that would limit the application of the principle of American valuation would be an improvement. When the committee struck out American valuation in its application to the rates carried in the bill they greatly improved the bill. I hope they will be able to retain that improvement in conference. But let it be understood that the majority are forced in order to meet a delicate and a dangerous situation growing out of Republican discord and dissatisfaction with the committee and its bill to reduce the presidential authority to apply American valuation so as to limit it to only one industry—although that industry is the best cared for industry in the whole bill, although that industry is loaded down with prohibitive and embargo protection. Nevertheless it is better to have the authority to apply American valuation conferred only as to that one industry than to have it apply to every duty in the bill.

I am disposed to support that proposition, Mr. President, and I hope this side of the Chamber will support it. I shall support the two amendments offered by the able Senator from Wisconsin [Mr. LENROOT] not because of their inherent virtue but because they somewhat improve a very bad measure, although they still leave that measure extremely bad. I shall support those amendments and I hope other Senators on this side of the Chamber will support them because of their ameliorating influence in making this bill a little better.

Mr. President, as I have stated, I have been a very interested spectator in this Republican debate and family row. I was very much interested in the colloquy which took place between the Senator from Idaho [Mr. GOODING] and the Senator from Wisconsin [Mr. LENROOT] over the inclusion of the consideration of freight rates in the presidential powers that are proposed to be conferred. The Senator from Idaho wishes the President to be given power in levying these 50 per cent additional taxes to include the consideration of freight rates. The Senator from Idaho need not worry himself about freight rates. Freight rates are taken care of in the duties which are already written in the bill. There is no one of them that is not sufficient to cover the freight rates. Wherever freight rates were an element they were considered and testimony was taken about them in the open hearings. The freight rates are amply provided for, but now the Senator from Idaho wishes the freight rates to be provided for a second time.

Mr. President, I did not rise for the purpose of discussing these amendments nor did I rise for the purpose of discussing the pending bill or any of its paragraphs. I simply rose for the purpose of making clear the motive of Senators on this side of the Chamber in supporting the amendments of the Senator from Wisconsin. I do wish to say, however, Mr. President, before I conclude, that the Senator from North Dakota [Mr. MCCUMBER], after the very able speech of the Senator from Alabama [Mr. UNDERWOOD] and after the Senator from Alabama had left the Chamber, made quite a vigorous assault upon the position of the Senator from Alabama and in scathing terms referred to the tariff bill which bears the name of the great Senator from Alabama. He said that the Democratic Party was blessed by Providence in connection with that legislation by the fact that a great war broke out immediately after it was put in operation and saved the country from the wreck and ruin which otherwise would have followed in its wake. The Senator from North Dakota forgot the fact that the Great War to which he refers as the saving power ended nearly four years ago.

What is the essential or the fundamental ground upon which Senators on the other side of the Chamber are asking for this new legislation, Mr. President? Is it not upon the ground that the United States to-day, on account of the low rates of the Underwood law, is being flooded, inundated, and submerged by the influx of cheap foreign products, which, they say, are sold at ruinous prices in competition with like American products, and that by reason of this enormous influx it is necessary that the tariff wall be raised higher in order that foreign products may be kept out; that the Underwood law is not doing its duty in that respect, and that we need and must have sky-high rates and sky-high walls of protection thrown around the borders of America in order to keep out foreign goods? The Senator had overlooked the fact, I am quite sure, that for the year ending June 30, 1922, the imports into the United States under existing law were a billion dollars less than they were for the year ending June 30, 1921, and that the exports for the year ending June 30, 1922, were about $3,000,000,000 less than they were for the year ending June 30, 1921. In other words,

there was a decrease in one year, and that the last year, of a billion dollars in our imports, followed by a falling off of $3,000,000,000 in our exports.

Now, Mr. President, if this bill shall be passed and its high and prohibitive rates shall, as they probably will, bring about another great reduction in our imports followed by a like proportionate decrease in our exports, which have already been reduced to about $3,000,000,000, our export trade will practically be wiped out, while our imports will be confined to a few things not produced in the United States at all.

Mr. WILLIS. Mr. President, I had hoped a vote might be reached on the pending amendment before I was compelled to leave the Chamber, but it is apparent that that action can not be had. Therefore, I wish to say only a word upon this subject.

Were I able to be present when the vote is taken I should very cordially support the amendment offered by the committee as modified by the acceptance of the amendment offered by the Senator from Wisconsin [Mr. LENROOT]. I believe that is in harmony with good policy and will accomplish much of good. Were I able to be present I should also vote for the amendment which has already been offered by the Senator from New Jersey [Mr. FRELINGHUYSEN]. I believe that amendment also is in the direction of wise legislation.

Mr. President, because of illness in my family I am compelled to leave the Chamber and the city and shall be absent for several days. I, therefore, ask unanimous consent to have printed in the RECORD, in regular eight-point type, a brief statement which I recently gave to the press relative to the general subject now under discussion, and let that stand as an expression of my views.

The PRESIDENT pro tempore. Is there objection?

Mr. SMOOT. Mr. President, I did not quite understand the request of the Senator. Is it a speech of the Senator which he has asked to have printed in the RECORD in regular type?

Mr. WILLIS. Mr. President, I had intended to make some observations on the amendment offered by the Senator from New Jersey [Mr. FRELINGHUYSEN] when we reach that point, but I am compelled to leave the Chamber in order to catch a train, and I ask unanimous consent to have printed in the RECORD the statement to which I have referred as an expression of my views on the so-called Frelinghuysen amendment.

Mr. SMOOT. I think under the rules, Mr. President, that can not be done. I have no objection at all to the Senator doing it if it can be done.

Mr. WILLIS. Mr. President, I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state his parliamentary inquiry.

Mr. WILLIS. The parliamentary inquiry which I wish to propound to the Chair is whether, under the unanimous-consent agreement, there can be any objection to printing in the RECORD the statement which I have offered?

Mr. MOSES. Mr. President, I will say to the Senator from Ohio that the rules of the Joint Committee on Printing, which controls the RECORD, are that, so far as the Senate is concerned, nothing shall be printed in the RECORD which has not been spoken in the Chamber, except that a speech made by a Senator in another place or a statement made by a Senator in another place may be printed by unanimous consent. My understanding is that the Senator has made a statement in the newspapers.

Mr. WILLIS. The statement which I have presented has been carried in a number of newspapers.

Mr. MOSES. And the Senator desires unanimous consent to print that statement in the RECORD as an expression of his views?

Mr. WILLIS. That is correct.

Mr. MOSES. That comes clearly within the rule.

Mr. SMOOT. That is, the Senator can print a newspaper report in the RECORD.

Mr. MOSES. Absolutely; yes.

Mr. SMOOT. But, as I understood the Senator, the matter which he desires printed in the RECORD is what he wanted to say upon the floor of the Senate.

Mr. MOSES. Oh, no.

Mr. WILLIS. The Senator from Utah misunderstood me. The statement to which I have referred has already been given to a number of newspapers in the country. I understand the rule, and I am not proposing to extend my remarks in the RECORD, as is the practice in another body sometimes; but I have asked to have printed in the RECORD a newspaper statement which I prepared and which has been already published.

Mr. SMOOT. I was going to say that if it were a statement prepared by the Senator and he had to leave the Chamber, if he desired me to do so, I would be glad to read it, or let the Secretary read it; but if it is a newspaper report, I have no objection to its being printed in the RECORD.

Mr. WILLIS. Evidently it comes within the rule and may be printed in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the statement will be printed in the RECORD as requested.

The statement referred to is as follows:

"I have long been heartily in favor of a scientific and businesslike method of drafting out tariff measures as against the awkward method which has long been pursued. The situation in which Congress finds itself to-day, after more than a year's deliberation on the pending measure, convinces me that the amendment offered by Senator FRELINGHUYSEN, if enacted into law, will aid in relieving the country from the uncertainty and recurrent business upheavals that inevitably accompany the formulation of new tariff measures.

"The principle governing the tariff policy of the country must, of course, remain a party matter; but there is no reason why the business interests of the country should continue to be at the mercy of a system of tariff making that is archaic in conception and inaccurate in its workings. No matter how diligently and conscientiously Congress endeavors to obtain the necessary facts on which to base tariff rates, it is exceedingly difficult for it properly to determine differences in production costs at home and abroad, and upon this determination depends the interests of labor, agriculture, and industry. It is time for this country to adopt a businesslike tariff system through the organization of adequately equipped machinery for the determination of unbiased facts regarding the differences in the cost of production here and abroad. Unless such a system is adopted the vast and intricate industrial machinery of this Nation is bound to suffer losses that will react seriously against the orderly progress and prosperity of all of the people. For that reason I am heartily in favor of the Frelinghuysen amendment, which would enlarge the personnel and the scope of the Tariff Commission, giving the commission power through hearings and by investigation to ascertain the facts and determine the rates to be reported to Congress as necessary for the adequate and full protection of agriculture, industry, and labor.

"The Frelinghuysen amendment contemplates no abdication of authority by Congress—Congress still is to fix the rates of duty as the Constitution provides—no attempt is made to delegate this authority, and in my view any attempted delegation of rate-making power would be unconstitutional and void.

"As matters now stand, the Ways and Means Committee of the House and the Finance Committee of the Senate collect, through public hearings, the facts upon which tariff legislation is based. Everyone with any experience in the framing of a tariff bill knows how biased and inaccurate are the statements sometimes made in such hearings. Without doubt the facts collected and the Tariff Summary prepared by the existing Tariff Commission have been of great value in aiding Congress to reach just conclusions and establish fair rates.

"But how much more effective the work of the commission would be if its scope were enlarged and more adequate machinery provided for ascertaining facts.

"The commission and its experts would be constantly at work ascertaining new facts as new conditions arise. Such ascertainment would obviate the necessity for congressional hearings covering many months, while at the same time in no way interfering with the right of Congress to hold hearings. The facts being already at hand, Congress could proceed much more promptly to the enactment of tariff legislation and delays costly to American business and American industry would be to a great extent avoided.

"The Frelinghuysen amendment preserves unimpaired the power of Congress to fix rates, provides reliable, ascertained facts as a basis on which to build tariff legislation, avoids delays in tariff making, and tends to realize in this important class of legislation President Harding's ideal of 'more business in government.'

"I believe American producers look with great favor upon Senator FRELINGHUYSEN's sensible, businesslike proposition. I shall support it and I hope and believe it will be adopted."

The PRESIDENT pro tempore. The question is upon the first amendment proposed by the Senator from North Dakota [Mr. MCCUMBER] to the former amendment offered by him. The Secretary will state the amendment to the amendment.

The READING CLERK. On page 1, lines 8 and 9, it is proposed to strike out "conditions of competition in the principal markets of the United States" and insert in lieu thereof "costs of production."

Mr. WALSH of Montana. I ask the Secretary to read the provision as it will read if the amendment is adopted.

The PRESIDENT pro tempore. The Secretary will read the amendment in connection with the context.

The READING CLERK. As amended, it would read:

SEC. 315. (a) That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in costs of production of articles wholly or in part the growth or product of the United States and of like or similar articles wholly or in part the growth or product of competing foreign countries, shall find it thereby shown that the duties fixed in this act do not equalize the said differences in—

In line 4, strike out "conditions of competition" and insert "costs of production"—

he shall by such investigation ascertain said differences and determine and proclaim the changes in classifications—

Striking out "or forms of duty"——

The PRESIDENT pro tempore. The Senator from Montana did not ask for the reading of the entire series of amendments, the Chair understands.

Mr. WALSH of Montana. The whole context.

Mr. UNDERWOOD. Without objection, I suggest that the amendments to that particular paragraph be acted on together.

Mr. SMOOT. The chairman of the committee asked that each amendment be considered separately, and the Senator from Wisconsin asked that that be done, too.

The PRESIDENT pro tempore. Unless otherwise ordered, the amendments must be considered separately.

Mr. WALSH of Montana. I suggest that the amendments in this particular paragraph be voted on in block—that is, where "difference in costs of production" is substituted for "conditions of competition."

Mr. SMOOT. As to this particular paragraph, where it is a question of "costs of production" in the whole amendment, I see no objection to voting on them in block.

The PRESIDENT pro tempore. There must be a definite request before that can be done.

Mr. SMOOT. I think, however, we will save time by just going on as we are, because when the question is decided in one place it will be decided the same way in the others.

Mr. WALSH of Montana. The question, then, is upon the amendment found in line 8 on page 1?

The PRESIDENT pro tempore. Yes.

Mr. WALSH of Montana. Upon that I ask for the yeas and nays.

The PRESIDENT pro tempore. The Chair desires an understanding. Does the Senator from Utah ask that certain of these amendments be considered in block and that a single vote be had upon them?

Mr. SMOOT. No; I have withdrawn that suggestion. I think the best way to do is to proceed with each amendment separately.

The PRESIDENT pro tempore. The question is upon agreeing to the first amendment, which the Secretary has stated, to the amendment offered by the Senator from North Dakota. Upon that the Senator from Montana requests the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). Transferring my general pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Vermont [Mr. PAGE], I vote "yea."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. BALL], who, I am informed, is absent. I transfer that pair to the Senator from Texas [Mr. CULBERSON], and will vote. I vote "yea."

Mr. UNDERWOOD (when Mr. HARRISON's name was called). The Senator from Mississippi [Mr. HARRISON] is paired with the Senator from West Virginia [Mr. ELKINS]. If the Senator from Mississippi were present he would vote "yea."

Mr. McCUMBER (when his name was called). I transfer my general pair with the junior Senator from Utah [Mr. KING] to the junior Senator from Washington [Mr. POINDEXTER] and will vote. I vote "yea."

Mr. SIMMONS (when his name was called). I transfer my general pair with the junior Senator from Minnesota [Mr. KELLOGG] to the senior Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "yea."

Mr. WATSON of Georgia (when his name was called). I transfer my general pair with the Senator from California [Mr. JOHNSON] to the Senator from Ohio [Mr. POMERENE], and will vote. I vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my pair with the Senator from Mississippi [Mr. WILLIAMS] to the Senator from Maryland [Mr. FRANCE], I vote "yea."

Mr. WILLIS (when his name was called). On this question I am paired with my colleague, the senior Senator from Ohio [Mr. POMERENE]. I am advised, however, that if he were present he would vote as I expect to vote, and I therefore feel at liberty to vote. I vote "yea."

The roll call was concluded.

Mr. SUTHERLAND (after having voted in the affirmative). I transfer my pair with the Senator from Arkansas [Mr. ROBINSON] to the Senator from Maryland [Mr. WELLER], and will allow my vote to stand.

Mr. HALE. I am paired with the Senator from Tennessee [Mr. SHIELDS]. If he were present he would vote as I shall vote, and I therefore feel at liberty to vote. I vote "yea."

Mr. JONES of New Mexico. I have a general pair with the Senator from Maine [Mr. FERNALD]. I do not know how he would vote on this question. I therefore withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. CURTIS. I wish to announce that the Senator from Minnesota [Mr. NELSON] is necessarily absent, on account of a death in his family. He is paired with the Senator from Massachusetts [Mr. WALSH].

I also wish to announce that the Senator from West Virginia [Mr. ELKINS] has a general pair with the Senator from Mississippi [Mr. HARRISON].

The result was announced—yeas 67, nays 4, as follows:

YEAS—67.

Ashurst	Frelinghuysen	McLean	Smith
Borah	Gerry	Moses	Smoot
Brandegee	Glass	Myers	Spencer
Broussard	Hale	New	Stanley
Calder	Harreld	Newberry	Sterling
Cameron	Harris	Nicholson	Sutherland
Capper	Heflin	Norbeck	Swanson
Caraway	Jones, Wash.	Oddie	Townsend
Colt	Kendrick	Overman	Trammell
Cummins	Keyes	Pepper	Underwood
Curtis	Ladd	Phipps	Wadsworth
Dial	Lenroot	Ransdell	Walsh, Mont.
Dillingham	Lodge	Rawson	Warren
du Pont	McCormick	Reed	Watson, Ga.
Edge	McCumber	Sheppard	Watson, Ind.
Ernst	McKellar	Shortridge	Willis
Fletcher	McKinley	Simmons	

NAYS—4.

Bursum	Gooding	McNary	Stanfield

NOT VOTING—24.

Ball	Hitchcock	Nelson	Pomerene
Culberson	Johnson	Norris	Robinson
Elkins	Jones, N. Mex.	Owen	Shields
Fernald	Kellogg	Page	Walsh, Mass.
France	King	Pittman	Weller
Harrison	La Follette	Poindexter	Williams

So Mr. McCUMBER's amendment to his amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment proposed by the Senator from North Dakota.

The ASSISTANT SECRETARY. In the amendment proposed by the Senator from North Dakota, on page 2, line 4, it is proposed to strike out the words "conditions of competition" and to insert in lieu thereof the words "costs of production."

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment to the amendment.

The ASSISTANT SECRETARY. On page 2, line 6, after the word "classifications," it is proposed to strike out the words "or forms of duty."

Mr. WALSH of Montana. Mr. President, I have not been advised that it was the purpose of the committee to make the change now proposed. I have heard no discussion of that subject. That language was supposed to refer to a contemplated change of the rate from specific to ad valorem, or from ad valorem to specific. Is it the purpose of the committee to abandon that?

Mr. McCUMBER. Mr. President, I stated, perhaps when the Senator from Montana was not in the Chamber, in the discussion of the proposals we had made this morning, that this was one of the proposals which was to prevent the President from changing the form of duty, so that if there is a specific duty, even though he has the right to increase it or decrease it 50 per cent, he can not change it to an ad valorem duty, and so of an ad valorem, and so of a compound duty. He may change each of them, but he can not change the form.

Mr. WALSH of Montana. Will the Senator advise the Senate as to what reason impelled the committee to recommend that change?

Mr. McCUMBER. The reason was that a great many Senators felt that the duties which were fixed upon a specific basis were fixed in that way so that if the price rose or fell, at least that part of the duty would not be changed, and if it were all an ad valorem duty, while the ad valorem might be satisfactory to-day, it might not be satisfactory to allow the entire duty, in its compound form, to fall lower than that which would be fixed by the ad valorem standing alone.

Mr. WALSH of Montana. I was afraid that perhaps the committee had been impelled by my argument as to the legality of the proposition.

Mr. McCUMBER. We were not governed in doing this by the thought that we were making that constitutional which otherwise would not be constitutional.

Mr. WALSH of Montana. Before the Senator takes his seat, I would like to understand, before we vote on it, whether the committee considered the matter of taking out the power to change the classification?

Mr. McCUMBER. Yes; the power to change the classification is still retained.

Mr. WALSH of Montana. What does the Senator understand by the term "classification" as used here? What is a change in the classification?

Mr. McCUMBER. If you want to raise the duty, a matter may be taken out of a basket clause, for instance. The duty might be 30 per cent in the basket clause, and it might be 35 per cent if the article were classified in some other paragraph; or it might be 35 per cent in one paragraph, and it could be changed from that to a paragraph bearing a lower rate of duty.

Mr. WALSH of Montana. That is my understanding of the matter. That is to say, this gives the President power to take a certain specific article out of one paragraph and put it into another paragraph.

Mr. McCUMBER. Yes; but does not allow him, of course, to take one from the free list and put it on the dutiable list, or from the dutiable list and put it on the free list.

Mr. SMOOT. There may be a thousand articles in a basket clause, and there may be only one article in the basket clause the rate on which should be raised, and if this power were not given to the President, but if he had to raise the duty in the basket clause to take care of that one article, it would take in all of the other articles in that basket clause.

Mr. WALSH of Montana. Congress has deemed it wise, as a matter of policy, to put the particular commodity in the basket clause. That is a policy which Congress has declared. But by this, the President of the United States may substitute his own policy for the policy of Congress, and put the article in some specific paragraph.

Mr. McCUMBER. But if he acts at all it must be only to bring the rate up to what we have defined as the difference in the costs of production or bring it down to that. So we have fixed a definite condition which the tariff duty must meet, whether it is raised or lowered.

Mr. WALSH of Montana. The change in the form of duty has now been eliminated. The power is left in the President, however, to raise or lower the duty within the limits prescribed. With that power, what additional authority is given to him by this provision which affords him an opportunity to change the classification, and what is the purpose of giving him the right to leave this commodity in the paragraph in which Congress has placed it, with the right to raise or lower the rate? What is the object and what additional powers are given to him when he is given the right to take the article out of one and put it in another paragraph, being limited in both instances by the difference in the costs of production?

Mr. McCUMBER. He certainly can not put it in another paragraph unless by placing it in that other paragraph he effectuates the purposes which we declare as the congressional intent, namely, that that paragraph, with that rate, will exactly measure the difference between the costs of production at home and abroad. I do not know that there will be a single instance in which the President will find it practicable to do that, and I confess, so far as I am concerned personally, that I would just as soon have left the classification out, because in every instance the duty imposed upon him is to make a rate which will exactly measure the difference between the costs of production at home and abroad.

Mr. WALSH of Montana. That is just the point I am making. We are legislating now. We are making a law. Under this law the President, leaving the commodity in the paragraph in which it has been placed by Congress, may raise or lower the duty so as to exactly cover the difference in the costs of production here and abroad. That is perfectly well understood. But now Congress has gone further than that and given him some other power, namely, to take the article out of the paragraph in which it is and put it in another paragraph, being likewise controlled by the necessity, when it is changed, of fixing the rate at such a figure as will cover the differences in competition. When that statute is construed by the courts, they will say that some reason must have actuated Congress in giving this additional power to the President to change the classification. What was it? Thus far we have no answer.

Mr. McCUMBER. Let me give the Senator one illustration. We will take a paragraph, for instance, which contains perhaps a dozen different articles or items, all bearing the same rate of duty. Let us assume that there is a paragraph preceding this paragraph which fixes the rate at 30 per cent ad valorem. A subsequent paragraph, we will suppose, fixes the duty on half a dozen articles at 35 per cent ad valorem. The President finds that the duty on one of those articles is 5 per cent too high. This provision gives him the power to put just that one article, without fixing a different rate for it specifically, in the paragraph above. I do not say that it is the better way, but I do say that in that way the real purpose is effectuated. There may also be cases in which it may be necessary to divide the classification in a paragraph and impose varying specific or ad valorem rates, according to the value or weight or some other form of measurement, in order to equalize the differences in costs of production.

Mr. SMOOT. Many times after a tariff bill is enacted into law there is an invention, or an article is discovered and made for commerce which is not specifically provided for in the tariff law. That would fall into a basket clause, as the Senator from Montana knows. It may fall in a basket clause, the duty on which is not nearly sufficient to take care of the item, and in that case, of course, the President would have a chance to transfer it to the classification where it belongs.

Mr. REED. Mr. President, is it not true that there are all sorts of qualifications introduced in certain clauses of this bill which do not apply to the basket clause, so that by removing an article from the basket clause, for instance, to one of the other clauses there will be many conditions which will affect the tariff and affect the production of the article in addition to the mere matter of the tariff rate?

Mr. McCUMBER. I did not quite understand the question of the Senator, if it was directed to me. I do not know that it was.

Mr. REED. Is it not true that in certain of the clauses of the bill there are conditions, outside of the rate of duty, which do not appear in certain other clauses, so that by removing an article from one clause to another there may be effected not only a change in the tariff rate but there may be also conditions fastened onto the article?

Mr. McCUMBER. That is a possibility.

Mr. REED. That, then, would indicate a reason for making this change.

Mr. McCUMBER. I do not have in mind any condition which would interfere with the rate which would be required to be paid.

Mr. REED. There are other things besides rates. Some of these clauses contain provisions with reference to the package in which an article is contained. I think some of them do not contain them. Of course, I am compelled to admit that my prolonged absence has kept me from studying the close details of this bill. That was the question I wanted to ask, and the Senator has answered it.

It seems that we are about to transfer the taxing power from Congress to the Executive. The proposition is that we shall trust the Executive to really fix the tariff rates, but the recent amendments indicate that while the philosophy is that we shall trust the President we must not trust him too far, and therefore we are going to put a limitation upon him. Just one word in regard to this whole scheme of transferring the taxing power to the Executive. For hundreds of years under our Anglo-Saxon system of government the power to levy taxes and to create revenues has been the great lever employed by the friends of free government and of liberty to preserve the rights of the people. It was the employment of this single force that broke the power of the scepter of British kings. It was this fact that was recognized by the fathers of the Republic when they vested in the House of Representatives the sole power to originate revenue measures. The action which is contemplated to-day is a reversal of all of the traditions and of all of the principles of the British Government and of the American Government with reference to the raising of revenues. It is an invasion of the greatest right reserved to the people of this land for their protection.

Mr. STANLEY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Kentucky?

Mr. REED. I yield.

Mr. STANLEY. I would suggest to the Senator in that connection, as illustrative of the truth of what he says, that there were more than 30 amendments to the great Magna Charta from the time of King John until the revolution of 1688, and almost without exception every single one of those ratifications—the great charters secured by virtue of them, the Petition of Right

in 1628 and the Bill of Rights in 1689—was directly traceable to the necessities of those monarchs.

Mr. REED. I thank the Senator. He has stated in detail and with great force what I endeavored to say by generalities.

The power which it is proposed to invest in the President is a power that can be abused by the very authority to which the framers of our Republic intended to deny it. It is exactly as though the British Parliament, at the end of a thousand years of contention for the right to raise revenues and thus control the action of the King, were suddenly to reverse that policy and place in the King the very power which the Parliament has hitherto used for the purpose of controlling the action of the King. If Charles I had had the authority to increase the revenues of the crown by changing the rate of taxation, Charles I would have been able to have carried on his wars and to have crushed the English people with his armies and with his navies. All that he contended for, if I recall my history aright, was a privilege akin to the very thing which the pending bill proposes to do.

Now, it may be said that Mr. Harding will not abuse this power. I entertain, in common with the other Members of the body, a very high personal regard and respect for President Harding. I do not believe that he is a man who would willfully do a wrong to the people of the country. But two things must be remembered. First, that he is as liable to err as the other men of ability in this country. Second, we are establishing a precedent which, if it is sustained by the courts, will be followed by subsequent Congresses. We are breaking down the greatest safeguard there is in our Government. We are transferring the taxing power from Congress to the President just as certainly as we are standing here. We are traitorously assassinating the great principle which has been ingrained in Saxon government and in Saxon liberty.

I say "traitorously" doing it, for the man or the body that by subterfuge and by a technicality will defeat or undermine a great principle of government is guilty of a traitorous and infamous act. The most dangerous man in public life is not the man who boldly proposes to defy the Constitution. It is not the man who on a soap box inveighs against human government. It is not the man who assails law and authority and who harangues the mob under the red flag. Such men, their purpose being plain and their attitude apparent, will be justly estimated and measured by the people of the land. But when men sit in a great legislative body and, professing friendship for the Constitution, yet devise a means by which they can technically avoid it, if possible, and accomplish the overthrow of its principle by a subterfuge, that kind of man is an enemy to be feared. That kind of statesman is a man who is a real enemy of his country.

It is the business of this body to guard the Constitution. The courts of our land give to the decisions of the Congress every presumption of regularity and every presumption of legality and every presumption of constitutionality, contending that we are the guardians of the Constitution and that it is not to be presumed that we would willfully trample upon its precepts or that we would seek to avoid the spirit of the Constitution. That presumption has been followed in case after case, and the burden is thereby shifted to us to become the guardians of the Constitution itself. Yet men sit down and carefully devise a scheme by which they transfer this great right of raising revenue from the legislative body to the Executive, the very power against which our fathers fought to defend us when they proclaimed that revenue measures could be originated alone in the House of Representatives.

And what, I pray you, is the safeguard we have adopted? I affirm, sir, that it is nothing but the Executive will. When Warren G. Harding, as President of the United States, certifies as a fact that the cost of production in England of a certain article is greater than the cost of production in America plus the tariff, there is no board to review that action, there is no court that can go back of his decree. The courts will unquestionably say that we vested in him the sole power of determination. The courts will unquestionably say that his decision is res adjudicata of the entire question. The courts will say that we vested this power in the President, that he has exercised it, and that his decision is a finality. Thus it is proposed to transfer a power which may be abused, a power which I unhesitatingly say will be abused—and in saying that I do not impugn the integrity of the President but I rather impugn his sources of information, his environment, and his limitations.

To my mind this is one of the most appalling propositions ever made. Somewhere or other there crept into some previous statute a similar provision. Against every provision of that kind I have always stood. Where is the President to get his information? Will it be correct or incorrect? I am heartily tired of the idea of shifting congressional responsibility to the Executive's shoulders. Whenever Congress has a difficult problem to meet, it has been meeting it for some time by the simple device of turning it over to a President. How do we know the President will get the correct figures? When Mr. Harding, whom, I repeat, I respect, sat in this body none of us regarded his investigation of a question or his conclusion as a finality. All of us saw fit at any time to challenge either his statement of fact, always conceding to him perfect sincerity in making it, or his conclusion from the fact.

Inevitably he will be surrounded in the consideration of these questions by the selfish interests that desire to protect themselves. Their lawyers will be there; their experts will be there; their emissaries will be there with false figures, false data, false information, false conclusions to impose them upon him. Who will be there to represent the Congress? Who will be there to represent the American people?

These things will be done in secret; these changes will be made in the privy council, at which some underling, representing the President, will connive and conspire and counsel with the special representatives who speak for only one side of the case. There will be no one there to voice the protests of the other side; there will be no one there to speak for the American people. So Senators may trust to it as a certainty that the President will constantly be under a pressure which comes from one side, and, knowing his character as we know it, we know he is very likely to yield.

I have stood on this floor for years appealing for the preservation of the integrity of the Constitution. I have seen the Constitution disregarded time and again, and time and again the courts have been forced to declare our action unconstitutional. There may have been some shrewd lawyer, acting for the great special and protected interests, who has devised a plan which will defeat the purpose of the Constitution. If so, his service was an ill service to his country, and the action of this body in ratifying and confirming such a scheme is an ill service to the people who sent us here.

Why should this thing be done? Mr. President, we are told that there is a difference in the wage scale in Europe and in America. We know that now. We are told that there is a difference in the cost of production there and here. We know that now. Will there be a greater difference in the future? There is nothing to point to that fact. From present indications Europe is gradually emerging from its desperate condition of pauperism; the people are beginning to get their feet under them. That means a rise in the standard of living and an equalization in the cost of production.

Moreover—and my vanishing friends may continue to vanish from the other side of this Chamber—this fact is apparent to all. This body will barely complete the bill under consideration by some time in the month of September. It will not become a law, in all probability, until approximately the 1st of October. Congress will be in session again early in December, and should there be any change in conditions, Congress will be in session until the 4th of March next. If there is any change in conditions that demand attention the matter may be submitted to the Congress. If there should be any great revolution imperiling the special interests and special graft and special theft and special plunder of those who demand the right to tax the American people, while demanding that the direct taxes shall be taken off them, then Congress will be here until the 4th of next March, with the brutal Republican majority in both Houses, and able to respond to the demands of every one of those gentlemen who may want to thrust their fingers into the pockets of the American people a little deeper on the pretext that foreigners are manufacturing goods cheaper abroad than they now are. After the 4th of March, after the new elections, the President can still call Congress together to meet any great emergency.

Why, then, is this provision to be inserted in the bill? It is because Senators on the other side of the Chamber answer to their master's lash. It is because the great interests that boasted that they would elect a President are now here to collect not only their pound of flesh but the blood that goes with it. It is because the Republicans are answering to the great vested interests that came before the Committee on Finance not as citizens of the United States to present an argument in a case but as proprietors to demand that the result of the election, the thing they said they had gained in the election, should now be delivered to them. In obeying their will the Republican majority hesitate not to trample upon that great principle to which I referred, namely, that every revenue measure shall originate with the direct representatives of the people and that they alone shall have the right to originate such laws.

Suppose the House of Representatives were to levy a tax of 50 cents per ton upon steel, would it be a revenue measure? Manifestly so. Suppose the President of the United States

were to be given authority to levy a tariff of 50 cents a ton on steel, would it not be equally a revenue measure? Suppose that Congress were to pass a measure providing for a duty of 50 cents a ton upon steel and give the President thereafter the authority to increase it to $1 and he were to increase it to $1, would he not be as much originating a revenue measure as though the Constitution had vested in him the authority to levy taxes? We may quibble about it, we may dodge it as we will, but the fact will remain.

Mr. President, I do not expect to change a vote by what I have said, but I expect that what I have said will at least record my protest, and I believe that when next November comes there will be a protest from the people who pay the taxes against the people who levy them, from the voters of the land against the voters of Congress.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from North Dakota [Mr. MCCUMBER] to the amendment heretofore proposed by him.

Mr. REED. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. REED. I ask that the amendment may be stated.

The PRESIDENT pro tempore. The Secretary will again state the amendment.

The ASSISTANT SECRETARY. On page 2 of the proposed amendment of the Senator from North Dakota in line 6 it is proposed to strike out the words "or forms of duty."

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. FLETCHER (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. HALE (when his name was called). Transferring my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER], I vote "yea."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as on the previous vote, I withhold my vote.

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama [Mr. UNDERWOOD], who appears to have left the Senate. I am unable to obtain a transfer, and therefore the pair must stand. If permitted to vote, I should vote "yea."

Mr. MCCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER]. I will allow this announcement of the transfer of my pair to stand for the remainder of the calendar day. On this question I vote "yea."

Mr. SIMMONS (when his name was called). Making the same announcement as to the transfer of my pair as upon the former vote I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer I vote "yea."

The roll call was concluded.

Mr. SUTHERLAND. I transfer my general pair with the Senator from Arkansas [Mr. ROBINSON] to the junior Senator from South Dakota [Mr. NORBECK] and will vote. I vote "yea."

The result was announced—yeas 64, nays 0, as follows:

YEAS—64.

Ashurst	Fletcher	McKinley	Shortridge
Borah	Frelinghuysen	McLean	Simmons
Brandegee	Gerry	McNary	Smith
Broussard	Glass	Moses	Smoot
Bursum	Gooding	Myers	Spencer
Calder	Hale	New	Stanfield
Cameron	Harreld	Newberry	Stanley
Capper	Harris	Nicholson	Sterling
Colt	Heflin	Oddie	Sutherland
Cummins	Jones, Wash.	Overman	Swanson
Curtis	Kendrick	Pepper	Townsend
Dial	Keyes	Phipps	Trammell
Dillingham	Lenroot	Ransdell	Wadsworth
du Pont	McCormick	Rawson	Walsh, Mont.
Edge	McCumber	Reed	Warren
Ernst	McKellar	Sheppard	Watson, Ind.

NAYS—None.

NOT VOTING—31.

Ball	France	Kellogg	Nelson
Caraway	Harrison	King	Norbeck
Culberson	Hitchcock	Ladd	Norris
Elkins	Johnson	La Follette	Owen
Fernald	Jones, N. Mex.	Lodge	Page
Pittman	Robinson	Walsh, Mass.	Williams
Poindexter	Shields	Watson, Ga.	Willis
Pomerene	Underwood	Weller	

So Mr. MCCUMBER's amendment to his amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. The Senator from North Dakota [Mr. MCCUMBER] proposes to amend the amendment offered by him as follows: On page 2, lines 8, 9, and 10, strike out the words "conditions of competition necessary to equalize the same in such markets of the United States" and insert in lieu thereof "such costs of production necessary to equalize the same."

The amendment to the amendment was agreed to.

The ASSISTANT SECRETARY. On page 2, line 12, strike out the words "or in forms of duty."

The amendment to the amendment was agreed to.

The ASSISTANT SECRETARY. Beginning on line 24, page 2, at the end of the line, strike out the words "conditions of competition in the principal markets of the United States of articles" and insert in lieu thereof "costs of production of products provided for in paragraphs 25 or 26 or Title I of this act."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment to the amendment.

Mr. WALSH of Montana. Mr. President, I rather gathered from what the Senator from North Dakota said that it was his purpose to abandon subdivision (b) altogether.

Mr. MCCUMBER. Paragraphs 25 and 26, as the Senator understands, deal with intermediate coal-tar products and dyes.

Mr. WALSH of Montana. No, no; we are not dealing with that. The amendment just read from the desk is an amendment of subdivision (b) of section 315.

Mr. SMOOT. That is right. As it was before, it was "investigation of the differences in conditions of competition in the principal markets of the United States." Now it is "costs of production of products provided for in paragraphs 25 or 26 of Title I of this act."

Paragraph 25 deals with the intermediate dyes, and paragraph 26 deals with the dyes, and therefore we limit it to those two paragraphs of Title I.

Mr. WALSH of Montana. Where is it so limited?

Mr. MCCUMBER. This is the American-valuation subdivision which is to be limited simply to those two paragraphs.

Mr. SMOOT. That is all.

Mr. WALSH of Montana. But where is it so limited?

Mr. SMOOT. It says:

That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in costs of production of products provided for in paragraphs 25 or 26 of Title I of this act, wholly or in part——

Mr. WALSH of Montana. It is not so in the copy I have before me.

Mr. SMOOT. That is the amendment that is offered.

Mr. WALSH of Montana. That is not the one that has just been tendered.

Mr. SMOOT. Yes; the Senator just tendered that amendment.

Mr. WALSH of Montana. That was not what the Secretary read.

Mr. SMOOT. I will ask the Secretary to read it again, and see if that is not word for word as I read it.

The PRESIDENT pro tempore. The Secretary will restate the amendment to the amendment.

The ASSISTANT SECRETARY. On page 2, beginning with the word "conditions" at the end of line 24, it is proposed to strike out the words "conditions of competition in the principal markets of the United States of articles," and to insert in lieu thereof "costs of production of products provided for in paragraphs 25 or 26 of Title I of this act."

Mr. WALSH of Montana. That is all right. Before that is considered, Mr. President, I desire the attention of the Senator from North Dakota.

The amendment as originally proposed—that is to say, as reported by the Finance Committee in the first place—provided that the rates fixed by the President were to go into effect 30 days after the proclamation should issue. It is now proposed to make that period 60 days. That is an essential part of the amendment as it stands now. I understand, Mr. President, that this plan was proposed because the Congress might be in recess, or for some other reason it would be impossible for Congress to act in the matter with that promptitude which would be necessary in order to accomplish a change whenever by reason of changed conditions a change in the rates seemed desirable, so that a relatively short period was fixed; but now

we have 60 days fixed as the period after the expiration of which the rate proclaimed by the President is to go into effect.

Mr. President, if a change in conditions does ensue making it desirable that a rate should be raised or lowered, Congress has 60 days within which to do it just as rapidly as the President can. In other words, what is the need of this at all if the rate does not go into effect for 60 days after the proclamation by the President? The only excuse I can find for it is that action might be deemed advisable with a greater degree of celerity than could be attained if an effort were made to secure a change of the rate through legislation put through Congress.

Mr. TOWNSEND. Mr. President, what does the Senator think about that? Does he think an amendment of the tariff could be gotten through in 60 days?

Mr. WALSH of Montana. I do not think so, no; and if the Senator will pardon me, I shall be glad to tell him why I suspect that is one of the reasons why this plan is proposed.

The Senator from Wisconsin has repeatedly stated upon the floor of the Senate that no one will undertake to deny that this is a combination of various interests, each one supporting high and extortionate rates demanded by the other in order that his high and extortionate rates may be sustained by the Senate. He asserts that no one will get up on this floor and deny that that condition exists, so that when it comes to Congress and a proposal is made to reduce a certain rate, the interests interested in that rate will threaten to reduce the rate on something else, and so the rate will not be reduced at all. It is the same way about elevating the rate, and it is expected that by this scheme, this plan, a more equitable tariff bill can be effected by the action of the President than by Congress. The whole policy is here disclosed, namely, to take away from Congress, because Congress is inadequate to the task, the duty of framing tariff bills and put the duty in the hands of the President.

Mr. McCUMBER. Mr. President, the Senator from Montana [Mr. WALSH] has found in this bill something that not a single member of the committee ever dreamed was in it, so far as its purpose was concerned.

All business is done on time, more or less. You can not order goods to-day from Europe or from Asia and have them landed to-morrow. If we could do that, it would not be necessary to give any particular time. After a person has made his arrangements for his purchases in Europe or in Asia it would be unfair to say that we can change that duty to-morrow and possibly while his goods are on the way. We have to arrive at a conclusion as to what would be a reasonable time ahead of the time that we determine to fix the rate in which it will not operate against those who have purchased under the old rate. There is danger if we put it off too long. There is equal danger if we make it too short. The judgment of the committee is that there ought to be at least 60 days interim, after there is a decision to lower a rate, before it is made operative, to the end that those who have already contracted or are contracting may have due notice of what the rate will be at the time of shipping and can make their purchases and fix their prices accordingly.

That is the only purpose on earth that the committee had in mind in fixing a 60-day limit, just the same as we often provide in our tariffs or in other matters that the law shall take effect the next January, or the next month, or 30 days thereafter. Here this length of time is given to the end that parties who are contemplating purchases or are making purchases or have made purchases may have due notice of what the rate will be at some future period and time to act under the knowledge that the rate will be a certain amount after a certain time.

Mr. WALSH of Montana. Mr. President, the Senator has entirely misapprehended my position. I am not complaining that the time is too short. In fact, if it were made 90 days it would be just exactly as satisfactory to me.

Mr. McCUMBER. No; but the Senator is assuming a reason which did not actuate the committee in the slightest degree in fixing this time.

Mr. WALSH of Montana. Of course, there is some reason why the power is given to the President instead of leaving it with Congress, and the only reason there can be for giving it to the President rather than leaving it with Congress is either that Congress would not make the change—and I have asserted that it would not make the change for the reasons I have indicated—or else that speedier action was desired than could be secured through congressional action. But if the rate is not going into effect for 60 days there is plenty of time to get legislation through Congress.

Mr. SMOOT. There is a question as to whether legislation could be gotten through in 60 days. But I want to say that it is absolutely necessary that 60 days shall be granted. Take the general practice in trade. An American buyer goes to Europe and buys his goods for delivery six months after date. He brings the samples to America, he sends his salesmen throughout the country, and from those samples he makes sales. The prices are based upon his contract prices.

If he had only 30 days' time to get into this country all of the goods which he ordered, and the rates had been raised, it might bankrupt that merchant, because of the difference in the rate of duty paid, as he sold the goods upon the basis of the rate in effect at the time he purchased the goods. The committee thought that 60 days were absolutely necessary in order that he would have time to instruct the manufacturer from whom he purchased his goods. Perhaps some of those goods would not be made, and it would take 60 days for the manufacturer to get his goods made, ship them, and land them in this country. It was thought to be absolutely necessary to give 60 days; and if it were a shorter time than that, I think it would catch many of the purchasers and perhaps seriously embarrass them financially.

Mr. REED. Again, Mr. President, we are dealing wholly for the benefit of the manufacturer or the dealer.

Mr. SMOOT. Oh, no; this is the importer.

Mr. REED. Very well. We are thinking about the capitalist.

Mr. SMOOT. He ought to have time to get his goods into this country.

Mr. REED. We must be very careful that the importer who buys on a certain European market can sell and make his profit before there is any change in the tariff. That is the theory. At all hazards he must be taken care of. But in the meantime the cost of production abroad has dropped 50 per cent; and if it has dropped 50 per cent, the country is still to be flooded with those cheap goods, and what is to become of your much loved workingman, for whom you are levying this traiff? Who is thinking about him now? You ask the right to raise a tariff 50 per cent, arbitrarily, because the cost of production has changed. You say you do that for the purpose of protecting American labor. But now you say, "We do not propose to do anything for the American laborer until we are dead certain that the capitalist who is importing the goods has his profits out of his deals."

Mr. SMOOT. It would make no difference to the consumer at all, because the goods had been sold by sample. They have been sold and it would make no difference at all to the consumer.

Mr. REED. I am not talking about the consumer; I am talking about the beloved laboring man.

Mr. SMOOT. The goods had been ordered before there was any change made, and the sales were made upon the rates then existing. It can not make a particle of difference to the consumer.

Mr. REED. Of course, the goods were ordered by the importer upon the rates then existing. The cost of production abroad decreases. Instead of raising the tariff immediately to keep out these new goods which are being made, and which are coming in to flood the American market, you postpone for 60 days that protection to your beloved American laboring man, over whom you sit up nights and weep oceans of tears, in order that the importer shall make his profits, and you do that after the statement which was made on this floor on yesterday that some of these American importers are importing from Europe and charging the most extortionate and unconscionable profits, and that that is the result of a combination, which has been charged and admitted upon this floor.

All I want to do is just to expose the sham and hypocrisy of this matter. You talk about protecting American labor, and in every instance you are looking after American capital. In this instance you say a great menace exists, that goods will come in and flood the market and drive the American laborer out of employment. But before we will apply protection to him we will first give the profiteer who is importing from foreign countries 60 days in which to make his profits. That is the hole you come out at.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The next amendment was, on page 3, line 1, to strike out the words "growth or" before the word "product," so as to read:

Articles wholly or in part the product of the United States.

Mr. WALSH of Montana. That amendment needs some little explanation. The amendment as submitted to us takes care of articles the growth or product of the United States. There is wheat, for instance——

Mr. SMOOT. That is a product of the United States.

Mr. WALSH of Montana. And other things in the agricultural schedule. For some reason or other they are lost in the shuffle.

Mr. McCUMBER. This paragraph relates to coal-tar products, and they do not grow.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The next amendment was, on page 3, line 2, to strike out the word "articles" and to insert the word "products"; on line 3, to strike out the words "growth or"; on line 9, to strike out the words "class or kind of merchandise," and to insert in lieu thereof the word "products"; on line 14, to strike out the word "article" and to insert the word "product"; on line 17, to strike out the word "article" and to insert the word "product"; beginning on line 24, to strike out the words "conditions of competition in the principal markets of the United States necessary to equalize the differences so found in said conditions of competition," and to insert in lieu thereof the words "costs of production necessary to equalize such differences," so as to read:

(b) That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in conditions of competition in the principal markets of the United States of articles wholly or in part the product of the United States and of like or similar products wholly or in part the product of foreign countries, shall find it thereby shown that the duties prescribed in this act do not equalize said differences, and shall further find it thereby shown that the said differences can not be equalized by proceeding under the provisions of subdivisions (a) of this section, he shall make such findings public, together with a description of the products to which they apply, in such detail as may be necessary for the guidance of appraising officers. In such cases and upon the proclamation by the President becoming effective the ad valorem duty or duty based in whole or in part upon the value of the imported product in the country of exportation shall thereafter be based upon the American selling price, as defined in subdivision (f) of section 402 of this act, of any similar competitive product manufactured or produced in the United States embraced within the class or kind of imported merchandise upon which the President has made a proclamation under subdivision (b) of this section.

The ad valorem rate or rates of duty based upon such American selling price shall be the rate found, upon said investigation by the President, to be shown by the said differences in costs of production necessary to equalize such differences, but no such rate shall be decreased or increased more than 50 per cent of the rate specified in Title I of this act upon such merchandise.

The amendment to the amendment was agreed to.

Mr. SMOOT. May I ask the Senator from Montana if he is not willing to have one vote cover all cases where the word "merchandise" is stricken out and the word "products" inserted or where the word "article" is stricken out and the word "product" is inserted?

Mr. WALSH of Montana. I agree to that course.

Mr. SMOOT. It will save much time.

The PRESIDENT pro tempore. The Senator from Utah asks that the amendments he just described shall be considered as agreed to or disagreed to in block. Is there objection? The Chair hears none. The question is upon agreeing to these several amendments to the amendment.

The amendments to the amendment were agreed to.

The next amendment to the amendment was, on page 4, lines 18 and 19, to strike out the words "conditions of competition" and to insert in lieu thereof the words "costs of production"; and on page 5, lines 3 and 4, to strike out the words "conditions of competition" and to insert the words "costs of production," so as to read:

(c) That in ascertaining the differences in costs of production, under the provisions of subdivisions (a) and (b) of this section, the President, in so far as he finds it practicable, shall take into consideration (1) the differences in conditions in production, including wages, costs of material, and other items in costs of production of such or similar merchandise in the United States and in competing foreign countries; (2) the differences in the wholesale selling prices of domestic and foreign merchandise in the principal markets of the United States, but in considering prices as factors in ascertaining differences in costs of production, only reasonable profits shall be allowed; and (3) any other advantages or disadvantages in competition. In any investigation under the provisions of this section hearings shall be held and a reasonable opportunity to be heard shall be afforded.

The amendment to the amendment was agreed to.

Mr. WALSH of Montana. I can not understand why subdivision (c) should remain in the amendment at all. The Senate has now adopted differences in cost of production as the test. The rate is to be fixed so as to equalize the differences in the cost of production. Everything else is gone, wholesale prices, advantages accruing from differences in laws, transportation, and everything else. The specifications in subdivision (c) are not appropriate at all. Those provisions are entirely inconsistent with the action the Senate has already taken.

Mr. SMOOT. I suppose the Senator has the proposed amendments offered by the Senator from North Dakota before him.

Mr. WALSH of Montana. I have no list of the amendments to the amendment.

Mr. SMOOT. I thought the Senator had. If the Senator will follow I will call attention to the amendments which will be proposed. The first one is on page 5, line 4, to strike out "and (3)" and insert the following:

(3) Advantages granted to foreign producers by a foreign country or by a person, partnership, corporation, or association in a foreign country; and (4)—

Then follows the next bracket. There must be more than the mere cost of producing goods in this country and abroad, for, as the Senator knows, in Germany there are cartels established, and even in some foreign countries there are bounties given upon exportations. That is never taken into account in ascertaining the cost of production, and it is an advantage which would be given to any producer in a foreign country where such a condition exists, and we have to provide against that.

The Senator knows that in Germany they have what is called the cartel system, and the way the goods are sold under that system is this: Suppose they have a line of chemical goods, or any other line—I do not care what it is. They start out to control the world, we will say, as they did before the war, in the chemical industry. The cartel would distribute all of those goods, sell them, and name the price, and they would designate certain manufacturers in Germany to make the goods for exportation to the country in which they have made up their minds to destroy that line of industry.

All of the other manufacturers in Germany who had been making the same class of goods would be charged pro rata for whatever loss there was to the manufacturer who made the goods shipped to that particular country for the purpose of destroying the industry there. I have not the time this afternoon, and I do not think it would be interesting at all to the Senate if I had, to go into the items which I know of with reference to which that has been done, not only in this country but in other countries as well, and it worked admirably for Germany.

Now when we are going to say that the rate of duty shall be only the difference in the costs of production in this country and abroad, that is not sufficient because, as I said last night, if that were all, America would be the dumping ground of the world. We certainly must say that wherever there is a foreign country that gives a subsidy or a bounty, whether it be to a corporation in the country in which it is given and ships the goods or whether it is through a cartel system or otherwise, or whatever advantage is given that way, certainly no American would object to having the same thing taken into consideration in arriving at a rate of duty.

Mr. WALSH of Montana. The Senator misunderstands me altogether. I have no controversy with him about the advisability of taking into consideration the different elements. I agree with the Senator that if a bounty is given in the foreign country, a correlative advantage should be given to the American manufacturer. On the other hand, if an export duty is exacted of the exporter, there should be a relative reduction in the duty giving protection to the American manufacturer, because he gets the protection of that export duty.

But that is not the point I am making at all. The point I am making is that the Senate has adopted as a standard the differences in the costs of production. We have inserted that provision in half a dozen places already. Now under subdivision (c) it would read that in ascertaining the differences in the cost of production the President shall take into consideration these bounties and export duties and the advantages or disadvantages arising from the operation of the cartel system and all that kind of thing, which, of course, would make subdivision (c) entirely inconsistent with the provisions which precede it.

Mr. SMOOT. Let me tell the Senator about that. I see now what the Senator is referring to. I know there are thousands of items as to which no one could ascertain the cost of production in the foreign country.

Mr. WALSH of Montana. Then the Senator should change the rule. We should establish some other rule than the difference in the costs of production.

Mr. SMOOT. That is exactly what we are doing. We are enlarging that and specifically stating what shall be taken into consideration. If paragraph (c) were not included in the bill, then this would be what would happen. Take a line of chemicals made in Germany or a line of goods made in any other country; we will take chinaware, for instance, made in France. I say there is no way and no power in the Government of the United States to compel those companies to submit their costs where the goods are shipped into this country.

The Senator will remember that we tried to do that under the act of 1909. That provision never was enforced. It was a dead letter. In fact, I remember that the only time it was ever undertaken it caused great feeling between France and the United States. I remember that, as a member of the Committee on Finance in 1909, there was scarcely one of the representatives of the foreign Governments in Washington who did not appear before the committee at the time and protest against the incorporation of that particular provision in the law. Now, I say there are thousands of articles as to which it is absolutely impossible for this Government, or the President, or any agency of the President, or of the Government, to ascertain the cost of production.

Mr. WALSH of Montana. If the Senator will allow me, I enter into no controversy with him upon that matter at all. I agree with him that the rule which the Senate has announced in the bill, the differences in the cost of production, is a thing that can not be ascertained. There is no way in which it can be done. But the difficulty about the matter is that the Senate has already declared its purpose to make that the rule. Now, we can not extend that rule by saying the cost of production as hereinbefore declared shall be not only the cost of production but something else besides. The two provisions would be entirely inconsistent. I submit to the Senator that he must go back, if he intends to do that, and remodel the language which has already been agreed to, make it more general in its terms, and then, of course, he can make subdivision (c) as specific as he cares to make it.

Mr. SMOOT. I think it specific as it is, that the President, in ascertaining the difference in cost of production, as provided for in the preceding subsections, under the provisions of subsections (a) and (b) of the section just agreed to—and the Senator has referred to the fact that we have made the difference in the cost of production the basis—

in so far as he finds it practicable, shall take into consideration the differences in conditions in production, including wages, costs of material, and other items in costs of production of such or similar merchandise in the United States and in competing foreign countries.

Perhaps it would be unnecessary to repeat that. It would do no harm to repeat it; but the next provision is:

The difference in the wholesale selling prices of domestic and foreign merchandise in the principal markets of the United States, but in considering prices as factors in ascertaining differences in conditions of competition only reasonable profits shall be allowed.

Mr. LENROOT. I understood the chairman of the committee had agreed that the latter phrase should be stricken out.

Mr. SMOOT. Yes; I was going to say that the latter part goes out. But how are we going to find the difference? Of course, ascertaining the differences in the wholesale selling prices of domestic and foreign merchandise in the principal markets of the United States is the only way it can be done. It can not be done in any other way that I know of, and I do not think it conflicts in the least.

Mr. JONES of New Mexico. Mr. President, may I ask what the President would be authorized to do, assuming that he could not ascertain the differences in the cost of production at home and abroad, but that he could ascertain those differences in prices to which the Senator has just referred? Would the President be authorized under the amendment to take any action whatsoever?

Mr. SMOOT. I will say that I think he would, within the limits of the rule laid down.

Mr. JONES of New Mexico. But the rule laid down is a rigid, unyielding rule that the rates shall be based upon the difference in the cost of production at home and abroad. If we admit that that can not be ascertained, no matter what other equities there may be in the situation, the President would not be empowered, as I understand the language of the amendment, to take any action whatsoever.

Mr. SMOOT. He would not, unless in subdivision (c) that power were given to him, and that is what we are giving.

Mr. JONES of New Mexico. Does subdivision (c) authorize the President to name any rate upon any basis other than the difference in the cost of production?

Mr. SMOOT. No; but in ascertaining the difference in the cost of production he is to take these things into consideration.

Mr. JONES of New Mexico. But the Senator has admitted that cases arise where he can not ascertain the difference in the cost of production. If he can not do that, will this be of any use whatsoever to the President?

Mr. SMOOT. I think it will be of a great deal of use to the President. We will know exactly what the cost is in this country. The Tariff Commission will know that to begin with, before any action is taken. It will also know the wholesale price in this country and what the wholesale price is in the country exporting to this country.

Mr. WALSH of Montana. That could not be ascertained by the President.

Mr. SMOOT. It has been done time and again. It was done under the act of 1909, where we began with the wholesale selling price of the article in the United States and worked back, taking out of that the freight, taking out of it a reasonable profit allowed to the foreign country, working back and finding the cost of production as far as practicable under that plan.

Mr. JONES of New Mexico. Then we have this situation presented as I see it: We can not directly ascertain the cost of production in this country or abroad, but through some sort of legerdemain we find out prices here and abroad, we find out the profits here and abroad, and we find out something else, and then we get at the cost of production. Is that the certain and fixed basis which the Senator from Wisconsin intended to establish as the one which must be used by the President in fixing rates? Did not the Senator from Wisconsin earnestly urge that the act would be unconstitutional unless we had a certain mathematical measure, unless it were made definite and certain? But the provision, as pointed out by the Senator from Montana, destroys the very certainty for which the Senator from Wisconsin pleaded.

What is the use of having the difference in prices if we can not go further? It is true that to ascertain differences in prices may be a means of checking up in some way, but the thing after all is to ascertain the difference in the cost of production, and that difference is the only thing which can be asked for if the rule is limited as it is in the first subsection of the amendment.

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). The question is on the amendment of the Senator from North Dakota [Mr. McCUMBER] to the amendment proposed by him on behalf of the committee.

Mr. WALSH of Montana. I ask that the amendment to the amendment may be stated.

The PRESIDING OFFICER. The pending amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 5 of the amendment, line 4, it is proposed to strike out "and (3)" and insert "(3) advantages granted to a foreign producer by a foreign Government or by a person, partnership, corporation, or association in a foreign country; and (4)."

Mr. WALSH of Montana. Mr. President, I inquire what has become of subdivision 2 of subsection (c)?

The PRESIDING OFFICER. One amendment in subdivision 2 has been agreed to. The present occupant of the chair understands that another one is to be offered.

Mr. WALSH of Montana. Then I ask that the Secretary report subdivision 2 as it now reads.

The ASSISTANT SECRETARY. As it reads up to this point:

(2) The differences in the wholesale selling prices of domestic and foreign merchandise in the principal markets of the United States, but in considering prices as factors in ascertaining differences in conditions of competition only reasonable profits shall be allowed.

Mr. SMOOT. The last clause goes out.

The PRESIDING OFFICER. The present occupant of the chair understood an amendment was to be offered at that point.

Mr. McCUMBER. I intend to offer an amendment. In line 2, page 5, after the words "United States," I move to strike out the words "but in considering prices as factors in ascertaining differences in conditions of competition only reasonable profits shall be allowed."

The PRESIDING OFFICER. Will the Senator be good enough to state his amendment again?

Mr. McCUMBER. On page 5, in line 2, after the words "United States," I move to strike out down to and including the word "allowed," in line 4.

The PRESIDING OFFICER. The Secretary will state the amendment the Senator from North Dakota now proposes to the amendment.

The ASSISTANT SECRETARY. On page 5, line 2, it is proposed, after the words "United States," to strike out the words "but in considering prices as factors in ascertaining differences in conditions of competition only reasonable profits shall be allowed."

Mr. REED. Mr. President, that means, then, that "in considering prices as factors in ascertaining differences in conditions of competition" unreasonable profits may be allowed if the President sees fit, the words of limitation having been taken out?

Mr. WALSH of Montana. Let me inform the Senator from Missouri that the consideration of prices is entirely excluded by the amendment.

Mr. REED. Very well. I do not so construe it, but I do not care to argue it. It will not make any difference.

The PRESIDING OFFICER. Without objection, the amendment to the amendment is agreed to. The Secretary will state the next amendment offered by the Senator from North Dakota to the amendment heretofore submitted by him.

The ASSISTANT SECRETARY. In the proposed amendment, on page 5, line 4, it is proposed to strike out "and (3)" and to insert:

(3) Advantages granted to a foreign producer by a foreign Government, or by a person, partnership, corporation, or association in a foreign country; and (4).

Mr. WALSH of Montana. There is a part of the proposed amendment to the amendment which I do not understand at all. I can understand an advantage granted by a foreign Government to an exporter, but what is meant by an advantage granted by a corporation or association?

Mr. SMOOT. It refers to the cartel. That is exactly what we wish to reach, and this is the only way we could reach it.

Mr. WALSH of Montana. Here is the situation, as I understand: A half dozen different corporations organize themselves into an association, which is named a cartel. They are all engaged in the same line of business. One of those corporations exports a commodity to a country and the cartel gives him some advantage—that is, out of their common fund they pay him something.

Mr. SMOOT. That is in the way of a bounty to him for the goods exported to this country.

Mr. WALSH of Montana. But it comes out of the common fund.

Mr. SMOOT. Of course, it comes out of the common fund, and they collect that common fund from the balance of the world. The cartel system is not confined to one industry. The cartel system embraces perhaps half of the industries of Germany; but the assessment applies only to the industry which is making a drive against a similar industry in some foreign country. If the provision is not now made to include persons or corporations, that situation would not be reached at all.

Mr. WALSH of Montana. But how does that differ from our export corporations? Here in this country a half dozen corporations organize themselves under the Edge law. They throw their product into a pot, distributing the orders among the various parties, and divide up the pot.

Mr. SMOOT. Yes; but nobody is ever assessed for any losses that may be sustained by one company in shipping goods to a foreign country. That is what the cartel system is.

Mr. WALSH of Montana. Oh, yes; but the members of the association themselves, out of their common fund, have to bear the expense of whatever they give to any individual member of the association.

Mr. SMOOT. There is nothing given except simply whatever expense there may be. They collect their money directly from the firm to which they export. There is no difference in the price charged to anybody in Germany for the goods which they export.

Mr. REED. Why might there not be?

Mr. SMOOT. There could be, perhaps.

Mr. REED. Certainly. We have authorized these combinations to be made for the purpose of shipment abroad. A combination is formed; it handles a dozen different articles and ships to a dozen different countries. It sells to Italy at a loss for the purpose of putting the Italian manufacturer out of business. It makes a profit, however, in the other 11 countries. The members of the corporation settle at the end of the year; they strike their balance and the loss is deducted from the profits made elsewhere. Why does that not work out exactly the same way in which the Senator from Utah [Mr. SMOOT] says the foreign cartel does?

Mr. SMOOT. It would, Mr. President, if they followed the same course; but Italy will take care of herself in that case, just the same as the United States will take care of herself.

Mr. REED. Exactly; but that is really avoiding the issue.

Mr. SMOOT. Not at all.

Mr. REED. The fact is that we have got two concerns organized exactly on parallel lines, and the very method of their organization takes care of the losses which may be incurred in destroying the business of another country; in other words, the Edge law, as described by the Senator from Utah, is the American cartel with all of its enormities and iniquities. It was promptly voted for by all of the Senators on the other side of the Chamber, as I recollect, though there may have been some of them who did not vote for it; and some Senators on this side of the Chamber voted for it, too.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Dakota to the amendment heretofore submitted by him.

Mr. LENROOT. Mr. President, I wish to say just a word in reference to this amendment. It has been assumed in the debate so far that the operation of this language in the pending amendment would in all cases tend to reduce the foreign cost of production, and therefore make the margin wider between the American and the foreign cost, but I do not so understand. It might just as readily operate to increase the foreign cost of production as to decrease it. For instance, I understand that the English Government pays a portion of the wages of the coal miners. The cost of production to the operator himself would be a certain amount, but the fact that a portion of the wages of producing the commodity have been paid by the Government or by somebody else would tend to increase the foreign cost of production. So it seems to me it is just as likely to work toward increasing the foreign cost as it is to decreasing the foreign cost.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Dakota to the amendment heretofore submitted by him.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment proposed by the Senator from North Dakota to the amendment heretofore submitted by him.

The ASSISTANT SECRETARY. In the amendment on page 5, line 5, it is proposed to strike out "In any investigation under the provisions"——

Mr. WALSH of Montana. Mr. President, before we proceed to the amendment to the amendment which the Secretary is about to state, permit me to remark that that sentence being an entirely different subject to the one that is treated of in the preceding portion of the section, I think it ought to be in an entirely separate clause. If I am right about that and it covers an entirely distinct subject, I inquire whether it would not be in order now to strike out all of paragraph (c) down to and including the word "competition," in line 5. I make that motion, Mr. President.

The PRESIDING OFFICER. The Senator from Montana moves to strike out, as the Chair understands, all of subdivision (c) down to and including the word "competition," in line 5, on page 5, of the amendment of the Senator from North Dakota.

Mr. WALSH of Montana. Exactly. I do that because, according to my understanding, that is entirely inconsistent with the amendments heretofore adopted declaring the difference in the cost of production to be the basis for fixing the rates by the President. I do not care to debate it, but I ask for the yeas and nays.

Mr. SMOOT. Let us have the yeas and nays.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Montana to the amendment of the Senator from North Dakota, on which the yeas and nays are demanded.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair and transfer as before, I vote "yea."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN] and vote "yea."

Mr. LODGE (when his name was called). I have a general pair with the Senator from Alabama [Mr. UNDERWOOD]. I find that I am able to transfer that pair to the Senator from Iowa [Mr. CUMMINS]. I do so, and vote "nay."

Mr. McKINLEY (when his name was called). I have a permanent pair with the junior Senator from Arkansas [Mr. CARAWAY]. As he is not present, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. POMERENE (when his name was called). I am temporarily paired with my colleague [Mr. WILLIS], who is absent because of serious illness in his family. If I were at liberty to vote, I should vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. SIMMONS. I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG]. Very much to my regret, I am unable to secure a transfer of that pair, and therefore I must withhold my vote. If at liberty to vote, I should vote "yea."

Mr. SUTHERLAND. I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from North Dakota [Mr. LADD] and will vote. I vote "nay."

Mr. HALE. Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. LODGE. I desire to announce that the Senator from Ohio [Mr. WILLIS], if present and able to vote, would vote "nay." He has a general pair with his colleague [Mr. POMERENE], as has already been announced.

Mr. POMERENE. I am advised that the senior Senator from Alabama [Mr. UNDERWOOD], who is paired with the Senator from Massachusetts [Mr. LODGE], would, if present, vote "yea."

I also desire to announce that the Senator from Mississippi [Mr. HARRISON], who is necessarily absent, would, if present, vote "yea." He is paired with the Senator from West Virginia [Mr. ELKINS].

Mr. CURTIS. I desire to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH].

The result was announced—yeas 20, nays 43, as follows:

YEAS—20.

Ashurst	Harris	Myers	Smith
Dial	Heflin	Overman	Stanley
Fletcher	Hitchcock	Ransdell	Swanson
Gerry	Jones, N. Mex.	Reed	Trammell
Glass	McKellar	Sheppard	Walsh, Mont.

NAYS—43.

Brandegee	Ernst	McLean	Shortridge
Broussard	Frelinghuysen	McNary	Smoot
Bursum	Gooding	Moses	Spencer
Calder	Hale	New	Stanfield
Cameron	Harreld	Newberry	Sterling
Capper	Jones, Wash.	Nicholson	Sutherland
Colt	Kendrick	Norbeck	Townsend
Curtis	Keyes	Oddie	Wadsworth
Dillingham	Lenroot	Pepper	Warren
du Pont	Lodge	Phipps	Watson, Ind.
Edge	McCumber	Rawson	

NOT VOTING—32.

Ball	Harrison	Nelson	Shields
Borah	Johnson	Norris	Simmons
Caraway	Kellogg	Owen	Underwood
Culberson	King	Page	Walsh, Mass.
Cummins	Ladd	Pittman	Watson, Ga.
Elkins	La Follette	Poindexter	Weller
Fernald	McCormick	Pomerene	Williams
France	McKinley	Robinson	Willis

So the amendment of Mr. WALSH of Montana to the amendment of Mr. MCCUMBER was rejected.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. On page 5 the committee proposes to strike out, beginning on line 5, the following words:

In any investigation under the provisions of this section hearings shall be held and a reasonable opportunity to be heard shall be afforded.

And in lieu thereof to insert:

Investigations to assist the President in ascertaining differences in costs of production under this section shall be made by the United States Tariff Commission, and no proclamation shall be issued under this section until such investigations shall have been made. The commission is authorized to hold such hearings and to adopt such procedure, rules, and regulations as it deems necessary for adequate investigation under this section; and it shall give such opportunity as it deems necessary or proper for the presentation of material facts in each case and arguments thereon. The commission shall prepare its findings in the case of each proceeding under this section, and the President shall make such findings public as soon as practicable after the issuance of a proclamation under the provisions of this section.

Mr. JONES of New Mexico. Mr. President, I wish the Secretary would read again the last clause of the proposed amendment.

The PRESIDING OFFICER. The Secretary will restate the part of the amendment referred to.

The Assistant Secretary read as follows:

It shall give such opportunity as it deems necessary or proper for the presentation of material facts in each case and arguments thereon. The commission shall prepare its findings in the case of each proceeding under this section and the President shall make such findings public as soon as practicable after the issuance of a proclamation under the provisions of this section.

Mr. JONES of New Mexico. Mr. President, I observe that the proposal has been changed since it was reported to the Senate in the first instance. As first reported, it was provided that the findings of the Tariff Commission need not be made public, but would become public in the discretion of the President. I observe that that has been changed now so as to require that the findings of the commission shall be made public as soon after the proclamation by the President as practicable, or words to that effect. I think that is a very commendable change.

Mr. FLETCHER. Mr. President, one clause of the proposed amendment seems to me to be almost valueless. It purports to provide for a hearing, but then goes on to specify that such hearings shall be given as the commission may see fit to allow. They can deny any hearing under that rule. The privilege of a hearing is entirely destroyed when it leaves it to the discretion of the commission to limit it as it sees fit.

Mr. SMOOT. Suppose it were unlimited, where would it go?

Mr. FLETCHER. We ought to provide definitely for some right to be heard on the part of people affected by this provision. As it is now, any party interested can be denied under the law any hearing whatever on the question to be considered.

Mr. TRAMMELL. Mr. President, I have an amendment at the desk which, if it is in order, I desire to offer as an amendment to the pending amendment. It relates to the provision with regard to giving hearings.

The PRESIDING OFFICER. Does the Senator desire to bring up his amendment now?

Mr. TRAMMELL. We are dealing with the question of hearings, and I should like to have this inserted as a proviso altering the amendment proposed by the committee to the amendment.

The PRESIDING OFFICER. The present occupant of the Chair understands that the amendment of the Senator from Florida is to be accomplished by the creation of a new paragraph.

Mr. TRAMMELL. That was the way in which I first proposed to offer the amendment; but I believe that it would be appropriate at the present time to have it as an additional paragraph or proviso to the amendment offered by the chairman of the committee.

The PRESIDING OFFICER. Then the Senator offers it as a proviso, to be attached to paragraph (c)?

Mr. TRAMMELL. Yes; as a proviso.

The PRESIDING OFFICER. The Chair thinks, then, it is in order.

Mr. TRAMMELL. I offer the amendment, Mr. President.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. It is proposed to add, at the end of the proposed amendment of the Senator from North Dakota, as read, the following:

Provided, That, in the exercise of the power herein granted, the President shall not issue his proclamation providing for a change in classification, an increase or decrease in duties, or the substituting of the American selling price for the value of the imported article in the country of exportation, until at least 60 days after he has by proclamation given opportunity to citizens interested and the public the privilege of being heard upon the facts and the policy pertaining to any proposed change.

Mr. TRAMMELL. Mr. President, this amendment as proposed by the committee suggests and carries with it a very radical change in the policy heretofore pursued by Congress in imposing tariff duties. The proposed change embraces a policy heretofore unheard of and unknown in America as well as in practically all of the other nations of the earth, especially in any of those that make any pretense whatever to having and maintaining a representative form of government.

I am unalterably opposed to the so-called policy of providing for elasticity of the tariff, delegating as it does, in my opinion, legislative authority to the President of the United States. Certainly such policy is in conflict with the spirit of the Constitution, if not directly in violation of the letter of the Constitution. Under the proposed legislation the President is vested with discretionary power, with power involving functions that properly under the Constitution should be exercised by the Congress and not under any pretext shifted to the Chief Executive of the Nation.

During the last campaign we heard a great deal with regard to "Executive usurpation." We heard a great deal about wanting to get away from the policy of "a one-man form of government." That was the stock argument that was made throughout the land on behalf of our Republican friends in their efforts to regain control of the Government. The only foundation or supposed foundation upon which such violent contention was made was because extraordinary powers had been delegated to the President during war time—powers which a majority, in fact almost all, of the Members of the Senate and the House, regardless of party affiliations, felt were necessary in expediting the war and meeting the problems which had arisen during war time.

After the battle was over, however, and the war clouds were cleared and the people had again settled down to peace, quite a furor was made in regard to these extraordinary powers given to the President during war time, and it was used to aid

and advantage politically during the last campaign on the part of our Republican friends. They pledged to the people of the Nation that they would get away from this idea of vesting in the Executive extraordinary powers; and now, in the very first tariff bill—legislation which deals as vitally with the American people as any legislation that can be enacted by Congress—we find the majority party attempting to write into the law a measure which is in violation of the spirit of the Constitution, a measure which shifts the responsibility of Congress to the Chief Executive, and which in a large measure precludes the American people from a right of hearing, a right of petition, a right to have their problems dealt with as they should be considered in a government that is supposed to be a representative form of government.

Even if the President were to pass upon these problems himself, much as we regard him and esteem him as a man and as an officer of ability and of integrity, in my opinion the policy is wrong. It is substituting a centralized power for that of representation through the Congress, to be dealt with by those who are elected to deal with legislative problems.

In this proposed legislation there has been no guarantee whatever for the public to have a hearing. We know the policy; we have heard a good deal of it here, even with regard to congressional committees, in dealing with the matter of hearings and people who appear before committees. I have heard very little stated here in regard to any one appearing before the committees having charge of tariff matters except those who were interested, vitally, as a rule, in having tariff duties increased.

In the exercise of this proposed power carried in the amendment under consideration, almost invariably we will find that the tariff barons will be the ones who are petitioning the President and petitioning the Tariff Commission for a revision of the tariff laws. They can appear before them and the investigations will be carried on without any public notice whatever of the inquiry, without those who may desire to protest against an effort to have the rate increased having an opportunity of hearing. The investigations may, in many instances, be nothing more or less than chamber sessions for the purpose of revising the tariff upwards in the interest of the tariff barons of the country, and in such cases the first notice the American public would have of an increase in tariff rates would be when the President issues his proclamation changing the rates.

I am against the policy because in my opinion it would be, by legislative sanction at least, the usurpation by the executive department of the legislative prerogatives. I am opposed to it because it lessens the opportunity of the American people who have to bear the burden of tax imposition to be heard, and to have their cause considered in dealing with the problem of taxation.

It gives an opportunity to preclude publicity in dealing with the tax problem, and publicity is always desirable. There should be a place where the contending elements, which may entertain a divergence of views upon a given subject, can be heard and have their petitions considered. In fact, I can see nothing that could come out of the proposed legislation which would be helpful in any respect to the American people. It will, in all probability, in many instances be of assistance to those who desire an increase of tariff rates, or in some instances it may be of benefit to some one who wants to try to break down some industry which has a tariff by getting the tariff repealed, or else so modified that in its operation it will have that effect.

We have what we call Republicans and Democrats in the Senate, holding different views on the tariff question, but I find that when it comes to the question of some very large industries in particular States, even the so-called rock-ribbed Republicans, those who believe in a tariff wall, will break away and strike down the tariff wall to a certain extent; and then some of our Democratic friends will vote, of course, for an increase in duties.

My position on the question of imposing tariff duties when a tariff bill is being considered by the Congress, where the function is properly exercised, is that if you are going to increase the rate on everything which has to be purchased and consumed in one locality or in one State or in a State other than the one in which you are giving the benefits of tariff protection, then certainly the commodities of production in the other States, where they have the duty imposed upon them, should be put on an equality. So for that reason now and then some Democrat does vote for some protection. It is a matter of exigency; it is a matter of having to do it because the dominating, controlling party is imposing high tariff rates upon the articles which are produced and consumed in one State, and under such circumstances it would be foolish, it would be unfair, to the people of other States to be required to contribute the taxes imposed by the tariff barons if they did not have some tariff duties upon the products of their States.

I have heard some Democrats criticized, or at least some remarks made about them, for voting for duties upon some articles or commodities produced in their States.

Under the circumstances, when the people of their States are required to pay increased prices for the commodities purchased by them on account of tariff duties imposed for the benefit and the aid of other States, it is not only the part of wisdom, but the part of justice, that they should not have their products sold in a free-trade market and everything that they have to purchase bought in a protected market.

It is perfectly natural, and the equitable thing, when you are considering a tariff bill, if you are going to impose tariffs upon, say, 75 per cent of the products of the country, that consideration should be given to the question of whether the other 25 per cent should not be placed in the same classification and participate in whatever policy has been adopted and is being employed in regard to the 75 per cent of the products of the country.

So in considering the matter of the taxes on different products in some States we find that the rates are very materially reduced, and in some instances they are entirely obliterated. I do not find that even the majority party holds steadfast in every instance to the policy of so-called protection, but they are influenced more or less by local conditions.

To come back to the subject directly involved, I feel that it is contrary to our system of government to delegate to the President the authority to make tariff laws. In substance that is what this proposed amendment means. It is proposed that Congress shall shift its responsibility, shift the duty incumbent upon it to pass tariff laws under the Constitution, and to place that duty and that responsibility upon the Chief Executive of the Nation.

If a majority of this body believes in that policy and shall adopt the amendment now under consideration, I state to the American people in all fairness that there should be no revision of the tariff laws by the Chief Executive of the Nation, acting through certain instrumentalities he may employ to furnish him with information, without those interested and the American public having an opportunity for hearing and for consideration, and to the end that this hearing may be provided I have proposed an amendment that the President shall not issue a proclamation increasing or decreasing the rates of duty, or changing a classification, without first having given 60 days' notice, in which those interested in the industry and the American people, if they desire, may be heard.

I do not see why anybody should oppose a proposition of that kind. If we do not have such provision in the law, under the amendment now pending the Tariff Commission in many instances probably will be petitioned by those interested in building higher the tariff wall. They would carry on in their own way the investigation which they thought was necessary. I would not say it would not be an honest, conscientious investigation, but if the members of that Tariff Commission did not believe in the policy of devoting ample opportunity to a hearing for the public, then the first news the American public, which would have to bear the burden of any increase of tariff rates, would have would be the issuance of the proclamation by the President that Schedule A, Schedule B, or whatever it may be, had been changed in the following, to wit—giving the increases in the rates. Then the door of opportunity for hearing and consideration to the great public, who would bear the burden of the increase of the duty, would have been closed entirely. In all probability no one would have been heard before the Tariff Commission prior to its recommendations to the President except those who were petitioning for an increase in tariff rates.

We have had an illustration here, even in this public forum, of how this would work. In many instances the Committee on Finance, after receiving more information, after disclosing its first schedules, have receded from the positions taken by it when it was in session, holding purely ex parte hearings, you might say. I do not know how many amendments have been proposed to this bill, or how many have been adopted, but many have been proposed and many have been adopted, showing the wisdom of publicity and an opportunity of a hearing in the consideration of a matter of such vital importance to the American people as a tariff bill. Certainly if you are going to adopt this policy, which, in my opinion, is contrary to the spirit of the American Constitution, you should provide, as a guaranty to the American people, that they shall have an opportunity to be heard, at least the short length of time of 60 days in which to be heard before the President should issue his proclamation changing tariff rates, changing a schedule which may mean an

additional burden of millions and millions of dollars upon the tax-bearing people of America.

If such a provision is not included we would have the Tariff Commission holding ex parte hearings, and we know who would appeal mostly to that commission. We would not hear much from the Tariff Commission with reference to revision downward. It would be the industries of the country that are seeking an increase of tariff rates, seeking in many instances tariff duties which would preclude any importations of the articles which are being manufactured by the business concerns involved. I think there ought to be at least 60 days within which the American public, who are vitally interested and concerned in all the revisions of tax laws, tariff or otherwise, might be heard upon the vital question of whether or not their taxes in the way of duties upon imports should be increased.

While I am opposed to the whole policy, while I think that Congress should not dodge its responsibility in the matter of dealing with the tax problem, while I think that Congress should not centralize power in a Tariff Board and in the Chief Executive, as is proposed by the amendment, yet if our Republican friends are going to force such policy upon the American people, Mr. President, in the name of the American people I think that we should incorporate a provision requiring that at least 60 days should be given in which the great American public may be heard and that it may have an opportunity to present its side of the case dealing with such important matters as taxation.

On the amendment which I have proposed I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as to my transfer, I vote "nay."

Mr. FLETCHER (when his name was called). Making the same announcement as before, I vote "yea."

Mr. JONES of New Mexico (when his name was called). I desire to announce that the Senator from Nevada [Mr. PITTMAN] is absent on account of illness in his family. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN] and ask that this announcement may stand for the remainder of the day. I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. McKINLEY (when his name was called). I have a permanent pair with the junior Senator from Arkansas [Mr. CARAWAY]. As I can not obtain a transfer, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. POMERENE (when his name was called). I again announce my pair with my colleague [Mr. WILLIS], who is absent. He would vote "nay" if he were present, and I would vote "yea." Being unable to obtain a transfer of my pair, I withhold my vote.

Mr. SIMMONS (when his name was called). I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG], who is absent. I am unable to obtain a transfer and therefore withhold my vote. If at liberty to vote, I would vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. SIMMONS. I find that I can transfer my pair with the junior Senator from Minnesota [Mr. KELLOGG] to the junior Senator from Rhode Island [Mr. GERRY], which I do, and vote "yea."

Mr. SUTHERLAND. Making the same announcement as on the previous vote with reference to my pair and transfer, I vote "nay."

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. CARAWAY. I have a pair with the junior Senator from Illinois [Mr. McKINLEY]. Being unable to obtain a transfer I withhold my vote.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Washington [Mr. JONES] with the Senator from Virginia [Mr. SWANSON];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON].

Mr. UNDERWOOD. I wish to announce that the junior Senator from Mississippi [Mr. HARRISON] is necessarily absent. If present and not paired, he would vote "yea."

The result was announced—yeas 20, nays 41, as follows:

YEAS—20.

Ashurst	Harris	Myers	Simmons
Broussard	Heflin	Overman	Smith
Dial	Hitchcock	Ransdell	Stanley
Fletcher	Jones, N. Mex.	Reed	Trammell
Glass	McKellar	Sheppard	Walsh, Mont.

NAYS—41.

Brandegee	Gooding	Moses	Spencer
Bursum	Hale	New	Stanfield
Calder	Harreld	Newberry	Sterling
Cameron	Kendrick	Nicholson	Sutherland
Capper	Keyes	Norbeck	Townsend
Colt	Lenroot	Oddie	Wadsworth
Curtis	Lodge	Pepper	Warren
Dillingham	McCormick	Phipps	Watson, Ind.
Edge	McCumber	Rawson	
Ernst	McLean	Shortridge	
Frelinghuysen	McNary	Smoot	

NOT VOTING—34.

Ball	Gerry	Nelson	Swanson
Borah	Harrison	Norris	Underwood
Caraway	Johnson	Owen	Walsh, Mass.
Culberson	Jones, Wash.	Page	Watson, Ga.
Cummins	Kellogg	Pittman	Weller
du Pont	King	Poindexter	Williams
Elkins	Ladd	Pomerene	Willis
Fernald	La Follette	Robinson	
France	McKinley	Shields	

So Mr. TRAMMELL'S amendment to the amendment was rejected.

Mr. BURSUM. Mr. President, I offer the amendment which I send to the desk and ask that it be reported.

The PRESIDING OFFICER. Does the Senator desire to offer an amendment to be placed at the end of section 315?

Mr. BURSUM. I do.

The PRESIDING OFFICER. The Chair desires to say that we have not yet reached that point. There is an amendment pending upon matter which precedes the end of section 315.

Mr. BURSUM. I understood we had gotten through with the committee amendments.

The PRESIDING OFFICER. No; we have not. There is a committee amendment now pending. That is the question before the Senate at this time.

Mr. REED. I move to amend the pending amendment by striking out the words:

> The commission is authorized to hold such hearings and to adopt such procedure, rules, and regulations as it deems necessary for adequate investigation under this section, and it shall give such opportunity as it deems necessary or proper for the presentation of material facts in such cases and arguments thereon.

And to insert in lieu thereof the following words:

> The commission shall give reasonable public notice and shall give reasonable opportunity to parties interested to be present and to produce evidence and to be heard. Said hearings shall be public. Subject to the foregoing, the commission is authorized to adopt such reasonable procedure, rules, and regulations as it may deem necessary.

The difference is simply this: Under the language as now presented by the amendment of the Senator from North Dakota the commission is authorized to hold such hearings as it may see fit. Those hearings could be either public or private. There is no provision for any notice to the public or to parties interested. Then the commission under the language of the amendment pending is authorized to adopt whatever procedure, rules, or regulations it deems necessary, and also the commission is authorized to "give such opportunity as it deems necessary or proper for the presentation of material facts." Under that language the commission could hold secret hearings or it could refuse to have any hearings whatever. It could hear one side of the case and give no opportunity to the other side to be heard. It could adopt any kind of rules or regulations it wanted to. It could proceed in secret. The only requirement would be that it should prepare its findings in the case and that the President should make the findings public without any provision for publicity as to the proceedings, as to the evidence, or as to the methods by which the conclusion was reached. The language which I seek to insert will provide, first, for a reasonable public notice; and, second, for public hearings. That certainly is necessary in the conduct of this character of the public business. Upon the amendment, Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague, the junior Senator from Ohio [Mr. WILLIS], I withhold my vote. If the junior Senator from Ohio were present, and he were at liberty to vote, he would vote "nay" and I should vote "yea," if permitted to vote.

Mr. SIMMONS (when his name was called). Making the same announcement as to the transfer of my pair as on the former vote, I vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the preceding vote with reference to my pair and its transfer, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as to the transfer of my pair as before, I vote "nay."

Mr. McCORMICK. I have a standing pair with the Senator from Wyoming [Mr. KENDRICK], who is absent. I do not know how he would vote if present. I am unable, therefore, to vote. If I were able to vote, I should vote "yea."

The result was announced—yeas 31, nays 25, as follows:

YEAS—31.

Ashurst	Hitchcock	Overman	Smith
Broussard	Jones, N. Mex.	Pepper	Stanfield
Bursum	McKellar	Ransdell	Stanley
Dial	McNary	Rawson	Trammell
Fletcher	Moses	Reed	Wadsworth
Glass	Myers	Sheppard	Walsh, Mont.
Harris	Nicholson	Shortridge	Warren
Heflin	Norbeck	Simmons	

NAYS—25.

Brandegee	Edge	McCumber	Sterling
Calder	Frelinghuysen	McLean	Sutherland
Cameron	Gooding	New	Townsend
Capper	Harreld	Newberry	Watson, Ind.
Colt	Keyes	Oddie	
Curtis	Lenroot	Smoot	
Dillingham	Lodge	Spencer	

NOT VOTING—39.

Ball	Gerry	McCormick	Robinson
Borah	Hale	McKinley	Shields
Caraway	Harrison	Nelson	Swanson
Culberson	Johnson	Norris	Underwood
Cummins	Jones, Wash.	Owen	Walsh, Mass.
du Pont	Kellogg	Page	Watson, Ga.
Elkins	Kendrick	Phipps	Weller
Ernst	King	Pittman	Williams
Fernald	Ladd	Poindexter	Willis
France	La Follette	Pomerene	

So Mr. REED'S amendment to the committee amendment was agreed to.

The PRESIDING OFFICER. The question now recurs on the amendment as amended.

Mr. BURSUM. Is my amendment now in order, Mr. President?

The PRESIDING OFFICER. The Senator's amendment is not yet in order. There is still an amendment pending. The question recurs on the amendment of the Senator from North Dakota [Mr. MCCUMBER] as amended.

Mr. WALSH of Montana. Mr. President, I inquire what is now the pending amendment?

The PRESIDING OFFICER. The Secretary will state the pending amendment.

Mr. JONES of New Mexico. Mr. President, before the amendment is stated, I desire to say that I am going to offer a further amendment to the amendment.

Mr. WALSH of Montana. Let us first dispose of the committee amendment.

Mr. JONES of New Mexico. My amendment is an amendment to the committee amendment.

The PRESIDING OFFICER. Does the Senator from Montana desire that the pending amendment may now be stated?

Mr. WALSH of Montana. I desire the amendment which is to be considered stated.

The PRESIDING OFFICER. The amendment as amended will be stated.

The READING CLERK. On page 5, line 5, after the word "competition," it is proposed to strike out "In any investigation under the provisions of this section hearings shall be held and a reasonable opportunity to be heard shall be afforded," and in lieu thereof to insert:

Investigations to assist the President in ascertaining differences in costs of production under this section shall be made by the United States Tariff Commission, and no proclamation shall be issued under this section until such investigation shall have been made. The commission shall give reasonable public notice of its hearings and shall give reasonable opportunity to parties interested to be present to produce evidence and to be heard. Said hearings shall be public. Subject to the foregoing, the commission is authorized to adopt such reasonable procedure, rules, and regulations as it may deem necessary. The commission shall prepare its findings in the case of each proceeding under this section, and the President shall make such findings public as soon as practicable after the issuance of a proclamation under the provisions of this section.

Mr. JONES of New Mexico. Mr. President, I wish to move an amendment to the proposed amendment. It now reads:

The President shall make such findings public as soon as practicable after the issuance of a proclamation.

It seems to me that not only the findings of the Tariff Commission should be made public, but that the testimony and evidence taken before the Tariff Commission should also be public in order that the people may have access to and know just what the considerations were which brought about the findings of the Tariff Commission.

Mr. BURSUM. Would not the records be public in any event?

Mr. JONES of New Mexico. There is nothing here requiring a record to be kept, if I understand the language. The hearings may be in such form as the Tariff Commission may decide; there is no requirement that the testimony shall be taken down or that it shall be made available in any way to the public.

The Senator from Missouri has proposed an amendment, which the Senate has adopted, providing that the hearings shall be public, but there is no requirement that the testimony taken upon those hearings shall be reduced to writing or become a matter of record for the public at all. In order to meet that situation, unless some one can suggest a better method of meeting it, I move to amend, after the word "findings," by inserting the words "hearings and testimony."

Mr. MCCUMBER. Mr. President, I think the point made by the Senator from New Mexico is well taken. The Senate has agreed to the other amendment, and I think the amendment of the Senator from New Mexico should be agreed to.

The PRESIDING OFFICER. Without objection, the amendment offered by the Senator from New Mexico to the amendment of the Senator from North Dakota is agreed to.

The question now recurs on agreeing to the amendment of the Senator from North Dakota as amended.

Mr. LENROOT. Mr. President, just a word. I stated earlier in the debate that I should oppose or seek to amend the portion of the committee amendment with regard to publicity of findings. The committee itself, however, has made the change.

Mr. REED. Mr. President, may I inquire what the pending question is?

The PRESIDING OFFICER. The pending question is the amendment of the Senator from North Dakota, as amended by the amendment of the Sentaor from Missouri and as amended by the amendment of the Senator from New Mexico.

Mr. REED. Section 315 will still be before the Senate, then?

The PRESIDING OFFICER. It will be. The question is on the amendment as amended.

Mr. MOSES. Mr. President, are we now passing upon the last amendment of the Senator from North Dakota?

The PRESIDING OFFICER. We are not. We are passing on the amendment which ends on page 5, at the end of line 5, the latter portion of subdivision (3).

Mr. BURSUM. Mr. President, I offer the amendment which I send to the desk and ask to have read.

The PRESIDING OFFICER. The Senator's amendment is not to subdivision (c). It does not apply to the amendment still pending, and is not in order.

Mr. BURSUM. I understood that we had just passed on the last amendment.

The PRESIDING OFFICER. We have not. It is still pending. The Chair has been endeavoring to put the question. The question is on the amendment of the Senator from North Dakota, as amended.

Mr. REED. Mr. President, I have been necessarily out of the Chamber. I do not want to be debarred from offering another amendment to the amendment which is section 315 before it is finally passed.

The PRESIDING OFFICER. The Chair does not understand that an amendment will be excluded.

Mr. REED. I understood that we were adopting this entire amendment now.

The PRESIDING OFFICER. Not at all. We are adopting only the amendment which the Senator from Missouri himself perfected.

Mr. REED. Very well.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Dakota, as amended.

The amendment, as amended, was agreed to.

The READING CLERK. The next amendment is on page 5, line 11, to strike out "competitive advantages" and insert "differences in cost of production."

Mr. WALSH of Montana. Mr. President, I have no objection to that; but I desire to call the attention of the Senate to the provisions of this particular paragraph. It reads:

The President, proceeding as hereinbefore provided for in proclaiming rates of duty, shall, when he determines that it is shown that the competitive advantages have changed or no longer exist which led to such proclamation, accordingly as so shown, modify or terminate the same.

In the original draft the word was "may." The change is a very desirable one, of course, because after the President has

decided that the difference does exist in accordance with the principle laid down in the amendment he ought not to be at liberty to do it or not do it as he sees fit. That is all right; but I want to call the attention of the Senate to the fact that the President may, in his discretion, institute the investigation in the first place or not, just as he sees fit. After he starts the investigation, and he finds by reason of the investigation that the difference does exist, he must then fix the rate that will equalize matters, but he is at entire liberty to start an investigation in the first place or not, as he sees fit, giving him a discretion which to my mind—perhaps that is a matter of no great consequence—is impossible to delegate.

If the Senators will turn to the beginning of the amendment, section 315 reads as follows:

That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in conditions of competition in the principal markets of the United States of articles wholly or in part the growth or product of the United States and of like or similar articles wholly or in part the growth or product of competing foreign countries, shall find it thereby shown that the duties fixed in this act do not equalize the said differences in conditions of competition he shall, by such investigation, ascertain said differences and determine and proclaim the changes—

That are necessary. But you will observe that he is at perfect liberty to start the investigation or not, just exactly as he sees fit; so you will observe that the entire discretion to raise or lower these rates is, by this amendment, reposed in the President.

Mr. LENROOT. Mr. President——

Mr. WALSH of Montana. I yield to the Senator.

Mr. LENROOT. I should like to say that in principle I am very much disposed to agree with the Senator's contention, but in Field against Clark I think the same identical language was used.

Mr. WALSH of Montana. The Senator is quite right; but he will bear in mind that in Field against Clark the rates were fixed in the bill, and the President was simply intrusted with the determination of whether or not the discriminations or the unjust charges existed in the foreign country.

Mr. LENROOT. But he was not required to ascertain the facts. It was discretionary whether he did or not, as it is in this case.

Mr. WALSH of Montana. Exactly; but the trouble about it is that under those circumstances the rate went into effect whenever he did do it. Whenever he did this, then the rate went into effect; so that it left the rate to go into effect upon the happening of a certain event, namely, the finding by the President of the existence of that condition of things. That is not the case here. Under this provision, whenever the President finds these conditions to exist he shall proceed to determine the rate that shall be imposed, so that the rate that he is to impose will depend upon whether he moves in the premises or does not move.

Mr. McCUMBER. Mr. President, the whole law must be considered together. It makes little difference whether we put the provision for the investigation in subdivision (a) and then provide in subdivision (b) that the Tariff Commission shall make the investigation, or whether it shall be in the reverse order. Under the provision as it is drawn the Tariff Commission must make the investigation. The investigation is made after the commission has made its report upon the differences in the cost of production at home and abroad, and it is necessary to consider both provisions in determining the process through which the result is to be attained.

I can not see that it makes any difference whether we have the steps in the logical order which the Senator may think proper, or whether we first declare that the President shall make these changes, and then provide that the changes shall be made after an investigation by the Tariff Commission. The Tariff Commission makes all the rules and regulations that are necessary. Among those rules and regulations it will necessarily make proper rules for the initiation of the investigation. It may be done upon the suggestion of the President; it may be done upon the suggestion of importers or manufacturers who desire to have a rate passed upon, and the question whether or not there is equality in the conditions, or equality in the matter of the cost of production at home or abroad, fixed in the rates. It does not seem to me that it makes any difference where we insert the paragraph giving the power to the President.

The PRESIDING OFFICER. The question is on the amendment of the Senator from North Dakota to his amendment.

The amendment to the amendment was agreed to.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Are there any other committee amendments to this section?

The READING CLERK. On page 5, line 15, after the word "transfer," it is proposed to insert "of an article."

The amendment to the amendment was agreed to.

The READING CLERK. On line 16, after the word "list" and before the period, it is proposed to insert a comma and the words "nor a change in form of duties."

The amendment to the amendment was agreed to.

The READING CLERK. On line 20, after the word "section," it is proposed to insert "upon such merchandise."

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. That completes the modifications proposed by the committee.

Mr. REED. Mr. President——

The PRESIDING OFFICER. May the Chair say to the Senator from Missouri that the Senator from New Mexico offered an amendment some time ago which he has been endeavoring to have considered?

Mr. REED. Very well.

The PRESIDING OFFICER. The Secretary will read it.

The READING CLERK. It is proposed to add, at the end of section 315, the following:

Ad valorem duties shall not be changed to specific duties, nor shall specific duties be changed to ad valorem duties. This provision shall continue in effect and force——

Mr. BURSUM. The provisions of this section.

Mr. McCUMBER. We already have agreed to that.

The PRESIDING OFFICER. The Secretary has not finished reading the amendment yet.

The READING CLERK (reading):

The provisions of this section shall continue in effect and force until December 30, 1924, and thereafter no duty shall be changed except by authority of Congress.

Mr. BURSUM obtained the floor.

Mr. WALSH of Montana. Mr. President, I desire to make an inquiry.

Mr. BURSUM. I yield.

Mr. WALSH of Montana. I desire to inquire of the chairman of the committee if there are any amendments to be proposed to subdivision (d), being a part of section 315? There are still three subdivisions, (d), (e), and (f), of section 315. I will say to the Senator from New Mexico that apparently we have not yet arrived at the point at which his amendment will be applicable.

The PRESIDING OFFICER. The present occupant of the chair was given to understand that there were no further perfecting amendments emanating from the committee, unless they are offered now.

Mr. WALSH of Montana. I am making specific inquiry of the chairman of the committee if there are any committee amendments to be proposed to subdivisions (d), (e), and (f) of section 315?

Mr. McCUMBER. No; we have given all that we propose to give, and the question now would be upon the adoption of section 315 as amended.

Mr. WALSH of Montana. I call the attention of the Senator from North Dakota——

The PRESIDING OFFICER. Does the Senator from New Mexico still yield?

Mr. BURSUM. I yield.

Mr. WALSH of Montana. I should like to help straighten out the matter. I call the attention of the chairman of the committee to the fact that in a number of places in the work we have done we have substituted the word "product" for the word "merchandise." The word "merchandise" occurs in several places in the subdivisions to which we have adverted. Is it not the purpose to make a similar change——

The PRESIDING OFFICER. Will the Senator permit the Chair to state that that amendment was adopted en bloc some time ago? Wherever the word "merchandise" occurs the word "product" has been substituted.

Mr. WALSH of Montana. I did not understand that it applied except to the subdivision to which we were then directing our attention.

The PRESIDING OFFICER. To the entire section. The amendment of the Senator from New Mexico will be read to the Senate.

The READING CLERK. It is proposed to add at the end of section 315:

Ad valorem duties shall not be changed to specific duties, nor shall specific duties be changed to ad valorem duties. The provisions of this section shall continue in effect and force until December, 1924, and thereafter no duty shall be changed except by authority of Congress.

Mr. BURSUM. Mr. President, the proposition to delegate authority for the levying of taxes and the raising of revenue which is vested in Congress by the Constitution through provisions to be administered in a general way, as is provided in

this section, is a departure from the usual methods of levying taxes or raising or lowering the rates and the duties which have been in vogue ever since this Government was founded.

Mr. WALSH of Montana. What is the date fixed by the Senator in his amendment?

Mr. BURSUM. Two years; until December, 1924.

Mr. WALSH of Montana. Would it not suit the Senator a little better if he fixed it the 4th of March, 1925?

Mr. BURSUM. No. I have no disposition, in submitting this amendment, to undertake in any way to curtail the prerogatives of any President. The amendment is offered in good faith. My position is that the proposal to delegate this power to the President is a departure and an unusual procedure. It involves a great national issue, an issue which has not been submitted to the people of this country.

It can only be justified, to my mind, upon the assumption that there is chaos all over the world to-day, that values are upset in all of the countries of the world, that the rates of exchange are erratic, that values are constantly changing, and it may be possible, and is probable, that some of the rates which have been agreed upon by the Senate committee and adopted by the Senate, while they may be fair and just at this time, three months from now or six months from now may be entirely too high, may be out of all proportion, and upon that theory, and assuming that those are the actual conditions existing in the world to-day, this change might be justified. I think it is justified as an emergency relief which could not be obtained through any other method or through the usual proceedings of legislation.

This amendment would limit to two years the time of the extension of the authority granted by the amendments to section 315. If during those two years the experience has proven satisfactory to the country it will not be difficult for Congress to continue this authority if the country believes it wise and if the Congress agrees to it. It might be said that we can repeal the law if it is not agreeable. I submit that that is putting an unnecessary burden upon Congress, the burden of repealing this authority.

I believe we can trust Congress to reenact this provision if it is in the future found necessary, and if it is not found necessary it will not be reenacted. I have grave doubts, personally, as to the wisdom of a permanent change of this character. I am of the opinion that Congress is amply able and capable of designating the rates of duty and providing for the raising of revenue, but, under the circumstances, under the extraordinary conditions which exist all over the world, the uncertainty of values, the constant changes in every line of industry which affect our imports, for the purpose of serving this vital emergency, the delegation of authority may be justifiable.

Mr. McCUMBER. Mr. President, I will have to ask that the amendment offered by the Senator from New Mexico be divided.

The PRESIDING OFFICER. It may be, under the rule.

Mr. McCUMBER. There are two propositions, clearly distinct, and I think the Senator might well withdraw the first part of the amendment without our even voting on it, when I call his attention to the fact that we have already provided that the President can not change from an ad valorem to a specific, or from a specific to an ad valorem, and if the Senator's amendment were adopted we would have the same thing repeated in different language in another amendment.

Mr. BURSUM. If I may interrupt the Senator, it is true that the committee did propose an amendment, which was adopted, taking out certain language which gave authority to the President to make these changes, and there would be no direct authority, as the bill now stands, unless there might be some misconstruction or misinterpretation of the other portions of this section.

Mr. McCUMBER. The provision which we have inserted takes away any possibility of a misconstruction, because it declares positively that there shall be no other construction. It reads:

> Nothing in this section shall be construed to authorize a transfer of an article from the dutiable list to the free list, or from the free list to the dutiable list, nor a change in form of duty.

That "change in form of duty," of course, must be a change from a specific to an ad valorem, or from an ad valorem to a specific, and therefore we have in that provision, which we have already adopted, exactly what the Senator wants.

Mr. BURSUM. Since hearing the amendment read, I agree with the Senator from North Dakota that it covers the ground, and I desire to strike out the first part of my amendment.

The PRESIDING OFFICER. The Senator from New Mexico withdraws the first clause of his amendment to the amendment.

Mr. McCUMBER. Now I want to say a word upon the other proposition. I agree with the Senator from New Mexico that this is something in the nature of an emergency measure, to meet conditions which may arise in the near future, and before prices become stabilized throughout the world. I would not want this provision to remain a part of our laws for any greater length of time than would be necessary, and that would be determined, in my opinion, by the length of time that would elapse before conditions return to a normal state.

I want to say in all candor to the Senator that I fully understand that the Senator does not like this provision at all; and I do not like it, except for this particular purpose. He desires, therefore, to limit it to the shortest possible time, and I must say that he may be justified in that desire, from his standpoint. But I think it would be very difficult for the Senator or anyone else to satisfy the public in general that this was not done to meet any possible change of administration, and to grant a power which might be exercised by a Republican President but might not be exercised by a Democratic President. I know that the Senator has no such thought in view. I know what he wants to do is simply to make the time as short as possible in which this may operate, because I know the Senator, in talking with us, wanted one year fixed as the limit, and no longer.

Mr. BURSUM. I am willing to accept an amendment making it one year.

Mr. McCUMBER. I understand. I want to put the Senator perfectly straight before the Senate and before the public in that respect.

Mr. BURSUM. Will the Senator yield?

Mr. McCUMBER. Let me just carry this idea to its conclusion. We provide that the President shall fix a rate which will measure the difference in the costs of production at home and abroad. I would have confidence in a Republican President, and I would have equal confidence in a Democratic President, if that duty were imposed upon him, to carry it out in good faith. Therefore from the political standpoint I do not think there would be one whit of difference whether the duty were performed by a Democratic President or by a Republican President. They would both be bound by the same rule.

Further, I want to say to the Senator from New Mexico that when Congress thinks it ought to change this law it can do it. It can do it in one year or in two years, and I think it is better to leave to Congress the duty of ascertaining and determining when it is no longer necessary or proper to continue this power, and that time will be, as I have suggested, when we have reached a more normal condition. I think the Senator can trust Congress to enact the necessary law to repeal this provision if it shall be proper.

Mr. BURSUM. Why place the burden upon Congress of repealing the law? Can we not trust Congress to enact a new law, if necessary?

Mr. McCUMBER. Yes, Mr. President; but I may ask the Senator, why impose upon Congress the necessity of passing a new law to extend the time?

Mr. BURSUM. This may not be the case, but suppose the Executive should oppose the repeal of the law and it should require a two-thirds vote?

Mr. McCUMBER. On the other hand, suppose we wanted to extend it and the Executive should oppose the extension and it would require a two-thirds vote?

Mr. BURSUM. The answer to that is, that if the law were to be reenacted, it would be reenacted pursuant to the public opinion of the country, and no Executive would fail to follow that public opinion if the law were passed.

Mr. McCUMBER. The reasons given by the Senator do not appeal to me. It seems to me that we may trust Congress and trust the President, whether he is Democratic or Republican, to carry out the law until Congress repeals it, and we can trust Congress to repeal it whenever the conditions justify it.

Mr. HEFLIN. Mr. President, it is proposed by this amendment to put into the hands of the President of the United States the power to increase the profits of the tariff barons of the country. That is exactly what is proposed to be done by the Senator's amendment.

Suppose some one were to suggest in this body that we confer upon the President the power to increase freight rates whenever the railroads desired them to be increased above the rates which might have been fixed by law. Would the Senator lodge in the hands of the President the power, upon the request of the railroads, to increase freight rates upon the people of the country? Why, he would say that was ridiculous, and yet it is proposed by his amendment to lodge the power with the President to increase the prices of the necessities of life, taking away from the legislative body the function given to it by the Constitution alone to levy taxes against the American people, and yet here it is proposed under the provisions of the bill to

grant authority to the President to do the thing which the Constitution has said that Congress shall do.

I wonder if the tariff barons are getting weary of having to consult Congress about what the tariff rates shall be? Do they desire to set aside the Constitution and take away from Congress the exercise of the taxing power? Do they think that it will be to their advantage to confer upon the President control over that power? Will the people consent for the President to usurp this power that belongs under the Constitution to Congress?

Mr. SHORTRIDGE. Mr. President, may I ask the Senator to yield?

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from California?

Mr. HEFLIN. I am glad to yield to the Senator from California.

Mr. SHORTRIDGE. By the same power, by one stroke of the pen he could reduce the rates, could he not?

Mr. HEFLIN. Why, certainly; but who ever heard of a Republican official reducing tax rates on his own accord?

Mr. SHORTRIDGE. I am assuming, of course, that the Senator thinks that some day, however remote, there may be a Democratic Congress and, however more remote in point of time, a Democratic President, which Congress and which President would share the views of the Senator from Alabama. So that if the power be granted—and all this is quite afar from whether to do so is wise or foolish, constitutional or unconstitutional—then there will be the power and the disposition to reduce the rates to a minimum.

Will the Senator pardon me to add just a word? I have observed during the discussion that my Democratic friends have always proceeded upon the theory that if the power granted or to be granted were exercised it would result in the raising of tariff duties. Some thoughtful Senators have advanced the notion, have stated in express terms, that there would be petitions to raise the rates with consequent evils, according to their views. But I assume that there are sincere and thoughtful men who differ from me with respect to tariff duties, and I further assume that they would petition for a lowering of rates. Importers or other classes of people in America may consider the rates are too high and petition for a decrease or lowering of them. Assuming, then, that the Executive shall share in the views of the Senator from Alabama, relief is sure and certain. Personally, I am at this moment inclined to favor a limitation as to the time of the power which is here proposed to be delegated under the pending amendment.

Mr. HEFLIN. Mr. President, I rose to say but a word or two. I want to say to the Senator from California, in conclusion, that I would not vote this power into the hands of any man under the sun. I am opposed to lodging in the hands of a President the right to increase the taxes against the American people. I do not care whether he is a Democrat or a Republican, the President has no business exercising the power, and no Congress has the right, until it has served notice on the American people that it intends to vote, if elected, to surrender the constitutional right of Congress to the Chief Executive, to surrender this sacred right of the American people. That is my position. I am not questioning the integrity of any President.

A Republican President believes in the highest sort of a protective tariff, the kind that I do not believe in and that millions of American people do not believe in. He may be conscientious in it, but that does not make it right. I do not want the President, be he Democrat or Republican, to have the power to increase the taxes of the people. He ought not to have and exercise any such power. That is my position upon the subject.

Mr. President, this is centralization of power gone mad. It is in violation of the Constitution and is a bold and brazen attempt to confer upon the President authority to do what the Constitution plainly says that Congress, and Congress alone, can do. This is one-man power with a vengeance.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from New Mexico to the amendment.

Mr. BURSUM. Mr. President, in view of the fact that the question of political advantage has been brought up, I desire to change the date from December, 1924, to July, 1924.

The PRESIDING OFFICER. The Secretary will report the amendment as modified.

The CHIEF LEGISLATIVE CLERK. As modified, the amendment of the Senator from New Mexico to the amendment now reads:

The provisions of this section shall continue in effect and force until July 1, 1924, and thereafter no duty shall be changed except by authority of Congress.

Mr. JONES of New Mexico. Mr. President, I want to express my hope that the amendment to the amendment will be adopted. Some Senators fail to realize that we are conferring upon the executive branch of the Government very extraordinary powers.

There has been much said during the various discussions of the bill and on previous occasions in connection with other matters about the encroachment of the executive branch of the Government upon the legislative branch. This is conferring an extraordinary power to meet an emergency. It has been so stated by everyone. No one wants such legislation as this continued indefinitely. It is not a question of repealing the law or limiting it so that another administration could not operate under it. The purpose of the amendment is to limit the duration of its operation unless Congress, after reviewing the work which may be done under it, should again feel like delegating the power to the President.

My colleague [Mr. BURSUM] has well said that in order to repeal the law it would require a two-thirds vote of the Congress unless the President should see fit to approve the law. Why put it in the power of any President, either the present occupant of that high position or anyone who may succeed him, to continue the exercise of this great authority unless two-thirds of the Congress should see fit to take it away?

It seems to me, Mr. President, that by July, 1924, we would know what action should be taken under this law, and if it is serving a good purpose the Congress could extend the time of its operation. But let us keep the control in our own hands and not put it in the power of any one man to require a two-thirds vote of the Congress in order to repeal an authority conferred upon the Chief Executive. I know that my colleague has nothing in mind about any succeeding administration. His motive is to serve the great American public and to put a limitation upon the exercise of this extraordinary power which the bill would confer upon the President. I sincerely hope the amendment to the amendment will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico [Mr. BURSUM] to the amendment.

Mr. STANLEY. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the principal legislative clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "nay."

Mr. McKELLAR (when his name was called). I have a pair with the senior Senator from Indiana [Mr. NEW], who I understand is absent. Therefore, I withhold my vote. If permitted to vote I should vote "yea."

Mr. SIMMONS (when his name was called). Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "yea."

Mr. STANLEY (when his name was called). I have a general pair with my colleague, the junior Senator from Kentucky [Mr. ERNST]. I transfer that pair to the Senator from Montana [Mr. MYERS] and vote "yea."

Mr. SUTHERLAND (when his name was called). Making the same announcement with reference to my pair and its transfer as on the previous vote, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement in reference to the transfer of my pair as on the previous vote, I vote "nay."

Mr. POMERENE. Again announcing my pair with my colleague, the junior Senator from Ohio [Mr. WILLIS], who is absent, I withhold my vote. If he were present, the junior Senator from Ohio would vote "nay," and if I were at liberty to vote, I should vote "yea."

Mr. FLETCHER. Making the same announcement as to my pair and its transfer as on the former vote, I vote "yea."

Mr. CALDER. I am paired with the senior Senator from Georgia [Mr. HARRIS]. I transfer that pair to the Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. JONES of Washington. The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I am paired with him, but I find that I can transfer that pair to the junior Senator from Michigan [Mr. NEWBERRY]. I do so and will vote. I vote "nay."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, I am compelled to withhold my vote.

Mr. SIMMONS. I desire to announce that the junior Senator from Virginia [Mr. GLASS], who, as already stated, is paired with the Senator from Vermont [Mr. DILLINGHAM], if present, would vote "yea."

Mr. POMERENE. I understand that the senior Senator from California [Mr. JOHNSON] if present would vote as I intend to vote. I therefore transfer my pair to him and will vote. I vote "yea."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from Rhode Island [Mr. COLT] with the Senator from Florida [Mr. TRAMMELL].

The result was announced—yeas 34, nays 19, as follows:

YEAS—34.

Ashurst	Heflin	Overman	Stanfield
Broussard	Hitchcock	Pomerene	Stanley
Bursum	Jones, N. Mex.	Ransdell	Sterling
Cameron	McCormick	Rawson	Sutherland
Capper	McNary	Reed	Wadsworth
Dial	Moses	Sheppard	Walsh, Mont.
Fletcher	Nicholson	Shortridge	Warren
Gooding	Norbeck	Smith	
Harreld	Oddie	Simmons	

NAYS—19.

Brandegee	Hale	Lodge	Smoot
Calder	Jones, Wash.	McCumber	Spencer
Curtis	Kendrick	McLean	Townsend
Edge	Keyes	Pepper	Watson, Ind.
Frelinghuysen	Lenroot	Phipps	

NOT VOTING—42.

Ball	France	McKinley	Shields
Borah	Gerry	Myers	Swanson
Caraway	Glass	Nelson	Trammell
Colt	Harris	New	Underwood
Culberson	Harrison	Newberry	Walsh, Mass.
Cummins	Johnson	Norris	Watson, Ga.
Dillingham	Kellogg	Owen	Weller
du Pont	King	Page	Williams
Elkins	Ladd	Pittman	Willis
Ernst	La Follette	Poindexter	
Fernald	McKellar	Robinson	

So Mr. BURSUM'S amendment to the committee amendment was agreed to.

Mr. REED. Mr. President, I ask the attention of the Senate to what I think is an obvious error or oversight in the language of the pending amendment. It is provided:

That in order to regulate the foreign commerce of the United States—

And so forth—

whenever the President, upon investigation of the differences in the costs of production in the principal markets of the United States of articles wholly or in part the product of the United States—

Then follow the provisions that the President shall have the right to increase or lower tariff rates. The language of the amendment is "articles wholly or in part the product of the United States."

Under that language, Mr. President, an article might be almost entirely of foreign production and have simply some small part of it produced in the United States. Thereupon if the cost was greater or less the President could make his order.

It may be said in reply to that that if the article were chiefly the product of a foreign country necessarily that would destroy the condition in regard to foreign prices being different from ours and our products being thereby affected; but it is entirely conceivable that a very large part of an article might be of foreign production and the American part of it be small, yet that it might come within this rule. Under the rule, taking a pair of shoes, for example, if the shoe were all made in foreign parts but a single eyelet, and that eyelet should be the product of the United States, the whole of the article would come within the regulation which I am discussing.

Therefore, on page 1, line 9, of the amendment, I move to strike out the words "in part" and in lieu thereof to insert the word "chiefly," so that it would read:

Articles wholly or chiefly the product of the United States.

Mr. SMOOT. Mr. President, I hardly think the Senator from Missouri, after second consideration, will insist upon that amendment. There are very few articles produced in the United States in the manufacture of which some imported article is not used. If an article manufactured in this country is composed chiefly of imported products, the manufacturer, when he imports those products, pays whatever duty may be imposed upon them. If he does not pay any duty upon them, of course the question of duty does not enter at all into the cost of production.

The provision to which the Senator from Missouri refers has to do with the determination of the cost of production. It would be absolutely impossible to determine whether the portion which is of chief value in a given commodity is made up of imported products. I think I am safe in saying that half of the articles which are manufactured in the United States are a combination of some imported products with some other domestic products. I think that it would be impossible to administer the provision if amended as the Senator from Missouri suggests. For instance, take a piece of cotton goods. The cotton entering into it may be grown in the United States, shipped abroad and made into cotton cloth, and shipped back here. The chief value of the commodity would be an American product; but suppose it was the other way. Of course, all imported articles pay a duty unless they are on the free list, and if they are on the free list, then the duty is not an item of calculation in figuring the cost of production.

Where a duty is imposed upon a commodity made of different products and one of those products is the component material of chief value, for instance, such as cotton and silk goods or wool and cotton goods or wool and silk goods, then it is perfectly proper to use the expression "of chief value," because that determines what rate the imported article shall take and whether the rate shall be levied on the basis of the rates in the cotton schedule, the wool schedule, or the silk schedule. Here, however, all we have to do is to determine the cost of production, and "articles wholly or in part the growth or product of the United States"—in other words, those that are made here or grown in this country, whether the article is wholly a United States product or not—come in under this provision. Of course, as I have already stated, it will make no difference as to the cost of production because of the fact that whatever has come in here will be figured in, if there is a duty upon it, toward the cost of production. If there is no duty it will make no difference at all.

Mr. REED. The point I am making is this: Here is an article. One thing in the entire article is produced in the United States. All the rest of it is produced abroad. The part that is the product of the United States may be almost infinitesimal, and yet, if any part of it is produced here, it brings the entire article within this rule.

Mr. SMOOT. It is the finished product, the Senator will note, and if it is finished in the United States and there is only 1 per cent of the whole of it produced in the United States it will make no difference. All you have to do is to find the cost of production, and if the cost of production is not any different then there is no action on the part of the President.

Mr. REED. The Senator has already answered that this afternoon by saying that there are thousands of articles where it is impossible to ascertain the cost of production abroad.

Mr. SMOOT. In foreign countries; but it all comes in, because that is not a product of this country. There is no product of the United States of which you can not find the cost.

Mr. REED. But here is an article, now, taking the Senator's illustration, 99 per cent of which was produced abroad.

Mr. SMOOT. I do not think there is any such thing, but let us assume that there is.

Mr. REED. We add 1 per cent in this country. Thereupon it comes within this rule. With such an article as that we start in to ascertain the difference between the cost here and the cost abroad—the cost abroad in what country? It opens the door for every man who makes any article that has any part of it made in this country to come within this clause. Now, I took it that the committee would not want this rule to apply unless it was for the benefit of the American producer, the real producer.

Mr. SMOOT. That is what it is.

Mr. REED. And that he was to be protected on his American production and not on the thing which he might have imported from another country and then added to slightly.

Mr. SMOOT. When it is added to slightly there is not any particular difference in the cost of production. If it is only 1 per cent there would be one-thousandth of 1 per cent differential, perhaps, and the President never would act in a case like that.

Mr. REED. But I can show the Senator where it might easily be the case. The rule is that the test shall be the difference as shown between the cost here and the cost in the competing foreign country. Here is a foreign country that proposes to ship us an automobile. That is the thing we are competing with—automobile against automobile. We will say that Germany—where we always go for all these illustrations of low cost—produces the parts of an automobile. They are

sent here. Some American work is added. Then we come to put that to the test of difference in the cost of production at home and abroad. We put it up against a foreign automobile which is sent here completed.

Mr. SMOOT. It would not be that. It would have to be an American automobile.

Mr. REED. It is an American automobile when we assemble it here. Thereupon the man who has been buying his stuff abroad, instead of at home, will get the protection under this bill.

Mr. SMOOT. But he can not get any more protection than what he paid. He could not get any more added to the cost of the automobile than the parts that he pays for.

Mr. REED. There is where we differ. The Senator thinks that the test is the cost to him, whereas I think it is the general cost in the automobile world——

Mr. SMOOT. Oh, no.

Mr. REED. And it would then be determined by a French or English machine that is in competition.

Mr. SMOOT. Oh, no; the cost of production in this country is whatever it costs the manufacturer to make the article in this country.

Mr. REED. The cost of that particular machine; but the President will not make his tariff apply to that particular machine. He will make his tariff apply to automobiles, and he will say, "The cost of producing this French machine is a certain amount. The cost of producing an ordinary American-made machine"——

Mr. SMOOT. Comparable.

Mr. REED. Comparable.

Mr. SMOOT. It has to be a comparable machine.

Mr. REED. Yes; "is so much." Here is a gentleman, however, who has beaten that proposition by buying his parts abroad cheaply, by bringing them here, and by adding a little bit of American labor. He, by virtue of that, gets the advantage of this cheap labor abroad in a particular country and measures it up as against a general rule established generally with reference to automobiles. Now, I say to the Senator that there is not any more question, in my judgment, but that that is the identical thing that will be done, and done tens of thousands of times, than that we are standing here.

Mr. SMOOT. In the first place, that is impossible to do now. The duties upon the parts of automobiles are such that that can not be done. Not only that, but it would be entirely foreign to the practice of the manufacture of an automobile in the United States, where it is made cheaper, I suppose, than in any other country in the world.

Mr. REED. The Senator is talking about a specific illustration, and following it out. I am giving the illustration merely to illustrate an idea, and taking automobiles because they are familiar.

Mr. SMOOT. It makes no difference at all. Whatever they bring in here separately and assemble, if it is assembled in the United States, you will notice clear through the bill that if it is a finished article the duty applies to the article or parts thereof. In almost all cases the same rate of duty is imposed upon them, and they get no advantage whatever, because of the fact that when they arrive at the cost of production nothing can be counted other than just what the article itself is composed of, and the actual cost of those things.

Mr. REED. But the Senator makes this mistake, or I do; at least we are not in agreement on our premises: Of course, if the President is going to fix a duty and pay A B the difference between the cost of his machine produced here, partly out of foreign parts and partly of homemade products, and that same machine produced abroad in the country from which he got his parts, what the Senator says is true. The President, when he comes to fix the duty—sticking to our automobile business and omitting these details—will not fix it in that way. He will fix the duty upon automobiles. He will fix that on the basis of automobiles that are imported into this country as automobiles and not upon the basis of one that comes in in the form of parts.

Mr. SMOOT. But he will have to compare the cost of that automobile with the parts that have been assembled in this country or the automobile that is made here, and so it makes no difference.

Mr. REED. But he compares it generally with the cost of producing automobiles—not that automobile but others. What I am trying to get to the Senator's attention—and I think he wants to get it so that it will be equitable——

Mr. SMOOT. I certainly do.

Mr. REED. Is that these gentlemen will work out their exceptions. While what the Senator says may be true in regard to automobile parts, they being taxed, there will be plenty of these gentlemen who will be able to discover the means of importing a large part of some of their machines or goods and then adding a small American substance of some kind, and then they will say: "We come under the protection of this law."

Mr. SMOOT. They have to be the assembler or the manufacturer or the producer.

Mr. REED. They may assemble only a very little.

Mr. SMOOT. Then they do not gain anything by that.

Mr. REED. I think they will.

Mr. SMOOT. Let me give the Senator a case, and I think I can convince him beyond a question of doubt that it would be impracticable. Take silk: The raw silk has to be imported into the United States, and not only the United States but every other country outside of Japan and China has to import its raw silk. We do not raise an ounce of raw silk in the United States. There is not a piece of silk goods, unless it is the fanciest kind of an article, made with all the figures that are possible to be made in a piece of silk, but that the raw silk itself is worth more than all else in the product. In the case of 99 per cent of all the silk goods made in the United States the value of the raw silk itself is more than all the balance of the work and products in that piece of silk goods. If the Senator's amendment were agreed to, we could not take silk goods into consideration at all. They would be barred. I can stand here and tell the Senator line after line where the same thing is true. In fact, it would take in every product that is made in the United States, with the exception of a few where we were compelled to get the raw material from some other country.

Mr. REED. That may be true; but the other side of it is equally true. If you bring a pair of shoes into this country—and of course the Senator will answer that that is a tariff tax, but there are plenty of things that can be brought in—and a single eyelet is put in in this country, that shoe comes within the protection of this bill just exactly the same as though it had all been made in this country. Now, we have put in the tariff bill in many other places—in other tariff bills, at least—the words "chiefly"——

Mr. SMOOT. "Of chief value." Those are the words that are used, but that is a question of imposing a duty.

Mr. REED. Certainly; and this is a question of raising a duty.

Mr. SMOOT. No; it is not. The question in this paragraph is how to find out the cost of production. The cost of production is exactly what you pay for your raw materials of all kinds that enter into the product, together with your overhead expenses, your taxes, your power, your labor, or, in other words, your conversion cost.

Mr. REED. I repeat that that would be true if we were dealing with two particular articles; but when the President came to deal with this matter he would not ask himself, going back to my automobile proposition, "What did the Packard Motor Co. pay, and what is the difference between the cost here and the cost abroad on what the Packard Motor Co. paid?" but he would settle the question whether or not the automobiles made in this country cost more than the automobiles made abroad with reference to the broad and general question. Nevertheless, the Packard Motor Co. might go to Germany and buy certain parts of its machine in such a way that it would gain an advantage, and could gain an additional advantage by the President's general proclamation relating to automobiles.

Mr. SMOOT. I disagree with the Senator.

Mr. REED. The exception is bound to occur. There is not much use in prolonging the discussion, but I venture the assertion that it will not be six months before we will find plenty of shrewd gentlemen coming in and claiming the benefits of this provision, the larger percentage of whose product is being made abroad.

Mr. SMOOT. It does not make a particle of difference whether it is made abroad or not, where you find the cost of production, and this section is for that purpose, and that is what you have to find, whether it is imported or whether it is made in this country. The costs of the article are taken into consideration. I really think that if the amendment of the Senator from Missouri were agreed to, it could not be administered in the United States, and would cut out all of the goods, with the exception of where it is a heavy article, and cheap, all of the goods that are made from products of a foreign country.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri to the amendment of the Senator from North Dakota.

The amendment to the amendment was rejected.

Mr. STERLING. I offer the following amendment to the amendment.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The READING CLERK. The Senator from South Dakota proposes to strike out all on page 1 of the amendment and down to and including the word "shown," in line 2, on page 2, and to insert the following:

SEC. 315. (a) In fixing the rates of duty provided for in this act it is hereby declared to be the purpose of Congress to equalize the differences in cost of production in trade in the markets of the United States in articles wholly or in part the growth or product of the United States and in like or similar articles which are wholly or in part the growth or product of competing foreign countries. Whenever the President shall find on investigation.

Mr. STERLING. I desire to amend the proposed amendment by striking out the words "in trade," in line 4, so that it will read "equalize the differences in cost of production in the markets of the United States," and so forth.

I explained the purpose of this amendment this morning in the discussion of the amendment offered by the Senator from Wisconsin [Mr. LENROOT] relative to the cost of production, and I do not desire to repeat what I then said.

I will simply state now, in a word, that it is the purpose of the amendment to make certain the purpose of Congress in fixing the rates of duty provided for in this act, and to make it certain that it is the purpose of Congress to equalize the differences in the cost of production in fixing these rates of duty.

It may be contended that the amendment itself to which this is an amendment does this, but if it does, it is by inference rather than by direct statement. It is an inference, too, to be drawn from the power conferred upon the President. I want to avoid any difficulty in regard to this, and make it certain that this is the declaration of the purpose of Congress, after the analogy, for example, of the interstate commerce act, whereby Congress declares that railroad rates shall be just and reasonable, and then it is for the Interstate Commerce Commission thereafter to fix such rates as it deems just and reasonable.

It seems to me that since this is the sole purpose of the amendment to the amendment the committee might feel inclined to accept it.

Mr. SMOOT. Mr. President, I talked with the chairman of the committee and also with one or two of the other members of the committee after the Senator had spoken to me about it. The chairman felt that the wording of the amendment ought to be left as it has been passed upon; that is, left as it is.

Mr. STERLING. This does not prevent that, or in any way affect the rest of the provisions of the bill. After the word "shown," in line 2, on page 2, the exact language of the bill as it is already written is preserved. There is no change whatever made in that. The object, as I have stated, is to make it certain that it is the purpose of the Congress, in fixing these rates, to equalize the differences. That is the purpose of the committee, I understand. If it is, what objection is there to so saying in direct terms in the bill itself?

Mr. McCUMBER. Mr. President, the provision in this section as it is written is that the President shall make an investigation, or act upon the investigation made by the Tariff Commission, and that if upon such investigation he ascertains that there is a difference in the cost of production of an article produced in a foreign country and a corresponding article produced in this country, and further ascertains that the duty prescribed in this act is insufficient to measure that difference, he shall then apply a rate of duty that will equalize the difference, being limited only to a 50 per cent raise or a 50 per cent lowering of the rates specified.

I do not know how we can say in any language any more clearly than is expressed in that statement that it is the policy of Congress to fix a rate which shall equalize the differences in the cost of production at home and abroad, and the Senator's amendment would be equivalent to saying that it is the policy of Congress to prescribe a rule to equalize the conditions at home and abroad, so far as they relate to the cost of production.

When you declare that you will fix a rate of duty that will measure the differences between the cost of production at home and abroad, you have said, by that law, that that is your policy, have you not? What, then, is the necessity of repeating the statement that the policy of this law is to do what the language of the law declares? That is really the result of it.

Mr. STERLING. Mr. President, if the Senator will permit me, I stated my objection to that solution of the problem this morning. That declaration is not made expressly at all, nor is it made by inference until you come to the description of the powers of the President in regard to the equalization of the differences in the cost of production. You wait until you get there before you get evidence of what the intention or what the policy of Congress is.

I want to call attention to the amendment of the Senator from North Dakota. Note the difference in the reading of these two provisions. It provides:

That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation—

And so forth.

Without any statement or declaration as to what Congress does intend. How easy it is to settle that question, as against the objection that this is a delegation of legislative power to the President, by saying in the outstart, in express terms, that it is the declared policy of Congress in the fixing of these rates to equalize the differences in the cost of production. That is all this does, and I say that I think many a difficulty hereafter may be obviated if the declaration of the intention or purpose of Congress is made in those express terms. The rest of the amendment, section 315, or any part of it, is not affected, and I think it highly important that we make this as a declaration of the policy of the Congress.

Mr. McCUMBER. Mr. President, there seems to be a great desire to make amendments, sometimes possibly where the amendments mean something, sometimes possibly where they are really needed; but this, in effect, does nothing more than to say that the policy of this law is to do what the law says it intends to do; and when the law says that it shall do a certain thing, when the law says that we shall make our tariffs measure the differences between the cost of production at home and abroad, I really do not think it is necessary to state in another sentence that that is our policy. But I can not see that it would do any particular harm.

Of course, I do not agree to it as a general policy to bind either party in the future. For the purpose of this particular act, for the purpose of meeting conditions of exchange, the varying costs of production at home and abroad, which may vary very materially from month to month, I have no objection to its being inserted as a part of our law, which I hope we will get rid of at the earliest opportunity after the exigency has passed.

Mr. STERLING. The Senator, then, will accept the amendment to the amendment?

Mr. McCUMBER. No; I do not say that.

Mr. SIMMONS. Do I understand the proposition of the Senator from South Dakota to be that we should declare the policy of the Congress to be to fix rates throughout the bill based on the differences in the cost of production here and abroad, or just as to the increases the President is authorized to make?

Mr. STERLING. Yes; throughout the bill.

Mr. SIMMONS. The bill to this time has not been formulated on that policy. The elastic provision has been so framed as to require the President in making those changes in rates to be governed by that principle; but the bill itself has already been framed and the rates have been fixed, and I do not think anyone would contend that the rates in the bill have been fixed upon the basis of the differences in the cost of production here and abroad. There may be some rates which have been fixed on that basis, but not many. Most of them have been fixed in utter disregard of the differences in the cost of production here and abroad, and to declare that the policy of Congress with reference to the bill is to make a declaration against the facts of the situation.

Mr. STERLING. If the Senator will permit me, I disagree with the Senator's conclusion in regard to that. My contention and belief is that the bill has been framed upon the theory that the tariff will measure the differences in the cost of production at home and abroad. That is the theory, and I say that theory is borne out by the statement in the amendment offered by the Senator from North Dakota itself, for it says:

That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in conditions of competition—

That is the original language, but it would be now, of course—

differences in cost of production—in the principal markets of the United States of articles wholly or in part the growth or product of the United States.

Mr. SIMMONS. But that is the declaration as originally written, which was in conformity probably with the making of the bill. It was a declaration that the President should change the rates in conformity with the intent of Congress, and that in doing this he should fix the rates so as to equalize the conditions of competition in the United States and abroad. There is

a vast difference between the "conditions of competition" and the "cost of production here and abroad."

Conditions of competition may be one thing and the differences in the cost of production may be another thing. The pending bill was framed with a view to bringing about conditions of "equality in competition," not upon the theory of measuring the differences in the cost of production here and abroad.

Now, it is true that since that provision was written in the bill the committee have agreed to change it and substitute for "conditions of competition" the phrase "differences in the cost of production." But I say to the Senator that the original bill was framed upon the theory of bringing about equality of conditions of competition. Rates were fixed upon that theory. They were, therefore, based upon the differences in the selling price of foreign products and of domestic products in the American market, not the differences in the cost of production of the foreign product and of the domestic product.

Mr. STERLING. Will the Senator permit me to ask him a question just at that point?

Mr. SIMMONS. Declaring the policy to be that the rate should be measured by the differences in the cost of production here and abroad does not change the fact that the rates have been fixed upon an entirely different theory.

Mr. STERLING. Mr. President, under the other terms of section 315 as it now reads without my amendment, if those rates do not measure the differences in the cost of production here and abroad, then there may be an investigation by the President and the rates may be fixed accordingly. This goes to show that the whole theory of the bill bears out my proposition that the object of the bill is to equalize the differences in cost of production. The bill ought to make it entirely clear that such is the purpose.

Mr. SIMMONS. The Senator means that he wants to give the President the power to fix all the rates in the bill so that they will conform to the differences in the cost of production here and abroad?

Mr. STERLING. That is the policy of the bill.

Mr. SIMMONS. Therefore he means to direct the President to go over the bill and where he finds that any rate fixed in it does not conform to the differences in the cost of production here and abroad then he shall change or may change that rate so as to make it so conform. Is that what the Senator intends?

Mr. STERLING. No; that is not my idea.

Mr. SIMMONS. I thought not, for that would mean the entire rewriting of the bill.

Mr. STERLING. It is not my theory at all that the President would go over the bill and go over the rates, but I am assuming, and I think it will generally be assumed, that the rates provided for in the bill and according to the theory of the bill, as stated in section 315, measure the differences in the cost of production at home and abroad, except that I want a declaration by Congress to the effect that that is the purpose of the bill.

Mr. SIMMONS. Ever since the bill was introduced I have repeatedly made inquiries of the other side of the Chamber as to what were the differences in the cost of production here and abroad, and whether the rates had been fixed with reference to those differences. The answer has always been that they could not ascertain the differences in the cost of production here and abroad, and that the rates were fixed upon the basis of competition and differences in selling price, considering somewhat the differences in cost where they could find them, but generally claiming that they could not find them. The Reynolds committee was appointed for the purpose of ascertaining what were the differences in the cost here and abroad. If that is to be the direction of the President, it is tantamount to an authority to the President to revise the whole bill and regulate the duties, not as the committee have regulated and fixed them, upon the basis of the differences in the price here and abroad, but upon the basis of the differences in the cost of production here and abroad.

The PRESIDING OFFICER. The question recurs upon the amendment of the Senator from South Dakota to the amendment.

Mr. STERLING. Let us have the yeas and nays.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as before as to my pair and transfer, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "nay."

Mr. McKELLAR (when his name was called). I have a general pair with the Senator from Indiana [Mr. NEW]. I transfer that pair to the senior Senator from Montana [Mr. MYERS] and vote "nay."

Mr. SIMMONS (when his name was called). Making the same announcement as to my pair and transfer as on the previous vote, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. POMERENE. I have a pair, as heretofore announced, with my colleague [Mr. WILLIS]. I am advised that he would probably vote as I intend to vote. I therefore vote "nay."

Mr. CALDER. Making the same announcement as before, I vote "nay."

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. JONES of Washington (after having voted in the affirmative). The Senator from Virginia [Mr. SWANSON] is necessarily absent. I am paired with him for the evening, but I find I can transfer that pair to the junior Senator from Michigan [Mr. NEWBERRY], and I do so and allow my vote to stand.

Mr. DILLINGHAM. I have a general pair with the Senator from Virginia [Mr. GLASS]. Transferring that pair to the junior Senator from North Dakota [Mr. LADD], I vote "nay."

Mr. SUTHERLAND. I transfer my pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Iowa [Mr. RAWSON] and vote "nay."

Mr. JONES of New Mexico. I wish to announce that the junior Senator from Mississippi [Mr. HARRISON] is necessarily absent. If he were present and not paired, he would vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY]; and

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH].

The result was announced—yeas 4, nays 48, as follows:

YEAS—4.

Jones, Wash.	Norbeck	Sterling	Townsend

NAYS—48.

Ashurst	Frelinghuysen	McCumber	Sheppard
Brandegee	Gooding	McKellar	Simmons
Broussard	Hale	McLean	Smith
Calder	Harreld	McNary	Smoot
Cameron	Heflin	Moses	Spencer
Capper	Hitchcock	Oddie	Stanfield
Colt	Jones, N. Mex.	Overman	Sutherland
Curtis	Kendrick	Pepper	Trammell
Dial	Keyes	Phipps	Wadsworth
Dillingham	Lenroot	Pomerene	Walsh, Mont.
Edge	Lodge	Ransdell	Warren
Fletcher	McCormick	Reed	Watson, Ind.

NOT VOTING—43.

Ball	Gerry	Nelson	Shields
Borah	Glass	New	Shortridge
Bursum	Harris	Newberry	Stanley
Caraway	Harrison	Nicholson	Swanson
Culberson	Johnson	Norris	Underwood
Cummins	Kellogg	Owen	Walsh, Mass.
du Pont	King	Page	Watson, Ga.
Elkins	Ladd	Pittman	Weller
Ernst	La Follette	Poindexter	Williams
Fernald	McKinley	Rawson	Willis
France	Myers	Robinson	

So Mr. STERLING's amendment to the amendment was rejected.

Mr. WALSH of Montana. Mr. President, I inquire if that concludes the consideration of section 315?

Mr. McCUMBER. Section 315 as amended has not been adopted.

The PRESIDING OFFICER. It has not. Does the Senator from North Dakota desire to offer any further amendments to the amendment?

Mr. McCUMBER. No; I ask for a vote upon it.

Mr. WALSH of Montana. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator from Montana will state it.

Mr. WALSH of Montana. As I understand the matter, we have considered the amendments which have been proposed by the committee in the compilation which was printed this morning down to and including the word "entry" on line 12, page 6.

The PRESIDING OFFICER. That is the understanding of the Chair.

Mr. WALSH of Montana. I now desire to inquire whether the provisions following that constitute a part of section 315?

The PRESIDING OFFICER. They do not. They are in section 316.

Mr. WALSH of Montana. That was my understanding, Mr. President. I ask for the yeas and nays on the adoption of section 315 as amended.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement with regard to my pair and its transfer as on former ballots, I vote "yea."

Mr. FLETCHER (when his name was called). Making the same announcement as to the transfer of my pair as on former votes, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. JONES of New Mexico (when his name was called). Making the same announcement with reference to the transfer of my pair as on previous votes, I vote "nay."

Mr. JONES of Washington (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as before as to the transfer of my pair, I vote "yea."

I take this occasion to say that if the Senator from Maine [Mr. FERNALD], who is paired with the Senator from New Mexico [Mr. JONES], were present, he would vote "yea."

Mr. POMERENE (when his name was called). I again announce my pair with my colleague [Mr. WILLIS], who is absent. If I were at liberty to vote I should vote "nay," and he, as I understand, would vote "yea."

Mr. SIMMONS (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

While I am on my feet I wish to announce that the junior Senator from Virginia [Mr. GLASS] is paired with the senior Senator from Vermont [Mr. DILLINGHAM]. If the Senator from Virginia were present and at liberty to vote, he would vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

The roll call was concluded.

Mr. CALDER (after having voted in the affirmative). I am paired with the senior Senator from Georgia [Mr. HARRIS]. I transfer that pair to the junior Senator from Delaware [Mr. DU PONT] and permit my vote to stand.

Mr. McKELLAR (after having voted in the negative). I notice that my pair, the Senator from Indiana [Mr. NEW], has not voted. I therefore withdraw my vote.

Mr. DILLINGHAM (after having voted in the affirmative). I observe that the Senator from Virginia [Mr. GLASS], with whom I have a general pair, has not voted. I transfer that pair to the junior Senator from North Dakota [Mr. LADD] and allow my vote to stand.

Mr. SIMMONS (after having voted in the negative). Since I announced the transfer of my pair a moment ago, the Senator from Rhode Island [Mr. GERRY], to whom I transferred it, has come into the Chamber. I will therefore transfer my pair with the Senator from Minnesota [Mr. KELLOGG] to the Senator from Georgia [Mr. WATSON] and allow my vote to stand.

Mr. POMERENE. I have just been advised that the senior Senator from California [Mr. JOHNSON], if present, would vote as I would vote, if permitted to vote. I therefore transfer my pair to him and will vote. I vote "nay."

I was requested to announce that the senior Senator from Alabama [Mr. UNDERWOOD] is paired with the senior Senator from Massachusetts [Mr. LODGE]. If the senior Senator from Alabama were present he would vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY].

The result was announced—yeas 36, nays 20, as follows:

YEAS—36.

Brandegee	Edge	McCormick	Shortridge
Broussard	Frelinghuysen	McCumber	Smoot
Bursum	Hale	McLean	Spencer
Calder	Harreld	Moses	Sterling
Cameron	Jones, Wash.	Nicholson	Sutherland
Capper	Kendrick	Norbeck	Townsend
Colt	Keyes	Oddie	Wadsworth
Curtis	Lenroot	Pepper	Warren
Dillingham	Lodge	Phipps	Watson, Ind.

NAYS—20.

Ashurst	Heflin	Overman	Simmons
Dial	Hitchcock	Pomerene	Smith
Fletcher	Jones, N. Mex.	Ransdell	Stanfield
Gerry	McNary	Reed	Trammell
Gooding	Myers	Sheppard	Walsh, Mont.

NOT VOTING—39.

Ball	Glass	Nelson	Shields
Borah	Harris	New	Stanley
Caraway	Harrison	Newberry	Swanson
Culberson	Johnson	Norris	Underwood
Cummins	Kellogg	Owen	Walsh, Mass.
du Pont	King	Page	Watson, Ga.
Elkins	Ladd	Pittman	Weller
Ernst	La Follette	Poindexter	Williams
Fernald	McKellar	Rawson	Willis
France	McKinley	Robinson	

So section 315 as amended was agreed to, as follows:

SEC. 315. (a) That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in costs of production of articles wholly or in part the growth or product of the United States and of like or similar articles wholly or in part the growth or product of competing foreign countries, shall find it thereby shown that the duties fixed in this act do not equalize the said differences in costs of production he shall, by such investigation, ascertain said differences and determine and proclaim the changes in classifications or increases or decreases in any rate of duty provided in this act shown by said ascertained differences in such costs of production necessary to equalize the same. Sixty days after the date of such proclamation or proclamations such changes in classification shall take effect, and such increased or decreased duties shall be levied, collected, and paid on such merchandise when imported from any foreign country into the United States or into any of its possessions (except the Philippine Islands, the Virgin Islands, and the islands of Guam and Tutuila): *Provided*, That the total increase or decrease of such rates of duty shall not exceed 50 per cent of the rates specified in Title I of this act, or in any amendatory act.

(b) That in order to regulate the foreign commerce of the United States and to put into force and effect the policy of the Congress by this act intended, whenever the President, upon investigation of the differences in costs of production of products provided for in paragraphs 25 or 26 of Title I of this act wholly or in part the product of the United States and of like or similar products wholly or in part the product of foreign countries, shall find it thereby shown that the duties prescribed in this act do not equalize said differences, and shall further find it thereby shown that the said differences can not be equalized by proceeding under the provisions of subdivision (a) of this section, he shall make such findings public, together with a description of the products to which they apply, in such detail as may be necessary for the guidance of appraising officers. In such cases and upon the proclamation by the President becoming effective the ad valorem duty or duty based in whole or in part upon the value of the imported product in the country of exportation shall thereafter be based upon the American selling price, as defined in subdivision (f) of section 402 of this act, of any similar competitive product manufactured or produced in the United States embraced within the class or kind of imported products upon which the President has made a proclamation under subdivision (b) of this section.

The ad valorem rate or rates of duty based upon such American selling price shall be the rate found, upon said investigation by the President, to be shown by the said differences in costs of production necessary to equalize such differences, but no such rate shall be decreased or increased more than 50 per cent of the rate specified in Title I of this act upon such product. Such rate or rates of duty shall become effective 60 days after the date of the said proclamation of the President, whereupon the duties so estimated and provided shall be levied, collected, and paid on such product when imported from any foreign country into the United States or into any of its possessions (except the Philippine Islands, the Virgin Islands, and the islands of Guam and Tutuila). If there is any imported product within the class or kind of products, upon which the President has made public a finding, for which there is no similar competitive product manufactured or produced in the United States, the value of such imported product shall be determined under the provisions of paragraphs (1), (2), and (3) of subdivision (a) of section 402 of this act.

(c) That in ascertaining the differences in costs of production, under the provisions of subdivisions (a) and (b) of this section, the President, in so far as he finds it practicable, shall take into consideration (1) the differences in conditions in production, including wages, costs of material, and other items in costs of production of such or similar merchandise in the United States and in competing foreign countries; (2) the differences in the wholesale selling prices of domestic and foreign merchandise in the principal markets of the United States; (3) advantages granted to a foreign producer by a foreign government, or by a person, partnership, corporation, or association in a foreign country; and (4) any other advantages or disadvantages in competition. Investigations to assist the President in ascertaining differences in costs of production under this section shall be made by the United States Tariff Commission, and no proclamation shall be issued under this section until such investigation shall have been made. The commission shall give reasonable public notice of its hearings and shall give reasonable opportunity to parties interested to be present, to produce evidence and to be heard. Said hearings shall be public. Subject to the foregoing, the commission is authorized to adopt such reasonable procedure, rules, and regulations as it may deem necessary. The commission shall prepare its findings in the case of each proceeding under this section, and the President shall make such findings, hearings, and testimony public as soon as practicable after the issuance of a proclamation under the provisions of this section.

The President, proceeding as hereinbefore provided for in proclaiming rates of duty, shall, when he determines that it is shown that the differences in costs of production have changed or no longer exist which led to such proclamation, accordingly as so shown, modify or terminate the same. Nothing in this section shall be construed to authorize a transfer of an article from the dutiable list to the free list or from the free list to the dutiable list, nor a change in form of duty. Whenever it is provided in any paragraph of Title I of this act that the duty or duties shall not exceed a specified ad valorem rate upon the merchandise provided for in such paragraph, no rate determined under the provisions of this section upon such merchandise shall exceed the maximum ad valorem rate so specified.

(d) For the purposes of this section any coal-tar product provided for in paragraphs 25 or 26 of Title I of this act shall be considered similar to or competitive with any imported coal-tar product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner.

(e) The President is authorized to make all needful rules and regulations for carrying out the provisions of this section.

(f) The Secretary of the Treasury is authorized to make such rules and regulations as he may deem necessary for the entry and declaration of imported product of the class or kind of merchandise upon which the President has made a proclamation under the provisions of subdivision (b) of this section and for the form of invoice required at time of entry.

The provisions of this section shall continue in effect and force until July 1, 1924, and thereafter no duties shall be changed except by authority of Congress.

Mr. McCUMBER. Mr. President, I present on behalf of the committee certain amendments to the amendments which have been proposed by the committee, which I ask may be read. I think it will not be necessary to read them all except as they are offered, and I will now offer the first one on the list.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The READING CLERK. On page 277, line 5, after the word "section," it is proposed to strike out "jurisdiction is hereby conferred upon the executive department or independent establishment of the Government, or both acting in cooperation, which he shall designate," and to insert in lieu thereof the words "the United States Tariff Commission is hereby authorized."

Mr. McCUMBER. Mr. President, I will state generally that subdivision (a) of section 316 provides that unfair methods of competition and unfair acts in the importation of merchandise the tendency of which is to destroy or substantially injure any industry efficiently and economically operated in the United States or to prevent the establishment of such an industry or to restrain or monopolize trade and commerce in the United States is declared to be unlawful. Subdivision 2 of section 316 authorizes the imposition of penalty duties or the prohibition of the importation of particular merchandise for the purpose of preventing unfair methods of competition in such importation. Subdivision (b) as originally reported to the Senate authorized the President to select the agency to investigate any alleged violation of the section. The amendment now offered specifies that the Tariff Commission shall make the investigation.

That, Mr. President, substantially states the purpose of the several minor amendments which I have sent to the desk.

Mr. WALSH of Montana. Mr. President, I express the hope that this section may be disposed of quite speedily. I desire, however, to call attention to one or two features of it, and particularly to explain what the section is about.

Some time ago I summarized the provision as follows:

The President is authorized to inquire into unfair methods of competition and unfair acts on the part of any owner, importer, consignee, or agent of either, in respect to either the importation of any merchandise or the sale of such as is imported, "the effect or tendency of which is to destroy or substantially injure an industry or to restrain or monopolize trade and commerce in the United States," utilizing for such inquiry any existing agency of Government—

Now, the Tariff Commission is the agency to be used—

and finding such method to exist, or acts to have been committed, to impose such an additional duty, not to exceed 50 per cent of that fixed by the bill, as will "offset such method or acts," or, "in extreme cases," he may direct that "as he shall deem the best interests of the United States shall require," such merchandise "shall be excluded from entry," such direction to have the force of law.

I need not say that upon principles of the law frankly conceded upon the other side of the Chamber this section can not possibly be sustained as a constitutional exercise of the power of Congress; but I do not care to debate that matter now. What I want to call your attention to is this: If the Tariff Commission shall find that these unfair practices are being pursued, relief is given to the person whose interests are affected through judicial review. He may go before the Court of Customs Appeals and protest against the decision of the President in the matter, and, if his action is not justified, it may be annulled. He may even go to the Supreme Court of the United States by appeal from the decision of the President in that matter, indicating what I insisted time and again upon this floor, that whenever this delegation of power is given there must be given an opportunity for review in the courts. The principle is acknowledged in this part of the bill; but I pass that.

Whenever the existence of any such unfair method or act shall be established to the satisfaction of the President, he shall determine the rate of additional duty, not exceeding 50 nor less than 10 per cent of the value of such merchandise as defined in section 402—

And then he imposes those duties.

Mr. President, I dare say that the President of the United States is as accomplished a mathematician as the ordinary Member of this body; but how he is going to convert into a rate of duty the offense committed by importers or dealers in imported articles so as to offset by his rate of duty the evil that is thus perpetrated is a problem which I shall not undertake to solve. I merely call attention to the matter in passing.

He may not only impose this speculative duty which is thus arrived at, however, but in extreme cases he may declare that that merchandise shall be excluded from the United States entirely. Just exactly what is an extreme case, or a moderate case, or a mild case, we are left merely to speculate. Of course, this gives to the President the power to impose any duty he sees fit, or to exclude the merchandise altogether if he sees fit. In other words, the discretion vested in the President by section 315 is made perfectly obvious and indisputable under the provisions of section 316.

But that is not the worst of this, Mr. President. You will observe that it provides at the outset:

That unfair methods of competition and unfair acts in the importation of merchandise into the United States, or in its sale by the owner, importer, consignee, or agent of either, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated—

Are declared to be unlawful, and to be punished or prevented in the manner that is indicated. Of course, that means something in the nature of a continuing custom or practice or regular habit of the people who are engaged in the importation of that particular commodity. Then the President may impose a duty upon further importations. But wait:

We have half a dozen foreign importers engaged in these wrongful acts, and we have half a dozen other importers in this country, highly honorable, reputable business men, who are denouncing these acts, and insist that they ought not to be continued. A duty of anywhere from 10 to 50 per cent is thereupon imposed upon the importation of that kind of commodity, to be paid by the honest, law-abiding importers and merchants engaged in the selling of imported merchandise just exactly the same as by the wrongdoer who gave rise to the action of the President, or, in extreme cases, the man's business is to be utterly ruined when he has been endeavoring to do the best he can to carry on his business in a legitimate and an honorable way.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Ohio?

Mr. WALSH of Montana. I do.

Mr. POMERENE. It can be assumed that these tariff duties, like the rain, fall on the just and the unjust alike.

Mr. WALSH of Montana. I have said all I care to say about this section, Mr. President.

Mr. McCUMBER. Mr. President, I assume, from the standpoint of the Senator from Montana, that the fiction of the Democratic Party still holds good that a Democratic administration can do no wrong, and that any law that is passed by such administration is a very proper law.

In comparison with the powers that are given to the President under section 316, I want to read the power that was given to the President under the law of 1916. Taking section 804 as the standard, it provides:

That whenever any country, dependency, or colony shall prohibit the importation of any article the product of the soil or industry of the United States and not injurious to health or morals, the President shall have power to prohibit, during the period such prohibition is in force, the importation into the United States of similar articles, or in case the United States does not import similar articles from that country, then other articles the products of such country, dependency, or colony.

He is not limited in the selection of those articles. He is not limited in the number of those articles. If you were to give this the broadest construction, if there were three American articles prohibited from entering that foreign country, the President would have a right under this to prohibit anything coming from that foreign country to the United States. Absolutely unlimited was the power given to President Wilson.

Now let us take the next section, section 805:

That whenever * * * the President shall be satisfied that there is reasonable ground to believe that under the laws, regulations, or practices of any country, colony, or dependency contrary to the law and practice of nations—

He is to determine that—

the importation into their own or any other country, dependency, or colony of any article the product of the soil or industry of the United States and not injurious to health or morals is prevented or restricted the President is authorized and empowered to prohibit or restrict during the period such prohibition or restriction is in force, the importation into the United States of similar or other articles, products of such country, dependency, or colony as in his opinion the public interest may require—

Think of that broad power—"as in his opinion the public interest may require"—

and in such case he shall make proclamation stating the article or articles which are prohibited from importation into the United States; and any person or persons who shall import, or attempt or conspire to import, or be concerned in importing, such article or articles, into the United States contrary to the prohibition in such proclamation, shall be liable to a fine of not less than $2,000 nor more than $50,000, or to imprisonment not to exceed two years, or both, in the discretion of the court. The President may change, modify, revoke, or renew such proclamation in his discretion.

Mr. President, no court has challenged that that I know of. It was not a war power, because it was a power given before we entered the war. The provision in section 316 is guarded in every respect as carefully as we have guarded the provisions of section 315 as to the hearings, as to the body which shall furnish the President the information, and so forth.

Mr. SPENCER. Mr. President, I ask that the Secretary read the proposed amendment.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 277 of the bill it is proposed to strike out all of the matter beginning with the word "jurisdiction," in line 5, down to and including the word "designate," in line 8, or the following words:

Jurisdiction is hereby conferred upon the executive department or independent establishment of the Government, or both, acting in cooperation, which he shall designate.

And to insert in lieu thereof the words:

The United States Tariff Commission is hereby authorized.

Mr. SPENCER. Mr. President, up to the present time the Tariff Commission has been confined entirely to research and examination. When it makes its examination into any question which the tariff may eventually affect, either side uses the result of that research for their own information. Sometimes those who are opposed to a protective tariff find much to support their position in the report of the Tariff Commission. Sometimes those of us who believe in a protective tariff find much to support our position.

I want to say that if this amendment carries it means the beginning of the end of the Tariff Commission, because for the first time we will put upon the Tariff Commission the responsibility, not of research, not of investigation, not of furnishing information only, but we will put upon them the responsibility of determining what rates ought to be placed upon any given commodity.

The result will be that when the return of the Tariff Commission on any rate is made and their report comes in from one side or the other of this Chamber there will be opposition. When you inject the Tariff Commission into the political differences over the tariff you spell the beginning of the end of the Tariff Commission. It is proposed to give to them now for the first time the right not only of examination, not only of research, but to themselves announce what they think ought to be the rate. That means that if they venture their opinion with regard to a rate which leans toward a tariff for revenue only, I am against it. It means, on the other hand, that if they announce an opinion which leans toward a protective tariff, men upon the other side are against it, and every action of the Tariff Commission will be either attacked or supported in this Chamber in accordance with the opinions of the Members on the question of the tariff itself. That will end the usefulness of the Tariff Commission.

I have only one thing else to say, and that is that it is a bad policy to allow those who make the investigation by way of research to act at the same time in a judicial capacity to determine what ought to be done, because when a body investigates merely for information they are independent, they do not let the chips fall where they will; they are seeking for light, and they gather the facts as they are and present them.

If you substitute for that condition a Tariff Commission which gathers information and then ventures its opinion, its recommendation, its finding, its fixing of rates, what is the result? The next time the Tariff Commission investigates that subject upon which they have already fixed their rates they are bound to direct their investigation so as to support their findings, and they will have lost their impartial character. They can no longer be depended upon as an impartial body of research and investigation; they will have become a political factor in the making of the tariff, and that will end their usefulness.

Mr. FRELINGHUYSEN. Mr. President, the fundamental rule is laid down as to how these facts shall be found and comparisons made, based entirely upon competitive conditions. How can the Tariff Commission adopt any policy of a tariff for revenue only? The proposition is one based entirely on facts, the differential between two conditions, and it has not resulted in political influence or any particular tariff policy in any other country which imposes tariffs, and places the responsibility of making a rate on a commission where they lay down the fundamental principle upon which the rates shall be levied.

Mr. SPENCER. Does not the Senator see the difference between an impartial, independent commission, which shall gather information and give the result of what they find, and another commission which itself passes upon the rates, and which, of course, must sustain its findings, so that in the latter case all its subsequent research lacks the character of independence and is directed toward the establishment of the correctness of the finding which they have already made? You will change the whole character of the Tariff Commission; you will change it from an independent body of research, of investigation, of information into a political agency, and you will spell the end of the Tariff Commission.

Mr. FRELINGHUYSEN. Will it be any more of a political body than a committee of Congress trying to base their findings upon inaccurate information and upon no rule whatsoever?

Mr. LENROOT. Mr. President, I have no objection to the amendment which has been proposed, but I do want to say a word in connection with the subject matter to which the amendment relates. I agree with the Senator from Montana in his views concerning the validity of the section, and it is not very persuasive to me to say that because a Democratic law gave to the President power which I do not believe Congress had any constitutional authority to give him therefore a Republican proposed law is made valid.

Of course, the chairman of the committee will admit that the sections to which he has referred have never been brought into question, because the President has never exercised the power sought to be conferred by them. I have no question whatever that the Congress has the power, if the President finds that another country has discriminated against us in any way, to authorize him to proclaim an embargo upon the importation of any article exported from that country to this country; but the law which has been referred to permits the President to select articles of merchandise or commodities upon which he may create an embargo and admit others. That, it seems to me, is clearly an exercise of legislative authority, which can not be delegated.

So, under the amendment now proposed, if one importer has indulged in unfair competition, and a finding to that effect is sustained and reported to the President, because one importer has been guilty of wrongdoing the President may fix rates from 10 to 50 per cent ad valorem upon all merchandise, either of that character or any different character.

Mr. REED. Let me ask the Senator whether, in the case he has just put, it would not be much wiser if we provided penalties to be visited upon the particular importer who violated the proper practices, and reach it in that way, instead of reaching it by excluding everybody?

Mr. LENROOT. I think that is the way to reach it. The Senator from Utah has just called my attention to one of the amendments which is intended to be proposed, which will limit it to merchandise imported in violation of this act. Do I understand from the Senator from Utah, then, that it will not be a general rate imposed upon all merchandise but will be a rate imposed upon merchandise imported by a given individual who is guilty of violation of the act?

Mr. SMOOT. That is all there is to it, Mr. President. The criticism the Senator has just offered to the original paragraph is absolutely correct. Under that, if there had been one violation the President could have imposed the extra duty upon all importations, by any and every person, of that kind of merchandise, and that is why the committee is going to offer this amendment.

Mr. LENROOT. I am very frank to say that that very greatly improves the section.

Mr. WALSH of Montana. Mr. President, I merely desire to say, before the vote is taken, that, as remarked by the Senator from Wisconsin, I do not consider it any answer to the objection made to this section to say that at some other time Congress passed another law which was equally obnoxious. Nor do I feel at all subject to the imputation of accepting as within the bounds of the Constitution every act passed by a Democratic

Congress and during a Democratic administration, and finding fault with similar acts passed in a Republican administration.

I have had no opportunity to examine the statute to which the Senator from North Dakota makes reference. In some of its features, at least, it is easily sustained by the case of Field against Clark. I do not undertake to state, however, that it could be sustained by that decision nor that it could be sustained at all. Indeed, in the case of Field against Clark the Supreme Court referred to many statutes which had been passed which seemed to confer upon the President discretionary power. They merely so remarked, without undertaking to say that upon an inquiry into any particular one of those statutes it might not be found to be violative of the Constitution. That seems to be no answer at all to the argument.

The PRESIDING OFFICER. The question is upon agreeing to the amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment to the amendment.

The ASSISTANT SECRETARY. On page 277, line 11, the committee proposes to strike out the words "such department or establishment" and to insert in lieu thereof the words "the commission."

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The Chair desires to suggest that in eight cases the committee proposes to strike out the words "such department or establishment" and to insert in lieu thereof the words "the commission," as follows:

Page 277, line 11; page 277, lines 14 and 15; page 277, line 21; page 278, line 2; page 278, line 12; page 278, line 14; page 278, line 16; and page 279, lines 1 and 2.

Is there objection to agreeing to those amendments to the amendment en bloc? The Chair hears no objection, and they are agreed to. The Secretary will state the next amendment to the amendment.

The ASSISTANT SECRETARY. On page 277, lines 16 and 17, the committee proposes to strike out the words "as may be deemed by such department or establishment" and to insert in lieu thereof "as it may deem."

The amendment to the amendment was agreed to.

The next amendment to the amendment was, on page 279, line 10, to strike out the word "such merchandise" and to insert in lieu thereof "merchandise imported in violation of this act."

The amendment to the amendment was agreed to.

The next amendment to the amendment was, on page 279, line 16, to insert a comma after the word "President."

The amendment to the amendment was agreed to.

The next amendment to the amendment was, on page 279, line 22, to strike out the words "shall find as a fact" and to insert in lieu thereof the words "has reason to believe."

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is upon agreeing to the committee amendment known as section 316 as amended.

Mr. WALSH of Montana. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. FLETCHER (when his name was called). Making the same announcement as before as to my pair and transfer, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair as before, I vote "yea." I take this opportunity to announce that the Senator from Maine [Mr. FERNALD], if present and not paired, would vote "yea."

Mr. POMERENE (when his name was called). I again announce my pair with my colleague [Mr. WILLIS], who is absent. If I were permitted to vote, I should vote "nay." If my colleague were present, he would vote "yea." Being unable to obtain a transfer, I withhold my vote.

Mr. SIMMONS (when his name was called). I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG]. I am unable to obtain a transfer, and therefore withhold my vote.

I wish to announce that the Senator from Virginia [Mr. GLASS], who is paired with the Senator from Vermont [Mr. DILLINGHAM], is necessarily absent. If the Senator from Virginia were present, he would vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the preceding vote with reference to my pair and transfer, I vote "yea."

Mr. SWANSON (when his name was called). I am paired for the evening with the senior Senator from New York [Mr. WADSWORTH]. If he were present, he would vote "yea" and I would vote "nay." I will let this announcement stand for the evening.

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. SIMMONS. I wish to announce that the Senator from Nevada [Mr. PITTMAN] is absent on account of illness in his family. If he were present, he would vote "nay."

I also wish to announce that the Senator from Mississippi [Mr. HARRISON] is necessarily absent. He is paired with the junior Senator from West Virginia [Mr. ELKINS]. If present, the Senator from Mississippi would vote "nay."

Mr. POMERENE. The pair of the senior Senator from Alabama [Mr. UNDERWOOD] has been announced. I was requested to say that if he were present he would vote "nay."

Mr. DILLINGHAM. Making the same announcement as before, I vote "yea."

Mr. JONES of New Mexico. Making the same announcement as on previous votes regarding my pair and its transfer, I vote "nay."

Mr. CALDER (after having voted in the affirmative). Making the same announcement as before with respect to my pair with the Senator from Georgia [Mr. HARRIS] and its transfer, I allow my vote to stand.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY].

The result was announced—yeas 37, nays 16, as follows:

YEAS—37.

Brandegee	Ernst	McLean	Smoot
Broussard	Gooding	McNary	Stanfield
Bursum	Hale	Moses	Sterling
Calder	Harreld	New	Sutherland
Cameron	Jones, Wash.	Nicholson	Townsend
Capper	Kendrick	Norbeck	Warren
Colt	Keyes	Oddie	Watson, Ind.
Curtis	Lodge	Pepper	
Dillingham	McCormick	Phipps	
Edge	McCumber	Shortridge	

NAYS—16.

Ashurst	Heflin	Myers	Sheppard
Dial	Hitchcock	Overman	Smith
Fletcher	Jones, N. Mex.	Ransdell	Trammell
Gerry	McKellar	Reed	Walsh, Mont.

NOT VOTING—42.

Ball	Harris	Norris	Stanley
Borah	Harrison	Owen	Swanson
Caraway	Johnson	Page	Underwood
Culberson	Kellogg	Pittman	Wadsworth
Cummins	King	Poindexter	Walsh, Mass.
du Pont	Ladd	Pomerene	Watson, Ga.
Elkins	La Follette	Rawson	Weller
Fernald	Lenroot	Robinson	Williams
France	McKinley	Shields	Willis
Frelinghuysen	Nelson	Simmons	
Glass	Newberry	Spencer	

So section 316 as amended was agreed to, as follows:

SEC. 316. (a) That unfair methods of competition and unfair acts in the importation of merchandise into the United States, or in its sale by the owner, importer, consignee, or agent of either, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States, or to prevent the establishment of such an industry, or to restrain or monopolize trade and commerce in the United States, are hereby declared unlawful, and when found by the President to exist shall be dealt with, in addition to any other provisions of law, as hereinafter provided.

(b) That to assist the President in making any findings under this section the United States Tariff Commission is hereby authorized to investigate any alleged violation hereof on complaint under oath or upon the initiative of such department or independent establishment.

(c) That the commission shall make such investigation under and in accordance with such rules as it may promulgate and give such notice and afford such hearing, and when deemed proper by the commission such rehearing with opportunity to offer evidence, oral or written, as it may deem sufficient for a full presentation of the facts involved in such investigation; that the testimony in every such investigation shall be reduced to writing, and a transcript thereof with the findings and recommendation of the commission shall be the official record of the proceedings and decision in the case, and in any case where the findings in such investigation show a violation of this section, a copy of the findings shall be promptly mailed or delivered to the importer or consignee of such merchandise; that such findings and decision, if supported by evidence, shall be conclusive, unless a rehearing shall be granted by the commission, or unless, within such time after entry of said decision and in such manner as appeals may be taken from decisions of the United States Board of General Ap-

praisers, an appeal shall be taken from said finding and decision upon a question or questions of law only to the United States Court of Customs Appeals by the importer or consignee of such merchandise; that if it shall be shown to the satisfaction of said court that further evidence should be taken, and that there were reasonable grounds for the failure to adduce such evidence in the proceedings before the commission, said court may order such additional evidence to be taken before the commission in such manner and upon such terms and conditions as to the court may seem proper; that the commission may modify its findings as to the facts or make new findings by reason of additional evidence, which, if supported by the evidence, shall be conclusive as to the facts unless within such time and in such manner an appeal shall be taken as aforesaid upon a question or questions of law only; that the judgment of said court shall be final, except that the same shall be subject to review by the United States Supreme Court upon certiorari within three months after such judgment of the United States Court of Customs Appeals.

(d) That the final findings of the commission shall be transmitted with the record to the President.

(e) That whenever the existence of any such unfair method or act shall be established to the satisfaction of the President he shall determine the rate of additional duty, not exceeding 50 nor less than 10 per cent of the value of such merchandise as defined in section 402 of Title IV of this act, which will offset such method or act, and which is hereby imposed upon merchandise imported in violation of this act, or, in what he shall be satisfied and find are extreme cases of unfair methods or acts as aforesaid, he shall direct that such merchandise as he shall deem the interests of the United States shall require, imported by any person violating the provisions of this act, shall be excluded from entry into the United States, and upon information of such action by the President the Secretary of the Treasury shall, through the proper officers, assess such additional duties or refuse such entry; and that the findings of the President shall be conclusive, unless within 10 days thereafter he shall revoke or modify the same, in which case such revocation or modification shall be conclusive.

(f) That whenever the President has reason to believe that any merchandise is offered or sought to be offered for entry into the United States in violation of this section but has not information sufficient to satisfy him thereof, the Secretary of the Treasury shall, upon his request in writing, forbid entry thereof until such investigation as the President may deem necessary shall be completed: *Provided*, That the Secretary of the Treasury may permit entry under bond upon such conditions and penalties as he may deem adequate.

(g) That any additional duty or any refusal of entry under this section shall continue in effect until the President shall find and instruct the Secretary of the Treasury that the conditions which led to the assessment of such additional duty or refusal of entry no longer exist.

Mr. SMOOT. Mr. President, the amendment on page 279, in line 10, striking out the words "such merchandise" and inserting the words "merchandise imported in violation of this act," was agreed to. I think there ought to be an amendment on page 279, in line 14, after the word "require," by inserting the words "imported by any persons violating the provisions of this act." There is a doubt as to whether the words "such merchandise," in line 12, would refer back to merchandise imported in violation of this act. I ask unanimous consent that we reconsider the vote by which section 316 as amended was agreed to.

The PRESIDING OFFICER. Without objection, the vote by which section 316 as amended was agreed to will be considered as reconsidered.

Mr. SMOOT. I now move to amend by inserting after the word "require" the words "imported by any person violating the provisions of this act."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 279, in line 14, after the word "require," the Senator from Utah moves to amend by inserting the words "imported by any person violating the provisions of this act."

The amendment to the amendment was agreed to.

Mr. WALSH of Montana. I ask unanimous consent that the roll call just recorded be deemed to apply to the question now pending.

The PRESIDING OFFICER. Without objection, it is so ordered, and without objection section 316 as amended is agreed to. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. Section 317a. In the committee amendment at the foot of page 283, in line 25, the committee now proposes to amend its amendment by striking out the words "such department or independent establishment of the Government as the President may direct," and insert in lieu thereof "The United States Tariff Commission," so as to read:

(h) It shall be the duty of the United States Tariff Commission to ascertain and at all times to be informed whether any of the discriminations against the commerce of the United States enumerated in subsections (b), (c), and (f) of this section are practiced by any country; and if and when such discriminatory acts are disclosed, it shall be the duty of such department or independent establishment to bring the matter to the attention of the President, together with recommendations.

Mr. WALSH of Montana. Mr. President, I have no objection to the amendment, but in the absence of any other explanation I want the Senate to understand what it is they are voting on and for the sake of brevity I refer to a summary of the provisions of section 317 prepared by me some time ago, as follows:

6. The President may impose additional duties, not exceeding 50 per cent ad valorem, on merchandise imported from any country which, with respect to the disposition in or transportation through or reexportation from such country, imposes upon merchandise, being the product of the United States, any charge or burden, or subjects it to any restriction not equally borne by the products of any other country foreign to the offending country, or which places the United States at a disadvantage compared with the commerce of any foreign country, the amount of such additional duties being such as shall be determined by him "to be equivalent to such burdens."

7. If a foreign country, after any such additional duties shall have been proclaimed by the President, shall maintain or increase its discrimination against the commerce of the United States, he may, if he deems it consistent with the interests of the United States, proclaim an embargo against importations from such country into the United States.

8. Any such increase of duties or embargo shall extend to the whole of any foreign country or to a part thereof only as the President shall deem "the public interests require."

9. He may impose new or additional duties upon merchandise imported from any country which unduly or unfairly discriminates against the United States through any export duty or bounty, on production or exportation, or rebate of duties or other preferential allowance, such duties to be in an amount equivalent to the burdens ensuing from such discrimination.

Mr. President, I find it difficult to understand why provisions of this character should be inserted in the bill, not to speak of their legality or illegality. My curiosity is aroused, and I hope it will be satisfied by some member of the committee as to the particular country against which these provisions are aimed. What country is it? We are now at peace and happily likely to be at peace with all the world for a long time to come. God grant it! Why should we put it in a statute that we are afraid that some country is going to discriminate against us, the United States, this great, powerful, wealthy Nation; that some country is going to discriminate against us and in favor of some other country, our rivals in trade. I wonder what country it is against which these provisions are aimed?

Of course, we have commercial treaties with practically every nation on earth, which treaties contain the ordinary favored-nation clause, under which those countries have actually bound themselves by solemn treaty not to do the things which we guard against here. Are we to anticipate that some of these countries are going to violate their treaties with us, and we must thus anticipate their actions and prepare to make reprisals upon them? I had supposed, Mr. President, that after the horrible war through which we have passed we were going to try to cultivate amicable relations with our neighbors and friends and not go around carrying a chip on our shoulders constantly. Of course, the mind will immediately recur to Germany. The German mind may still be filled with rancor toward the people of this country and possibly it is Germany against whom we are thus guarding our people; but, Mr. President, we have a solemn treaty with Germany covering this exact subject. By the treaty ratified by the Senate a year ago it was provided:

That the rights and advantages stipulated in that treaty (the treaty of Versailles) for the benefit of the United States, which it is intended the United States shall have and enjoy, are those defined in section 1 of Part IV and Parts V, VI, VIII, IX, X, XI, XII, XIV, and XV.

Then, turning to Part X of the Versailles treaty, I find the following language:

ARTICLE 264.

Germany undertakes that goods the produce or manufacture of any one of the allied or associated States imported into German territory, from whatsoever place arriving, shall not be subjected to other or higher duties or charges (including internal charges) than those to which the like goods the produce or manufacture of any other such State or of any other foreign country are subject.

Germany will not maintain or impose any prohibition or restriction on the importation into German territory of any goods the produce or manufacture of the territories of any one of the allied or associated States, from whatsoever place arriving, which shall not equally extend to the importation of the like goods the produce or manufacture of any other such State or of any other foreign country.

ARTICLE 265.

Germany further undertakes that, in the matter of the régime applicable on importation, no discrimination against the commerce of any of the allied and associated States as compared with any other of the said States or any other foreign country shall be made, even by indirect means, such as customs regulations or procedure, methods of verification or analysis conditions of payment of duties, tariff classification or interpretation, or the operation of monopolies.

ARTICLE 266.

In all that concerns exportation Germany undertakes that goods, natural products or manufactured articles, exported from German territory to the territories of any one of the allied or associated States shall not be subjected to other or higher duties or charges (including internal charges) than those paid on the like goods exported to any other such State or to any other foreign country.

Germany will not maintain or impose any prohibition or restriction on the exportation of any goods sent from her territory to any one of the allied or asssociated States which shall not equally extend to the exportation of the like goods, natural products or manufactured articles, sent to any other such State or to any other foreign country.

It would seem as though we were reasonably well safeguarded against discrimination of any kind from Germany.

What other nation might be inspired thus to discriminate against the United States?

I think this amendment calls for some explanation. I ask the chairman of the Committee on Finance if he will not kindly advise us why we ought to vote for this provision?

Mr. McCUMBER. Mr. President, we have had upon our statute books for many years laws relating to discrimination. We have had methods of meeting the discrimination that could be practiced against us. The broadest statute upon that subject I find in the revenue law of 1916, paragraphs 804 and 805, which I have read.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. McCUMBER. I yield.

Mr. WALSH of Montana. Those are the sections to which the Senator referred. That statute was passed on September 8, 1916?

Mr. McCUMBER. Yes.

Mr. WALSH of Montana. The war was then going on in Europe, but it was before we had entered the war?

Mr. McCUMBER. Yes; we were not then in the war.

Mr. WALSH of Montana. We were at that time in the midst of serious diplomatic controversies with Germany, however, were we not?

Mr. McCUMBER. Mr. President, I am speaking now simply of the power, not of the advisability of such action.

Mr. WALSH of Montana. Exactly.

Mr. McCUMBER. We had no greater power then than we now have.

Mr. WALSH of Montana. Is that the case? Does not the war power extend to legislation enacted in anticipation of war as well as to legislation which is enacted after the declaration of war?

Mr. McCUMBER. I do not think so. We are not in a war. There may be a war going on in Europe or in other sections of the world to-day, as there is war going on in China, but I do not think the Senator from Montana would contend for a single moment that we could enact legislation under the war powers because of that fact.

I am willing to say that I think in section 317 we are pressing closer to the "twilight zone" of uncertainty as to the constitutionality of the provision than in any other section that has been discussed, but, nevertheless, we have followed to some extent the provisions which are contained in the law of 1890, relating to proceedings in the case of discrimination against the United States, and have kept somewhat short of the power that was granted under the law of 1916.

In a nutshell I can state what the provision is.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. McCUMBER. I yield.

Mr. WALSH of Montana. The provisions of the act of 1890 to which the Senator refers are those which were under consideration in the case of Field against Clark.

Mr. McCUMBER. Yes. In that instance, Mr. President, we did fix the rate upon the goods that were to be imported from the country which permitted the discrimination, but the President had to find under that law that there was a discrimination; judgment had to be exercised as to the extent of the discriminatory influences, and a duty was imposed that would meet it. In this instance, in section 317 the President is authorized to impose additional duties on the whole or any part of the imports into the United States from any country which discriminates against our overseas commerce. Those additional duties are limited to the extent of the discrimination, but if the discrimination is maintained and continued the importation of the merchandise may be prohibited entirely.

The provsion for penalizing discriminations against our trade covers all discriminations in that sphere. The first step authorized is the very moderate one of additional duties to be measured by the extent of the damage done to our trade, which is the only limitation provided. If the foreign country does not accord to our commerce that equality of treatment which it is our policy to extend to them, the President then may take more drastic measures and apply an embargo.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Dakota to the amendment of the committee.

Mr. LENROOT. Mr. President, just a word with reference to this proposed amendment. I think this section, quite aside from any constitutional question which may exist—and I think, as stated by the chairman of the committee, it involves the gravest constitutional questions of any of the sections which we have been considering—presents a most dangerous situation for the United States, because if the United States is to enter upon this policy no man can tell where the end will be. For instance, the paragraph beginning at the bottom of page 280 provides that the President shall increase duties—he must increase duties—if any other country enters into a reciprocity arrangement with a third country whereby the goods of such country shall be admitted at a lower rate than the general customs tariff rate in return for the other country admitting the goods of the second country at a lower rate. That is a right upon which the United States has insisted in times past. Such provisions have been found in former Republican tariff bills. But this provision says if any country in the world shall enter into such an arrangement in the future the President of the United States must increase the duties fixed in this bill upon imports from such country.

Then, going to the next paragraph, it is likewise made his duty—no discretion is given and, of course, there could not constitutionally be any discretion—to increase the rate. Again, if any country "imposes upon any product upon its exportation to the United States any duty, charge, restriction, or prohibition whatever which is not equally enforced upon the exportation of such products to every foreign country." So we have the two propositions, namely, if one country through reciprocity arrangements permits another country to let its goods in at a lower rate than its general customs tariff, under this section the President must increase the duties fixed in this bill——

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Montana?

Mr. LENROOT. I yield.

Mr. WALSH of Montana. We ourselves exercise that right with respect to Cuba.

Mr. LENROOT. We do; and I do not know whether Canada, for the purpose of this bill, will be considered as a separate country or not, but England and Canada have such an arrangement whereby imports from Canada are admitted at a rate 20 per cent less than the general customs tariff.

Mr. WALSH of Montana. Mr. President, will the Senator from Wisconsin permit me to make an inquiry of the Senator from North Dakota?

Mr. LENROOT. Certainly.

Mr. WALSH of Montana. I inquire of the Senator from North Dakota if the Committee on Foreign Relations has had this provision of the bill before it?

Mr. McCUMBER. I do not know whether the Committee on Foreign Relations has had the matter before it. The Senator from Massachusetts could probably answer that question. I wish, however, to submit one suggestion to the Senator from Wisconsin.

Mr. WALSH of Montana. If the Senator from Wisconsin will permit me, I should be very glad to interrogate the Senator from Massachusetts on that subject.

The PRESIDING OFFICER. Does the Senator from Wisconsin yield further to the Senator from Montana?

Mr. LENROOT. I yield.

Mr. WALSH of Montana. I inquire of the Senator from Massachusetts if the Committee on Foreign Relations has considered the subject of section 317?

Mr. LODGE. It has not; as a committee, certainly not.

Mr. WALSH of Montana. Has the Senator given his attention to it?

Mr. LODGE. No; I have not.

Mr. WALSH of Montana. Will the Senator permit me to call his attention to it now? It reads as follows:

> That the President shall by proclamation specify and declare new or additional duties as hereinafter provided upon the products of any foreign country whenever he shall find as a fact that such country—
>
> Imposes, directly or indirectly, upon the disposition in or transportation in transit through or reexportation from such country of any product of the United States any unreasonable charge, exaction, regulation, or limitation which is not equally enforced upon the like products of any foreign country;
>
> Imposes, directly or indirectly, upon the importation from the United States of any article not the product of the United States any customs, tonnage, or port duty or any other charge, exaction, regulation, or limitation whatever which is not equally enforced upon importation from every foreign country of the like article not being the product of the country whence it is directly imported;
>
> Imposes upon any product upon its exportation to the United States any duty, charge, restriction, or prohibition whatever which is not equally enforced upon the exportation of such products to every foreign country;

We exercise that right with respect to Cuba. We give Cuba a preference over every other country; but if some other country should give a preference to any country it would be the duty of the President to impose additional duties upon all importations from that country. So Great Britain gives a preference duty to all her colonies.

Mr. LODGE. Certainly; but she gets a reciprocal preference, of course.

Mr. WALSH of Montana. Yes.

Mr. LODGE. That takes it out of the favored-nation clause.

Mr. WALSH of Montana. So that Great Britain would immediately become subject to the provisions of this section.

Mr. LODGE. No; Cuba does not come under the favored-nation clause because she makes arrangements with us which she makes with no other country.

Mr. WALSH of Montana. Exactly. She makes arrangements with us. Now, if Cuba should make an arrangement with Great Britain or France better than she makes with us, she would immediately become subject to this.

Mr. LODGE. That would be a violation of the treaty

Mr. WALSH of Montana. So that Great Britain, in making an arrangement with her colonies, integral parts of the empire, favoring them over us, makes herself amenable to these provisions; does she not?

Mr. LODGE. I should hardly think so, with integral parts of the empire. That does not come within the favored-nation clause.

Mr. WALSH of Montana. All right; let it go some other way. Suppose that Germany and Poland make some reciprocal arrangement for reciprocal trade. There is, as I understand, a customs regulation, or is about to be a customs regulation, among the Balkan States. If Yugoslavia, for instance, should admit goods from Czechoslovakia at a less rate than she does from all the rest of the world, including the United States, she would make herself subject to these provisions, would she not?

Mr. LODGE. No; because I think this affects only nations which come under the favored-nation clause.

Mr. WALSH of Montana. Of course, if we have a treaty with a country, and have the favored-nation clause, that treaty obligates her not to give any nation treatment favored over us, and she would violate that treaty if she did it; but this assumes that she is going either to violate the treaty or else that she has not such a treaty with us.

Mr. LODGE. The favored-nation clause is, of course, disposed of if it is a reciprocal treaty between two countries, because the country with which we make the treaty gives us better terms.

Mr. WALSH of Montana. Exactly; so that she would not violate the favored-nation clause, but she would violate this provision.

Mr. LODGE. I am not sure of that.

Mr. WALSH of Montana. That is the question that I thought perhaps ought to receive the consideration of the Committee on Foreign Relations.

Mr. LODGE. I see, by looking at it, that this applies to every foreign country. It does not interfere with reciprocity treaties, and of course we can not interfere with the treaty-making power.

Mr. WALSH of Montana. It applies to every country that discriminates against us—that is to say, that gives to any nation a more favorable rate of duty than it does to us. Then that country becomes subject to the conditions of this statute.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from North Dakota?

Mr. LENROOT. I yield.

Mr. McCUMBER. Will the Senator from Montana allow me to suggest that it has always been held that a reciprocal arrangement made between two countries, whereby one for due consideration receives special favors from another and pays for them in granting special favors, is not in conflict with the favored-nation clauses of the treaty?

Mr. LODGE. Yes; that is what I said.

Mr. McCUMBER. And therefore, where reciprocity treaties have been made between nations it would not be a discrimination against the United States for the reason that just and proper consideration is supposed to pass between the countries in making those reciprocal arrangements.

Mr. LENROOT. Exactly. Under the other paragraphs that relate to discrimination what the chairman of the committee says is true; but under the paragraph that I am discussing there is not a word about discrimination. Discrimination is not an element. It is merely the fact of whether one country, through reciprocal arrangements, gives to another country lower duties than it gives to us. If it does so, these higher duties must be applied.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Montana?

Mr. LENROOT. I yield.

Mr. WALSH of Montana. I want to add that I am in entire accord with the Senator. The ordinary reciprocal arrangements do not violate the most-favored-nation clause. That is all right; but here comes in a provision, a law of the United States, that if they do that they become subject to this penalty.

Mr. McCUMBER. If it is not a discrimination, of course, then it will not come under the rule which we lay down.

Mr. LENROOT. Where does the Senator find in that paragraph anything about discrimination?

Mr. LODGE. Which paragraph is the Senator now speaking of?

Mr. LENROOT. The paragraph at the bottom of page 280 and at the top of page 281. There are other paragraphs that relate to discrimination, and I quite agree with the Senator that in most cases they would not apply; but in this the flat declaration is made, not if it discriminates but if one country gives to another a lower rate of duty than it gives to us, irrespective of whether it be discriminatory in the law, that the President must raise these duties. There is no escape from that conclusion.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Utah?

Mr. LENROOT. I yield.

Mr. SMOOT. If there were no provision such as this in the paragraph beginning on line 24, page 280, down to and including line 4 on page 281, then, of course, any country could shut out the exportations from the United States to that country. They could virtually exclude them.

Mr. LENROOT. No; that would be a discrimination.

Mr. SMOOT. For instance, suppose a country here—

Imposes, directly or indirectly, upon the importation from the United States of any article not the product of the United States any customs, tonnage, or port duty or any other charge, exaction, regulation, or limitation whatever which is not equally enforced upon importation from every foreign country of the like article not being the product of the country whence it is directly imported.

In the first place, I want to say that that is a notice to the world that America intends to be treated equally with all other countries. Suppose we do not have it in the law and we allowed those practices——

Mr. LENROOT. You have another paragraph covering discriminations.

Mr. SMOOT. Yes; we do, but it does not cover these particular items, and I do not know whether they would fall in that paragraph of discriminations or not. I want to say to the Senator that this is a discriminatory section written by the Tariff Commission and explained to the committee by the Tariff Commission, who requested that it be made a part of this tariff bill; and, in fact, as has been so often said, this is the first real antidumping provision, the first imposition of penalties upon discrimination against the United States, that we have ever had.

Mr. LENROOT. But does not the Senator see the position in which this puts the United States? The United States insists upon its rights to permit products from Cuba to enter into this country at a rate 20 per cent less than the general customs duties; but by this provision we say to the world that if any other country does what the United States insists it has a right to do, and is doing, the rates in this bill must be increased.

Mr. WALSH of Montana. Mr. President, will the Senator from Wisconsin permit me to make an inquiry of the Senator from Utah?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Montana?

Mr. LENROOT. I yield.

Mr. WALSH of Montana. I wish the Senator would explain what relation this has to the dumping proposition.

Mr. SMOOT. Why, it is a discrimination.

Mr. WALSH of Montana. How is it a discrimination? This refers to governmental acts, and to governmental acts only.

Mr. SMOOT. Certainly it does.

Mr. WALSH of Montana. Dumping, as I understand the proposition, is that certain owners of goods in a foreign country—not the government but the traders in foreign countries—throw their goods upon our market at less than the cost.

Mr. SMOOT. Yes.

Mr. WALSH of Montana. This provision has nothing to do with that condition of things, and I am startled that the Senator from Utah should make any such assertion. It must have been a mistake; it must have been an inadvertence upon his part.

Mr. SMOOT. No, Mr. President, this whole section is a question of discrimination against the commerce of the United States. In the question of dumping I did not refer only to

the paragraph that has been read; I meant the whole section, taken as a whole.

Mr. LENROOT. I am referring now to these two paragraphs. Does the Senator from Utah say that this would be a discrimination on the part of the United States, when it has been repeatedly held that it is not a violation of the favored-nation clause for countries to enter into reciprocal arrangements with each other?

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Massachusetts?

Mr. LENROOT. I yield.

Mr. LODGE. The favored-nation clause is not violated by a reciprocity treaty, of course.

Mr. LENROOT. No.

Mr. LODGE. I will confess that I have not examined these two clauses before, but as they are worded it seems to me that they would include a reciprocity treaty, and that, I am sure, can not be the intention.

Mr. WALSH of Montana. Mr. President, I want to invite the attention of the Senator to the succeeding paragraph. These paragraphs, as pointed out by the Senator from Wisconsin, do not refer to discrimination. That is covered in the paragraph found on page 281, as the Senator will see, reading as follows:

Discriminates against the commerce of the United States, directly or indirectly—

Mr. LODGE. That clause is a very different thing.

Mr. WALSH of Montana. Wait a minute.

By law or administrative regulation or practice, by or in respect to any duty, fee, charge, exaction, classification—

And so forth. Now we continue:

Or fails to accord to the commerce of the United States treatment equal and equivalent to that accorded to the commerce of any foreign country.

There is no discrimination there at all; but no matter what the consideration, no matter how the reciprocity agreement may be, if the commerce of the United States is not treated just exactly the same as that of the country with which it has the reciprocal arrangement it becomes operative.

Mr. LODGE. But the reciprocal arrangement never has been held, and never can be held, to be a violation of the favored-nation clause.

Mr. WALSH of Montana. Quite right; quite right.

Mr. LODGE. It takes it out.

Mr. WALSH of Montana. Quite right; but, of course——

Mr. LODGE. But I think there ought to be some change in the wording here, because this is so sweeping. It reads:

Imposes upon any product upon its exportation to the United States any duty, charge, restriction, or prohibition whatever which is not equally enforced upon the exportation of such products to every foreign country.

I take that at haphazard. That is not in the ordinary sense a discrimination if they have a treaty with the other country by which they get like or similar advantages themselves. Discrimination exists only when a nation has been treated differently from all other nations which have no reciprocity treaties. It seems to me that clause needs some rewording in order to make it clear. We can not undertake to interfere with reciprocity treaties, of course. We have them ourselves.

Mr. SMOOT. Does the Senator hold that that provision, beginning on line 9 and going down to line 17, on page 281, interferes with our favored-nation clause?

Mr. LODGE. I took the first one, page 280, and the second one and the third one.

Mr. SMOOT. The third is the discriminatory clause.

Mr. LODGE. No; that is the fourth, the one that begins "Discrimination." That seems to be all right; but discrimination is always met where a country receives from another country treatment which is not accorded to countries having no reciprocity treaty, where you are on the same footing. You do not discriminate where there is a reciprocity treaty, because you get an adequate return.

Mr. REED. Would it not cover the question, if in line 21, page 280, the word "unreasonable" were stricken out and the word "discriminatory" inserted? I am seeking simply to illustrate, not to cover the whole case.

Mr. LODGE. Discrimination means, of course, where they discriminate against the country which comes under the favored-nation clause, which a reciprocity treaty does not.

Mr. REED. Would not that cover the question?

Mr. LODGE. I think it would.

Mr. LENROOT. It would if that be inserted in the subsequent paragraph.

Mr. McCUMBER. Before we pass judgment on that I want to say that I am fearful we have overlooked one word in this paragraph. While the word "discrimination" is not used from line 24 down to line 4, on page 281, we are speaking of acts which are discriminatory.

Let us see about it. It reads, beginning on line 19, page 280:

Imposes, directly or indirectly, upon the importation from the United States of any article not the product of the United States any customs, tonnage, or port duty or any other charge, exaction, regulation, or limitation whatever which is not equally enforced upon importation from every foreign country of the like article not being the product of the country whence it is directly imported.

Let us take an illustration. An American buys some silk from Japan, brings it into the United States, and desires to send it on and sell it to Canada or to Great Britain. We do not want Great Britain to make a discriminatory charge against that article simply because it passes through the United States to Canada, which she does not impose upon other countries bringing products not their own through any particular channel to Great Britain. There is no use using the word "discrimination," because that is what we mean when we say that she imposes a duty upon this article not the product of the United States which she does not impose on a like article in like transit from any other country. That very fact is a discrimination.

Mr. LENROOT. Let us take the case cited by the Senator. Here is a house in New York City. It imports silks from Japan, markets them all over the world, and sends them to Canada. Canada gives England a preferential 20 per cent duty, but if a competitor is in London engaged in the same business competing with New York, and Canada gives that 20 per cent preferential duty, which she must under her law, to England, then the duties from England into this country must be increased under this paragraph.

Mr. McCUMBER. Canada and England as to each other are not foreign countries.

Mr. LENROOT. That does not affect the argument.

Mr. WALSH of Montana. It does not affect the situation there, because there is the further provision, as follows:

(j) That when used in this section the term "foreign country" shall mean any empire, country, dominion, colony, or protectorate, or any subdivision or subdivisions thereof (other than the United States and its possessions), within which separate tariff rates or separate regulations of commerce are enforced.

Mr. LENROOT. I believe that settles it.

Mr. REED. I would like to make this suggestion: Since the Senator in charge of the bill says that the language is meant to apply to discriminatory acts, that that is its intent, then why not put the words in and save all this discussion and make it perfectly plain?

Mr. McCUMBER. You can say "discriminate" in doing these things, if you so desire.

Mr. SMOOT. As I understand the Senator from Missouri, he suggests that on page 280, line 21, we strike out the word "unreasonable" and put in the word "discriminatory"?

Mr. REED. Yes. I made that suggestion as a way out. I am not wedded to it.

Mr. WALSH of Montana. Mr. President, that can not have been the purpose of the committee. The committee must have had some other purpose, because the case the Senator from Missouri has in mind is taken care of on page 281. That is, the President is authorized to impose these additional duties whenever any country "discriminates against the commerce of the United States, directly or indirectly, by law or administrative regulations," and so on. So that the committee had two conditions in mind, one of them to be covered by the first part of the section, and the other by the later part.

Mr. LODGE. It is not a discrimination if a reciprocity treaty exists. Discrimination can only apply to the favored-nation clause.

Mr. LENROOT. Mr. President, it seems to me we reach everything we ought to reach if we strike out the paragraph at the bottom of page 280 and lines 5 to 8, page 281, and let the paragraph stand beginning with line 9, reading, "Discriminates against the commerce of the United States, directly or indirectly, by law or administrative regulations or practice, by or in respect to any duty, fee, charge, exaction, classification, regulation, condition, restriction," and so forth, stopping with the semicolon on line 15. It seems to me that if we follow that course we will have gone quite as far as we can go, and quite as far as we ought to go, without creating an international relationship which would be very much to the injury of the United States.

Mr. LODGE. I think, as that wording stands, it would clash with the reciprocity agreements, and I can not see how that can be avoided. That, of course, we can not do. We have reciprocity agreements of our own.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the committee amendment.

The amendment to the amendment was agreed to.

The next amendment to the amendment was, on page 284, line 6, to strike out the words "such department or independent establishment" and to insert the words "the commission."

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to section 317 as amended.

Mr. LENROOT. I move to strike out, on page 280, all of lines 24, 25, and 26, and on page 281, lines 1 to 8, inclusive. Also on line 15, page 281, to strike out the semicolon and insert a period, and to strike out the remainder of the paragraph. That will leave it applying to all discriminations against the United States.

The PRESIDING OFFICER. The Senator from Wisconsin proposes an amendment to the amendment, which the Secretary will report.

The ASSISTANT SECRETARY. The Senator from Wisconsin proposes to strike out, on page 280, lines 24, 25, and 26, and lines 1 to 8, both inclusive, on page 281, as follows:

Imposes, directly or indirectly, upon the importation from the United States of any article not the product of the United States any customs, tonnage, or port duty or any other charge, exaction, regulation, or limitation whatever which is not equally enforced upon importation from every foreign country of the like article not being the product of the country whence it is directly imported;

Imposes upon any product upon its exportation to the United States any duty, charge, restriction, or prohibition whatever which is not equally enforced upon the exportation of such products to every foreign country.

Then, on line 15, after the word "country," to insert a period and strike out the semicolon and the remainder of line 15, and lines 16 and 17, as follows:

Or fails to accord to the commerce of the United States treatment equal and equivalent to that accorded to the commerce of any foreign country.

Mr. McCUMBER. Mr. President, the provision on line 26 relates to "customs, tonnage, or port duty or any other charge, exaction, regulation, or limitation." But keep in mind these words, "tonnage, or port duty." I do not think that that character of discrimination would be included under the provision from lines 5 to 8, and especially would it not be included under the provision from lines 9 to 15. The first is:

Imposes upon any product upon its exportation to the United States any duty, charge, restriction, or prohibition whatever which is not equally enforced upon the exportation of such products to every foreign country.

The imposition there is upon the product itself. The imposition and the discrimination mentioned in lines 24 to 26, inclusive, is a discrimination by reason of tonnage or port duty upon the vessels of the United States, and, taking lines 9 to 15, the provision covers discriminations against the "commerce of the United States, directly or indirectly." If it stopped there, it might include tonnage duties, and so forth. But it limits it. It says:

Discriminates against the commerce of the United States, directly or indirectly, by law or administrative regulation or practice, by or in respect to any duty, fee, charge, exaction, classification, regulation, condition, restriction, or prohibition, in such manner as to place the commerce of the United States at a disadvantage compared with the commerce of any foreign country.

I am fearful that if we leave out the question of tonnage or port duty it would not be included in either of the others, because the discrimination relates to the duties and to something pertaining to the article itself.

Mr. LODGE. That clause seems to me to be very sweeping. The language there, "duty, fee, charge, exaction," covers all possible port dues or port duties on which reciprocity treaties can be and often are made. It covers everything relating to the commerce of the United States—products, ships, trade, and everything.

Mr. McCUMBER. To make it certain, I should have no objection to having inserted in the portion of the paragraph found between lines 9 to 15 the words "customs, tonnage, or port duties."

Mr. LENROOT. That is all right.

Mr. McCUMBER. We will put that after the word "any" in line 11.

The PRESIDING OFFICER. The first question would be on the amendment of the Senator from Wisconsin to the amendment of the committee.

Mr. McCUMBER. I would suggest that we add, after the word "any," in line 11, page 281, the words "customs, tonnage or port," so that it would read:

Discriminates against the commerce of the United States, directly or indirectly, by law or administrative regulation or practice, by or in respect to any customs, tonnage or port duty, fee, charge, exaction—

And so forth.

Mr. LENROOT. That is all right.

The PRESIDING OFFICER. The question first will be on the amendment proposed by the Senator from Wisconsin to the amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The Secretary will report the amendment proposed by the Senator from North Dakota [Mr. McCUMBER] to the amendment.

The ASSISTANT SECRETARY. On page 281, in the committee amendment printed in the bill, in line 11, after the word "any" and before the word "duty" insert the words "customs, tonnage, or port," so as to read:

Discriminates against the commerce of the United States, directly or indirectly, by law or administrative regulation or practice, by or in respect to any customs, tonnage, or port duty, fee, charge, examination—

And so forth.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is on the adoption of section 317 as amended.

Mr. WALSH of Montana. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. CALDER (when his name was called). I transfer my pair with the Senator from Georgia [Mr. HARRIS] as before, and vote "yea."

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "yea."

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair and transfer as on the former vote, I vote "nay."

Mr. LODGE (when his name was called). Making the same announcement as to my pair and its transfer as before, I vote "yea."

Mr. POMERENE (when his name was called). Announcing my pair as heretofore with my colleague [Mr. WILLIS], who is absent, I withhold my vote. If I were at liberty to vote I would vote "nay" and I understand my colleague would vote "yea."

Mr. SIMMONS (when his name was called). I wish to make the same announcement as before with reference to my pair and my inability to secure a transfer. Therefore I withhold my vote. If I were at liberty to vote I would vote "nay."

Mr. SUTHERLAND (when his name was called). Transferring my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from Delaware [Mr. DU PONT], I vote "yea."

Mr. SWANSON (when his name was called). I am paired for the evening with the senior Senator from New York [Mr. WADSWORTH]. If he were present he would vote "yea" and I would vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before, I vote "yea."

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. NEW (after having voted in the affirmative). I have a pair with the junior Senator from Tennessee [Mr. McKELLAR]. In his absence I transfer that pair to the junior Senator from Michigan [Mr. NEWBERRY] and allow my vote to stand.

Mr. POMERENE. I wish to announce that the senior Senator from Alabama [Mr. UNDERWOOD], who is absent, is paired with the senior Senator from Massachusetts [Mr. LODGE]. If present, the Senator from Alabama would vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY].

The result was announced—yeas 38, nays 19, as follows:

YEAS—38.

Brandegee	Ernst	McLean	Shortridge
Broussard	Frelinghuysen	McNary	Smoot
Bursum	Gooding	Moses	Stanfield
Calder	Hale	New	Sterling
Cameron	Jones, Wash.	Nicholson	Sutherland
Capper	Kendrick	Norbeck	Townsend
Colt	Keyes	Oddie	Warren
Curtis	Lodge	Pepper	Watson, Ind.
Dillingham	McCormick	Phipps	
Edge	McCumber	Rawson	

NAYS—19.

Ashurst	Harris	Myers	Smith
Dial	Heflin	Overman	Stanley
Fletcher	Hitchcock	Ransdell	Trammell
Gerry	Jones, N. Mex.	Reed	Walsh, Mont.
Glass	Lenroot	Sheppard	

NOT VOTING—38.

Ball	Harrison	Norris	Swanson
Borah	Johnson	Owen	Underwood
Caraway	Kellogg	Page	Wadsworth
Culberson	King	Pittman	Walsh, Mass.
Cummins	Ladd	Poindexter	Watson, Ga.
du Pont	La Follette	Pomerene	Weller
Elkins	McKellar	Robinson	Williams
Fernald	McKinley	Shields	Willis
France	Nelson	Simmons	
Harreld	Newberry	Spencer	

So section 317 as amended was agreed to, as follows:

SEC. 317 (a) That from and after the passage of this act, subject to the provisions of this section, all products when imported into the United States from any foreign country shall be admitted under the provisions of Titles I and II and sections 315 and 316 of this act.

(b) That the President shall by proclamation specify and declare new or additional duties as hereinafter provided upon the products of any foreign country whenever he shall find as a fact that such country—

Imposes, directly or indirectly, upon the disposition in or transportation in transit through or reexportation from such country of any product of the United States any unreasonable charge, exaction, regulation, or limitation which is not equally enforced upon the like products of any foreign country;

Discriminates against the commerce of the United States, directly or indirectly, by law or administrative regulation or practice, by or in respect to any customs, tonnage, or port duty, fee, charge, exaction, classification, regulation, condition, restriction, or prohibition, in such manner as to place the commerce of the United States at a disadvantage compared with the commerce of any foreign country.

(c) If at any time the President shall find it to be a fact that any foreign country has not only discriminated against the commerce of the United States, as aforesaid, but has, after the issuance of a proclamation as authorized in subsection (b) hereof, maintained or increased its said discriminations against the commerce of the United States, the President is hereby authorized, if he deems it consistent with the interests of the United States, to issue a further proclamation directing that such products of said country as he shall deem the public interests may require shall be excluded from importation into the United States.

(d) That any proclamation issued by the President under the authority of this section shall, if he deems it consistent with the interests of the United States, extend to the whole of any foreign country or may be confined to any subdivision or subdivisions thereof; and the President shall, whenever he deems the public interests require, suspend, revoke, supplement, or amend any such proclamation.

(e) The President shall find as a fact the burdens placed on the commerce of the United States by the discriminations aforesaid, and when issuing any such proclamation shall declare therein the new or additional customs duties determined by him as aforesaid to be equivalent to such burdens, not to exceed 50 per cent ad valorem or its equivalent, and shall specify the date upon which such proclamation and any new or additional customs duties declared therein shall take effect, and from and after such date there shall be levied, collected, and paid on the products enumerated in such proclamation when imported into the United States such new or additional customs duties; or in case of products declared subject to exclusion from importation into the United States under the provisions of subsection (c) hereof, such products shall be excluded from importation.

(f) That whenever the President shall find as a fact that any foreign country enforces upon the exportation of any product any export duty, restriction, or prohibition, or grants any bounty on production or exportation, any rebate of duties or any preferential allowance upon exports which unduly or unfairly discriminates against the United States, any products thereof, or consumers therein, he shall by proclamation specify and declare new or additional duties as provided in subsections (b), (d), and (e) upon importation from any foreign country into the United States of the products of any industry which receives any benefit from any such discriminatory provisions aforesaid; and said new or additional duties shall be levied, collected, and paid as provided in such proclamation.

(g) All articles of merchandise imported contrary to the provisions of this section shall be forfeited to the United States and shall be liable to be seized, prosecuted, and condemned in like manner and under the same regulations, restrictions, and provisions as may from time to time be established for the recovery, collection, distribution, and remission of forfeitures to the United States by the several revenue laws. Whenever the provisions of this act shall be applicable to importations into the United States of the products of any foreign country, they shall be applicable thereto whether such products are imported directly or indirectly.

(h) It shall be the duty of the United States Tariff Commission to ascertain and at all times to be informed whether any of the discriminations against the commerce of the United States enumerated in subsections (b), (c), and (f) of this section are practiced by any country; and if and when such discriminatory acts are disclosed it shall be the duty of the commission to bring the matter to the attention of the President, together with recommendations.

(i) The Secretary of the Treasury with the approval of the President shall make such rules and regulations as are necessary for the execution of such proclamations as the President may issue in accordance with the provisions of this act.

(j) That when used in this section the term "foreign country" shall mean any empire, country, dominion, colony, or protectorate, or any subdivision or subdivisions thereof (other than the United States and its possessions), within which separate tariff rates or separate regulations of commerce are enforced.

Mr. McCUMBER. Mr. President, on behalf of the committee I now offer the amendment beginning on line 20, page 6, of the proposed amendment, as printed, which I offered on the 10th of August. I think we can vote on all of those amendments as one. As a new section we propose to insert the following. I desire to say that the amendment starts as follows:

SEC. 317a. (a) That in order to secure information and to assist in carrying out the provisions of sections 315, 316, and 317, it shall be the duty of the United States Tariff Commission, in addition to the duties now imposed upon it by law, to—

We then recite six subdivisions. Those subdivisions incorporate in toto the six which were included in the amendment offered by the senior Senator from New Jersey [Mr. FRELINGHUYSEN]. We have included all of his proposed amendments as to the investigation to be made by the commission and its findings and its report with the exception of subdivision 8, which directed the commission not only to find the facts but also to report a conclusion of its judgment as to what the duty should be to effectuate the difference in the cost of production at home and abroad.

The committee felt that the commission, composed of three members of each of the great political parties, bipartisan, would in all probability approach the subject of what would be a proper duty from entirely different standpoints, and they might disagree entirely as to what the rate of duty should be. We felt that it was not the function of the commission so much to give advice as to what the rate of duty should be, whether it should be protective or nonprotective, as it would be merely its duty to bring to the attention of Congress, the country, and the President, under the powers given him in these sections, those facts which would be proper or necessary in order that the Congress or the President might act judiciously and properly in the matter. I think, as evidenced by the address on yesterday of the Senator from Alabama [Mr. UNDERWOOD], the leader on the other side of the aisle, that both sides of the Chamber are generally in accord with the proposition that the Tariff Commission should not be converted into a tariff-making body, either directly or indirectly.

Mr. FRELINGHUYSEN. Mr. President——

Mr. FLETCHER. Before the Senator from North Dakota concludes——

Mr. FRELINGHUYSEN. Mr. President, am I recognized?

The PRESIDING OFFICER. The Senator from Florida evidently desires to ask the Senator from North Dakota a question. The Chair will wait before recognizing the Senator from New Jersey so as not to take it out of his time.

Mr. FRELINGHUYSEN. Very well.

Mr. FLETCHER. Under the amendment we have adopted we have now given the President the power to fix rates instead of Congress, so the commission now reports to the President?

Mr. McCUMBER. Yes.

Mr. FLETCHER. That, of course, leaves that power where our friends on the other side of the Chamber can justify the carrying out, as they conceive, of their platform pledge to the effect that "We undertake to end Executive autocracy and restore to the people their constitutional government."

Mr. FRELINGHUYSEN. Mr. President, I realize that the hour is very late, and I am going to try to be very brief, indeed. The Senate is fatigued and wishes to end the pending business of the day, and I am going to confine myself to a brief statement.

The writing of the pending tariff bill has been fraught with difficulties never before encountered in the drafting of any previous similar measure. It is being written at a time when the social and economic forces of the world are in a state of constant fluctuation. Material and labor costs are varying day by day. World market conditions are in a chaotic state, and the value of foreign currencies is fluctuating almost as actively as the value of the shares on the stock exchange. And yet it is at this time more than ever before that an expertly drawn tariff which will protect industry and labor in the United States is most essential.

For more than 18 months now Congress has been endeavoring to write such a tariff. It has listened to the conflicting statements of thousands of witnesses. Its committees have been confronted with millions of words of testimony. They have heard honest and sincere representatives of the same types of industries contradict each other, some demanding high and some low duties on the same product. Some have insisted upon retaining the principle of foreign valuation; others have demanded that imports be assessed according to the principle of American valuation. From this maze of claims and counterclaims a bill has been drafted, and during the process of its drafting it has been amended again and again in an effort to meet rapidly changing foreign conditions and the demands of American agriculturists and manufacturers who have presented additional testimony showing the justice of their claims.

This bill has been criticized while the members of the committee have been striving day and night to solve honestly the many problems and to harmonize the conflicting interests. They have tried without exception to do their duty by the great industrial and agricultural interests of this country.

I do not think this criticism is directed at the work of the committee or its conclusions but at the system which compels the drafting of a bill with limited information and conflicting testimony.

Speaking of the system of tariff making—the same as that upon which this bill is framed—Senator Elihu Root during the debate on the Payne-Aldrich bill in 1909 said:

> We have been here for over three months considering and discussing and voting upon the measure of protection that it is necessary to give in order to keep alive and prosperous the business of tens of thousands of corporations engaged in the manufacture and trades affected by the protective tariff. Upon one hand we have garbled statements, upon the other equally garbled and partial statements, and no means of distinguishing the truth. We are under the necessity of proceeding by guesswork, by conjecture, always with dissatisfaction, because we recognize the chance that we have guessed wrong about whose statements came nearest the truth.

One may review in bewilderment the conflicting statements of facts and surmise which have been made in the debates upon the McKinley, Wilson, Dingley, the Payne-Aldrich, and the Underwood tariff measures, and ask himself why it is that the greatest agricultural and industrial nation in the world should permit the continuance of a system wholly inadequate to meet the needs of the tremendous interests which it fundamentally affects. Even those who criticize the legislation recognize the necessity of protection and the passage of this bill. The low rates of exchange and low wages of Europe compel the enactment of immediate legislation to prevent the impairment of our industries through foreign competition. But in its necessity we find a reason for flexible provisions at this time when there is need, perhaps, for continued study of conditions and information thereon—a need, certainly, of changes in rates. Is it impracticable, is it unwise to say that we can not create machinery for remolding and readjusting the rates imposed under the present emergency? Or shall we enact this bill with every rate in it concrete, iron-bound, and ironclad, until Congress can find time in the maelstrom of other public business to rewrite in toto this legislation and correct its inequalities, simply because we have neither the wisdom or common sense to change our system and provide a method wisely to meet changing conditions?

The time has come when Congress should no longer permit the economic stability of this Nation to be seriously undermined by recurrent tariff changes. The people must always decide whether a tariff shall be protective or merely for revenue only. Yet there is no reason, unless it be reason dictated by a desire for political advantage, why Congress should endeavor to discover for itself the basis of values on which duties shall be fixed. By its very nature Congress is unadapted to this work. Scientific investigation of this sort is the field of specialists, of economists, of experts in cost accounting, and the proceedings should be along systematic and scientific lines. In all other branches of the Government Congress has delegated the ascertainment of scientific facts to well-equipped agencies, having a personnel of experts who through training and ability are equipped to make the necessary investigations and to recommend to Congress the action to be taken as a result of such investigations.

Congress recognized the vital necessity for such a body when it created the Tariff Commission in 1916, but unfortunately the Tariff Commission as created was given wholly inadequate powers and insufficient duties. I propose now to remedy that situation by amending the tariff law of 1916 so that the Tariff Commission will be equipped with sufficient powers and enough funds, scientifically and accurately, by investigations and by hearings, to recommend rates that will protect the American agriculturists, wage earners, and manufacturers.

I introduced yesterday an amendment which I intend to propose to the committee amendment now under discussion, and I desire at this time to point out my reasons for presenting the amendment and more fully to explain it; to draw the line, which is clear and definite, at which the committee and I separate on this matter; and to give the Senate an opportunity to pass upon my amendment.

From a cursory examination one might suppose that the differences were unimportant. It is true that if the Senate adopts the amendment of the Finance Committee it will publicly recognize the importance of the part played by conversion costs in the fixing of a rate. And therefore I consider the proposed committee amendment a substantial and important step toward the end I am striving for. However, I sincerely believe that two important features necessary to produce a scientific tariff and to remove the tariff from politics have been eliminated by the committee.

On the 20th of June I addressed the Senate and proposed a change in our tariff-making system. I attempted to point out its weaknesses and insufficiencies and I submitted an amendment to the tariff bill to accomplish what, in my opinion, is not only desirable but absolutely necessary. I submitted my amendment, with slight modification, to the committee, which accepted it in part. Let me now, if I may, analyze the difference.

I attempted in the amendment which I proposed several weeks ago to lay the foundation for a scientific tariff. It may be asked, What is a scientific tariff? My answer is, one based upon fundamental and accurate facts. And how is a scientific tariff to be obtained? First, by declaring a fundamental policy; second, by imposing upon the Tariff Commission the powers and duties to ascertain the facts necessary to carry out that policy; third, by an accurate and careful analysis of those facts so that we may reach a safe and reliable conclusion from them; and fourth, by the recommendation of a rate of duty called for by the facts.

The amendment which I proposed several weeks ago provided that, on a certain fundamental plan, the governmental agency which is empowered to collect the facts which are utilized by Congress for tariff making should have additional power of investigation and survey. It laid down the fundamental principle upon which these facts should be collected. To-day in the powers given to the President he has been limited to an investigation of production costs; but in order to obtain that information the Tariff Commission must have certain powers conferred upon them; and naturally they must begin with an investigation of the conversion costs. In order to ascertain the cost of production, conversion costs must be studied.

"Conversion cost" is not a new term. It is recognized and used every day by the economist, the cost accountant, and the manufacturer. The conversion cost of a manufactured product is the cost of converting a less finished article into that product. It includes each and every cost incurred, except the cost of the material converted. It differs from production cost chiefly in the fact that cost of production includes the cost of the materials converted. It may be asked, "Why do I insist on ascertaining conversion cost?" Some may contend that the conversion costs desired will be obtained by merely getting the cost of production. A simple explanation will be sufficient. In ascertaining costs of production in a class of merchandise of varying qualities and within one tariff classification, the commission would necessarily select representative articles within that class, ascertain their cost of production, and submit their conclusions based on the differences in those ascertained costs of production. The conversion costs which they would ascertain would be limited to the conversion costs of the articles selected, and would not embrace the conversion costs generally found in the production of similar articles.

Conversion costs will establish the difference in labor costs. That is why I specify it as an essential item to be determined and considered in reaching the proper rate of duty.

However, in the building of a tariff rate there are other conditions besides the difference in the conversion costs. For example, if the American manufacturer must pay a higher price for his materials a rate which will merely equalize the difference in conversion costs will not adequately protect the American industry. It is for this reason that the Tariff Commission should be empowered and directed to ascertain costs of production, for when the material costs are different those differences must also be equalized. Bear in mind, however, that we are not concerned with the differences in the value of the raw material in the article, but only in the differences between the prices which the domestic manufacturer and the foreign manufacturer must pay for that raw material.

Every experienced person realizes that conversion costs and costs of production can not be accurately ascertained in every case, and even though they may be ascertained, we are interested in another set of facts in order to make our comparison more accurate—the difference between the import cost of the foreign article and the American wholesale selling price of the similar domestic article. We need a running index of these statistics, so that we will have a source of current information to which we will have a daily reference.

But a rate of duty can not be and never will be determined by mathematical computation. Let us assume that we are favored with all of the above facts which we have directed the commission to get for us. Our rate will not be fair and equitable unless we bore deeper into existing conditions. There is also the element, uncertain but which should always be considered, of the conditions of competition.

What do I mean? I will cite one illustration, and that is that Germany imposes an export duty. That export duty is reflected in the import cost; yet, if we base a tariff upon that

condition, Germany or any other country imposing a similar export duty—and many of them do—could lower that duty and drive their goods under the tariff rates which we impose.

Again, foreign countries may give bounties or preferences. So governmental or private monopolies may control the foreign production or distribution. A cartel or other form of organization may directly or indirectly control prices and dictate buying agreements. Practices which we call unfair methods of competition may be resorted to by the foreigner. All of these must be considered if they exist, and candidly, Mr. President, I am just as fearful of these as I am of any possible difference in cost of production.

In passing I wish to pay a compliment to the Tariff Commission, because I think, with the equipment and appropriations provided, they have done exceptionally well. I wish to say that the commission in giving us information from time to time were circumscribed because they did not have sufficient power or sufficient personnel or sufficient appropriations to ascertain and furnish all the facts. So we have included in this measure provisions to vitalize and to make virile that fact-finding body. The committee, after considering that proposition, included those powers as set forth in the amendment which I had offered, and they have submitted it to the Senate. I am very glad they have done so, because I believe it marks a step in advance in the direction of scientific tariff making.

Now, Mr. President, I come to the point at which the committee and I differ. The committee have agreed with me that we must get these facts, but they differ with me in that they are unwilling to have the Tariff Commission analyze the facts and state their recommendations. They are unwilling that the Tariff Commission transmit their recommendations periodically; in other words, that they report to Congress what the rate should be, based upon this fundamental plan or rule. Time and again, after the tariff experts had put analyses on the blackboard and read to us their survey, they and the tariff commissioners were asked by the puzzled members of the committee, "Well, what do you think the rate should be?" Their reply almost invariably was, "It is not the function of the Tariff Commission to make rates." They could not tell us what the rates should be, although they had all the facts and the surveys upon which to base the differential rates. The committee have not included the provision that the Tariff Commission shall report to Congress their conclusions as to what the rates of duty should be. I think that that is very essential.

Let us examine these propositions. Mr. President, in my opinion the expert who is familiar with his subject, who has studied and analyzed the facts, who has prepared an exhaustive survey of the conditions, should take the additional step of advising us what his conclusion is. I support this proposition for two reasons: First, I do not believe that he can present all of the facts in a manner which will permit one of us to grasp them unless he indicates the result toward which they point, and, secondly, we need his conclusions. If we do not get his recommendations we will be but little better off than we are to-day, for we will be buffeted and torn by the demands of special interests and political expediency. If we do get the facts and the recommendation, the questions at issue when the Congress is called upon to determine the rate will be (1) are the facts accurate? and (2) is the recommendation supported by the facts? Thus, Mr. President, the American manufacturer, the American importer, and the American consumer, all three of whom we now hear, will know what they must do and what facts they must present. It would be reckless as to consequences for Congress to fix a rate not based on facts. I verily believe that by far the greater majority of the persons appearing before us are fair and honest in their convictions. They want a rate which will permit them to carry on a normal, conservative business, and which will permit their neighbor to carry on that same kind of a business. They will be given an opportunity to present their facts to the Tariff Commission. They will know the facts which the commission has found to exist. They will prepare themselves accordingly, and if the findings are fair they will be satisfied. This, Mr. President, is what I mean by taking the tariff out of politics.

Everyone realizes that our conditions to-day are strained, uncertain, fluctuating. Everyone must realize that a tariff must be based upon the facts as we find them to-day. What these facts will be six months from now no power on earth can determine. But, Mr. President, conditions are always changing. This abnormal period has merely accentuated this fact. Consequently, I firmly believe that we must have a tariff system which will permit of a change to meet the facts of to-morrow. When these facts differ very materially from the facts upon which we have determined a rate we must be able to adjust that rate to meet the new conditions, and we must not be forced to wait for a general tariff revision.

I propose to provide a means for a revision of a schedule or a group of rates if it is found that such revision is necessary, fair, and just. That is why I provide that the commission report to the Congress every six months the results of their investigations completed at the time of the report.

Mr. President, I wish to say that there are two other provisions which the committee eliminated which I think very essential. Those who serve on the Tariff Commission are now receiving $7,500 a year. Their compensation should be increased proportionate to the additional burdens and responsibilities placed upon them by this bill in furnishing facts to the President and enlarging their research and study. In order adequately to administer the provisions of my amendment, it is absolutely essential that we have a Tariff Commission composed of men of the highest experience and ability. The Congress must have confidence in them, the public must have confidence in them, the American producer must have confidence in them. The commission must be given money necessary to employ experts of the highest class to make the investigations.

We pay the commissioners of the Interstate Commerce Commission $12,000 a year for supervising property worth $19,000,000,000. Upon the Tariff Commission will be placed the responsibility of very directly influencing the interests of every individual in this country and of a business involving an annual turnover of $65,000,000,000. They must have sufficient funds, their power must be clearly defined, and their duties must be imposed in specific and unequivocal terms.

I think there should be provided an appropriation of $1,000,000 for the use of the Tariff Commission, so that they may efficiently carry out the provisions of the legislation which we have adopted to-day. They have never had enough money to make their researches. If it is going to be a body of any use whatsoever, they should have sufficient appropriations to perform the task assigned to them. The amount of revenue to be derived under this bill will be from $300,000,000 to $400,000,000. Can we not expend one-third of 1 per cent in administration?

If this amendment shall be adopted, we will take the first advance step in removing the tariff from the realm of political discussion. Tariff duties require a close study of economic conditions. Other nations, powerful commercially, recognize this principle, and their tariff imposts are changed to meet varying conditions by vesting the power to effect readjustments in commissions and not in the parliamentary bodies.

Reforms come slowly and only through evolutions caused by necessity and public demand. For years we were without a Budget system. The powers vested in the Interstate Commerce Commission, Shipping Board, Federal Trade Commission, all were a recognition of our growth and development as a great Nation. Nothing will be so widely commended by the people of the country as a change in our system of tariff making, providing for a more scientific and accurate method of imposing tariff duties.

Mr. President, I offer an amendment which empowers the Tariff Commission, after finding the facts under the rule which has been reported by the committee, to furnish periodically to the Congress information as to their conclusions of what rates should be founded upon those facts.

The PRESIDING OFFICER. The Senator from New Jersey proposes an amendment to the amendment offered by the Senator from North Dakota, which the Secretary will report.

The ASSISTANT SECRETARY. On page 8 of the printed amendment of the Senator from North Dakota, after line 13, it is proposed to insert a new subdivision, to read as follows:

(c) Not later than December 1, 1923, and at least once every six months thereafter, the commission shall report to Congress the results of the investigations completed at the time of the report, showing—

(1) The conversion costs in the United States;

(2) The conversion costs of articles imported into the United States;

(3) The differences between such conversion costs;

(4) The costs of production in the United States and in competing foreign countries;

(5) The scope and methods of the investigations for ascertaining or determining and the items of cost included within such conversion costs and costs of production;

(6) The difference between import costs and selling prices, ascertained in accordance with the provisions of subdivision (a) of this section;

(7) The differences in competitive conditions in the principal markets of the United States; and

(8) The rate or rates of duty which it deems necessary to equalize such differences in conversion costs, import costs, and selling prices, and in such competitive conditions the proper classification and whether the duty should be specific, ad valorem, or ad valorem and specific.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Jersey to the amendment of the Senator from North Dakota.

Mr. FRELINGHUYSEN. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. LENROOT. Mr. President, I merely wish to say a word in connection with the amendment proposed by the Senator from New Jersey. I do not see how there can be any possible objection to Congress having all the information possible and all the conclusions possible from the Tariff Commission. Congress does not have to accept a single one of them unless it chooses to do so. It seems to me that this amendment is very desirable.

Mr. McCUMBER. Mr. President, let me state that we provide for all the information in what we have already adopted.

Mr. FRELINGHUYSEN. Mr. President, I want to say that that is not provided for unless it is asked for by Congress. This provides that periodical reports shall be made to Congress.

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Jersey to the amendment of the Senator from North Dakota, on which the yeas and nays have been demanded and ordered. The Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. EDGE (when his name was called). Making the same announcement as to my pair and its transfer, I vote "yea."

Mr. FLETCHER (when his name was called). Making the same announcement as on the former vote as to my pair and its transfer, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement of my transfer as before, I vote "nay."

Mr. MYERS (when his name was called). I have a pair with the Senator from Connecticut [Mr. McLEAN], who is absent, and therefore withhold my vote.

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. Making the same announcement as before, I vote "nay."

Mr. SIMMONS. I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG], who is absent. I am unable to get a transfer. I therefore withhold my vote.

Mr. SUTHERLAND. Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "yea."

Mr. POMERENE. Again announcing my pair with my colleague [Mr. WILLIS], I refrain from voting. If I were at liberty to vote I should vote "nay," and I understand that he would vote "yea."

Mr. GERRY. I desire to announce that on this vote the Senator from Virginia [Mr. SWANSON] is paired with the Senator from New York [Mr. WADSWORTH].

Mr. CURTIS. I desire to announce the following general pairs:

The Senator from Illinois [Mr. McKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON]; and

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON].

The result was announced—yeas 18, nays 34, as follows:

YEAS—18.

Ashurst	Hitchcock	New	Sutherland
Capper	Jones, Wash.	Norbeck	Townsend
Edge	Kendrick	Pepper	Warren
Frelinghuysen	Lenroot	Rawson	
Hale	Moses	Sterling	

NAYS—34.

Brandegee	Ernst	McKellar	Smith
Broussard	Fletcher	McNary	Smoot
Bursum	Gerry	Nicholson	Stanfield
Calder	Gooding	Oddie	Stanley
Cameron	Heflin	Overman	Trammell
Colt	Keyes	Phipps	Walsh, Mont.
Curtis	Lodge	Ransdell	Watson, Ind.
Dial	McCormick	Reed	
Dillingham	McCumber	Sheppard	

NOT VOTING—43.

Ball	Harris	Nelson	Simmons
Borah	Harrison	Newberry	Spencer
Caraway	Johnson	Norris	Swanson
Culberson	Jones, N. Mex.	Owen	Underwood
Cummins	Kellogg	Page	Wadsworth
du Pont	King	Pittman	Walsh, Mass.
Elkins	Ladd	Poindexter	Watson, Ga.
Fernald	La Follette	Pomerene	Weller
France	McKinley	Robinson	Williams
Glass	McLean	Shields	Willis
Harreld	Myers	Shortridge	

So Mr. FRELINGHUYSEN's amendment to Mr. McCUMBER's amendment was rejected.

Mr. FRELINGHUYSEN. Mr. President, I offer the amendment which I send to the desk. I do not think there will be any objection to it.

The PRESIDING OFFICER. The Senator from New Jersey proposes an amendment to the amendment proposed by the Senator from North Dakota, which will be stated.

The READING CLERK. On page 6 of the printed amendment proposed by the Senator from North Dakota, on lines 20, 21, and 22, it is proposed to strike out the words—

To secure information and to assist in carrying out the provisions of sections 315, 316, and 317—

And to insert in lieu thereof the following:

That the President and the Congress may secure information and assistance.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Jersey to the amendment of the Senator from North Dakota. [Putting the question.] The "noes" seem to have it.

Mr. FRELINGHUYSEN. Mr. President, I ask for a division. There can be no objection to this amendment. If these provisions should be declared unconstitutional I think all of these powers which are given to the Tariff Commission, which are essential and useful, might fall with the fact that those provisions were unconstitutional.

Mr. WALSH of Montana. Mr. President, I hope the amendment now proposed by the Senator from New Jersey will prevail. It seems a very sensible one. The amendment proposes that the Tariff Commission shall be invested with certain additional powers which are to be used only by the President under the provisions of sections 315, 316, and 317. The Senator from New Jersey proposes that whatever information they gather shall likewise be available to the Congress of the United States. Why should it not be?

Mr. WATSON of Indiana. Is not that the present law?

Mr. WALSH of Montana. No.

Mr. McCUMBER. Yes; it is.

Mr. WALSH of Montana. The amendment offered by the Senator from New Jersey expands the powers of the commission as they exist under the existing law. They are to do other things; they are to gather other information which, by the terms of the amendment, is to be used only by the President of the United States.

Mr. WATSON of Indiana. The Tariff Commission is established by an organic act, and by that act——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Indiana?

Mr. FRELINGHUYSEN. I yield; yes.

Mr. WATSON of Indiana. By that act certain powers are conferred upon it; and when we add to those powers, of course the authority or the express command to report to the President or to Congress once a year attaches to the new information. I do not suppose there can be any doubt about that. I have not any objection to it, because I think the power already exists.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from New Mexico?

Mr. FRELINGHUYSEN. I yield to the Senator from New Mexico.

Mr. JONES of New Mexico. I suggest that on line 20, page 6, after the word "That," we could strike out "in order to secure information and to assist in carrying out the provisions of sections 315, 316, and 317." That would leave the Tariff Commission free to gather this information for whatever lawful purpose it may be used, and it ought not to be restricted to carrying out the provisions of these three sections with which we have been dealing to-day. In fact, in section 315 we have provided what information should be gathered for the purpose of enabling the President to make his changes. We provided there just what should be done. Now, why restrict the provisions of this section to getting information in order to assist in carrying out the provisions of sections 315, 316, and 317? If those words are stricken out it will accomplish the purpose which the Senator from New Jersey has in mind, as I understand.

The PRESIDING OFFICER. The Senator from New Jersey asks for a division on his amendment.

On a division, the amendment to the amendment was agreed to.

Mr. FRELINGHUYSEN. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 9 of the printed amendment, after line 25, the last line in the amendment, it is proposed to insert a new subdivision, to read as follows:

(g) The first sentence of section 701 of the revenue act of 1916 is amended to read as follows:

"SEC. 701. That each member shall receive a salary at the rate of $10,000 per annum."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Jersey to the amendment of the Senator from North Dakota.

The amendment to the amendment was rejected.

Mr. FRELINGHUYSEN. Mr. President, I offer the amendment which I sent to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 9, after line 25, or at the end of the amendment proposed by the Senator from North Dakota, it is proposed to insert the following:

(h) In addition to the appropriations now available, there is hereby appropriated the sum of $1,000,000, out of any money in the Treasury not otherwise appropriated, for the payment of salaries and expenses of the United States Tariff Commission in carrying out the provisions of this section and of Title VII of the revenue act of 1916, including the actual traveling expenses and per diem allowances of any member, officer, expert, examiner, clerk, or other employee of the commission when engaged in the performance of duties in any place other than his headquarters office, the purchase of samples, apparatus, mechanical devices, supplies, equipment, furniture, stationery, law books, books of reference, periodicals, and such other articles as may be necessary.

Mr. SMOOT. All I wish to say is that this ought to come through the regular channels and an appropriation be made in the regular way.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Jersey to the amendment.

The amendment to the amendment was rejected.

Mr. JONES of New Mexico. Mr. President, by the action which we have taken to-day we have given recognition to a very important principle, and that is that there probably would arise an occasion where there should be a modification of the general tariff laws. We have provided that the President under certain circumstances may make such a modification. I submit that the Congress should not abandon its function in this regard. There is no question but what cases will arise from time to time where the tariff laws should be modified. Conditions are changing rapidly, and even in ordinary times—in times of peace—new industries arise and there should be a modification of our tariff laws. Congress should not surrender its duty in the premises. It should see to it, whether the President does or not, that changes are made which the necessities of the cases which arise demand.

The country is tired of general tariff revisions. Prior to the war there was a growing sentiment in favor of what was called a scientific tariff, in favor of some provision which would tend to take the tariff out of politics. Conditions have been so changed by reason of the World War that we have much more now to think of than we have ever had before. Prior to that war we could direct our attention solely to the protection of American industry. It was a relatively simple process to frame a general tariff law; but in these times, when conditions have changed, when we have to consider world conditions, we must exercise more care, and the problems are more complex.

So we want to deal with these situations in an intelligent way. I submit, Mr. President, that there is no ironclad rule which can be laid down for the framing of a tariff from any point of view—the protectionist point of view, the revenue point of view, or any other.

We have delegated to the President of the United States the power to change the tariff rates upon a certain basis. We have fixed that rule. We have restricted it to the difference in the cost of production in the United States and abroad. On Tuesday of this week I discussed the subject at great length, and I am not going to discuss it to-night except briefly. I want merely to suggest the reasons why that ironclad rule can not be applied.

In the first place, it is difficult to ascertain the costs of production in the United States as to any one industry. I called attention on Tuesday to the fact that in the cattle business you could not tell how much the cost of raising meat was, you could not tell the cost of the production of the hide, and the producer of the cattle does not care how much of the cost you allocate to the one or to the other, when you come to fixing the tariff upon meat, or when you come to fixing it upon hides. It is the same with every commodity, you can not tell how much it costs to produce wool, you can not tell how much it costs to produce mutton. There must be an arbitrary allocation of the cost. I discussed that at some length.

The very first item in this bill—acetic acid—is one of three products of an industry—charcoal, alcohol, and acetate of lime. They are three products coming from the same process of production. How much can you say the alcohol costs, how much the charcoal costs, how much the acetate of lime costs?

So I say that in all the vast industries of this country, there are but relatively few items where the exact cost of production can be ascertained. What is the by-product of one industry is the primary product of another industry, and so on.

I pointed out how in the production of sugar, according to the Tariff Commission reports, the cost varied from $53 a ton to $155 a ton. How can any man say what the cost of production of sugar is, with these different factories varying so greatly as to their cost?

So in every other line of industry, where will you draw the line? What will you say is the cost? Somebody must average the cost. There must be discretion used, and who shall use it? Certainly you can not allocate that power to any other agency whatsoever. It is the duty of Congress to do it.

The Senator from Wisconsin insisted upon inserting the ironclad rule, so far as the President was concerned, because he said that if you do not fix the rule the act would be unconstitutional. I think he was right. I think he very much helped the bill, so that it may be held constitutional with respect to the exercise of these powers by the President. It is an ironclad rule. In my judgment, it is unworkable. In my judgment, the President of the United States will probably never exercise it, because it is not workable. It can not be exercised, in my judgment, according to the literal language which you have written into the law. But the Congress of the United States had the power to look into all the conditions surrounding the industry. It can exercise its judgment, its discretion; and just imagine the information it must have.

Does not the Congress want further information than as to the mere difference in the cost of conversion? Do you not want to know something about the industry itself? Do you not want to know whether it is an industry which ought to be fostered by the Government or not? What are its promises? Is it an efficient industry? Is its organization so interlocked as to create monopolies? You want to investigate industry not only in the United States but in foreign countries so far as you may.

You can not limit that inquiry to mere costs. There are industries in this country which spring up and manufacture a small quantity of a given article at a high cost. Are you, by an ironclad rule, going to say that the President or the Congress will fix a tariff so as to equalize that cost, whether the industry ought to be fostered or not?

Should there not be some provision or way whereby the information should be gathered and brought before the Congress of the United States to enable it to exercise its judgment?

Mr. REED. Mr. President, in talking about arriving at the difference in the costs abroad and in this country, I call the Senator's attention to the fact that the costs in no two factories are equal, and that if we equalize the costs so as to protect the inefficient factory, or the least efficient, then you burden the American people with the payment of enough tax to make up for the inefficiency of the least efficient of the American factories. There is no such thing as an equality of costs here. There is no such thing as an equality of costs abroad. There can be no equalization.

Mr. JONES of New Mexico. The Senator is quite right; and the costs in the different countries abroad vary as well.

Mr. REED. Certainly.

Mr. JONES of New Mexico. Mr. President, I do not think I need discuss this question longer. I discussed the matter at considerable length on Tuesday. My proposal amounts to this, that there shall not only be an ascertainment of competitive conditions, generally speaking, but that there shall be an investigation of the industries themselves, to determine their organization, their capitalization, their efficiency, whether they are located properly so as to produce at a reasonable cost, and whether there is such an interlocking of interests that there is no competition in the industry. Congress should have all that information, and the Tariff Commission, after ascertaining these facts, should report those facts to the Congress, and it should make recommendations as to what it thinks ought to be done. But in all this range of inquiry, after you get the facts, you have to have some agency to exercise discretion, to exercise judgment, and it is my belief that the Congress of the United States alone has the power, and if it has not alone the power, it is the only body which ought to exercise any such power.

We can size up the situation, take into consideration all the facts, whether we want to encourage the industry or not, whether it promises well for the future or not. That is what my amendment proposes, that the Tariff Commission shall make

these investigations, shall make its recommendations to Congress, shall in its recommendations state the facts upon which those recommendations are based, and then Congress may accept them or not, as it sees fit.

I want to make this prediction, that whenever the Tariff Commission, backed by experts, brings in such a report, fortified by the facts, and tells what the consequences of the recommended rates will be upon the industry, there will be little politics in passing upon such acts of such a commission.

In my humble judgment, the people of the country want to get the tariff out of politics. They want to have it treated as an economic proposition. We must deal with the world. We want any tariff which will take into consideration not only the protection to industry, but we want to take into consideration the revenues of the country, the cost to the consumer, and our international trade. We want to take all those things into consideration.

So, Mr. President, I am going to offer the amendment which I have here in lieu of the section proposed by the committee. The provisions in the section here are not objectionable at all, but the amendment which I propose embodies them in a little different language and makes them more consecutive in the reading. In the amendment which I have to offer I have revived the present powers of the Tariff Commission and extended them, and that is why so many sections of the Tariff Commission act are in it.

In the first section of the amendment there is only one change, and that is in line 8, to insert the words "and their effect upon the export commerce." That section is the same as in the present law, with that exception.

Section 7 is the same as the present law, except that under the present law those powers are made permissive only. My proposal is to require that they shall be exercised. The principal point in that section is that they must ascertain the consumption of the article in the United States and the exports and imports. Under the present law that is permissive only.

Paragraph (c), on page 2, is a new provision entire. There is nothing of that under the present law at all. That is a provision to investigate industry.

The next paragraph, (d), is to investigate foreign industries in the same way.

Section 703 makes it the duty of the commission to analyze the import trade and show what imports by reason of their nature, quality, class, and so forth, supplement in the domestic market the articles produced here.

Section 704 requires a report annually to Congress on the first Monday of December of cases which in the judgment of the commission have met with such changes as to require a substantial reduction or increase of the tariff duty.

The next paragraph (b) requires them to recommend rates to the Congress of the United States.

I had a provision in here the same as that suggested by the Senator from New Jersey [Mr. FRELINGHUYSEN] increasing the appropriation for the Tariff Commission, but that I shall strike out because the Senate has already voted upon it.

Mr. President, I offer this in lieu of the section as proposed by the committee.

The PRESIDING OFFICER. The amendment in the nature of a substitute proposed by the Senator from New Mexico to the amendment will be read.

The Assistant Secretary read as follows:

That sections 702, 703, 704, and 705 of Title VII of the act of Congress approved September 8, 1916, entitled "An act to increase the revenue, and for other purposes," be, and the same are hereby, amended to read as follows:

"SEC. 702. That it shall be the duty of said commission:

"(a) To investigate the administration and fiscal and industrial effects of the customs laws of this country now in force or which may be hereafter enacted, the relations between the rates of duty on raw materials and finished or partly finished products, the effects of ad valorem and specific duties and of compound specific and ad valorem duties, all questions relative to the arrangement of schedules and classification of articles in the several schedules of the customs laws, and, in general, to investigate the operation of customs laws, including their relation to the Federal revenue, and their effect upon the export commerce, the industries, and labor of the country.

"(7) Investigate the tariff relations between the United States and foreign countries, commercial treaties, preferential provisions, economic alliances, the effect of export bounties and preferential tariff and transportation rates, the volume of importations and exportations compared with domestic production and consumption, and conditions, causes, and effects relating to competition of foreign industries with those of the United States, including dumping and unfair competition.

"(8) Investigate, as hereinafter provided, as fully as may be practicable the industries in the United States which are or may be affected by the imposition of or exemption from customs duties. In the case of each industry so investigated it shall give consideration to the organization and capitalization; the methods, processes, and efficiency of production; the sources and costs of materials, the costs of conversion, so far as they may be ascertained and all other costs incurred in production; the rates of wages, and the ratio of labor costs to the total cost of production; the methods used and the expenses incurred in preparing for market, distributing, and selling the products of the industry and the wholesale and export prices of such products in domestic and in foreign markets; the degree to which the capacity of the industry enables it to meet the needs of domestic consumers and to produce a surplus for export; the nature of any obstacles that may exist in the way of the prosperity and further expansion of the industry; and any reasons peculiar to the industry for granting or withholding by the Government of aid in the form of bounties, subsidies, embargoes, customs duties, or in any other form.

"(9) Investigate in foreign countries as fully as may be practicable the conditions under which industries that do or may compete with the industries of the United States are prosecuted in such foreign countries in the same manner and to the same extent as provided in the preceding paragraph (8) for the investigation of the conditions under which industries are prosecuted in the United States.

"10. Make such analyses of the import trade of the United States as may be necessary to show what imports by reason of their nature, quality, class, and variety compete with and what imports supplement in the domestic markets the identical, comparable, or other products of any industry established in the United States; to ascertain the expenses incident to transporting, distributing, and selling in the domestic markets articles of foreign origin that compete with any product of any industry in the United States and the wholesale and export prices at which such articles are sold in the country of origin and in the United States.

"11. (a) Report to Congress annually on the first Monday of December hereafter any case or cases arising through changes in industrial or commercial conditions in the United States or in foreign countries which render it advisable that any rate of duty on imported articles under then existing law should be removed, raised, or lowered by a substantial amount. In connection with any such case so reported the commission shall state the reasons and the facts on which such reasons are founded which, in its judgment, make it desirable that Congress should remove, raise, or lower the rate of duty under then existing law.

"(b) As a part of any report made to Congress in pursuance of the preceding paragraph (a), the commission shall recommend the rate or rates of duty which, in its judgment, should be fixed by law; and in connection with each rate so recommended the commission shall set forth in such detail as may be necessary the facts upon which it bases its conclusions; and shall point out the reasons of public policy which make it desirable that Congress should fix such rate.

"12. In case of disagreement among the commissioners as to any report, finding, or conclusion authorized or directed by law, separate reports by any one or more of the commissioners expressive of their views shall be made with respect to the matter in disagreement.

Mr. WALSH of Montana. Mr. President, as I understand the matter, the substantial difference between the amendment proposed by the Senator from New Mexico and the amendment proposed by the committee consists in that the amendment proposed by the Senator from New Mexico grants to the Tariff Commission not only the power, and imposes upon them the duty of ascertaining all of the facts, but also charges them with the duty of recommending to the Congress the rate which in their judgment ought to be enacted, while the amendment proposed by the committee does not empower them to recommend a rate.

I desire to say just a word, namely, that I am entirely satisfied that the country is convinced, as every Senator here must be convinced, that we must find some other way of enacting tariff legislation. Inasmuch as we find it impossible constitutionally to delegate that power, the only thing we can do is to empower some body to determine such rates as they think ought to be enacted and to recommend those rates to Congress. Then Congress can adopt those rates or not as it sees fit, but the country would understand every time that the commission had recommended a particular rate and the Congress, in my judgment, would be very largely constrained to enact the rates thus recommended. That, as I understand, is the characteristic distinction between the amendment offered by the Senator from New Mexico and the amendment proposed by the committee.

Mr. SMOOT. Mr. President, I wish to say simply that the amendment offered by the Senator from New Mexico contains the amendment offered by the Senator from New Jersey which has just been voted upon. It also provides for an investigation of foreign commerce together with an investigation of domestic industries. It is true that it gives the power to the Tariff Commission to recommend rates to Congress. If Congress confers that power upon the Tariff Commission with a view of making those investigations and reporting the rates that they think should be adopted, I do not see how Congress is going to turn those rates down. It seems to me that the amendment of the committtee has gone just as far as the Congress ought to go.

Mr. WALSH of Montana. Let me inquire of the Senator, if they seem to be entirely reasonable and supported by the facts investigated by the commission, why should the Congress turn them down?

Mr. SMOOT. I do not think there ever would be a Congress that would take the rates recommended by a commission. I can say that if the rates as set out in the Summary of Tariff Information were put into the bill, some of them would be too high and others would be altogether too low, even lower than the existing law. I do not believe we could get a Senate or a Congress to agree to the recommendations as mapped out in the Summary of Tariff Information for the year 1921.

Mr. JONES of New Mexico. I should like to state just one word in addition. Anybody who has undertaken to understand the bill and to discuss it during the last three and one-half months must have realized that even with the meager information which we have now it is impossible for Senators to take the facts and understand them. We have these thousands and thousands of pages which it is impossible for any Member of Congress to digest. We need the experts who get the testimony to analyze the facts and tell us what they mean.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico to the amendment of the committee.

Mr. JONES of New Mexico. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair and transfer as before, I vote "yea."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as to my pair and its transfer, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as to the transfer of my pair, I vote "nay."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague as heretofore, I withhold my vote. If permitted to vote, I should vote "yea" and my colleague would vote "nay," I understand.

Mr. SIMMONS (when his name was called). Making the same announcement as to my pair and my inability to secure a transfer as announced upon the previous vote, I withhold my vote.

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and transfer, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. Making the same announcement as before, I vote "nay."

Mr. EDGE. Making the same announcement as before, I vote "yea."

Mr. COLT. I have a general pair with the junior Senator from Florida [Mr. TRAMMELL]. I find, however, that I can transfer that pair to the junior Senator from Missouri [Mr. SPENCER], which I do and vote "nay."

Mr. HALE. Making the same transfer as before, I vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY].

The result was announced—yeas 26, nays 27, as follows:

YEAS—26.

Ashurst	Frelinghuysen	McKellar	Smith
Broussard	Gerry	McNary	Stanfield
Bursum	Heflin	Norbeck	Stanley
Capper	Hitchcock	Overman	Townsend
Dial	Jones, N. Mex.	Ransdell	Walsh, Mont.
Edge	Jones, Wash.	Reed	
Fletcher	Kendrick	Sheppard	

NAYS—27.

Brandegee	Gooding	Moses	Shortridge
Calder	Hale	New	Smoot
Cameron	Harreld	Nicholson	Sterling
Colt	Keyes	Oddie	Sutherland
Curtis	Lodge	Pepper	Warren
Dillingham	McCormick	Phipps	Watson, Ind.
Ernst	McCumber	Rawson	

NOT VOTING—42.

Ball	Harrison	Newberry	Swanson
Borah	Johnson	Norris	Trammell
Caraway	Kellogg	Owen	Underwood
Culberson	King	Page	Wadsworth
Cummins	Ladd	Pittman	Walsh, Mass.
du Pont	La Follette	Poindexter	Watson, Ga.
Elkins	Lenroot	Pomerene	Weller
Fernald	McKinley	Robinson	Williams
France	McLean	Shields	Willis
Glass	Myers	Simmons	
Harris	Nelson	Spencer	

So the amendment of Mr. JONES of New Mexico to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question now is on the amendment proposed by the committee inserting section 317a as amended.

Mr. SIMMONS. Mr. President, I think we ought to have the yeas and nays on that.

The PRESIDING OFFICER. The Senator from North Carolina asks for the yeas and nays. Is the demand seconded?

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. DILLINGHAM (when his name was called). Making the same announcement as before relative to my pair and its transfer, I vote "yea."

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair and its transfer as before, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. LODGE (when his name was called). Making the same announcement as before in reference to the transfer of my pair, I vote "yea."

I take this occasion to say that the Senator from Maine [Mr. FERNALD], if present, would vote "yea."

Mr. SIMMONS (when his name was called). I transfer my pair with the junior Senator from Minnesota [Mr. KELLOGG] to the senior Senator from Louisiana [Mr. RANSDELL] and vote "nay."

Mr. SUTHERLAND (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "yea."

Mr. WARREN (when his name was called). I ask if the junior Senator from North Carolina [Mr. OVERMAN] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. WARREN. I have a general pair with that Senator, and as I have been unable to obtain a transfer, I withhold my vote.

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before in reference to my pair and its transfer, I vote "yea."

Mr. GERRY. I desire to announce that the Senator from Alabama [Mr. UNDERWOOD] is necessarily absent. He is paired with the senior Senator from Massachusetts [Mr. LODGE]. If present the Senator from Alabama would vote "nay."

Mr. CARAWAY. I have a general pair with the junior Senator from Illinois [Mr. MCKINLEY] and can not obtain a transfer. I therefore withhold my vote. If permitted to vote I should vote "nay."

Mr. FRELINGHUYSEN (after having voted in the affirmative). My general pair, the Senator from Montana [Mr. WALSH], has left the Chamber for the night. I am unable to secure another pair, and so I shall withdraw my vote.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from New York [Mr. WADSWORTH] with the Senator from Virginia [Mr. SWANSON];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 37, nays 13, as follows:

YEAS—37.

Brandegee	Ernst	McCumber	Shortridge
Broussard	Gooding	McNary	Smoot
Bursum	Hale	Moses	Stanfield
Calder	Harreld	New	Sterling
Cameron	Jones, Wash.	Nicholson	Sutherland
Capper	Kendrick	Norbeck	Townsend
Colt	Keyes	Oddie	Watson, Ind.
Curtis	Lenroot	Pepper	
Dillingham	Lodge	Phipps	
Edge	McCormick	Rawson	

NAYS—13.

Ashurst	Heflin	Reed	Stanley
Dial	Hitchcock	Sheppard	
Fletcher	Jones, N. Mex.	Simmons	
Gerry	McKellar	Smith	

NOT VOTING—45.

Ball	Fernald	Kellogg	Nelson
Borah	France	King	Newberry
Caraway	Frelinghuysen	Ladd	Norris
Culberson	Glass	La Follette	Overman
Cummins	Harris	McKinley	Owen
du Pont	Harrison	McLean	Page
Elkins	Johnson	Myers	Pittman

Poindexter	Spencer	Walsh, Mass.	Williams
Pomerene	Swanson	Walsh, Mont.	Willis
Ransdell	Trammell	Warren	
Robinson	Underwood	Watson, Ga.	
Shields	Wadsworth	Weller	

So section 317a as amended was agreed to, as follows:

SEC. 317a. (a) That in order that the President and the Congress may secure information and assistance it shall be the duty of the United States Tariff Commission, in addition to the duties now imposed upon it by law, to—

(1) Ascertain conversion costs and costs of production in the principal growing, producing, or manufacturing centers of the United States of articles of the United States, whenever in the opinion of the commission it is practicable;

(2) Ascertain conversion costs and costs of production in the principal growing, producing, or manufacturing centers of foreign countries of articles imported into the United States, whenever in the opinion of the commission such conversion costs or costs of production are necessary for comparison with conversion costs or costs of production in the United States and can be reasonably ascertained;

(3) Select and describe articles which are representative of the classes or kinds of articles imported into the United States and which are similar to or comparable with articles of the United States; select and describe articles of the United States similar to or comparable with such imported articles; and obtain and file samples of articles so selected, whenever the commission deems it advisable;

(4) Ascertain import costs of such representative articles so selected;

(5) Ascertain the grower's, producer's, or manufacturer's selling prices in the principal growing, producing, or manufacturing centers of the United States of the articles of the United States so selected; and

(6) Ascertain all other facts which will show the differences in or which affect competition between articles of the United States and imported articles in the principal markets of the United States.

(b) When used in this section—

The term "article" includes any commodity, whether grown, produced, fabricated, manipulated, or manufactured;

The term "import cost" means the price at which an article is freely offered for sale in the ordinary course of trade in the usual wholesale quantities for exportation to the United States plus, when not included in such price, all necessary expenses, exclusive of customs duties, of bringing such imported article to the United States.

(c) In carrying out the provisions of this section the commission shall possess all the powers and privileges conferred upon it by the provisions of Title VII of the revenue act of 1916, and in addition it is authorized, in order to ascertain any facts required by this section, to require any importer and any American grower, producer, manufacturer, or seller to file with the commission a statement, under oath, giving his selling prices in the United States of any article imported, grown, produced, fabricated, manipulated, or manufactured by him.

(d) The commission is authorized to establish and maintain an office at the port of New York for the purpose of directing or carrying on any investigation, receiving and compiling statistics, selecting, describing, and filing samples of articles, and performing any of the duties or exercising any of the powers imposed upon it by law.

(e) The United States Tariff Commission is authorized to adopt an official seal, which shall be judicially noticed.

(f) The second paragraph of section 706 of the revenue act of 1916 is amended to read as follows:

"Such attendance of witnesses and the production of such documentary evidence may be required from any place in the United States at any designated place of hearing. And in case of disobedience to a subpœna the commission may invoke the aid of any district or territorial court of the United States or the Supreme Court of the District of Columbia in requiring the attendance and testimony of witnesses and the production of documentary evidence, and such court within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpœna issued to any corporation or other person, issue an order requiring such corporation or other person to appear before the commission, or to produce documentary evidence if so ordered, or to give evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof."

INTERDEPENDENCE OF CAPITAL, LABOR, AND GENERAL PUBLIC.

Mr. LODGE presented a communication from Stanley Manning, director of Young People's Work, transmitting resolutions of the Young People's Christian Union, Universalist Church, of Boston, Mass., which were referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

THE UNIVERSALIST CHURCH,
YOUNG PEOPLE'S CHRISTIAN UNION,
Boston, Mass., August 9, 1922.

Hon. HENRY CABOT LODGE.
Washington, D. C.

DEAR SIR: At the recent annual convention of the Young People's Christian Union of the Universalist Church, an organization of approximately 5,000 members, the following resolution was unanimously adopted:

"Whereas it is evident that a state of war exists in many of the industries of our country resulting in strikes, lawlessness, and destruction of life and property, whereby the happiness and prosperity of the entire Nation are hampered and the very foundations of our American civilization are threatened; and

"Whereas self-seeking and a failure to recognize the mutual interdependence of capital, labor, and the general public have resulted in class hatred, warfare, and bloodshed; and

"Whereas it is evident that a wrong motive of life is at the bottom of these things and it is time that a right motive was substituted: Be it therefore

Resolved, First, that we petition the President and Congress of the United States to take some immediate steps to settle the railroad, mining, and textile strikes;

Second, that as a method of settling disputes, we stand unqualifiedly for the submission of all labor controversies to an impartial tribunal in which all interested parties, employers, employees, and the general public, are represented;

Third, that we believe that the only permanent solution of these problems is the recognition and practice of the common rights and duties and mutual responsibilities incumbent upon all groups and individuals, and that it is therefore the duty of the Young People's Christian Union of the Universalist Church, and all other Christian organizations, to teach with renewed emphasis the fundamental Christian principles of mutual respect, good-will, cooperation, and practical brotherhood.

At the same convention, the following resolution referring to war was likewise adopted. Although not specifically instructed to do so, I am sending this as an indication of the sentiment of the Christian young people of the country to-day.

Whereas we, the young people of the Universalist Church, recognize that the late war was precipitated by the so-called Christian nations of the world, through the fact that they had not lived up to the simple truths of Christianity; and

Whereas we know that future wars can be averted but in one way, in believing that Jesus Christ knew what He said when He told us that all things are possible through faith in God; be it

Resolved, That we take our stand before God and man that in the future we shall use all possible means to keep our Nation from entering into war and so, becoming partner with those in opposition to God, would keep His Kingdom from the earth.

Feeling that this stand must be taken by the young of the earth and through their education, be it

Resolved, That we enter into communication with the young people's organizations of every Christian community and pray them to take the same stand.

I trust that you will bring these resolutions to the attention of the Senate by such means as may seem to you best.

Very respectfully yours,

STANLEY MANNING,
Director of Young People's Work.

OFFICER IN CHARGE OF PUBLIC BUILDINGS AND GROUNDS.

Mr. WADSWORTH, from the Committee on Military Affairs, to which was referred the bill (S. 3862) fixing the rank of the officer of the United States Army in charge of public buildings and grounds, reported it without amendment and submitted a report (No. 851) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHORTRIDGE:

A bill (S. 3903) granting a pension to Anna T. Eldred; to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 3904) to make the 4th day of July a holiday throughout the United States, including the Territory of Hawaii and the Territory of Alaska; to the Committee on the Judiciary.

RECESS.

Mr. McCUMBER. Mr. President, the junior Senator from New York [Mr. CALDER] has expressed a desire to speak in the morning on the tariff bill, and he desires to speak longer than 15 minutes. Inasmuch as at 11 o'clock to-morrow morning the 15-minute rule goes into effect on the pending bill, I ask that when we recess to-night we recess until to-morrow morning at 10 o'clock, in order to accommodate the Senator from New York.

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent that when the Senate closes its business to-day it recess to meet at 10 o'clock to-morrow morning. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCUMBER. I move that the Senate now recess until to-morrow morning at 10 o'clock.

The motion was agreed to, and (at 11 o'clock and 25 minutes p. m.) the Senate took a recess until to-morrow, Saturday, August 12, 1922, at 10 o'clock a. m.

SENATE.

SATURDAY, *August 12, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

The PRESIDENT pro tempore. The Senate resumes the consideration of House bill 7456, on which the Senator from New York [Mr. CALDER] is entitled to the floor.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. CALDER. Mr. President, in many of the newspapers of the country during the last two or three weeks the statement has been repeatedly made that it was not the purpose of the Congress to enact the pending tariff bill into law before election; that it would be passed in the Senate, go into confer-

ence, and would stay in conference until after election. I can assure the country that it is the purpose not only of the Finance Committee but of the Republican side of the Chamber to pass the bill at the earliest possible moment, have it go to conference and come out of conference, and become a law just as soon as that can be done. No one can tell just what day that will be, but I am confident it will be a long time before election day arrives.

A PROTECTIVE TARIFF—UNCLE SAM'S PROSPERITY INSURANCE.

Mr. President, the Irving National Bank, of New York, in its mid-July review of business conditions in this country, stated:

The mid-year period shows more than usual activity in business and finance, due perhaps to the desire of those in charge of various trades and industries to overcome the obstacles, some of them predicted, others unforeseen, which hamper the return to prosperous conditions. The textile, coal, and railway shopmen's strikes still drag on. These strikes not only cause irritation to the general public but have occasioned losses which in the aggregate are uncomfortably large. The tariff imbroglio also contributes to the general uncertainty regarding prices and business tendencies.

Mr. President, the Irving National Bank, with its finger on the pulse of the great arteries of the United States which pass through New York City from every industrial, financial, labor, and agricultural center in the world, I believe, reads the signs of the times correctly. Strikes and the tariff blockade here in the Senate are hamstringing the prosperity not alone of this country but of the world. Not many months ago Charles M. Schwab uttered a self-evident truth, but one which needs constant repetition.

A prosperous America—

He said—

can help the world; a prostrate America can not.

Since the close of the war, and more especially during the past two years, there has been scarcely a day when Europe as a whole or some war-torn foreign nation has not appealed to this country for assistance or the most friendly cooperation. Not a day passes without its industrial crisis or casualty in this country. While the whole world is struggling against tremendous odds toward a period of prosperity, peace, and normal living, it is not only tragic but a calamity that the United States is not to-day in a healthy condition itself. Where there are not strikes there are grave industrial problems, many of them traceable directly to business paralysis due to tariff uncertainties.

For months business has been improving steadily throughout the country, but the improvement has not yet been sufficiently widespread to amount to a national return to prosperous conditions, and until this period comes we can neither expect normal living nor normal incomes for the millions of producers in the great fields of activity in the United States, and until this period arrives this country, which is the only one in the world to-day in such a powerful financial and economic position that it can help, will be helpless no matter how great or grave are the needs of Europe.

EUROPE WAITS ON UNITED STATES.

To-day, more than in any era in our national life, the United States can literally make or break Europe. Without our cooperation the reconstruction of central Europe and Russia is impossible. Without our participation the whole credit structure of Europe must and will remain shiftless and insecure.

But we can not even contemplate taking part in a reconstruction of Europe until we put our house in order, and our own house will not be in order until the fundamental causes of this strike epidemic are removed and until the present uncertainty of the tariff is passed by the passage of the pending tariff bill.

Mr. President, the Senate has been debating the tariff bill for nearly four months. During this period, as a representative of New York State, I have been content to work quietly and ceaselessly for the bill, and the only statements I have made on the floor of the Senate have been in explanation of various paragraphs, but the time has come now for New York to be heard. New York City, which is the largest manufacturing city in the United States, is vitally interested in the tariff bill, because its prosperity depends upon a protective tariff. New York State, which is one of the great agricultural States of the Union, wants action and not delay. Our industries and our workers, as well as our farmers, have a right to be heard in this Chamber, now that they have listened for four months to deliberate misstatements and ridiculous prophecies of the minority. Why, Mr. President, every time there is a new schedule brought up for consideration some one of the opposition calculates that if the rates are approved the cost of living will be increased several hundred million dollars annually, and every time the statement is made the figures are enlarged, until to-day, if we would add together all the exaggerated predictions of how this bill would increase living costs, we would find that the amount so estimated would exceed the total amount of business affected by the bill.

Let us consider for a few moments, Mr. President, why New York City is interested in the tariff.

Recently the industrial bureau of the Merchants' Association of New York analyzed the 1919 reports of the United States census and showed that New York is not only the largest city in this country but the greatest industrial center in the world. Most people think of New York as a city of skyscrapers and department stores or as a city of retired millionaires and as a great port, but the census figures show that there are 32,590 factories in New York City, employing 825,056 workers, who produce annually goods valued at $5,260,707,577. This is sufficient to supply every person in the United States with more than $50 worth of merchandise.

NEW YORK AS AN INDUSTRIAL CENTER.

In its summary of New York as an industrial center the Merchants' Association said:

New York's 32,590 manufacturing establishments are capitalized at about $3,000,000,000.

During 1919 these establishments employed an average of 825,056 persons, or approximately 15 per cent of the city's total population.

These workers were paid a total in salaries or wages of $1,132,000,000.

The establishments consumed materials valued at $2,800,000,000 and added to their value by the processes of manufacturing about $2,400,000,000.

The average New York City factory employed 25 persons, of whom about 20 are wage earners and the remainder officials or clerks. New York's average establishment is somewhat smaller than that of some of the other large industrial centers. Chicago, for instance, employs an average of 48 per establishment; Philadelphia, 37; Boston, 36; and Baltimore, 42.

New York's factories in 1919 produced an average of $161,448.22 worth of goods each, or $6,376.18 per person engaged. If the wage earners alone are considered, the value of the product per worker was $8,225.77. The average amount per wage earner added to the value of the product in the course of manufacture was $3,756.15.

The average income for all persons engaged in the city's factories was $1,372.02.

Considering the various classes of employees separately, the officials, including the officers, superintendents, managers, etc., received an average of $2,102.33, the clerks, $1,529.62, and the wage earners, $1,261.51.

These items and other factories in the city's industrial life have shown a decided change since 1914, the date of the previous census of manufacturers. The number of establishments increased from 1914 to 1919 approximately 10 per cent, and the number of persons engaged in industry about 12.6 per cent. An interesting commentary on the development of manufacturing is the fact that the number of wage earners increased only 9.1 per cent during the same period, indicating a larger proportion of persons engaged in clerical and supervisory capacities than had previously been the case. This same tendency is to be noted in the statistics for Chicago, Philadelphia, Boston, and Baltimore, although San Francisco shows an opposite tendency.

The value of manufactured products increased out of proportion to the actual industrial operation, due, of course, to the changing value of the dollar. In 1914 the city's manufactured products were valued at approximately $2,293,000,000, as compared with $5,267,000,000 in 1919, an increase of approximately 130 per cent.

Salaries and wages likewise increased very abruptly. Considering all classes together, the increase was 97 per cent. Analyzing the increase for the various classes of persons engaged in industry, it appears that the average annual income of officials increased from $1,144.27 in 1914 to $2,102.33 in 1919, or 84 per cent; for clerks, the average annual income increased from $980.44 to $1,529.62, or 56 per cent, and for wage earners the increase was from $610.81 to $1,261.50, or 107 per cent.

The last statement which I have quoted is interesting because it shows that in a period of five years, from 1914 to 1919, the census figures of the United States disclose that the wage earner in the factories in the State of New York has increased his compensation from $610 to $1,261 per annum, an increase, as I have indicated, of over 100 per cent.

Although in practically all lines of manufacture the value of products from 1914 to 1919 increased markedly, the same increase is not to be found in the actual operations of manufacturing. In some lines the number of establishments decreased and the number of employees increased, indicating a consolidation and net growth in the industry. In other instances both the number of establishments and persons engaged has increased. In some cases a decrease is to be noted in both establishments and persons engaged, but with an increase in the value of the product out of proportion to the general increase or to a change to be accounted for by price fluctuations. This is to be explained on the ground that the installation of new and more efficient machinery has increased production.

Considering value of product only, the important lines of industry which have shown a percentage of increase considerably in excess of the average of 130 per cent are:

"Lapidary work; fur goods; toys and games; boots and shoes, including cut stock and findings; professional and scientific instruments; chocolates and cocoa products, excluding confectionery; ivory, shell, and bone work, not including combs and hairpins; shipbuilding, wooden; chewing gum; knit goods; silk goods; tobacco pipes; shirts; jewelry; dyeing and finishing of textiles, exclusive of that done in textile mills."

It is not generally appreciated that New York leads the country in the production of many items in common use and manufactures a very large proportion of many others. New York makes about half of the country's output of millinery and lace goods. The city cuts and polishes 90 per cent of the diamonds and other precious stones which are finished in this country and manufactures one-third of the country's

jewelry. It also manufactures 20 per cent of the country's production of pianos.

For men, New York makes 4 out of every 10 ready-made suits of clothes produced in the United States, and 46 per cent of the men's furnishing goods, 40 per cent of their shirts, and a quarter of their hats. It also supplies the men with four out of every five tobacco pipes made in this country.

It makes nearly one-quarter of the buttons, 29 per cent of the toys and games, 24 per cent of the chewing gum, a third of the mirrors, and nearly a quarter of the professional and scientific instruments. Other items of which New York is an important producer are tobacco, cigarettes, fountain pens, printing ink and pencils, patent medicines and compounds, and pocketbooks. The table, showing industries which are concentrated in New York, gives a more complete list of the articles which are manufactured in great quantities in this city.

NEW YORK CLOTHES MILLIONS.

Mr. President, I ask unanimous consent to have printed in the RECORD in 8-point type seven short tables showing the various industries in this city.

The PRESIDING OFFICER (Mr. CURTIS in the chair). Without objection, it is so ordered.

The tables referred to are as follows:

New York City's industries analyzed in tables.

	Number of establishments.	Total persons engaged.	Value of products.
METAL INDUSTRY.			
Babbitt metal and solder	28	787	$9,302,340
Brass, bronze, and copper products	141	6,119	28,928,172
Cash registers and calculating machines	5	384	1,064,909
Copper, tin, and sheet-iron work	376	3,365	14,929,876
Cutlery and edge tools	26	940	5,664,128
Electrical machinery, apparatus, and supplies	176	14,405	48,404,444
Electroplating	97	700	1,779,974
Engines (steam, gas, and water)	7	2,474	15,571,486
Metal novelties	41	603	1,880,052
Foundry and machine shop products	628	24,749	84,625,843
Furniture, metal	35	1,194	5,975,505
Gas and electric fixtures	93	3,622	11,492,360
Gas machines and gas and water meters	7	1,566	5,074,336
Hardware	65	2,148	7,522,877
Instruments, professional and scientific	105	4,244	13,836,817
Iron and steel bolts, nuts, washers, etc	4	53	238,645
Iron and steel doors and shutters	27	758	2,853,985
Iron and steel, temporary and welding	20	236	830,029
Machine tools	10	657	1,479,133
Needles, pins, and hooks and eyes	12	197	682,920
Plated ware	16	768	2,365,249
Pumps, not including power pumps	11	195	532,912
Pumps, steam and other power	5	218	970,229
Scales and balances	8	479	1,731,380
Sewing machines	10	183	554,209
Shipbuilding, steel	20	21,836	81,872,239
Springs, steel, car and carriage	15	604	2,180,771
Stamped and enameled ware, not elsewhere specified	56	5,154	19,554,719
Steam fittings and steam and hot water heating apparatus	17	834	3,144,172
Stereotyping and electrotyping	6	209	760,497
Stoves and hot air furnaces	15	396	1,823,042
Stoves, gas and oil	249	3,476	15,375,830
Structural iron work not made in steel works or rolling mills	9	260	988,984
Textile machinery and parts	60	4,932	25,196,990
Tinware, not elsewhere specified	91	917	3,034,911
Tools, not elsewhere specified	7	462	1,401,561
Typewriters and parts	86	1,754	8,142,710
Wirework, including wire rope and cable, not elsewhere specified	30	1,143	4,162,707
All lines	2,614	113,021	435,930,943

New York City's industries analyzed in tables—Continued.

	Number of establishments.	Total persons engaged.	Value of products.
FOOD PRODUCTS.			
Bread and other bakery products	2,319	28,033	$173,510,000
Cheese	.....	6	55,691
Chewing gum	8	880	12,339,317
Chocolate and cocoa products	9	1,857	24,486,318
Coffee and spice, roasting and grinding	78	2,446	51,225,279
Confectionery and ice cream	510	15,559	84,564,630
Cordials and flavoring sirups	30	281	4,100,415
Flavoring extracts	60	522	4,130,855

Mr. CALDER. Mr. President, I want Members of the Senate and the people of the country to see the diversity of these industries and the percentage of the total production which New York City contributes. For example, New York City in one year produces $866,243,561 worth of women's clothing, or 73.2 per cent of all the women's clothing manufactured in the United States. It produces 74 per cent of all the furs worn in the United States. There are 628 foundries and machine shops, employing 24,750 workers, in the city. New York City produces 95.6 per cent of all the paper patterns used by the women of the United States in making their own or their children's clothes. There are 248 boot and shoe factories in the city, employing 14,688 workers and producing $66,478,600 worth of shoes annually. The leather industry itself consists of 833 establishments, employing 24,399 persons and producing $123,280,584 worth of products each year. There are 3,549 establishments, employing 62,845 persons and producing $602,649,499 worth of bread, cheese, cakes, ice, ice creams, confectionery, chocolate, cocoa, and meat products. In the metal industry there were 2,614 factories, employing 113,021 persons and producing $435,930,943 worth of products, from pumps to tools and from textile machinery to needles and pins. New York City is the greatest printing and publishing center in the United States, producing $390,615,477 worth of goods in 3,167 separate plants. In the apparel industry there are 11,592 establishments, employing 256,905 persons and producing $1,832,785,377 worth of products.

To recapitulate, the essential facts concerning New York City's manufacturing industries, as disclosed by the census, are shown in the following table:

Number of establishments	32,590
Persons engaged in manufacturing industries	825,056
Proprietors and firm members	35,101
Salaried officers, superintendents, and managers	36,894
Clerks, male	71,179
Clerks, female	43,107
Wage earners	638,775
Capital	$3,038,557,492
Salaries and wages	$1,131,994,192
Officials	151,357,191
Clerks, etc	174,814,550
Wage earners	805,822,451
Principal materials	2,801,619,388
Fuel and rent of power	59,856,730
Value of products	5,260,707,577
Value added by manufacture	2,399,231,459

It would be a simple matter, Mr. President, to read a much longer list of New York industries, but it is not necessary. I confine myself to the above, because they indicate the extent of New York City's interest in any legislation which affects industry in the United States.

In one sense it makes little difference to New York manufacturers whether its partly manufactured iron and steel come from Pennsylvania or from Germany, whether its woolen cloth comes from Georgia or from Bohemia, its leather from Illinois or from Argentina. But it makes a great difference to Pennsylvania, Massachusetts, Georgia, and Illinois; it also makes a great difference to New York whether there is a market in Georgia for the ready-made women's dresses which New York produces from Georgia cloth, whether there is a market in New England for men's clothing which New York makes from the product of New England woolen mills, whether there is a market in Pittsburgh for the finished metal products that New York makes from Pittsburgh billets and plates, and in Chicago for boots and shoes and belts.

NEW YORK BUYS FROM AMERICANS.

Through the ordinary banking channels the New York garment manufacturer collects from his customers the money which meets the Georgia cotton-mills pay roll and the Lowell woolen-mills pay roll and the Pittsburgh sheet-metal pay roll and the Butte copper mines and the Connellsville coke ovens.

It is equally important to the great industries throughout the United States producing either raw materials or manufac-

tured materials for further use in manufacturing that the New York market should be preserved for them and also to the New York manufacturer that his customers throughout the United States should have their purchasing power increased and not lessened.

Obviously, if any New York manufacturer is undersold by a European manufacturer, the New York manufacturer must go out of business unless his customers gratuitously are willing to pay him a higher price for his product than the price of the European product. If this New York manufacturer ceases business, he also ceases to be a market for raw materials and articles manufactured for further use in manufacture. That this process is now under way is proved by the Merchants' Association survey of unemployment in New York City. Of 2,531,747 persons employed in New York on January 1, 1920, there were out of work on June 15, 1922, more than 10 per cent—295,235. But while the percentage of unemployment was only a little more than 10 per cent in all industries, half the unemployment was in the manufacturing industries. Less than a third of the people earning a living in New York City are employed in manufactures. Of this third 145,500 were out of work. While unemployment decreased in other industries, such as the building trades, domestic and personal service, and transportation, the number of idle in manufacturing industries increased from 130,571 on November 1, 1921, to 145,500 in June, 1922.

As a port, New York is only a gateway, a freight station. Consuming itself only a fraction of the foreign-made merchandise unloaded at its piers, the rest is distributed throughout the United States. The total value of all the manufactures ready for consumption imported at all the ports of the United States is only one-seventh of the products of New York's factories. The fact that these imported manufactures amount to hundreds of millions of dollars emphasizes the stupendous value of the products of New York's factories.

What concerns the whole United States is whether the wage earners, salaried employees, and factory owners of New York shall be a profitable market for the food and raw material produced by the farmers, cotton growers, wool raisers, and coal and ore miners of the United States; and whether the cotton and wool cloth for the New York garment factories, the brass, the copper, the zinc, the steel, and the iron for the New York metal factories, the leather for the New York shoe factories, the sugar for the New York refineries and candy factories, the flour for New York's cracker factories, the $2,801,619,388 of raw materials which New York manufacturers annually buy, shall come from the cotton and woolen mills of Georgia and Massachusetts, the metal mills of Pennsylvania, Ohio, Illinois, and Missouri, the sugar mills of Louisiana, the flour mills of Minneapolis, the tanneries of Chicago, or shall these raw materials and partly manufactured articles come from Europe, Asia, and South America?

New York's interests as a port, great as they are, are minor compared with its interests as a factory. If there must be a choice between fostering, favoring, and benefiting New York as a factory or New York as a port, the less must yield to the greater, for New York is the greatest manufacturing city of the world.

COSTS HERE AND ABROAD.

Mr. President, I can best show the vital interest which New York City as an industrial center has in a protective tariff by one or two illustrations. Take the printing trade as an example. Recently the Associated Farm Papers, of 200 Fifth Avenue, New York, received a post card from Hungary, dated June 28 this year, which is a typical example of labor and production costs in one central European country as compared to similar costs in the printing industry in the United States.

The Budapest publishers boldly state that the "exigency" of Hungary is the opportunity of America—the opportunity of giving employment to Budapest printers and publishers at the expense of our own people.

The postal card says:

OUR EXIGENCY—YOUR OPPORTUNITY.

We pay the highest-salaried printer $5 a week; for the highest-grade coated paper, 7 cents per 16 American ounces; postage to the United States or any foreign country for 1,000 pieces of 50 grams each—1½ ounces printed matter—is about $1; addressing per 1,000 cost 20 to 25 cents American money. Compare these few figures, please, to American prices. Suppose you have a proposition which would stand an expense of $5,000 for printing and mailing, but will not likely prove profitable if it cost you $20,000 or more. In such a case make a trial; let us turn out your printed matter and mail it to your list of addresses from here. The fact that it is franked with foreign postage stamps increases its advertising value. We have the highest-grade up-to-date machinery; have the most complete printing plant east of New York, established to employ 1,000 hands, and at present we have not enough work for 100. The allies of the United States have taken from us not only most economical but even cultural possibilities. Hungary has printing facilities to turn out the literature for 22,000,000 at home, and did some export business. They have reduced our population to one-third. For the present at least we are almost paralyzed. We are, however, bold enough to believe that you will encourage us to the extent of letting us estimate on some of your work. The difference of cost between here and there will astound you. For large-edition work especially there is no better-equipped plant than ours even in the United States. We hope to hear from you.

Very respectfully,

TOLNAI VILAGLAPJA (LTD.),
Budapest, Hungary.

JUNE 28, 1922.

That is but one illustration on printing. Another New York concern received an offer from another central European publishing house to issue their annual trade catalogue for $37 per thousand compared to a cost in this country of $2,300 per thousand.

In New York there is another concern which has owned a manufacturing plant in Europe for a number of years. It has, however, been operating its plants in New York to give employment to American labor. To-day it faces disastrous competition from Canada and Germany, although by closing down its plant in New York State it can manufacture its product many dollars per unit less, and after paying freight charges to New York can undersell either the Canadian or German manufacturers in this country. It can even undersell its own plant here. But what is this corporation doing? What has it been doing? Instead of robbing the American public it has been urging the enactment of a protective tariff so that it may continue to manufacture here; but if this Congress should adjourn without passing a tariff this concern can go into business in Europe and make more money exploiting the American market, if it should choose to do so, because it can undersell both Germany and Canada.

LOYALTY OF AMERICAN MANUFACTURERS.

This, Mr. President, is another typical example of the loyalty of American manufacturers. There are thousands of concerns in my city which could move abroad to-morrow, manufacture cheaper in Europe, and sell at fancy prices to the American consumer. If they did so, they would be hailed by the opposition as benefactors of the people for closing down here and moving away. There is not a day that passes without some New York concern being offered manufacturing facilities abroad. Senators are undoubtedly familiar with the case of the American Electric Cutting Machine Co., which was recently proffered complete manufacturing facilities in Germany if they would but close their plants here and move away. They could make greater profits manufacturing abroad and selling here than they ever can under a protective tariff by producing here. At the time this offer was made Mr. Edward M. Waring, of this company, wrote the Secretary of Labor, who in a splendid patriotic letter to Mr. Waring thanked him for thinking so much of his own country that he was willing to consider its own prosperity paramount to that of any other nation in the world.

Mr. President, for the information of the Senate I desire to read one paragraph of the letter of Secretary Davis. The Secretary said:

I have your good letter of January 27, inclosing a copy of one received by you from a certain firm alleged to be organized for the purpose of "helping Germany to come back," offering you the services of the company in securing for you lower costs of reproducing your products by manufacturing them in foreign countries and shipping them to the United States for sale.

First of all I want to compliment you most highly upon the very patriotic stand which you have taken in refusing to be led into such a very un-American scheme for depriving American workmen of the means of securing an honest living.

I can hardly conceive of anyone in this great country of ours, under the protection and freedom of our liberal Government, undertaking a more despicable and pernicious activity than suggested by the copy of the letter which you sent me, except one accepting the proposition as outlined. The administration has worked hard and with untiring efforts to secure to our people a return of the prosperity which we normally enjoy. Several million of our wage earners are out of employment. The suffering which this situation has brought upon many American homes doesn't have to be left to imagination; it is too apparent to all of us. It is to remedy this that the leaders of commerce and industry in our great Republic have set their hearts, minds, and hands to work.

I have this to say, however, that I have too much faith in the business morality and integrity of the great majority of American manufacturers to believe that an enterprise of this kind will find ready response to their unscrupulous practices.

I wish to thank you again most sincerely for bringing this to my attention and to express my congratulations on the real American way in which you have handled this correspondence.

WHY OUR INTERESTS ARE VITAL.

There, Mr. President, is the issue in a nutshell. Our own industries and our own workers must have the primary consideration of Congress. When the tariff is a question of life or death to industry, as it is to-day with hundreds of thousands of factories in this country, it is the duty of Congress to legislate in their interest, when their interest is the interest of our people as a whole.

We have heard a great deal during this debate about the tariff and the consumer. I, for one, wish to state as emphatically as I can, that before a man or woman can be a consumer he or she must be a producer. The United States can not survive as a nation of consumers. We can not prosper by our appetite to consume. Production comes first. If we legislate to enable men and women to produce every consumer will be able to take care of himself. The American market is our greatest and our best market, but the moment we begin to barter that market to foreign producers from that moment we may begin to measure the downfall of this country as a nation of people who are too proud to work for a living.

I know of no better illustration of the interrelation of industry and agriculture and the importance of both on the American market than the first part of the report of the joint committee of Congress on "The agricultural crisis and its causes." On page 156 of Part I, it is stated that the—

per capita consumption of wheat has shown a marked tendency to decrease in periods of industrial depression and that domestic consumption is probably the largest factor in determining the price.

Again, on page 16, it is stated:

Excepting wheat and rye, exports of other farm grains are normally not a large factor in determining prices; exports of grain other than wheat and rye are normally almost an insignificant part of the total production.

Consumption of beef in this country bears a very close relation to urban employment or unemployment, and with the progress of the period of business depression and consequent unemployment, consumption of beef and beef products diminished.

Again, it is reported by the committee which made a most exhaustive study of the agricultural crisis that—

the consumption of wheat, beef, mutton, and dairy products have all declined during the period of depression and this decline in consumption undoubtedly contributed to and accelerated the decline in the prices of these commodities.

RELATION OF FARMING TO INDUSTRY.

In other words, Mr. President, when our workers are employed in the urban centers, they as producers are more than able to buy wholesome abundant American food products and the farmer prospers when the worker prospers, but when the workers are idle they buy less, they eat less, and the farmer feels the pinch as keenly as the worker himself.

I have spoken here of the interest of New York City in a protective tariff and about New York City as the greatest industrial center in the world. New York State, Mr. President, is one of the greatest agricultural States in the Union. According to the last census there were 13,158,781 acres of improved farm lands in New York. In the production of hay and forage crops New York produced more than Wisconsin, Iowa, and Ohio, leading every State in this country. In the production of vegetables New York led the list, with Wisconsin, Pennsylvania, and Minnesota ranking second, third, and fourth. In the production of dairy products New York State ran Wisconsin a close race for first place.

Herbert Hoover, Secretary of Commerce, addressing the Interstate Commerce Commission recently on the railroads, made a significant reference to the value of home markets to our farmers when he declared:

A real program of construction for our railroads alone would in its various ramifications give relief to five or six hundred thousand of our unemployed. It would enable even added numbers to increase their standard of living and thus give increased market to the product of our farmers. Our farmers who look to foreign markets for their surplus should stop to consider that our home consumption of meat decreased nearly 7 pounds per capita in 1921, mostly owing to unemployment, and that if this decrease could be overcome it would be worth more than a 35 per cent increase in exports.

Think of that, Mr. President! If the American consumer had employment which would enable him to purchase that much more meat products, it would mean in comparison more than a 35 per cent increase in all of our exports.

We talk glibly, said Secretary Hoover, of giving billions of credits to foreign countries to increase our farm exports. I wish to say * * * that a billion dollars spent upon American railways will give more employment to our people, more advance to our industry, more assistance to our farmers than twice that sum expended outside the frontiers of the United States.

Thus you can see, Mr. President, why the farmers of New York State are interested in any legislation which affects industry or agriculture.

But where are we to-day as a Nation? Two of our greatest industries—our railroads and our coal mines—are tied up by strikes and here in the Senate there has been for months a blockade of tariff legislation. By the means of a skillful filibuster and by means of extravagant statements about an alleged increase in living costs the Democrats sought to prejudice the public against a great piece of constructive legislation which has but one fundamental object—the increase of production in the United States. But at last even the Democratic Party sees the handwriting on the wall and wants the tariff passed. This is a producers' tariff, an industrial and agricultural insurance measure, if you please. That is what a tariff does. It insures the American worker and farmer an opportunity to work in his own country against all foreign competition. It is a national insurance for agriculture, industry, labor, and finance. I doubt whether there is a Member of the Senate or a working man who does not carry some insurance either on his life or on his property. Certainly there is not a business man in the country to-day who would not carry insurance, but he does not regard his insurance as a luxury. It is a necessary part of his life and work. No business man would for a moment give up all his insurance policies because the annual premium increases the cost of his living expenses or his business costs. No man would refuse to take out insurance because the insurance companies profit by handling his business. Then why should there be opposition to-day to this tariff bill, which in its final analysis is nothing more than a national insurance policy, safeguarding and protecting American industry and agriculture against foreign competition, which has and may continue to work havoc in our American markets for the articles we make and the food we produce?

The tariff is as important to the prosperity of this country as insurance is to the security of business, and now the Democratic opposition has tumbled like a house of cards. Why? Because they know the American people want this tariff.

Opponents of an American protective tariff continue to advance the argument that the enactment of such a tariff will result in a decline of our export trade:

(1) Because, by preventing this Nation's market from being flooded by cheaply made products of other countries, this country will not be able to sell to other countries.

(2) The enactment of a protective tariff by this country will invite retaliation from other countries in the form of high tariffs that will keep out American products.

The answer to the first argument is furnished by the records of the Department of Commerce, which show that every time this country has enacted a protective tariff its exports have, under the operation of that tariff, increased very materially.

The second argument, that the enactment of an American protective tariff by this Congress will invite retaliation from other countries in the form of high tariffs is false and misleading for the very simple reason that 22 of the leading nations of the world have already erected high tariff walls against imports, tariff walls which have been operating for months against the importation of American products. In this list of 22 nations is included the British Empire, which means not only the United Kingdom but the British Dominions—Canada, Australia, New Zealand, India, and South Africa—and all the British colonial possessions, whether insular or continental.

TARIFF WILL NOT INVITE REPRISALS.

This fact clearly proves that the propaganda which is being circulated throughout the United States to the effect that the enactment of an American protective tariff will invite reprisals by other countries is a propaganda that is absolutely false, because it predicts that the American tariff will bring about a condition which, in point of fact, already exists and has existed for some time under the Underwood free-trade tariff.

Not only have the leading nations in the world erected high tariff walls which operate against American imports but, not satisfied with protection afforded their markets by such high duties, a great number have established absolute embargoes against foreign imports.

Italy established an absolute embargo in August, 1921, on a very long list of articles. This list, broadly speaking, included all articles which can be made in Italy and all articles which the Italian authorities arbitrarily classify as "luxuries." Although this embargo has been relaxed somewhat since its imposition, there yet remains a long list of articles which are prohibited entrance to Italy, and the United States is the exporter of a very large quantity of these articles.

Czechoslovakia in March, 1920, established an embargo prohibiting the importation of all articles the like of which are made within that country and also all articles which are classified by the authorities of that nation as luxuries. Many American exports are included in this list.

Germany has an embargo under the name of a licensing system. Permission to import goods must be obtained by a license and no license is issued for importation of luxuries or for any articles which can be or are being made in Germany—including, of course, a long list of American-made articles.

Hungary has a similar system of licensing which amounts to an embargo and which absolutely prohibits a long list of articles which the United States produces and exports.

Poland is another country which prohibits importation of articles the like of which are manufactured within that country and also all articles which the Polish Government arbitrarily classifies as luxuries.

Belgium has practically prohibited the importation of articles made in that country by the imposition of a 300 per cent tariff on manufactured goods such as textiles, iron and steel, chemicals, soap, rubber goods, automobiles, pianos, and so forth.

Spain has established an embargo on a large number of articles, including wheat and flour.

Switzerland requires a special license to be issued before anyone may import cotton, woolen, or silk textile goods, cutlery, celluloid, various kinds of pottery, stone and porcelain ware, and meat products when put up in tin or glass—which applies directly to many exports from this country.

Great Britain has the licensing system under her "safeguarding of industries act." At present she has not applied it to any products from the United States because she is amply protected from such imports by her tariff of 33.3 per cent; but in her licensing system she has a weapon which she is able to use at any time to stop absolutely all imports of any character.

Peru, Rumania, Ecuador, and other countries have embargoes against a selected list of articles, all of which are produced and exported from this country.

EUROPE IS BROKE.

This exposes the fallacy and the falsity of the argument that the enactment of an American protective tariff will invite reprisals, because other countries have not waited for this Nation to pass a protective tariff before they have put into effect high tariffs or absolute embargoes.

These facts also show that the United States is not going to obtain the foreign trade of such countries, whether it enacts a protective tariff or whether it does not. In other words, we have already lost the trade of the countries which have placed an embargo against our goods. So that there is nothing to be gained in the way of foreign markets by a refusal to enact a tariff which protects our own markets.

The embargoes and the high tariffs put into effect by other countries of the world have not been imposed out of a spirit of economic hostility to this country or to other countries. The plain truth of the situation is that European countries are flat broke. With the single possible exception of England, no country which was engaged in war is balancing its budget. In truth the budget reports from these countries show that they are much deeper in debt now than they were when the armistice was signed.

As a result of this financial situation and because of it, it is absolutely essential to all such countries that their imports be restricted as much as possible. In order to prevent the buying of goods abroad, which would increase their indebtedness to other countries and take money from their own country, these European nations were compelled to establish absolute embargoes or prohibitive tariffs. In this way they compel their people to buy at home of their home manufacturers everything which is made at home. They prohibit their people from buying any luxuries from abroad. All that is permitted to be imported are necessities which can not be produced within their own country.

This system of embargoes and prohibitive tariffs prevails throughout Europe because of economic necessity and not because of any desire upon the part of any of the countries to display hostility to the United States or any other nation against which the embargoes operate. Furthermore, this system of embargoes and prohibitive tariffs will continue to operate in Europe for many years, or until the European countries which have such systems begin to balance their budget. There is no likelihood of Europe furnishing the producers of this country with a profitable market for a number of years. The larger number of the nations of Europe are pauperized, and a pauperized people are never good customers.

WHY EXPORTS EXCEED IMPORTS.

The opponents of an American protective tariff are busy spreading the propaganda that if a protective tariff restricts our imports it will correspondingly restrict our exports. They say if we do not buy from other countries we can not sell to other countries. Statistics published by the Department of Commerce show that in 44 of the 48 years since 1874 our exports have exceeded our imports; that is, in 44 out of 48 years since 1874 we have sold where we did not buy.

International trade is far from being the simple equal exchange of goods which free traders would have the people believe. International trade is not a matter of sentiment. Other nations are not buying goods from us as a favor merely because we have bought goods of them, neither do they confine their buying of us to an amount equal to our purchases of them. International trade, like private trade, is either a matter of profit or necessity or both. Nations buy where they must to supply themselves with food, fuel, and their industries with raw material. They buy in the market that gives them the best product on the most favorable terms.

The argument that is being repeated over and over by opponents of the tariff that if we impose a protective tariff on foreign-made goods they will cease to be imported and the countries which produce them will cease to buy our goods is wholly unworthy of serious consideration. This is not true now and never has been true. The free-trade propagandists using this argument cite the awful things that will happen to our trade—with first one country and with another—in event we restrict imports from those countries by the enactment of an American tariff act enacted in the summer of 1921, giving protection to American farm products, has utterly ruined our commercial relations with Canada because it restricts Canadian imports, and unless Canada can sell without restriction to us she will cease buying from us.

Mr. JONES of New Mexico. Mr. President, may I ask the Senator how, in the last analysis, one nation can sell goods to another without buying goods from them of a substantially equal amount? I mean, how can one nation sell goods to the outside world without buying goods from the outside world of a substantially equal amount?

Mr. CALDER. In a moment or two I will read some figures to the Senator which show just how that is balanced. Those figures will prove that during a period of years we exported to certain countries goods of the value of several million dollars, and imported goods of one-half of the value of the goods we sold. Somehow or other, I will say to the Senator from New Mexico, the thing does not work out as he intimates. It would seem, after all, that if a country exported goods of a certain amount to a certain other country, that country would send goods back of the same amount, but it does not work out that way.

Mr. JONES of New Mexico. I do not mean to even suggest that you have to receive the same amount of goods from any one country to which you export goods, but in the final balance of international trade there is and can be only one way to settle it, and that is to exchange commodities or to extend credits, which is merely a temporary postponement of the final settlement of the bill. It may be that you can make investments in England which will be reflected in exports to South America, but in international trade there is and can be but one way ultimately to settle the balance, and that is by an exchange of commodities. You may make investments abroad, you may extend credits, and in other ways balance the account, but in international trade must not the Senator conclude that the balance can only be settled by an exchange of commodities?

Mr. CALDER. Mr. President, let me say just this in reply, for I want to conclude my speech by 11 o'clock, when my time expires. I stated a moment ago that in 44 of the last 48 years—in other words, since 1874—we exported more goods than we imported.

Mr. JONES of New Mexico. I do not believe the Senator is quite right. If he confines the word "goods" to mere matters of merchandise, he is right, but the Senator must know that the balance was settled by the expenses of our tourists abroad, and by remittances of immigrants in the United States back to their old home. It was settled in those various ways. But the Senator must realize that there can be a last settlement only in the way I have indicated. Those things offset the balance of merchandise which we were exporting. We were a large debtor nation. We owed interest abroad on advances which had been made to the United States, and they were glad to get our goods in payment of our indebtedness to them. But international trade is settled always in commodities, sooner or later. In the early years of this Government of ours we were an importing nation, and we imported much more than we paid abroad, but we were piling up an indebtedness abroad, and the time came in 1842 when we had practically gotten to the point where we could settle that, and where our actual exports of commodities were in excess of the commodities coming in. But they went out to pay debts which we had incurred prior to that time.

Mr. CALDER. The fiscal years 1912 and 1913 were normal years. In 1912 Canada sold to us goods in the amount of $108,813,368, but she bought goods from us in the amount of $329,257,194. In the year 1913 the balance of trade was even greater against Canada and in our favor. That year Canada sold to us goods in the amount of $120,571,180, but she bought from us goods in the amount of $415,449,457. During both years the Payne-Aldrich protective tariff was in operation.

Germany is another country whose name is used by the free traders in their protestations that if we do not buy from Germany without restriction we can not sell to her. The reports of the Department of Commerce show that in 1912 we bought from Germany goods in the amount of $171,380,380, but that we sold to Germany goods to the amount of $306,950,021. In 1913 we bought of Germany goods to the amount of $188,963,071, but sold to Germany goods in the sum of $331,684,212.

Italy is another country which is used in the propaganda to persuade American people they must not enact an American protective tariff. It is repeated over and over that unless we buy from Italy without restriction we can not sell to her. In 1912 we bought from Italy goods to the amount of $48,028,529, while we sold to her goods to the amount of $65,261,268. In 1913 the balance of trade was even greater in our favor. In that year we bought of Italy goods to the amount of $54,107,364, and sold to her goods in the amount of $76,285,278. Evidently the Payne-Aldrich protective tariff did not kill our export trade with Italy.

SOME TARIFF HISTORY.

Then there is the "hands across the sea," the "blood is thicker than water" argument that we must permit England unlimited and free access to our home markets or she will stop buying of us. In 1912 the United Kingdom—England, Scotland, Ireland, and Wales—sold us goods in the sum of $272,940,700, while we sold her goods in the sum of $564,372,186. In 1913 the United Kingdom sold us goods in the sum of $295,564,940, while we sold her goods in the sum of $597,149,059.

For the year 1912 under the Payne-Aldrich protective tariff our total imports from all of Europe amounted to $819,585,326, while we exported to Europe $1,341,732,789. In 1913 under the Payne-Aldrich protective tariff our imports from all of Europe amounted to $892,868,384, while our exports to Europe for the same year amounted to $1,479,074,761.

Mr. JONES of New Mexico. How does the Senator explain that we got paid for those goods?

Mr. CALDER. At that time England had interests here, and at that time we paid her rentals, perhaps, and interest on obligations which were due her, and we balanced the debts in that way. But it is a fact that we sold her nearly twice what she sold us.

For purposes of easy comparison the following table showing our imports and exports from various typical European countries for the fiscal years 1912 and 1913 is given:

Imports and exports from various typical European countries.

FISCAL YEAR ENDING JUNE 30, 1912.

	Imports from—	Exports to—
Belgium	$41,677,418	$51,387,618
Denmark	2,832,077	15,767,348
Germany	171,380,380	306,959,021
Italy	48,028,529	65,261,268
Netherlands	35,568,436	103,702,859
United Kingdom	272,940,700	564,372,186
All Europe	819,585,326	1,341,732,789
Canada	108,813,368	329,257,194

FISCAL YEAR ENDING JUNE 30, 1913.

Belgium	$41,941,014	$66,845,462
Denmark	2,974,670	18,687,794
Germany	188,963,071	331,684,212
Italy	54,107,364	76,285,278
Netherlands	38,180,967	125,909,862
United Kingdom	295,564,940	597,149,059
All Europe	892,868,384	1,479,074,761
Canada	120,571,180	415,449,457

These figures taken from the reports of the United States Department of Commerce leave no doubt as to the fallacy of the argument that international trade is a matter of mutual exchange of goods in the process of which nations doing the trading close the year with the accounts balanced, and in event one nation restricts imports from another nation it immediately loses a corresponding proportion of its sales to that nation.

A significant fact in connection with the above-quoted figures is that during the years of 1912 and 1913 this country was operating under the Payne-Aldrich protective tariff. The data show clearly that under that tariff our export trade was vastly greater than our import trade, which utterly destroys the argument that the enactment of an American protective tariff would prove ruinous to our foreign trade.

We of the Republican majority see the issue clearly. It is a struggle between Europe and America for supremacy in the American market. It is a contest between those who believe that this country can only survive as a nation of consumers and those who believe that production is the basis of prosperity. It is absurd to talk about this bill solely from the consumers' standpoint. If we as a nation begin to measure our concern over legislation by our appetites to consume there will never be a constructive piece of legislation passed by Congress.

So, Mr. President, New York City, the greatest industrial center in the world, and New York State, one of the largest agricultural States in the Union, will support Congress and this tariff bill to safeguard the American market from foreign exploitation, to protect labor from cheap foreign competition, and to insure prosperity. Then, when our house is in order, we can effectively assume our rightful place in the reconstruction of Europe.

Finally, Mr. President, the proof of the unanimous demand of the American people for a protective tariff is the confession of the Democrats that they dare no longer to block this bill in the Senate. They have argued their case to death and surrender knowing that defeat faces them for their opposition to a Republican protective tariff.

Mr. WALSH of Montana obtained the floor.

Mr. UNDERWOOD. Will the Senator from Montana yield to me just a minute to have a letter printed in the RECORD?

Mr WALSH of Montana. I yield to the Senator.

CLAIMS AGAINST GERMANY.

Mr UNDERWOOD. Mr. President, some days ago I introduced a bill in reference to appointing a commission to ascertain American claims against Germany. Subsequently the President agreed with Germany on a commission to be appointed by the two powers. The bill I introduced is now pending in the Judiciary Committee and under consideration by a subcommittee of which the senior Senator from Iowa [Mr. CUMMINS] is chairman. This morning I delivered to the Senator from Iowa a letter explaining why I think it necessary to proceed with the legislation, and in order that my colleagues may have an opportunity to see the precedents and what I have stated, I ask unanimous consent that the letter may be published in the RECORD in 8-point type.

There being no objection, the letter was ordered to be printed in the RECORD in 8-point type, as follows:

AUGUST 11, 1922.

Hon. ALBERT B. CUMMINS,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I see in the press that the President has entered into a claims agreement with Germany under which mixed commissioners will be appointed to adjudicate the claims of the United States and its citizens specified therein and that the claims agreement will not be submitted to the Senate for its advice and consent thereto as Article VII thereof provides:

"The present agreement shall come into force on the date of its signature."

I have been aware of this suggested course for the past few days. While I have not had the opportunity for an exhaustive search into the matter, I have given it careful thought and I am satisfied that the following should be brought to your immediate attention:

I wish to say at the outset that I do not believe any precedent exists in our history which may be termed applicable to the present situation. Presumably the President has relied on the fact that representatives of the State Department have at divers times in the past entered into certain agreements for the adjustment of claims of American citizens against foreign governments, which agreements were not submitted to the Senate for its ratification.

Passing over the question whether in general such agreements are binding upon this Nation in the absence of the Senate's confirmation, I wish to point out that usually such agreements have covered only pecuniary claims of individuals arising in times of peace, have met with the approval of the claimant, and have involved no obligation on the part of the United States other than the relinquishment of the claim. President Buchanan, in submitting the claims agreement with Venezuela, signed January 14, 1859, to the Senate, said:

"Usually it is not deemed necessary to consult the Senate in regard to similar instruments relating to private claims of small amount when the aggrieved parties are satisfied with their terms."

The principal executive agreements involving more than one claim that have come to my attention are: The agreement with Spain of February 11–12, 1871, for the adjustment of certain claims of citizens of the United States on account of wrongs and injuries committed by authorities of Spain in the island of Cuba; the agreement with Venezuela of February 17, 1903, for the adjustment of all claims owned by citizens of the United

States against Venezuela which had not at that time been settled by diplomatic agreement or by arbitration; and the protocol with China of September 7, 1901, for the adjustment of claims growing out of the so-called Boxer troubles of 1900. No President, to my knowledge, has ever entered into such an agreement providing for the adjudication of claims arising out of war. Perhaps this is due to the fact that the President, with but a few nominal exceptions, has never entered into an agreement for the adjustment of a private claim of a foreigner against the United States without securing the approval of the Senate, but I think that it is chiefly because the settlement of war claims is necessarily part and parcel with the treaty of peace which, of course, under our Constitution, must be submitted to the Senate for its advice and consent.

For discussion on the foregoing, I respectfully refer you to Digest of International Law, by John B. Moore, volume 5, page 210; Treaties, Their Making and Enforcement, by Samuel B. Crandall, second edition, page 108; The Treaty Making Powers Under the Constitution, by John W. Foster, Yale Law Journal, December, 1901; Treaties and Executive Agreements, by John B. Moore, Political Science Quarterly, September, 1905; and International Agreements Without the Advice and Consent of the Senate, by James F. Barnett, Yale Law Review, November and December, 1905.

An examination of the agreements made in relation to private claims against foreign governments discloses that the practice of their submission or nonsubmission to the Senate has not been uniform. I am inclosing for your information a list, as presented to the Senate by Senator LODGE on February 14, 1905, of 44 arbitration treaties and conventions submitted to and acted upon by the Senate and of 12 arbitration agreements not referred to the Senate. While this list covers only arbitration agreements, I presume it indicates the existing numerical proportion of treaties and conventions which the Senate has acted upon relative to the settlement or arbitration of claims, as compared to those which have not been submitted to it.

However, as I said before, I do not think that we can rely upon precedents in the present situation for, needless to say, in none of these cases, even those submitted to the Senate, were there involved American claims running into hundreds of millions of dollars, secured by approximately $346,000,000 worth of collateral.

Assuming that the President enjoys authority to negotiate executive agreements under usual circumstances, I am doubtful if he has such authority at the present time with respect to the claims of our Nation and its citizens against the former enemy governments.

It is impossible to divorce the disposition of the enemy property held by the Alien Property Custodian and the settlement of claims of our citizens against the former enemy governments.

Congress in enacting the "trading with the enemy act" specifically provided in section 12 thereof that "any claim of an enemy or ally of enemy to any money or other property received and held by the Alien Property Custodian or deposited in the United States Treasury shall be settled as Congress shall direct." While this congressional reservation refers to the claims of the former owners of the property concerned, its purpose was to insure the retention of such property as a pledge for the satisfaction of such claims of our citizens as might arise during the war in case Congress determined to so apply it. The inseparable connection between the disposition of enemy property and the settlement of such claims is further apparent from the consideration given these two subjects in the treaties of Versailles, Trianon, and St. Germain-en-Laye, the pertinent section of the first-named treaty being section 4, part 10, from which I quote the following:

"ARTICLE 297. '(h) Except in cases where, by application of paragraph (f), restitutions in specie have been made, the net proceeds of sales of enemy property, rights, or interests wherever situated, carried out either by virtue of war legislation or by application of this article, and in general all cash assets of enemies, shall be dealt with as follows:

"'(1) As regards powers adopting section 3 and the annex thereto, the said proceeds and cash assets shall be credited to the power of which the owner is a national, through the clearing office established thereunder; and credit balance in favor of Germany resulting therefrom shall be dealt with as provided in article 243.

"'(2) As regards powers not adopting section 3 and the annex thereto, the proceeds of the property, rights, and interests, and the cash assets of the nationals of allied or associated powers held by Germany shall be paid immediately to the person entitled thereto or to his Government; the proceeds of the property, rights, and interests and the cash assets of German nationals received by an allied or associated power shall be subject to disposal by such power in accordance with its laws and regulations and may be applied in payment of the claims and debts defined by this article or paragraph 4 of the annex hereto. Any property, rights, and interests or proceeds thereof or cash assets not used as above provided may be retained by the said allied or associated power and if retained the cash value thereof shall be dealt with as provided in article 243.'" * * *

Of course, in those treaties it was assumed that the various claims set forth as reparations claims would be taken care of through the Reparations Commission. However, as such treaties confirmed to the United States the right to dispose of enemy property as it saw fit, there can be no objection to the enforcement of reparations claims against enemy property if the Congress should so elect.

When the Congress passed the joint resolution declaring war to be at an end, which was approved by the President on July 2, 1921, it carefully reserved to itself all of the rights as to the ultimate disposition of enemy property that it had specified in the "trading with the enemy act" and which had been confirmed to it by the treaties of Versailles, Trianon, and St. Germain-en-Laye. Section 5 of that resolution provides that all such property should be "retained by the United States of America and no disposition thereof made except as shall have been heretofore or specifically hereafter shall be provided by law until such time as the Imperial German Government and the Imperial and Royal Austro-Hungarian Government, or their successor or successors, shall have respectively made suitable provision for the satisfaction of all claims against said Governments," as specified therein, and shall have complied with the other conditions therein set forth.

This section of the joint resolution was incorporated in the separate treaties of peace with Germany, Austria, and Hungary, and it was stipulated in each of said treaties of peace, respectively, that while the United States was privileged to participate in the Reparations Commission and in any other commission established under the treaties of Versailles, St. Germain-en-Laye, and Trianon, or any agreements supplemental thereto, the United States was not bound to participate in any such commission unless it so elected. Nevertheless, the Senate in ratifying each of these treaties of peace reserved for legislation by the Congress the matter of the disposal of enemy property and the adjustment of the claims of the United States and its citizens by ratifying such treaties subject to the following understanding:

"That the United States shall not be represented or participate in any body, agency, or commission, nor shall any person represent the United States as a member of any body, agency, or commission in which the United States is authorized to participate by this treaty unless and until an act of the Congress of the United States shall provide for such representation or participation; * * * that the rights and advantages which the United States is entitled to have and enjoy under this treaty embrace the rights and advantages of nationals of the United States specified in the joint resolution or in the provisions of the treaty of Versailles to which this treaty refers."

To summarize: Both branches of Congress by their action on the "trading with the enemy act" reserved to the Congress the ultimate disposition of enemy property, and by the joint resolution reasserted their legislative authority over that subject; the Senate by the exercise of its treaty power has since reaffirmed these reservations of the "trading with the enemy act" and the joint resolution with an express proviso that, except pursuant to an act of the Congress, no representative of the United States should sit on any body, agency, or commission dealing with matters covered by the separate treaties of peace.

Therefore if the adjustment of these American claims, so intimately connected with the disposition of enemy property, is arranged by a purely executive agreement it is hardly necessary to point out the possibility that the Congress, when it comes to dispose of enemy property, may reopen the entire matter of the adjustment of American claims.

In concluding I wish to emphasize that any such difficulty will be obviated by the passage of the bill I have introduced providing for a commission composed solely of American citizens to adjudicate such claims. The commission would have jurisdiction to hear all claims against Germany, Austria, and Hungary and does not contemplate a special commission to hear such claims as may be presented against each of those nations respectively. Further, this bill enables the Congress at one time to enact legislation not only caring for American claims but also providing for the ultimate disposition of the enemy

properties. I take this opportunity of respectfully urging that you give the bill your favorable consideration.

Very truly yours,

O. W. UNDERWOOD.

EXCERPT FROM AN ARTICLE ENTITLED "CONSTITUTIONAL METHODS OF MAKING AND RATIFYING TREATIES IN CERTAIN FOREIGN COUNTRIES, AND ALSO LIST OF ARBITRATION TREATIES AND CONVENTIONS SUBMITTED TO AND ACTED UPON BY THE SENATE," PRESENTED IN THE SENATE FEBRUARY 14, 1905, BY SENATOR LODGE AND PRINTED AS SENATE DOCUMENT NO. 158, FIFTY-EIGHTH CONGRESS, THIRD SESSION.

List of arbitration treaties and conventions submitted to and acted upon by the Senate:

1. With Chile: For arbitration of the "Macedonian" claims. Concluded November 10, 1858; ratified by Senate March 8, 1859; proclaimed December 22, 1859.

2. With Chile: Submitting claims of United States citizens to a commission. Concluded August 7, 1892; ratified by Senate December 8, 1892; proclaimed January 28, 1893.

3. With Chile: Reviving convention of 1892. Concluded May 24, 1897; ratified February 28, 1899; proclaimed March 12, 1900.

4. With China: Referring claims of the United States to a commission. Concluded November 8, 1858; ratified by Senate March 1, 1859; ratified by President March 3, 1859.

5. With Colombia: Referring claims to a commission. Concluded September 10, 1857; ratified by Senate with amendments March 8, 1859; proclaimed November 8, 1860.

6. With Colombia: Extending foregoing treaty and providing for a new commission. Concluded February 10, 1864; ratified by Senate June 10, 1864; proclaimed August 19, 1865.

7. With Costa Rica: Referring United States claims to a commission. Concluded July 2, 1860; ratified by Senate January 16, 1861; proclaimed November 11, 1861.

8. With Denmark: Referring claim of Carlos Butterfield & Co. to arbitration. Concluded December 6, 1888; ratified by Senate February 11, 1889; proclaimed May 24, 1889.

9. With Ecuador: Referring United States claims to a commission of two members and an arbitrator. Concluded November 25, 1862; ratified by Senate January 28, 1863; proclaimed September 8, 1864.

10. With Ecuador: Submitting claim of Julio R. Santos to arbitration. Concluded February 28, 1893; ratified by Senate September 11, 1893; proclaimed November 7, 1894.

11. With France: Referring claims of United States citizens and French citizens to a commission of three. Concluded January 15, 1880; ratified by Senate March 29, 1880; proclaimed June 25, 1880. (The term of the claims commission constituted by the foregoing treaty was extended twice by special convention, first in 1882, and the second time in 1893, on the latter occasion with a Senate amendment.)

12. With Great Britain: The "Jay treaty." Concluded November 19, 1794; ratified with an amendment not affecting the arbitration clause June 24, 1795; proclaimed February 29, 1796. In Articles VI and VII certain claims were referred to a commission.

13. With Great Britain: The commission constituted by Article VII of the Jay treaty was continued by special treaty ratified and proclaimed in 1802.

14. With Great Britain: The treaty of Ghent. Concluded December 24, 1814; ratified by Senate and ratifications exchanged at Washington February 17, 1815; proclaimed February 18, 1815. In Article IV of this treaty certain boundary questions are referred to a commission and for final settlement to a friendly sovereign or State acting as arbitrator.

15. With Great Britain: Convention respecting fisheries, boundary, and restoration of slaves. Concluded October 20, 1818; ratified by Senate January 25, 1819; proclaimed January 30, 1819. In Article V of this treaty certain claims are referred to arbitration.

16. With Great Britain: Referring claims of American and British citizens to a commission. Concluded February 8, 1853; ratified by Senate March 15, 1853; proclaimed August 20, 1853. (The commission constituted by the foregoing convention was extended by special treaty proclaimed in 1854.)

17. With Great Britain: Convention relative to the northeastern boundary, referring the question to arbitration. Concluded September 29, 1827; ratified by the Senate January 14, 1828; proclaimed May 15, 1828.

18. With Great Britain: Convention for the settlement of claims to be referred to a commission. Concluded February 8, 1853; ratified by the Senate March 15, 1853; proclaimed August 20, 1853.

19. With Great Britain: Reciprocity treaty as to fisheries, duties, and navigation. Article I provided that certain fishery disputes should be referred to a commission. Concluded June 5, 1854; ratified by the Senate August 2, 1854; proclaimed September 11, 1854.

20. With Great Britain: Referring claims of the Hudson Bay Co. and the Puget Sound Agricultural Co. against the United State to a commission. Concluded July 1, 1863; ratified by Senate January 18, 1864; proclaimed March 5, 1864.

21. With Great Britain: Referring *Alabama* claims to a tribunal and referring Civil War claims to a commission. Concluded May 8, 1871; ratified by Senate May 24, 1871; proclaimed July 4, 1871.

22. With Great Britain: Referring question of fur seals in Bering Sea to arbitration. Concluded February 29, 1892; ratified by Senate March 29, 1892; proclaimed May 9, 1892.

23. With Great Britain: Referring Bering Sea claims to a commission. Concluded February 8, 1896; ratified with amendments by Senate April 15, 1896; proclaimed June 11, 1896.

24. With Great Britain: General arbitration treaty. Concluded January 11, 1897; amended and finally rejected by Senate May 5, 1897.

25. With Great Britain: Referring Alaskan boundary disagreement to a tribunal. Concluded January 24, 1903; ratified by Senate February 11, 1903; proclaimed March 3, 1903.

26. With Congo: Article XIII of this treaty refers any disputes concerning the terms of the treaty to arbitration. Concluded January 24, 1891; ratified by Senate January 11, 1892; proclaimed April 2, 1892.

27. With Mexico: Referring claims of United States citizens to a commission of four members and an umpire. Concluded April 11, 1839; ratified by Senate March 17, 1840; proclaimed April 8, 1840.

28. With Mexico: Article XXI of this treaty provides for the reference of future disagreements to arbitration. Concluded February 2, 1848; ratified by Senate with amendments not affecting arbitration article March 10, 1848; proclaimed July 4, 1848. (The foregoing reaffirmed in Article VII of the Gadsden treaty ratified by Senate with amendments not affecting article and proclaimed in 1854.)

29. With Mexico: Referring claims of both countries to a commission of two members and an umpire. Concluded July 4, 1868; ratified by Senate July 25, 1868; proclaimed February 1, 1869. (The foregoing convention was extended four times by special treaty—in 1871, 1872, 1874, and 1876.)

30. With Mexico: Referring boundary disputes to a commission. Concluded July 29, 1882; ratified by Senate August 8, 1882; proclaimed March 5, 1883. (The commission provided in the foregoing treaty was extended twice—in 1885 and 1889.)

31. With Mexico: Referring all future boundary disputes to a commission. Concluded March 1, 1889; ratified by Senate May 7, 1890; proclaimed December 26, 1890. (This treaty was extended six times—in 1894, 1895, 1896, 1897, 1898, and 1900.)

32. With Paraguay: Referring claim of the United States & Paraguay Navigation Co. against Paraguay to a commission. Concluded February 4, 1859; ratified by Senate February 16, 1860; proclaimed March 12, 1860.

33. With Peru: Referring claims of Peru against United States to an arbitrator. Concluded December 20, 1862; ratified by Senate February 18, 1863; proclaimed May 19, 1863.

34. With Peru: Referring claims of United States and Peru to a commission of five. Concluded January 12, 1863; ratified by Senate, with amendment, February 18, 1863; proclaimed May 19, 1863.

35. With Peru: Referring claims of the United States and Peru to two commissioners and two umpires. Concluded December 4, 1868; ratified by Senate April 15, 1869; proclaimed July 6, 1869.

36. With Portugal: Referring *General Armstrong* claim to an arbitrator. Concluded February 26, 1851; ratified by Senate March 7, 1851; proclaimed September 1, 1851.

37. (With Samoa:) Treaty with Germany and Great Britain referring Samoan disputes to arbitration. Concluded November 7, 1899; ratified by Senate February 21, 1900; proclaimed March 8, 1900.

38. With Spain: Treaty of friendship, limits, and navigation. Concluded October 27, 1795; ratified by the Senate March 3, 1796; proclaimed August 2, 1796. Under article 21 of this treaty claims were referred to a commission.

39. With Spain: Referring claims for indemnity to a commission. Concluded August 11, 1800; ratified by Senate January 9, 1804; proclaimed December 22, 1818.

40. With Texas: Referring boundary question to a commission. Concluded April 25, 1838; ratified by Senate May 10, 1838; proclaimed October 13, 1838.

41. With Venezuela: Referring claims of United States citizens to a commission of two members and an umpire. Con-

cluded April 25, 1866; ratified by Senate July 5, 1866; proclaimed May 29, 1867.

42. With Venezuela: Constituting a commission to reopen and decide awards under treaty of 1866. Concluded December 5, 1885; ratified by Senate, with amendments, April 15, 1886; proclaimed June 4, 1889. (The foregoing was supplemented by a treaty ratified June 18, 1888, explanatory of its terms, and by a treaty ratified December 5, 1888, extending the time for its ratification.)

43. With Venezuela: Referring the claim of the Venezuelan Steam Transportation Co. against Venezuela to commission of two members and an umpire. Concluded January 19, 1892; ratified by Senate March 17, 1892; proclaimed July 30, 1894.

44. General: Hague convention for pacific settlement of international disputes. Concluded July 29, 1899; ratified by Senate February 5, 1900; proclaimed November 1, 1901.

By this list, excluding those ratified on Saturday, February 11, it appears that 44 general and particular arbitration treaties, or arbitration articles in treaties containing other provisions, have been submitted to the Senate; of these 44 treaties 43 have been ratified and 1 rejected. Of the 43 ratified, 6 have been ratified with amendments and 37 without amendments.

LIST OF ARBITRATION AGREEMENTS NOT REFERRED TO THE SENATE.

With Brazil: Referring "Canada" claim to an arbitrator. Signed March 14, 1870.

With Colombia: Referring the "Montijo" claims to arbitrators. Signed August 17, 1874.

With Dominican Republic: Referring claim of improvement company to a tribunal. Signed January 31, 1903.

With Guatemala: Private claims. Signed February 23, 1900.

With Haiti: Referring two private claims to an arbitrator. Signed May 28, 1884 (The term of this protocol was extended by an additional protocol signed March 20, 1885.) Submitting a private claim to an arbitrator; signed May 24, 1888. Submitting a claim to arbitration; signed October 18, 1899.

With Mexico: Private claims; signed March 2, 1897. Pius fund; referred to the Hague tribunal; signed May 22, 1902.

With Nicaragua: Private claims; signed March 22, 1900.

With Peru: Private claims; signed May 17, 1898.

With Russia: Submitting claims for detention of American schooners to arbitration; signed August 22 and September 8, 1900.

With Salvador: Private claims; signed December 19, 1901.

With Spain: Agreement for the settlement of claims of Americans for injuries committed by Spanish authorities in Cuba; concluded February 11–12, 1871.

With Venezuela: Private claims; signed February 17, 1903.

Mr. UNDERWOOD subsequently said:

This morning soon after the assembling of the Senate I asked unanimous consent for the printing of a letter in the RECORD, which was granted. I ask now that a letter which I have from Mr. William C. Armstrong, of the firm of Beekman, Menken & Griscom, of New York, in regard to the same subject, may be printed in connection with the other letter, all in eight-point type.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered, as requested by the Senator from Alabama.

The letter is as follows:

NEW YORK, *August 11, 1922.*

Hon. OSCAR W. UNDERWOOD,
United States Senate, Washington, D. C.

DEAR SIR: As the attorney for the surviving dependent children of an American drowned on the *Lusitania* I have read with great interest and amazement the agreement signed yesterday in Berlin on behalf of our Government and published in this morning's newspapers.

It is evident that the Executive does not wish this agreement to be regarded as a treaty, and that he expects to appoint commissioners under the treaty, who need not be confirmed by the Senate, and to proceed quite independently of Congress. Had an act of this character been taken by the last President, cries of tyranny and usurpation would have filled the country. You will, of course, have noticed that this apparently harmless agreement amounts to the abandonment by the United States of claims amounting to many millions for reparations, which Germany agreed to pay in those portions of the treaty of Versailles, which were included in the Berlin treaty. Of course, the agreement does not state that these claims are abandoned, but this commission has no authority to fix the amount of those claims. Knowing that a new treaty which made no provision for fixing the amount of those claims would not be ratified by the Senate, the Government is apparently attempting to give the rights away without the Senate's consent. It is no wonder that Germany is willing that two out of three members of the commission should be American citizens.

I take it that the reparations granted to the United States by the Berlin treaty are vested in the United States, and that those vested rights can not be divested except by the consent of Congress. Senators Knox and MCCUMBER took that position on August 19, 1919, when President Wilson was asked if he had abandoned our claim for reparations. He said, "I left that question open, Senator, because I did not feel that I had any final right to decide it."

The Berlin treaty, Article II, provides as follows: "That the rights and advantages stipulated in that treaty for the benefit of the United States which it is intended the United States shall have and enjoy are those defined in Section I of part 4 and parts 5, 6, 8, 9, 10, 11, 12, 14, and 15."

The agreement states that "The commission shall pass upon the following categories of claims which are more particularly defined in the treaty of August 25, 1921, and in the treaty of Versailles."

An examination of the claims which are to be passed upon by the commission shows that they are very strictly limited. The claims in respect of property of American citizens which was in Germany and for debts owing to American citizens by the German Government or by German nationals is provided for, and these claims are to be fixed by the commission.

The only other matter which the commission can consider is "Claims for loss or damage to which the United States or its nationals have been subjected with respect to injuries to persons, or to property rights * * * since July 31, 1914, as a consequence of the war." I most respectfully submit that the surviving dependents of an American citizen drowned on the *Lusitania* could not under any circumstances bring themselves within the above definition. You will observe that no mention is made of death claims or of the claims of anyone who is not personally injured. This is not an unintentional omission but is an absolute departure from the language of the treaty of Versailles.

The treaty of Versailles, which is actually part of the treaty of Berlin, provides as follows: "Claims growing out of acts committed by the German Government or by any German authorities since July 31, 1914, and before that allied or associated power entered into the war." (Article 298, annex, paragraph 4.) And it further provided "Compensation may be claimed from Germany under article 232 in respect of the total damage under the following categories: (1) Damage to injured persons and to surviving dependents by personal injury to or death of civilians caused by acts of war, including bombardments or other attacks on land, on sea, or from the air, and all the direct consequences thereof, and of all operations of war by the two groups of belligerents wherever arising." (Article 232, annex 1.) These two clauses cover pre-war and war claims.

This language is plain and clear and it is quite evident that the surviving dependents of Americans could establish a claim thereunder. It seems proper to inquire why this language has been abandoned and a new class of claims created.

It is well recognized in law that death claims for dependents are purely statutory and our only right to assert a claim against Germany depends upon the terms of the treaty which specifically grants such right to surviving dependents of Americans. We do not believe that Justice Day, who is mentioned as a member of the commission, would permit the commission to fix the amount of death claims under the agreement in question. At any rate, American rights are endangered thereby.

Aside from this point, we would call your attention to the fact that every other claim to which the United States is entitled under part 8, section 1, article 232, annex 1, of the Treaty of Versailles, is abandoned. These claims are all provided for in section 29(a) 2, 3, 4, 5, and 6 and section 29(c) 1, 2, 3, 4, and 5 of your proposed bill. The administration has therefore apparently decided that the only claims that it will make against Germany are for property damage on account of property seized in Germany for the collection of ordinary civil debts due to American citizens and for injuries to the person or property of American citizens. We believe that you will agree with us that this is not only untenable but illegal.

Furthermore, unless the creation of the commission in question was provided for by the Berlin or Versailles treaties, the Government had no power to create it. The Versailles treaty seems to provide that the amount of the claims for pre-war damages shall be assessed by an arbitrator appointed by the mixed arbitral tribunal provided for in section 6 of part 10. The amount of reparations was to be determined by the Reparation Commission under the treaty of Versailles, but under article 2, paragraph 4, of the Berlin treaty it was provided

that the United States was not bound to participate in the Reparation Commission, so that it would seem that an American commission could legally be appointed to adjudicate reparations claims, even if pre-war claims, such as the *Lusitania*, have to be determined by an arbitrator.

As the proposed commission set up by the agreement of August 10, 1922, is not created by the Berlin treaty, and is not appointed either by Gustave Ador or by the mixed arbitral tribunal, there is no authority for its creation contained in any existing treaty with Germany.

There would seem to be no objection to having the amount of all the claims which we are entitled to under the Versailles treaty, both by way of reparations and on account of pre-war claims, fixed by a mixed commission such as has been agreed upon, but we certainly hope that you will continue your efforts to have the Congress finally determine its policy as to the disposition of the funds in the hands of the Alien Property Custodian. It will take some years for the amount of the claims to be determined. The Germans will, undoubtedly, be glad to allow the matter to rest at present and in the meantime, by means of the Winslow resolution and other future bills, to attempt to slowly recover as much of the property now held as possible. We sincerely hope that you will see your way clear to forcing action in Congress whereby the Alien Property Custodian will be directed to hold all of the property seized from Germans now in his possession until all the American claims have been finally fixed, and further provide that after they have been fixed and after Germany has been given a reasonable opportunity to satisfy the same that the property in question be used for the payment of claims in the event that Germany fails to pay.

The State Department, in a letter to me under date of June 3, 1922, said that "the final disposition of property now in the possession of the Alien Property Custodian of the United States is under existing law a matter for the determination of Congress."

There is no doubt as to that matter, and we sincerely believe that this is the time for Congress to decide the question definitely and finally.

It may be that the State Department intended to permit American death claims to be considered by the commission, although it undoubtedly intended to exclude every other kind of claim; but the State Department admits that it knows of no provision for the payment of the claims by Germany, and it certainly is necessary for us to hold all the property pledged for the payment of these claims until such provision is made by Germany.

If Germany knows that none of its citizens can recover any of the property seized from them by the United States during the war until after the American claims have been fixed and paid, the work of the commission will undoubtedly proceed very rapidly. Otherwise we may expect the fixing of the claims and their payment to be extended interminably. It seems important to inquire what Chancellor Wirth meant when he said in his letter to the American ambassador, "The German Government is convinced of the intention of the American Government to carry out in an accommodating and just manner the settlement of the questions still to be solved between the two States concerned, the way to which is opened by the signature of the agreement. It is still further strengthened in this belief by the assurances received by your excellency." What assurances have been given to the American ambassador by the State Department?

Very respectfully yours,

WILLIAM C. ARMSTRONG.

CONDITIONS IN ARMENIA.

Mr. STERLING. I ask unanimous consent to present a petition from citizens of Mitchell, S. Dak., praying that the Government of the United States take the necessary steps to stop the massacre of Armenians and other Christian people by the Turks. I ask that the petition may be referred to the Committee on Foreign Relations and that the body of the petition, without the names, be printed in the RECORD.

There being no objection, the petition was referred to the Committee on Foreign Relations and the body of the petition was ordered to be printed in the RECORD, as follows:

PETITION.

We, the undersigned, residents and citizens of Mitchell, S. Dak., hereby respectfully petition that the Government of the United States take the necessary steps to stop the massacre of Armenian and other Christian people by the Turks and that each of you do all in your power to accomplish this result.

Dated this 31st day of July, 1922.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. WALSH of Montana. Mr. President, on yesterday I called attention to an article in the magazine Our World, by Agnes C. Laut, entitled "The farmers' stake abroad." It has such particular pertinency to the subject under consideration, particularly in view of the argument just made by the Senator from New York [Mr. CALDER], that I ask unanimous consent that it be printed in the RECORD in 8-point type. It is a brief article.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The article is as follows:

THE FARMERS' STAKE ABROAD—THE FARMERS OF THIS COUNTRY ARE ON AN INVOLUNTARY STRIKE—BANKRUPTCY IS THREATENED BECAUSE NATIONS THOUSANDS OF MILES AWAY CAN NOT BUY—HOW THE FARMER DEPENDS, AS NEVER BEFORE, ON EUROPE'S PROSPERITY.

[By Agnes C. Laut.]

(Miss Laut is herself a practical farmer, and she has made a study of the general economic aspects of the farmer's problem in this country. Her conclusions that the farmer is the worker most affected by the increase or decline of foreign trade are based upon her long study. The author is a journalist as well as an agriculturist. She has been the correspondent of numerous magazines and newspapers in this country and in Europe, and is the author of many books treating, for the most part, of life in the open. The rather startling statistics which she gives are taken from official reports.)

Are the farmers of the United States and Canada interested in Europe's comeback to normal? Charitably, of course, we are interested when we feed Russia and help to rehabilitate Palestine, and extend the time for repayment of loans that are war debts; but as a matter of interest to our own pocketbooks and daily incomes can we stand back self-sustained and self-sustaining, and let Europe stew through her own muss? If we do let Europe go her way to destruction, will it come back on us, so that we shall be no longer self-sustained and self-contained?

A hundred years ago the answer would have been simple, for 87 per cent of America's population gained their living direct from land. Europe could rock to the panic from the aftermath of the Napoleonic wars. What was that to us? Our people fed themselves directly from the soil. Currency might be inflated or deflated. The American farmer didn't see enough of it to make much difference. The banker might worry. The farmer didn't; he built his house from the timber on his own place. He clothed his family from the wool sheared from his own sheep, or the cotton grown on a southern plantation. Beef and pork were home grown and home cured. So were all cereal foods. So were footwear and harness, for the local tanner dressed the leather and the local cobbler came once a year to each home to make shoes and harness for the family. Dairy products were homemade and home consumed. The world might rock; and the United States could say, "Let her rock. We're safe from European entanglements. If they like to make themselves a spiked shirt of soldiers' bayonets, let them wear it. We won't. Let them worry it out. It's their mess, not ours."

All this roughly expresses the economic sentiment of the entire country a hundred years ago. Indeed, astonishing as it may seem, it roughly expresses the economic sentiment of a great many people to-day. They say: "The United States consumes nine-tenths of all it produces. Let us lessen production all round by 15 per cent to be safe, as was recommended by the agricultural conference in Washington, and stand back from European complications, as the fathers of the Constitution advised us. This propaganda for messing into European finance is all a device of the international bankers to pull themselves out of a hole. What are international bankers to us? Let us stand back, look out for ourselves. Safety first; and the international bankers may hoist themselves with their own bootstraps."

The fact ignored in this attitude of mind is that the United States to-day are not the United States of a hundred years ago. To-day only 33 per cent of our population are on land and 67 per cent make their living directly or indirectly from trade. The local tanner, the local cobbler, the local gristmill run by the village waterfall have removed far and wide to great centralized mills. The textile mills are in the South, in Massachusetts, in Rhode Island. The shoe and harness industries are in Massachusetts, in New Jersey, and in Middle Western States. The big flour mills are chiefly in Minneapolis and Buffalo. The home-cured meats are now cured in Chicago and Omaha and Kansas City. The lumber for the home builder comes from the South or the Pacific coast. All industry is centralized, and machine power—tractor, motor, binder,

reaper, thresher—has supplanted old hand toil and increased the farm output far beyond local consumption. With only a third of the people on the land, we not only feed ourselves but half the world. We not only feed our own mills with their supplies of raw material but feed the mills of England, Ireland, Germany, Austria, Belgium, and France with supplies of raw material.

True, we use 90 per cent of all we produce, but if the 10 per cent back up unsold we are in the position of the irrigation farmer when a small plug blocks his main water ditch and backs up a flood on his field that drowns prosperity. Also if Europe stops buying from our mills our mills can't buy all we have to sell them. Then not 10 per cent backs up on the farmer unsold but 50 per cent. Prices bréak below cost, as they did last year, when 10 hides could not be sold for enough to buy a farmer's pair of top boots; and wool ate its head off in storage without buyers, though wool suits cost $75 each; and corn and oats had to be burned as fuel, because their price was cheaper than coal. And this because Europe was not buying freely.

In a word, the astounding fact is that the farmer supplies in raw or manufactured form over one-half of all our exports. He supplies 36 per cent of all material for manufacture. He buys over 46 per cent of all manufactured goods. When Europe slacked buying, the farmer saw half his produce on the point of backing up on him. When the home factories stopped selling to Europe, the farmer saw another 36 per cent of his selling market backing up on him. When the employed factory people began cutting their purchases down to economize, wheat slumped in Alberta and Montana and Kansas. Milk prices fell from a high of 10 cents and 9 cents a quart to 3 cents and 4 cents in the East and as low as 1 cent in the West; condensed milk could not be sold abroad at any price, and glutted European ports. The prices of dairy cows fell from $200 a head to $80 and $50 in a year.

These are not arguments; they are facts that hit every living soul in the United States in the face last year, whether butcher, or baker, or candlestick maker, banker, or destitute pioneer storekeeper, small farmer, or city consumer, who is usually "the goat," though he does not always realize it. Is the farmer interested in Europe's comeback? Well, is he? He is more than interested. He will be tied up in bowknots of bankruptcy till Europe does come back. And the farmer in America represents seventy-eight billions cash investment in land, buildings, machinery, live stock.

This cash investment represents three times our war debt, almost eleven times all the money invested in oil in America, about nine times all the money invested in railroads, about nine times all the money invested in street cars and allied utilities. In 1919 the farmer turned out $23,000,000,000 of consumable goods. He provided half the export trade, over a third of all that factories use, and he bought more than two-fifths of all that factories sell. In 1920 the farmers held in loans and credits from the banks almost $4,000,000,000—a bigger sum than our largest gold reserve.

Look back over that list for a moment. Is there a single line of life in the country unhurt when the farmer is hurt? When prices slumped for farmers in the West last year, schools had to be closed because the farmers could not pay taxes. Doctors could not collect their fees. Clergymen could not be paid; and in the wheat areas from Montana and the Dakotas to Oklahoma there were failures among little local banks at the rate of two a day for a hundred days—this outside North Dakota's Nonpartisan League ventures.

I recall a couple of years before the war I was the guest of one of the great sheep kings of the Southwest. The opening of Panama had created a new interest in the American merchant marine, which at that time, as far as foreign trade was concerned, had dwindled to carrying less than 8 per cent of American commerce. I asked the sheep king if he was interested in the expansion of America's foreign trade.

He answered like a bomb, "No; I am not. I'm against this tangling up in foreign trade. Let the foreign nations be our carriers and hewers. We'll pay them for their service; but let us remain a great nation to ourselves and by ourselves."

When the war came that man's wool sold for from 56 cents to 75 cents. It used to sell at 18 cents. When Europe suddenly stopped buying he had expanded his ranches and herds and could not sell his wool at any price. Only the banks saved him from having his entire life work and life savings swept away.

The day the war broke out a Chicago packer, who began life as a partner of Armour, was a visitor in my home. He had made a fortune in pork and wheat.

"Do you think America should mix in with Europe financially?" I asked.

"I do not," he said. "Let us mind our own business and keep to ourselves!"

He died during the war. What would he say to-day, I wonder, if he pondered the figures? When Europe stopped buying in 1921, exports of beef fell from nearly 90,000,000 pounds in 1920 to 10,500,000 pounds in 1921, canned beef from 24,000,000 pounds to 6,000,000 pounds, and prices to the farmer from $70 and $50 to $3 and $1.

Before the war the great obstacle to the restoration of the merchant marine was the indifference of the Senators and Congressmen from the farm constituencies of the Middle West. When the subject came up there would not be a quorum in the House. I recall one case where the Senate dwindled to nine Members in their seats, the House to six.

That is changed now. At the agricultural conference the farmers went on record unanimously as believing that foremost among the remedies for the paralysis of agriculture were: (1) Resumption of foreign trade, (2) refunding of war debts, (3) the building up of an American merchant marine, and (4) most astounding of all, if necessary, a ship subsidy, which last had formerly been anathema to all sons of the soil.

One has only to take a quick glance at the basic farm products to see where the farmer stands on Europe's comeback.

Cotton first. Often America supplies 60 per cent of the foreign world's cotton needs. Always she supplies at least half of the foreign world's needs. That touches every Southern State from Georgia to Texas. Cotton exports fell off three-quarters of a billion pounds between 1920 and 1921. Of the exports of cotton, one-third usually goes to English mills, two-thirds to continental mills. What caused the falling off in exports? Paralysis of Europe's buying power. If Europe were buying all the cotton she needs for her mills now closed the South would be humming with the prosperity of war prices for cotton.

Take grains next. Before the war—as you will find if you will read the agricultural reports from 1908 to 1913—Europe required 500,000,000 bushels of outside wheat. Russia was the great supply granary for Germany. Russia is off the map. So is Rumania for a year, for she has just placed an embargo on all exports of wheat to insure food enough for herself. Argentina, India, and Australia have never supplied more than half this shortage. Cut off this avenue of foreign sales for wheat by the paralysis of Europe's buying power, and you cramp the prosperity of every wheat area from Texas and California to Manitoba and Alberta. After the slump of exchange in July and August, farmers in the Far West were receiving 80 cents to 60 cents for their wheat. As exchange improved wheat went out 170,000,000 more bushels than the preceding year, and the price went up to the farmer from 60 cents and 80 cents to $1.40. Unfortunately the most of the wheat had already been sold by the hard-pressed farmers, so that the benefit went to the pocket of the speculator, but the fact of improved European conditions sending the prices up 40 cents a bushel proves that the farmer is interested in Europe's comeback. While Europe was literally starving to death for plain, old-fashioned oatmeal in the winter of 1921–22, oats were selling from Winnipeg to Peace River and St. Paul to Montana at from 32 cents to 18 cents. Why? Paralysis of Europe's buying power. Oat exports had fallen off as between 1921 and 1920 nearly 30,000,000 bushels, as between 1921 and 1918 92,000,000 bushels; and the difference to the farmer was as from 18 cents and 28 cents a bushel and 60 cents and $1.25. Is the oat farmer interested in Europe's comeback?

Take meat products next. The total falling off in exports of meat products of all kinds—beef, oleo, bacon, ham—as between 1921 and 1920 was 400,000,000 pounds; as between 1920 and 1919, a billion and a half pounds; and cattle values fell from $50 and $90 net to the farmer to $3 and $1, less than the feed for five days. Why? Paralysis of Europe's buying power.

Take dairy products next. Exports of butter, cheese, and condensed milk fell off from 2,643,000,000 pounds in 1919 to 330,000,000 pounds in 1921, nearly seven-eighths; and values of dairy cattle fell from $200 and $150 to $80 and $50. Said one of the best dairy farmers in the East to me: "I never dropped so much money so suddenly without cause in all my life. Two years ago my herd cost me $20,000. I've just sold it by auction for $2,500; and that loss takes no account of labor and feed. The funny thing was, my herd produced as much as ever; but milk returns went down from 8 cents and 9 cents to 3 cents and 1 cent, and the value was no longer in the herd." Why? Paralysis of Europe's buying power.

Hides have been burned in the West this year from Alberta to New Mexico because they could not be sold. Wool is eating

its head off in storage and interest charges, and the values of lambs and sheep have fallen from half to two-thirds.

In 1921, as brought out in the agricultural conference, only 10 per cent of the farmers paid costs of operation, and their returns were only 3 per cent on the outlay. Farm earnings in 1920–21 represented between $416 and $460 a family for each working farmer, less than any wage in the union scale of labor.

With over $78,000,000,000 invested in the farm plant of the United States, and the farm values cut from 60 per cent to 50 per cent by the paralysis of Europe's buying power, does one need to ask, Is the farmer interested in Europe's comeback?

It isn't a manufacturing problem, and it isn't an international banking problem. It is a problem on which the very financial existence of America depends. The farmer can not go back to the day when he was his own weaver, his own cobbler, his own harness maker, his own miller. His manufacturing plants have moved away from him. The wheels have to be set going so all he produces can go out to these buying plants, whether in England, Germany, Austria, or Russia.

It is that or ruin; for, as one of the members of the agricultural conference said, "The farmers are on strike. It isn't a voluntary strike. It is caused by a wrecked foreign market; and we advocate everything that can put that market back on its feet—yes; refunding of debts, cancellation, League of Nations, Genoa conference, ship subsidy, any old thing that will salvage us from total wreck."

Expressed in terms of whole milk.

BALANCE OF TRADE IN DAIRY PRODUCTS, 1913–1921.

This chart was plotted from the difference of imports and exports, and includes butter, cheese, and condensed milk only. The chart expresses these differences in terms of whole milk, assuming that 1 pound of butter equals 21 pounds of milk, 1 pound of cheese equals 10 pounds of milk, and 1 pound of condensed milk equals 2½ pounds of milk. The figures are from the Dairy Division, Bureau of Animal Industry, Department of Agriculture.

Mr. WALSH of Montana. The argument of the article is that the American farmer is suffering by reason of the collapse of the European markets. In this connection I offer for the RECORD a table prepared by the Bureau of Foreign and Domestic Commerce giving the total imports and exports for June, 1921, and June, 1922, and for the 12 months ended June, 1921, and June, 1922, showing a falling off in our exports last year of $1,300,000,000—$1,000,000,000 to Europe and $300,000,000 to South America.

Mr. SMOOT. The Senator does not claim that that is at all because of the fact that there is a duty connected with it?

Mr. WALSH of Montana. No; I claim we are making a bad matter worse by putting further obstacles in the way of our export trade.

Mr. SMOOT. I thought that was the Senator's object.

Mr. WALSH of Montana. No; I do not think it is due to the tariff to any great extent—that is, the law as it exists—but I insist that we are making a desperate situation even more critical.

Mr. SMOOT. There is some question about that, of course.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

The table is as follows:

Total values of imports and exports of merchandise by grand divisions and principal countries.

	Month of June—		12 months ended June—	
	1922	1921	1922	1921
IMPORTS FROM—

Mr. WALSH of Montana. Mr. President, the situation was somewhat desperate here day before yesterday with respect to the so-called flexible or elastic provisions of the pending tariff bill. It was perfectly well understood that the so-called agricultural or farm bloc was up in arms against the provision. It appears that quite a number of Senators who were in opposition were called to the White House and reasoned with, and the President took occasion to send to the Senate yesterday morning a letter urging that he be charged with these extraordinary powers. Touching the proceedings the Washington Post of this morning has an article headed:

Flexible tariff wins. Senate, 86 to 20, adds Harding proposal to bill. To run until July 1, 1924. President takes a hand, urging passage in a letter. Sharp modifications made of original plan—

And so forth.

Mr. President, in view of the record of the past few days, how hollow now sound the thunderous declarations we so often heard from the other side of the Chamber during the last administration about presidential usurpation and autocratic power exercised by the President. The distinguished Senator who now occupies the chair [the President pro tempore, Mr. CUMMINS in the chair] very properly, as I thought, expressed his disapproval often of what seemed unnecessary acquiescence upon this side of the Chamber to presidential suggestion, but we will understand hereafter that denunciations of that character are mere thin air and signify nothing.

Mr. SMOOT. Mr. President, as I remember, the Senator from Nevada [Mr. ODDIE], referred to by the Senator from Montana, voted against the elastic provision in the bill. So whatever was said by the President had no effect upon the Senator from Nevada. There was not very much usurpation of power; at least it did not reach very far.

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Gerry	McLean	Sheppard
Borah	Gooding	McNary	Shortridge
Bursum	Hale	Moses	Simmons
Calder	Harreld	Myers	Smith
Capper	Heflin	New	Smoot
Colt	Jones, N. Mex.	Nicholson	Stanfield
Culberson	Jones, Wash.	Norbeck	Sutherland
Cummins	Kendrick	Oddie	Trammell
Curtis	Keyes	Overman	Underwood
Dial	Lenroot	Pepper	Wadsworth
Dillingham	Lodge	Phipps	Walsh, Mont.
Edge	McCormick	Pomerene	Warren
Ernst	McCumber	Ransdell	Watson, Ga.
Frelinghuysen	McKellar	Rawson	Watson, Ind.

Mr. UNDERWOOD. I wish to announce that the Senator from Nevada [Mr. PITTMAN] is absent on account of illness in his family.

The PRESIDENT pro tempore. Fifty-six Senators have answered to their names. There is a quorum present.

At this point the Chair desires to make an announcement, so that if his opinion is in error there can be a correction of it. The Chair understands that the Senate is now working under that part of the unanimous-consent agreement which is contained in lines 11 to 15, inclusive, on the first page of the agreement as printed, that no Senator can speak upon the bill when an amendment is pending, that addresses upon amendments must be limited to 15 minutes, and that this part of the agreement applies as well to the Senate as to the Committee of the Whole.

Mr. McCUMBER obtained the floor.

Mr. McLEAN. Mr. President——

Mr. McCUMBER. I yield to the Senator from Connecticut.

Mr. McLEAN. I have a letter written by Governor Harding, of the Federal Reserve Board, in reply to certain statements which were made in the Senate a few days ago. It is less than half a page, and I ask unanimous consent that it be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HEFLIN. What is the letter about?

Mr. McLEAN. If the Senator desires, I will ask to have the letter read at the desk.

Mr. HEFLIN. I object to having it read until I can see the letter and find out what is in it. I may not object to its going into the RECORD when I know what is in it.

Mr. McLEAN. Will the Secretary please return the letter to me?

Mr. SIMMONS. Mr. President——

Mr. McLEAN. I believe I have the floor, have I not?

The PRESIDENT pro tempore. The Senator from North Dakota yielded to the Senator from Connecticut, as the Chair understood.

Mr. McLEAN. The letter reads as follows:

Many of the papers yesterday morning——

Mr. JONES of New Mexico. Mr. President, I ask for the regular order.

The PRESIDENT pro tempore. The regular order is the consideration of amendments to the pending tariff bill.

Mr. JONES of New Mexico. I ask that the regular order under the unanimous-consent agreement be carried out.

Mr. McLEAN. I appreciate the courtesy that is extended to the chairman of the Federal Reserve Board by Senators on the other side of the Chamber. I also appreciate the fact that, apparently, they are unwilling that this public official should reply to an insinuation emanating from the other side of the Chamber.

Mr. JONES of New Mexico. I ask leave to make just a brief statement. The Senator from Alabama [Mr. HEFLIN] was very fair, in my judgment, in wanting to know what was in the letter before it was put in the RECORD, because he knew that under the unanimous-consent agreement he could not reply to it. It would be unfair to the Senator from Alabama to put something in the RECORD to which he could not reply.

The PRESIDENT pro tempore. The subject is not before the Senate for discussion at this time under the rule. The Senator from North Dakota has the floor.

Mr. SIMMONS. I ask the Senator from North Dakota if he will not permit me to ask the Chair a question with reference to the ruling he made a moment ago?

Mr. McCUMBER. Certainly.

Mr. SIMMONS. I understood the Chair to hold that no speech upon the bill could be made while an amendment is pending. Am I correct about that?

The PRESIDENT pro tempore. The Senator is correct. During the consideration of the paragraph which has been before the Senate for the last few days, the Chair held that it was impossible to apply the rule which had been laid down by former Vice President Marshall, but in the judgment of the Chair that rule is applicable while the Senate is considering the amendments which are now to be considered and the bill itself. Following that rule, the Chair feels constrained to hold that while there is an amendment pending no Senator can speak upon the bill itself.

Mr. SIMMONS. Mr. President, if that be the ruling of the Chair, when may a Senator speak upon the bill?

The PRESIDENT pro tempore. When there shall be no amendment pending.

Mr. SIMMONS. Then, when an amendment shall have been concluded, the Senator must get in before another amendment is offered or before another amendment is reached?

The PRESIDENT pro tempore. The Chair will be very glad to be relieved of the obligation of the rule announced by a former President of the Senate, the Chair never having been much in sympathy with it, but the Chair feels compelled to follow the rule unless it shall be otherwise ordered by the Senate.

Mr. McCUMBER. May I suggest, Mr. President, that so long as an amendment is pending it is presumed that the Senator who is speaking is, of course, speaking to that amendment and will be held to the 15-minute rule? I think that if the Senator would announce that he desired at any time after an amendment shall have been passed on to take the 30 minutes which is allowed him in speaking upon the bill, so that the Chair would know that he was speaking upon the bill, there could be and would be no objection. I think the Senator owes it to the Chair and to the Senate that he do so, in order that the Senate may know to what he is addressing his remarks.

Mr. SIMMONS. I am not objecting to the ruling at all, but I wish to understand it. As I now understand, the Senator desiring to speak to the bill will have to get in between the consideration of two amendments.

Mr. McCUMBER. I think that is correct.

Mr. SMITH. May I ask a question, Mr. President?

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from South Carolina?

Mr. McCUMBER. I yield.

Mr. SMITH. I merely wish to ask a question. I understood the Chair to say that the same rule which he has stated will apply when the bill comes into the Senate?

Mr. McCUMBER. Certainly.

Mr. SMOOT. The same rule which applies now will apply then.

Mr. SMITH. That means it will apply until the completion of the bill?

The PRESIDENT pro tempore. The unanimous-consent agreement provides—

That from and after the hour of 11 o'clock a. m. of the calendar day of Saturday, August 12, 1922, no Senator shall speak longer than 15 minutes on any amendment or motion nor longer than 30 minutes upon the bill.

It is the opinion of the Chair that the limitation applies not only to the bill as in Committee of the Whole but in the Senate as well when the bill shall have reached that stage.

Mr. McCUMBER. Mr. President, I now ask that the Senate proceed to the consideration of paragraph 1401. The Committee on Finance has considered this paragraph and believes that it is somewhat more verbose than is necessary; so they have directed me to offer an amendment, which is very brief, as a substitute for that paragraph. I now send the amendment to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from North Dakota to the amendment of the committee.

The READING CLERK. On page 178, it is proposed to strike out all of paragraph 1401 as proposed to be amended by the Committee on Finance and in lieu thereof to insert:

PAR. 1401. Asbestos, manufactures of: Yarn and woven fabrics, composed wholly or in chief value of asbestos, 30 per cent ad valorem; all other manufactures, composed wholly or in chief value of asbestos, 25 per cent ad valorem.

Mr. McCUMBER. Mr. President, let me say in explanation that this amendment to the amendment does not change the rate on asbestos originally proposed by the Finance Committee, except as to the clause which provides "that none of the foregoing rates of duty shall exceed 40 per cent ad valorem."

Of course, under the amendment as now proposed, none of the rates could exceed 30 per cent; in other words, we have but the two rates of 30 per cent on all yarn and woven fabrics and 25 per cent on all other manufactures composed wholly or in chief value of asbestos.

Mr. JONES of New Mexico. Do I understand that manufactures of asbestos not specially provided for are dutiable at 30 per cent ad valorem?

Mr. McCUMBER. They are dutiable at 25 per cent.

Mr. JONES of New Mexico. Under the present law the rate is 10 per cent, and under the act of 1909, the Payne-Aldrich law, the rate was 25 per cent, I believe. So we go back from the 10 per cent to the 25 per cent rate. Will the Senator from North Dakota please indicate to us why he thinks that is necessary?

I observe that the importations of manufactures of asbestos are not large, while the production in the United States is quite large, and we are exporting a considerable quantity. What is the particular reason for increasing this duty from 10 per cent to 25 per cent?

Mr. McCUMBER. Mr. President, upon the fabrics especially the committee believes that there were sufficient importations to justify the increase and that the difference between the cost of the manufacture in this country and abroad has become greater. We felt that we ought to give upon all manufactures of asbestos practically the equivalent of the Payne-Aldrich rate.

Mr. SMOOT. But on the woven fabrics and yarns of asbestos the Payne-Aldrich law was 40 per cent, while this proposition is to fix the rate at 30 per cent.

Mr. McCUMBER. Yes. I stated that we lowered the rate upon the character of asbestos to which the Senator from Utah refers.

Mr. JONES of New Mexico. What is the proposed rate for the woven fabric?

Mr. SMOOT. It is 30 per cent.

Mr. McCUMBER. It is 30 per cent ad valorem.

Mr. JONES of New Mexico. On all of the manufactures of a certain class of asbestos the rates are increased from 10 per cent to 25 per cent, and the rates on other classes are increased from 20 per cent to 30 per cent.

Mr. President, I merely wish to place in the RECORD a statement of the imports and exports and the production of asbestos in the United States. In 1914, prior to the war, the value of the output was nearly $3,000,000 and in 1919 it was nearly $19,000,000. The imports of asbestos yarns or woven fabrics for the fiscal years of 1910 to 1913 averaged a little over $90,000; in 1914 $113,000, and the imports of all other manufactures of asbestos in 1919 were valued at $287,000, and in 1914 at $283,000.

We have here statistics for the more recent years covering asbestos yarns and woven fabrics. It does not seem to me that there is anything whatsoever to indicate that there is a flood of importations coming here to interfere with the products made in the United States, because the exports increased in value from $293,616 in 1910 to $687,073 in 1914, and in the year 1918 the exports were about $2,500,000; in 1919, $3,500,000; in 1920 nearly $4,500,000 and for 9 months of 1921 $2,167,324.

With these large exports it does seem to me that the industry in the United States does not need an increased duty for its protection. The exports are far in excess of the imports.

Mr. SMITH. Mr. President, I should like to call the Senator's attention to the fact that in 1920 the total value of importations of woven fabrics was only $237,000 and of other manufactures $139,000 and of asbestos yarns $248,000. Adding those all together they were just about equal to the value of our exports even for the fiscal year 1910, and in 1920 the exports amounted to $4,431,000, while the imports were less than a half million dollars. It seems the industry having reached a point where our exports far exceed our imports, that we certainly are disposing of the product abroad in competition with the foreign product at a profitable rate; otherwise we would not export to the amount of $4,000,000. That was under a 20 per cent rate, and now to increase the rate would simply provide an opportunity for an enhanced price to be charged the domestic consumer without affecting the price of the $4,000,000 worth shipped abroad; in other words, we meet competition abroad to the amount of $4,000,000, and yet propose to raise the rate of duty to the consumer, almost certainly for the sole reason of increasing the price here.

Mr. JONES of New Mexico. Mr. President, I move that the numerals——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from New Mexico?

Mr. SMITH. I merely wanted to make the observation that, with a 20 per cent rate, our exports had risen from something like three hundred thousand or four hundred thousand dollars' worth to four million dollars' worth; that our imports were falling off, and that a higher rate of duty can not properly be asked to protect us here against foreign competition, for we were meeting foreign competition to the amount of $4,000,000. That means that if you raise the rate of duty you are simply doing it for the purpose of giving them the power to increase the price here, and then to meet competition with an excess or a surplus to the value of $4,000,000. That means that we are meeting foreign competition with practically 50 per cent of the output of this product; and there is no reason whatever, except to enhance the value of it, for raising the duty.

Mr. McCUMBER. Mr. President, I do not think I could speak further on this amendment except in the time of the Senator from South Carolina by making a suggestion to him, if the Senator will hold the floor a moment until I make a suggestion to him with reference to the importations.

In 1910 our entire importations were about $265,000. That was under normal conditions. We have increased that in these manufacturing lines to $483,700 in 1921, showing a great increase in the importations over pre-war normal conditions. In 1918, of course, there were only $23,000 of importations, but that was in war time, and therefore I am making my comparison with a more normal situation, and we need the duties in addition to the matter of the protection.

Mr. SMITH. Mr. President, the Senator also, in order to balance his comparison, must put alongside of that the enormous increase in our exports. Our exports of all these commodities have outstripped our imports, and in a larger percentage than the Senator has shown that our imports have increased. The business has widened and extended until we have increased the volume of our business some five or six hundred per cent, and a great portion of that is in exports.

There is no argument for any increase in duty, in view of these figures furnished us by the Tariff Commission, except that we desire to enhance the price. We all know that by raising the duty we discourage importations, and therefore we do not increase the receipts at the customhouse; but if we should lower the duty to a point where there would be reasonable importations we would increase the receipts and not jeopardize the price here, because it is demonstrated that we are meeting competition under a 20 per cent duty to the amount of $4,000,000.

I can not see any reason in the world why, with these figures before us, we should increase the rate of duty.

Mr. SMOOT. Mr. President, I want to call attention to the facts as to the exports. For the year 1920 they were $4,431,132, as the Senator says, but the very next year, 1921, they dropped down more than 50 per cent, to $2,167,324.

Mr. FLETCHER. That is for nine months.

Mr. SMOOT. In nine months; but what were those exports? Were they all asbestos goods? Take our exports and we find that this is what they are: They are pipe coverings and cement and paper and millboard and roll board; and I want to

say to the Senator that they are mostly magnesia, and not asbestos at all. The great bulk of the exports are of that kind of goods and are not really asbestos goods, with the exception of the asbestos that may be in them.

Mr. JONES of New Mexico. Mr. President, will the Senator give the figures of the different classes?

Mr. SMOOT. Yes; I will give them to the Senator. Take the one month of May, for instance. Take the unmanufactured asbestos, in tons. In 1921 there was 1 ton, and the value of it was $28. In 1922, of the unmanufactured asbestos, there were 138 tons, of a value of $31,750.

Mr. SMITH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Utah yield to the Senator from South Carolina?

Mr. SMOOT. I do.

Mr. SMITH. May I ask from what the Senator is reading?

Mr. SMOOT. I am reading from the Monthly Summary of Foreign Commerce for 1922. The exports of paper, millboard, and roll board—and these were in pounds—were 115,632 pounds, valued at $5,009. The exports of pipe covering and cement, in pounds, were 366,549 pounds, of a value of $25,182. Remember, this is for the one month of May, 1922. In the case of textiles, yarn, and packing, the exports were only 42,584 pounds, of a value of $34,801. So the Senator can see and the Senate can see that our exports are paper, millboard, roll board, pipe covering, and cement, and, as I say, they are nearly all magnesia. It is true that there is asbestos in them, however, and they are classified in our exports as asbestos articles

Mr. SMITH. Mr. President, what were the figures that the Senator read as to the asbestos yarns?

Mr. SMOOT. Textiles, yarns, and packing, 42,584 pounds for the month of May of 1922, of a value of $34,801.

Mr. SMITH. And the Senator knows that those articles are almost pure asbestos.

Mr. SMOOT. That is true; but that is only for the one month of May, and that is $34,801, as I stated.

Mr. SMITH. These are the exports that the Senator is giving now?

Mr. SMOOT. I am speaking now of exports. If it were for 12 months, that would be $400,000 a year.

Mr. SMITH. The Senator knows that the board, the wrapping for pipes, and the cardboard are the forms that are more universally used than any other forms of asbestos.

Mr. SMOOT. I was calling attention to the exports, and I have already stated what they were.

Mr. ASHURST. Mr. President, the Senate now has under consideration, if I am correct, Schedule 14, sundries, and it relates only to the manufactures of asbestos. Hence it would not be an appropriate time for me to move, as I expect to do later, to transfer the raw fiber from the free list to the dutiable list. Am I correct in that? It would not be appropriate at this particular time?

Mr. SMOOT. No.

Mr. JONES of Washington. Mr. President, I desire to submit a parliamentary inquiry. I understood that the Senator from Arizona had yielded the floor.

Mr. ASHURST. I simply wished to ascertain whether I could propound an amendment at this time. I find that I can not, so I yield the floor.

Mr. JONES of Washington. Mr. President, a moment ago I did not make any point of order against the suggestion of the chairman of the committee that the Senator from South Carolina [Mr. SMITH] could hold the floor and yield some time to him, but I do not believe that is proper under the unanimous-consent agreement. I desire to ask the Chair, however, a question with regard to the provision—

That from and after the hour of 11 o'clock a. m. of the calendar day of Saturday, August 12, 1922, no Senator shall speak longer than 15 minutes on any amendment or motion—

And so forth. That does not say that no Senator shall speak more than once. The parliamentary inquiry that I desire to submit to the Chair is whether or not a Senator can speak more than once, provided that in the aggregate he does not speak longer than 15 minutes.

The PRESIDENT pro tempore. The Chair is of the opinion that a Senator can consume 15 minutes under the unanimous-consent agreement, and that under the general rule of the Senate he can speak twice upon the same day.

Mr. McCUMBER. Mr. President, a point of order. I call the attention of the Chair and of the Senator to the fact that on line 4 of page 3 the agreement says:

No Senator shall speak more than once or longer than 15 minutes.

I did not intend to breach that rule. I simply asked the Senator from South Carolina, who sat down quicker than I wanted him to, if he would not retain the floor long enough for me to ask him a question and make a suggestion. I was not asking for a second opportunity to speak myself.

Mr. JONES of Washington. I do not find any phrase on the calendar similar to what the Senator has read.

The PRESIDENT pro tempore. The Chair does not find it, either.

Mr. McCUMBER. It is on the inside, page 3, commencing with line 2:

And after the hour of 11 o'clock a. m., Saturday, August 12, 1922, no Senator shall speak more than once or longer than 15 minutes.

The PRESIDENT pro tempore. That is not in the agreement.

Mr. JONES of Washington. It is not in the agreement as printed on the calendar.

Mr. McCUMBER. Then it is a misprint on the calendar. The unanimous-consent agreement was ordered to be printed, and there is a mistake in the print on the calendar if it does not contain that provision.

The PRESIDENT pro tempore. There is no such language in the copy of the agreement in the hands of the Chair.

Mr. McCUMBER. I think the Chair is right. I think I picked up the wrong print, as several proposed unanimous-consent agreements were printed.

Mr. ASHURST. Mr. President, I should like the attention of the chairman of the Finance Committee. While it is true that this would not be an appropriate time to move to transfer an article from the free to the dutiable list—and the Senator from Utah [Mr. SMOOT], of course, is correct in his statement to that effect—yet it seems to me that progress could be made if I could secure unanimous consent at this time to consider whether or not the Senate will put a duty on raw asbestos, for this reason: It occurs to me that the two should be considered together. If the Senate has under consideration, as it has, the question as to whether or not manufactures of asbestos shall be dutiable, it seems to me at the same time the Senate should consider as to whether or not the raw material—the ore, the fiber—should be dutiable; and unless the chairman of the Finance Committee or some other Senator should object, I will ask unanimous consent that my amendment be considered at this time, along with the proposal to put the manufactures of asbestos on the dutiable list. I proposed the amendment some time ago, and it simply provides that the raw asbestos, the fiber, shall be dutiable at 20 per cent ad valorem.

In the year 1919 there were only about 1,300 tons—or, to be exact, 1,361 tons—of raw asbestos produced in the United States; Canada, South America, and China furnishing us with the raw material or the fiber.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from North Carolina?

Mr. ASHURST. I yield.

Mr. SIMMONS. Mr. President, I am very much interested in what the Senator is proposing, but I feel right now that unless we begin to rigidly enforce the rule agreed to in the unanimous-consent agreement we will find after a while that it will be trenched upon more and more, until we will be taking a good deal of time discussing other things than the pending amendment. I think the Senator ought to ask unanimous consent that he be permitted, out of order, to offer the amendment, because I agree with him that it ought to be considered before we consider the amendments proposed by the committee. But I do not see how he can do it without unanimous consent, and to discuss it now would be taking up the time allotted to the general discussion of that amendment.

Mr. ASHURST. The Senator has come to my rescue in a most handsome way, and I thank him. Emboldened by his encouragement, I ask unanimous consent that my amendment, which proposes to transfer the raw, unmanufactured ore or fiber from the free list to the dutiable list, and which provides for a duty of 20 per cent ad valorem, be considered now. It seems to me that in the interest of economy of time it would be wise for the Senate to consider whether or not we shall put upon the free or the dutiable list the raw fiber, or ore, while considering the pending amendment. If I can secure such permission, I should like to have that done at this time, but if it inconveniences any Senator, I will withdraw the request for the present.

Mr. McCUMBER. Mr. President, I know of no objection, if the Senator wishes to have that done. We will have to vote on it some time and we might as well do it now.

The PRESIDENT pro tempore. Will the Senator from Arizona state his request?

Mr. ASHURST. I will send to the desk the amendment at this time.

The PRESIDENT pro tempore. The Senator from Arizona asks unanimous consent that the amendment, which the Secretary will read, may be considered in connection with the amendment now pending.

The READING CLERK. In paragraph 1515, "Asbestos, unmanufactured," on page 213, line 17, after the word "matter," the Senator from Arizona proposes to strike out the period and insert the words "20 per cent ad valorem"; so that if amended it will read:

Containing not more than 15 per cent of foreign matter, 20 per cent ad valorem.

Mr. ASHURST. Now I shall translate that into terms we understand.

Mr. SMOOT. Mr. President, that amendment would be improper, because it would then be putting a rate of duty on an article on the free list. It will have to be transferred from paragraph 1515 to paragraph 1401, or preceding paragraph 1401.

Mr. ASHURST. In order that it may be appropriately placed, I ask permission that it may be transferred from paragraph 1515 to paragraph 1401. The simple question is, Shall the raw fiber or ore carry a duty? If I am correct, paragraph 1515 is transferred to paragraph 1401, and after the word "matter," on line 17, page 213, the words "20 per cent ad valorem" are added.

Now, a word as to the reason for this: For the year 1919 there were imported into the United States from Canada 157,572 tons of asbestos ore; from South Africa, 9,789 tons; from China, 2,000 tons; and there were produced or mined in the United States 1,361 tons.

The States producing asbestos are Arizona, California, Georgia, Maryland, Oregon, Wyoming, and Vermont. Of those 1,361 tons, Arizona produced 423 tons, all of which was very high grade. It is unnecessary to take up the time of the Senate with a description of asbestos and what it is, because it is within the common knowledge of every Senator here that it is a nonconductor of heat.

Mr. BURSUM. Mr. President, what duty does the Senator propose?

Mr. ASHURST. I am seeking to induce the Senate to agree to a 20 per cent ad valorem duty.

Mr. BURSUM. What would that represent per pound?

Mr. ASHURST. Translated into a specific duty per pound?

Mr. BURSUM. What is the average value of the crude product?

Mr. ASHURST. The Senator wishes to know what it costs per pound to mine it and I will state that the figures vary. Some say $20 per ton, but, of course, that is clearly wrong. Some of it in Arizona costs $300 per ton.

Mr. BURSUM. About a cent a pound?

Mr. ASHURST. Some claim that.

Mr. SMOOT. It is more than that.

Mr. ASHURST. Oh, yes; sometimes the cost of mining is as high as $400 per ton.

The conditions under which the asbestos is mined vary. For instance, I apprehend that in the State of Maryland it would be much cheaper than in Arizona. The mines in Arizona are a long distance from the railroad, hence the mere extraction of the ore or raw asbestos out of the ground is only a part of the cost of production.

Mr. SIMMONS. What did the Senator say was the value of the asbestos per pound, or by the ton?

Mr. ASHURST. I said that some claimed it could be mined for $20 per ton, but that can not possibly be true; it would average $100 per ton, and $300 per ton would be more nearly correct.

Mr. SIMMONS. What is the character of the asbestos we produce?

Mr. ASHURST. The United States produces all kinds—that is, the amphibole and the crocidolite, which is a lavender blue, and also the chrysotile. I now exhibit some of these samples of asbestos. Many believe it is the length of the fiber which gives the value. That is true in a way, but that is not necessarily always the case, because you may have a long fiber, but it has so much waste or iron therein that it is not a resistant of heat, while this that I have from an Arizona mine has no iron in it. It is used for making firemen's gloves, theater curtains, the wrappings of pipes, shingles, and so forth.

Mr. GOODING. Mr. President, I would like to ask the Senator the source of the supply and the consumption.

Mr. ASHURST. I have taken the year 1919. We received from Canada in that year 157,572 tons; from South Africa, 9,789 tons; from China, 2,000 tons; and the United States produced 1,361 tons.

We have great quantities of asbestos, but the mining of asbestos, I repeat, is a difficult, expensive, and in some ways a precarious occupation. I shall ask for a roll call on my amendment.

Mr. McCUMBER. Mr. President, before proceeding to answer the Senator, I ask unanimous consent at this time that when the Senate closes its session on this calendar day it recess until Monday at 11 o'clock.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCUMBER. Mr. President, I want briefly now to reply to the Senator from Arizona. The committee has continued crude asbestos upon the free list. The Senator from Arizona desires to have a 20 per cent ad valorem duty on it.

There is produced in Arizona a very long fiber asbestos, probably worth more for spinning purposes ordinarily than any of the imported asbestos. It is, however, more brittle than that which is imported from Canada, and can not be used for brick linings and for many other purposes, and we must continue to import the raw product from abroad.

I think I can present this matter more cogently and clearly if I just read a short statement made by the Tariff Commission upon this subject.

Mr. ASHURST. Will the Senator yield to me at that point?

Mr. McCUMBER. Certainly.

Mr. ASHURST. The Senator has startled me by the statement that the asbestos from Arizona is not of superior quality. I will read, with the Senator's kind permission——

Mr. McCUMBER. On the contrary, I said for spinning purposes it is better.

Mr. ASHURST. I thought the Senator said it was inferior.

Mr. McCUMBER. Oh, no; it commands a very much higher price for spinning purposes.

Mr. ASHURST. I beg the Senator's pardon.

Mr. McCUMBER. I stated that for brick linings and for many other uses, on account of being brittle, it can not be used.

I read now the words of the Tariff Commission, under the heading "Competitive conditions." They say:

The United States is the largest consumer of asbestos in the world and manufactures more asbestos products than any other country; but it has never been, and shows no promise of ever becoming, an important factor in the production of the unmanufactured product. Its meager output could be increased to some extent, but it will probably never become great enough to supply the domestic demand. The United States must, therefore, rely largely upon imported crude material.

The chief source of asbestos is in Canada, just outside the borders of this country. The supply from Quebec is large, cheaply mined, excellent in quality, and so readily available that there is little stimulus to domestic production of medium grades of average quality from the less-favored American deposits. As the only producer of both long and short fibers, Canada holds the leading position in the world markets.

Formerly American production consisted almost exclusively of the cheapest material, suitable only for paint making or other purposes requiring only very short fiber. There was also some production of extremely poor rock for local requirements and too low in value to bear transportation charges. This demand has fallen off but has not wholly disappeared. The brightest outlook for domestic production is in the Arizona output of exceptionally good spinning fiber and of special quality, superior for electrical purposes. A less important demand is met by the production of asbestos fiber, for use in filters and chemical work, from amphibole deposits found in the crystalline rocks of Maryland.

The continuance of the Arizona industry is assured. Although the cost of production will always be much greater than in Canada because of the nature of the deposits, the proportion of valuable spinning fiber is greater, while the iron content is lower. There is a demand for this special product even at a higher price. Owing to the fact that in practically all the Arizona fiber the harsh and soft material are so intermingled that it is difficult to separate them, these fibers do not bring as high prices as the Canadian. In 1918 soft Arizona fiber was selling at $850 to $1,250 a ton, according to its length, and the harsh Arizona fiber at $350 to $600 a ton. The shorter fibers, or mill rock, have about the same value as the Canadian shorter fibers. An increase in the Arizona output may be looked for, but it is not likely greatly to exceed 1,000 tons a year, which is not 1 per cent of American needs on a purely tonnage basis.

Mr. SIMMONS. Mr. President, may I ask the Senator, who has the summary before him, if asbestos is produced in any substantial quantity anywhere else in this country except in Arizona?

Mr. McCUMBER. It is not. There is some in Maryland, but it is not produced in paying quantities. When I say it is not, I mean it is not produced in substantial quantities in the eastern section of the United States, where we find the main use. I want to add that the present importing price, I understand, is $450 a ton. So that the Arizona product has a market of its own because of its superior qualities for certain purposes, while at the same time it can neither supply the demand to any appreciable extent nor can it answer the requirements for the other character of uses.

Mr. NICHOLSON. Mr. President, the statement made by the chairman of the Finance Committee, I take it, is based upon information furnished by the Bureau of Mines or the Geological Survey, in large measure. That was the only source from which the Tariff Commission could obtain information.

Now, as a matter of fact, the work of the Geological Survey and the Bureau of Mines has been very sadly neglected for the last 10 years, so that the information furnished by them is not correct or reliable information upon which to base the findings of the Tariff Commission.

The States of California, Arizona, Colorado, New Mexico, and many of the other Western States contain quantities of commercial asbestos. It is not confined to Arizona. The material can be mined in many of the Western States. The reason for the small output of asbestos in the country has been due to the fact that previous to the war asbestos could be mined in Canada very much cheaper than it could in our own country, for the reason that the wage scale for many years previous to the war was very much lower than the wage scale which obtained in the United States. Hence the domestic industry was neglected.

Now, it seems to me from every standpoint that there should be a duty levied upon imports of asbestos into our country, if for no other reason than for a tariff for revenue. I feel quite sure that if the 20 per cent for which the Senator from Arizona is arguing was adopted by the Senate, in a very few years we would very materially increase the production of asbestos in this country. For that reason I desire to state at this time, for the benefit of Senators generally, that this is a struggling young industry. It has been the purpose of the Republican Party in the past to help to foster young and struggling industries. This is one and it should be so considered at this time.

Mr. FLETCHER. Mr. President, it appears that asbestos is mined in the United States chiefly in five States—Arizona, California, Georgia, Maryland, and Oregon. The Georgia fiber is valuable only for paints, cement, coverings, and similar articles, and can not be used in spinning. Canada produced about 85 per cent of the world's supply of asbestos. That seems to be in a general way a statement regarding the situation as to asbestos.

The raw material for years has been on the free list. Of course, if we put a duty on the raw material, then we have to follow that with increased duties on the manufactures. The industry seems to have been peculiarly prosperous under the present tariff rate. There can be no clearer statement of the progress and development and prosperity of the industry as to any article or any industry than is given under the head of "asbestos manufactures" in the Tariff Summary, showing that the establishments have increased in this country from 32 in 1914 to 43 in 1919, that the exports have increased enormously, and the imports are almost negligible. The industry has grown, as I said, and developed in a wonderful degree. This has taken place under a rate of 10 per cent on manufactures of asbestos generally and 20 per cent ad valorem on yarn and woven fabrics. That was the rate under the act of 1913. Under the act of 1909 there was a duty imposed of 25 per cent ad valorem on the manufactures of asbestos and 40 per cent ad valorem on the woven fabrics.

I can not quite understand, in the first place, why there should be any increase in the duties at all, because certainly the industry has prospered and is in fine condition to-day under the present rates. Why we want to prohibit importations, which will not affect the industry beneficially to any degree and will simply cut off revenue, is beyond my comprehension, but, in the next place, why the committee propose to put a higher rate on ordinary manufactures of asbestos than they do on yarn and woven fabrics I can not understand. Under the law as heretofore the rate has been nearly double on the yarn and woven fabric, and yet the committee now propose to reverse that policy.

Mr. SMOOT. No; the Senator is wrong. It is not reversed in the amendment offered by the committee.

Mr. FLETCHER. I gathered that idea when I read the committee amendment.

Mr. SMOOT. No; the committee amendment provides on asbestos manufactures of yarn and woven fabrics 30 per cent ad valorem and all other manufactures composed wholly or in chief value of asbestos 35 per cent ad valorem.

Mr. FLETCHER. I knew the figures were less. The committee has simply reversed the order.

Mr. SMOOT. No; the committee has not reversed the order. I will say to the Senator that the words "other manufactures" mean manufactures that do not take the class of asbestos that is spun into yarn. It is not so expensive, and therefore does not need the duty.

Mr. FLETCHER. I agree; but, as I said, what confused me was that the committee reversed the order as set forth in the act of 1909 and 1913.

Mr. SMOOT. Oh, no; they have not.

Mr. FLETCHER. The Senator will find under the act of 1909, paragraph 462, manufactures of asbestos, 25 per cent ad valorem, and woven fabrics composed wholly or in chief value of asbestos, 40 per cent ad valorem.

Mr. SMOOT. That makes no difference as to the rate. We have merely put "manufactures of" first.

Mr. FLETCHER. That is exactly what I said. The committee has reversed the order of the articles.

Mr. SMOOT. I thought the Senator meant we had reduced the rates of duty.

Mr. FLETCHER. Oh, no. I mean the committee have reversed the order of classification.

Mr. SMOOT. That does not make any difference.

Mr. FLETCHER. I know it does not make any difference except that when the Senator gave the figures as 30 and 35 I naturally thought he had reference to 30 per cent for the ordinary manufactures and 35 per cent as applied to the woven fabrics, because that is the order in which they were carried in the acts of 1909 and 1913.

The committee now propose to make a difference of 5 per cent ad valorem between the ordinary manufactures and the woven fabrics. That is undoubtedly a less difference than has ever been carried before in the previous laws. Under the act of 1909 the difference was 15 per cent, and under the act of 1913 it was 10 per cent. Now the committee propose to make a difference of 5 per cent. I still feel that the duties ought not to be increased on the manufactures of asbestos, because the industry is now prosperous.

Mr. NICHOLSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Florida yield to the Senator from Colorado?

Mr. FLETCHER. I yield.

Mr. NICHOLSON. The particular part of the schedule which we are discussing now is the raw product and a duty upon the raw product.

Mr. FLETCHER. I understand.

Mr. NICHOLSON. The Senator is talking about the finished product.

Mr. FLETCHER. Yes. I am opposed to a duty on either. I am opposed to putting a duty on the raw product, and I am opposed to putting a duty on the manufactured product.

Mr. ASHURST. What I am arguing against is the philosophy of Senators who say they are willing to vote for a duty on the manufactured articles, but require that the raw fiber or ore as taken from the earth shall come in free. It is that inconsistency of the situation against which I inveigh and to which I object.

Mr. FLETCHER. Will the Senator state the amount of revenue which will be produced from the duty proposed in his amendment?

Mr. ASHURST. I am able to do that.

Mr. FLETCHER. I do not know exactly the amount of importations, of course, which come in free now, and we could get no revenue under those circumstances; but suppose we impose a duty of 20 per cent on this commodity, what revenue will be produced therefrom?

Mr. ASHURST. The imports of asbestos fiber from Canada for 1920 were valued at $9,000,000, and 30 per cent ad valorem on that valuation would, of course, if that amount should be brought in, be approximately $3,000,000 in revenue.

Mr. FLETCHER. It would not be quite $3,000,000.

Mr. ASHURST. Not quite. Now, I am proposing a 20 per cent ad valorem duty, which, according to the imports for 1920, would produce $1,800,000 of revenue from the raw fiber from Canada alone, not counting what we import from China and from South Africa.

The PRESIDENT pro tempore. Does the Senator from Florida yield the floor?

Mr. ASHURST. Will the Senator from Florida yield further to me?

Mr. FLETCHER. I yield to the Senator from Arizona.

The PRESIDENT pro tempore. The Senator from Arizona has already exhausted his time upon the pending amendment.

Mr. ASHURST. I shall have to depend upon the kindness of my friend from Florida to let me finish my sentence.

Mr. FLETCHER. Of course, if a duty is imposed on the raw material, the committee will immediately ask that the rates be increased on the manufactured articles beyond what it is now proposed to increase them, and that will be one of the complications which will arise.

Mr. ASHURST. I ask for a vote on it if Senators are willing and ready now to vote.

Mr. FLETCHER. Mr. President, in reply to the Senator's suggestion, I desire to suggest another thought in reference to the matter. The question still exists whether we can produce in this country at all or anywhere the kind of material about which we have been talking and which is manufactured into

asbestos. Of course, in Arizona they produce the spinning kind of asbestos, and in Georgia they produce a kind of asbestos that is used for paint and cement and things of that kind.

Mr. ASHURST. Will the Senator from Florida permit me to answer that suggestion?

Mr. FLETCHER. Certainly.

Mr. ASHURST. I have here a brief prepared by the Association of Asbestos Miners in Arizona, who are reliable men, and they advise that it is possible to develop the American field so that nearly all, if not all, that we consume may be produced at home.

I will ask permission at this point to put into the RECORD the brief to which I have referred, which has been prepared by the Arizona miners.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The brief is as follows:

GLOBE, ARIZ., *December 23, 1921.*

Hon. HENRY F. ASHURST, Senator,
Washington, D. C.

DEAR SIR: I am writing you as chairman of the Asbestos Tariff Association of Arizona, and I wish to state my reasons why we are entitled to a protective tariff on raw asbestos:

1. High cost of production and transportation to the railroad and a long distance from the market.

The different standard of living by the American people can't compete with that of foreign countries such as Rhodesia.

The freight from Rhodesia is very low, owing to the fact that they ship by water as ballast.

2. Foreign mining costs on crude asbestos will not exceed $100 per ton, as they secure very cheap labor. Average wage 50 cents per day in Rhodesia.

Our cost of production will average $300 per ton, plus freight. We are so far from the market that we can not market anything but our crude ¼ inch or longer. Our mill fiber is simply a loss.

Foreign countries being able to market their mill fiber, which lowers the cost of production.

3. We have a very high grade of asbestos, and a larger field than the Province of Quebec.

4. The large area of asbestos on the reservation was thrown open for lease by the Government last March.

In order for the leasers to operate on the reservation they must be protected from foreign asbestos, and it will be necessary for the leaser to make a success in order for the Government to receive a stable royalty.

5. Without a protective tariff the asbestos-mining industry of the United States of America would be paralyzed and great resources would be undeveloped.

6. The spinners have made a provision to protect their interests by asking for a tariff on manufactured asbestos goods from 1½ cents to $1.68 a pound, according to the percentage of asbestos contained in the article.

They have arranged a tariff for their protection, the article that contains the highest percentage of asbestos the higher the tariff.

If it is necessary to raise the tariff according to the percentage contained in the article, why not protect 100 per cent crude asbestos for the producer?

7. The spinners in the United States who have interests in foreign mines have arranged to make their profits on the finished article and not the mining industry; by mining their asbestos abroad and at a very cheap cost they destroy the home market doing so.

Without a tariff on raw material the foreign interests could ship raw asbestos to this country and manufacture finished products here, and also market their production here and not be subject to tariff duty.

I am sending you this data, and it may be of some help to you in making your fight in our behalf.

I would be pleased to have you advise me of any new developments.

Yours very truly,

ROGER Q. KYLE,
Chairman of Asbestos Tariff Association of Arizona.

ASBESTOS.

Definition: Chemically, asbestos is a magnesium silicate containing water of crystallization and, in its various forms, impurities of iron, calcium, aluminum, and soda in a great many different amounts and combinations.

Among the more important substances included under the general trade name of asbestos are chrysotile (serpentine asbestos), amphibole asbestos (including fibrous varieties of tremolite and actmolite), anthophyllite asbestos, crocidolite (Cape Blue asbestos), and amosite. Speaking in the parlance of ordinary usage, asbestos is a mineral fiber which occurs in rock.

Uses: Asbestos fiber has been known and used as a heat insulator for over 2,000 years. In the last half century its uses have become more frequent, and since 1883, when asbestos products were first placed on the dutiable list, the industry has grown from a capitalization of a few hundred thousand dollars, and employing not over 100 men, to the industry of to-day, with a capital of over a hundred million dollars and employing over 20,000, with an annual business turnover equal to the capital, or $100,000,000. The methods of mining and manufacturing asbestos have so improved during this period and so many new beneficial uses have been found for it that it has become indispensable to industry and the household, and nothing can be adequately substituted for it. It finds most extensive uses as an electrothermol insulator, as a fire resistant and protection for packings, and as a fuel conserver. It has been authoritatively stated that the use of asbestos and kindred materials on heating and power units saves an amount of fuel per year equal to that consumed.

The ramifications of its uses for this purpose have only started, but are broadening and becoming more universal in increased proportions each year. Another great use for asbestos products is as a substitute for inflammable shingles and for fireproofing frame buildings. One witness, in testifying before the Committee on Ways and Means on the hearing on the sundries schedule, recently stated that $8,000,000 worth of wooden shingles were replaced in 1920 by asbestos shingles, and that each succeeding year should see a material increase in this amount.

SOURCE AND CONTROL OF RAW ASBESTOS FIBER, CANADIAN FIELD.

Asbestos exists in some form on every continent and in nearly every country in the world. The world's production of asbestos in 1919 was approximately 166,000 tons. The production for 1921 was considerably larger, as the figures show that the Canadian field in 1921 mined 3,099,122 tons of asbestos ore, which, after treatment, yielded 3,853 tons of spinning and No. 2 fiber, and 186,896 tons of low-grade mill, shingle-paper stock, and sand.

Nearly 90 per cent of the Canadian output is shipped to the manufacturers of the United States, most of which comes from the Province of Quebec. The remainder goes to Europe, where it is sold at a so-called slight advantage to the English spinner. As a matter of fact, for 40 years the British have controlled the world market for the raw asbestos ore and the crude product after it has passed the initial stages of treatment. The other foreign prospective sources of raw and partially treated fiber are South Africa, which is said to be, next to the Canadian, the largest asbestos field in the world. This field is also controlled by British interests.

1919 production.	Tons.
Canada	157,572
South Africa	9,789
China	2,000
United States	1,361

Until the year 1914 Canada ranked as the leading producer of all grades of asbestos, but since that date South Africa has attained first place in the production of the higher grades. Canada still produces most of the mill fiber. Seventy-five per cent of the world production of asbestos was imported into the United States. Russia, although possessing large and valuable deposits of asbestos, is at present a nonproducer. The chief producing centers in the United States are Arizona, California, Georgia, Maryland, Oregon, Wyoming, and Vermont. Of the 1,361 tons produced in 1919, Arizona produced 423 tons, all of which was of the highest grade. Practically the entire spinning fiber production of the United States comes from Arizona, and it is believed that the production of asbestos in Arizona in 1920 exceeded 1,000 tons. Because of the large number of small producers, it is very difficult to secure absolute figures on production.

An attempt has recently been made to force American manufacturers to move their plants to Canadian territory by threats of placing an embargo on the export of the better grades of Canadian fiber, with the result that at least one of the larger American manufacturers has started construction of an enormous Canadian plant.

The British control of this commodity has been greatly augmented and strengthened by large holdings or control in American manufacturing plants and the maintenance of an ever-ready and seductive propaganda to keep a material tariff on all manufactured articles and off of all raw fibers. By the same methods these organizations have operated in every country in the world where the game was worth the candle.

ARIZONA FIELD.

The greatest, although by no means the only, domestic source of supply of raw or partially treated crude fiber is what is known as the Arizona field. Although originally quite extensive, a recent act of Congress made it possible to locate and lease deposits heretofore unavailable but long known to occur on Arizona Indian reservations. This field has been investigated to considerable extent by the United States Geological Survey, the Bureau of Mines, the University of Arizona, and by various private engineers. There is a pronounced consensus of opinion that the field is several thousand square miles in extent, and at least extensive enough to produce sufficient quantities of the better grades of fiber to supply the domestic requirements for many years to come, and that the quality of the better grades of fiber so produced is the equal in all respects, and the superior in many respects, to the Canadian and South African fibers.

COMPARISON OF THE OCCURRENCE, GEOLOGY, AND METHODS OF MINING IN ARIZONA WITH CANADIAN AND SOUTH AFRICAN FIELDS.

Asbestos is prepared for market by being mined in various ways and then being separated by hand or machinery from the rock which encases it. No matter what its geographical or geological occurrence may be, always an extensive treatment is invoked, involving material endeavor and employing to a material extent skilled labor and machinery. After asbestos fiber receives this initial preparation, which is at least as extensive as the final manufacture, it is then fiberized, spun into yarn, woven, or made up into any one of the thousand and one articles into which it is finally made.

The manner of occurrence of any given deposit of asbestos determines the method of mining. In Canada the mineral fiber occurs in lenses or veinlike masses of serpentine that occurs in a series of Cambrian slates, schists, and diorites. In plainer phraseology, the asbestos fiber occurs disseminated through vast mountains of rock as low grade, so that the mining method practiced in Canada has conformed to the geological occurrence of the ore, and the quarry and open-cut system is used. Great pits are worked by derrick and drag, and steam shovels open up pits to a depth of over 200 feet, frequently attaining a length or circumference of over 1,000 feet. Nearly all mines practice hand cobbing and hand sorting before the ore is sent to great mills, where it goes through a system of crushers, rolls, fiberizers, beaters, cyclones, shaking screens, fans, collectors, and pulverizers.

In 1920, in the Province of Quebec, Canada, the average number of men employed in mining and treatment of asbestos ore were 3,230. In addition to this number of men a material number of girls were employed at times.

In the various South African fields, Kaffirs and natives are employed at the rate of not to exceed 25 cents per day, and labor is so cheap and plentiful that nearly all the fiber is said to be secured by hand methods, frequently of the crudest kind.

The Arizona field, although proven to be of great extent, is held principally by small mine owners, although several of the larger manufacturers have recently become interested and have started development and production on a larger scale.

The Arizona Asbestos Association (controlled by the Johns-Manville Co.) have a developed property on Ash Creek, near Globe, with many thousand feet of underground workings, from which a material pro-

duction is maintained. Neither does the company permit underground examination nor indulge in furnishing statistics in production, so no authentic figures can be given.

Other properties with a material amount of fiber developed are:

Regal mine, operated by Regelman, of 220 Broadway, New York; Bear Canyon group and Peninsula group, on the San Carlos Indian Reservation; Salt River draw group, on the Fort Apache Indian Reservation; the Canadian, Last Chance, Fourth of July, and Asbestos King mines, owned by Col. William G. Shanley; Pierce and Kyle group; Alene Asbestos Association, American Ores & Asbestos Co., controlled by Raybestos brake-lining people; Bass Asbestos Co., Colorado-Arizona Asbestos Mining Co., Globe Asbestos Co., Hance Asbestos Co., H. P. Wightman; Penn Asbestos Mining Co.

All the above-enumerated companies are located in the so-called Globe field except Bass Asbestos Co. and the Hance Asbestos Co., which are in the Grand Canyon.

In addition to these properties, which are at least partially developed and of major extent, there are others of extreme promise, and many prospects which could produce at least in a small way, located with considerable profusion from the Grand Canyon to the Mexican line. In fact, with a suitable market, asbestos mining is a poor man's game, and no doubt the day of the old "chlorider" would return with the greater volume of production coming from the little association of miners who owned one or two claims or leased a small block of ground from some small owner.

In the Arizona field only underground methods of mining can be employed; the veins, though numerous and sometimes possessing great continuity in length, are narrow. They are frequently as much as 60 miles from railway transportation over very rough roads or trails.

LABOR COSTS IN MANUFACTURE.

The sundries schedule of the present tariff bill before Congress places a duty of from 2 cents per pound upon short fiber asbestos paper to $1.68 per pound on the finer grades of asbestos yarn. To substantiate the justice of this tariff on yarn, evidence was introduced to show that asbestos textile workers received approximately the following wages in the various countries of the world:

Weavers (per week):	
United States	$39.00
Germany	4.35
Japan	6.00
England	17.70
Belgium	9.63

Added to this great labor advantage the European manufacturer has obtained control of the second largest asbestos deposits (in Rhodesia and South Africa) where the raw asbestos is produced by Kaffir labor at an average wage of 25 cents per day.

We believe firmly, with these figures in view, that $1.68 is not excessive duty upon the better grades of yarn, but in believing this we also believe that the better grades of Arizona fiber, which in being prepared for this yarn involves more skilled labor than the manufacture of the yarn itself, are as much entitled to protection as against the Kaffir labor of 25 cents per day as the weaver in America who makes $39 per week is entitled to protection in his standard of living against the weaver in England who receives $17.70 per week. Incidentally, the present rate of wages for miners in the Arizona asbestos field is in excess of $4 per day.

JUSTIFIABLE TARIFF.

In 1920 the imports of asbestos fiber from Canada were valued at $9,120,253. A 30 per cent ad valorem duty would have produced nearly $3,000,000 in revenue.

The demand for asbestos products is rapidly increasing. With the increasing South African importations produced by Kaffir labor at 25 cents per day, it is quite probable that shortly the revenue from a 30 per cent ad valorem duty would pass $5,000,000 per year. A very material sum should our domestic fields not supply a major portion of the country's needs for initially prepared fiber.

There are a good many reasons why an ad valorem duty would not be practical in its operation in the better grades of spinning fiber but should be highly so in the matter of the cheaper grades.

We believe that the approximate cost of delivering the better grades of Arizona fiber that go into the yarns upon which the manufacturers receive a protection of $1.68 per pound, cost at least 30 cents per pound more to prepare and produce than the fiber produced by Kaffir labor at 25 cents per day, and we believe that our so-called Arizona No. 2 fiber, being one-fourth to three-fourths inch in length, costs at least 20 cents per pound more to produce, prepare, and deliver to the manufacturing centers than that produced by the same Kaffir labor.

Hence, we recommend that a flat duty of at least 20 cents per pound be placed on all asbestos ore and fiber.

We beg to say in closing that the active attempts of the British to gain control of the world business in asbestos products by controlling the world supply of raw materials can best be thwarted and a domestic supply for the American manufacturer readily secured by giving this field the initial protection against the cheaper labor of Africa and Canada.

Respectfully submitted.

ASSOCIATION OF ASBESTOS MINES OF ARIZONA,
By GEO. A. THAYER, *Globe, Ariz.*

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Arizona to the amendment of the Senator from North Dakota.

Mr. GOODING. Mr. President, merely a word on the amendment offered by the Senator from Arizona [Mr. ASHURST]. As I understand, asbestos has always been on the free list, and unless it is protected we shall never develop the industry in this country to any great extent. There is no question as to there being plenty of asbestos in America. The great forces of nature which created Canada also created this country. We have not as yet half developed our mineral resources in the West. Believing in protection and realizing that the Government needs revenue, I do not understand why we can not accord to an industry like asbestos, for instance, protection and give it a chance to develop, in order to ascertain if it is not possible to produce all of the asbestos of every kind which we need in America. Surely, as a Republican and a protectionist, knowing that the Government needs revenue, and that it is necessary to tax the people in order to raise revenue, and realizing that we tax our people only about 10 per cent of what some of the other countries tax their people on imports, in the interest of labor itself, as tending to create employment and providing freights for the railroads in the West, which, in turn, would have the effect of lowering freight rates on food products, it seems to me that there should be a duty levied as provided in the amendment.

Mr. McCUMBER. Mr. President, did I understand the Senator from Idaho to refer to the Senator from Arizona as a Republican and a protectionist?

Mr. GOODING. I am speaking of the amendment of the Senator from Arizona; but I will say that the Senator from Arizona in some cases has been a protectionist, and I am glad of it. I am glad to see the ranks broken on the other side of the Chamber. I want to congratulate the Senator from Arizona and the people of Arizona that they have a Senator from Arizona who goes at least so far as to stand for Arizona products. I hope the time will come when the Senator from Arizona will go clear through in support of that policy.

Mr. ASHURST. If the Senator from Idaho will yield to me, I desire to say that if my colleague and I will not stand——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Arizona?

Mr. GOODING. I yield to the Senator from Arizona.

Mr. ASHURST. I desire to say that if my colleague and I fail to stand for Arizona, I should like to know who will stand for Arizona?

Mr. GOODING. Should the Senator and his colleague not do so, the people of Arizona will send other Senators here who will stand for her.

Mr. ASHURST. I am well aware of that.

Mr. GOODING. Yes; and I wish to congratulate Arizona upon having a Senator here, though he be a Democrat, who can see Arizona's interest and stand for it, despite the fact that his own party has proclaimed that protection is unconstitutional and immoral.

Mr. President, I hope we are going to give this industry a chance to live, because if there was ever a time in the history of America when we must do everything possible to foster an industry which will give employment to laboring men that time is now.

Surely here is an opportunity to find out whether we have asbestos of the same character as that found in Canada just across an imaginary line. Of course it is here, but it has been on the free list and has never had a chance to be developed, and never will be unless an adequate duty is provided, because, after all, the question of protection is a laboring man's question. If he is willing to work in America as cheaply as his brother in Canada and in other countries works, then we will not need any protection; but no American will ever undertake to do that, and he is not going to do it.

Mr. SIMMONS. Mr. President, I wish I could see my way clear to support the amendment offered by the Senator from Arizona, for I have very high regard for that Senator, and I am entirely satisfied that he is sincere in the position which he takes. I assume that the Senator in proposing this duty and in voting for other duties for which he has voted, affecting the products of his own State, has done so not because he is a protectionist, not because he believes in protection, but because he thinks we are to pass a protection bill and he wants to get the industries of his State in with the others in what he deems to be the benefits of the tariff duties. I assume that such is the theory upon which the Senator is acting.

Mr. ASHURST. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Arizona?

Mr. SIMMONS. Mr. President, I did not rise for the purpose of discussing the question of protection per se, but I must say that I am unable to see the wisdom of imposing a protective duty upon this particular article. It is shown that it does not come in competition with the product of any country except that of Canada, and it is shown that Canada is supplying about 85 per cent of the world's supply of this raw material and that we produce in the United States at this time less than 1 per cent of our own requirements.

Mr. President, if there is any country in the world where labor conditions and labor costs are about the same as those prevailing in the United States, it is Canada. The Senator said that it cost heavily to produce this material here. It does cost heavily to produce it here, but it also costs heavily to produce it in Canada, for the cost is chiefly labor. This is a natural product. It is simply gathered by the harvester, so to speak, by labor, and I think we have all agreed in these

discussions that the difference in labor cost between this country and Canada is very, very small, indeed.

I know this product is highly valuable, and because it is valuable, selling frequently as high as $440 a ton, I want to say to the Senator from Idaho that if there were workable deposits in the United States that extremely high price would undoubtedly stimulate the production of the commodity in the United States. I think the trouble is—that has been my understanding—that, while we do have small scattered deposits of this material, it is not found in economically workable quantities practically anywhere in this country. For two reasons I think we ought not to impose this duty: First, the amount produced in the United States is insignificant compared with our consumption, and the second reason is that our competition, if any, is with a country where the labor cost is practically the same as it is in the United States.

But, Mr. President, my objection goes much further than the two reasons I have just given. I am quite as much interested in promoting American export trade as I am interested in keeping down the cost of imports where they are needed to supplement American production. We have developed a very profitable export business in the finished product of this commodity. In some years we have exported as great a quantity as four and one-half million dollars worth of the finished product. We can not impose the proposed protective duty upon the raw material without carrying it forward and imposing it upon the manufactured product.

There is no country in the world, as I understand, which imposes a protective duty upon the raw asbestos as yet. Certainly we in America have never yet imposed any. Now, if we impose 20 per cent duty upon the raw material, necessarily we must load down with that additional charge the finished product which we export when it meets foreign competition, and the effect will be to discourage exports and possibly exclude us from foreign markets. We have got to safeguard as far as possible foreign markets for our products. It is the source of our prosperity, and we ought not to impose a duty upon a product which will unnecessarily embarrass us in the sale of our manufactured products abroad. If we impose upon the raw material a duty of 20 per cent, which is a very high duty, amounting upon the best quality of asbestos to $165 or $175 a ton, and if no other nation places any burden at all of this character upon the commodity, how can we hope to hold our export trade in this product?

Mr. JONES of New Mexico. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from New Mexico?

Mr. JONES of New Mexico. I thought the Senator from North Carolina had concluded.

Mr. SIMMONS. I have said, I think, all that it ought to be necessary to say, and in the interest of time I will conclude. Before I conclude, however, I call the attention of the Senate to the fact that this is a material which is very generally used in the United States. Its chief use, as I understand, is as a substitute for shingles and for lumber and in the manufacture of automobiles.

Asbestos shingles and slate are suitable for use wherever roofing material is required or employed. Asbestos is also used in packing and the like, but it is used largely as a substitute for shingles. I have bought it myself. Every farmer buys it. Every man who builds houses buys it. In some sections it is in almost as common use as shingles and lumber. It is used, for example, for boards for walls and in roofs as a protection against fire. We have put lumber on the free list. We have put shingles on the free list. They are both products of the United States; and now I ask why should we take this material, the largest use of which is as a substitute for these two materials, and treat it differently from the manner in which we have treated lumber and shingles?

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Idaho?

Mr. SIMMONS. Yes; I yield.

Mr. GOODING. I should like to call the Senator's attention to the fact that there is a possibility of our exhausting our timber supply. By a protective duty on this material we could develop a supply. There is a very radical difference between timber, which is finally all used up and can not be reproduced, and the development of a mine of asbestos by protection. They are not in the same class at all.

Mr. SIMMONS. I am very much afraid that if we should stimulate the production of asbestos in this country, in view of the fact that we have so very little, we would exhaust it much more quickly than we would exhaust our supply either of shingles or of lumber.

Mr. JONES of New Mexico. Mr. President, I must confess my amazement at the very earnest argument of the Senator from North Carolina [Mr. SIMMONS]. He has been preaching a good religious doctrine here; he has been talking about export trade, and the importance of it, and all that sort of thing; but for three and a half months, practically four months, we have been hearing from the other side that this bill is not framed for any such purpose.

Mr. SIMMONS. That is what I am afraid of, Mr. President, and I was uttering a word of warning.

Mr. JONES of New Mexico. The Senator also speaks about the necessity of these shingles for roofing. Everything that is a necessity in the United States is being taxed under this bill, and why let shingles escape? Moreover, the bill does not let shingles escape. The taxes on shingles are being increased 100 per cent whether we put this tariff on asbestos or not.

I am astonished that the Senator from North Carolina should cast his pearls before swine in this ignominious fashion. Such good, sound doctrine as the Senator has been preaching has no effect in this Chamber. I have been listening to him; I have been trying to preach some of those sermons myself, but they do not have any effect here.

Mr. SIMMONS. Mr. President, no one knows better than I do that these good, sound arguments of ours are in the nature of casting pearls before swine.

Mr. JONES of New Mexico. But, Mr. President, seriously, the argument of the Senator from North Dakota, so far as the theory is concerned upon which this bill is made up, is the best argument that has been made in favor of a duty upon raw asbestos. Time and again the only argument that has been presented on the other side in favor of a duty has been that there is some of the commodity coming in. There is not only some coming in here but there is a lot of it coming in, so great is the necessity for a tariff upon this product.

The Senator from North Dakota says that there are different classes of asbestos and that we have only one class in this country. Time and again the Senator has advocated and voted for a high duty upon different classes of commodities which did not compete or compare with any commodity produced in the United States. Time and again that has been done; and I say that there will be absolutely no consistency in the attitude of the committee or of the Senate if they refuse to put a duty upon asbestos and increase the duties upon these manufactured products. There is not a line of testimony that the kind of asbestos products that are being imported into the United States are not different in design, class, or quality from those manufactured here; but on the mere statement that there are some coming in we increase these taxes by 100 per cent.

Necessities? Of course they are. I repeat to the Senator from North Carolina that there is nothing of greater necessity, not only in shingles but in pipe coverings and in the hundreds of ways in which asbestos is used, and yet you are increasing by 100 per cent the tax upon the manufactured products without giving any reason on earth for it. We are exporters of these products, exporting three or four times as much as we import. There must be a reason for it—a difference in design, quality, or something of that sort—but that makes no difference.

Mr. TOWNSEND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Michigan?

Mr. JONES of New Mexico. I yield to the Senator.

Mr. TOWNSEND. I am wondering if the Senator is going to get to the point where he will tell us whether or not he is in favor of the duty proposed by the Senator from Arizona?

Mr. JONES of New Mexico. Why, certainly I am, and I am going to vote for it. There is no reason on earth why you should not put a duty on this product if you are going to put on these other duties. After the motion of the Senator from Arizona is acted upon we will talk a little further about the duties upon the manufactured products.

Mr. ASHURST. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. SMOOT. Mr. President, may I suggest to the Senator, if he is going to have his amendment as it should be in the bill, that it should read somewhat differently than it does?

Mr. ASHURST. I think that is a very good suggestion, because I have examined it, and I think the Senator is right about it.

Mr. SMOOT. The Senator wanted to put this product on the dutiable list at 20 per cent ad valorem.

Mr. ASHURST. That is what the amendment provides.

Mr. SMOOT. Therefore it would fall under paragraph 1401, and the first word in paragraph 1401 is "Asbestos." Then the Senator's amendment would read as follows:

Asbestos, unmanufactured, asbestos crudes, fibers, stucco, and sand and refuse containing not more than 15 per cent of foreign matter, 20 per cent ad valorem.

Then it fits in with paragraph 1401.

Mr. ASHURST. That is exactly correct, and I thank the Senator.

The PRESIDENT pro tempore. Does the Senator from Arizona withdraw his amendment and substitute for it the one suggested by the Senator from Utah?

Mr. ASHURST. Yes, Mr. President.

The PRESIDENT pro tempore. The original amendment is withdrawn, and the one now read by the Senator from Utah is substituted by the Senator from Arizona for it.

Mr. MCNARY. Mr. President, I ask unanimous consent to have read from the desk a splendid editorial which appears in the Manufacturers' Record under date of August 10, 1922. It is a very thoughtful editorial, and is pertinent to the general subject matter of the tariff discussion. It covers only about one page of the Manufacturers' Record.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered. The question is upon agreeing to the amendment proposed by the Senator from Arizona [Mr. ASHURST] to the amendment of the Senator from North Dakota [Mr. MCCUMBER], upon which the yeas and nays have been demanded and ordered. The Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. BALL], who is absent. I transfer that pair to the Senator from Texas [Mr. CULBERSON] and will vote. I vote "nay."

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and will vote. I vote "nay."

Mr. JONES of New Mexico (when his name was called). I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. MCCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER], and this announcement of transfer may stand for the day. I vote "nay."

Mr. SIMMONS (when his name was called). I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG]; but I am advised that if he were present he would vote the same way I shall vote, and therefore I vote. I vote "nay."

Mr. SUTHERLAND (when his name was called). I transfer my general pair with the senior Senator from Arkansas [Mr. ROBINSON] to the junior Senator from North Dakota [Mr. LADD] and vote "nay."

Mr. WATSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS], which I transfer to the senior Senator from Maryland [Mr. FRANCE] and vote "yea."

The roll call was concluded.

Mr. CURTIS. I desire to announce that the Senator from Minnesota [Mr. NELSON] is detained by reason of a death in his family, and that the Senator from Ohio [Mr. WILLIS] is detained by reason of illness in his family.

I also desire to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

Mr. EDGE. I transfer my general pair with the senior Senator from Oklahoma [Mr. OWEN] to the junior Senator from Vermont [Mr. PAGE] and vote "nay."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. I am informed that if he were present he would vote as I shall vote, and therefore I vote. I vote "nay."

Mr. SMOOT. I desire to announce that the junior Senator from Arizona [Mr. CAMERON] is necessarily absent. If he were present and not paired, he would vote "yea."

The result was announced—yeas 16, nays 40, as follows:

YEAS—16.

Ashurst	Jones, N. Mex.	Nicholson	Shortridge
Broussard	Jones, Wash.	Oddie	Stanfield
Bursum	McNary	Phipps	Warren
Gooding	New	Ransdell	Watson, Ind.

NAYS—40.

Borah	Frelinghuysen	McKellar	Smoot
Calder	Gerry	McLean	Stanley
Capper	Hale	Moses	Sterling
Colt	Heflin	Overman	Sutherland
Cummins	Kendrick	Pepper	Swanson
Curtis	Keyes	Rawson	Townsend
Dillingham	Lenroot	Reed	Trammell
Edge	Lodge	Sheppard	Underwood
Ernst	McCormick	Simmons	Wadsworth
Fletcher	McCumber	Smith	Walsh, Mont.

NOT VOTING—39.

Ball	Glass	McKinley	Pomerene
Brandegee	Harreld	Myers	Robinson
Cameron	Harris	Nelson	Shields
Caraway	Harrison	Newberry	Spencer
Culberson	Hitchcock	Norbeck	Walsh, Mass.
Dial	Johnson	Norris	Watson, Ga.
du Pont	Kellogg	Owen	Weller
Elkins	King	Page	Williams
Fernald	Ladd	Pittman	Willis
France	La Follette	Poindexter	

So Mr. ASHURST's amendment to Mr. MCCUMBER's amendment was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment offered by the Senator from North Dakota.

Mr. JONES of New Mexico. Mr. President, I suppose we might as well have one vote upon the amendments I offer to the amendment. I move to strike out the numerals "30" where they appear in the amendment to paragraph 1401, and to insert "20"; and where the numerals "25" appear, to strike them out and insert "10." That would make the rates just the same as they are under existing law.

I wish to say just a word further. As has already been stated, the industry in the United States has been prospering under existing law. It has increased its export trade enormously under existing law, and no evidence has been presented that there is any threatened injury from importations from anywhere. Judging from the fact that the Senate has just voted that it will not put a duty upon the crude material which would be imported in competition with that which is produced in this country, I assume that it is the purpose of the Senate to recognize these products as necessary products. They are in common and general use. They make for the safety of the households of the country, and the safety of the lives of the people, in many instances. Why should we increase these duties when it does not appear that there is any necessity for it? We are exporting three or four times as much as we are importing, and I submit that no reason which ought to impress anyone has been suggested as to why we should give the manufacturers of these products an opportunity to send their goods over the world in competition, but raise the prices to the American consumers.

The PRESIDENT pro tempore. The Chair overlooked the request of the Senator from Oregon [Mr. MCNARY] for which unanimous consent was given, to read the article referred to in his request. The Secretary will now read it.

The Assistant Secretary proceeded to read the article, and was interrupted by——

Mr. REED. Mr. President, may I inquire how long is this article?

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Secretary advises the Chair that he has read about a third of it.

Mr. REED. Is it being read in the time of anyone?

The PRESIDING OFFICER. The Chair understands that unanimous consent has been given by the Senate for its reading.

Mr. REED. Modifying the other unanimous-consent agreement?

The PRESIDING OFFICER. The present occupant of the chair was not in the chair at the time the consent was given, but is informed that the Senate has given unanimous consent that it may be read.

Mr. REED. I do not want to make any very vigorous protest but it is consuming the time of the Senate, and the article, so far as read, is not worth reading.

Mr. WATSON of Indiana. Why not let the remainder of it be printed without reading?

Mr. REED. I have no objection to having it printed, so that this gentleman's article can be franked out. I suppose that is the object.

Mr. McCUMBER. I hope the suggestion of the Senator from Indiana will be followed. If I had known it was to be read I should have objected, because I think it is out of harmony at least with our unanimous-consent agreement.

Mr. SIMMONS. Mr. President, might we not just as well establish a rule now that when a Senator asks that something be read the time of reading shall be taken out of his time, just as if he had spoken during that time? I have been insisting all the morning on a strict application of the rule, because I see that that is the only way we are going to get speedy action upon the pending measure.

Mr. McCUMBER. That is difficult because we can not tell whether an article in a paper is directed toward the particular amendment pending. I think the only proper way is to keep them out entirely. I do not object to their being thrown in where they take no time.

Mr. SIMMONS. I do not object at all to their being printed in the RECORD, but I think if the article is presented and is to be read it first ought to comply with the rule as to relevancy; and, secondly, if it is relevant, if it is to consume more than 10 minutes, the reading should cease at the end of that time.

The PRESIDING OFFICER. Under the unanimous-consent agreement, according to the express terms of the agreement, anything can be presented to the Senate by unanimous consent.

Mr. SIMMONS. I make no point about it, because unanimous consent has been given, but I hope hereafter that we will not give unanimous consent to the reading of articles that are not germane. If they are germane and we give consent, the time should be taken out of the Senator's time.

Mr. WATSON of Indiana. Why not permit the remainder of the article to be printed without reading?

Mr. McNARY. Mr. President, I have something to say about that. I have been given unanimous consent to have the article read. It is a splendid editorial, which fully covers the situation, and it refers to a position that has been severely criticized. I think it is pertinent and proper, and, as I have been given unanimous consent, I insist upon the order being carried out and the article being read in full.

Mr. SIMMONS. I have said that unanimous consent had been given.

Mr. McNARY. I appreciate that thoroughly, but I want the article read.

The PRESIDING OFFICER. The Secretary will continue the reading of the article.

The Assistant Secretary resumed the reading of the article, and was interrupted by——

Mr. REED. Now, Mr. President, I object to the article as contrary to the rule of the Senate. It is a reflection upon a Member of this body, and a very gross insult. I object under the rule to its being read.

Mr. McCUMBER. I do not know what it is. I heard something, but the sentence was not finished, so that no one could tell what is really meant.

Mr. REED. I object now to the reading of the article, and I object to the article.

The PRESIDING OFFICER. Of course objection to the reading of the article comes too late. The Chair does not believe the language, while he would not use it himself, reflects upon a Senator in such way as to impugn his integrity or honesty.

Mr. REED. It certainly is a criticism of a Member of the Senate.

The PRESIDING OFFICER. Yes, it is a criticism, the Chair supposes; but Senators may be criticized in an article. The Chair overrules the point of order.

Mr. REED. I want to call the Chair's attention to the rule. However, I shall withdraw the objection if the Senator from Oregon wants to put that sort of stuff in the RECORD.

The PRESIDING OFFICER. The Secretary will continue the reading of the article.

The Assistant Secretary resumed and concluded the reading of the article.

Mr. McNARY subsequently said: Mr. President, some time ago I offered and asked the Secretary to read into the RECORD a newspaper article taken from the Manufacturers Record. A colloquy ensued which interrupted the reading of the article. I should like now to have unanimous consent to have the article printed in the RECORD in its entirety, in 8-point type, so as to preserve the sequence.

The PRESIDING OFFICER (Mr. MOSES in the chair). Is there objection?

Mr. FLETCHER. Mr. President, I could not hear the request.

The PRESIDING OFFICER. The Senator from Oregon asks unanimous consent that the newspaper article which he presented this morning may be printed in the RECORD consecutively, in 8-point type, so that the colloquy which interrupted the reading may not interfere with the continuity of the editor's argument. Is there objection? The Chair hears none, and it is so ordered.

The article entire is as follows:

"Never, we take it, in the long history of tariff legislation has the fight against the American system of protection been more subtly, more viciously, or more wantonly conducted than in recent months. We do not know how it is that the most selfish interests in the Nation, the importers, have been able to blind the eyes of those who should be able to see clearly, but the fact remains that the virus of free trade has been injected, apparently, even into the veins of the elect, and men who were put into office because they were supposedly pledged heart and mind to the protective system have been beguiled by the loud crying of the metropolitan press into compromises of all sorts. Some of them, we understand, secretly and by night, have even sought to chloroform the very measure which their own party is under sacred warranties to enact.

"It is but natural that the metropolitan press, particularly in New York, should seek the abolition of protective barriers. That city is a great importer, a center of distributing agencies. Not only are its financiers heavily involved abroad, but its department stores and its importing wholesalers, waxing fat by distributing the pauper products of Europe, grow rich by their exploitation of the American market, which belongs by right to American manufacturers. They would wring the neck of their golden goose, for iterate as they will the old fallacy that others will not buy of us unless we give them free access to our markets, there is one great truth they never mention and that is that a great American market exists only because production in America is kept profitable. There is only eventual bankruptcy for the whole Nation when we allow poverty products to drive out quality products.

"The Nation is told that conditions have changed much since the last presidential election, and that the need for protection is not now what it then was. Let none be deceived by propaganda of that sort. Bankrupts are cutthroat competitors. They are inevitable destroyers of legitimate business. They spread, as it were, the germs of failure into every land they enter. Solvency can not be the bedfellow of insolvency and escape contamination. The danger to American enterprise is not less than it was two years ago; it is greater.

"We have in Congress many men who have not even learned the alphabet of national solvency. They are intoxicated with the sounding phrases of the textbook writers, dreamers of dreams, reasoning in terms of the ideal and forgetting that this is still a practical world, in which men and nations get what they do get only by wise struggle, by sturdy defense of their rights, by statesmanlike protection of their own essential privileges. Only recently, to illustrate, the eminent junior Senator from Massachusetts had the intellectual impertinence to rise in the Senate and deliver through the newspapers a terrific attack on the proposal of the Republican agricultural bloc that the farmers of the United States be given some protection. We say it was intellectual impertinence, for the whole history of tariff making in America has been the story of special protection for New England. Its factories have reveled in protection even under an Underwood bill, for while that piece of legislation declined to afford protection of any sort to products of the South and aimed at the entire destruction of the sugar industry, it did give, as the records show, abundant protection to New England. Here is Senator WALSH representing a constituency that has waxed fat at all times on wise protection, and we hear no outbursts of indignation from him because the people of the South and West for years paid, by his logic, bounties to keep New England mills prosperous, but he almost bursts in protest at the suggestion that New Englanders might have to pay a few cents a year more for food in order that American farmers have a fair show.

"Another group of Senators shout to the housetops that men such as Senator GOODING are beyond the pale because they demand a tariff on wool and are themselves sheep growers. Is not Senator SMITH, of South Carolina, a grower of cotton and has there been any protest that he has devoted himself while in office to efforts to improve the status of the cotton industry? His constituents send Senator GOODING to Washington because he knows the sheep industry and what it needs. For him to recuse himself, on the ground that he personally is interested in the prosperity of the sheep industry, would be for him to betray his trust. All Senators ought to be interested in national prosperity. We detest hypocrites, even if their excuse is that they are playing politics. How dare any Senator

who has fought for cotton object if other Senators fight for wool. And yet a number of people, ill-informed, have jumped to the conclusion that Senator GOODING and his friends have been unethical. They are, instead, entitled to applause. Particularly so members of the Republican agricultural tariff bloc, many of whom have devoted real and sincere effort to the protection of southern industries that were deserted by southern Senators.

"It is said the Republican Party will lose the election if it passes the tariff bill. It will be snowed under if it does not. The emergency tariff act has saved more than one whole State from general bankruptcy. Informed men know it. The Underwood law had this country in the throes of the worst industrial panic it had ever known when the Great War intervened to counteract its influence. And if the Underwood law is permitted to remain on the statute books, again will the soup houses be the meccas in our cities. Let politicians beware lest they mistake the shouting of some large newspapers as the voice of the people. The elections show that the people, in fact, are doing their own thinking. And one of the things they are thinking is that a Congress which fails to protect them against the most menacing competition they have ever known is a worthless Congress, too cowardly or unintelligent to warrant further support.

"It was, we think, a calamitous thing that Republican leadership ever surrendered the principle of American valuation. To our own selves be true. But propaganda, false and misleading, apparently overturned it, and a panicky Senate was afraid to do the obviously right and proper thing. We are in danger, therefore, and our prosperity is menaced, even if the present bill becomes a law, for undervaluation and cheating at the customhouses will continue, but under the new law we shall have a fighting chance. That is better than continuing to play the rôle of Little Red Riding Hood.

"We are by no means satisfied with some features of the bill. As Wallace's Farmer has said, if we are going to have free nonedible vegetable oils the farmer is sort of trapped. But we do not believe the House will accept free vegetable oils of any kind, or that the President will approve such an inexcusable sacrifice of the Nation's underlying industry. Nor can we find it possible to explain the Senator's vote in favor of turning the American dye industry, essential in the national defense, over to the German cartel. There are imperfections to the bill, but glaring imperfections are not those of too much protection; they are those resulting from a coalition of free traders with selfish manufacturing interests and therefore giving too little protection. With the South, in tariff matters, represented by economic infants who vote for lower rates just because they are lower, and with southern Senators actually voting against the interest of their own vegetable-oil producers in favor of the great soap companies, it is rather remarkable that agriculture has been able to secure any benefits at all. Southern votes rally to keep the South poor. They veto prosperity, so far as they are able.

"Tariffs are the bulwarks of forward-moving nations. The American tariff system, transplanted to Germany, was making Germany the leading industrial nation on earth. The tariff permitted the development of the mighty American manufacturing interests that saved the world for civilization. Without tariffs we should to-day be a second-class nation, buying our manufactured goods from abroad. We should be, as all purely agricultural and free-trade nations have been, 'meanly prosperous.' Let us keep to the charted channels. Let us hold to the principles that have made us great, in economics and in morals. Let the Congress not be bulldozed, fooled, or scared into vetoing national prosperity. It has no duty at this time more sacred and more imperative than the passage of a protective tariff measure."

Mr. FRELINGHUYSEN. Mr. President, I ask unanimous consent to have inserted in the RECORD a short editorial from the Journal of the American Medical Association, of Chicago, Ill., of date August 12, 1922, entitled "Continue the embargo on dyes and drugs."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Journal of the American Medical Association, Chicago, Ill., August 12, 1922.]

CONTINUE THE EMBARGO ON DYES AND DRUGS.

Unless prompt action is taken the people of the United States may soon be paying exorbitant tribute to Germany once more as the price of recovery from disease and of the maintenance of health. Caught between the opposing forces in the conflict between the importers of German dyes and American dye makers now being carried on in the Senate in connection with tariff legislation, the synthetic drug industry in the United States, built up as a result of lessons learned during the World War, is threatened with extinction. Again German domination of our drug markets looms up as a not remote possibility.

Those synthetic drugs found to be of service in the relief of suffering are mostly side products in the manufacture of dyes from coal tar, and their production on a commercial basis is not possible except when carried on along with the dye industry. With the outbreak of the World War in 1914 commerce with Germany was promptly cut off by the blockade established by her enemies and we, although then a neutral Nation, found ourselves not only without the dyes and essential drugs formerly supplied almost exclusively by Germany but even without means for producing them. Driven by the conditions thus created by the blockade, and later impelled by conditions that resulted from our own entrance into the war, an industry was created within our own borders whereby needed drugs were produced and our civilians and military forces alike supplied with these necessary agents. When the armistice was proclaimed we possessed an infant industry which experience had shown to be necessary to the continued welfare and safety of the American people, and particularly for the relief of the sick.

After careful consideration and debate, as a matter of sound economic policy deliberately determined on and in order that this infant industry might live, a limited embargo was laid against the importation of synthetic drugs and of the dyes with which in their manufacture they were associated, so long as no necessity might exist for importing them. Up to the present time our domestic drug supply has been adequate, and as the result of competition among American manufacturers the sick have been able to supply all their needs at fair prices instead of paying unconscionable tribute to foreign manufacturers. The synthetic drug industry now shows signs of growth and of increasing strength that promise sooner or later to make it a substantial factor not only in American prosperity but also in the maintenance of American health and national security.

Recently, however, a movement has been initiated that seems likely, if successful, to undo everything that has been accomplished; the protecting embargo is to be raised and the still feeble dye and drug industries are to be protected only by certain proposed tariff schedules. Those most familiar with the situation assert that as a result the industries will die; that the duties proposed are inadequate to protect the industries, and that in the present stage of development of these industries no tariff schedule can be framed that will be adequate.

No sufficient evidence has been adduced to justify the opinion that American dye and synthetic drug industries will survive if they are thrown just now into competition with the highly organized, war-perfected factories of Germany, operated by poorly paid German labor. In the absence of such evidence it would seem to be folly to take any action that may destroy them. The welfare of the people, and particularly the welfare of the sick, requires that the manufacture in the United States of synthetic chemicals for medicinal purposes be protected and built up. To that end it is necessary to protect and build up the dye industry, for without it these chemicals can not be made on a commercial basis. In view of the public health aspects of the matter, the medical profession should make its voice heard in no uncertain terms, protesting against the removal of the embargo.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The question is on agreeing to the amendment proposed by the Senator from New Mexico [Mr. JONES] to the amendment of the Senator from North Dakota [Mr. MCCUMBER].

Mr. PHIPPS. May we have the pending amendment reported?

The PRESIDING OFFICER. The Secretary will read the amendment to the amendment.

The READING CLERK. In the amendment proposed by the Senator from North Dakota the Senator from New Mexico proposes to strike out "30" and insert "20," and to strike out "25" and insert "10," so as to read:

Asbestos, manufactures of: Yarn and woven fabrics composed wholly or in chief value of asbestos, 20 per cent ad valorem; all other manufactures composed wholly or in chief value of asbestos, 10 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I want to call attention to some information which I have just received. The industry is carried on principally by one or two firms. The figures which I have showed that in 1910 the net profits were $624,119. Those profits have been increased until in the year 1920 they were about $3,750,000. They have increased their surplus from a little over $1,000,000 in 1910 to about $14,500,000 in 1920. They have increased their dividends from $135,000 in 1910 to $384,000 in 1920. They have been expanding their plants and are now constructing a large establishment in the city of Chicago. They have plants not only in the United States but in Canada, Cuba, Porto Rico, and Manila. I also am advised that our exports of these products are over eleven times the amount of our imports, and that the total wage labor cost of these manufactures is only 15.1 per cent. That is the total wage cost of the manufactured product; so that the duty of 25 per cent which is proposed by the committee amounts to 166 per cent of the entire labor cost.

These concerns are selling their product abroad more cheaply than they are selling them in the United States under existing law.

Mr. FLETCHER. Has the Senator from New Mexico any objection to stating the name of the concern to which he has referred? The facts which he has stated being true, it seems to me there ought not to be any duty at all imposed on this article.

Mr. JONES of New Mexico. It is Johns-Manville (Inc.).

Mr. FLETCHER. We ought to put a duty on the raw material and take off any duty which is now proposed on the manufactured product.

Mr. REED. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll and the following Senators answered to their names:

Borah	Jones, N. Mex.	New	Shortridge
Brandegee	Jones, Wash.	Nicholson	Smoot
Calder	Keyes	Oddie	Stanfield
Capper	Lenroot	Overman	Sterling
Curtis	Lodge	Pepper	Trammell
Edge	McCormick	Phipps	Wadsworth
Ernst	McCumber	Ransdell	Warren
Fletcher	McKellar	Rawson	Watson, Ga.
Gooding	McNary	Reed	Watson, Ind.
Hale	Moses	Sheppard	

The PRESIDING OFFICER. Thirty-nine Senators have answered to their names. There is not a quorum present. The Secretary will call the names of absent Senators.

The reading clerk called the names of absent Senators and the following Senators answered to their names when called:

Frelinghuysen	Smith	Swanson	Underwood
Simmons	Sutherland		

The following Senators entered the Chamber and answered to their names:

Ashurst	Colt	Heflin

The PRESIDING OFFICER. Forty-eight Senators have answered to their names. A quorum of the Senate is present.

Mr. JONES of New Mexico. Mr. President, I desire to call attention a little further to this concern to which I was referring. I find that it is——

The PRESIDING OFFICER. The Chair will call the attention of the Senator from New Mexico to the ruling of the former occupant of the chair, that when a Senator has spoken twice on an amendment he has exhausted his time. The Senator from New Mexico has spoken twice on the amendment.

Mr. JONES of New Mexico. I did not recall that I had done so.

The PRESIDING OFFICER. So the Secretary informs the Chair.

The question is on the amendment of the Senator from New Mexico [Mr. JONES] to the amendment which has been offered by the Senator from North Dakota [Mr. MCCUMBER] on behalf of the Committee on Finance.

Mr. REED. Mr. President, it is clearly useless to discuss the pending question with Senators nearly all absent. I do not blame them for being out of the Chamber; I am not criticizing them, but the statement made by the Senator from New Mexico [Mr. JONES] ought to be repeated in the presence of those Senators who have come in since he made the statement. I understand, under the unanimous-consent agreement, the Senator from New Mexico is debarred from making a further statement.

In brief, this appears to be the situation: One concern is engaged in the manufacture of asbestos of the kind that comes under the clause of the bill now under consideration. That concern has made immense profits and at the present time is shipping large quantities abroad and selling abroad cheaper than at home. The proposed tariff rate, therefore, is simply to promote the profits of one institution and to compel the American citizen to pay more for his asbestos than the same institution, the institution which is protected, is selling for abroad. That is an absolute illustration of the worst possible vice that could be found in a tariff bill.

I have nothing more to say. I simply want the question understood by the few Members who have come in. On this question, Mr. President, I ask for the yeas and nays.

Mr. FRELINGHUYSEN. Mr. President, I think the Senator from Missouri is mistaken when he says that the asbestos business is controlled by one concern. It is true that this concern is in my State, but they are facing the competition of other companies. I have here a letter from one of the large asbestos manufactures, Keasbey & Mattison Co., located at Ambler, Pa. The letter is dated July 25, 1922. The Senator from North Carolina [Mr. SIMMONS] has made the same statement which the Senator from Missouri has made. In the letter to which I have referred is the following clause:

> Senator SIMMONS, of North Carolina, is quoted as saying in the New York Herald of July 10 that the asbestos industry is controlled by the Johns-Manville Co. This is absolutely false. There are twenty-some companies requesting a tariff on asbestos materials, none of which are in the slightest way connected with the Johns-Manville Co., several of which do as much business with regard to asbestos materials as does the Johns-Manville Co.

So the misapprehension which has gained ground that the Johns-Manville Co. is a monopoly is denied by Mr. Barnes, of the Keasbey & Mattison Co.

Mr. REED. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Missouri?

Mr. FRELINGHUYSEN. I yield.

Mr. REED. What proportion of the product made in America is produced by the Johns-Manville Co.?

Mr. FRELINGHUYSEN. I should say from the letter from which I have quoted that not one-half of it, because it is stated in the letter that there are 20 companies, some of which do as much business as the Johns-Manville Co.

Mr. REED. That seems to be denied by the document before me, which is issued by the Fair Trade League. Is it true that this company had net profits in 1920 of $3,703,314, that it declared dividends of $384,085, and that it has a surplus of $14,319,743?

Mr. FRELINGHUYSEN. I do not know.

Mr. REED. Is it true that its surplus in 1910 was only $1,108,210?

Mr. FRELINGHUYSEN. I do not know anything about the financial condition of the company; but the Senator stated that this company had a monopoly of the output in this country, and here is the statement of one of their competitors saying that there are 20 other companies manufacturing this one product. I simply rose to put in the RECORD a denial of the statement that this company has a monopoly on asbestos manufacturing in this country, as stated by one of their competitors.

Mr. REED. Is it true that this company, which has over $14,000,000 of surplus and has a total capital stock of $2,500,000, is asking for protection?

Mr. FRELINGHUYSEN. Mr. President, there are 46 companies manufacturing asbestos in this country that are asking for protection against foreign competition a duty only 5 per cent higher than Canada places upon their yarns, and equal to the Canadian duty on other products, and 3½ per cent lower than England places upon brake linings. The Senator might ask me whether it was true that Henry Ford, with a small capitalization and millions of assets, in asking for protection on automobiles, had many times more assets than he had capital. That has nothing to do with it. The question is fundamental, whether we are going to protect fairly our American industry or whether this rate is unfair. I know nothing about the financial condition of these companies. I know nothing about the Johns-Manville Co. The question before the Senate is, What is the proper rate of duty to protect the products of 46 manufacturers of asbestos in this country, one of which is the Johns-Manville Co.?

Mr. REED. Is it true that we exported in 1921 $2,606,428 worth of asbestos, and imported only $222,662 worth? And is it not true that the asbestos exported was sold in the foreign market for less than it was sold for in the domestic market by these people who are now clamoring for protection?

Mr. FRELINGHUYSEN. Mr. President, the exports consisted of heavy products—not yarn, not brake linings, but heavy products—and approximated $2,000,000 of shingles in 1920 to Cuba. In 1921 they went to South America and Canada, and one concern did most of the exporting. I also know that the two concerns, the Argus Asbestos Co., of Port Chester, N. Y., and the Raybestos Co., of Bridgeport—the Argus Co. being an agent for Turner Bros. (Ltd.), of England, and the Raybestos Co., agents for Bell's, United, of England—imported nearly $2,000,000 of yarns in one contract.

Mr. REED. In what year?

Mr. FRELINGHUYSEN. During a contract period of over two years, I am told.

Mr. REED. The statement I have before me is that all of the yarns imported in 1921 amounted to only $132,737.

Mr. MCCUMBER. Mr. President, will the Senator from Missouri yield to me for one suggestion?

The PRESIDING OFFICER. The Senator from New Jersey has the floor.

Mr. FRELINGHUYSEN. I yield to the Senator.

Mr. REED. I had the floor, and I have never surrendered it.

The PRESIDING OFFICER. The Senator interrupted the Senator from New Jersey.

Mr. FRELINGHUYSEN. It is a running colloquy.

Mr. REED. Go ahead.

The PRESIDING OFFICER. The Senator from Missouri interrupted the Senator from New Jersey, and the Senator yielded.

Mr. REED. The Chair is mistaken. I had not taken my seat when the Senator from New Jersey rose and began his remarks; but I do not care anything about that, except that I wish to retain my right to the floor.

The PRESIDING OFFICER. The Chair understood that the Senator was still interrupting the Senator from New Jersey. He did not know that the Senator from Missouri had taken the floor.

Mr. McCUMBER. I simply want to say to the Senator from Missouri that the investigation of these exports discloses the fact that they are exports of what are called asbestos products; but they are composed mostly of magnesia and other products of that character, with a very little asbestos in them, although they are given that name. That is my information. For instance, in the exports there were 2,000,000 pounds of these low grades while there were only 200,000 pounds of the higher grades of asbestos. This is for the 11 months of 1921.

Mr. REED. I call the Senator's attention to the following statement in the Summary of Tariff Information, page 1092:

Imports of asbestos yarn and woven fabrics for the fiscal years 1910 to 1913 averaged a little over $90,000; 1914, $113,246. Imports of all other manufactures of asbestos in 1913 were valued at $287,308; in 1914 at $283,027. Later statistics, for calendar years, follow:

Asbestos yarn.

1918	$2,349
1919	49,265
1920	248,649
1921 (9 months)	57,023

Woven fabrics.

1918	$783
1919	138,551
1920	230,266
1921 (9 months)	56,909

All other manufactures of asbestos.

1918	$23,154
1919	69,565
1920	139,535
1921 (9 months)	128,711

So that the imports have been almost inconsequential during all of this period of years.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from North Dakota?

Mr. REED. Yes.

Mr. McCUMBER. I will say to the Senator that I rose simply to make this statement concerning the exports, so that it would not be understood that we were exporting these high textiles and valuable manufactures: For instance, pipe coverings are made by using a sort of paste with the fibers of the asbestos, and those are used for wrapping pipes, and so forth, and general insulation; and then there are the boards of asbestos which really form a very small part and yet they are called asbestos boards and asbestos packing.

Mr. REED. But all of these things are under the protective tariff.

Mr. McCUMBER. Oh, yes; to a certain extent.

Mr. REED. Although we are shipping a vast quantity abroad, we still put on the protection here. That is all I care to say.

Mr. McCUMBER. In order to be protected they must be wholly or in chief value of asbestos. I think the exports that the Senator is speaking of are not in chief value of asbestos.

Mr. REED. The question is a very plain one after all the explanation. I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Mexico to the amendment of the Senator from North Dakota, on which the Senator from Missouri asks for the yeas and nays.

The yeas and nays were ordered.

Mr. SMITH. Mr. President, may the specific amendment which we are to vote on be stated?

The PRESIDING OFFICER. The Senator from South Carolina asks that the amendment be stated again.

The READING CLERK. The Senator from North Dakota proposes the following as a substitute for paragraph 1401:

Asbestos, manufactures of, and woven fabrics composed wholly or in chief value of asbestos, 30 per cent ad valorem; all other manufactures composed wholly or in chief value of asbestos, 25 per cent ad valorem.

The Senator from New Mexico proposes to strike out "30" and insert "20," and in the last line of the amendment to strike out "25" and insert "10."

Mr. SMITH. That is what we are voting on? We are voting on the amendment of the Senator from New Mexico?

The PRESIDING OFFICER. On the amendment of the Senator from New Mexico, on which the yeas and nays have been demanded and ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair and transfer as on the former vote, I vote "yea."

Mr. FRELINGHUYSEN (when his name was called). I transfer my pair with the Senator from Montana [Mr. WALSH] to the Senator from Michigan [Mr. NEWBERRY] and vote "nay."

Mr. JONES of New Mexico (when his name was called). Making the same announcement as to the transfer of my pair as on the previous vote, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I desire to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. SIMMONS. I transfer my pair with the junior Senator from Minnesota [Mr. KELLOGG] to the senior Senator from Montana [Mr. MYERS] and vote "yea."

Mr. WATSON of Georgia. I transfer my pair with the Senator from California [Mr. JOHNSON] to the Senator from Rhode Island [Mr. GERRY] and vote "yea."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS] which, in his absence, I transfer to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. SUTHERLAND. Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "nay."

Mr. EDGE. Making the same announcement as before as to the transfer of my pair, I vote "nay."

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Oklahoma [Mr. HARRELD] and vote "nay."

The result was announced—yeas 23, nays 31—as follows:

YEAS—23.

Borah	Kendrick	Ransdell	Swanson
Capper	McKellar	Reed	Trammell
Dial	McNary	Sheppard	Underwood
Fletcher	Nicholson	Simmons	Warren
Heflin	Overman	Smith	Watson, Ga.
Jones, N. Mex.	Phipps	Stanfield	

NAYS—31.

Brandegee	Ernst	McCormick	Rawson
Bursum	Frelinghuysen	McCumber	Shortridge
Calder	Gooding	McLean	Smoot
Colt	Hale	Moses	Sterling
Cummins	Jones, Wash.	New	Sutherland
Curtis	Keyes	Norbeck	Wadsworth
Dillingham	Lenroot	Oddie	Watson, Ind.
Edge	Lodge	Pepper	

NOT VOTING—41.

Ashurst	Glass	Myers	Spencer
Ball	Harreld	Nelson	Stanley
Broussard	Harris	Newberry	Townsend
Cameron	Harrison	Norris	Walsh, Mass.
Caraway	Hitchcock	Owen	Walsh, Mont.
Culberson	Johnson	Page	Weller
du Pont	Kellogg	Pittman	Williams
Elkins	King	Poindexter	Willis
Fernald	Ladd	Pomerene	
France	La Follette	Robinson	
Gerry	McKinley	Shields	

So the amendment of Mr. JONES of New Mexico to Mr. McCUMBER's amendment was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the amendment proposed by the Senator from North Dakota.

Mr. JONES of New Mexico obtained the floor.

Mr. STANLEY. Mr. President, I wish to be recorded as voting "yea."

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Kentucky?

Mr. JONES of New Mexico. I yield.

Mr. STANLEY. I did not understand that the vote had been announced.

The PRESIDING OFFICER. The vote has been announced.

Mr. STANLEY. If I had been present before the result was announced, I would have voted to reduce the rate.

Mr. JONES of New Mexico. Mr. President, I desire to call attention to the fact that the rates in the proposed committee amendment increase the duty upon woven fabrics by 50 per cent, and upon the general class of asbestos goods by 150 per cent.

This industry is dominated to a large extent by one concern, to whose financial condition I desire to call attention. It has seven plants well distributed over the country, and, says our financial authority, "branches throughout the United States, Canada, Cuba, Porto Rico, and Manila, also agencies throughout the world." It has recently purchased 255 acres of land north of Chicago, where it will duplicate its New Jersey plant at a cost of $3,000,000. It has no funded debt. Its preferred stock, 7 per cent cumulative, is $1,895,000. Its capital stock is $2,500,000.

It has a surplus now of nearly $14,500,000. The corporation increased its capital stock from $4,108,210 in 1910 to $21,157,635 in 1920. It paid excellent dividends.

In 1920, after paying its preferred-stock dividend of 7 per cent and 10 per cent upon its common stock, it carried to surplus account $3,319,229, or 115 per cent of its total common stock.

The total wages paid for manufacturing this product are only 15.1 per cent of the selling price, and the duty which the Senate proposes to put on the commodity is 166 per cent of the total wage cost.

While our manufacturers sold abroad at prices competing with the world, their domestic prices were substantially greater than export prices by the amount of the duty, 17.5 per cent, plus the profits that importers added on the 2½ per cent that they brought in.

The crude material, asbestos, costs the same the world over, 75 per cent of it coming from mines in Canada, in which it is understood that American manufacturers are largely interested. The crude material is 50 per cent of the cost of the product. No tariff consideration, then, should be given to this 50 per cent, and any tariff on the finished product is equivalent to twice the amount of this tariff on the differentials of labor, overhead, and profit. The proposed protection of 25 per cent is therefore 50 per cent on the foreign producer's total labor, overhead, and profit.

Mr. NICHOLSON. Mr. President, the paragraph we are now about to vote upon pertains to asbestos. We considered this morning the question of placing a duty upon the raw product. An amendment providing for such a duty was voted down and the article is placed upon the free list.

We who produce the raw product are asked to produce it in competition with the cheap labor of the world, but when it comes to the manufactured article, the same Senators who voted to place raw asbestos upon the free list come in and ask for a high tariff duty on the manufactured product, so that it may be protected against foreign competition, and that in the face of the enormous profits which are here shown to be made by these manufacturing concerns.

I can say for the raw producers that they have made no profits, that they have been producing this material practically at a loss, and it is clearly shown that the manufacturers are making enormous profits. I would like to know from the distinguished Senator from New Jersey how he defends this action, taking into consideration the conversion costs, which he was talking about last night.

Mr. FRELINGHUYSEN. Mr. President, I do not want to take up much of the time of the Senate. In answering the inquiry of the Senator from Colorado I desire to say that I do not think he quite understands this situation. The committee was asked to impose a duty upon Canadian asbestos to protect the producer of Arizona asbestos. The information which came to us from the Tariff Commission was that the amount which could be produced in Arizona was insufficient for the American consumption.

Mr. NICHOLSON. Mr. President—

Mr. FRELINGHUYSEN. I will yield for a question when I have finished.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. FRELINGHUYSEN. I read from the report of the Tariff Commission:

> The United States is the largest consumer of asbestos in the world and manufactures more asbestos products than any other country; but it has never been, and shows no promise of ever becoming, an important factor in the production of the unmanufactured product. Its meager output could be increased to some extent but it will probably never become great enough to supply the domestic demand. The United States must, therefore, rely largely upon imported crude material.

The Senator has asked me a question, attacking the policy of the committee in putting asbestos on the free list. If the committee had placed asbestos on the dutiable list, naturally they would have given a larger compensatory duty on these manufactured products. The Senator himself agrees with that principle, of course, because it is the principle upon which this bill is written.

I have no quarrel with the Senator on account of his desire to have a duty on raw asbestos, but it has nothing to do with this situation. The protection which 46 of the manufacturers are asking is sought on the basis of the difference between production costs here and abroad, because the product can be manufactured here and is manufactured here. If the duty were taken off, the American manufacturer would have to close his plant, because Canada has a duty of 25 per cent against these products, and so has England; and if the Senator believes that we should take off this duty and destroy this industry, he renounces the principle upon which this bill has been founded.

Mr. NICHOLSON. Not at all.

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Colorado?

Mr. FRELINGHUYSEN. I yield.

Mr. NICHOLSON. The distinguished Senator from New Jersey admits that if the manufacturers of asbestos in this country did not have protection they would be compelled to close down; but he is perfectly willing that the asbestos producer, the asbestos miner, shall remain closed down. He is closed down now, and the Senator is willing that he shall continue closed down. It is clearly shown here that the asbestos manufacturers have made enormous profits, because they have been protected. Give us the protection which has been extended to the manufacturers, and we will show you whether we can produce this article or not. It exists in this country in large quantities. It is true that he reads from the report of the Tariff Commission; but, as I stated this morning, the Tariff Commission has only information obtainable from the Geological Survey and the Bureau of Mines, which have been insufficiently supplied with funds with which to obtain reliable information, and the information which the Tariff Commission has upon which to base its conclusions is information obtained 10 years ago, not to-day, not yesterday, not a year ago. So it seems to me if we as Republicans are legislating here to help infant industries, that the asbestos miner and not the manufacturer represents an infant industry in this case.

The PRESIDING OFFICER. Will the Senator from New Jersey yield for the Chair to ask him a question?

Mr. FRELINGHUYSEN. Certainly.

The PRESIDING OFFICER. Does the amendment proposed by the committee increase or lower the rate provided by the House?

Mr. FRELINGHUYSEN. I am informed that it lowers the House rate.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. STANFIELD. Mr. President, I ask unanimous consent at this time to have inserted in the RECORD an article referring to a matter discussed the other day. I shall not read it nor shall I ask that it be read.

There being no objection, the article referred to was ordered to be printed in the RECORD, as follows:

[From the Washington Post, August 10, 1922.]

PACKERS ANSWER WALSH'S STATEMENT ON HIDE DUTY.

The Institute of American Meat Packers yesterday issued the following statement through its Washington office:

"Senator WALSH, in a statement published in Monday newspapers, said that 'a vote for a duty on hides is a vote for the packers.' The Institute of American Meat Packers is not concerned one way or the other in the proposed tariff or the absence of a tariff on hides, but it is interested in incidental remarks about the packing industry made by the Senator.

"Senator WALSH said that the packers have a monopoly of the tanning industry, and that if there was a duty the small tanners would be driven out of business. This statement is erroneous. The packers, big or small, do not have control of the tanning industry. The big packers, through tanneries in which they are interested both directly and indirectly, handle less than 20 per cent of the leather made in the United States, and they are in keen competition with each other, even in the handling of this small proportion.

"The institute resents any inferences that the packing companies could or would crush or destroy an industry. The charges that the packers have a monopoly power over the price of cattle, hides, meat, or other products have been disproved again and again.

"This statement is issued not so much in criticism of Senator WALSH as it is to correct published inferences which reflect upon the commercial integrity of one of America's most important industries."

The PRESIDING OFFICER. The Secretary will report the next amendment.

The READING CLERK. On page 180, line 2, the committee proposes to strike out "30" and insert "45," so as to make the paragraph read:

PAR. 1402. Boxing gloves, ice and roller skates and parts thereof, baseballs, footballs, tennis balls, golf balls, and all other balls, of whatever material composed, finished or unfinished, designed for use in physical exercise or in any indoor or outdoor game or sport, and all clubs, rackets, bats, or other equipment, such as is ordinarily used in conjunction therewith in exercise or play, all the foregoing, not specially provided for, 45 per cent ad valorem.

Mr. SMOOT. On page 179, line 19, I move that the words "ice and roller skates, and parts thereof," be stricken out. I

will state that, if that is agreed to, I shall then ask that those words be inserted further on in the paragraph, but with a lower rate of duty.

The PRESIDING OFFICER. The Senator from Utah proposes an amendment, which the Secretary will report.

The READING CLERK. On page 179, lines 19 and 20, the Senator from Utah proposes to strike out "ice and roller skates, and parts thereof."

The amendment was agreed to.

Mr. SMOOT. On page 180, line 2, I ask that the committee amendment be disagreed to, so the rate will be 30 per cent instead of 45 per cent, as there proposed.

Mr. JONES of New Mexico. Mr. President, I should like to get a little information. The articles in this paragraph have not heretofore been classified in this way. I should like to know how the rates as provided here compare with those under the existing law?

Mr. SMOOT. The items fell in different paragraphs, according to the material of chief value. The committee thought that they were now of sufficient importance to be put in a paragraph by themselves, so that hereafter the statistics would show just what the importations are and the unit value and the equivalent ad valorem wherever there is a specific rate agreed to.

Under the Payne-Aldrich law the rate was 35 per cent ad valorem provided wood was the chief value of the article. If metal was the article of chief value, the rate was 45 per cent. If leather was the article of chief value, the rate was 40 per cent. Under the Underwood law, if they were principally of wood, the rate was 15 per cent; if principally of metal, the rate was 20 per cent; and if principally of leather, they were 30 per cent.

Under the pending bill the rate of 30 per cent, which I now ask be adopted instead of 45 as originally proposed, would be the same as in the Underwood law wherever the leather was the material of chief value; wherever the metal is the material of chief value the rate would be an increase over the Underwood rate of 10 per cent, but a decrease under the Payne-Aldrich law of 15 per cent.

The Senator will notice that we have taken out "ice and roller skates and parts thereof." Those are virtually metal articles which fell within the paragraph. I shall later offer an amendment, when the pending amendment is disposed of, placing "ice and roller skates and parts thereof" in another part of the paragraph at an ad valorem rate of 20 per cent, which would be the same rate they now bear under the Underwood law.

Mr. JONES of New Mexico. Mr. President, I desire to say just a word. There is absolutely no information furnished from an official source regarding these articles used in exercise and in play. I really know nothing about the subject except that it covers, even as left in the bill, boxing gloves, baseballs, footballs, etc. We all know what they are, of course.

Mr. SMOOT. And all of those articles carry exactly the same rate as under the Underwood law.

Mr. JONES of New Mexico. If the Senator will please pardon me, I do not insist that the Underwood law is always a perfect law. I think there are a good many rates in that law which are too high, and some of them I think are probably too low. But we are now framing a new bill and it ought to be considered on its merits. The paragraph covers—

Boxing gloves, baseballs, footballs, tennis balls, golf balls, and all other balls * * * and all clubs, racquets, bats, or other equipment such as is ordinarily used in conjunction therewith in exercise or play.

Now, the Senator may say what he pleases about the industry and that sort of thing. I suppose if there is an industry in the country that really could not prosper which is manufacturing these various articles, that under the general idea of the bill there ought to be a substantial duty levied. But here is something which makes for the health and the morale of every child in the land, and to put a tax upon it if it is not absolutely essential I think is worse than a crime. We have no evidence here that the industries need any such duties as 25, 30, and 40 per cent. We have no information about the industries. We do not know what the conditions are, or anything of the sort. We are absolutely at the mercy of those who are interested in the enterprise and we have to take their word for what they want.

Mr. SMOOT. Mr. President, it is very strange that in 1913 it was not a crime to put 30 per cent upon these articles, and it was not a crime then to put 20 per cent upon other of the articles, but now, no matter what rate we put upon them, it is a crime. I thought the Senator from New Mexico would not object to these rates as now finally agreed to. The only reason why we took them out, as I said, is that hereafter we shall have a statistical report from the Treasury Department telling us just how many are imported and the value, what they are, and the unit value of the importations. Hereafter Congress will not be in the same position as it is to-day and as described by the Senator from New Mexico. We will have that information, we will know the unit values and the value of the importations. This is one paragraph to which I thought nobody in the world would object.

Mr. FLETCHER. Mr. President, just what is the proposition of the Senator from Utah?

Mr. SMOOT. The Senator proposes to strike out "ice and roller skates, and parts thereof," which under the House provision carried a duty of 30 per cent American valuation, and then the Senator proposes, if the pending amendment is disagreed to, leaving the rate 30 per cent instead of 45 per cent, to offer an amendment putting "ice and roller skates and parts thereof" in a different part of the paragraph with a 20 per cent ad valorem rate. In other words, all of these items—baseballs, footballs, tennis balls, and so forth—will carry 30 per cent, with the exception of ice and roller skates and parts thereof. They are made of metal, and we thought we wanted to cut them out and give them just the same rate as provided in the Underwood law. The rate in the Underwood law is 20 per cent, except that where leather is the material of chief value it is 30 per cent. The Senator asked what the Payne-Aldrich law rates were. They were 45 and 40 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee on page 180, line 2, striking out "30" and inserting "45."

The amendment was rejected.

Mr. SMOOT. On page 180, in line 2, after the words "ad valorem" I move to insert a semicolon and the words "ice and roller skates, and parts thereof, 20 per cent ad valorem."

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The READING CLERK. Page 180, paragraph 1403, spangles and beads, on line 4, after the word "including" insert the words "beads of ivory or," so as to read:

PAR. 1403. Spangles and beads, including bugles, but not including beads of ivory or imitation pearl beads, etc.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The READING CLERK. On page 180, line 5, the committee proposes to strike out "25" and insert "35," so as to read:

PAR. 1403. Spangles and beads, including bugles, but not including beads of ivory or imitation pearl beads and beads in imitation of precious or semiprecious stones, 35 per cent ad valorem.

Mr. FLETCHER. Does the Senator propose to increase the rate?

Mr. SMOOT. Twenty-five per cent was inserted on the American valuation, and the committee simply gives 35 per cent on the foreign valuation. These are nearly all luxuries and we are carrying nearly the rates carried in both of the preceding laws.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the committee was, on page 180, line 6, after the word "ad valorem" to insert "beads of ivory, 45 per cent ad valorem."

The amendment was agreed to.

Mr. SMOOT. On page 180, line 7, after the word "not," I move to amend by inserting the words "ornamented with beads, spangles or bugles, nor," so as to read:

Fabrics and articles not ornamented with beads, spangles or bugles, nor embroidered, tamboured, appliquéd, nor scalloped, composed wholly or in chief value of beads, etc.

I want to say that the effect of that will be to throw those articles into paragraph 1430, where they belong.

The amendment was agreed to.

The next amendment of the committee was, on page 180, line 10, to strike out "40" and insert "60," so as to read:

Fabrics and articles not ornamented with beads, spangles or bugles, nor embroidered, tamboured, appliquéd, nor scalloped, composed wholly or in chief value of beads or spangles other than imitation pearl beads and beads in imitation of precious or semiprecious stones, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment of the committee was, on page 180, line 12, to strike out "pierced or unpierced"; in line 13, before the words "per centum," to strike out the numeral "40" and to insert in lieu thereof the numeral "60"; and in line 16, after the word "composed," to strike out the words "pierced or unpierced," so as to read:

imitation pearl beads of all kinds and shapes, of whatever material composed, strung or loose, mounted or unmounted, 60 per cent ad valorem; all other beads in imitation of precious or semiprecious stones, of all kinds and shapes, of whatever material composed, strung or loose, mounted or unmounted, 45 per cent ad valorem.

The amendment was agreed to.

Mr. SMOOT. There is one other amendment which must be made in order to make the language in that paragraph read correctly. At the beginning of line 8, page 180, the word "nor" should be "or." I move that amendment.

The PRESIDING OFFICER. Without objection the amendment proposed by the Senator from Utah is agreed to. The next amendment of the committee will be stated.

The next amendment of the Committee on Finance was, in paragraph 1404, page 180, line 22, before the words "per centum," to strike out the numeral "30" and to insert in lieu thereof the numeral "40," so as to read:

PAR. 1404. Ramie hat braids, 40 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 180, in the same paragraph, line 23, before the words "per centum," to strike out the numeral "40" and in lieu thereof to insert the numeral "50," so as to read:

Manufactures of ramie hat braids, 50 per cent ad valorem.

Mr. SMOOT. I ask that that amendment may be disagreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 181, paragraph 1405, line 3, after the word "fiber," to strike out the words "silk or substitutes therefor" and to insert "or silk, or substitutes for any of the foregoing."

The PRESIDING OFFICER. The question is on the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 181, in the same paragraph, line 6, before the words "per centum," to strike out the numeral "25" and in lieu thereof to insert the numeral "40," so as to make the paragraph read:

PAR. 1405. Boots, shoes, or other footwear, the uppers of which are composed wholly or in chief value of wool, cotton, ramie, animal hair, fiber, or silk, or substitutes for any of the foregoing, whether or not the soles are composed of leather, wood, or other material, 40 per cent ad valorem.

Mr. JONES of New Mexico. Will the Senator from Utah let us understand why he thinks that the rate in this case should be increased to 40 per cent?

Mr. SMOOT. The reason is that most of these goods which come in here are lined with wool. The Senator from New Mexico knows that the articles embraced in this paragraph are what are known as comfort slippers, and also bedroom slippers, and footwear of that kind. We did not wish to place a specific duty on them, and decided simply to impose a straight ad valorem duty of 40 per cent.

Mr. JONES of New Mexico. I observe by a reading of the language of the paragraph that it applies not only to articles of which the chief value is wool but that it also applies to those in which the article of chief value is "cotton, ramie, animal hair, fiber, or silk, or substitutes for any of the foregoing."

Mr. SMOOT. These articles are all luxuries, I will say to the Senator, and the materials mentioned refer to the uppers, whether braided or made of silk or of ramie or of cotton or of animal hair. Then the paragraph provides:

Whether or not the soles are composed of leather, wood, or other material, 40 per cent ad valorem.

Sometimes these goods are composed of leather lined with wool and sometimes they are plain knitted articles. It is not likely that they are going to be used extensively.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Florida?

Mr. JONES of New Mexico. I yield.

Mr. FLETCHER. This seems to be entirely a new provision.

Mr. SMOOT. Yes.

Mr. FLETCHER. It seems to be a case where the Committee on Finance has found something on which they might put a duty about which they did not previously know either when the law of 1909 or the law of 1913 was framed.

Mr. SMOOT. No; that is not the object at all. The object is this: These goods have always come under the paragraph where the component material of chief value fell; in other words, if the component material of chief value were silk, then the rates of the silk schedule would be applied to the item; if the material of chief value were wool, then the rates of the wool schedule would be applied; and if the material of chief value were leather, the leather rates would, of course, be imposed.

Mr. FLETCHER. It is a new classification.

Mr. SMOOT. It is a new classification, so that hereafter there will be available the statistics showing just how many of these articles are imported and what they are. Hereafter we shall not have to stand upon the floor of the Senate and say we do not know what the equivalent ad valorem is.

Mr. JONES of New Mexico. Mr. President, I think it is quite proper to change the classification, in order that we may have the information to which the Senator from Utah refers; but I observe that this industry has been growing, and especially with regard to canvas shoes. This paragraph will apply to canvas shoes; and I suppose that canvas will be the article of chief value on which this duty is to be levied.

Mr. SMOOT. I will say to the Senator that in the existing law canvas shoes fall under the paragraphs covering cotton and manufactures of cotton, with a duty on goods of this character of the very cheapest material of 40 per cent; so we do not go above the present rate.

Mr. JONES of New Mexico. I observe that in 1919 there was a production in this country of nearly 20,000,000 pairs of canvas shoes, with rubber soles, which were valued at a little over $25,000,000. That would be about $1.25 a pair which the manufacturers charge for those canvas shoes.

Mr. SMOOT. Those are the canvas shoes with rubber soles.

Mr. JONES of New Mexico. Yes; I understand they are the canvas shoes with rubber soles; but they are in very general use. The National Association of Felt Shoe Manufacturers state that 24 of their 27 members reported 17,228,000 pairs of those shoes produced in the year ending July, 1920, and that the sales amounted to nearly $24,000,000.

Mr. SMOOT. The rate would depend entirely upon what kind of felt was used.

Mr. JONES of New Mexico. That is quite true.

Mr. SMOOT. It would depend upon what kind of felt it was. If it were a wool felt, then, of course, the duty would be twice as high as the rate we propose to fix here.

Mr. JONES of New Mexico. But remember that this is 40 per cent on the foreign valuation of the finished product.

Mr. SMOOT. Certainly.

Mr. JONES of New Mexico. And that is a very large percentage, even if the article were composed of wool; but as to these cotton shoes upon which it is proposed now to levy a duty of 40 per cent, the class of cotton cloth that goes into a canvas shoe is manufactured in this country as cheaply as it is manufactured in any country on earth.

Mr. SMOOT. We are not giving them a single penny of protection for the manufacturing of the shoe in this provision. The rate on the cotton in the canvas shoe and everything else that goes into that shoe is 40 per cent. We are not giving a penny for protection for the making of the shoes.

Mr. JONES of New Mexico. Mr. President, that is simply begging the question, as I look at it.

Mr. SMOOT. No; that is the truth. It is not begging the question.

Mr. JONES of New Mexico. Of course, what the Senator from Utah has said is true; but what I mean is that what he has said does not support the argument which he would have us infer. The cotton cloth which goes into these shoes is produced as cheaply here as anywhere else on earth, and the fact that there is a 40 per cent duty on the cloth does not mean that the manufacturers have to pay a duty of 40 per cent for the cloth which they put into these canvas shoes. It really amounts to a protection of 40 per cent for shoes for the uppers of which canvas cloth is used, although that cloth can be manufactured in this country as cheaply as any place on earth. So I say that while what the Senator has said is absolutely true as to the duty upon the cloth, yet that does not substantiate the fact that it is an added expense in the production of canvas shoes.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment was, on page 181, line 12, before the words "per centum," to strike out the figures "13" and to insert "15"; in line 13, before the words "per centum," to strike out the figures "17" and to insert "20"; in line 16, before the words "per centum," to strike out the figures "25" and to insert "35"; in line 17, before the words "per centum," to strike out the figures "33⅓" and to insert "50"; in line 18, after the word "dozen," to strike out the figures "20" and to insert

"30"; in line 19, after the word "other," to strike out "men's"; and in line 22, before the words "per centum," to strike out the figures "40" and to insert "50," so as to make the paragraph read:

PAR. 1406. Braids, plaits, laces, and willow sheets or squares, composed wholly or in chief value of straw, chip, grass, palm leaf, willow, osier, rattan, real horsehair, cuba bark, or manila hemp, suitable for making or ornamenting hats, bonnets, or hoods, not bleached, dyed, colored, or stained, 15 per cent ad valorem; bleached, dyed, colored, or stained, 20 per cent ad valorem; hats, bonnets, and hoods composed wholly or in chief value of any of the foregoing materials, whether wholly or partly manufactured, but not blocked or trimmed, 35 per cent ad valorem; blocked or trimmed, 50 per cent ad valorem; straw hats known as harvest hats, valued at less than $3 per dozen, 30 per cent ad valorem; all other hats, composed wholly or in chief value of any of the foregoing materials, whether wholly or partly manufactured, not blocked or blocked, not trimmed or trimmed, if sewed, 50 per cent ad valorem. But the terms "grass" and "straw" shall be understood to mean these substances in their natural form and structure, and not the separated fiber thereof.

The amendment was agreed to.

The next amendment was, in paragraph 1407, on page 182, line 3, before the words "per centum," to strike out the figures "35" and to insert "55."

Mr. SMOOT. I desire to modify the committee amendment by substituting "45" for "55."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. JONES of New Mexico. I find that the point I had in mind does not arise in connection with the committee amendment. What I had in mind was a provision in the House text, in which the committee have made no change.

Mr. SMOOT. The amendment just stated relates to tooth brushes and toilet brushes.

Mr. JONES of New Mexico. Yes.

Mr. SMOOT. We come in direct competition with Japan on these commodities, and the Reynolds report shows that the domestic producers are entitled to about 114 per cent. We thought that if they could not get along with 45 per cent protection, they had better let that class of work go.

Mr. JONES of New Mexico. Yes; I think so.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

The next amendment was, in the same paragraph, page 182, line 4, after the word "feather," to strike out "dusters" and to insert "dusters," and in line 5, after the word "otherwise," to strike out the figures "30" and to insert "55," so as to make the paragraph read:

PAR. 1407. Brooms, made of broom corn, straw, wooden fiber, or twigs, 15 per cent ad valorem; tooth brushes and other toilet brushes, 45 per cent ad valorem; all other brushes not specially provided for, including feather dusters, and hair pencils in quills or otherwise, 55 per cent ad valorem.

Mr. SMOOT. I desire to modify the committee amendment by substituting "45" for "55."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

The next amendment was, on page 182, line 7, to increase the rate of duty on bristles, sorted, bunched, or prepared, from "7" to "8" cents per pound.

Mr. SMOOT. I ask that that amendment may be disagreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was rejected.

The next amendment was, in paragraph 1410, on page 182, line 14, after the word "of," to insert "horn or."

Mr. SMOOT. I ask that the amendment inserting the words "horn or" may be disagreed to. I will say to the Senate the object of that is to provide for that class of buttons at a lower rate of duty.

The PRESIDING OFFICER. Without objection, the amendment is rejected.

The next amendment was, in the same paragraph, on page 182, line 15, before the word "cents," to strike out the figures "1¼" and to insert "1½."

Mr. SMOOT. I ask that that amendment be disagreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment was, in the same paragraph, on page 182, line 16, after the word "not," to strike out "turned, faced, or drilled, three-fourths of," and to insert "drilled, dyed, or finished."

Mr. SMOOT. After the word "finished" and the comma I move to insert "three-fourths of," so that it will read "three-fourths of 1 cent per line" instead of "1 cent per line."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified.

The amendment as modified was agreed to.

The next amendment was, in the same paragraph, on page 182, at the beginning of line 19, before the word "cents," to strike out the figures "1¾" and to insert "2."

Mr. SMOOT. I ask that that amendment may be disagreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was rejected.

The next amendment was, in the same paragraph, on page 182, in line 20, before the word "cents," to strike out the figures "1¼" and to insert "1½."

Mr. SMOOT. I ask that that amendment may be disagreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment was, in the same paragraph, on page 182, in line 21, after the word "foregoing," to strike out the figures "15" and to insert "40," so as to make the paragraph read:

PAR. 1410. Buttons of vegetable ivory, finished or partly finished, 1¼ cents per line per gross; vegetable ivory button blanks, not drilled, dyed, or finished, three-fourths of 1 cent per line per gross; buttons of pearl or shell, finished or partly finished, 1¾ cents per line per gross; pearl or shell button blanks, not turned, faced, or drilled, 1¼ cents per line per gross; and, in addition thereto, on all the foregoing, 40 per cent ad valorem: *Provided*, That the term "line" as used in this paragraph shall mean the line button measure of one-fortieth of 1 inch.

Mr. SMOOT. I ask that "25" be substituted for "40."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

The amendment as modified was agreed to.

Mr. SHEPPARD. Mr. President, may I ask the Senator what increase is involved in the existing rate by the amendments which have been adopted in this paragraph?

Mr. SMOOT. I have not a memorandum of that at hand. If the Senator will wait a moment, I will tell him just what the facts are.

Mr. SHEPPARD. The existing rate is 40 per cent ad valorem without any specific rate.

Mr. SMOOT. On the first instance the specific rate is 1¼ cents a line. There are 40 lines to the inch, so that if a button is 1 inch, 1¼ cents a line is equal to 25 cents per gross. If they are worth a dollar a gross—and that would be about the price—that is equivalent to 25 per cent ad valorem, and the 25 per cent ad valorem added to that would make 50 per cent instead of 40 under the existing law. I will cite that particular case and call the attention of the Senator to it as illustrative of the others. I wish frankly to say that manufacturers have notified me and the committee several times they can not live under these rates, but we are going to see if it is not possible for them to do so.

Mr. SHEPPARD. The changes proposed by the Senator from Utah will involve an increase in the rates.

Mr. SMOOT. Of course, they involve somewhat of an increase in the rates. I do not know that the Senator was in the Chamber a few moments ago when we struck out the words "horn or," so that buttons made of such material will fall in paragraph 1411.

Mr. SHEPPARD. Mr. President, I did not ask for a roll call on these amendments because I felt it had been sufficiently determined that the Senate would cling to the high rates proposed by the committee. I wish to say, however, that I do not think any increase is justified in the rates on buttons of vegetable ivory and on shell and pearl buttons.

The case with reference to vegetable-ivory buttons may be stated very briefly. They are used on coats and suits for both men and women and are made from the tagua nut of Panama and northern South America and the palm nut of Africa.

Home production of the finished article grew from a value of $1,300,000 in 1904 to a value of $2,885,000 in 1914. By 1919 this home production had a value of $7,676,000. Imports of these buttons for the last several years have been less than 1 per cent of the domestic output, while a small export trade to Canada and South America has developed.

Shell and pearl buttons are made from both ocean and freshwater mollusks, the former possessing the better quality. The better grades of these buttons are used on women's wear and men's shirts.

Home production of the ocean variety increased from a value of $2,489,000 in 1914 to a value of $6,564,000 in 1919; and that of the fresh-water type from $4,800,000 in 1914 to $8,200,000 in 1919. Imports of both kinds in 1921 were valued at $1,099,643. They came from Japan and the Philippines, those from Japan having a value of about $900,000, while those from the Philippines were valued at about $200,000.

It will be seen that the imports do not equal 1 per cent of the home output. Exports of both varieties of pearl buttons were valued at $142,884 in 1921.

In view of those facts I do not think any increase is justified; but inasmuch as the committee has seen fit to reduce the rate it originally offered I have not deemed it advisable to ask for a division or a roll call. The reduced rate now proposed still represents an advance over existing duties.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The next amendment was, on page 183, line 6, before the words "per centum," to strike out the figures "38" and to insert "45," so as to make the paragraph read:

PAR. 1411. Buttons commonly known as agate buttons, 15 per cent ad valorem; parts of buttons and button molds or blanks, finished or unfinished, not specially provided for, and all collar and cuff buttons and studs composed wholly of bone, mother-of-pearl, ivory, vegetable ivory, or agate, and buttons not specially provided for, 45 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 183, line 24, after the word "ground," to strike out "cork" and to insert "cork, 25 per cent ad valorem," so as to read:

PAR. 1412. Cork bark, cut into squares, cubes, or quarters, 8 cents per pound; stoppers over three-fourths of 1 inch in diameter, measured at the larger end, and disks, wafers, and washers over three-sixteenths of 1 inch in thickness, made from natural cork bark, 20 cents per pound; made from artificial or composition cork, 10 cents per pound; stoppers, three-fourths of 1 inch or less in diameter, measured at the larger end, and disks, wafers, and washers, three-sixteenths of 1 inch or less in thickness, made from natural cork bark, 25 cents per pound; made from artificial or composition cork, 12½ cents per pound; cork, artificial, commonly known as composition or compressed cork, manufactured from cork waste or granulated cork, in the rough and not further advanced than in the form of slabs, blocks, or planks, suitable for cutting into stoppers, disks, liners, floats, or similar articles, 6 cents per pound; in rods or sticks suitable for the manufacture of disks, wafers, or washers, 10 cents per pound; granulated or ground cork, 25 per cent ad valorem, etc.

Mr. SHEPPARD. Mr. President, will the committee offer any changes in paragraph 1412?

Mr. SMOOT. The only amendment the committee proposes now to offer is to disagree to the amendment on line 2, page 184, on the slabs, boards, planks, or molded forms, 25 per cent ad valorem; and then all of the items beginning on page 183, line 25, with cork insulation, would fall in the rate of 30 per cent ad valorem.

Mr. SHEPPARD. The Senator has not offered any decreases in the rates originally proposed by the committee?

Mr. SMOOT. No; the committee does not offer any.

Mr. SHEPPARD. Mr. President, I shall content myself by offering the following observations on this paragraph, and will not ask for a division.

Paragraph 1412 is concerned with manufactures of cork. It carries a duty of 8 cents a pound on cork bark cut into squares, cubes, or quarters, doubling the present rate of 4 cents a pound. This advance of 100 per cent it made in spite of the fact that there are practically no imports, those for the first nine months of 1921 having the magnificent value of $2, and in spite of the fact that the domestic cork industry, having grown from an output valued at $7,875,000 in 1914 to an output valued at $16,282,000 in 1919, is so successful that it is on an export basis. Its exports have increased from a value of $462,199 in 1914 to $847,377 in 1918.

The paragraph under review increases the duties on stoppers made from natural cork and above three-fourths of an inch in diameter from the existing figure of 12 cents per pound to 20 cents, and on the smaller stoppers of this character from the prevailing figure of 15 cents per pound to 25 cents. On stoppers made from artificial cork or cork waste it makes a slight reduction. These, however, form only a small part of stopper production.

Imports of all kinds of stoppers had a value of less than $80,000 during the first nine months of 1921.

By this paragraph the existing rates of 3 cents a pound on artificial cork or granulated cork in the rough are increased to 6 cents a pound; in rods or sticks to 10 cents a pound. Imports during the first nine months of 1921 had the insignificant value of $41. Importations of cork products have so small a value in relation to home output—less than 1 per cent—and exports are having so steady a growth that the increases carried in this paragraph—increases so typical of this entire bill—are rendered laughably absurd.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 184, line 2, after the word "molded," to strike out "forms" and insert "forms, 25 per cent ad valorem," so as to read:

Cork insulation, wholly or in chief value of cork waste, granulated or ground cork, in slabs, boards, planks, or molded forms, 25 per cent ad valorem, etc.

Mr. SMOOT. I ask that that amendment be rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment was, on page 184, line 5, after the word "for," to strike out the figures "25" and to insert "30," so as to read:

Cork tile, cork paper, and manufactures, wholly or in chief value of cork bark or artificial cork and not specially provided for, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 184, line 8, before the words "per cent," to strike out "40" and to insert "50," so as to make the paragraph read:

PAR. 1413. Dice, dominoes, draughts, chessmen, and billiard, pool, and bagatelle balls, and poker chips of ivory, bone, or other material, 50 per cent ad valorem.

Mr. SHEPPARD obtained the floor.

Mr. SMOOT. Mr. President, I will say to the Senator that 50 per cent is the rate of the Payne-Aldrich law and the rate of the Underwood law, and I do not think there is going to be any objection whatever to imposing a duty of 50 per cent on poker chips of ivory, bone, and so forth.

Mr. SHEPPARD. Mr. President, I wanted to ask the Senator from Utah to explain the meaning of the words "poker chips."

Mr. SMOOT. I am not an expert on that subject, but I will tell the Senator what I will do: I will meet with the Senator as soon as this session closes and we will go to some expert and learn, so that both of us will know it in the future.

Mr. SHEPPARD. The Senator's innocence on this subject is little less than sublime.

Mr. SMOOT. I am informed, however, that whenever you touch them or play with them in any way it always costs you some money.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 184, line 15, before the words "per cent," to strike out "40" and to insert "70," so as to make the paragraph read:

PAR. 1414. Dolls, and parts of dolls, doll heads, toy marbles, of whatever materials composed, air rifles, toy balloons, toy books without reading matter other than letters, numerals, or descriptive words, bound or unbound, and parts thereof, and all other toys, and parts of toys, not composed of china, porcelain, parian, bisque, earthen or stone ware, and not specially provided for, 70 per cent ad valorem.

Mr. POMERENE. Mr. President, I realize that this is one of the subjects about which there is a good deal of controversy, and I am very frank to say that it seems to me that this rate is somewhat too high.

Mr. SMOOT. All the Senate has to do is simply to decide this one question: Do we or do we not want to maintain the doll industry that was established in the United States during the war? If we do, we are compelled to have a duty of 70 per cent, and I have a little doubt in mind about whether we can complete the whole line even with the 70 per cent.

Mr. POMERENE. Mr. President, I realize, of course, that a year ago the imports were very large.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Utah?

Mr. POMERENE. Oh, yes.

Mr. SMOOT. We had no industry in the United States.

Mr. POMERENE. Within the last year, however, these imports have been substantially reduced as compared with the year preceding; and I just wondered whether the Senator had any information which would enable him to explain the difference between the imports, let us say, for 1920, when the imports of dolls and parts of dolls were $2,593,108, and for the nine months of 1921, when they were $1,215,662?

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Massachusetts?

Mr. POMERENE. I yield to the Senator.

Mr. LODGE. The total imports of German toys during the months January to April, inclusive, of the current year, in dollars and cents amounted to $1,330,620, while during the same four months of 1921 they amounted to $823,798.

Mr. SMOOT. Mr. President, I want to say that toys will begin to arrive from a foreign land in a little while now for our Christmas trade. There is no doubt but that the importations of this year will be at least three or four times the amount that they were last year. The committee in their investigations, I think, took more time upon this schedule than upon almost any other schedule in this bill. We had the committee room full of samples, and worked out the rates here with the Reynolds report, and these were the rates that were necessary, although I want to say to the Senator that we have not relied upon the Reynolds report for the rates in this bill, particularly in this schedule. This is what it shows: I will run them down, and I will not take the time to tell the items, but these are all toys falling in this paragraph:

Beginning with the first one, 200 per cent; the next, 400; the next, 400 and some odd; the next, over 200; the next, 86; the next, 122; the next, 82; the next, over 300; the next, over 200; the next, 190; the next, 175; the next, 124. That is what they actually showed at that particular time. I recognize, however, that there has been a change, and for that reason these rates in many, many cases have been changed.

I have said two or three times upon the floor of the Senate that if the President had any authority whatever to increase rates there were only about three items in this bill in behalf of which I thought that power would be exercised. This is one of the paragraphs where I have said before that I think the President in some instances will have to exercise his power.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Ohio?

Mr. SMOOT. Yes.

Mr. POMERENE. I have investigated this subject to such an extent that I have felt that there was some necessity for an increase in the rate, but I did feel that to increase it from 40 to 70 per cent was perhaps a little higher than was justified.

Mr. SMOOT. That was 40 per cent on American valuation.

Mr. POMERENE. Oh, yes; I understand that.

Mr. FLETCHER. Mr. President, the Tariff Information Survey advises us that the Toy Manufacturers' Association reports that in 1914 there were 10 concerns in the United States manufacturing dolls and that the product amounted to $1,000,000, and in 1919 there were 48 concerns, with a product valued at $9,000,000. The imports are decreasing, apparently, and the exports of American manufactures are increasing, and the business seems to be growing very considerably under the present rate of 35 per cent.

Mr. SMOOT. The exports to-day are nothing to speak of, except what little goes up to Canada. The Senator will notice that in 1919 the number of establishments increased to 541. America never tried to make any toys before the war. She was compelled to do it then, and the Senator will remember that right after the war Japan began to make toys.

Japan's toys are as nothing compared with German toys. The German industry has been established for hundreds of years. The children, almost before they can toddle, are used in Germany in the making of toys, and they grow up in it. The wives and the children do the work at home, and in thousands and tens of thousands of homes in Germany these toys are made, by children working until midnight and women working until midnight after the day's work is over. The Germans controlled the toy industry of the world before the war, but during the war these establishments were started in the United States, and they have made wonderful progress. No American citizen could ever see the toys that were made in the United States now, educational in their nature, without being proud of the American manufacturer in establishing the industry in the United States, as it has been established within so few years.

Mr. FLETCHER. Mr. President, I appreciate that. I think it is a good thing, and I quite agree with what the Senator has said about it. What I am saying is that we have had a duty in the past of 35 per cent ad valorem, and now it is proposed to make that 70 per cent. It seems to me the increase is rather more than is needed.

Mr. SMOOT. No tariff bill that has ever been framed has ever put any kind of a duty upon toys for the purpose of protection. It has been a revenue duty entirely; nothing more and nothing less. There was no thought at the time the other tariff bills were framed of establishing the industry in this country. Its establishment in this country was brought about by the war, and now the only thing to decide, as I have said here, is whether we shall maintain the industry. I say to the Senator now that no rate of duty less than 70 per cent will save the industry.

Mr. FLETCHER. That is a very broad statement, and I have no doubt the Senator has plenty of testimony to that effect; but when I consider what has happened to this industry thus far, with the duty of 35 per cent, when I consider that the exports in 1914 amounted to $809,120, chiefly to Canada, England, Australia, and Cuba; that in 1918 they amounted to a total of $1,656,112; in 1919 to a total of $2,869,529; and in 1920 to $4,189,322, it looks as if the industry is doing very well under the present rate. Although others may express a different view about it, I have no doubt but that there are plenty of people who stated to the Senator that it required a duty of 70 per cent, but I do not believe the history of the industry and the actual conditions, with the information furnished here, would justify a doubling of the duty.

Mr. LODGE. Mr. President, the toy-manufacturing business in this country was developed by the war from a small one to a large one. Germany had controlled the market here, as elsewhere. Now, we have this industry established, and it will be simply killed by German competition unless we impose this duty.

I am aware that this is a high duty. The Senator from Florida was speaking about the manufacturers making money. I have here a letter from a company which makes miniature steam and caloric engines and electric motors for children—that is, toys. They say to me in this letter:

> Our business is suffering terribly. We have on our books now 60 per cent compared with this time last year, which was not a good year. * * *
>
> We might add we have lost one order alone that was $20,000 in 1920, $3,000 in 1921, and we have not received a penny's worth this year. Every dollar's worth of this business in our line went to Germany this year.

That is the case with many others. The Germans, who are an ingenious people, imitate our patent toys and our patent games without going through the form of getting patents. Patents are really no protection. They make the patented toys or games without any fear of competition here. If the industry is to be kept alive in this country, it will have to have at least this duty to protect it. The figures which I have before me show how rapidly that menace is increasing.

The figures of Shipping Board tonnage show for the first three months of 1922 that the toys imported amounted to 3,300 tons, whereas a year ago only 910 tons arrived. Then, the total imports of German toys for the four months which I have referred to amounted to $1,380,000, while during the same four months of 1921 they amounted to $823,798.

These toy factories will simply go out of business if this rate is not imposed, and it is a question of whether we wish to keep the toy industry alive in this country at all. I think it is a good thing to have American toys, apart from the mere value of the industry, which is very considerable. Many people are employed in it, an excellent type of labor, and it would be a very serious blow if the industry were shut down. I do not favor extravagant duties, but if this industry is to be kept alive, we shall have to take the rates proposed by the committee.

Mr. UNDERWOOD. Mr. President, I can not agree with my friends on the other side of the Chamber in reference to the statement of facts in this matter. Of course, whether we think the facts apply depends upon the way we look at a thing.

Mr. LODGE. The facts to which the Senator is about to refer are old facts; they are not recent.

Mr. UNDERWOOD. I am going to take recent facts. Of course, if we look at the proposition of levying a tariff duty as a means of preventing all importations, or practically so, if it is levied to exclude all competition, then there may be something in the argument that has just been presented in favor of this very large increase in the duty. But if we believe that the Treasury of the United States is entitled to some revenue from the articles on which taxes are levied, then this tax is excessive.

I have the figures in reference to all toys, in the Summary of Tariff Information for 1920, published by the Tariff Commission, which shows that the imports for 1921 of all toys were $1,232,000.

But the Senator from Utah contends that there were $7,000,000 worth of toys imported in 1920 and $5,000,000 worth in 1921. I am not questioning the Senator's authority; he may have later authority than I have. I assume he is correct in the statement that the imports of all toys in 1920 were $7,000,000, and that they fell off to something like $5,000,000 in 1921. Senators must bear in mind that the statement of the Tariff Commission gives us the information that this industry produced $45,000,000 worth of toys and games in 1919. Five mil-

lion dollars of imports as compared to $45,000,0000 of production is one-ninth, a little over 11 per cent, under a tax of 35 per cent. This is no new tax. The tax was 35 per cent under the Payne-Aldrich law; it is 35 per cent under the present law; and if I recollect correctly, it was 35 per cent under the Dingley law; so it has been 35 per cent for 12 years, we know, and probably for 20 years.

Under that tax the total importations of toys which came in for the children of America to hold down the prices in this country are not over one-ninth of the production. That may be a very fair competitive condition, but it is not driving a business out of existence. Because a man has eight parts of the field and his competitor has one part it does not mean that it is destroying his business, unless there is an attempt to create a monopoly.

The statement of the Senator a while ago that we had no toy industry in America before the war is not borne out by the figures. We did not have a toy industry in America comparable with the present industry, but we had a very good toy industry. In 1914 we had 290 manufacturers of toys and games in this country. Their capital stock was something over $10,000,000, their production was $13,757,000, and they employed 7,887 employees. So that in 1914, the year the war in Europe began, under a 35 per cent tariff duty, we had an industry in this country that was one-third of its present volume. Of course when the war came on the door was closed entirely.

These gentlemen are seeking to-day to continue war conditions. During the war, when shipping was interfered with, most of the toy manufacturers of the world were at war, and these manufacturers had a war embargo, preventing competition, and their profits were so great that they swelled the industry. Now they come before Congress and ask for a tariff rate so high that it will create another embargo, not growing out of war but growing out of taxes levied at the customhouse. There is no question about that.

Of course, if you want to say that nobody shall sell any toys in America except the American manufacturer, that you will cut off all competition from abroad, or practically all competition from abroad; that you are going to close your customhouses to the importations of children's toys, then vote for a 70 per cent duty. But Mr. Dingley, whose Republicanism and protectionist standing nobody could question, thought 35 per cent was a reasonable duty. The authors of the Payne-Aldrich law, which carried the highest rates which had ever been passed up to that time, considered 35 per cent ad valorem a sufficient rate to protect these manufacturers. I had not heard at that time and do not know, although I was on the Ways and Means Committee in the House, of any efforts of these manufacturers to raise the rate above that amount. But they have been gorged with the profits growing out of the war conditions and the monopoly of the American market and they want to continue that monopoly by the imposition of excessive taxes at the customhouses.

Now, Mr. President, I realize that a toy is considered to some extent a luxury, and on luxuries we levy more taxes than we do on the necessities of life; but I think this is going very far. We have taxed the bread at the mouths of the poor. We have levied every tax imaginable in the bill at enormously increased rates. Now, to go into the cradle and tax the baby for the doll that it carries in its arms in order to create an American monopoly of the business I think is going too far. I see no reason in the world for it. In fact, from a Republican standpoint, there is a stronger argument in the bill against the rate than I have made. The House of Representatives, when they sent the bill over, sent it with a tax of 40 per cent, while the Finance Committee of the Senate have raised it to 70 per cent. I think the item ought to be disagreed to.

Mr. SMOOT. Mr. President, for the RECORD I merely want to say that the production in the United States for 1921 was, as the Senator from Alabama has said, $45,720,000, but for the full calendar year of 1921 there were imported $7,715,000 worth. That is about 18 per cent of the production. They have hardly got started here. Those are the figures given by the Tariff Commission. In the calendar year 1914, when we produced what the Senator said, $13,000,000 worth, they were all of one particular class of goods. They were made in this country to that extent, but we could not buy a line of toys in the United States. No merchant who carried toys could buy a full line of toys made in the United States in 1914.

However, as the Senator said, the war brought on the demand for a full line. They undertook to get them from Japan, but could not do it. Those which they did get from Japan were nothing to compare with those which they got from Germany. Therefore, it seems to me that the figures themselves are such as to show that unless we do give this rate of duty we will not have 18 per cent of the whole consumption imported into the United States, but there would be a majority of it imported.

Mr. UNDERWOOD. On agreeing to the amendment, I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as to my pair and transfer, I vote "nay."

Mr. POMERENE (when his name was called). As announced yesterday, I have temporarily a general pair with my colleague [Mr. WILLIS]. He is detained because of illness in his family. I therefore withhold my vote.

Mr. SIMMONS (when his name was called). I transfer my pair with the junior Senator from Minnesota [Mr. KELLOGG] to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the Senator from California [Mr. JOHNSON]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as on the previous vote, I vote "yea."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before, I vote "yea."

Mr. SUTHERLAND. Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "yea."

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. DILLINGHAM. I transfer my pair with the Senator from Virginia [Mr. GLASS] to the junior Senator from Delaware [Mr. DU PONT] and vote "yea."

Mr. JONES of New Mexico. As announced on the previous vote, I again transfer my pair and vote "nay."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 33, nays 18, as follows:

YEAS—33.

Bursum	Hale	McNary	Sterling
Calder	Harreld	Moses	Sutherland
Capper	Jones, Wash.	New	Townsend
Colt	Keyes	Nicholson	Wadsworth
Curtis	Lenroot	Oddie	Warren
Dillingham	Lodge	Pepper	Watson, Ind.
Edge	McCormick	Phipps	
Ernst	McCumber	Shortridge	
Gooding	McLean	Smoot	

NAYS—18.

Borah	Kendrick	Sheppard	Trammell
Dial	McKellar	Simmons	Underwood
Fletcher	Overman	Smith	Watson, Ga.
Heflin	Ransdell	Stanley	
Jones, N. Mex.	Reed	Swanson	

NOT VOTING—44.

Ashurst	France	La Follette	Pomerene
Ball	Frelinghuysen	McKinley	Rawson
Brandegee	Gerry	Myers	Robinson
Broussard	Glass	Nelson	Shields
Cameron	Harris	Newberry	Spencer
Caraway	Harrison	Norbeck	Stanfield
Culberson	Hitchcock	Norris	Walsh, Mass.
Cummins	Johnson	Owen	Walsh, Mont.
Du Pont	Kellogg	Page	Weller
Elkins	King	Pittman	Williams
Fernald	Ladd	Poindexter	Willis

So the amendment of the committee was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment.

The READING CLERK. In paragraph 1415, page 184, line 19, strike out "emery paper."

The amendment was agreed to.

The next amendment of the committee was, on page 184, line 21, to strike out "20" and insert "not specially provided for; and all papers, cloths, and combinations of paper and cloth, wholly or partly coated with artificial or natural abrasives, or with a combination of natural abrasives and artificial abrasives; all the foregoing 25," so as to read:

PAR. 1415. Emery, corundum and artificial abrasive grains and emery, corundum and artificial abrasives, ground, pulverized, refined, or manufactured, 1 cent per pound; emery wheels, emery files, and manufactures of which emery, corundum, or artificial abrasive is the component

material of chief value, not specially provided for; and all papers, cloths, and combinations of paper and cloth, wholly or partly coated with artificial or natural abrasives, or with a combination of natural and artificial abrasives; all the foregoing 25 per cent ad valorem.

Mr. SMOOT. On page 185, line 1, I move to strike out "25" and insert in lieu thereof a comma and the numeral "20," so that the rate will be 20 per cent ad valorem.

Mr. POMERENE. That would leave the duty just where it was under the Underwood law?

Mr. SMOOT. "Crude artificial abrasives" are stricken out here and go on the free list. I think the Underwood rate was 20 per cent; so this is the same as the Underwood rate.

Mr. FLETCHER. The rate was 20 per cent under the act of 1913.

Mr. SMOOT. We place the crude abrasives on the free list.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as modified.

Mr. POMERENE. As I understood from an examination of this item, I could not see the necessity for any increase, because the imports were negligible.

Mr. SMOOT. There is no increase.

Mr. POMERENE. That is, with the amendment as modified.

Mr. SMOOT. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The READING CLERK. On page 185, line 1, after the words "ad valorem," strike out the semicolon and the words "crude artificial abrasives, 5 per cent ad valorem."

Mr. SMOOT. Those now will fall in paragraph 1655 of the free list.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 185, line 10, after the word "box," to strike out the figure "6" and to insert "12"; in line 12, after the word "each," to strike out "three-fourths of"; and in line 18, before the words "per centum," to strike out the figures "30" and to insert "45," so as to read:

PAR. 1417. Matches, friction or lucifer, of all descriptions, per gross of 144 boxes, containing not more than 100 matches per box, 12 cents per gross; when imported otherwise than in boxes containing not more than 100 matches each, 1 cent per 1,000 matches; wax matches, wind matches, and all matches in books or folders or having a stained, dyed, or colored stick or stem, tapers consisting of a wick coated with an inflammable substance, night lights, fusees and time-burning chemical signals, by whatever name known, 45 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 186, line 6, before the words "per centum," to strike out the figures "25" and to insert "30," and in line 11, after the word "kinds," to strike out "not composed in chief value of cotton," so as to make the paragraph read:

PAR. 1418. Percussion caps, cartridges, and cartridge shells empty, 30 per cent ad valorem; blasting caps, containing not more than 1 gram charge of explosive, $2.25 per thousand; containing more than 1 gram charge of explosive, 75 cents per thousand additional for each additional one-half gram charge of explosive; mining, blasting, or safety fuses of all kinds, $1 per thousand feet.

The amendment was agreed to.

The next amendment was, on page 186, line 18, after the word "of," to strike out "down," and to insert "down;"; in line 20, after the word "artificial," to strike out "and" and to insert "or"; in line 22, before the words "per cent," to strike out the figures "45" and to insert "60"; in line 25, before the words "per cent," to strike out the figures "45" and to insert "65"; and on page 187, line 4, before the words "per cent," to strike out "50" and to insert "60," so as to read:

PAR. 1419. Feathers and downs, on the skin or otherwise, crude or not dressed, colored, or otherwise advanced or manufactured in any manner, not specially provided for, 20 per cent ad valorem; dressed, colored, or otherwise advanced or manufactured in any manner, including quills of down and other manufactures of down; artificial or ornamental feathers suitable for use as millinery ornaments, artificial or ornamental fruits, vegetables, grains, leaves, flowers, and stems or parts thereof, of whatever material composed, not specially provided for, 60 per cent ad valorem; natural leaves, plants, shrubs, herbs, trees, and parts thereof, chemically treated, colored, dyed, or painted, not specially provided for, 65 per cent ad valorem; boas, boutonnieres, wreaths, and all articles not specially provided for, composed wholly or in chief value of any of the feathers, flowers, leaves, or other material herein mentioned, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 187, line 16, before the word "the," to strike out "those," and to insert "those."

The amendment was agreed to.

The next amendment was, on page 189, line 22, after the word "dyeing," to strike out "20" and to insert "30"; on page 190, line 4, before the words "per cent," to strike out "35" and to insert "40"; in line 6, after the word "for," to strike out "40" and to insert "50"; and in line 10, after the words "goat skins," to insert "and not specially provided for," so as to make the paragraph read:

PAR. 1420. Furs dressed on the skin, excepting silver or black fox furs, not advanced further than dyeing, 30 per cent ad valorem; plates and mats of dog and goat skins, 10 per cent ad valorem; manufactures of furs, excepting silver or black fox, further advanced than dressing and dyeing, prepared for use as material, joined or sewed together, including plates, linings, and crosses, except plates and mats of dog and goat skins, and articles manufactured from fur, not specially provided for, 40 per cent ad valorem; silver or black fox skins, dressed or undressed, and manufactures thereof, not specially provided for, 50 per cent ad valorem; articles of wearing apparel of every description partly or wholly manufactured, composed wholly or in chief value of hides or skins of cattle of the bovine species, or of dog or goat skins, and not specially provided for, 15 per cent ad valorem; articles of wearing apparel of every description wholly or in part manufactured, composed wholly or in chief value of fur, not specially provided for, 50 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 1421, on page 190, line 16, to increase the rate of duty on hatters' furs or furs not on the skin, prepared for hatters' use, including fur skins carroted, from "22" to "35" per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 1422, on page 190, line 19, to increase the rate of duty on fans of all kinds, except common palm-leaf fans, from "40" to "50" per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 1423, on page 190, line 21, to increase the rate of duty on gun wads of all descriptions, not specially provided for, from "10" to "20" per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 191, line 6, after the word "cloth," to insert "not specially provided for," and, in line 10, after the words "ad valorem," to insert "; cloths and all other manufactures of every description, wholly or in chief value of cattle hair or horsehair, not specially provided for, 40 per cent ad valorem," so as to make the paragraph read:

PAR. 1426. Haircloth, known as "crinoline" cloth, haircloth, known as "hair seating," and hair press cloth, not specially provided for, 35 per cent ad valorem; hair felt, made wholly or in chief value of animal hair, not specially provided for, 25 per cent ad valorem; manufactures of hair felt, including gun wads, 35 per cent ad valorem; cloths and all other manufactures of every description, wholly or in chief value of cattle hair or horsehair, not specially provided for, 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 192, line 2, before the words "per centum," to strike out the figures "20" and to insert "30," so as to make the paragraph read:

PAR. 1427. Hats, caps, bonnets, and hoods, for men's, women's, boys', or children's wear, trimmed or untrimmed, including bodies, hoods, plateaux, forms, or shapes, for hats or bonnets, composed wholly or in chief value of fur of the rabbit, beaver, or other animals, valued at not more than $4.50 per dozen, $1.50 per dozen; valued at more than $4.50 and not more than $9 per dozen, $3 per dozen; valued at more than $9 and not more than $15 per dozen, $5 per dozen; valued at more than $15 and not more than $24 per dozen, $7 per dozen; valued at more than $24 and not more than $36 per dozen, $10 per dozen; valued at more than $36 and not more than $48 per dozen, $13 per dozen; valued at more than $48 per dozen, $16 per dozen; and in addition thereto, on all the foregoing, 30 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 192, line 7, after the word "known," to insert "finished or unfinished, of whatever material composed"; in line 8, before the words "per cent," to strike out the figures "55" and to insert "80"; in line 23, after the word "pearls," to strike out the figures "55" and to insert "80"; and on page 193, line 2, before the words "per cent," to strike out the figures "45" and to insert "75," so as to make the paragraph read:

PAR. 1428. Jewelry, commonly or commercially so known, finished or unfinished, of whatever material composed, valued above 20 cents per dozen pieces, 80 per cent ad valorem; rope, curb, cable, and fancy patterns of chain not exceeding one-half inch in diameter, width, or thickness, valued above 30 cents per yard; and articles valued above 20 cents per dozen pieces, designed to be worn on apparel or carried on or about or attached to the person, such as and including buckles, cardcases, chains, cigar cases, cigar cutters, cigar holders, cigarette cases, cigarette holders, coin holders, collar, cuff, and dress buttons, combs, match boxes, mesh bags and purses, millinery, military and hair ornaments, pins, powder cases, stamp cases, vanity cases, and like articles; all the foregoing and parts thereof, finished or partly finished, composed of metal, whether or not enameled, washed, covered, or plated, including rolled gold plate, and whether or not set with precious or semiprecious stones, pearls, cameos, coral, or amber, or with imitation precious stones or imitation pearls, 80 per cent ad valorem; stampings, galleries, mesh, and other materials of metal, whether or not set with glass or paste, finished or partly finished, separate or in strips or sheets, suitable for use in the manufacture of any of the foregoing articles in this paragraph, 75 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 193, line 8, after the word "or," to strike out "strung" and to insert "strung, 20 per cent ad valorem"; and in line 16, before the word "mounted," to strike out "pierced or unpierced," so as to make the paragraph read:

PAR. 1429. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, whether in their natural form or broken, any of the foregoing not set, and diamond dust, 10 per cent ad valorem; pearls and parts thereof, drilled or undrilled, but not set or strung, 20 per cent ad valorem; diamonds, coral, rubies, cameos, and other precious stones and semiprecious stones, cut but not set, and suitable for use in the manufacture of jewelry, 20 per cent ad valorem; chatons, doublets, and synthetic cut stones, used in the manufacture of jewelry and other similar articles, 20 per cent ad valorem; imitation pearls of all kinds and shapes, of whatever material composed, mounted or unmounted, and imitation precious or semiprecious stones except chatons, doublets, and synthetic cut stones of any kind, of all kinds and shapes, of whatever material composed.

The amendment was agreed to.

Mr. SMOOT. Mr. President, on line 12, page 193, I move to strike out beginning with the word "chatons" down to and including the words "ad valorem," in line 19, and to insert in lieu thereof what I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Utah will be stated.

The READING CLERK. On page 193, it is proposed to strike out beginning with the word "chatons," in line 12, down to and including the words "ad valorem," in line 19, and to insert in lieu thereof the following:

Imitation precious stones, cut or faceted, imitation semiprecious stones, faceted, imitation half pearls and hollow or filled pearls of all shapes, without hole or with hole partly through only, 20 per cent ad valorem; imitation precious stones, not cut or faceted, imitation semiprecious stones not faceted, imitation jet buttons, cut, polished, or faceted, and imitation solid pearls wholly or partially pierced, mounted or unmounted, 60 per cent ad valorem.

Mr. SMOOT. Mr. President, the object of this amendment is to divide imitation precious stones into two classes—the first class, bearing a rate of 20 per cent ad valorem, including the "imitation half pearls and hollow or filled pearls of all shapes, without hole or with hole partly through only." Those are not made in this country, nor can they be made here. Neither the jewelers nor the manufacturers undertake to manufacture them. The manufacturers of precious stones, together with all those who use them, appeared before the committee and said they were perfectly willing that these stones should come in at 20 per cent ad valorem. They were also willing that "imitation precious stones, not cut or faceted, imitation semiprecious stones, not faceted, imitation jet buttons, cut, polished, or faceted, and imitation solid pearls, wholly or partly pierced, mounted or unmounted," should come in at a rate of 60 per cent ad valorem. Those are the ones we make in this country. The wording of the amendment allows those which are not made and can not be made in this country to come in at a rate of 20 per cent ad valorem and those that are made here—and they are the cheaper kind; it is the solid ones that are made in this country—to come in at a rate of 60 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Utah [Mr. SMOOT] on behalf of the committee.

The amendment was agreed to.

Mr. SMOOT. Mr. President, the committee have to ask that paragraph 1430 go over for to-day.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCUMBER. In order that I may keep informed as to the progress which is being made with the bill, I desire to ask whether paragraph 1431 has been disposed of?

Mr. SMOOT. That paragraph was disposed of when we had the leather schedule under consideration, and the amendment which the Senator has in mind was disagreed to, leaving paragraph 1431 as the House framed it. The amendments in paragraph 1432 have been agreed to. We have also disposed of paragraph 1433 in reference to gloves; so that paragraph 1434 is next to be considered.

The next amendment was, on page 197, line 24, after the words "whip gut," to strike out "worm gut,"; and in line 25, after the word "thereof," to strike out the figures "25" and to insert "and manufacture of worm gut, 50," so as to make the paragraph read:

PAR. 1434. Catgut, whip gut, oriental gut, and manufactures thereof, and manufactures of worm gut, 50 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 198, line 3, before the words "per cent," to strike out "30" and to insert "50," so as to make the paragraph read:

PAR. 1435. Gas, kerosene, or alcohol mantles, and mantles not specially provided for, treated with chemicals or metallic oxides, wholly or partly manufactured, 50 per cent ad valorem.

Mr. POMERENE. Mr. President, may I ask the Senator a question?

Mr. SMOOT. Certainly.

Mr. POMERENE. I had some conversation with several members of the Finance Committee with regard to the transferring of horse collar pads to the free list.

Mr. SMOOT. An amendment to provide for that will be offered at the proper time, I will say to the Senator. Paragraph 1435a went out, as the Senator will remember, articles embraced therein being transferred to the free list. When the proper time comes we shall offer the amendment to which the Senator refers.

Mr. POMERENE. I think there is no objection to it at all.

Mr. SMOOT. No; I do not think there is.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The next amendment was, on page 198, after line 7, to insert:

PAR. 1435b. Cabinet locks, not of pin tumbler or cylinder construction, not over 1½ inches in width, 70 cents per dozen; over 1½ and not over 2 inches in width, $1 per dozen; over 2½ inches in width, $1.50 per dozen; padlocks, not of pin tumbler or cylinder construction, not over 1½ inches in width, 35 cents per dozen; over 1½ and not over 2½ inches in width, 50 cents per dozen; over 2½ inches in width, 75 cents per dozen; padlocks of pin tumbler or cylinder construction, not over 1½ inches in width, $1 per dozen; over 1½ and not over 2½ inches in width, $1.50 per dozen; over 2½ inches in width, $2 per dozen; all other locks or latches of pin tumbler or cylinder construction, $2 per dozen; and in addition thereto, on all the foregoing, 20 per cent ad valorem.

Mr. McLEAN. Mr. President, in line 10, I move that the committee amendment be amended by inserting the words "one-half" between the word "two," on line 10, and the word "inches," on line 11, so that it will read "over 1½ and not over 2½ inches."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. On page 198, line 10, after the word "two," the last word in the line, it is proposed to insert "one-half," so that it will read "not over 2½ inches in width."

Mr. SMOOT. That word was left out of the amendment as it was printed.

Mr. FLETCHER. Mr. President, this is an entirely new paragraph. I have not any data before me about it, but it embraces articles of very general use, and I imagine the production in this country must be something enormous. Is there any justification for the duty proposed? What has the committee to say with regard to the need of such duties as those suggested on the articles covered by the paragraph which are in such general use all over the country? I think our manufacturing plants are able to take care of the situation without the proposed duties, and I should like to have some sort of reason for imposing duties on these articles.

Mr. McLEAN. Mr. President, I will say to the Senator from Florida that there are importations of locks now coming in from Germany. The Germans purchase locks made in this country and make precise copies of them, and they are exporting them here at very much lower prices than the cost of the American article.

These articles have never been embodied in any tariff schedule especially designated to cover them, but, as I understand, in the past they have always borne duties affording some protection. The rates are not high, and they are clearly warranted if we are to give the American producer reasonable protection against the German importations which are coming in to-day.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Connecticut to the amendment reported by the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McLEAN subsequently said: Mr. President, I ask permission to have printed in the RECORD, at the point where paragraph 1435b was disposed of, a brief statement showing the difference between the cost of production of locks in this country and in Germany.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

UNFAIR COMPETITION.

The foreign manufacturers copy American styles and brands on locks (particularly padlocks) so closely as to deceive entirely the unwatchful purchaser.

The largest English manufacturer copies the brand of the "Corbin" concern, using the widely advertised "Oval" with their own name instead of Corbin, and using similar styles of design.

The Japanese producers have copied the well-known Miller trade-mark, sometimes exactly and sometimes using the word "Million" in a scroll as in the registered mark of the Miller Co. The designs of the Eagle Lock Co. have been similarly imitated by the Japanese.

The German manufacturers are equally guilty of these practices. Their catalogues show locks with the exact markings used by American concerns, also their advertised numbers. In duplicating the product of one American maker they stamp his brand (Climax) on their locks. In their copies of the designs of the Eagle Lock Co. they do not use the word "Eagle" but mark their product with an eagle. The "Bulldog" design of the Corbin Co. is exactly imitated with a dog's head and the word "Bulldog." Many other instances of the same kind might be cited. Nearly every catalogue shows attempts at imitating American products.

COMPARISON OF AMERICAN MANUFACTURERS' COSTS AND GERMAN PRICES.

The cheapest padlocks of German manufacture are quoted at from 4 cents to 12 cents per dozen. The cheapest padlock made by American manufacture costs, per dozen, 13 cents for material, 40 cents for labor and expense; total, 53 cents. One dealer in Boston has just received 10,000 dozen padlocks averaging $4.50 per gross; a Missouri River jobber bought 5,000 dozen, assorted, at 37 cents per dozen. The following exhibits of cost and German prices further illustrate the above conditions:

The next amendment was, on page 198, line 26, before the word "per," to strike out the figures "15" and to insert "25," so as to make the paragraph read:

PAR. 1436. Manufactures of amber, bladders, or wax, or of which these substances or any of them is the component material of chief value, not specially provided for, 25 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, that is an increase of 150 per cent above the rate in the present law. The items embraced in the paragraph are comparatively unimportant, of course, but I do not think that we ought to put ourselves in the attitude of raising duties merely for the sake of having something to do. There is, it seems to me, no earthly reason why the duties on the commodities covered by the paragraph should be raised 150 per cent.

Take manufactures of amber. Amber is used particularly in ornaments, beads, pipes, cigar holders, and sometimes in scientific instruments as an insulating material.

The imports of amber in 1914 were only $9,333 and in 1916, $5,436, and since the war they have amounted comparatively to nothing, but it is proposed to raise the duty from 10 per cent to 25 per cent, an advance of 150 per cent.

Take the next item—and there are several different items thrown together in the paragraph, with no relation to each other, so far as I can observe—manufactures of wax. The imports prior to 1914 averaged about $20,000 in value, and for that year they were a little more than that. During the war they were negligible, but after the war is all over they are not any greater than they were before the war.

The exports of wax increased from $47,000 in 1911 to $112,000 in 1914. Since that time, in 1918, we exported nearly $600,000 worth; in 1919, nearly $1,500,000 worth; in 1920, over $1,000,000 worth; and for nine months of 1921 just about $500,000 worth. England, Australia, Canada, and Japan are the principal countries of destination. It does seem to me that there is no reasonable argument that can be offered for the proposed increase in the rate of duty.

Mr. SMOOT. Mr. President, as far as the classification is concerned, this is the same classification that we have had in tariff bills from time immemorial. They are classified in the existing law just as they are classified in this law. These are virtually luxuries. It is not going to hurt a man who wants a certain kind of pipe made from amber if he has to pay 25 per cent ad valorem on the pipe he wants from another country. The paragraph relates to a very small industry in the United States. It is true that we export the wax products made in the United States, but they are all specialties. They are not exported because they are wax products as such, but they are wax products of some particular kind that is wanted in England or in Australia, and they always have carried the same rate. Why not get the revenue for the Government? If they are coming into this country, why not get 25 per cent?

I do not say that this is a protective rate. This is a revenue rate, and those that come into the country will come in at 25 per cent just as freely as they would at 10 or 15 per cent.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New Mexico?

Mr. SMOOT. I do.

Mr. JONES of New Mexico. I call the Senator's attention to the fact that these manufactures of wax are floor waxes and other polishes and insulating compounds.

Mr. SMOOT. Yes; they are; and they are phonograph records and plastic masses.

Mr. JONES of New Mexico. Yes. There is no revenue coming in. The last amount of revenue was $1,412 for a whole year.

Mr. SMOOT. We will certainly get that amount and a little more, because there can not be any less coming in, and we might just as well have the 10 per cent more.

Mr. JONES of New Mexico. With all due respect to my good friend from Utah, I do not believe it can be seriously said that this duty is levied for the purpose of revenue.

Mr. SMOOT. I think it is, because before 1914 the imports averaged about $20,000 in value. The Payne-Aldrich bill had a rate of 25 per cent. It was not necessarily a protective rate. Those that came in paid the 25 per cent, and they amounted to about as much as they do now, and we were exporting at the time that these imports were coming in. That shows that they were special articles that were coming in. It is true that floor wax and other polishes fall in this paragraph, but those are not what we import. What we are importing under this paragraph are the plastic masses, and the reason is that they want that particular item from some foreign country; or, as far as the amber pipes are concerned, if they want an amber pipe made upon a certain style coming from a certain country no smoker is ever going to object to paying for that special type of amber pipe 25 per cent duty to the Treasury of the United States.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. JONES of New Mexico. I move to strike out "25" and insert "10."

The PRESIDING OFFICER. The Senator from New Mexico offers an amendment to the committee amendment, which will be stated.

The READING CLERK. On page 198, line 26, in lieu of the amendment proposed by the committee, it is proposed to strike out "25" and insert "10."

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on the amendment of the committee.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment of the committee.

The next amendment was, on page 199, line 5, before the words "per cent," to strike out "20" and to insert "25"; in the same line, after the words "ad valorem," to strike out "automobile" and to insert "automobile, motor cycle,"; and in line 11, before the words "per cent," to strike out the figures "35" and to insert "50"; so as to make the paragraph read:

PAR. 1437. Manufactures of bone, chip, grass, horn, quills, india rubber, gutta-percha, palm leaf, straw, weeds, or whalebone, or of which these substances or any of them is the component material of chief value, not specially provided for, 25 per cent ad valorem; automobile, motor cycle, and bicycle tires composed wholly or in chief value of rubber, 10 per cent ad valorem; molded insulators and insulating materials, wholly or partly manufactured, composed wholly or in chief value of india rubber or gutta-percha, 30 per cent ad valorem; combs composed wholly of horn or of horn and metal, 50 per cent ad valorem. The terms "grass" and "straw" shall be understood to mean these substances in their natural state and not the separated fibers thereof.

The amendment was agreed to.

The next amendment was, on page 199, line 15, after "Par. 1438," to strike out "Manufactures" and insert "Ivory tusks in their natural state or cut vertically across the grain only, with the bark left intact, 10 per cent ad valorem; manufactures," so as to read:

PAR. 1438. Ivory tusks in their natural state or cut vertically across the grain only, with the bark left intact, 10 per cent ad valorem; manufactures of ivory or vegetable ivory, or of which either of these substances is the component material of chief value, not specially provided for, etc.

Mr. WADSWORTH. Mr. President, I hope very much, indeed, that the committee amendment will be rejected in this case. I know that it has been a subject of discussion in the Committee on Finance on more than one occasion, and at one stage of the proceedings some of us entertained the opinion that the committee intended to restore ivory tusks to the free list; and that is the plea I want to make.

The ivory which is brought to this country in the raw state, or in the tusk form, of course, is used very largely, almost entirely, in the manufacture of piano keys. The piano-manufacturing business in this country, as everyone knows, is very large, indeed. The piano-key manufacturing business is in a sense separate from the manufacture of the pianos themselves. In other words, the manufacturers of pianos purchase the keys from the key manufacturers.

It would be quite impossible for the manufacturers of the keys to compete with the low labor costs of Europe were it not for a duty upon the manufactured keys, and this section provides for such a duty; but at the same time that it provides for a duty upon the manufactured keys it puts a duty of 10 per cent on the ivory tusks from which the keys are made.

Let me say just a word about how this ivory is gathered, and how it is sold and disposed of. It is gathered by the natives in Central Africa. It is found lying in the jungles and on the plains, the result of the death through the centuries and generations of the elephants which produce it in the first instance. Most of it, as I understand, is gathered in the Belgian Congo. It is purchased by the traders and brought to Europe in bulk, and at Antwerp and at London it is sold at public auction at stated intervals, twice or thrice a year, according to my recollection. The buyers come to London and to Antwerp from all over those countries in which it is desired to manufacture ivory into a finished product. The bidding is in an openly conducted auction. No duty is charged against the importation of raw ivory into England; none is charged by Germany; none is charged by France. In fact, I think no other country attempts to assess an import duty on raw ivory.

Our manufacturers of ivory piano keys must go to London or to Antwerp, as the case may be, and bid against their competitors from Germany, England, and France. If we charge an import duty, our manufacturers of ivory keys will have to pay this 10 per cent over and above the rate which they pay for the raw ivory in competition with the manufacturers of Germany, France, and England. In addition to that, they have to pay the freight from Antwerp or London, as the case may be, for transporting the ivory at least 3,000 miles and in some instances 4,000 miles, for some of the important ivory piano-key manufacturers are located in the neighborhood of Chicago, some are at Buffalo, and some are in the State of Connecticut. The imposition of a 10 per cent import duty on the raw material will make it absolutely impossible, in my judgment, for them to compete with the piano-key manufacturers of the other countries who buy their ivory in an open market and pay no import duty at all, and who do not have to pay the freight on the raw material for 3,000 or 4,000 miles.

Mr. NEW. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Indiana?

Mr. WADSWORTH. I yield.

Mr. NEW. I merely wish to call the attention of the Senator from New York to the fact that a duty of 10 per cent is really equivalent to a duty of 20 per cent, for the reason that 51 per cent of the raw tusk is unavailable for use in the manufacture of piano keys.

Mr. WADSWORTH. That is a very important fact.

Mr. NEW. One-fourth of the tusk from the head down is hollow, and is therefore useless; and one-fourth of the tusk from its lower end up is too small for use. The only part that is available, therefore, is the middle section, and that is about 49 per cent of the total tusk. Therefore, as the Senator from New York points out, a duty of 10 per cent is really equivalent to a duty of 20 per cent on the only part of the tusk that is of value.

Mr. WADSWORTH. Mr. President, what the Senator says is absolutely true. The American manufacturers have endeavored to make some good commercial use of the 51 per cent which otherwise has been going to waste, and have tried to make beads and little cheap ornaments. They simply can not do it in competition with others who can manufacture abroad so much more cheaply, and the 51 per cent is to them an absolute waste and loss; so they will be paying 20 per cent instead of 10 per cent.

Mr. FLETCHER. Mr. President——

Mr. WADSWORTH. Just a moment. I understand that the Finance Committee wants this duty in order to get some revenue; but may I ask who is going to bring any raw ivory into the United States and pay a duty on it when no other country on the face of the earth charges a duty on the importation of raw ivory? What would be the purpose?

Mr. SMOOT. Mr. President, I want to say to the Senator that they are doing it now, and paying 20 per cent to-day upon it, and they are bringing in more than they did in 1914.

Mr. WADSWORTH. Mr. President, I think the Senator will find, if he examines into that matter, that that situation is fast drawing to a close.

Mr. SMOOT. That was for the calendar year 1921.

Mr. WADSWORTH. Yes; I know.

Mr. SMOOT. It must be drawing to a close within the last few months.

Mr. FLETCHER. Mr. President, the Senator will bear in mind that this is an ad valorem duty, not a specific duty, so it can not be said that it is 20 per cent instead of 10 per cent. It is an ad valorem duty of 10 per cent.

Mr. WADSWORTH. I know it.

Mr. FLETCHER. It is not based on the quantity of the article or the size of the article, or anything like that. It is an ad valorem duty.

Mr. WADSWORTH. Certainly.

Mr. FLETCHER. So I do not see that the point raised by the Senator from Indiana and the Senator from New York applies, when they insist that it is really in effect a higher duty than this.

Mr. WADSWORTH. It is, in effect, a 20 per cent duty upon the usable ivory. They can use only one-half of it.

Mr. FLETCHER. It is based on the value of the article.

Mr. WADSWORTH. Yes; but it is 20 per cent on the value of the usable ivory. Half of it can not be used. It is the usable part that gives the value to the ultimate manufacturer.

The same matter was brought before the Ways and Means Committee of the House, and as soon as this was explained to that committee they promptly put ivory on the free list. For some reason or other the Finance Committee has decided to put it upon the dutiable list. You will not continue to get any revenue from it to amount to anything. They are trying their best to keep their factories running now, but it stands to reason that you can not make piano keys with dutiable raw material plus the freight on 3,000 miles transportation.

Mr. SMOOT. We are giving them a 50 per cent duty upon the manufactured article.

Mr. WADSWORTH. That covers the difference in labor cost alone. How about the transportation?

Mr. SMOOT. To-day the rate is only 35 per cent. If the Senator's argument were good many would be coming in here to-day, and would have been since the war, without a doubt. The only difference there is now is the 15 per cent, and in this bill there is a spread of 40 per cent between the raw ivory and the manufactured article. There is a difference of 40 per cent in this bill, and under the existing law there is a difference of 15 per cent. So we are giving the manufacturer an advantage of 25 per cent.

Mr. WADSWORTH. I do not know whether the existing law was meant to be protective or not. Does the Senator know?

Mr. SMOOT. On the ivory, certainly, it was not so intended.

Mr. WADSWORTH. I mean on the manufactured article.

Mr. SMOOT. It certainly was not in my opinion, when they were charged 20 per cent on the ivory and given only 35 per cent on the manufactured article, and half the ivory is waste, as the Senator said. That is something which happens in every country.

Mr. WADSWORTH. It is not important what the spread is, until we first ascertain what the 50 per cent does in the matter of protection, and my information is that the 50 per cent barely meets the difference in labor costs.

Mr. SMOOT. That can not be, under existing law, according to the figures of importations, because importations of manufactured articles are not coming in with a spread of only 15 per cent in the duties. We took off 10 per cent on the ivory and added 15 per cent on the manufactured goods. Why will they not import ivory and make the goods there? They can not import the goods and we give them a 10 per cent advantage on the ivory.

Mr. NEW. Will the Senator from New York yield for a word of explanation of what the Senator from Utah has just said?

Mr. WADSWORTH. I yield.

Mr. NEW. The Senator from Utah makes the point that the part of the tusk which is not available for the manufacture of piano keys, which is the thing we have in mind, is used in the manufacture of other articles on which a duty has been placed. That is true; but after the most careful precaution only about 10 per cent of the other half of the tusk, the part that is not available for use for piano keys, can be made into beads or into anything else.

Mr. SMOOT. That happens all over the world.

Mr. NEW. There certainly will be no manufacture of articles unless you can get the free raw material.

Mr. SMOOT. There is to-day.

Mr. NEW. That is the difficulty with it.

Mr. SMOOT. With a rate of 20 per cent on ivory tusks and only 35 per cent on the manufactured article, none are coming in.

Mr. NEW. To-day the factories are not making a single ivory bead, not one. They have suspended for the present until they know what is to be provided in this bill. The Senator loses sight of one fact, pointed out a few moments ago by the Senator from New York, that the manufacturers here imported years ago a very large quantity of ivory, which they then got on the free list. Before the Underwood law took effect they imported large quantities of ivory, with which they have been working.

Mr. SMOOT. The imports of ivory in 1919, with a duty of 20 per cent ad valorem, were twice what they are now.

Mr. NEW. In 1919; but this was some years before that time.

Mr. SMOOT. We have not had free ivory since the Payne-Aldrich law was in operation.

Mr. NEW. We had it before the Underwood law went into effect.

Mr. SMOOT. Certainly, under the Payne-Aldrich law.

Mr. NEW. Then they imported a lot of this ivory, which they have had and with which they have been working.

Mr. SMOOT. They imported in 1920 more than they imported in 1919, and they could not have been working from 1913 on that amount.

Mr. NEW. Let me say, in answer to the Senator, that at that time the German factories were not reestablished and they were not manufacturing the stuff. They were not coming in competition with the American manufacturer.

Mr. SMOOT. They are not coming in competition now.

Mr. McCUMBER. I want to ask the two Senators if they will yield to me to present a unanimous-consent agreement?

The PRESIDING OFFICER (Mr. MOSES in the chair). The time of the Senator from New York has expired, in any event.

Mr. McCUMBER. I send to the desk and ask to have read a unanimous-consent agreement which I propose.

The PRESIDING OFFICER. The Senator from North Dakota presents a unanimous-consent agreement, which the Secretary will read.

The reading clerk read as follows:

It is agreed by unanimous consent that at not later than 4 o'clock p. m. on the calendar day of Tuesday, August 15, 1922, the Senate will proceed to vote in the Committee of the Whole, without further debate, upon reported amendments of the Finance Committee to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, that remain undisposed of (and in regular order), and thereafter upon amendments that may be offered on behalf of the said committee and upon any motion or motions that may be made in relation to the same; that at not later than 5 o'clock p. m. upon the calendar day of Thursday, August 17, 1922, the Senate will proceed to vote in the Committee of the Whole, without further debate, upon individual amendments that may be pending to the said bill and upon any motion or motions that may be made regarding the same; that after the bill is reported to the Senate and unreserved amendments made in Committee of the Whole are concurred in, no Senator shall speak more than once or longer than 10 minutes upon any reserved amendment or any amendment that may be offered in the Senate or upon any motion or motions made in regard thereto; that at not later than 4 o'clock p. m. on the calendar day of Saturday, August 19, 1922, the Senate will proceed to vote, without further debate, upon the bill (H. R. 7456) through the regular parliamentary stages to its final disposition: *Provided*, That on the calendar day of August 16, 1922, the Senate shall meet at the hour of 10 o'clock a. m., and the Senator from Oklahoma [Mr. HARRELD] shall be recognized for the purpose of offering an amendment to the bill, and shall be entitled to speak for one hour upon the said amendment.

Mr. UNDERWOOD. Mr. President, before the roll is called let me ask the Senator in charge of the bill a question. As I understand from the reading of the proposal, it would give the committee, even after debate is closed, and when we can only vote, an opportunity to offer amendments, to be disposed of without debate. I do not think that should be done. I think when debate is closed the committee should cease offering amendments. It may be that the amendments contemplated are merely matters of form, but the committee might bring the Senate to vote on a material amendment, and I do not think we ought to make an agreement which would allow the committee, after the close of debate and consideration, the right to come in and offer committee amendments.

Mr. McCUMBER. Any Senator can offer an amendment.

Mr. UNDERWOOD. Of course, if the chairman of the committee, after that time expires, has an amendment he wants to offer, whether it comes from his committee or himself, and there is some debate on it, that is all right; but to say that we must be forced to vote on a new amendment which we have never heard of, after all debate is closed, it seems to me is not reasonable.

Mr. LODGE. The Senator makes the objection only to new amendments?

Mr. UNDERWOOD. Certainly. Amendments that are pending——

Mr. LODGE. Pending amendments can be voted on without debate.

Mr. UNDERWOOD. As to all amendments that are not disposed of, the proposal provides that we shall vote without debate, and that I am perfectly willing to agree to.

Mr. McCUMBER. I can see no difference between the committee amendment and any other amendment. A fact that a committee reports it makes no difference in its status.

Mr. UNDERWOOD. If the Senator will allow me, when you get to the other amendments, then you reopen debate under a 10-minute rule, and something can be said.

Mr. LODGE. Exactly; and new amendments by the committee could then be offered.

Mr. UNDERWOOD. The chairman of the committee in his individual capacity may offer them.

Mr. McCUMBER. We do not want to be debarred from offering amendments which the committee may have discussed.

Mr. UNDERWOOD. Under this agreement as it stands, after the time limit for debate on committee amendments has closed, and we are voting on them, the committee can come in and propose a change in the bill without giving any opportunity for discussion at all, even for 10 minutes. I do not think that is right.

Mr. SIMMONS. Mr. President, if we should adopt amendments, after the time for debate has expired, which would require the bill to be amended in some other respects, probably it would be necessary for the committee to bring in some amendments.

Mr. UNDERWOOD. I realize that. If it is a purely formal amendment, it can be done by unanimous consent without any difficulty; but if it can not be done by unanimous consent, when we reach individual amendments, the chairman of the committee can move his amendment.

Mr. McCUMBER. I think that can be met. Undoubtedly the committee will be in session each day, and it makes little difference whether the committee offers an amendment as a com-

mittee amendment or whether the chairman or any member of the committee offers it and makes the suggestion that the committee has considered it; the force and effect of it will be just the same. But I think we can meet what the Senator objects to by striking out the words "and thereafter upon amendments that may be offered on behalf of the said committee," on lines 8 and 9.

Mr. LODGE. That meets the difficulty.

Mr. McCUMBER. I will modify the agreement by striking out the words on lines 8 and 9, "and thereafter upon amendments that may be offered on behalf of the said committee."

Mr. FLETCHER. Will the Senator read it as it will read if modified?

Mr. McCUMBER. Then it will read:

It is agreed by unanimous consent that at not later than 4 o'clock p. m. on the calendar day of Tuesday, August 15, 1922, the Senate will proceed to vote in the Committee of the Whole, without further debate, upon reported amendments of the Finance Committee to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, that remain undisposed of (and in regular order) and upon any motion or motions that may be made in relation to the same; that at not later than 5 o'clock p. m. upon the calendar day of Thursday, August 17, the Senate will proceed to vote in Committee of the Whole, without further debate, upon individual amendments that may be pending to the said bill—

And so forth.

The PRESIDING OFFICER. An agreement of this character can not be entered into in the absence of a quorum.

Mr. SIMMONS. Mr. President, I want to say, to this side of the Chamber especially, that this proposition was framed by a conference between certain representatives of the other side and myself, in conference with certain representatives of this side. I have considered it very carefully. The time for a final vote is the same as that fixed in the first unanimous-consent proposition which I offered. This differs from that only in that it divides up the time intervening between now and the 19th day of August so as to make it certain that there shall be a reasonable time for the discussion of the balance of the committee amendments, for the discussion of the amendments coming from individual Senators, and for discussion, after the bill gets into the Senate, of amendments offered in the Senate.

I think the unanimous-consent agreement as to a division of time is well adjusted; I believe the time fixed for voting is reasonable and that we can take up the amendments within that time without denying a reasonable opportunity for the discussion of important amendments.

Mr. JONES of Washington. Mr. President, as I understand the unanimous-consent agreement, it gives just two days for the consideration of amendments offered by individual Senators. Is that correct?

Mr. SIMMONS. That is correct.

Mr. JONES of Washington. It seems to me that time is too short. The vice of the proposition is the presentation and consideration of so many amendments without any discussion, because there will be a great many, when the time comes, that we shall have to vote on without any consideration whatever. I have two or three amendments which I expect to offer. There is only one of them that is really of special importance, but there is one which I consider of very great importance that I desire to offer and to have an opportunity to discuss. I do not know whether I will be given the opportunity or not. I suppose there will be a scramble for recognition for the consideration of individual amendments.

Mr. LENROOT. I suggest to the Senator that there will be two days in Committee of the Whole, and there will also be two days in the Senate.

Mr. JONES of Washington. Of course, it is in Committee of the Whole where real consideration will be given to amendments. If an amendment is rejected in Committee of the Whole, there is very little chance for it in the Senate.

Mr. WATSON of Indiana. I will say to my friend, if he will permit me, that we might have two night sessions to help the matter along.

Mr. JONES of Washington. That is what I want to know. I was going to ask whether it is contemplated that we shall have any longer hours than we have been having.

Mr. LODGE. That was contemplated and agreed to.

Mr. SMITH. I should like to inquire at what time is it proposed to begin to consider amendments of individual Senators. What length of time will be given for that purpose? I understood that Senators are to have two days for that purpose. Is that after the bill goes into the Senate?

Mr. LODGE. No; there will be a day afterwards in the Senate.

Mr. SMITH. Is that to begin on Tuesday or Wednesday?

Mr. SIMMONS. On Wednesday morning.

Mr. SMITH. Then we would have two days, and if we have night sessions we would have two days and two evenings to consider amendments.

Mr. LODGE. And then a day in the Senate.

Mr. SIMMONS. We will have a day for the discussion of amendments in Committee of the Whole, and then we will have practically two days after the bill gets into the Senate. If the Senator wants to do so, he can offer his amendment in the Senate.

Mr. SMITH. That is the information I desired to get. So we shall have practically the remainder of the time to consider the individual amendments.

Mr. LENROOT. Will the Senator from South Carolina yield?

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. JONES of Washington. Mr. President, I merely desire to say this and then I shall yield the floor: I wish we could pass on this measure and have the amendments all properly discussed before they are voted upon, but I am very anxious to have a vote on the measure, and I shall take my chances with the promise here made that if developments warrant we will have night sessions and probably longer hours in the day. So I shall not object.

Mr. SMITH. After the lengthy discussion and the time we have consumed in debate, as practically every Senator has made up his mind as to what he is going to do, and as the Senate has already indicated the extent to which the bill should be modified, I sincerely hope the unanimous-consent agreement will be adopted, so that next week will see the final stage on the part of the Senate in the passage of the bill.

Mr. JONES of Washington. It occurs to me that we should at least have a night session for individual amendments, but I understand we are to have, as the agreement is now framed, only one. I suggest that 5 o'clock on Thursday be changed to read "not later than 10 o'clock on Thursday." That will give us two night sessions if we need them.

Mr. McCUMBER. That is entirely satisfactory.

The PRESIDING OFFICER. Inasmuch as no agreement of this character can be entered into in the absence of a quorum, the Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Brandegee	Jones, N. Mex.	Moses	Smoot
Bursum	Jones, Wash.	New	Stanley
Calder	Kendrick	Overman	Sterling
Colt	Keyes	Pepper	Swanson
Curtis	Lenroot	Phipps	Townsend
Dial	Lodge	Pomerene	Underwood
Edge	McCormick	Ransdell	Wadsworth
Fletcher	McCumber	Sheppard	Warren
Hale	McKellar	Shortridge	Watson, Ind.
Harreld	McLean	Simmons	
Heflin	McNary	Smith	

The PRESIDING OFFICER. Forty-two Senators having answered to their names, there is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and Mr. NICHOLSON, Mr. REED, and Mr. SUTHERLAND answered to their names when called.

Mr. ODDIE, Mr. CAPPER, Mr. GOODING, Mr. ERNST, Mr. NORBECK, Mr. DILLINGHAM, Mr. WATSON of Georgia, and Mr. ASHURST entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-three Senators having answered to their names, a quorum is present.

Mr. HEFLIN. Mr. President, I have no desire to prevent an early vote upon the tariff measure, but it seems to me there is no necessity for putting in this written agreement that one Senator on Wednesday shall have unanimous consent to speak an hour. That provision has no business in the unanimous-consent agreement submitted to the Senate. The Senator from New Mexico [Mr. JONES] a few nights ago asked that the Senate meet at 10 o'clock in the morning in order that he might address the Senate for one hour, and that consent was given. The Senator from New York [Mr. CALDER] got consent from the Senate to do the same thing this morning.

I have no doubt that the Senate would give to the Senator from Oklahoma [Mr. HARRELD] now, if he should ask it, unanimous consent to speak from 10 o'clock on the day designated until 11 o'clock, but I do not think the request should be coupled with the written agreement for the whole Senate. If the Senator from Oklahoma desires to speak that hour and will ask that unanimous consent now be given, so far as I am concerned it can be granted, and then I shall be willing to have the other part of the written consent agreement go through.

Mr. SIMMONS. I suggest to the Senator from Oklahoma that he now ask that unanimous consent be given that he may address the Senate at 10 o'clock on Monday, or a later day in the week if he prefers.

Mr. WATSON of Indiana. Yes; let the Senator from Oklahoma make the request now.

Mr. HARRELD. Mr. President, I ask unanimous consent that I may be given an hour to discuss my amendment relating to crude petroleum on Wednesday morning next, beginning at 10 o'clock.

The PRESIDING OFFICER. The Senator from Oklahoma asks unanimous consent that on Wednesday next the Senate shall meet at 10 o'clock a. m., and that he shall have an hour, from 10 until 11 o'clock, to discuss an amendment proposed by him to the pending measure. Is there objection? The Chair hears none, and it is so ordered.

The Senator from North Dakota presents a unanimous-consent agreement which the Secretary will read.

The reading clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT.

It is agreed by unanimous consent that at not later than 4 o'clock p. m. on the calendar day of Tuesday, August 15, 1922, the Senate will proceed to vote in the Committee of the Whole, without further debate, upon reported amendments of the Finance Committee to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, that remain undisposed of (and in regular order), and upon any motion or motions that may be made in relation to the same; that at not later than 10 o'clock p. m. on the calendar day of Thursday, August 17, the Senate will proceed to vote in the Committee of the Whole, without further debate, upon individual amendments that may be pending to the said bill and upon any motion or motions that may be made regarding the same; that after the bill is reported to the Senate, and unreserved amendments made in Committee of the Whole are concurred in, no Senator shall speak more than once, nor longer than 10 minutes, upon any reserved amendment or any amendment that may be offered in the Senate or upon any motion or motions made in regard thereto; that at not later than 4 o'clock p. m. on the calendar day of Saturday, August 19, 1922, the Senate will proceed to vote, without further debate, upon the bill H. R. 7456 through the regular parliamentary stages to its final disposition.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the unanimous-consent agreement is entered into.

The question now recurs upon the amendment of the Committee on Finance, on page 190, in the first three lines of paragraph 1438. [Putting the question.] The "noes" appear to have it.

Mr. SMOOT. I ask for the yeas and nays, Mr. President.

The yeas and nays were ordered.

Mr. ASHURST. I ask that the amendment may be stated, Mr. President.

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. On page 190, paragraph 1438, line 15, after the figures "1438," it is proposed to strike out the word "Manufactures" and to insert "Ivory tusks in their natural state or cut vertically across the grain only, with the bark left intact, 10 per cent ad valorem; manufactures," so as to read:

PAR. 1438. Ivory tusks in their natural state or cut vertically across the grain only, with the bark left intact, 10 per cent ad valorem; manufactures of ivory or vegetable ivory, or of which either of these substances is the component material of chief value, not specially provided for; manufactures of mother-of-pearl, shell, plaster of Paris, and india rubber known as "hard rubber"—

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Committee on Finance. The yeas and nays have been ordered, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. HALE (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Montana [Mr. MYERS] and vote "yea." I am not advised as to how my colleague would vote if he were present.

Mr. SIMMONS (when his name was called). I have a general pair with the junior Senator from Minnesota [Mr. KELLOGG]. In his absence I withhold my vote.

Mr. SUTHERLAND (when his name was called). Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. FLETCHER. Making the same announcement as to my pair and transfer as before, I vote "yea."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 17, nays 34, as follows:

YEAS—17.

Ashurst	Jones, N. Mex.	Overman	Trammell
Curtis	Kendrick	Pomerene	Warren
Dial	Keyes	Sheppard	
Fletcher	Lenroot	Smoot	
Gooding	McCumber	Sutherland	

NAYS—34.

Borah	Harreld	New	Shortridge
Brandegee	Heflin	Nicholson	Stanley
Broussard	Jones, Wash.	Norbeck	Sterling
Bursum	Lodge	Oddie	Townsend
Calder	McCormick	Pepper	Underwood
Capper	McKellar	Phipps	Wadsworth
Colt	McLean	Ransdell	Watson, Ind.
Ernst	McNary	Rawson	
Hale	Moses	Reed	

NOT VOTING—44.

Ball	Frelinghuysen	McKinley	Simmons
Cameron	Gerry	Myers	Smith
Caraway	Glass	Nelson	Spencer
Culberson	Harris	Newberry	Stanfield
Cummins	Harrison	Norris	Swanson
Dillingham	Hitchcock	Owen	Walsh, Mass.
du Pont	Johnson	Page	Walsh, Mont.
Edge	Kellogg	Pittman	Watson, Ga.
Elkins	King	Poindexter	Weller
Fernald	Ladd	Robinson	Williams
France	La Follette	Shields	Willis

So the amendment of the committee was rejected.

Mr. MCCUMBER. Mr. President, the Senate having just voted this little gratuity to the piano makers, I think it will necessitate changes in some of the other rates, which will have to be lowered in some instances.

As it is half past 4 o'clock and the committee would like a little time to go over the subsequent paragraphs, I suggest that we now have an executive session and then take a recess.

GOVERNOR OF FEDERAL RESERVE BOARD.

Mr. HEFLIN. Mr. President, before the Senator from North Dakota makes that request I wish to state that this morning the Senator from Connecticut [Mr. MCLEAN] asked to have printed in the RECORD a letter received from ex-Governor Harding, formerly of the Federal Reserve Board. I could not find out then what the letter was about and objected for the time being.

I understand now that it contains a denial that he was speculating in cotton in New York at the time he refused to aid the cotton farmers in holding their cotton off the market until the price would cover the cost of production. Mr. President, during the period of destructive deflation conducted by ex-Governor Harding, his strange conduct toward the cotton producers was such as to cause me and tens of thousands of people in the South to wonder why he refused time and time again to do anything to stop the rapid and ruinous fall in the price of cotton.

If he had sold cotton futures on the exchange it was to his interest for cotton to go down in price, and the lower it went the more money he made. He had it in his power to stop the price from going down, and he refused to do it. If the farmers could have obtained loans to hold their cotton for 30 cents, the fall in the price would have stopped at 30 cents, and the farmers would have received 30 cents for all the cotton that ex-Governor Harding's deflation policy forced out of their hands in 1920 at a price far below the cost of production. His persistent refusal to do anything to stop the rapid fall in the price of cotton and his strange and hostile demeanor toward the cotton producers and their friends who begged him to do something to save their business from ruin caused me and tens of thousands of people in the South to believe that he speculated in and made money on the falling price of cotton when he had it in his power to prevent the ruin of the cotton industry in the section from which he came. I did not expect him to confess his guilt, and I will not now believe what he says upon the subject.

Mr. President, I can take the circumstantial evidence against him and convict him before any jury composed of cotton producers, merchants, and bankers in the cotton-growing States. I therefore do not object to his Republican friend from Connecticut printing his letter in the RECORD.

FEDERAL RESERVE BOARD,
Washington, August 7, 1922.

Hon. GEORGE P. MCLEAN,
Chairman Committee on Banking and Currency,
United States Senate.

MY DEAR SENATOR: Many of the papers yesterday morning carried a report of a speech which was made in the Senate Saturday afternoon, in which it was broadly insinuated that I have been speculating in cotton and that the policies of the Federal Reserve Board have been influenced by my personal interest in such speculation.

Since I have been a member of the Federal Reserve Board I have never had the slightest personal interest in any speculative transaction. In the autumn of 1914, when the "buy a bale" movement was under way, I bought one bale of cotton at 10 cents per pound, but with that exception I have no personal interest, direct or indirect, in the cotton market. I have never been "short" of cotton in my life, and since I have been on the board, with the exception above stated, I have had no transactions, for cash or on a margin, in cotton or any other commodity, nor have I had any direct or indirect personal interest in any purchases or sales of commodities or stocks upon any of the exchanges. If the rules permit, I shall be greatly obliged if you will read this letter into the RECORD.

Very truly yours,

W. P. G. HARDING.

TARIFF DUTIES ON PETROLEUM.

Mr. HARRELD. I ask unanimous consent to have printed in the RECORD a letter which I have received from Gen. Willis J. Hulings, of Oil City, Pa., pertinent to my proposed oil tariff amendment and also to the pending investigation before the Committee on Manufactures.

The PRESIDING OFFICER. Is there objection?

Mr. OVERMAN. I did not hear the request.

The PRESIDING OFFICER. The Senator from Oklahoma asks unanimous consent to have printed in the RECORD a letter received by him with reference to an amendment offered by him to the tariff bill. Is there objection? The Chair hears none, and it is so ordered.

The letter referred to is as follows:

OIL CITY, PA., *August 8, 1922.*

Hon. JOHN W. HARRELD,
United States Senate, Washington, D. C.

MY DEAR SENATOR: My experience in "oil" began in the "derrick," where I ran "tour" from midnight till noon for several years, and since then in all its phases. I have seen the production of oil increase from a time when 10,000 barrels per day was a "flood" until the present, when the production is over 1,500,000 barrels daily.

With some knowledge of the situation, gathered in years of practical experience, I am confident that no industry makes a stronger appeal to the doctrine of protection than the petroleum business, which is now suffering from the free importation of floods of Mexican oil, and I take the liberty of presenting some facts, which may aid you in advocating a tariff on crude petroleum and crude equivalents of petroleum products.

The table shows the domestic production, the importations, the consumption, and the stocks on hand:

Year.	Domestic production.	Importations.	Exports and consumption.	Stocks on hand, domestic.	Mexican oil in United States.
	Barrels.	*Barrels.*	*Barrels.*	*Barrels.*	*Barrels.*
1919	377,719,000	52,822,000	418,477,000	127,867,000	.....
1920	443,402,000	106,175,000	530,574,000	123,291,000	.....
1921	469,639,000	125,306,000	525,474,000	170,350,000	13,540,000
First six months of 1922	266,937,000	77,037,000	270,799,000	233,232,000	21,669,000
Daily average:					
In 1922, first 6 months	1,466,678	425,580	1,488,000	233,232,000	21,669,000
In 1920	1,214,900	289,100	1,453,300	123,291,000	.....
Daily increase during 18 months	251,778	136,480	34,700	24,000	.....

In 1919 the production of domestic oil was 377,719,000 barrels; of imported oil, 52,822,000 barrels; available supply, 430,541,000 barrels; consumption, 418,477,000 barrels; excess production, 12,064,000 barrels—about 10 days' supply.

But in the first six months of 1922 the excess of consumption had increased to 254,901,000 barrels held in storage (about six months' supply), of which only 21,669,000 barrels were Mexican oil, showing that the Mexican oil had displaced the domestic oil and forced 233,232,000 barrels into storage, at a cost for storage of hundreds of millions of dollars annually as a direct burden upon the industry cast upon it by the imported oil.

It was not until January, 1921, that Mexican importations began to affect prices greatly.

During 1920 there were about 260,000 producing wells in the United States, producing 443,402,000 barrels, an average of 4.7 barrels per day.

Estimated at the current markings for the various districts, this crude product was sold for about $1,173,113,000, to which $384,000,000 were added by refining. This gives some conception of the magnitude of the business.

During the year 1921, 21,850 new wells were drilled in the United States, at an average cost of probably $16,000 each, amounting to $349,600,000, and increasing the production from 443,402,000 barrels in 1920 to 469,639,000 barrels in 1921, a daily average of 4.56 barrels per well. Yet with this increased production of 26,237,000 barrels brought about by an expenditure of $349,600,000 for new wells, the product for 1921 sold for $480,000,000 less money than the product of 1920; that is, 6 per cent more oil, requiring an additional investment of $349,600,000 for new wells, sold for $480,000,000 less money.

Nor was this due to a great surplus of supply over the demand for consumption, because the domestic production was about equal to the consumption, as the table shows. But the flood of Mexican oil coming in late in 1920 gave these importing concerns the power to knock the bottom out of the market, and domestic oil selling for $3.15 per barrel in January, 1921, sold for 80 cents in June. Many of the small producers were forced to the wall. Prices were slashed; and the big concerns, having prepared themselves by the negotiation of immense loans in anticipation of the slump, loaded up with cheap property and cheap oil.

During the first half of 1922 there were 266,937,000 barrels of domestic oil produced from about 280,000 wells in the United States, showing the average daily production of 5¼ barrels per well.

Of these, there are 71,100 wells in Pennsylvania, averaging $\frac{3}{10}$ barrels per day, while there are, approximately, in Illinois, 17,000; Ohio, 40,000; Indiana, 2,500; New York, 14,500; and West Virginia, 20,000; or about 165,000 producing wells, which average $\frac{1}{10}$ barrels daily.

The cost of producing oil in the United States depends upon many factors, which can only be estimated accurately when the local conditions are known; but if the cost in the various fields were averaged, including royalties, probably the cost would be about $2.25 per barrel. This, however, is a mere guess.

There were 21,850 wells completed in 1921 in the United States, with an initial production of 2,635,937 barrels, or about 125 barrels each per day. During the same year there were completed in Mexico 324 wells, with an initial production of 3,247,275 barrels of 10,000 barrels per well. Initial production means the first day's production, which gradually falls off, but it accounts for the low cost of producing Mexican oil which probably does not exceed 20 cents per barrel.

The Mexican production is largely owned by the Royal Dutch Shell Co., an English concern, the Standard Oil Co. and its subsidiaries, and the General Petroleum Co., or the Doheney interests, which have passed into the control of the British-Mexican Petroleum Co. (Ltd.), an English concern.

These interests practically control the pipe-line storage plants and refineries in the United States, and, of course, the cheaper the raw product handled in their pipe-lines and refineries the more profitable it is to them. Having the arbitrary power to fix the price of the products, they naturally favor cheap crude and oppose a tariff. These interests, producing Mexican oil at a cost of 20 cents a barrel, find the free invasion of the United States market, where it costs $2.25 a barrel to produce oil, enormously profitable, which they will fiercely fight to maintain.

The statement made recently to the Senate committee investigating gasoline prices that "the law of supply and demand is operating to the fullest extent in the oil industry" is rather amusing to those who know how prices are marked up or down, and like the statement that the Standard Oil Co. nowhere monopolizes the trade and only controls 45 per cent of the business, is susceptible of more than one interpretation and all of them deceptive and misleading. It may be that the Standard in its own name does but 45 per cent of the refining, but when there is added the business done by its subsidiaries and concerns acting in concert with the Standard, like the Sinclair, the Midwest, the Prairie, the Ohio, and the Doheney interests, the suggestion that the business is not controlled by monopolistic methods is silly.

The witness before the committee admitted that "usually one concern took the market leadership," and gave the whole snap away, for even the secretary of the American Petroleum Institute knows that the "one concern" that has taken the "market leadership" is the Standard Oil Co., and has been doing it right along, ever since the days of the Southern Improvement Co. The Senate committee was solemnly assured that there is no such thing as monopoly in the oil trade, yet at the same meeting of the committee the vice president of the Midwest Co., one of the Standard concerns, testified that his company had a complete monopoly of the Rocky Mountain field, but since sold out and the Standard owns the business.

It is needless to quibble about words or percentages. The prodigious growth of the petroleum industry afforded opportunity for independent operators to get into the business. It grew faster than the Standard could handle it. When the business was comparatively small the Standard had absolute control, but when the consumption is 1,600,000 barrels per day, with an excess of 350,000 barrels that must be stored, it is not necessary that one should own all the refineries to control prices, but the owner of 45 per cent could take "market leadership."

Entirely aside from the ownership or control of refineries or production the big concerns that control the pipe lines and the storage plants and 45 per cent of the refineries could cut the price of crude one-half to-morrow and the producer would be helpless, and this power will exist just as long as the concerns who own the pipe lines and storage plants can, by the importation of cheaply produced Mexican crude, compel a large part of our domestic production to go into storage.

I do not join the cry of "damn the Standard," and never did. In many respects, especially of late years, they have dealt generously with their competitors, but they are not in business merely for their health. Altruism sounds fine around the banquet board, but they are a wise bunch and can not be blamed for exercising the power that circumstances and shrewd management have conferred.

And so when their smooth mouthpieces insist "the laws of supply and demand operate to the fullest extent" in the oil business and there is no arbitrary power to fix prices it is an offense to common intelligence.

There are other considerations.

A protective tariff is the determinate policy of the American people and of the administration in power and the petroleum business one of the greatest industries of the country, employing enormous capital and hundreds of thousands of workingmen, directly and in its subsidiary industries, heavily burdened by Federal, State, and local taxes, and now swamped by floods of Mexican oil, which give the importers absolute control of the price of the American product, appeal is now made to Congress for protection.

In any event the importers should contribute to the Government ratably as much as the Government exacts from the American producer in tax levies. The plea that the tariff would require the Government to pay more for the oil required by the Navy is pure bunk, because the duty would be paid to the Government and the real cost to the Government would be the price paid by the oil, less the duty.

The argument that 85 cents tariff would add appreciably to the cost of gasoline is unworthy of consideration. Mexican oil will not affect the price of gasoline. The Standard Oil Co. attends to that; fixing prices that bear no relation to the cost of the oil from which it is made, with arbitrary differences in the localities in which it is used, Mexican oil is the hammer used by these great importing concerns to depress the price of the American oil, from which 95 per cent of the gasoline is made, without relation to the price which users are required to pay for gasoline.

The plea that we should use Mexican oil and save our own oil for future generations shows great ignorance of the oil industry, and the philoprogenitiveness for "future generations" shows strange disregard for the present generation of American oil producers, since they apparently would be remitted to a diet of snowballs until the Mexican supply should be exhausted.

The Government has been hard put to find sources of revenue, and if the importations of Mexican oil should continue as large as they have been for the first half of this year, a tariff of 35 cents per barrel would yield a revenue of $53,925,900 annually.

Whether prices of gasoline are "controlled" and exact unreasonable profits from the public the investigations of the Senate committee may determine, but certain facts are apparent.

First. The American producer is obliged to store his production while the Mexican producer displaces him in our home markets.

Second. The importer of Mexican oil fixes the price the American producer is compelled to take for his product.

Third. The Mexican importations are largely surplus and not needed, serving to force American production into storage and to give the importer of this unneeded surplus arbitrary power to fix the prices of the American product.

Sincerely yours, WILLIS J. HULINGS.

THE MUSCLE SHOALS PROJECT.

Mr. HARRELD. I also ask unanimous consent to have printed in the RECORD a letter written by me to Mr. Gray Silver, of the American Farm Bureau, giving my reasons for opposing the Ford Muscle Shoals offer.

There being no objection, the letter was ordered printed in the RECORD, as follows:

JULY 27, 1922.

Mr. GRAY SILVER,
American Farm Bureau Federation,
Munsey Building, Washington, D. C.

DEAR MR. SILVER: I have your letter of July 18, as the Washington representative of the American Farm Bureau Federation, requesting a statement of my position concerning Muscle Shoals.

None of the various propositions before the committee were satisfactory to me, hence I did not vote for any of them. My position is that the Government must finish this dam under any proposition that has been made, at its own expense. It will require three years to do so and I feel that within that period we can make a much better contract than any of those proposed.

Ford's proposition in a nutshell is that if the Government will turn over to him all its property in the vicinity of Muscle Shoals, except the dams that are to be built, he will pay $5,000,000 for it. This includes the Government interest in the Warrior plant, for which we have a standing offer of $3,000,000. This would include a great deal of surplus material which, in my judgment, would more than cover the other $2,000,000 which Mr. Ford is paying, material for which he has no use, thus giving to him plant No. 1, plant No. 2, and the scores of residences and town property worth many millions of dollars, without any cost whatever to Mr. Ford.

For his 100 years' use of the two dams which the Government will build he proposes to pay 4 per cent on the amount invested in finishing the dams and what, in my judgment, is only a part of the actual cost of upkeep of the two dams. In fact, I think it will take all that he would pay to the Government in cash, under his contract, to keep up repairs on the two dams. So that he would practically get the power generated by these dams for 100 years by paying for the upkeep.

It is true that he agrees to use the capacity of plant No. 2 in the production of fertilizer, which he will sell for 8 per cent profit and will only charge for the power in making thereof the price equal to the cheapest power available. Virtually, then, he is getting this immense power generated by the two dams for an agreement on his part to keep plant No. 2 running in the making of fertilizer so long as he can make it and sell it in the market at 8 per cent profit, which may be 1 year or 5 years or 20 years. There are many States in the Union that will use more fertilizer than he proposes to manufacture under the terms of this contract. He would have absolutely free, under the terms of this contract, the entire power of the two Muscle Shoals dams, built at the expense of the Government, for 100 years for practically what it will cost to keep it up.

In my judgment this is an unconscionable contract so far as the people of the United States are concerned, and I can not favor it. I am not averse to leasing this power to Mr. Ford, but can not favor leasing it under such terms as these. Especially do I oppose the making of such a lease for 100 years.

You are at liberty to use this letter in any way you see fit.

Yours very truly,

J. W. HARRELD.

MIRIAM KINSEY STEWART.

Mr. McCUMBER. Mr. President, I ask unanimous consent to present and to have considered the resolution which I send to the desk.

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent for the presentation and immediate consideration of a resolution which the Secretary will read for the information of the Senate.

The reading clerk read the resolution (S. Res. 337), as follows:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, out of the miscellaneous items of the contingent fund of the Senate, to Miriam Kinsey Stewart, widow of William B. Stewart, late assistant clerk of the Committee on Finance, United States Senate, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

The PRESIDING OFFICER. Under the law, the resolution will have to be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. McCUMBER. Very well, Mr. President.

The PRESIDING OFFICER. The resolution is so referred.

LAWS RELATING TO THE NAVY AND MARINE CORPS.

The PRESIDING OFFICER (Mr. MOSES in the chair) laid before the Senate a communication from the Acting Secretary of the Navy, transmitting, in response to Senate Resolution 262, Sixty-third Congress, second session, agreed to March 30, 1914, a compilation, with complete index, of existing laws relating to the Navy, Navy Department, and Marine Corps, with annotations showing how such laws have been construed and applied by the Navy Department, the Comptroller of the Treasury, the Attorney General, or the courts, which was referred to the Committee on Naval Affairs.

EXECUTIVE SESSION.

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 35 minutes p. m.) the Senate, under the order previously made, took a recess until Monday, August 14, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by Senate August 12 (legislative day of August 3), 1922.

GOVERNOR OF THE VIRGIN ISLANDS.

Capt. Henry H. Hough, United States Navy, to be Governor of the Virgin Islands, ceded to the United States by Denmark.

POSTMASTERS.

ALABAMA.

William R. Bailey to be postmaster at Newbern, Ala. Office became presidential January 1, 1921.

ALASKA.

Wilkie T. Pinkerton to be postmaster at Fairbanks, Alaska, in place of T. H. Deal. Incumbent's commission expires September 5, 1922.

COLORADO.

Alma Geist to be postmaster at Caddoa, Colo. Office became presidential July 1, 1922.

James C. Wilson to be postmaster at Yampa, Colo. Office became presidential April 1, 1921.

Henry R. Pilati to be postmaster at Aguilar, Colo., in place of C. H. Reagan, resigned.

GEORGIA.

Eli Waughtel to be postmaster at Homeland, Ga. Office became presidential April 1, 1922.

James A. Griffin to be postmaster at Cordele, Ga., in place of A. L. McArthur. Incumbent's commission expired February 18, 1922.

Ralph H. Johnson to be postmaster at Ocilla, Ga., in place of F. D. Colson, removed.

Sadie G. Cromartie to be postmaster at Pavo, Ga., in place of T. E. Dixon, removed.

Charles W. Barnes to be postmaster at Valdosta, Ga., in place of J. O. Varnedoe, resigned.

ILLINOIS.

Fanny E. Roles to be postmaster at Fisher, Ill., in place of P. A. Hollingsworth, resigned.

INDIANA.

Lloyd S. Norton to be postmaster at Hope, Ind., in place of E. L. Lambert, deceased.

IOWA.

Carl G. Anderson to be postmaster at Arthur, Iowa. Office became presidential July 1, 1920.

KENTUCKY.

Edward M. Jolly to be postmaster at Mentor, Ky. Office became presidential July 1, 1922.

MARYLAND.

Elmer W. Sterling to be postmaster at Church Hill, Md. Office became presidential January 1, 1921.

MINNESOTA.

James P. Lund to be postmaster at Jasper, Minn., in place of B. L. Sweet, not commissioned.

MISSISSIPPI.

Mabel A. Terney to be postmaster at Northcarrollton, Miss. Office became presidential July 1, 1920.

Frank C. Napier to be postmaster at Seminary, Miss. Office became presidential January 1, 1920.

Will A. Berglund to be postmaster at Batesville, Miss., in place of R. B. Cox. Incumbent's commission expired April 30, 1922.

Melzar J. Nye to be postmaster at Carrollton, Miss., in place of Henrietta Welch. Incumbent's commission expired July 21, 1921.

Key R. Hodges to be postmaster at Wesson, Miss., in place of Sallie Temple. Incumbent's commission expired March 29, 1920.

NEW YORK.

Harry C. Teich to be postmaster at Leeds, N. Y. Office became presidential January 1, 1920.

George E. Hoare to be postmaster at Watkins, N. Y., in place of B. L. Piper, removed.

NORTH CAROLINA.

Frank C. Brinson to be postmaster at Bayboro, N. C. Office became presidential April 1, 1921.

Ella E. Meshaw to be postmaster at Council, N. C., in place of J. M. Meshaw, declined.

Fred H. Morris to be postmaster at Kernersville, N. C., in place of C. L. Linville, resigned.

OHIO.

Charles E. McClelland to be postmaster at Attica, Ohio, in place of W. F. Uhle, resigned.

OREGON.

Ora Mahoney to be postmaster at Oakland, Oreg., in place of H. E. Mahoney. Incumbent's commission expired July 21, 1921.

Charles S. Heinline to be postmaster at Roseburg, Oreg., in place of L. F. Reizenstein. Incumbent's commission expired January 24, 1922.

PENNSYLVANIA.

John F. Hawbaker to be postmaster at West Fairview, Pa. Office became presidential July 1, 1922.

SOUTH CAROLINA.

Peter A. Salvo to be postmaster at Ridgeville, S. C. Office became presidential October 1, 1920.

TEXAS.

Charles H. Branton to be postmaster at Tuscola, Tex. Office became presidential April 1, 1921.

Samuel G. Hampton to be postmaster at Goree, Tex., in place of Charles Johnston. Incumbent's commission expired January 24, 1922.

VIRGINIA.

Isabelle R. Damron to be postmaster at Clintwood, Va. Office became presidential July 1, 1920.

Elton H. Finks to be postmaster at Somerset, Va. Office became presidential April 1, 1920.

Nellie D. Swan to be postmaster at Gordonsville, Va., in place of J. T. L. Sneed, resigned.

William H. Moatz to be postmaster at Round Hill, Va., in place of S. A. Hersperger. Incumbent's commission expired July 10, 1920.

WASHINGTON.

Grover C. Schoonover to be postmaster at Odessa, Wash., in place of G. C. Schoonover. Incumbent's commission expired April 16, 1922.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 12 (legislative day of August 3), 1922.

COAST AND GEODETIC SURVEY.

Robert Winn Byrns to be aid, with relative rank of ensign, in the Navy.

COAST GUARD.

Charles G. Roemer to be lieutenant.

POSTMASTERS.

ALASKA.

Elizabeth D. De Armand, Sitka.

ARKANSAS.

William B. Owen, Alma.
Ocie E. Mathis, Hackett.
Jacob Y. Sayre, Stuttgart.

CALIFORNIA.

Raymond P. Hawkins, Allegheny.

CONNECTICUT.

Howard A. Middleton, Broad Brook.
Harry N. Prann, Centerbrook.
John E. O'Clare, North Grosvenor Dale.

ILLINOIS.

Louis R. Kelly, Duquoin.
Kelly A. Cardiff, Hoopeston.

IOWA.

Dell P. Glazier, Fort Madison.

NEW JERSEY.

Frederick R. Dixon, Bellemead.
Henry C. Straight, Morsemere.
Charles H. Updike, Trenton.

NEW YORK.

Francis E. San Jule, Hogansburg.
Cornelius J. Carey, Newman.
Samuel K. Seybolt, Pine Bush.
Alexander Hickey, St. Bonaventure.
William H. Young, Voorheesville.

RHODE ISLAND.

Hilda S. Murray, Centerville.

VERMONT.

Fred R. Lloyd, Fair Haven.
George H. Millis, Groton.
William C. White, Northfield.

WISCONSIN.

Edgar E. Parker, Beaver Dam.
Otto C. Nienas, Camp Douglas.
Frank G. Johnson, Dallas.
George A. Potter, Fort Atkinson.
William Kotvis, Hillsboro.
Lewis M. Smith, Jefferson.
Gilbert J. Grell, Johnson Creek.
Orris O. Smith, Pardeeville.
William Reuschlein, Plain.
Allen W. Wiggin, Plymouth.
Clytie Geiger, Rothschild.
Charles W. Pfeifer, Sheboygan Falls.
Alice M. Clinton, Sullivan.
Hilary L. Haessly, Theresa.

SENATE.

MONDAY, *August 14, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Borah	Hale	New	Smoot
Brandegee	Harreld	Nicholson	Stanfield
Bursum	Heflin	Norbeck	Stanley
Calder	Jones, Wash.	Oddie	Sterling
Cameron	Kellogg	Overman	Trammell
Capper	Kendrick	Pepper	Underwood
Cummins	Keyes	Phipps	Wadsworth
Curtis	Lenroot	Rawson	Walsh, Mont.
Dial	Lodge	Reed	Warren
Dillingham	McCormick	Robinson	Watson, Ga.
Ernst	McCumber	Sheppard	Watson, Ind.
Fletcher	McLean	Shortridge	
Frelinghuysen	McNary	Simmons	
Gooding	Myers	Smith	

Mr. UNDERWOOD. I wish to announce that the Senator from Nevada [Mr. PITTMAN] is absent on account of illness in his family.

Mr. CURTIS. I wish to announce the necessary absence of the Senator from Minnesota [Mr. NELSON] on account of a death in his family.

I also wish to announce that the Senator from Ohio [Mr. WILLIS] is absent owing to illness in his family.

The PRESIDENT pro tempore. Fifty-three Senators have answered to their names. There is a quorum present. The Secretary will report the next committee amendment.

The READING CLERK. Paragraph 1438, ivory tusks, manufactures of ivory, page 199, in lines 21 and 22, the committee propose to strike out "vulcanized or unvulcanized" and the comma.

The amendment was agreed to.

The next amendment of the committee was, on page 199, line 25, to strike out "30" and insert "50."

Mr. McCUMBER. The committee desire to modify that by striking out "50" and making it read "35." This is due to the change made in the rate on ivory tusks, and so forth, which were put on the free list.

The PRESIDENT pro tempore. The proposed amendment as modified will be stated.

The READING CLERK. The committee proposes to modify the amendment in line 25 by striking out "50" and inserting "35," so as to read:

manufactures of ivory or vegetable ivory, or of which either of these substances is the component material of chief value, not specially provided for; manufactures of mother-of-pearl, shell, plaster of Paris, and india rubber known as "hard rubber," or of which these substances or any of them is the component material of chief value, not specially provided for; and shells and pieces of shells engraved, cut, ornamented, or otherwise manufactured, 35 per cent ad valorem.

Mr. WADSWORTH. I desire to ask the Senator from North Dakota what is the present ad valorem rate?

Mr. McCUMBER. It is 35 per cent under the present law. We are leaving it the same.

Mr. SIMMONS. Mr. President, what is the paragraph under consideration?

Mr. McCUMBER. Paragraph 1438, page 199.

Mr. WADSWORTH. Is the committee persuaded that 35 per cent ad valorem covers the difference in labor cost?

Mr. McCUMBER. Taking into consideration importations which have been coming in and the present condition, the committee is satisfied that 35 per cent ad valorem is sufficient protection.

The PRESIDENT pro tempore. The question is on agreeing to the amendment as modified.

Mr. SIMMONS. Mr. President, there is so much confusion in the Chamber that I really do not know what has been offered by the committee.

Mr. McCUMBER. Let me state it again. The amendment is to strike out "50" in line 25, page 199, and insert in lieu thereof "35," which is the same rate as the present law.

Mr. SIMMONS. I make no objection.

The amendment as modified was agreed to.

The next amendment of the committee was, on page 200, line 4, before the words "per cent," to strike out "30" and insert "50," so as to make the paragraph read:

PAR. 1439. Electrical insulators and other articles, wholly or partly manufactured, composed wholly or in chief value of shellac, copal, or synthetic phenolic resin, not specially provided for, 50 per cent ad valorem.

Mr. McCUMBER. I ask on behalf of the committee that the Senate disagree to the committee amendment, leaving the rate at 30 per cent.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The PRESIDENT pro tempore. The next amendment will be stated.

The READING CLERK. On page 200, paragraph 1441, musical instruments and parts thereof, in line 11——

Mr. McCUMBER. Before we reach line 11, I move to strike out, in line 10, the words "music wire," and the comma.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 200, line 10, the committee propose to strike out the words "music wire" and the comma.

The amendment was agreed to.

The next amendment of the committee was, on page 200, line 11, to strike out the word "instruments" and the comma and insert the word "instruments."

The amendment was agreed to.

The next amendment was, on page 200, line 12, to strike out "35'" and insert "40," and, in line 13, to strike out "25" and insert "35," so as to read:

Musical instruments and parts thereof, not specially provided for, pianoforte or player actions and parts thereof, cases for musical instruments, pitch pipes, tuning forks, tuning hammers, and metronomes, strings for musical instruments composed wholly or in part of steel or other metal, all the foregoing, 40 per cent ad valorem; tuning pins, $1 per thousand and 35 per cent ad valorem.

The amendment was agreed to.

The next amendment of the committee was, on page 200, line 16, where the committee propose to strike out "35" and insert "40."

Mr. McCUMBER. In line 16 I desire to withdraw the committee amendment and also to strike out "$1.50 each and 35" and insert in lieu thereof "45," so that it will be a straight 45 per cent ad valorem rate, making the clause read:

violins, violas, violoncellos, and double basses, of all sizes, wholly or partly manufactured or assembled, 45 per cent ad valorem.

The PRESIDENT pro tempore. The question is on the committee amendment as modified.

Mr. REED. Just a moment, Mr. President.

Mr. SMITH. One moment. The amendment, as I understand, is to amend by striking out "$1.50" and making the rate 45 per cent ad valorem in place of 35 per cent?

Mr. McCUMBER. That is correct.

Mr. SMITH. That is all right.

Mr. REED. That is what I rose to inquire about.

The PRESIDENT pro tempore. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was, on page 200, paragraph 1441, line 17, before the words "per cent" to strike out the numeral "35" and in lieu thereof to insert "40," so as to read:

unassembled parts of the foregoing, 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 200, line 20, after the word "similar," to strike out "articles" and to insert "articles," so as to make the paragraph read:

PAR. 1442. Phonographs, gramophones, graphophones, and similar articles, and parts thereof, 30 per cent ad valorem.

Mr. McCUMBER. Mr. President, we are going a little more rapidly than I can look over my notes which I have here. On page 200, in line 20, after the word "thereof" and the comma, I move to insert the words "not specially provided for."

Mr. REED. Mr. President——

Mr. SIMMONS. Where does the insertion come in which the Senator from North Dakota has suggested?

Mr. McCUMBER. The amendment which I propose is on page 200, line 20, after the word "thereof," to insert the words "not specially provided for," so that the paragraph will read:

PAR. 1442. Phonographs, gramophones, graphophones, and similar articles, and parts thereof, not specially provided for, 30 per cent ad valorem.

Mr. SIMMONS. Does the committee propose an amendment in the rate in that paragraph?

Mr. McCUMBER. There is no change of rate proposed by the committee in that paragraph. We shall put in a special rate for the needles, and we are proposing to frame the amendment so that needles may bear a 45 per cent ad valorem rate.

Mr. SIMMONS. As I understand the Senator from North Dakota, he means that instead of a 25 per cent rate the rate will be 45 per cent.

Mr. McCUMBER. It is proposed to make the rate 45 per cent on needles and 30 per cent upon all the other articles.

Mr. REED. Mr. President, I have no objection at this point to the amendment which the Senator from North Dakota has suggested; I do not know that I fully understand its import; but what I wish to ask the Senator is why this enormous protective tariff upon phonographs? We know that some of the American manufacturers of phonographs are charging prices that are absolutely unconscionable. Why should they have any protection?

Mr. McCUMBER. Does the Senator think that 30 per cent ad valorem is unconscionable as a duty? Is that what I understand the Senator from Missouri to suggest?

Mr. REED. I think if it is put in as a protective tariff it is unconscionable; and I think that the prices charged by certain phonograph makers in the United States are absolutely unconscionable.

Mr. McCUMBER. I agree with the Senator from Missouri as to that.

Mr. REED. I think they are entitled to no protection. If this duty is proposed as a revenue duty only, that is a different proposition. I wish to get the Senator's view in regard to the matter.

Mr. McCUMBER. When the retail price for which phonographs and other similar instruments are sold in the United States is considered it is apparent that the price is unconscionable. It is also true that the imported articles are sold at an unconscionable price; otherwise the foreign producers would secure the market and these articles would go down in price; but I do not think the Senator will say that if the importers also receive an unconscionable price they ought to

complain if they are required to pay 30 per cent of their home manufacturing and selling price to the Government, which is only 5 per cent higher than the present law and 10 per cent lower than the Payne-Aldrich law.

Mr. SMITH. Mr. President, if the Senator from Missouri [Mr. REED] will allow, I desire to say that it seems to me, according to the statistics given us by the Tariff Commission, that the 25 per cent duty was prohibitive in view of the fact that the importations in 1914 amounted to about $147,000, and only reached $427,000 in the first nine months of the year 1921, and about $800,000 in 1920. On the other hand, the figures as to domestic production are very interesting. We are informed in the Summary of Tariff Information as follows:

Production in 1914 was valued at $27,115,916. The number of machines was 515,154, valued at $15,290,491; and records and blanks, 27,221,290, valued at $11,111,418. Parts of machines, materials, and supplies, not included in finished instruments, amounted to $356,935, and all other products to $357,072. In addition, phonographs, etc., valued at $66,531, were made in establishments engaged primarily in the manufacture of products other than those covered by this industry. Eighteen establishments made phonographs, graphophones, etc., with capital of $33,771,000 and 9,381 employees. In 1919 there were 167 establishments with value of products amounting to $158,668,000.

It seems that even under the 25 per cent duty there was only negligible importations, amounting in the year of largest importations to less than $1,000,000, against a domestic production of $158,668,000.

Mr. McCUMBER. There is one manufacturing country that was not in the market at all during the years of which the Senator from South Carolina speaks; but if he will compare the pre-war with the present importations he will find that there has been an increase of more than fourfold; that the increase has been from something over $100,000 to something somewhere about $600,000.

Let me say, in addition, that the only graphophones and phonograps, I think, that are imported are the smaller kind, without cabinets, but designed to be placed upon stands. There is a considerable number of such machines imported, and I think they are sold for prices which would justify 30 per cent duty upon them. I do not think they interfere at all with the prices charged for the domestic product in the United States; so that it is not so much a matter of protection, because the comparable imported and domestic article both sell for about the same price, as it is obtaining revenue.

Mr. SMITH. Mr. President, I should like to call the Senator's attention to the fact that in volume we exported nearly three times what we imported.

Mr. McCUMBER. I know; but we export one class and import entirely a different class. We export the very expensive, high-priced machines, in the manufacture of which we have no competition, and we import the lower-priced ones, which are, nevertheless, considering the cost of production, sold for a pretty fair price in this country.

Mr. SMITH. Mr. President, taking the Senator's own statement, I think it will not be denied that the smaller machines which are used by the poorer folks constitute about the best means in the world of educating them to first-class music and acquainting them with our singers, and to impose a duty of 30 per cent, when the 25 per cent duty was, according to the statistics, almost prohibitory, would seem, if we are going to approach the question from the standpoint of revenue, as the Senator indicates, to be an imposition that would be protective rather than calculated to increase the revenue by the increased volume that would come in.

Mr. McCUMBER. Does the Senator think that 25 per cent would be too much? That is the present law.

Mr. SIMMONS. Mr. President, I wish to ask the Senator a question. Did the manufacturers of these instruments ask for this increase of duty?

Mr. McCUMBER. I do not remember whether the manufacturers asked for it or not. I do not think, however, there were many things on which the manufacturers did not ask for an increase of duty; but in revising the paragraph this morning we revised it according to conditions as they appear to us to-day in the light of imports and prices.

Mr. SIMMONS. I will agree with the Senator that this would seem to be an article upon which it might be entirely proper to levy a revenue tariff. The only question to my mind is whether the duty is being levied at a revenue-producing rate or is being levied at a prohibitive and a protective rate.

It seems to be the fact that in 1919 we produced in this country about $158,000,000 worth of these articles. The imports were only a few hundred thousand dollars' worth, so that the 25 per cent duty imposed under the Underwood tariff was so high that it did not produce any revenue worth mentioning. For nine months of 1921 the imports were $427,552 and the duty collected $106,888. So the 25 per cent duty only brought us in about $100,000 in revenue as against a domestic production of nearly $160,000,000. That would indicate to my mind that the 25 per cent rate is too high for revenue purposes; that it is almost prohibitive; and if the proposed duty is for the purpose of revenue it seems to me the Senate ought to reduce the rate instead of increasing the rate, because I think the tremendous domestic production and the merely nominal importations would suggest, if we want revenue, the way to get it is to reduce the rate.

Mr. McCUMBER. Mr. President, let me call the Senator's attention to the fact that the revenue in 1921 was $157,000 and that is worth looking after. Taking into consideration the class of the articles which are imported—and they are not the high-priced ones—and what they are used for, I do not think that we need to worry lest the same number practically will not be sold under the higher rate, and the foreigner can afford to absorb the 5 per cent in addition to the rate under the present law and still sell his goods at the price for which he is now selling them.

Mr. SIMMONS. Mr. President, that may be so. The foreigner might possibly bring in about the same amount that he is bringing now if the duty imposed is raised to 30 per cent, only 5 per cent more; but if this duty is solely for revenue purposes the rate ought to be laid for the purpose of encouraging instead of for the purpose of discouraging importations. I imagine, however, that if the Senator will have the matter looked into he will find that this increase in rate was asked by the manufacturers, and that it was asked for the purpose of curtailing importations and reducing revenue instead of increasing it.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

Mr. REED. May the amendment be stated?

The PRESIDENT pro tempore. The Chair desires to make a statement.

The present occupant of the chair was not present at the time the unanimous-consent agreement of Saturday was entered into, but the Chair is advised that it is the understanding that the last unanimous-consent agreement was simply a supplement to the former unanimous-consent agreement. If that be true, the debate must proceed upon the immediate question before the Senate, and debate upon amendments would be limited to 15 minutes, and upon the bill to 30 minutes.

The Chair is moved to make that remark because the debate that has been proceeding upon this amendment has not been upon the question; but it is somewhat difficult to construe these many unanimous-consent agreements.

The Senator from Missouri is recognized.

Mr. REED. I simply asked to have the particular amendment now about to be voted on stated.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 200, line 20, after the word "thereof" and the comma, it is proposed to insert "not specially provided for."

The amendment was agreed to.

Mr. McCUMBER. Mr. President, on page 200, line 21, after "ad valorem," I move to insert a semicolon and the following:

Needles for phonographs, graphophones, gramophones, and similar articles, 45 per cent ad valorem.

Mr. REED. What change will that make?

Mr. McCUMBER. They would now come in at 30 per cent unless we put that in. It increases the duty 15 per cent ad valorem.

Mr. REED. Why are you asking for that increase?

Mr. McCUMBER. We are asking for it because the last evidence we had before us indicated the necessity of about that much duty for protection.

Mr. REED. The last evidence you had came from the manufacturers of the needles, did it not?

Mr. McCUMBER. No; it came from importations and prices.

Mr. REED. How much are we importing of the needles? I do not find them stated separately here in the schedule. Can the Senator advise us?

Mr. McCUMBER. They are imported with others, so that we can not tell just what the importations are; but we do know that importations are coming in, I think, at about 11 cents per thousand now, and the American cost, if I remember correctly, was something over 19 cents per thousand.

Mr. REED. Are they made by the same people who make the phonographs?

Mr. McCUMBER. No.

Mr. REED. They are made by outside people?

Mr. McCUMBER. Yes. Some of the people who make phonographs may make them, but I do not know of any.

Mr. REED. To what extent are we exporting them?

Mr. McCUMBER. The needles?

Mr. REED. Yes.

Mr. McCUMBER. I do not think we have any statistics of any exports at all, but I assume that undoubtedly where we sell the higher priced phonographs, such as the Victrola, and so forth, we sell to the same people the needles that go with them.

Mr. SMITH. Mr. President, the Senator has offered an amendment providing for a duty of 45 per cent ad valorem on these needles. Everyone acquainted with these instruments knows that these needle points represent possibly the cheapest form of manufacture in all the steel business. I presume that everyone acquainted with the manufacture of nails or any of the simple forms of steel will realize that these needles are almost equivalent to a by-product, and yet we have here a duty of 45 per cent added to the value of these little steel points.

Mr. McLEAN. Mr. President, is the Senator from South Carolina familiar with the way in which these needles are manufactured?

Mr. SMITH. No; but I am somewhat familiar with the way in which nails are manufactured, the dies by which they are manufactured. It is true that these needles have to be made out of extraordinarily hard steel, but anyone who looks at a needle point knows that there could not possibly be a cheaper form of manufacture than that in all the steel business.

Mr. McLEAN. They are hand ground, and they have to go through a dozen or 15 processes. They ought to bear almost as high a rate as the latch needles, to which we give $1 a thousand. The manufacturers wanted four times the duty that we have given them.

Mr. SMITH. Mr. President, of course anyone familiar with graphophones knows that you can take a match stem and trim the end of it and get a pretty fair rendition of a record; and this story that has gone out to the effect that you can only use a needle one time of course is simply in the interest of selling the needles. So far as bringing out the full tone of the instrument is concerned, I presume that to a certain degree the finer the point the better it would be; but anyone familiar with them knows that you can use the same needle more times than once—half a dozen or a dozen times—without detriment to the disk and without any appreciable diminution in the volume or the clarity of the sound. There is no reason why these people should come here with the story that it is necessary to go through with all of this hand grinding in order to produce an available needle for these instruments.

Mr. McLEAN. Mr. President, I can only repeat what I said before, that these needles are hand ground, and they go through many processes, and they are being imported at about 11 cents a thousand, and our cost is about 20 cents. The rate we have given is very low. If you want to protect the American industry, this is a very reasonable rate.

Mr. SMITH. Mr. President, I want to state here and now that while I am not familiar with the process by which these needles are made, I venture the assertion that it is practically impossible, humanly speaking, to hand grind these needles. If I understand what the Senator means by hand grinding—grinding the points down to the finish that they have—it would be practically impossible for them to be sold at all if that were done. No matter what instrument you might have with which to hold the little particle of steel it would mean that your hand would have to manipulate every needle put on the market, and it would make the price prohibitive. I will guarantee the assertion that it will be found upon investigation that these needles are machinemade just as nails are.

Everyone familiar with our modern phonographs and graphophones, and the needles that are used for the purpose of producing the sound, knows that they come in by the million. It is preposterous to think that each one of them is hand manipulated; and this 45 per cent additional duty simply imposes a burden upon those who are going to use the machines. I will guarantee the assertion that if this duty is imposed there will be as much profit in the manufacture of the needles as there will be in the production of the machines.

Mr. LODGE. Mr. President, those needles are not made by the phonograph people. They are made by manufacturers of steel products. They have to be made of very hard steel, and very finely made and finished. The valuation investigation report gives foreign prices of 11 different types of sewing and embroidery machine needles and crochet needles. The average foreign price for these 11 different classes and kinds of needles is $1.80 per 1,000 in Germany. There has been given in the tariff bill a duty on such articles of $1.15 per 1,000, plus 50 per cent ad valorem. The talking-machine needle which comes into contact with the American product is the medium-grade needle. These are imported in quantities from Germany, and their selling price abroad is 11½ cents per 1,000. The duty of $1.15 given to these similar needles in paragraph 343 is 64 per cent on the average foreign value of $1.80, as already stated. This same ad valorem in terms of specific duty would give, on the value of 11½ cents, the foreign price of our competitive article in Germany, a specific duty of 7.3 cents. The manufacturers asked for a much higher duty than is given to them. The average production cost of these phonograph needles in the United States is 19 cents per 1,000, and that is exclusive of advertising, selling expense, and factory profit. These three elements add 6 cents to the factory cost of needles per 1,000, making the lowest possible average selling price of the domestic article 25 cents per 1,000.

It is impossible, in my judgment, for the manufacturers of these needles to proceed with the manufacture here unless at least this moderate duty is given. I think myself it is a very moderate duty.

Mr. SMITH. Mr. President, before the vote is taken——

Mr. LODGE. How many times can the Senator talk?

Mr. SMITH. I can use 15 minutes. I have not yet used up 15 minutes.

The Senator from North Dakota has just said that the duty on the importation of these instruments was largely for revenue; that we had no competition on the higher priced, finer instruments.

Mr. LODGE. Mr. President, we have a very great competition in these needles. They are made by the manufacturers of steel products. They are not a phonograph specialty.

Mr. SMITH. Precisely. Now the Senator comes in with a duty to protect the manufacturers of steel at the expense of those who make and sell the phonographs. In other words, this is an indirect method of increasing the profits of the poor, struggling Steel Trust—45 per cent on an article that is used with a particular instrument upon which the Senator from North Dakota says there is practically no competition in the higher grades, and simply a revenue duty in the lower grades, the cheaper types of phonograph.

Mr. President, if the Senate wants to go on record as voting for a higher duty on an article produced by the steel manufacturers of this country, as a matter of course I should like to have the yeas and nays on that question.

Mr. LODGE. It has nothing on earth to do with the Steel Trust. They are made by separate concerns, in different parts of the country, which make small steel products. It has nothing to do with the Steel Trust whatever. They are made of steel, of course. So is a rail on a railroad.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from North Dakota?

Mr. SMITH. I yield.

Mr. McCUMBER. I simply want to say to the Senator that we put the ordinary sewing needles on the free list. They are on the free list because we have found that we can not make them in this country at all without imposing a duty of at least a hundred per cent on them. The process of making these needles is not quite so complicated as that followed in making sewing needles, but it is very much more complicated than that used in merely making steel pegs.

Mr. SMITH. Mr. President, I do not care to go into this question any further than to say that in all conscience it has been shown that the 30 per cent duty on the machine and all of its parts, as indicated by the statistics furnished us by those who have been employed to gather them, approximates an embargo. We not only increase the duty from 25 per cent to 30 per cent but on that simple part, which is produced by the steel people, we propose a duty of 45 per cent. I do not know whether I would be permitted to offer an amendment now or not.

Mr. SIMMONS. The Senator can offer an amendment to the committee amendment.

Mr. SMITH. Both for the amendment proposed of 45 per cent ad valorem on needles and the 30 per cent ad valorem on the parts other than needles I offer as a substitute amendment to fix the rate at 20 per cent.

Mr. McCUMBER. We have already voted upon the 30 per cent. Those were separate amendments. The question now is simply upon 45 per cent ad valorem on the needles.

Mr. SMITH. I think the record will show that we simply voted upon the language "not otherwise provided for" the Senator incorporated just after the words "parts thereof." We did not vote upon accepting the 30 per cent rate.

Mr. McCUMBER. There was no amendment to the 30 per cent rate.

Mr. SMITH. No; but I propose to offer an amendment now to the 30 per cent rate, for we have not accepted the paragraph.

Mr. McCUMBER. That is not a committee amendment.

Mr. LODGE. It is not a committee amendment, and is not in order.

Mr. SMITH. Amendments from the floor can not be offered at this time to the House text?

Mr. LODGE. An individual amendment can not be offered at this stage.

Mr. SMITH. Until we get into the Senate?

Mr. LODGE. Until we have disposed of the committee amendments. Then it will be in order.

Mr. SMITH. I have not examined the unanimous-consent agreement as to that. I thought perhaps we were now also going over the bill for individual amendments.

Mr. LODGE. Not yet.

Mr. REED. I think it is so arranged that there never will be an opportunity for individual amendments.

Mr. LODGE. Those are provided for in the agreement.

Mr. REED. What I mean is, that I think we are going to take all the time under the unanimous-consent agreement on the amendment of the committee.

Mr. LODGE. No; individual amendments are included in the agreement. There are two days given for individual amendments. The Senator's second amendment, to an amendment pending, is now in order.

Mr. SMITH. I do not care to offer an amendment to that amendment. I want the 45 per cent amendment voted down.

Mr. LODGE. That is now before the Senate.

Mr. SMITH. I do not propose to amend that by offering a smaller rate.

Mr. LODGE. The other amendment the Senator does propose to offer I think will have to be reserved.

Mr. SMITH. I believe I will move to substitute 20 per cent for 45 per cent, because if the amendment to make the rate 20 per cent prevails, when we get to individual amendments we would have 20 per cent as the rate. Therefore, Mr. President, in place of the "45 per cent," I move to insert "20 per cent."

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from South Carolina to the amendment of the committee.

The READING CLERK. In lieu of the amendment offered by the Senator from North Dakota the Senator from South Carolina moves to strike out 45 per cent and to insert in lieu thereof 20 per cent.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment proposed by the Senator from North Dakota.

Mr. SIMMONS. I understand the Senator does not propose to change the 30 per cent rate as it now appears in the bill, but only the 45 per cent rate. Am I correct about that?

Mr. McCUMBER. It is proposed to make the rate on the needles 45 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, we were going so rapidly that I omitted one amendment. On page 200, after line 18, I move to insert a paragraph to be known as paragraph 1441a, as follows:

PAR. 1441a. Oil cake and oil-cake meal, one-half of 1 cent per pound.

Mr. REED rose.

Mr. SIMMONS. In view of the fact that this is a new paragraph, will not the Senator from North Dakota make some statement to the Senate with reference to it?

Mr. GOODING. Mr. President, possibly I can make a short statement which will throw some light on it.

The PRESIDENT pro tempore. Does the Senator from Missouri yield; and if so, to whom?

Mr. REED. I rose merely to make an inquiry, but I have the information before me. So I do not desire to take the floor at this moment.

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Idaho?

Mr. SIMMONS. As this is an entirely new paragraph, the subject not having been treated in the bill at all, I simply rose to ask the chairman of the committee to make some statement to the Senate with reference to the reason for imposing a duty upon this particular article.

Mr. McCUMBER. The Senator from Idaho [Mr. GOODING], I think, can give the Senator the information, because it was upon his request that the duty was fixed, when a hearing was given the Senator, at the time the committee was holding hearings.

The PRESIDENT pro tempore. The Senator from Idaho is recognized.

Mr. GOODING. Mr. President, there is a very large importation of oil cake and oil-cake meal from the Orient. Oil cake made from soya beans and copra has a very large displacement value and destroys to a considerable extent the protection placed on the other farm products used for feedstuffs for animals in this country. The purpose of the amendment, the new paragraph to be inserted, is to give that protection. It means a good deal to the cottonseed growers of the South and the producers of cottonseed cake, cottonseed meal, peanut meal, and peanut-oil cake. It seems to me the duty is very light, and there should not be any opposition to it at all. If we are going to give protection to the agricultural interests, this particular industry should not be destroyed by admitting free of duty some by-product which in a measure would practically destroy part of the protection given to agriculture.

Mr. REED. Mr. President, I would like to ask the Senator what the rate of duty on oil cake and oil-cake meal is now?

Mr. McCUMBER. It is now admitted free of duty.

Mr. REED. How much of it has been imported?

Mr. GOODING. Of this southern cake?

Mr. REED. Any kind of oil cake.

Mr. GOODING. There is quite a large amount imported.

Mr. REED. How much?

Mr. GOODING. I am not able to give the Senator the figures. I was not aware that this schedule was coming up at this time until a few minutes ago.

Mr. McCUMBER. I can give the importations in figures. It is about $4,000,000 worth in value.

Mr. REED. What proportion is that of the entire consumption? I have not the figures before me.

Mr. McCUMBER. It is only a small proportion; but I want to say that about 60 per cent of it comes in from the Philippines, anyway, and that would be free.

Mr. REED. So that only a small amount has been coming in?

Mr. GOODING. There is a large amount of soya-bean cake and soya-bean meal coming in, which displaces the cottonseed cake and the cottonseed meal in this country, or reduces the price of them materially.

Mr. REED. I wanted to ask the Senator a further question. What uses are made of these meals, principally?

Mr. GOODING. It is used in the West in the wintertime by cattle growers and sheep growers. It is used in the East by the dairy people very largely to mix with their other feedstuffs. We are not lacking in that in this country. We grow a surplus of feed products for animals in this country, and we do not need that cheap stuff from the Orient. It has a disastrous effect in forcing down the price of farm products in this country.

Mr. REED. It has a disastrous effect in forcing down the price of these oil meals which are used by all the farmers and feeders of the United States. So you propose to raise the price to benefit the farmer, and you are going to do that for the benefit of the few men who produce the meals.

Mr. GOODING. That is not the point at all. The farmer is interested in bringing about in this country a balanced condition upon the farms, and when you import soya-bean cake or meal or any other by-product that comes from copra or anything else you are injuring the farmer. The farmer has protection under this bill on his butter; he has protection on practically everything else, and he is willing to concede protection to the corn grower and to every other farmer, which he must do if he is willing to be fair at all.

Mr. REED. By what authority does the Senator undertake to speak for all the farmers of the United States?

Mr. GOODING. I believe practically all the farmers, through the farm organizations, have gone on record asking for a duty on these articles.

Mr. REED. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Brandegee	Edge	Kendrick	Oddie
Broussard	Ernst	Keyes	Overman
Calder	Fletcher	Lodge	Pepper
Cameron	Frelinghuysen	McCumber	Phipps
Capper	Gooding	McKellar	Pomerene
Culberson	Hale	McLean	Ransdell
Cummins	Harreld	McNary	Rawson
Curtis	Heflin	Moses	Reed
Dial	Jones, Wash.	New	Robinson
Dillingham	Kellogg	Nicholson	Sheppard

Shortridge	Stanfield	Underwood	Watson, Ga.
Simmons	Stanley	Wadsworth	
Smith	Sterling	Walsh, Mont.	
Smoot	Sutherland	Warren	

The PRESIDENT pro tempore. Fifty-three Senators have answered to their names. There is a quorum present.

Mr. REED. Mr. President, I wish to take just a moment on the pending item. It is proposed to be put in here among musical instruments. It proposes a duty on oil cake and oil-cake meal of 50 cents per 100 pounds. It is admitted by the proponents of the amendment that the article has been imported but slightly, although it is on the free list. The competition so far can have no general effect on the market except a regulatory effect. It is admitted that the product is used extensively for feeding purposes by the farmers and feeders and dairymen of the United States. It is proposed to put a tariff on an article which is used on a great percentage of the farms of the United States, to tax the farmer upon that which he feeds to his stock, and this is proposed by a champion of the farmer.

Now, oil meal is a by-product of the manufacture of oil. It is something which is produced by the manufacturer. The tariff will enable the manufacturer to boost the price upon a product which is a by-product of that which he produces, and the boosted or increased price will be paid by the farmers, feeders, and dairymen of the United States.

The Senator from Idaho [Mr. GOODING] states that this tariff is demanded by the farmers of the United States. I should like to know when the Senator or any other Senator acquired the right to declare himself the voice of 45,000,000 farmers in the United States. Plainly, so plainly that any man can understand it, a tariff upon food products which must be used by the farmers is a tariff levied upon the farmer. It is no excuse to say that there has been put in the bill an alleged or pretended protection upon the farmer, and hence, having protected him, it is now proposed to tax him. That is simply going around in a circle, putting on a tariff which it is alleged will benefit him and which most men who have studied these questions know will not benefit him, and then in turn putting on a tariff which is certain to benefit the manufacturer, and is just as certain to levy a tribute and tax upon the farmer, the feeder, and the dairyman.

Mr. President, I ask for the yeas and nays on this question.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. The Senator from Idaho.

Mr. REED. Mr. President, I wish to inquire whether we are working under the rule that a Senator may speak only once or whether we are working under the rule that a Senator may speak twice. I have no desire to take the Senator from Idaho off his feet.

The PRESIDENT pro tempore. We are working under the rule which permits any Senator to speak twice on the same question on the same day, but not to speak in the aggregate on an amendment more than 15 minutes.

Mr. REED. Very well.

Mr. GOODING. Mr. President, the small farmers of America, and I might say some of the larger farmers, especially the cotton growers of the South and the peanut growers of the South and the flax growers of the Northwest, are vitally interested in this protection; the small farmer because he is interested in bringing about possibly, if it is possible, a balanced condition upon the farm.

It must be admitted that this is a farm product and is used for feeding animals, and that it has a value for that purpose. While the importations at the present time are small, that is simply because corn is cheap, oats are cheap, and all foodstuffs that go to make up rations for live stock have been very low in the last two years. It is during such times that importations are light. But as a feeder of soy-bean cake and of all these other meals and cakes out on the range, which I have been discussing, I know that whenever corn is high, whenever farm products are high at all, there is great importation of the particular kind of oil cake which we have been discussing, which comes from the Orient, where the cost of production is practically nothing at all as compared with what it is in America.

Mr. REED. Mr. President, may I ask in what year there was a large importation, and how large it was?

Mr. GOODING. I can not give the Senator the year, because I have not the figures at hand, but I know, as far as the West is concerned, that whenever farm products are high and corn is high the importation is quite large. The point I want to make is that it is of vital interest to the farmer; that there are 40,000,000 acres of land in this country of overproduction, 40,000,000 acres of farm products more than we consume in this country, which must find a market in foreign countries. It is estimated that the increased consumption is equal to 2,000,000 acres of farm products each year. If we can grow all the wool we consume or need in this country, and all the sugar we consume, and all the other farm products we consume, we can finally bring about a balanced condition upon the farm and it will not be necessary to hunt a market in foreign countries for 40,000,000 acres of farm products.

Nothing but a Democratic free-trade policy has brought about that condition. If we had gone along in an intelligent way and given agricultural products the same protection that has been given manufacturers, it would not be necessary to find a market in foreign countries for millions of bushels of wheat and many other farm products. That is why the farmers of this country are asking protection for all the farm products in the hope that it will bring about a balanced condition on the farm, in the South and in the West as well as in the North and in the East.

Mr. REED. "A balanced condition!" How often we find somebody getting a phrase and rolling it under his tongue. I have heard about "balanced conditions." Now I know what balanced conditions are. The Senator from Idaho has just defined them. A balanced condition is a condition where we have exactly the right number of people in the United States to consume everything we produce. We are to ship nothing abroad. We are to raise exactly the number of bushels of corn that we use in the United States.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Idaho?

Mr. REED. In a moment. We are to raise exactly the number of bushels of wheat that we are to use in the United States. If we put a tariff on, we are to understand that immediately there will spring into existence enough mouths to eat exactly what we are now producing. Put a tariff on farm products and have a home market, then immediately we will eat up everything we have on the farm and we will ship nothing abroad hereafter. That is what we mean by a balanced condition. That is the argument the Senator produces. We will not trade with anybody. We will buy nothing abroad.

Mr. GOODING. Mr. President, will the Senator yield?

Mr. REED. We will ship nothing abroad. We will be balanced. We will be in a state of perfect equilibrium, and every year we will produce just what we want. The minute we pass the tariff bill we will have that balanced condition and enough mouths will come into existence to eat exactly what we produce. Did the Senator from Idaho want to ask me a question?

Mr. GOODING. I wanted to say to the Senator that I have not discussed any question of trading abroad. I remind the Senator that we buy almost a billion dollars' worth of products abroad that we do not produce in this country, and they are on the free list. Sixty per cent of the commodities shipped into America under this bill are on the free list. So we will be able to trade abroad. The point I want to make to the Senator is——

Mr. REED. I have not much time to yield.

Mr. GOODING. Very well.

Mr. REED. The point is that the Senator said if we had a tariff on farm products we could quit shipping abroad. Now, if we are not going to ship farm products abroad, what are we going to ship abroad?

The vice, not to use a harsher term, of this logic is illustrated in the pending amendment. The Senator from Idaho tells us that we have put a tariff on flaxseed and a tariff upon beans and a tariff upon peanuts, therefore we ought to put a tariff upon the by-products of the manufactured article; that the farmer has to use that meal, but he can afford to pay the tax because we have protected him upon his beans.

Now, I will tell Senators whom this proposed law will benefit and the only person it will benefit. It will benefit the Linseed-Oil Trust and whatever other concerns are engaged in manufacturing the commodity. This is a manufacturer's protection which is levied directly upon the farmer. If the farmer's flaxseed and his beans and his peanuts are protected from competition abroad, the farmer takes those articles down to the mill and sells them for what the combination will pay him; then if a tax be levied which enables the combination to take its product and sell it back to the farmer without the farmer having a chance to buy in a competitive market from abroad, we are simply taxing the farmer on the by-products of the mills for the benefit of these combinations. There is all there is in this.

I am getting a little weary of these performances in the name of the farm bloc and in the name of the farmer, when one can see the ugly and scaly head of a trust sticking up every time he kicks aside the dust. I am getting a little weary also of Senators rising on this floor and saying they "represent the farmer." I think some of them represent wool a great deal more than they represent the agricultural farmer. By "the

agricultural farmer" I mean the man who raises ordinary farm products. I challenge the right of the Senator from Idaho to speak for the farmers of my State. I do not arrogate that right to myself, yet I have tried to keep in close touch with the farming interests of the great State of Missouri, where we raise more agricultural products in one county, I believe, than are raised in the Senator's entire State.

Now, if it is desired to tax the farmer on his stock feed, go ahead and do it, but do not let us do it under the false pretense that we are protecting the farmer; let us do it in the open. In this proposed legislation we are protecting the by-products of the manufacturers. Whether or not the linseed-oil mills are a trust to-day I do not know, but a few years ago it was alleged that they were in a combination and trust.

Mr. FLETCHER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Florida?

Mr. REED. I yield.

Mr. FLETCHER. If the Senator will yield for a moment, I desire to suggest in this connection that cottonseed meal is very largely used as a fertilizer. We desire cheap fertilizer on the farms. As to the cottonseed meal which is used as a fertilizer, it is to the interest of the farmer that it may be obtained as cheaply as possible.

The PRESIDENT pro tempore. The Senator from Missouri has asked for the yeas and nays on the amendment. Is the demand for the yeas and nays seconded?

The yeas and nays were ordered.

Mr. WADSWORTH. Mr. President, the amendment which has been proposed on behalf of the committee, but which evidently has for its principal defender the Senator from Idaho [Mr. GOODING], is one which I think should not be put into this bill or into any tariff measure. It would be the same thing as putting 10 cents into a man's right-hand pocket and at the same time taking 15 cents out of his left-hand pocket, so far as the American farmer is concerned. Oil cake and oil meal are, as everyone knows, used almost universally all over the United States in the feeding of live stock. They are used in New England in the dairy establishments; they are used in all the Middle Atlantic States and in the Central Western States; they are used in the far Southwest upon the cattle ranches, where I personally have seen scores and scores of thousands of tons of cottonseed meal and oil cake fed in order to save cattle even from starvation upon occasion. They are used throughout the entire Rocky Mountain region. To impose a duty upon the importation of such articles, when our importations only total $4,000,000 worth a year, as compared with a production of $200,000,000 a year and an exportation from this country of $18,000,000 per year, seems to me would be an idle and futile thing, and one calculated merely to increase, generally speaking, the cost of running a farm with live stock on it.

Mr. KENDRICK. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Wyoming?

Mr. WADSWORTH. I yield.

Mr. KENDRICK. The Senator from New York has practically answered the question which I was about to ask, namely, as to how our imports of this article compared to the domestic production in volume?

Mr. WADSWORTH. We export more than four times as much as we import and use at home, and import about 2 per cent of our consumption. Cottonseed meal and oil cake are exceedingly important elements in the feeding of live stock. I do not know in which order they would stand as to relative expense on an ordinary farm, on a dairy farm, or on a ranch; but I know that they are one of the principal elements of expense. The dairyman who is compelled to buy stock feed buys an immense proportion of meal cake and oil meal. Sometimes it is mixed with other patent feeds; and I dare say it stands third or fourth in his expense account for the year. I know that in the cow country, on the great ranches of the Southwest, and in the Rocky Mountain regions, the annual bill for cottonseed cake and cottonseed meal is the third, if not the second, item of expense, labor alone being larger. To raise the price of those commodities merely means the raising of the price of the agricultural product in the finished form, with no benefit to the man who produces it. I therefore hope that the proposed amendment will not prevail.

Mr. GOODING. Mr. President——

Mr. McCUMBER. Will the Senator allow me to ask him a question?

The PRESIDING OFFICER. Does the Senator from New York yield; and if so, to whom?

Mr. WADSWORTH. I yield to the Senator from North Dakota.

Mr. McCUMBER. I desire to ask the Senator, in view of the present low price of corn, at least, why it is that the dairymen and the stock feeders wish to buy oil cake in preference to corn?

Mr. WADSWORTH. The oil cake and the oil meal are a much more concentrated feed, and the freight on them is much less when they are transported for great distances. The dairyman in the Connecticut Valley in the State of Connecticut can not afford the freight rates on shelled corn from Iowa, but he can afford the freight rates on the patent stock feed, containing cottonseed cake or cottonseed oil. It is the same way in the far Western States, where the great ranches are situated. If one is running a ranch in Arizona or in New Mexico he can not pay the freight rates on corn from Iowa, but he can afford to pay freight rates on a concentrated feed like cottonseed cake or cottonseed meal. Those articles are also much easier to keep; they may be stored for a long period, especially the cake. They may be stored almost indefinitely, and they are exceedingly easy to handle.

Mr. McCUMBER. Mr. President, I think we can get at the real meat of the coconut here. It is this: If we import this product, it will be cheaper to the feeders of cattle than American corn. That is practically all there is to it. It is a question of displacement. If the feeders and the dairymen could secure the corn cheaper than they could obtain this product as a feed, they would buy the corn; but if they can get this imported product at such a price that it will cost them less in a year's time for feeding purposes, then they will buy it. So, after all, it simply becomes a question of displacement.

Mr. REED. Mr. President——

Mr. McCUMBER. And I think the Senator from Idaho was correct when he stated that about all there is to the question is whether domestic corn or importations of the other product shall be used.

Mr. GOODING. Mr. President——

Mr. LODGE. Mr. President, may I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from North Dakota yield; and if so, to whom?

Mr. McCUMBER. I yield first to the Senator from Massachusetts.

Mr. LODGE. Our farmers are now using oil cake and consume something like $200,000,000 worth of it, while we import at the present time only about $4,000,000 worth of it.

Mr. McCUMBER. They are using some and the amount that they consume may have some effect, although I do not think it will have any wonderful effect upon the price of corn.

Mr. LODGE. Are we not great producers of oil cake and oil meal?

Mr. McCUMBER. Oh, yes; there is no question about that; but if we import so much more it will add that much to the surplus and it will drive down the price of the oil cake undoubtedly to some extent, and the result will be, especially if we have a short corn crop and the price of corn goes high, then the price of corn will be brought down to some extent by the increased use of this imported product.

Mr. REED and Mr. GOODING addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from North Dakota yield; and if so, to whom?

Mr. McCUMBER. I yield first to the Senator from Missouri.

Mr. REED. Mr. President, I wish to ask the Senator if he does not know that this is a question of mixing feed, and that great benefit comes from mixing corn, oats, hay, and other feeds which cattle eat with a percentage of oil meal, and that it is a highly beneficial food when thus mixed and increases the net production of cattle, taking into consideration the total amount of the expense of feeding? Of course, that is true.

Mr. McCUMBER. I fully realize that, but my only point is this: If you fill a steer's stomach full of corn, you are not going to buy the other product, but if you fill the steer's stomach full of the other product, you are not going to buy corn. That is practically all there is to it.

Mr. REED. But if the mixture is better than either one by itself, is the Senator willing to deny to the stock feeders of the country and the farmers of the country and the dairymen of the country an improved feed, a better feed, in order that the Senator may sell a little Dakota corn or I may sell a little Missouri corn, not to make it personal at all?

Mr. McCUMBER. By any sort of a tariff for protection or even for revenue we deny somebody something in every duty we levy; we can not help doing that.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Idaho?

Mr. McCUMBER. I yield the floor.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. The Senator from Idaho can not be recognized, because he has already spoken twice.

Mr. McCUMBER. I think I would be taking advantage of the Senator, and I will yield to him for a question or for whatever he may desire.

Mr. GOODING. I wish to say in answer to the question propounded by the Senator from Missouri that we grow all of these by-products, with the exception of copra. We have a great surplus of cottonseed meal and cottonseed cake, so that there is not any question about a balanced feeding ration being produced in this country, and half a cent a pound will not shut out importations. After all it is the old story, I wish to say to the Senator from North Dakota, of the dead line which Senators try to draw between the East and the West, telling the West how far they can ship their products into the eastern markets. Of course, the dairyman, viewing it from a selfish interest, would be benefited by having oil cake on the free list, and in the case of some stock growers in the West it is always a question on the western ranges whether they shall in winter time buy oil cake or whether they shall buy corn. The State of the Senator from Missouri is vitally interested. I myself have cast a balance and sought to determine whether I should buy the oil cake instead of corn. Hundreds of thousands of dollars during some winters are paid out for oil cake rather than for corn, because it is cheaper as a business proposition.

That is all there is to this question, Mr. President. It is a question of whether we are merely going to consider the tariff bill in the interest of all the agricultural industries or neglect to give some of them proper protection.

Mr. REED. Mr. President, I am entirely willing that the Senator shall occupy the floor if the rule is to be waived, but if it is to be waived for him it will have to waived all along the line.

The PRESIDENT pro tempore. The Senator from North Dakota yielded to the Senator from Idaho for a question, but not for the purpose of making a speech.

Mr. GOODING. Mr. President, I realize that perhaps I went a little too far.

Mr. REED. I do not want to draw the rule on the Senator.

Mr. GOODING. I think the Senator from Missouri is quite right, and possibly I said entirely too much; but I want the Senator to understand that his State is vitally interested.

Mr. REED. I know it is vitally interested in having all the cheap feed it can get to put into good cattle.

The PRESIDENT pro tempore. The Chair desires to suggest that the Senator from Missouri has also spoken twice.

Mr. SMITH. Mr. President, before this vote is taken, for fear that there may be some misapprehension as to the attitude of some of us, I want to state that even without the word of the Tariff Commission some of us who are familiar with the production of this article know that three-fourths of all the world's production of cottonseed cake and cottonseed oil and cottonseed meal is produced in America. For years we exported quite an amount, and a rather curious incident arose during the war—that when our exportations were practically cut off and we were limited to domestic consumption the price rose nearly 200 per cent. During normal times, however, we export this article, only a quarter of it being produced in the rest of the world as against three-quarters in this country.

The American producer of cottonseed meal and cottonseed cake need not fear any competition whatever, because there is practically none. The cake that comes into competition in a degree with cottonseed meal and cottonseed cake sells for from $2 to $10 a ton higher than the cottonseed cake itself.

I do not see where any advantage could be gained by the farmer, for the reason that the cottonseed meal is a by-product from the manufacture of the oil, the oil being the principal object in the manipulation of the seed. The meal and the hulls are a by-product. The hulls are a fine filler for cattle. They have no appreciable nutritious qualities; but, like all ruminating animals, cattle have to have a filler, and the hulls are found to be an excellent roughage, and in conjunction the meal and hulls make almost an ideal feed.

As to the effect of this duty upon the price of the seed, it is another instance such as I have called attention to heretofore where the manufacturer of the oil, as a matter of course, would be in a position to take advantage of the duty. On account of the disorganized condition of the farmer, in the sale of his product he is absolutely dependent upon the manufacturer for whatever price he sees fit to give; and in view of the fact that we have a monopoly of this peculiar feed, that we export it in great quantities and it is practically without a competitor in its consumption here at home, this is another instance in which the farmers of the country are being handed a gold brick in so far as any benefit that may accrue to them is concerned.

I want to say in concluding that I do not believe there is any danger of any displacement unless the price of this article should go to such heights as to be prohibitive, because all cattlemen recognize that cottonseed meal has no equal in the rapidity with which it will put cattle in condition and the condition in which it will put cattle. Corn-fed cattle will not compare with meal-fed cattle either as to appearance or as to the quality of the beef produced. As we have no competitor and as America produces three-fourths of all the cottonseed meal and cake produced in the world, there is no advantage to be obtained by either the oil man, the producer of the cake, or the farmer, the producer of the seed out of which the cake is made, in that it virtually has no competitor in the markets of the world. Therefore it is idle to talk about the effect upon the price merely to increase the profits of the manufacturer of the meal, which he will be certain not to reflect in the price of the seed.

The Tariff Commission goes into an extensive explanation of what everyone ought to know, that we have a monopoly of this. In conclusion let me say that there is not a finer fertilizer known to the agricultural world than cottonseed meal, in that it has the peculiar quality of containing within itself potash and phosphoric acid as well as nitrogen; and the price of it to-day on its nitrogenous content as compared with nitrate of soda is higher than the price of nitrate of soda by virtue of the fact that the nitrogen in it is of vegetable origin and not of chemical origin, and for some inscrutable reason not known to the chemical world the vegetable-produced nitrogen is more lasting and permanent in its effect upon the soil than the chemical. Therefore the farmer who must have meal will pay more in buying back the meal that goes on his farm than any possible benefit that might accrue to him from the duty on the meal. The fact is, when he goes to buy the meal he buys it at the price fixed by the oil-mill men, and when he goes to sell his seed he sells it at the price fixed by the oil-mill men; and——

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Idaho?

Mr. SMITH. Just one minute; let me finish this sentence. The cotton producers of my State swap seed for meal, and they have to give as many tons of seed as they get of meal, and here latterly they have to give a ton and a half to a ton and three-quarters of seed for a ton of meal. Therefore, as you enhance the value of the manufactured product in the form of the cake or the meal, you enhance the exchange value in detriment to the seed. Therefore, any duty or any protection that you give the finished product of the oil-mill people will be reflected in the exchange value of the seed, because they claim that there is a certain waste, a certain amount that is not merchantable, and you decrease the value of the seed and increase the value of the meal, and the farmer is a purchaser of the meal either by money or through the exchange of his seed.

I hope, therefore, that this proviso as it relates to cotton seed——

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Idaho?

Mr. SMITH. I yield; yes.

Mr. GOODING. I want to say to the Senator that his position is perfectly sound if he wants to keep at a low price farm products and cottonseed meal and cottonseed cake and soya beans, of which we are now producing some in this country, and other oil cake. The free list is the proper place for them all in that event, because that is what always happens. It is used to beat down the price of the American product. That is why I stand for protection on cottonseed cake, cottonseed oil, and cottonseed meal.

Mr. SMITH. Mr. President I am quite sure that the producers of cotton seed throughout the South certainly do not desire this form of protection on the products of the oil mill. They are purchasers of these products out of the proceeds of the seed they sell. They have no control over the price of the seed they sell and no control over the price of the article they buy, and the purchasers of the seed can be very certain that whatever tariff is placed on it will not be reflected in the price of the seed.

Mr. WALSH of Montana. Mr. President, the State I represent is a great live-stock producing State. Very little of these concentrated feeds of any kind are consumed, however, in our

State, owing to the extraordinary freight rates to which they are all subject, whether they come from the South or whether they come from across the ocean and 6,000 miles from the Pacific coast. They are never used except in times of great scarcity; that is to say, in seasons when the ordinary fodders are rare and high priced. Then resort is made to these concentrated feeds.

The situation is this: The stock growers of the State are in a desperate situation. They are obliged to pay extraordinarily high prices for ordinary feeds, and at those times it becomes profitable to bring into the State these concentrated feeds, which will then compete with the others. Under those circumstances, when ruin stares them in the face and they are obliged to pay these extraordinarily high prices for cottonseed cake, it is proposed to shut out of the market soya-bean cake, that might possibly reduce by a trifle the expense of cottonseed cake.

I do not understand that the producers of cotton are alarmed at the competition which their industry would suffer by reason of the importation of soya-bean cake from the Orient, or elsewhere, wherever it is produced. It is inconceivable, considering the enormous amount of feedstuffs of all kinds, including corn—both the stalk, the leaf, and the grain—together with hay in all of its forms, that the introduction of the inconsequential quantity of soya-bean cake that comes into this country can in anywise whatever affect the ordinary price of these ordinary feeds.

Mr. GOODING. Mr. President——

Mr. WALSH of Montana. It can affect the price of the other concentrated feeds only in times of great scarcity and when the price is exorbitant, so that the producers of cottonseed cake are getting an unusually high price for their product anyway.

I yield to the Senator from Idaho.

Mr. GOODING. I just want to thank the Senator from Montana for making my position clear—that I have not been advocating this duty on oil cake and meal in the interest of the woolgrower.

Mr. WALSH of Montana. I do not believe that the Senator from Idaho and I differ about a great many of these things. I think this is an unjustifiable and unwarranted burden upon the sheep industry and upon the growers of sheep, the producers of wool. We were told some time ago that every encouragement ought to be given to that industry, and with that I fully agree; but I am unable to understand how you are encouraging that industry when you are imposing a heavy duty upon the importation of soya-bean cake, that will be used by that industry only when the situation of the industry is a critical one.

Mr. STANFIELD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Oregon?

Mr. WALSH of Montana. I yield.

Mr. STANFIELD. I should like to call the attention of the Senator from Montana to the fact that we have already taken care of the woolgrower by giving him an adequate tariff protection.

Mr. WALSH of Montana. Oh, yes.

Mr. STANFIELD. Out on the Pacific coast there are extensive soya-bean importations that take the place of corn. The sheepman out in my State or in the State of Idaho buys soya beans when he finds that 1 ton of soya beans costs him less than 4 tons of corn. Any time that a ton of soya beans costs him more than 4 tons of corn he buys the corn; so, as the Senator from North Dakota has explained, it is a matter of displacement so far as our people are concerned in the use of corn for the feeding of sheep.

Mr. WALSH of Montana. Of course, it is a matter of displacement. Under all ordinary circumstances the sheep grower of Montana can not buy corn. The freight is too high; and when it comes to a point where he must buy corn the burden upon him is so great that he ought to be given an opportunity to buy substitutes anywhere he can, at any price he can.

Mr. UNDERWOOD. Mr. President, the amendment before the Senate is not of much importance. It is about a small matter. It is hardly necessary to discuss it from that angle. But sitting here listening to the arguments in favor of the amendment the question has again occurred to my mind, on what basis is the bill being written? What is the guiding star which shapes its course to its final enactment?

On Friday last we were told that protection meant the levying of taxes at the customhouse which were sufficient to equal the difference in the cost of production at home and abroad; that on that basis protective tariff bills should be written, and that when the President applied the extraordinary powers which are about to be granted him, in writing executive tariff bills, he would write them on the basis of the difference in the cost of production at home and abroad.

This morning we find an item presented, not at the request of the American producer of the article for a protective tariff, not at all; not on the theory that we are to give a protective tariff to equalize the difference in cost of production at home and abroad, because that has not been discussed as one of the equations in solving the problem. In fact, if we consider the testimony which has been laid before us by Senators we find it has nothing to do with it, for, although equations have not been laid before us, it has been called to the attention of the Senate that four times as much of that commodity is exported abroad as is imported into the home market, which clearly indicates that the article is produced more cheaply in this country than abroad, or at least as cheaply. Yet we find the distinguished Senator who has offered the amendment backed by the chairman of the Finance Committee, who is supporting this amendment on the basis of displacement, whatever that may mean, a new theory in the Republican ideas of writing tariff bills on the theory that there is some cottonseed or oil cake coming from the Orient which may displace a few pounds of corn in somebody's market, and that, therefore, this duty should be imposed, not to protect the producers of American cotton cake or oil cake but to prevent a foreign commodity from coming into the country and occupying a field of consumption which some other commodity may occupy.

This bill is already as spotted as a leopard's hide, and every spot in the bill is of a different color and comes from a different angle. The bill has been written on no basis at all. We have free trade injected into the bill when it is to the interest of the majority of Senators, although I do not know what kind of interest it can be. When it is to the seeming interest of the constituencies they represent that there should be free trade, it is injected into the bill without rhyme or reason.

On the other hand, if it is determined that it is more advantageous, politically or otherwise, that we should have prohibitive tariff rates on some commodities, they are injected into the bill. Now we come to a new theory on which to write a tariff bill, designated as "displacement." I do not know what we will come to before this bill is passed, but I certainly hope that when it is disposed of the country may have some opportunity to understand the theory on which the rates in this bill have been based.

The PRESIDENT pro tempore. The question is on agreeing to the amendment, on which the yeas and nays have been ordered.

The Assistant Secretary proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. BALL]. I transfer that pair to the Senator from Rhode Island [Mr. GERRY] and vote "nay."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER] and vote "yea." I ask that this announcement of the transfer may stand for all the votes on this calendar day.

Mr. POMERENE (when his name was called). I have a pair with my colleague [Mr. WILLIS], who is detained because of serious illness in his family. I do not know how he would vote were he present, but I transfer my pair with him to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. TRAMMELL (when his name was called). In the absence of my pair, the senior Senator from Rhode Island [Mr. COLT], I withhold my vote. If permitted to vote, I would vote "nay."

Mr. WATSON of Georgia (when his name was called). I have a pair with the senior Senator from California [Mr. JOHNSON]. If present, he would vote "yea," and as I would vote "nay" if permitted to vote, I withhold my vote.

Mr. WATSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS]. I transfer that pair to the senior Senator from Maryland [Mr. FRANCE] and vote "yea." I ask that this announcement of my pair and transfer may stand for the day.

The roll call was concluded.

Mr. EDGE. I have a general pair with the Senator from Oklahoma [Mr. OWEN]. I transfer my pair to the junior Senator from Vermont [Mr. PAGE] and vote "nay."

Mr. UNDERWOOD. I desire to announce that the junior Senator from Mississippi [Mr. HARRISON] is absent. He is

paired with the Senator from West Virginia [Mr. ELKINS], and if present would vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Virginia [Mr. GLASS];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

Mr. EDGE. I have a pair with the senior Senator from Oklahoma [Mr. OWEN], which I transfer to the junior Senator from Vermont [Mr. PAGE], and vote "nay." I ask that this announcement of transfer stand for the day.

Mr. HALE. I desire to announce that my pair, the Senator from Tennessee [Mr. SHIELDS], is absent, but I am informed that if present he would vote the same as I shall, and therefore I vote "nay."

Mr. MCCORMICK. I desire to announce that if my colleague [Mr. MCKINLEY] were present, he would vote "yea."

Mr. MCKELLAR. Mr. President, has the senior Senator from Indiana [Mr. NEW] voted?

The PRESIDENT pro tempore. He has not voted.

Mr. MCKELLAR. I have a pair with that Senator, which I transfer to the Senator from South Carolina [Mr. DIAL], and vote "nay."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN], and vote "nay." I ask that this announcement of the transfer of my pair may stand for the day.

Mr. WALSH of Montana (after having voted in the negative). Has the Senator from New Jersey [Mr. FRELINGHUYSEN] voted?

The PRESIDENT pro tempore. He has not voted.

Mr. WALSH of Montana. I have a general pair with that Senator, and, being unable to obtain a transfer, I withdraw my vote.

The result was announced—yeas 23, nays 31, as follows:

YEAS—23.

Broussard	Gooding	Nicholson	Shortridge
Bursum	Jones, Wash.	Norbeck	Smoot
Cameron	Lenroot	Oddie	Sutherland
Capper	McCormick	Pepper	Stanfield
Curtis	McCumber	Phipps	Watson, Ind.
Ernst	McNary	Rawson	

NAYS—31.

Ashurst	Heflin	Myers	Smith
Borah	Jones, N. Mex.	Overman	Stanley
Calder	Kellogg	Pomerene	Sterling
Culberson	Kendrick	Ransdell	Swanson
Cummins	Keyes	Reed	Underwood
Edge	Lodge	Robinson	Wadsworth
Fletcher	McKellar	Sheppard	Warren
Hale	Moses	Simmons	

NOT VOTING—41.

Ball	Gerry	McLean	Townsend
Brandegee	Glass	Nelson	Trammell
Caraway	Harreld	New	Walsh, Mass.
Colt	Harris	Newberry	Walsh, Mont.
Dial	Harrison	Norris	Watson, Ga.
Dillingham	Hitchcock	Owen	Weller
du Pont	Johnson	Page	Williams
Elkins	King	Pittman	Willis
Fernald	Ladd	Poindexter	
France	La Follette	Shields	
Frelinghuysen	McKinley	Spencer	

So the committee amendment was rejected.

Mr. MCCUMBER. On page 201, line 5, after the word "silver" and the comma, I move to insert the word "platinum" and a comma.

The PRESIDENT pro tempore. The Chair desires to suggest that there are two amendments prior to the one mentioned by the Senator from North Dakota, which, under the unanimous-consent agreement, will be taken up first.

Mr. MCCUMBER. Very well.

The PRESIDENT pro tempore. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 200, line 22, strike out the word "calendar" and insert the word "calender."

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 201, line 2, strike out "25" and insert in lieu "35," so as to read:

PAR. 1443. Rolls: Calender rolls or bowls made wholly or in chief value of cotton, paper, husk, wool, or mixtures thereof, or stone of any nature, compressed between and held together by iron or steel heads or washers fastened to iron or steel mandrels or cores, suitable for use in calendering, embossing, mangling, or pressing operations, 35 per cent ad valorem.

Mr. WALSH of Montana. Mr. President, I have been seeking in the information furnished by the Tariff Commission some enlightenment concerning this particular item. Calender rolls seem to be an article very extensively used in the manufacture of paper and other commodities. I have been unable to learn anything about the article. Will the Senator from North Dakota explain just why we ought to impose a duty of 35 per cent upon this commodity?

Mr. MCCUMBER. Mr. President, the articles come in under a provision according to the chief value, and it is the first time they have been given a separate designation. They would probably run higher than 35 per cent as an average on the basis of chief value, but, taking the particular items into consideration, the committee simply felt from all the evidence of importations, and so forth, that 35 per cent is a proper ad valorem duty.

Mr. WALSH of Montana. It would seem to be an almost necessary conclusion from the fact that the committee fixes that duty that the committee thought it was a proper duty; but I was trying to find out upon what facts the committee reached that conclusion.

Apparently, Mr. President, this is a burden chiefly upon the manufacturer of paper. The rolls referred to in the paragraph are an important constituent of the machinery used in the manufacture of paper. Why should we burden the manufacturer of paper, or indeed the manufacturer of any of these commodities, in the production of which these rolls are used, by such a duty as 35 per cent? What are the facts concerning the cost of production here and abroad of this particular article which, being the principle on which the tariff bill is framed, should lead us to the conclusion that the American manufacturer should have a protection of 35 per cent in order to enable him to stand on the same footing as the European producer? The House fixed 25 per cent, but there is no basis in the hearings, so far as I can learn, for fixing even that rate.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The ASSISTANT SECRETARY. The committee proposes to amend, on page 201, line 4, after the word "composed," by inserting "(except if made in whole or in part of gold, silver, gold plate, silver plate, precious or imitation precious stones)."

The Senator from North Dakota moves to amend the committee amendment by inserting the word "platinum" and a comma after the word "silver," in line 5, so as to read:

PAR. 1444. Rosaries, chaplets, and similar articles of religious devotion, of whatever material composed (except if made in whole or in part of gold, silver, platinum, gold plate, silver plate, precious or imitation precious stones), valued at not more than $1.25 per dozen, 15 per cent ad valorem.

Mr. REED. Mr. President, I presume there is no more objection to inserting the word "platinum" than there is to retaining in the bill "gold, silver, gold plate," and so forth. The matter regarding which I rose to inquire is why we should levy a tax upon the importation of rosaries, chaplets, and similar articles of religious devotion. I am not in any way connected with any church or religious organization which employs rosaries or chaplets, but it seems to me that we might at least not levy a tax upon religion, anybody's religion. It does seem to me that the Word of God and the ordinances of the church might at least be free; that a tax of this kind is an abomination and one which ought to arouse just indignation on the part of every member of every religious organization and of everybody else who believes that salvation ought to be free, and that its instrumentalities, whatever they are, might also at least come into the country free of tax.

I am, therefore, opposed to the amendment, and I move to amend the amendment by striking out all of paragraph 1444.

The PRESIDING OFFICER. The amendment is not yet in order. The amendment proposes to eliminate the paragraph, while the amendment proposed by the Senator from North Dakota is an amendment to the amendment, perfecting the text. The Senator's amendment will be in order later.

Mr. REED. I will let the Senator from North Dakota perfect the text, and then it will be in order to move to strike out the whole paragraph. I shall make that motion at that time.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from North Dakota to the amendment of the committee.

Mr. WALSH of Montana. I want to suggest to the Senator from Missouri that those who do not like the provision——

Mr. MCCUMBER. Does the Senator object to inserting the word "platinum" as well as silver?

Mr. WALSH of Montana. Not at all.

Mr. McCUMBER. That is all there is to the pending amendment.

Mr. WALSH of Montana. I want to address myself to the paragraph. However, if the Senator insists upon disposing of the particular amendment, I have no objection to its being considered.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from North Dakota inserting the word "platinum" in the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now is on the committee amendment as amended.

Mr. McCUMBER. There is another amendment in line 6 where the word "or" should be inserted after the word "plate" so as to read, "gold plate, silver plate, or precious or imitation precious stones."

The PRESIDING OFFICER. Is there objection to the amendment to the amendment? The Chair hears none, and it is agreed to.

Mr. WALSH of Montana. All of the amendment found in lines 4, 5, and 6, page 201, relates to the amendment found in lines 9, 10, and 11; that is to say, the commodities referred to in lines 9, 10, and 11 are excluded from the commodities named in lines 3 and 4 by virtue of the amendment found in lines 4, 5, and 6, as I understand the matter.

Mr. McCUMBER. If the Senator will allow us to perfect these amendments by the insertion of those words which are necessary, it would help us then to get right down promptly to the proposition which the Senator desires to make, namely, to strike out the provision.

The PRESIDING OFFICER. The question is on the committee amendment in lines 4, 5, and 6 as amended.

Mr. McCUMBER. I wish to insert in line 10——

The PRESIDING OFFICER. The Chair calls attention to the fact that the matter in lines 4, 5, and 6 is one amendment. If there is no further amendment to be made to that the question is on agreeing to that amendment.

Mr. WALSH of Montana. That is not quite the situation as I understand it.

Mr. McCUMBER. I think we should put in all these amendments so that the entire paragraph may be perfected. Then I shall not object to the motion to strike it out entirely.

The PRESIDING OFFICER. That is what the Chair is trying to do.

Mr. WALSH of Montana. I ask unanimous consent that we may proceed to the consideration of the other portion of the amendment.

The PRESIDING OFFICER. The Chair understands there are two amendments here—one in lines 4, 5, and 6, which is one amendment, and the other in lines 8, 9, 10, and 11.

Mr. WALSH of Montana. I will put it the other way. I ask unanimous consent that the two amendments be considered as one.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana that the two amendments be considered as one? The Chair hears none, and it is so ordered. The Secretary will state the second part of the amendment.

The ASSISTANT SECRETARY. The second part of the amendment is on page 201, line 8, to strike out the words "ad valorem" and insert the words "ad valorem" and a semicolon and the following words: "any of the foregoing if made in whole or in part of gold, silver, gold plate, silver plate, precious or imitation precious stones, 50 per cent ad valorem," so as to make the paragraph read:

PAR. 1444. Rosaries, chaplets, and similar articles of religious devotion, of whatever material composed (except if made in whole or in part of gold, silver, platinum, gold plate, silver plate, or precious or imitation precious stones), valued at not more than $1.25 per dozen, 15 per cent ad valorem; valued at more than $1.25 per dozen, 30 per cent ad valorem; any of the foregoing if made in whole or in part of gold, silver, gold plate, silver plate, precious or imitation precious stones, 50 per cent ad valorem.

Mr. McCUMBER. Mr. President, I move to insert after the word "silver," in line 10, on page 201, the word "platinum" and a comma.

The PRESIDING OFFICER. The amendment which is proposed by the Senator from North Dakota to the committee amendment will be stated.

The ASSISTANT SECRETARY. On page 201, paragraph 1444, line 10, after the word "silver," it is proposed to insert the word "platinum."

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On the same page and in the same line, after the words "silver plate," I move to insert the word "or."

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the entire amendment as amended.

Mr. WALSH of Montana. Mr. President, this is a very small matter considered in dollars and cents. The Senator from Missouri [Mr. REED] has asked why this duty was recommended by the committee. My suggestion is that it was recommended by the committee simply because it was asked for, as were a great many other provisions of the pending bill. It was asked for by a large number of manufacturers represented by Emil Klein, of Providence, R. I. The manufacturers of these commodities asked that the paragraph as it came to the Senate from the House of Representatives be amended so as to read as follows:

Rosaries and chaplets, of whatever material composed, valued at not more than $1.25 per dozen, 15 per cent ad valorem; valued at more than $1.25 per dozen, 30 per cent ad valorem; any of the foregoing if made in whole or in part of gold, silver, gold plate, silver plate, precious or imitation precious stones, 50 per cent ad valorem.

So that it will be perceived that the people who ask for this paragraph got it in the exact shape they asked for it, except that the first part of the amendment, which reads "except if made in whole or in part of gold, silver, gold plate, silver plate, precious or imitation precious stones" was inserted in order to make the whole provision harmonious. They asked that the words "and similar articles of religious devotion" be excluded, but the committee did not accede to that request. This is a case in which exactly the duty was given which was asked for by the manufacturers represented, as I have stated, by Mr. Klein.

But what showing do these people make?

Mr. LODGE. By whom did the Senator from Montana say these people were represented?

Mr. WALSH of Montana. They were represented by Mr. Emil Klein, of Providence, R. I. This is what they told the committee about the matter. Bear in mind, we are going to impose a duty now equaling the difference in the cost of production here and abroad. They said:

Because of the unsettled commercial and industrial conditions abroad and because of the fluctuating rates of foreign commerce we can not at the moment give figures indicating differentials in the cost of production at home and abroad relative to such rosaries as we manufacture.

There were certain lists of exhibits which were filed by Mr. Klein, representing Klein & Sons, of Providence, R. I., which he said could be manufactured abroad more cheaply than they could here, but that is practically the sum of the showing that was made.

Mr. LODGE. May I ask the Senator a question before he takes his seat?

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Massachusetts?

Mr. WALSH of Montana. Yes.

Mr. LODGE. These articles were all dutiable under the Underwood law, were they not?

Mr. WALSH of Montana. They were dutiable only on the component parts.

Mr. LODGE. They were dutiable as articles of apparel?

Mr. WALSH of Montana. Yes.

Mr. LODGE. As articles that could be carried or worn?

Mr. WALSH of Montana. Yes.

Mr. LODGE. And also on the component material of chief value. I do not know what the rate is.

Mr. McCUMBER. The rates would be much higher than they are under this provision.

Mr. WALSH of Montana. Mr. President, I should not have the slightest objection and I do not know anyone who has any objection to this. The dealers in the articles made no objection. They appeared and stated that it was a matter of indifference to them what the rates were. Of course, the ordinary rosaries are sold at small prices. Those who buy the highly expensive ones, which are made of gold or silver beads or of precious stones, are willing to pay for them; that is not the point at all; but there does not seem to have been any showing made at all upon which any such imposition is justified. As has been remarked by the Senator from Missouri, I do not think that it is particularly creditable.

Mr. McCUMBER. If the Senator will allow me, I desire to say that there is not an increase in this case, but there is a decrease.

Mr. WALSH of Montana. It is an increase so far as it has been increased.

Mr. FLETCHER. These articles have been classified in the acts of 1909 and 1913——

The PRESIDING OFFICER. Does the Senator from Florida desire recognition on the amendment?

Mr. FLETCHER. I did not mean to take the Senator from Montana [Mr. WALSH] off the floor.

Mr. WALSH of Montana. I yield to the Senator.

Mr. FLETCHER. Under the acts of 1909 and 1913 these articles were classified according to the component material of chief value or as articles designed to be worn on the apparel or carried on or about or attached to the person. Then they were taxable, but otherwise not. Unless some such classification as that is inserted in the provision, I shall favor striking it out.

The PRESIDING OFFICER. The question is on the committee amendment.

Mr. REED. Mr. President, I should like to know what the committee amendment proposes.

The PRESIDING OFFICER. The amendment is printed in italics in the paragraph under consideration.

Mr. REED. I desire to know what are the joint amendments which have been put together by virtue of the unanimous-consent agreement. If those amendments be adopted, then my motion to strike out the paragraph will be in order, as I understand the parliamentary situation.

Mr. McCUMBER. Mr. President, I want to say merely a word upon the proposed amendment. Of course, if it were adopted it would mean that these articles would be placed under some other classification; in other words, they would fall in the basket clause. If we were to strike out the paragraph entirely as it now stands, of course the articles would then take a higher rate of duty as, under the ordinary basket clause, they would be included in the classification "manufactured articles," according to the value of the chief component material thereof. That is the way they are taxed under the present law.

I wish to say, further, a word about relieving from taxation articles that may be used in a church. If we are going to relieve rosaries from taxation, why should we not relieve from taxation the images which are used? Why should we not relieve from taxation everything else that is used in a church? Why should we not treat all churches alike?

As a matter of fact, as it has already been suggested by the Senator from Montana, the average little rosaries which are used in the Catholic and in the Episcopal churches are very cheap indeed. There will be very little additional duty, and if gold and silver and platinum and precious stones are to be used in making them it does seem to me that those who desire to purchase such articles can well afford to pay the duty that is fixed under the paragraphs of the bill.

The same question arose in connection with stained glass windows. In that case there was a conflict between those who build churches and the laborers who produce the stained glass. We fixed a duty which we thought would be a protective duty to the laborers in the United States engaged in the industry, but in the case of the extremely expensive stained glass windows which are not produced at all in the United States and can not be produced in the United States we adopted a provision allowing their importation. I think that so far as the imposition of duties is concerned we ought not to make an exception because an article is used in this church or that church or the other church or whether it is used in all of them together.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. McCUMBER. I yield.

Mr. WALSH of Montana. The only thing against which I protest in this matter is to the imposition of this duty simply because a bunch of manufacturers who are engaged in manufacturing these articles come here and ask that it be done.

Mr. McCUMBER. None of these duties have been placed in the bill because a bunch of manufacturers wanted them. There is no question at all that these articles can be produced cheaper abroad than they can be produced in the United States. The only question is whether we shall take out of the general rule under which no distinction is ever made as between churches those particular articles which are used in any particular church. I am discussing now the amendment offered by the Senator from Missouri. I do not think if the Masons want a particular regalia they should pay a less rate of duty than the Odd Fellows would pay for their regalia or the Knights of Pythias or the Elks or any other organization. I do not know of any reason why we should make a special rule for those organizations. I think the duty should be levied either under the Democratic theory of a duty for revenue only or that it should be levied under the Republican idea of a duty for revenue and protection, and that we should not take into consideration the interest of this church or that church or any particular form of religion as affecting the duty which we are levying for the purpose of protection.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to the Senator from Montana?

Mr. McCUMBER. I yield.

Mr. WALSH of Montana. It is simply a matter of my gorge rising at the idea of these people endeavoring to enrich themselves out of the devotion of the people.

But, Mr. President, the Senator referred to the stained-glass window provision. I have not been able to understand exactly what the situation is with respect to artistic stained-glass windows.

Mr. McCUMBER. Mr. President, under the present law the Senator understands that they come in as manufactured articles and will be dutiable according to the component material of chief value, and that in many instances that would mean more than the rate we have placed on the articles under this special provision in the pending bill. If we should strike that out, of course those particular articles then would come under a like paragraph covering manufactures. We would have to take each article and see what the duty would be, unless the Senator wishes to specify them and put them on the free list. Of course, that would take them without the provision of the general basket clause.

Mr. WALSH of Montana. Mr. President, I do not know whether the Senator was referring to the inquiry I addressed to him concerning stained-glass windows or not. They are referred to in paragraph 1688 as follows:

> Works of art, productions of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution or to any State or municipal corporation or incorporated religious society, college, or other public institution, including stained or painted window glass or stained or painted glass windows which are works of art and valued at $15 or more per square foot, when imported to be used in houses of worship, and excluding any article, in whole or in part, molded, cast, or mechanically wrought from metal within 20 years prior to importation; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe.

Mr. McCUMBER. That is the class that I mentioned a short time ago. I said we allowed those very expensive articles to come in which did not conflict with the production in the United States because those are not produced in the United States, and we allowed them to come in not generally but only when they were a gift from the foreign country.

Mr. WALSH of Montana. Am I to understand that the committee intends to leave paragraph 1688 as it reads here?

Mr. McCUMBER. Yes.

Mr. WALSH of Montana. I understood that an amendment might be made to that paragraph.

Mr. McCUMBER. No; I have not in mind any amendment to the paragraph which the Senator has just read. This allows a gift to a church or a gift to a museum or any other public or semipublic institution to come in without payment of duty.

Mr. WALSH of Montana. That is when the glass is valued at more than $15 per square foot?

Mr. McCUMBER. Yes. The reason why we drew that line was that the ordinary glass, valued at less than that, is produced in the United States and produced very generally. The particular articles valued at a much higher rate than this, requiring great art, we do not produce in the United States, and, therefore, we allow those to come in without the payment of this protective duty.

Mr. WALSH of Montana. About what price per foot does the ordinary rather high-class church or cathedral window cost?

The PRESIDING OFFICER. The Chair desires to suggest that the discussion of another paragraph at this time is contrary to the unanimous-consent agreement.

Mr. McCUMBER. I appreciate that.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment.

Mr. REED. Mr. President, the amendment has now been perfected, as I understand.

The PRESIDING OFFICER. Yes; the amendment has been perfected, but it has not yet been agreed to. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. REED. I move to amend the amendment by striking out the language of paragraph 1444, and inserting in lieu thereof:

> Rosaries, chaplets, and all articles of religious devotion, free.

The PRESIDING OFFICER. The Senator desires to strike out all of paragraph 1444, does he, and then transfer part of it to the free list?

Mr. REED. Yes; I move to strike out all of paragraph 1444, and to insert in lieu thereof the following:

Rosaries, chaplets, and all articles of religious devotion, free.

That will admit free articles of religious devotion, whether they are used by one particular church or by another.

The PRESIDING OFFICER. The Chair will suggest to the Senator that if he will make a motion to strike out all of paragraph 1444, then, if that is adopted, he can offer in the free list a provision covering the matter.

Mr. REED. I want to put it here. I want to put it this way. I want the vote to be upon this concrete proposition and not on a split proposition, and I am certainly within the rules of order. It can be transferred afterward to the free list by another vote, if desired.

Mr. LODGE. The usual way to make it free is to put it on the free list.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. REED. I yield for a question.

Mr. LODGE. That was all I wanted to say—that the usual way is simply to move to put it on the free list.

Mr. REED. I am changing the language, too. I am not here appealing for any advantage to any church. Of course, as I understand, rosaries probably are used only by one church, but I may be in error in regard to that. On reflection, I think I am. The point I am making is that any article that is used in connection with religious ceremonials or devotions, whether by one church or by many churches or by all churches, we can afford to allow to come into this country free of charge. We put Bibles on the free list. Why? Because it is recognized that the Bible is connected with the religion and ideas of devotion of the people of this country. I see no reason why the articles employed in the religions service of any church, whether it be the Jew or the Gentile, the Catholic or the Protestant—and they all purchase or employ certain articles—should not be allowed to come into this country tax free.

The Senator spoke of the Masonic fraternity, and the Knights of Pythias, and some other secret orders. If we were permitting the rituals of some of these orders to come in free, the Senator's argument would find a parallel in a sense, but only in a sense. That is not proposed, however; and I do not suppose that the Senator puts these secret orders—and I respect every one of them—upon the same level as he does the churches of the land.

It seems to me that if we put Bibles on the free list we can well afford to put on the free list those articles which are a part of the religious ceremonial and regulation of any church. I am not making any plea at all for any particular church, but for all of them. It seems to me a ridiculous thing to sing "I'm glad salvation's free," and then tax its instrumentalities for coming into this country. It seems to me we are going a good way to get a little tax. Back of it, what is there? After all is said and done, there is the cupidity of the gentleman in America who manufactures these things and who wants to levy a tax upon the piety of the people for his benefit.

Mr. President, I make that motion, and on that motion I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri, upon which he asks for the yeas and nays. Is the request seconded?

The yeas and nays were ordered.

Mr. McCUMBER. Mr. President, I think the Senator's motion requires a little consideration and thought before we vote on it. To be sure, we place Bibles upon the free list. We place books of science, and so forth, on the free list. We place books more than 20 years old upon the free list, unless they have been bound with a special binding, and then we levy a duty only upon the value of the binding; but let us see the effect of the Senator's amendment.

He places rosaries, chaplets, and similar articles of religious devotion, of whatever material composed, on the free list. Let us take the ordinary rosary. Let us have the cross diamond studded. Let us have the rosary itself and its beads made of diamonds or pearls. Separate the two, the cross and the beads, and it is no longer a rosary. You have, therefore, imported under a rosary diamonds, pearls, and manufactures. All you need to do is to separate them and you have your diamonds in free, you have your pearls in free, and you have your manufactures in free—articles on which we are levying a duty of 60 per cent, up to 70 per cent, and even a higher percentage.

I think we are getting on very dangerous ground. I repeat that when it comes to the question of importations, the raising of revenue, or the protection of American industries, I do not think we should try to find a dividing line of everything that should go into a church and things which might not go into a church, and say that the things which go into the church shall be free—the nails, the shingles, the hardware of every character—and yet that is what would be the result of the philosophy of the Senator from Missouri. We are giving a protection for American manufacturers. American manufacturers manufacture these religious articles, the same as foreigners do. Most of them, I think, are sold to the public at a very low rate, possibly lower than any other similar merchandise.

It is not a question of cupidity on the part of the manufacturers. The manufacturers and importers practically agreed in their testimony, and the Senator from Montana is mistaken when he suggests that these duties are put in only at the behest of the manufacturers. We had the testimony of manufacturers and importers, and the law as proposed seemed to be agreeable at least to both the importers and the manufacturers. But if even we thought that we should make a difference in the treatment of articles imported to go into a church, or to be used by church people, then we ought to have some special paragraph relating to it, and it ought to be drawn with exceedingly great care, in order that the right of importation for religious purposes might not be taken advantage of for entirely different purposes; and it certainly would be taken advantage of if we allowed jewelry to come in free because it came in in the form of a rosary, or a chaplet, or any other article.

Mr. WALSH of Montana. It seems to me that the suggestion made by the Senator from North Dakota is eminently sound. These articles might easily be dissociated from their real purpose. Why would it not be satisfactory to the Senator to have a provision to the effect that they should bear a rate of duty fixed in the bill upon the component article of chief value?

Mr. McCUMBER. Because, on the whole, I think it would be a higher rate of duty. I would be perfectly willing, if it is desired to do that, but I think in many of the instances the rate of duty would be higher than that we have fixed here in the shape of an ad valorem duty.

Mr. WALSH of Montana. Why does the Senator think it would be higher?

Mr. McCUMBER. I am informed that it has caused almost continuous litigation to determine which is the component article of chief value in the matter of jewelry. We can determine it in the case of cotton and wool, and many other things, but it is extremely difficult in the matter of jewelry.

Mr. WALSH of Montana. I do not see why there should be any more trouble about it than in the case of fabrics.

Mr. McCUMBER. If the Senator took a piece of jewelry consisting of many different kinds of precious stones and undertook to get a comparison, he would find it extremely difficult to say whether this emerald is the component article of chief value, or this pearl is the component article of chief value, or this diamond is the component article of chief value, or this ruby is the component article of chief value, in the piece of jewelry.

Mr. WALSH of Montana. If this is a less rate than the usual rate upon the component article of chief value, then the fraud could be perpetrated by introducing the article in the form of a rosary and dissociating it here.

Mr. McCUMBER. Possibly to some extent, but very little, I think. Here are two pages of cases which are given in which there was litigation over the subject of what is the component article of chief value.

Mr. LODGE. Mr. President, I merely desire to say that the suggestion made by the Senator from Montana seems to be a very reasonable and proper one. No one likes to tax an article of devotion or to put a duty on it. It is something we all should like to avoid. But to have an article of devotion, one regarded with reverence by millions of people, used for the purpose of perpetrating customs frauds seems to me a very undesirable result, and we ought to be able to meet it in some such way as the Senator from Montana has suggested. Of course, the ghost that always stalks across every path here, that "it can not be enforced," has appeared now. We had rosaries and chaplets dutiable under the law of 1909 and under the Underwood law, but they were put in general basket clauses. They were not named specifically, but came in as articles of apparel or use. In other words, Congress in those laws did perhaps in an imperfect way what the Senator from Montana suggests. I think that the placing of a duty on articles of devotion is very unattractive. I believe no one likes to do it.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from North Dakota?

Mr. LODGE. I yield.

Mr. McCUMBER. I may not be the individual who should make any suggestions as to the teachings of the Savior, but from what little I know of them, at least I would not say that His teachings would indicate that rosaries should be diamond studded and that we should have extremely expensive articles, which could only be used by very wealthy people as articles of devotion or to represent Christianity in any form. Does the Senator believe that a rosary should be diamond studded?

Mr. LODGE. The Senator is taking all of my time. I thought I made it clear, but I suppose my expression was imperfect, that we ought not to admit free of duty precious stones and pearls, no matter in what form. They are objects of luxury. I thought I made that clear as an objection to what the Senator from Missouri proposed. I tried to do so. I said in a general way what I feel, that I think all of us dislike—I am sure I do—the idea of voting a duty or a tax on articles of apparel or use which are used solely for purposes of religious devotion, no matter what sect uses them. But certainly it ought not to be employed, as it would be, as a method of committing fraud, and I think there is grave danger of that when they are made of stones of very great value. I believe that is the defect in the motion of the Senator from Missouri, if I may say so.

Mr. REED. Mr. President, I would not be frank if I did not say that in making my motion the idea of fraud in the manner suggested by the Senator from North Dakota had not occurred to me, and I think there ought to be a provision here which would protect against it. I therefore withdraw my former motion and make the following motion: I move that paragraph 1444 be amended so that it shall read as follows, striking out the word "similar":

Rosaries, chaplets, and other articles of religious devotion of whatsoever material composed, valued at not more than $5 per dozen, free; all other importations of the character aforesaid shall bear that rate of duty which their chief——

Mr. LODGE. May I make a suggestion to the Senator?

Mr. REED. Certainly.

Mr. LODGE. I think the paragraph might be placed upon that basis, but it seems to me that it would be well if we passed it over temporarily to see if we can not prepare something to meet the objection.

Mr. REED. I would prefer that to undertaking to amend it here as I stand on my feet. If it can be passed over temporarily, I will prepare an amendment and be glad to consult with the chairman of the committee with regard to it.

The PRESIDING OFFICER. Without objection, the paragraph will be passed over temporarily. The Secretary will state the next amendment.

The next amendment was, in paragraph 1446, page 201, line 16, to increase the rate of duty on violin rosin from "10" to "15" per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 201, line 21, after the word "for," to strike out "15" and to insert "25," so as to make the paragraph read:

PAR. 1447. Works of art, including paintings in oil or water colors, pastels, pen and ink drawings, and copies, replicas, or reproductions of any of the same; statuary, sculptures, or copies, replicas, or reproductions thereof; and etchings and engravings; all the foregoing, not specially provided for, 25 per cent ad valorem.

Mr. WALSH of Montana. Mr. President, I hope we will not establish the precedent of imposing a duty as high as 25 per cent on works of art. I need not say that these things contribute to the refinement of our people. They bear 15 per cent under the present law. The House seemed to think that was enough. I hope the Senate committee will feel disposed to withdraw the amendment proposed.

Mr. McCUMBER. Mr. President, we sought not to change the House duty at all. The house duty is based upon the American valuation, and we gave what we regarded as the equivalent based on the foreign valuation, which is 25 per cent ad valorem.

Mr. WALSH of Montana. I understand, but the existing rate seems to have been entirely adequate. The Tariff Commission advises us that there is no real competition in this class of goods. Apparently we produced in 1914 $3,910,000 worth of goods of this character, and in 1919 we produced $4,982,000 worth. The importations are inconsequential. The imports in 1914 amounted to $766,464, and they have been falling practically ever since. In 1918 they were only $11,000; in 1919 they were $27,000; in 1920 they were $78,000; and in the first nine months of 1920 they were only $40,641, while, on the other hand, we export great quantities of these productions. In 1914 we exported, of paintings and statuary of all kinds, $1,415,000 worth, going to France, England, Canada, and Germany. In 1918 we exported $341,000 worth; in 1919 we exported $1,150,000 worth; in 1920 we exported $1,640,000 worth; and in the first nine months of 1921 we exported $756,552 worth. So we seem to be doing tolerably well under the existing condition of things with a 15 per cent rate.

These facts are incontrovertible, and they seem to show no justification for an increase in the rate. I hope that the most liberal disposition will be exhibited in this body, at least, toward these things which contribute to the decoration of the homes of the people, the elevation of their ideals, and that kind of thing, and if we introduce some few from abroad which have special merit and worth, I am sure that the result is not anything but beneficial to the people at large.

Mr. McCUMBER. In 1910, with an act which gave us 15 per cent, and on etchings 25 per cent, we imported $1,515,000 worth. In 1914, with a 15 per cent duty, we imported $366,771 worth. In 1921 we imported $335,199 worth. It is pretty difficult to state certainly in a painting what is protective and what is not, because what one person may paint may bring a very high price because of his reputation, while what others paint may bring a very low price. The art, however, would cover the statuary that is used and which is made in the United States, and made very much more cheaply in Italy and some of those countries. I think we might regard it as more of a revenue duty. It is not a high duty, at least, when we say 25 per cent.

Mr. LODGE. Mr. President, the question of a duty on works of art has been much discussed in the Senate. I have always felt that it is an advantage to the country to have works of art admitted free; that it was desirable for the country on every ground that works of art should be admitted free. Of course, any work by an American artist is free. In the act of 1913, works of art, except rugs and carpets, collections in illustration of the progress of the arts, and so forth, and objects of art of ornamental character or educational value which shall have been produced more than 100 years prior to the date of importation, but the free importation of which shall be subject to such regulation as to proof of antiquity as the Secretary of the Treasury may prescribe, were admitted free. When the Underwood law was enacted, which was an alleged revenue law, it carried in this respect substantially the rates of the Payne-Aldrich law.

The argument is made that many works of art are brought here which are fair subjects for yielding a revenue. I do not care to make any contest on that point now. No question of protection can possibly arise. We can not create a painter or sculptor by putting a duty on paintings. They are no more likely to develop than if we let the best art come in free. I am not disposed, therefore, to oppose some revenue duty on the articles mentioned, but I confess I do not see why it should be increased over the House rate.

Mr. McCUMBER. I think the Senator has not carefully considered the particular paragraph. It says "not specially provided for." It will be very difficult for us to say what might come in that class, because about everything we can consider has been specially provided for. Take the paragraphs on page 240, commencing with paragraphs 1685, 1686, 1687, 1688, and 1689, paragraphs covering several pages, and it will be seen, I think, that we have covered about everything we can think of and put it upon the free list. We knew there might be some other particular things that might come under the head of works of art which we might want to get at in this way.

Mr. LODGE. The Senator is right. I had not noticed the words "not specially provided for."

Mr. McCUMBER. Last year we imported $20,718,000 worth free, and the dutiable—that is, those which would come under the basket clause—were only $342,000 worth. So practically everything is covered.

Mr. LODGE. I had not noticed those words. The Senator is quite right, because almost the same provisions are carried as in the law of 1909.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The READING CLERK. The next amendment is, on page 202, line 2, after the word "and," where it occurs the first time, to strike out the figures "25" and to insert "50," so as to make the paragraph read:

PAR. 1449. Pencils of paper, wood, or other material not metal, filled with lead or other material, pencils of lead, crayons, including charcoal crayons or fusains, and mechanical pencils, not specially provided for, 50 cents per gross and 50 per cent ad valorem; and in addition thereto, the following cumulative duties: Caps or protectors, whether separate or attached to pencils, and pencils prepared for caps or protectors, 25 cents per gross; pencils stamped with names other than the manufacturers', 50 cents per gross; slate pencils, not in wood, 25 per cent ad valorem.

Mr. McCUMBER. I desire to make a considerable change there. On page 202, in line 1, I move to strike out all the matter after the words "not specially provided for" and the comma in line 1, down to and including all of line 6, and to insert in lieu thereof:

Forty cents per gross, but not less than 45 per cent ad valorem; pencil-point protectors, whether separate or attached to pencils, 25 cents per gross; pencils stamped with names other than the manufacturers' or the manufacturers' trade name or trade-mark, 50 cents per gross, but not less than 45 per cent ad valorem.

The PRESIDING OFFICER. The Senator from North Dakota, in behalf of the committee, withdraws the amendment in line 2, page 202, and in lieu thereof proposes the amendment which the Secretary will report.

The READING CLERK. The Senator from North Dakota moves to strike out, on page 202, line 1, all after the word "for" down to and including the words "per gross" in line 6, and to insert:

Forty cents per gross, but not less than 45 per cent ad valorem; pencil-point protectors, whether separate or attached to pencils, 45 cents per gross; pencils stamped with names other than the manufacturers' or the manufacturers' trade name or trade-mark, 50 cents per gross, but not less than 45 per cent ad valorem.

Mr. LODGE. Mr. President, I would like to ask the Senator if he would be willing to make a verbal amendment there. The section as reported included caps or protectors, whether separate or attached to pencils, and pencils prepared for caps or protectors. Now it is made to read "pencil-point protectors." I was in hopes the Senator would be willing to allow caps and clips to go in with the protectors.

Mr. McCUMBER. We have caps.

Mr. LODGE. Where?

Mr. McCUMBER. We give a special duty for the caps; that is, the pencil-point protectors, which is what is meant by the caps.

Mr. LODGE. But what about the clips?

Mr. McCUMBER. I suppose the ordinary clip is always a part of the pencil itself. It could not be very well attached afterwards.

Mr. LODGE. Oh, no; I understand that.

Mr. McCUMBER. Therefore it would come in as a part of the pencil; but the cap is a separate matter, which can be taken off and, therefore, may be imported independent of the pencil or may be imported on it. It was thought best to make a special rate for that.

Mr. LODGE. Those who make them think it important that the clip should be mentioned.

Mr. McCUMBER. I have no objection to saying "including the clips" in the description of the pencil.

Mr. LODGE. But a special duty is given to them as protectors.

Mr. McCUMBER. Yes; but the clip does not come in independently, I understand. It has to be attached to the pencil.

Mr. LODGE. The caps and protectors are necessary——

Mr. McCUMBER. Very well; we can change it if necessary. I shall not object to it in that form.

Mr. LODGE. Let it go in after "protectors."

Mr. McCUMBER. They may come in separately.

Mr. LODGE. Let it read "pencil-point protectors and clips."

The PRESIDING OFFICER. The amendment will be stated as modified.

The READING CLERK. The amendment as modified reads: "Forty cents per gross, but not less than 45 per cent ad valorem; pencil-point protectors and clips, whether separate or attached to the pencil, 35 cents per gross," etc.

The PRESIDING OFFICER. The Chair understands the committee amendment is modified in that way.

Mr. REED. Mr. President, I should like to call the attention of the Senator in charge of the bill to the language——

The PRESIDING OFFICER. The Senator from Utah [Mr. SMOOT] has charge of the paragraph, and he has just entered the Chamber.

Mr. REED. The language reads "40 cents per gross, but not less than 45 per cent ad valorem; pencil-point protectors and clips, whether separate or attached, 25 cents per gross; pencils stamped with names other than manufacturers'." Here [exhibiting] is a pencil that we use in the United States Senate, stamped "United States Senate." Under that clause would we not be obliged to pay a tax for the privilege of putting the name of the United States Senate on the lead pencil, because the language is "stamped with a name other than that of the manufacturer"?

Mr. SMOOT. I will say to the Senator that that would be the case. The reason for that is as follows: Pencils are manufactured, for instance, in Japan. They put upon their box and upon the wrapper of the dozen pencils the picture of an American mill. They will actually go to work and give the name as an American name of the pencil. They will have everything not only on the box in which the pencils come but on wrappers of the pencil to indicate to anybody who did not know that they came from Japan that they were made at a certain plant here in the United States. That is what we want to get rid of.

Mr. REED. Against that the law furnishes an absolute protection by an injunction and by a suit for damages.

Mr. SMOOT. I think the Senator is wrong about that. It is not a trade-mark.

Mr. REED. Oh, no.

Mr. SMOOT. There is no law against putting the picture of an American mill on the box of pencils made by some one in Japan.

Mr. REED. Somebody else's mill or a fictitious mill?

Mr. SMOOT. It is a mill that makes pencils in this country.

Mr. REED. The law is full of cases where a man undertakes to imitate the product of another man's mill not protected by registered trade-mark——

Mr. SMOOT. No; it is not a question of a registered trade-mark. Let me explain to the Senator: Suppose the American importer orders pencils made in Japan. If I had the samples I could show dozens of such cases as I am going to recite. He instructs the Japanese manufacturer to put a certain name upon those goods. He also states that they can put upon the band or upon the box a photograph of some mill here in the United States. He does not say that it is an American mill. He does not say that they are made in the United States. He gives them the name of an American institution, and the pencils come in here and people looking at them upon the shelves or wherever they are exhibited alongside of another box like them may think they are made at exactly the same mill, and yet there is nothing upon the box indicating that they were made at that particular mill. Not only that, but in this case they order an American name to be placed on the pencils. Yet it was made in a foreign country. I do not know whether or not the pencil which the Senator from Missouri has is an imported pencil. It would not surprise me at all if it were and that the importer had asked that the words "United States Senate" be put upon that pencil. I do not know whether or not it is a pencil of American manufacture, but if it is there is no harm done.

Mr. REED. Mr. President, I think I understand the Senator's position. First, I wish to say if I am a manufacturer of American lead pencils, and the Senator from Utah is an importer, and he has put upon his pencils or on his boxes or in his literature anything to indicate that he is selling the pencil which I manufacture, the law affords me ample protection. That is one case.

The Senator from Utah suggests another possible case where the manufacturer may put the picture of a fictitious mill or place an American name on an article which is manufactured abroad in order to convince the purchaser that he is buying an American article. That would not be covered under the provisions of the law to which I have referred; but it ought to be covered by a direct provision and not by a tax. This is a very bungling way of getting at it. It would be very easy to draw a clause providing as to any article made abroad and imported into the United States that, under proper penalties, no device to deceive or mislead the public with reference to the place of its manufacture shall be permitted, nor shall such article be allowed to be sent in interstate commerce. That is the way to get at it.

Mr. SMOOT. The only increase in the rate would be 10 cents per gross. It will cost about 10 cents per gross to stamp the fictitious inscription. So the incentive for such action will be removed.

Mr. REED. But that would not take the incentive away.

Mr. SMOOT. It would so far as the duty is concerned, and that is what the foreign producer is particularly interested in; but, outside of that, there ought to be, as the Senator has stated, some law covering that particular practice. However, all that the committee is doing here is to impose a duty of 10 cents on 144 pencils, and the extra expense to which the manufacturer would go to stamp the fictitious name more than likely would amount to that 10 cents. Therefore he would have no incentive.

I agree with the Senator that there ought to be a law—we have none to-day—to cover the practice which is being followed, not only with reference to lead pencils but as to many other articles which are manufactured abroad and come into the United States and which it is intended upon their face to lead the purchaser to think that he is buying American goods. In the pending bill, we have tried to make provision in the case of cutlery and other manufactured products to prevent such deception; but the importers are very smart in avoiding the

wording of the law in some way or other, so that it may really not accomplish the object which we had in mind.

Mr. REED. Mr. President, I am unable to follow the Senator's logic. It is proposed that pencils stamped with names other than the manufacturer's, or the manufacturer's trade name or trade-mark, shall pay 50 cents per gross, but not less than 45 per cent ad valorem.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Utah?

Mr. REED. I do.

Mr. SMOOT. I will say to the Senator as to the 50 cents per gross, if we do not have the limit of 45 per cent on the higher priced pencils it would not amount to 45 per cent ad valorem, but on the cheap pencils it would.

Mr. REED. The Senator from Utah is discussing a question in which, for the moment, I am not interested. Now the proposition is that a pencil which bears a name other than that of the manufacturer shall pay 50 cents per gross. The Senator says that it costs 50 cents per gross——

Mr. SMOOT. No; that it costs 10 cents per gross. The rate is 40 cents per gross where the manufacturer's own name is on the pencil, but where the article is stamped with a name other than that of the manufacturer it is 50 cents a gross.

Mr. REED. Very well. The Senator says it will cost 10 cents to put the name on, and if a 10-cent tax be put on that will stop the abuse.

Mr. SMOOT. No; I did not say it would stop it. I said the manufacturer would get no advantage from the importation of that particular pencil, so far as the rate of duty is concerned.

Mr. REED. I can not follow that logic to any conclusion. The fact about the matter is that this provision will not stop the practice at all, if there is any real advantage in it; and it will prevent a trader who wants his name put on a pencil from having it there unless he pays an additional amount. For instance, if Brentano wishes to sell a pencil and wishes to put his brand on it, if he wishes to specialize in it, and he is willing to give it his name, he can not put it on without paying the extra tax.

Mr. SMOOT. That is correct.

Mr. REED. But he can put it on by paying the extra tax.

Mr. SMOOT. Yes.

Mr. REED. That is a tax upon our people here locally. It seems to me it will serve no good purpose. The evil of which the Senator spoke a while ago is a great one. I am willing to vote for a provision that will require every article, in so far as it may be practicable to do so, to be stamped showing the country of its manufacture; but that is a wholly different question from this.

Mr. SMOOT. It is. Let me state a case to the Senator that happens quite often. Take Marshall Field & Co., of Chicago. They import pencils with the name "Marshall Field & Co., Chicago," stamped on them; that is all. If the Senator should purchase such a pencil and put it in his pocket, without ever noticing that at all, when he did notice it he could not tell whether that pencil was made in America or whether it was made abroad, but he would think, having Marshall Field & Co.'s name stamped upon it, that it was an American pencil.

Mr. REED. No; I would think it was a pencil in which they were specializing, but somebody else might draw a different conclusion. I think that the matter which the Senator has brought up here is one which ought to be covered in the pending bill. I think that it is proper to let people know when they are buying goods that are made abroad that they are made abroad. Then whatever discrimination our people want to make voluntarily in the market is for them to make; but I want to call attention to the fact that this new amendment very largely raises the tax over the amendment originally reported by the committee.

Mr. SMOOT. Mr. President, it is not half the amount of the duty which the committee originally reported. The committee reported a duty of 50 cents per gross and 50 per cent ad valorem. Fifty cents per gross is reduced to 40 per cent ad valorem.

Mr. REED. The Senator from Utah is correct about it. I read it very hurriedly.

Mr. SMOOT. In other words, I will say to the Senator that the rate of duty in this instance originally was 103 per cent on the value of the pencils. Now it is reduced so that in no case shall it be over 45 per cent.

Mr. REED. Not less than 45 per cent.

Mr. SMOOT. I say that in no case would it be more than that. I am speaking of the price of pencils to-day.

Mr. REED. I have not had an opportunity to compare this with the original amendment. I think the Senator, however, is correct in that statement.

Mr. FLETCHER. Mr. President, I was called out of the Chamber for a moment and do not know just exactly what the pending question is. Will the Chair have it stated?

The PRESIDING OFFICER. The Secretary will state the pending amendment.

The READING CLERK. On page 202 it is proposed to strike out, beginning in line 1, all after the word "for" down to and including the words "per gross" and the semicolon; and in line 6 to insert the following:

Forty cents per gross, but not less than 45 per cent ad valorem; pencil-point protectors and clips, whether separate or attached to pencils, 45 cents per gross; pencils stamped with names other than the manufacturers' or the manufacturers' trade name or trade-mark, 50 cents per gross, but not less than 45 per cent ad valorem.

Mr. FLETCHER. Mr. Preseident, did I understand the Senator from Utah to say that that is a reduction from the rate as originally proposed by the committee?

Mr. SMOOT. It is a reduction. As originally reported by the committee the rate was 50 cents per gross and 50 per cent ad valorem. Now we propose to make that 40 cents per gross, but not less than 45 per cent ad valorem. At the price to-day 50 cents a gross is equivalent to 53 per cent ad valorem and the additional 50 per cent made 103 per cent, as the provision was reported to the Senate. Now, we simply provide a rate of 40 cents a gross.

Mr. FLETCHER. That is what was in my mind. The ad valorem rate of 50 per cent is omitted now, as I understand, and the only proviso is that the rate shall not be less than 45 per cent.

Mr. SMOOT. That is correct.

Mr. FLETCHER. I still think that is too high; and I likewise think that paragraphs 1449 and 1450 might as well be considered together in this discussion.

Mr. SMOOT. Let me call the Senator's attention to another difference between the pending amendment and that originally reported. As originally reported the paragraph provided for the addition of cumulative duties. We have stricken out the provision for cumulative duties; they are all omitted from the bill.

Mr. FLETCHER. Mr. President, will the Senator from Utah propose an amendment to paragraph 1450 at all, or is that paragraph to stand as the committee reported?

Mr. SMOOT. We propose also to offer an amendment to that paragraph, I will say to the Senator.

Mr. FLETCHER. I wish to say with regard to lead pencils particularly—it is not very material to deal with slate pencils—that in 1914 the imports of pencils of paper or wood or other material, not metal, filled with lead or other material, and pencils with lead, amounted to 188,644 gross, valued at $512,579. The imports in 1918 amounted to only $4,815 in value; in 1919, they amounted to $7,679; in 1920, they amounted to $168,635; and in the first nine months of 1921 they amounted to $140,543.

The small imports in 1918 were chiefly from Japan.

In 1919 and 1920 Germany was the chief source. In the latter year large amounts, chiefly of high-grade pencils formerly imported from Austria, were received from Czechoslovakia. In the same year lead pencils amounting to 59,476 gross, valued at $150,789, were dutiable at 25 per cent ad valorem, as the specific rate of 36 cents per gross amounted to less than the 25 per cent required as a minimum.

The export statistics of pencils and pencil leads are combined. That is the reason why I said we might as well discuss both paragraphs together. In 1914 their value was $533,944, of which $246,872 worth went to North America, mainly to Canada and Mexico; $188,834 to Europe, chiefly to England; $49,553 to Oceania; and $46,762 to South America. Exports in later calendar years have been valued as follows: 1918, $2,497,208; 1919, $3,565,347; 1920, $3,849,221; 1921 (nine months), $1,669,572. The chief countries of destination were England, Canada, Argentina, Brazil, Mexico, and Spain.

With that showing as to imports and exports, and also as to production, if we consider that in 1914 there were 14 manufacturers of lead pencils, with a capital of $10,670,000, and in 1919 there were 12 establishments, with an output valued at $24,134,000, it would seem that the present rate is high enough. The act of 1913 provided that pencil leads not in wood or other materials should have a duty of 10 per cent ad valorem. The act of 1913 with reference to the pencils described in this paragraph, 1449, is rather complicated, but it would seem to be 36 cents per gross, in no case less than 25 per cent. Under those rates the industry in this country has flourished, production has increased, the importations are almost nominal, and it seems to me it would be a mistake even from the standpoint of protection—to which doctrine I do not agree—but taking it from that standpoint there is no call for this increase of duty.

I have a letter from the Southern Red Cedar Co. (Inc.), to the effect that—

At the present time the tariff rate on pencils is 25 per cent ad valorem foreign value. It is proposed to increase the tariff to 50 per cent ad valorem, plus a specific duty of 50 cents per gross, plus other addi-

tional duties for rubber tips, etc. This tariff would be prohibitive and would force the foreign manufacturers to discontinue exporting pencils to the United States.

There is a slight reduction proposed from the figures given in this letter, but still falling within the criticism submitted here. They say:

In our opinion there is no justification whatsoever for a higher tariff on pencils and pencil leads than exists at the present moment. Such an increase would render it still more difficult for the European pencil maker to purchase our cedar pencil material. It would simply continue the immensely profitable monopoly which the four large domestic pencil makers have enjoyed during the last six or seven years.

Then they say further:

The total consumption of pencils in the United States for the above-quoted years has always exceeded $7,000,000 per annum, and it is therefore evident that the importations from other countries, even before the Payne tariff law, is erroneous. At the present time our exportations of pencils and pencil leads are far larger than our importations, the value of our exports during 1921 having been $2,074,508. The position of our domestic pencil makers, on account of their command of raw materials, is so strong that there should be no protective tariff whatsoever on pencils or pencil leads.

I ask to have this entire letter inserted in the RECORD, without further reading, as a part of my remarks.

There being no objection, the letter referred to was ordered to be printed in the RECORD, as follows:

JACKSONVILLE, FLA., *May 24, 1922.*

Hon. D. U. FLETCHER,
United States Senate, Washington, D. C.

DEAR SIR: No doubt you will remember our previous correspondence in regard to the tariff on pencils, and, since we understand that the Senate is discussing the tariff bill at this time, we take this opportunity to write you more fully on the matter.

At the present time the tariff rate on pencils is 25 per cent ad valorem foreign value. It is proposed to increase the tariff to 50 per cent ad valorem, plus a specific duty of 50 cents per gross, plus other additional duties for rubber tips, etc. This tariff would be prohibitive and would force the foreign manufacturers to discontinue exporting pencils to the United States.

We are manufacturers of cedar pencil slats, operating mills in Florida. We depend, for the sale of our product, on the European pencil manufacturers, because the largest domestic manufacturers have their own cedar pencil slat mills in the South and West. Before the war the European pencil makers bought from us and from other firms in our line of business cedar pencil slats to the value of over $1,000,000 per annum. On account of the present economic condition they have greatly reduced their purchases, and the result has been a practical shutdown of the cedar pencil slat industry in the South, several thousand workmen being out of work. All the cedar used by the European pencil makers comes from the United States, and practically all their graphite is bought from the United States Graphite Co., Saginaw, Mich. As the European pencil makers have to pay us in dollars, their purchases from us depend on their ability to sell finished material in this country, be it pencils or leads.

Even without any protective duty on pencils, the domestic manufacturers enjoy great advantages, as packing and high ocean freight as well as high inland freight charges in Europe make the raw material much more expensive to the European pencil maker. Furthermore, the largest domestic pencil makers, having their own slat mills in the South and West, manufacture cedar pencil slats as cheaply as we can manufacture them, and we naturally have to add a profit to the material which we sell to the European pencil makers, and which represents an additional protection for the domestic industry.

In our opinion, there is no justification whatsoever for a higher tariff on pencils and pencil leads than exists at the present moment. Such an increase would render it still more difficult for the European pencil maker to purchase our cedar pencil material. It would simply continue the immensely profitable monopoly which the four large domestic pencil makers have enjoyed during the last six or seven years.

Hon. JOSEPH W. FORDNEY, chairman of the House committee, in the hearings before that committee, stated that Germany, prior to the Payne tariff law, sold us 95 per cent of the pencils consumed in this country. This is not correct, and we give you below the official figures from the Statistical Abstract for 1913 of the United States Board of Foreign and Domestic Commerce, showing the total importation of pencils into the United States from 1902 to 1913:

1902	$356,542
1903	505,213
1904	518,772
1905	507,965
1906	649,735
1907	628,200
1908	619,789
1909	514,697
1910	548,551
1911	494,725
1912	543,726

The total consumption of pencils in the United States for the above-quoted years has always exceeded $7,000,000 per annum, and it is therefore evident that the importations from other countries, even before the Payne tariff law, is erroneous. At the present time our exportations of pencils and pencil leads are far larger than our importations, the value of our exports during 1921 having been $2,074,508. The position of our domestic pencil makers, on account of their command of raw materials, is so strong that there should be no protective tariff whatsoever on pencils or pencil leads.

Trusting that you will give the foregoing your careful consideration, we remain,

Yours very truly,

SOUTHERN RED CEDAR CO. (INC.).

Mr. FLETCHER. As I say, I ca- not see any basis for any increase in the duties over existing law, either under paragraph 1449 or under paragraph 1450, as proposed in the bill submitted by the committee or in the amendment which they now offer.

Mr. WALSH of Montana. Mr. President, the House rate upon these commodities was fixed, as I assume, in consideration of the imposition of a duty of 10 per cent on graphite. Seeing that graphite is now on the free list, it was quite appropriate for the Senate committee to reduce the rate on pencils.

Mr. SMOOT. Mr. President, I will say to the Senator that the duty is not reduced on pencils. I do not know whether the Senator was here or not when I made the statement that the present proposition is below the House rate.

Mr. WALSH of Montana. I understand; but it would be appropriate, anyway, to reduce the House rates, because the House rates were unquestionably fixed in view of the duty of 10 per cent upon graphite, which the Senate disagreed to; so a reduction would have to be made.

The situation is briefly this:

Under the existing law these pencils bear a duty of 36 cents a gross, but not less than 25 per cent ad valorem. Under the amendment now proposed the duty is 40 cents a gross, but not less than 45 per cent ad valorem. The specific rate is increased 4 cents a gross and the ad valorem rate is increased 20 per cent. That is to say, the minimum rate under the Underwood law was 25 per cent. The minimum rate now proposed is 45 per cent.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Utah?

Mr. WALSH of Montana. I do.

Mr. SMOOT. The 36 cents a gross provided for in existing law is more than 25 per cent ad valorem. That was simply not less than 25 per cent ad valorem.

Mr. WALSH of Montana. That, I think, is what I stated.

Mr. SMOOT. The 36 cents a gross would be about 40 per cent.

Mr. WALSH of Montana. Whatever it would be, the situation is this: The existing law is 36 cents a gross, but not less than 25 per cent ad valorem.

Mr. SMOOT. Yes.

Mr. WALSH of Montana. It is proposed to change that to 40 cents a gross, but not less than 45 per cent ad valorem.

Mr. SMOOT. Yes. The 40 cents a gross is the one that will count, just the same as the 36 cents a gross. The only change is that it is 36 cents a gross in the existing law and it is 40 cents a gross in this bill.

Mr. WALSH of Montana. Exactly; but it must not be less than 45 per cent ad valorem, no matter what the price is.

Now let us see what justification there is for this.

The change in this respect is rather characteristic of the entire bill. The figures on the production and importation and exportation of this particular commodity have been given. We produce enormous quantities of lead pencils in this country, as is perfectly well known, the principal manufacturer being the Joseph Dixon Co., operating in the State of my esteemed friend the Senator from New Jersey [Mr. FRELINGHUYSEN].

It is a company having a very extensive business not only in the manufacture of lead pencils but along other lines. We have given them the advantage of having their graphite free. Of course the cedar wood is likewise free, so that everything they use in the manufacture of the pencils—clay goes in to a certain extent, too—is absolutely free, and yet we give them a duty of not less than 45 per cent.

Why, Mr. President? Let me read from the report of the Tariff Commission on this subject:

The war has left the American pencil industry in a very favorable condition. Exports for the calendar year 1919 reached a total value of $3,565,347, while imports were valued at only $35,118.

Why, Mr. President, it is perfectly obvious that this duty is intended as an embargo duty so that there shall be no importations whatever. The exports are now over $3,000,000 and the imports in 1919 were $35,118.

I continue:

The exact increase in production since the last census is not known, but has been quite large.

* * * * * * *

The industry has developed mainly since 1890, when the value of products for the first time exceeded $1,000,000. The United States has abundant supplies of graphite suitable for making pencil leads, and is one of the principal sources of pencil cedar. An American-owned Mexican mine furnishes an excellent grade of fine-grained graphite.

And if they can not get enough from Mexico, as disclosed when we considered the subject of graphite, Montana can supply them with unlimited quantities, superior even to the very best Ceylon graphite.

The American manufacturer of pencils is not now suffering serious competition. Germany, regarded as the most serious competitor before the war, is not now in a favorable competitive position. Her stocks of cedar are depleted and new supplies are difficult to secure.

The output has been curtailed on account of the lack of fuel, shorter hours of work, higher wages, and decreased production per hour. White woods are being used and the quality of the product is poor. This situation is no doubt only temporary, but it will be some time before the German pencil makers can fully recover.

* * * * * * *

Japan is beginning the manufacture of pencils, but the quality of the product has not been such as to attract the American trade. Danish pencils of good quality are being imported in small quantities, but their price is equal to the American prices, if not higher. Pencils from L. & C. Hardtmuth, now of the new Republic of Czechoslovakia, are being received in small quantities. They sell on the basis of established quality and reputation and their status would probably not be much affected by changes in the tariff, unless the rates were made prohibitive.

The latest information from Germany leads to the conclusion that it will be a long time before her pencil makers can again offer serious competition. Cedar stocks are depleted and white woods are being used. The cedar is secured from the United States.

Bear in mind, Germany actually imports from the United States the cedar out of which her pencils are made.

German factories are short of fuel, wages have increased, and shorter hours of work prevail, with less production per hour, and the prices have increased from 300 to 600 per cent. Orders are taken only on the basis of prices at the time of shipment.

* * * * * * *

German competition was the most serious prior to the war. At present the best information obtainable from Germany in December, 1919, leads to the conclusion that it will be quite a long time before German pencil makers can recover from the effects of the war. Prices have increased on pencils from 300 to 600 per cent, and orders are taken only on the basis of prices which may prevail at the time of shipment.

The principal causes for the enormous increase in prices for German pencils are given as follows: Stocks of cedar, which come from the United States, are depleted and the necessary import license to obtain new supplies is difficult to secure. The fuel situation has permitted plants to operate only part time. Wages have increased enormously, and hours of work have been reduced to eight a day, with a half day on Saturday, and the output per hour has decreased. Alder and pine are being used in place of cedar, and these make a poorer quality pencil.

In view of that situation, Mr. President, I ask, Where is the justification for an increase in the duty upon this commodity, which everyone must use and which everyone does use?

Mr. SIMMONS. Mr. President, my purpose in rising is to ask to incorporate in the RECORD a letter, dated August 4, upon the subject of pencils, which I have received from the Koh-i-noor Pencil Co., of 34 East Twenty-third Street, New York.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW YORK, *August 4, 1922.*

SENATE FINANCE COMMITTEE,
Washington, D. C.

GENTLEMEN: The Koh-i-noor Pencil Co., a New York corporation, whose place of business is at No. 34 East Twenty-third Street, New York City, and which is now and always has been 100 per cent owned and carried on by native-born American citizens who live in Brooklyn, N. Y., protests against the proposed rates of duty to be levied on lead pencils and pencil leads in the tariff bill now under consideration by the Senate, and respectfully requests your attention to the following:

The Koh-i-noor Pencil Co. is the exclusive importer into the United States of Koh-i-noor lead pencils, leads, etc., which are made by L. & C. Hardtmuth, in Budweis, in the Republic of Czechoslovakia, and deals in no other goods of this description.

The Koh-i-noor pencils are famous for their high quality. They are in general commercial use, are used almost exclusively by the highest classes of technical trades, such as architects, draftsmen, engineers, artists, etc., and extensively in educational fields by high schools, colleges, art schools, etc.

COMPARISON OF UNITED STATES TARIFFS ON LEAD PENCILS.

Payne-Aldrich tariff, 1913 tariff (present): Twenty-five per cent, and 45 cents per gross; 36 cents per gross, but not less than 25 per cent ad valorem.

Present House bill: Twenty-five per cent and 50 cents per gross.

Present Senate bill: Fifty per cent and 50 cents per gross.

(Pencils with rubber tips 25 cents per gross additional; pencils bearing any imprint other than the manufacturer's own imprint, 50 cents per gross additional.)

COMPARISON OF COSTS AND SELLING PRICES OF LEAD PENCILS IN THE UNITED STATES.

Koh-i-noor pencils cost to-day, plus existing duty, $10.07 per gross.

Koh-i-noor pencils will cost under proposed Senate rate, $12.84 per gross.

Note that these are cost, not selling prices, and it includes no overhead.

American-made pencils, such as Dixon's "Eldorado," are selling at $6 per gross.

Eberhard Faber's "Van Dyke," are selling at $6 per gross.

American Pencil Co.'s "Venus" are selling at $6.25 per gross.

Note that these are selling prices, not cost, and are the highest priced American-made pencils.

In the above comparisons the depreciated currency and exchange question is eliminated, and the cost prices set forth above are the cost prices in American dollars laid down in New York at the current rates of exchange, as closely as can be figured.

The cost of Koh-i-noor pencils laid down in the United States under the present existing duty is substantially 60 per cent more than the selling price of the comparable grades of American-made pencils, and this without taking into consideration any profit to the importer. It would seem plain, in the face of such figures, that American manufacturers are now given, under the present tariff, all the protection they should reasonably ask. The Senate bill now under consideration proposes to increase the present tariff rates by more than 100 per cent.

L. & C. Hardtmuth and other foreign pencil manufacturers, before the World War and since, purchased a large portion of their cedar wood and considerable quantities of graphite, varnish, rubber, etc., in the United States. This cedar wood is sawed in slabs about 11 or 12 inches long, 4 inches wide, and one-half inch thick, tied into bundles, and shipped to foreign countries in wooden containers. The export of cedar wood and graphite from the United States to foreign pencil manufacturers has run to about $3,000,000 per year. Foreign manufacturers have made it a practice to purchase these products in the United States because they could sell their pencils in this country and use the proceeds to purchase raw materials, thereby avoiding loss in exchange. Cedar wood can be obtained at substantially the same cost in other countries, but it has been the practice of foreign manufacturers of lead pencils to buy their raw materials, as far as possible, in the countries where they sell their goods. It is obvious that if foreign pencil manufacturers can not sell their goods in the United States they will cease to buy their raw materials here.

From the best figures obtainable by us (accepting the Tariff Commission's figures as far as available) it appears that under present conditions American manufacturers are exporting raw materials for lead pencils valued at about $3,000,000 per year, more than ten times the money value of the imports of all pencils and pencil leads (imports in 1920 were $169,635; in 1921, nine months, $140,543; Tariff Commission figures). In 1920 the exportation of American-made pencils amounted to $3,849,221, which was twenty times the imports of foreign-made leads and lead pencils combined.

In 1914 the American manufacturers' product was valued at $8,328,000 and in 1919 it was valued at $24,134,000 (Tariff Commission figures; data for 1920 not available), or more than one hundred times in money value of all imports of foreign-made lead pencils and pencil leads combined.

The existing tariff rates (Underwood tariff of 1913) on pencils is 36 cents per gross, but not less than 25 per cent ad valorem. All pencils imported by the Koh-i-noor Pencil Co. come under the 25 per cent ad valorem rates. If it is the purpose of Congress to protect against the low-grade, low-cost, foreign-made pencils, why not place a higher specific duty on pencils—for example, $1 per gross, but not less than 25 per cent of invoice value? This would bear heavily on the cheap, low-grade pencils, and Koh-i-noor pencils would pay as much as they pay now. Under such a schedule pencils in foreign markets costing $1, with duty $1, total $2; costing $1.40, with duty $1, total $2.40; costing $2, with duty $1, total $3; Koh-i-noor pencils costing $8 or more, with duty 25 per cent, total $10.07 or more. Venus selling price, $6.25.

If the committee will look at the briefs and testimony of American manufacturers, it will be seen that their whole claim for additional duties is for protection against the cheap German and Japanese pencils, costing (landed) $2 per gross or less. Placing a high specific rate with a minimum of 25 per cent ad valorem will fully accomplish their object in what would seem to be a more satisfactory manner than any so far suggested. This proposed rate on this cheap class of foreign-made goods works out as follows:

THE PROPOSED SENATE RATES.

Pencils costing $1 per gross—specific, 50 cents; ad valorem, 50 cents; total, $2.

Pencils costing $1.40 per gross—specific, 50 cents; ad valorem, 70 cents; total, $2.60.

Pencils costing $2 per gross—specific, 50 cents; ad valorem, $1; total, $3.50.

SENATE RATES ON LEADS FOR PENCILS.

The present rate on all leads—black, indelible, and colored—is 10 per cent, which averages less than 2 cents per gross. The proposed House rate is 15 per cent ad valorem. The proposed Senate rate is 6 cents and 40 per cent ad valorem for leads "not in wood or other material"; small leads (refills), 6 cents and 40 per cent ad valorem; colored, crayon, copy, and indelible leads are to be taxed 60 cents per gross and 40 per cent ad valorem. Why the rates on colored, crayon, copy, and indelible leads has been made so excessive is incomprehensible.

The best grade American-made black "refills" are sold by their manufacturers at about 10 cents per gross; the writer is creditably informed that the cost of their manufacture is approximately 5 cents per gross. The average import value in 1921 of all imported "refills" (Tariff Commission figures) was 19 cents per gross, which, it is understood, includes colored, crayon, copy, and indelible refill leads. The claim for increased protection is made by American manufacturers for colored, crayon, copy, and indelible leads on the ground of increased cost of clay and dyes, both of which form an almost negligible part of their cost. Such claim is wholly without merit or justification.

In view of the foregoing, may this pencil tariff have your careful consideration?

Respectfully submitted.

KOH-I-NOOR PENCIL CO.,
By SAMUEL S. WATSON.

Mr. SIMMONS. It appears from this letter that this particular company imports all the Koh-i-noor pencils, made in Czechoslovakia, that come here, and that that pencil sells for a considerably higher price than any pencil which is produced in the United States.

This Koh-i-noor pencil constitutes a large part of our importations of pencils at this time. The entire importations of pencils were only 75,000 gross, in round numbers, for 1920 and 64,000 gross for nine months of 1921; and this pencil, manufactured in Czechoslovakia, constitutes the bulk of those importations. The landed cost plus the present duty is $10.07 a gross. No American pencil at all comparable with this pencil is sold in the domestic markets, even with the profits of the producer added, for more than $6.25 a gross, according to this letter, so that there could not be possibly any competition with this pencil by any pencil produced in America at this particular time.

There are some cheap pencils imported into the United States, but the quantity is very small as compared with the importations of this high-priced pencil, and the importations are absolutely negligible as compared with the home production, which in 1919 amounted to more than $24,000,000 in value.

This letter which I offer also discloses the fact that the raw materials out of which these Czechoslovakian pencils are made is purchased almost wholly in the United States. The cedar, the graphite, and the lead out of which these pencils are made are imported by Czechoslovakia from the United States. The raw materials sold by America to competing countries to be used in the manufacture of pencils amounts annually to about $3,000,000, and the American exportations of pencils themselves amount in value to about $3,850,000 more. So, Mr. President, in this pencil business we find a market in Europe for $3,000,000 worth of our forest and our mine products, and we find a market to the extent of $3,850,000 in the balance of the world for pencils which we manufacture here.

Against that, we had an importation into the United States in the nine months of 1921 of 63,875 gross of lead pencils and of only 641 gross of slate pencils of a total value of only $141,225. In other words, out of this pencil business we have a foreign trade of $6,850,000 in exports of pencils and exports of raw materials out of which pencils are manufactured abroad, while the total importations of pencils into the United States amount to only $141,225, and the great bulk of those importations are of pencils which sell for $10 a gross, not competing with us at all, because we make no pencil in America which commands on the markets of the United States a price of more than $6.25 a gross. In the name of common sense and of mere sanity, what have we to complain of on this score, and why should we wish to interfere with this run of business, all of which is manifestly to our advantage?

If there ever was a case in which there was no justification for high duties, it is this case. Nevertheless, I know the majority are determined to impose a prohibitive duty upon these imported pencils. The manufacturers of the pencils which sell for $6.25 a gross are determined that the $10 a gross pencils shall not be sold in the United States, not that the imported pencils come in competition with their product in price, not that they undersell them and undermine their business, but that they to some extent displace the $6.25 pencils, and these home manufacturers are resolved that the American public shall buy only what the home manufacturers choose that the public shall buy and that only at the price fixed by the will of the manufacturers themselves.

The pencils which come in here are chiefly the high-priced pencils, which are used for special purposes, used by artists, architects, engineers, and draftsmen. They are better than any pencil manufactured in the United States. They are necessary and are preferred for these special uses. They bring a higher price and do not undersell our American products. Yet these home gentlemen ask for further "protection," and the majority are evidently bent upon yielding to their demands.

Mr. SMOOT. Mr. President, the average price of pencils shipped into the United States for the month of May, 1922, was 55 cents a gross.

Mr. SIMMONS. Mr. President, that means nothing. Of course, that may have been the average price. Many of the pencils shipped in brought a very much lower price than that, but the pencil to which I referred, the Koh-i-noor, manufactured in Czechoslovakia, sells in this market, and the gentleman who wrote me this letter, who handles the pencils in this country, states that it costs them, landed here, including the duty, $10.07 per gross. While the cheaper pencils may bring the average down, I have no doubt the statements in this letter are true.

The committee has made substantial reductions, I admit. The rates they first proposed were perfectly outrageous. They were not justified from any standpoint whatsoever. The present rates are very much nearer the rates of the existing law, and the rates of the existing law have been practically prohibitive. Very few pencils of the lower price, which would enter into competition with the American pencils, have been imported.

Mr. President, I am ready for a vote.

Mr. WALSH of Montana. If it is in order, I move to amend the amendment offered by the committee by substituting 36 cents for 40 cents, and 25 per cent for 45 per cent, and on that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. UNDERWOOD. As I understand, we are voting on the two amendments together, by unanimous consent?

Mr. CALDER. Let the amendment be reported again.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. In the amendment proposed by the committee on page 202, the Senator from Montana proposes to strike out "40" in the first paragraph of the amendment and to insert in lieu thereof "36," so that it will read "36 cents per gross." Then the amendment reads "but not less than 45 per cent ad valorem." The Senator from Montana also proposes to strike out "45" and to insert in lieu thereof "25."

Mr. UNDERWOOD. Are we voting on both amendments together?

The PRESIDENT pro tempore. The Chair understands that it was so agreed. The yeas and nays having been ordered, the Secretary will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as before of my pair and its transfer, I vote "yea."

Mr. HALE (when his name was called). I transfer my pair with the senior Senator from Tennessee [Mr. SHIELDS] to the junior Senator from Maryland [Mr. WELLER] and vote "nay."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea." I am not advised as to how my colleague would vote if present.

Mr. TRAMMELL. I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

The roll call was concluded.

Mr. ERNST. I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Michigan [Mr. NEWBERRY] and vote "nay."

Mr. DILLINGHAM. I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, I transfer that pair to the junior Senator from Delaware [Mr. DU PONT] and vote "nay."

Mr. ROBINSON (after having voted in the affirmative). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Rhode Island [Mr. GERRY] and allow my vote to stand.

Mr. CURTIS. I wish to announce the following general pairs:

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 22, nays 33, as follows:

YEAS—22.

Ashurst	Kellogg	Ransdell	Swanson

So the amendment of Mr. WALSH of Montana to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. Paragraph 1450, pencil leads not in wood or other material——

Mr. MCCUMBER. Mr. President, it is the desire of the committee to change that paragraph very materially. I move to strike out all of the matter after the semicolon in line 9,

page 202, down to and including line 14, the end of the paragraph, and to insert in lieu thereof the following:

Leads, commonly known as refills, black, colored, or indelible, not exceeding six one-hundredths of 1 inch in diameter and not exceeding 2 inches in length, 10 cents per gross, and longer leads shall pay in proportion in addition thereto; colored or crayon leads, copy or indelible leads, not specially provided for, 40 per cent ad valorem.

The PRESIDENT pro tempore. The amendment proposed by the Senator from North Dakota will be stated.

The ASSISTANT SECRETARY. On page 202, in paragraph 1450, after the semicolon in line 9, strike out the remainder of the paragraph as heretofore proposed to be amended and insert:

Leads, commonly known as refills, black, colored, or indelible, not exceeding six one-hundredths of 1 inch in diameter and not exceeding 2 inches in length, 10 cents per gross, and longer leads shall pay in proportion in addition thereto; colored or crayon leads, copy or indelible leads, not specially provided for, 40 per cent ad valorem.

Mr. WALSH of Montana. Does the Senator think the language "longer leads shall pay in proportion in addition thereto" is perfectly clear?

Mr. McCUMBER. Yes. They come in usually in the sizes of 2 inches, or about that. If they are brought here in sizes of 6 inches, as they can be brought in that way, and cut into three parts, so that each one would be 2 inches, the Senator will see that they could be bringing the leads here in that form at only one-third the rate. It is the purpose of the amendment to prevent that.

Mr. WALSH of Montana. Can the Senator tell us what the ad valorem equivalent of the proposed rate is?

Mr. McCUMBER. Pencil leads not in wood or other material, 6 cents per gross, would be equivalent to about 30 per cent. The larger, of course, would be 40 per cent.

Mr. WALSH of Montana. I understood the Senator to state that the amendment would be 10 cents per gross.

Mr. McCUMBER. That is on the refills.

Mr. WALSH of Montana. I do not understand the Senator.

Mr. McCUMBER. If I understand the inquiry, we are speaking about refills, where we have the 40 per cent. "Pencil leads, 6 cents a gross," is equivalent to about 30 per cent, as I am informed. As to the refills, we have no statistics.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment will be stated.

The ASSISTANT SECRETARY. Paragraph 1451, photographic cameras and parts thereof.

Mr. UNDERWOOD. Mr. President, one of my colleagues on this side of the Chamber asked to be advised when this paragraph was reached, if he were not present. He is not in the Chamber, and I therefore suggest the absence of a quorum so that he may have an opportunity to be here.

The PRESIDENT pro tempore. The Senator from Alabama suggests the absence of a quorum. The Secretary will call the roll.

The Assistant Secretary called the roll, and the following Senators answered to their names:

Ashurst	Frelinghuysen	Moses	Smith
Borah	Gooding	New	Smoot
Brandegee	Hale	Nicholson	Stanfield
Broussard	Heflin	Norbeck	Stanley
Bursum	Jones, Wash.	Oddie	Sterling
Calder	Kellogg	Overman	Swanson
Cameron	Kendrick	Phipps	Trammell
Capper	Keyes	Pomerene	Underwood
Cummins	Lenroot	Ransdell	Wadsworth
Curtis	Lodge	Rawson	Walsh, Mont.
Dial	McCormick	Reed	Warren
Dillingham	McCumber	Robinson	Watson, Ind.
Edge	McKellar	Sheppard	
Ernst	McLean	Shortridge	
Fletcher	McNary	Simmons	

The PRESIDENT pro tempore. Fifty-seven Senators have answered to their names. A quorum is present. The question is upon agreeing to the committee amendment.

Mr. REED. Let the amendment be reported.

The PRESIDENT pro tempore. The Secretary will report the first amendment to paragraph 1451.

The ASSISTANT SECRETARY. On page 202, paragraph 1451, line 16, before the words "per centum," it is proposed to strike out the numeral "30" and to insert the numeral "20," so as to read:

PAR. 1451. Photographic cameras and parts thereof, not specially provided for, 20 per cent ad valorem——

Mr. REED. Mr. President, I ask that the entire paragraph 1451 be allowed to go over until to-morrow. There have been some important changes made in it. It has been the subject of a great deal of controversy. A statement has just been made to me in the last few minutes in regard to the matter which may entirely change my notions and course of action as to the paragraph, but I shall have to look into the matter further. I can do that between now and to-morrow morning. It may be that there will be no controversy in regard to it in the morning, so far as I am concerned. Of course, I can not speak for others. If the question may be postponed until to-morrow morning I shall be ready at that time to go on, one way or the other.

Mr. McCUMBER. Mr. President, the great difficulty in now postponing anything in the bill is that we are working under a unanimous-consent agreement which contemplates that we shall immediately proceed and dispose of the respective amendments as we come to them. I am fearful if we put off until to-morrow any subject which may require any lengthy debate, at least, it will considerably overload the work of to-morrow as laid out by the unanimous-consent agreement.

Mr. REED. We may proceed with the other amendments. I think it will save time.

Mr. McCUMBER. Let me suggest to the Senator, suppose we pass it over temporarily, and possibly by the time we get to the free list or before we get through with it this afternoon the Senator may have the information which he desires.

Mr. REED. I am afraid I can not obtain the information I desire until to-morrow morning.

Mr. McCUMBER. I shall try to accommodate the Senator, if it is possible, in some way, if he will let it pass over now.

Mr. REED. Very well.

Mr. McCUMBER. Mr. President, I hope the Senator from Missouri will not object to striking out on page 202, line 20, the word "one-half" and inserting in lieu thereof "four-tenths." Does he object to that?

Mr. REED. That is the very matter which may be in issue. I am not certain that that will be satisfactory, and I wish to find out about it.

Mr. McCUMBER. Does the Senator object to striking out "30" and inserting in lieu thereof "20," on line 16?

Mr. REED. I will frankly say to the Senator this subject was called to my attention some weeks ago, and in looking up my memoranda and papers in regard to it I have not been able to lay my hands on them. It may make it necessary for me to get some information outside in reference to the matter.

Mr. McCUMBER. I will ask that paragraph 1451 may be temporarily passed over, and we shall bring it up at some future time.

Mr. REED. Very well.

The PRESIDENT pro tempore. Is there objection? The Chair hears none. The Secretary will state the first amendment in paragraph 1452.

The next amendment of the Committee on Finance was, on page 204, paragraph 1452, line 1, after the word "holders," to insert "not specially provided for," so as to read:

PAR. 1452. Pipes and smokers' articles: Common tobacco pipes and pipe bowls made wholly of clay, valued at not more than 40 cents per gross, 15 cents per gross; valued at more than 40 cents per gross, 45 per cent ad valorem; pipe bowls commercially known as stummels; pipes, cigar and cigarette holders, not specially provided for—

The amendment was agreed to:

The next amendment of the Committee on Finance was, on page 204, line 12, before the words "per cent," to strike out the numeral "45" and to insert in lieu thereof the numeral "60," so as to read:

and mouthpieces for pipes, cigar and cigarette holders, all the foregoing of whatever material composed, and in whatever condition of manufacture, whether wholly or partly finished, or whether bored or unbored; pouches for chewing or smoking tobacco, cases suitable for pipes, cigar and cigarette holders, finished or partly finished; cigarette books, cigarette-book covers, cigarette paper in all forms, except cork paper; and all smokers' articles whatsoever, and parts thereof, finished or unfinished, not specially provided for, of whatever material composed, except china, porcelain, parian, bisque, earthen or stone ware, 60 per cent.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SIMMONS. Mr. President, I desire to ask a question in reference to the amendment action upon which was taken after I tried to get the attention of the Chair. Has the Chair announced the adoption of the amendment on page 204, in line 12?

The PRESIDENT pro tempore. The amendment which was just adopted is found in line 12, on page 204.

Mr. SIMMONS. If the amendment has been acted on, of course, I am too late, but I was trying to get on my feet when the vote was being taken.

Mr. McCUMBER. I ask that the vote by which the amendment was agreed to may be reconsidered.

The PRESIDENT pro tempore. Without objection, the vote whereby the amendment was agreed to is reconsidered.

Mr. SIMMONS. I do not wish to make any trouble with reference to the amendment or to enter into any discussion about it, but I should like very much to have the Senator from North Dakota in charge of the bill tell the Senate why he thinks it is necessary to increase the 45 per cent rate to 60 per cent in this case. That seems like a very high rate compared with the other rates which are carried in the paragraph.

Mr. McCUMBER. I will explain the amendment, Mr. President, if Senators will give me the opportunity to do so.

Mr President, we have provided a 60 per cent ad valorem rate of duty, while the other House provided a 45 per cent rate upon the American valuation. I think that that would be greater than 60 per cent under the foreign-valuation plan, but I will direct my attention simply to whether or not a 60 per cent rate is required based upon foreign valuation. My understanding is that there has been very little change in the price of these particular articles, as indicated by the Reynolds report, which was, of course, made in August, 1921; but we will take a few of these articles. To equalize the difference between the French cost and the American selling price in the case of briar pipes would require a duty of about 67 per cent. On cigarette holders from Austria it would require, according to the Reynolds report, 104 per cent to equalize the difference between the foreign selling price and the American selling price. On tobacco pouches of leather made in England it would require 86 per cent to equalize the difference between the English selling price and the American selling price. On pipe cases from Austria it would require a little over 200 per cent to equalize the difference between the selling price in Austria and the selling price in the United States. On cigarette-paper books from Austria it would require over 200 per cent; on cigarette-paper books from Turkey it would require 193 per cent; on cigarette paper in bobbins from Turkey it would require 42 per cent; on cigarette cases from Germany it would require 190 per cent.

In considering those figures we have allowed a profit running from 10 per cent up to 33⅓ per cent, so that it will be observed that the duty which we have provided here, taking it as an average, is not much over half of that which it is indicated by the Reynolds report would be necessary.

I further call attention to the fact that, while we have given 60 per cent, the rate in the Underwood bill is 50 per cent as to a part of these articles and 60 per cent on the others. So there is very little difference.

Mr. SIMMONS. Mr. President, as I understand the Senator, then, this rate is fixed with a view to bringing up the foreign price of the article imported in this country to a level with the domestic selling price? It has no reference to the cost of production abroad and here; just the selling price?

Mr. McCUMBER. No, Mr. President; we have not the actual cost of production in the foreign country or the actual cost of production of these articles in this country. All I can say in reference to that is that it is the general expert testimony that the selling price in the foreign country and the selling price in this country as a rule measure about the same profit as compared with the cost of production, and therefore we are getting very close to the comparative relation between the cost of production in this country and the foreign countries and the selling price in this country and the foreign countries. I do not claim that it is always exactly accurate.

Mr. SIMMONS. Mr. President, I asked this question of the Senator because I apprehended that in this particular case certainly they had measured the rate by the difference in the selling price, and not the difference in the cost of production.

The Senator says there is very little, if any, difference between the difference in the cost of production and the difference in the selling price. Why, Mr. President, at the beginning of these debates, when we offered evidence here to the general effect that the products of Germany were being imported into this country at invoice prices that were very much higher than the invoice prices of the same products before the war, we were told that the prices at which they were invoiced and sold in this market were in many instances and in most instances enormously in excess of the cost at which they were produced and the price at which they were sold in the domestic market. Various reasons were given for this difference, but there was no attempt to controvert the fact, as claimed by us and as testified by the experts, that ever since the close of the war, ever since the resumption of trade between this country and Germany, the German products against which there is complaint on the part of the manufacturers have been sold at the ports of entry before the duty was added at prices that very much exceeded the prices at which similar articles from that country were sold at the ports of entry before the war. There was, however, no contention on the part of the experts, there was no contention on the part of anybody on the committee, that the prices at which these German products were invoiced to this country represented the cost of production of the products in the German factory or represented the price at which those products were sold in the German market. Now, the Senator says there is no difference, or substantially none, between the foreign selling price at the port of entry and the cost of production of that product in the country of origin.

Mr. McCUMBER. Mr. President, I hope the Senator will not say that I claim that there is no difference between the cost of production and the selling price at the port of entry.

Mr. SIMMONS. The Senator said that in many cases and in most cases that was the fact.

Mr. McCUMBER. I stated—and let me state it again—that the cost of production and the selling price of a product in a foreign country and the cost of production and the selling price of a product in this country would bear about the same relation, and therefore if we got the selling price of a product in a foreign country and we found that as a rule that selling price represented a 25 per cent advance over the cost of production we could simply deduct the 25 per cent from the selling price and arrive in that way at the probable cost of production, and we could take the same article here, though it sold for twice as much, and if we ascertained that the selling price included a profit of about 25 per cent we would deduct that and we would still have the same relation between the selling prices of the two articles in the two countries that we should have between the costs of production of the two articles in the two countries.

That is all I desired to state.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

The next amendment was, on page 204, line 13, to strike out "ad valorem" and insert "ad valorem; meerschaum, crude or unmanufactured, 20 per cent ad valorem."

The amendment was agreed to.

The next amendment was, on page 204, to strike out lines 15 to 18, both inclusive, in the following words:

PAR. 1453. Plush, black, known commercially as hatters' plush, composed of silk, or of silk and cotton, of the qualities and width used generally in the making of men's hats, 10 per cent ad valorem.

Mr. ROBINSON. Mr. President, I inquire of the Senator from North Dakota the effect of that amendment, if agreed to. What will be the duty upon the commodities described in paragraph 1453 if this amendment prevails?

Mr. McCUMBER. It will appear in a different paragraph. I should have to see just where it is. It is in the silk paragraph. I should have to take some little time to find it. We already have done it in the silk paragraph, so this is a mere matter of striking out this item to correspond with that action.

Mr. ROBINSON. Yes; but what will be the duty imposed upon these commodities under the paragraph to which it has been assigned? If the Senator can not state it at this moment he might take a few minutes to look it up. I should like to have the information definitely.

Mr. McCUMBER. I can not find it just now, but I will in a short time.

Mr. ROBINSON. Just let it be passed over for the time.

The PRESIDENT pro tempore. By unanimous consent the paragraph is passed over temporarily.

Mr. McCUMBER. Mr. President, it will be found in paragraph 1206, on page 161:

Plushes, including such as are commercially known as hatters' plush, cut or uncut, composed wholly or in chief value of silk, weighing not less than 9½ ounces per square yard, $1 per pound.

I should have to find out just what the ad valorem duty would be equivalent to. Ordinarily, raw silk itself runs to about $7 per pound.

Mr. ROBINSON. It would probably be an increased duty?

Mr. McCUMBER. I think it would be more than 10 per cent.

Mr. ROBINSON. Perhaps the Senator from Connecticut [Mr. McLEAN] can state.

Mr. McLEAN. I think we cut out of that paragraph the specific duties and put these products under an ad valorem duty. My impression is that it would be considerably higher. I do not remember just what the duty would be. They had been in the habit of importing this hatters' plush under a very low rate, and it was assumed that it would be used for making plush for gentlemen's hats. It is used for all sorts of purposes.

Mr. ROBINSON. I will request the Senator from Connecticut, while we proceed with another paragraph, to look up the

matter and ascertain what that duty will be, and in the meantime let the paragraph be passed over. I should like to have definite information on it.

The PRESIDENT pro tempore. It has been passed over.

Mr. POMERENE. Mr. President, I have here a brief editorial from a Republican protection paper, the Ohio State Journal, printed in Columbus, Ohio, under date of Saturday, August 12, 1922, on the subject of "Raising the sugar bill." I ask unanimous consent to have it incorporated in the RECORD without reading.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it will be printed as requested.

The matter referred to is as follows:

[From the Ohio State Journal of Saturday, August 12, 1922.]

RAISING THE SUGAR BILL.

The Senate has fixed the duty on sugar in the imminent tariff law at 2.3 cents a pound. Under the emergency tariff law now in force the rate is 2 cents, and that is an increase of three-fourths of a cent over the rate fixed by the Underwood tariff law. The 2.3-cent duty is said to be the highest tax on sugar in the Nation's entire tariff history. It will force the people to pay about $25,000,000 more a year for their sugar than they pay now, and they already pay $100,000,000 a year for the satisfaction of knowing that the industry is protected against foreign competition.

Almost every citizen of the United States consumes a considerable quantity of sugar and a few of them are financially interested in its manufacture. For the benefit of these latter alone this high duty has been fixed, the interest of the former being ignored entirely, as it has been also for the benefit of the manufacturers of woolen and cotton goods and many other necessary commodities. The people seem to be thinking more about these things than they used to. All the old, high-sounding arguments about the protection of industry under the American flag, national prosperity, and the American standard of living will be trotted out in support of a tariff bill which lays burdensome taxes upon the many to enrich the few, but we note many signs that it is going to be harder to put them across, as the phrase is, this time than ever it was before.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

The next amendment was, in paragraph 1454, page 204, line 19, after the word "carafes," to insert "jars."

The amendment was agreed to.

The next amendment was, on line 20, after the word "containers," to insert "or blanks and pistons of such articles."

The amendment was agreed to.

The next amendment was, on line 22, after the word "vacuous," to strike out "insulating" and insert "insulation."

The amendment was agreed to.

The next amendment was, on line 23, after the word "whether," to strike out "imported" and insert "imported, finished or unfinished," so as to read:

All thermostatic bottles, carafes, jars, jugs, and other thermostatic containers, or blanks and pistons of such articles, of whatever material composed, constructed with a vacuous or partially vacuous insulation space to maintain the temperature of the contents, whether imported, finished or unfinished, with or without a jacket or casing of metal or other material, shall pay the following rates of duty, namely:

The amendment was agreed to.

The next amendment was, on page 205, line 2, after the word "less," to strike out "10" and insert "20," so as to read:

Having a capacity of one pint or less, 20 cents each.

Mr. ROBINSON. Mr. President, this amendment and that in lines 3, 4, and 5 are so closely related that I think one may very well be discussed in conjunction with the others. For my part, I do not desire to take very much time respecting them; but I wish to ask the Senator from North Dakota what is the reason for the imposition of both a specific and an ad valorem duty in connection with these commodities? I find that the rates under the Payne-Aldrich tariff law are both specific and ad valorem, but I am not apprised as to the reason for imposing both classes of rates.

Mr. McLEAN. Mr. President, if the Senator from North Dakota will pardon me, I will say to the Senator from Arkansas that the experts, in their survey of this particular article, have been provided with many instances of importations. I do not know whether or not the Senator has looked at the Reynolds report, on page 269. If he has, he will find that a comparable article made in Germany, for instance, for 14 cents, costs 81 cents in this country, and a 20-cent thermos bottle made in Germany costs the same price—81 cents—in this country. A 32-cent one-pint thermos bottle costs $1.20 in this country. That is the American selling price, and allows a 15 or 20 per cent profit. The Senator will see that there is a long list of 15 or 20 different varieties of these thermos bottles, and if the industry is to be protected at all, the rates must be as high as those recommended by the committee. In fact, I doubt whether the rates recommended by the committee will be sufficient, because in many instances the foreign costs will warrant rates much above those.

Mr. ROBINSON. That does not give the information I called for. At least, it does not give it to my satisfaction. My question was as to why both a specific and an ad valorem rate are imposed.

Mr. McLEAN. That was necessary on the cheaper variety. We had to have a compound duty on the cheaper varieties, and it runs pretty high; but the foreign products, both from Japan and Germany, are inferior in quality and can be purchased very cheaply at some stores. At others about the same price was exacted as was charged for the American article.

Mr. ROBINSON. What will be the equivalent ad valorem rate if the Senate Finance Committee amendments are adopted?

Mr. McCUMBER. I can give that, Mr. President, and in connection with it I will give the equivalent ad valorem rate necessary to equalize the difference. We find from the Reynolds report, after allowing 25 per cent gross profit, the following rates necessary to equalize the difference, namely: On pint vacuum or thermos bottles from Germany it would require 300 per cent to equalize. The Senate committee rate is 50 per cent, and plus the 20 cents it is equivalent to 139 per cent.

On the quarts it would require 300 per cent. The Senate committee rate would be equivalent to 130 per cent.

On the pints from Japan it would require 154 per cent. The Senate committee rate would be equivalent to 89 per cent.

On the quarts from Japan it would require 67 per cent to equalize, and the Senate committee rate to equalize in that instance is 83 per cent.

Mr. ROBINSON. The Senator from North Dakota is frequently referring to the rates which would be required "to equalize." To equalize what? The costs of production?

Mr. McCUMBER. No; to equalize the selling price of the foreign article; that is, the import price and the selling price of the comparable American article. I must say, however, that I do not think the Japanese article can be regarded as comparable, as it is a very cheap article and does not last.

Mr. ROBINSON. But the selling price has no definite relation to the actual cost of production. Has the Senator gone into the question to determine whether or not these selling prices, both of the foreign article and of the domestic article, have any substantial relationship to a fair profit or an excessive profit? Has he gone into that?

Mr. McCUMBER. No more than to state that in making our computation of the requirement we have allowed a 25 per cent profit on all the importations, and then all of the added costs of landing, and so forth, and we find that it will require these sums in order to equalize and compare with the American selling price. We have not ascertained the actual cost of production abroad or the actual cost of production in this country. We had to content ourselves with what we could find, and that was the selling price.

Mr. ROBINSON. Very well, Mr. President. I submit the following amendment: I move, on line 3, to strike out "40" and to insert "25"; on line 4, to strike out "50" and to insert "35"; on line 5, to strike out "60" and to insert "45." I think the amendments may be voted on at one time.

The PRESIDENT pro tempore. Without objection, the proposed amendments will be voted on at the same time.

Mr. McCUMBER. I think it proper to put into the RECORD at this time the report of the Reynolds commission, showing that in the case of pint thermostatic and vacuum bottles the unit of value in Germany is 22 cents and 4 mills; in this country it is $1.29. In quarts in Germany it is 49.9 cents; in the United States $2.89. In pints, by the dozen, $6.15 in Japan and $20.25 in the United States. In quarts, per dozen, in Japan it was $14.44 and in the United States, per dozen, it was $32.40.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Arkansas to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the committee. Does the committee desire to have the three amendments voted upon at the same time?

Mr. McCUMBER. I ask that that be done.

Mr. ROBINSON. I have no objection to taking the vote upon the three amendments I have attempted to amend.

The PRESIDENT pro tempore. The amendment on line 2 is first to be acted upon.

The ASSISTANT SECRETARY. On line 2 the committee proposes to strike out "10" and to insert "20."

The amendment was agreed to.

The PRESIDENT pro tempore. The question now is upon the three committee amendments, including line 5, to be treated as one amendment, which the Secretary will state.

The ASSISTANT SECRETARY. On page 203, line 3, to strike out "20" and to insert "40"; on line 4 to strike out "30" and to insert "50"; on line 5 to strike out "35" and to insert "60," so as to read:

Having a capacity of 1 pint or less, 20 cents each; having a capacity of more than 1 pint, 40 cents each; and in addition thereto, on all of the foregoing, 50 per cent ad valorem; parts of any of the foregoing not including those above mentioned, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 205, line 8, after the word "maker," to insert the words "or purchaser"; and on line 15, after the word "maker," to insert the words "or purchaser," so as to read:

Provided, That all articles specified in this paragraph when imported shall have the name of the maker or purchaser and beneath the same the name of the country of origin legibly, indelibly, and conspicuously etched with acid on the glass part and die stamped on the jacket or casing of metal or other material in a place that shall not be covered thereafter: *Provided further*, That each label, wrapper, box, or carton in which any of the foregoing are wrapped or packed, when imported, shall have the name of the maker or purchaser and beneath the same the name of the country of origin legibly, indelibly, and conspicuously stamped or printed thereon.

The amendment was agreed to.

The next amendment was, in paragraph 1455, page 205, line 20, to strike out the words "and walking canes, 35," and to insert "50," so as to read:

Umbrellas, parasols, and sunshades covered with material other than paper or lace, not embroidered or appliquéd, 50 per cent ad valorem.

Mr. ROBINSON. Mr. President, this paragraph is of considerable importance. The prevailing rates under the Underwood Act, as I recall them, are 35 per cent and 30 per cent, respectively, instead of 50 per cent and 40 per cent, as proposed by the Finance Committee. The importations and production of the commodities embraced within this paragraph throw some light, in my opinion, upon the merits of the proposed committee rates. I do not believe they are justified.

The United States is now doing a comparatively large business in the exportation of these commodities, the exports having increased since 1914 considerably more than ten times. The exports of umbrellas and parasols were valued at $29,903 in 1914. They are shipped principally to Cuba, Spain, Mexico, Brazil, England, Canada, and Australia. The exports in 1918 were more than a half a million dollars. In 1919 they were almost $700,000. In 1920 they were approximately three-quarters of a million dollars, and in the first nine months of 1921 they appear to have dropped to $220,466.

An examination of the importations of these commodities does not disclose any necessity, in my opinion, even from the standpoint of those who favor protection, for an increase in the rates already levied on these articles. For these reasons I propose to offer an amendment to the committee rates, as follows: In line 20, to strike out "50" and to insert "35."

Mr. McCUMBER. If the Senator will make that "40," I will agree to it.

Mr. ROBINSON. I believe I will do that. I move to strike out "50" and insert in lieu thereof "40."

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from Arkansas to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, in line 21, before the word "sunshades," to strike out the word "or"; after the word "sunshades" and the comma to insert the words "and walking canes," on line 21; on line 22, to strike out "30" and insert in lieu thereof "40," so as to read:

PAR. 1455. Umbrellas, parasols, and sunshades covered with material other than paper or lace, not embroidered or appliquéd, 40 per cent ad valorem; handles and sticks for umbrellas, parasols, sunshades, and walking canes, finished or unfinished, 40 per cent ad valorem.

Mr. ROBINSON. I move to amend by striking out "40" and inserting "30."

The PRESIDENT pro tempore. That would be equivalent to disagreeing to the committee amendment.

Mr. ROBINSON. I understand that, but I prefer to offer this amendment for a number of reasons. I thought perhaps the Senator from North Dakota might pursue the same course he did in connection with the amendment just agreed to.

Mr. McCUMBER. There is a little difference in the case of those handles and in the completed umbrellas. There is a considerable quantity coming in from Japan. The Reynolds report shows that, after allowing 33⅓ per cent gross profits on umbrella handles from Japan, the principal source of import, it would require 98 per cent ad valorem to equalize the American selling price of the comparable article, and we have fixed the rate at less than one-half of that, namely, 40 per cent, and I was willing to have both go in at 40 per cent.

Mr. ROBINSON. I will modify my original proposal. I move to amend the amendment, on line 22, by striking out "40" and inserting "35."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Arkansas to the committee amendment.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 205, line 23, to strike out the colon and the proviso, as follows:

Provided, That no article provided for in this paragraph shall pay a less rate of duty than the rate provided for the component material of chief value.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment.

The ASSISTANT SECRETARY. On page 206, line 3, the committee proposes to strike out "15" and insert "25," so as to read:

PAR. 1457. White bleached beeswax, 25 per cent ad valorem.

Mr. ROBINSON. Mr. President, under the law now prevailing this article is on the free list. The House imposed a rate of 15 per cent ad valorem. The Finance Committee seeks to amend that by increasing the rate to 25 per cent ad valorem. I should like to have an explanation from the chairman of the committee as to the justification for the proposed committee rate.

Mr. McCUMBER. Mr. President, I shall be glad to give it. The investigation which we gave to it indicated that there was very little difference between the price in August, 1921, and the present price. As to beeswax, pure white, and that means the bleached, which is provided for in paragraph 1457, we found that after allowing 12 per cent gross profits under the Reynolds report the beeswax imported from Belgium would require 53 per cent ad valorem to equalize it with the selling price of the same kind or comparable article in the United States. Beeswax, pure white, imported from France requires 20 per cent. The rate which we adopted would be 5 per cent higher than that required to equalize the French product, but it would be less than half of that which would be required to equalize the Belgian product. The committee thought they could not give a lower rate than 25 per cent ad valorem under those conditions.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 206, line 13, after the word "be," to strike out "applied," and to insert "applied", and on page 207, line 11, after the word "rates," to strike out ", but this provision shall not apply to articles on the free list"; so as to make the paragraph read:

PAR. 1459. That each and every imported article, not enumerated in this act, which is similar, either in material, quality, texture, or the use to which it may be applied to any article enumerated in this act as chargeable with duty, shall pay the same rate of duty which is levied on the enumerated article which it most resembles in any of the particulars before mentioned; and if any nonenumerated article equally resembles two or more enumerated articles on which different rates of duty are chargeable, there shall be levied on such nonenumerated article the same rate of duty as is chargeable on the article which it resembles paying the highest rate of duty; and on articles not enumerated, manufactured of two or more materials, the duty shall be assessed at the highest rate at which the same would be chargeable if composed wholly of the component material thereof of chief value; and the words "component material of chief value," wherever used in this act, shall be held to mean that component material which shall exceed in value any other single component material of the article; and the value of each component material shall be determined by the ascertained value of such material in its condition as found in the article. If two or more rates of duty shall be applicable to any imported article, it shall pay duty at the highest of such rates.

The amendment was agreed to.

The next amendment was, under "Title II, Free List," on page 208, line 5, after the word "jalap," to strike out "manna," and to insert "manna;", and in line 6, after the word "and," to strike out "flowers," and to insert flowers;", so as to read:

PAR. 1502. Aconite, aloes, asafetida, cocculus indicus, ipecac, jalap, manna; marshmallow or althea root, leaves, and flowers; maté, and pyrethrum or insect flowers, all the foregoing which are natural and uncompounded and are in a crude state, not advanced in value or condition by shredding, grinding, chipping, crushing, or any other process or treatment whatever beyond that essential to proper packing and the prevention of decay or deterioration pending manufacture.

The amendment was agreed to.

The next amendment of the committee was, on page 208, line 17, after the word "mowers," to insert "(except lawn mowers)."

The amendment was agreed to.

The next amendment was, on page 208, in line 19, after the words "wagons and carts" and the comma, to insert "cen-

trifugal cream separators operable by hand power" and a comma.

Mr. McCUMBER. That was afterwards changed, and we put a duty of 25 per cent on centrifugal cream separators in paragraph 372, which has already been agreed to. Therefore, it will be necessary to disagree to the committee amendment just reported.

Mr. SIMMONS. Mr. President, I wish to ask the Senator with reference to the disagreement to the amendment. Did I correctly understand him to say that the article had been put upon the dutiable list?

Mr. McCUMBER. It has been voted in by the Senate in paragraph 372 as amended.

Mr. SIMMONS. And for that reason the Senator asks that the pending amendment be disagreed to?

Mr. McCUMBER. Yes.

Mr. SIMMONS. Will the Senator advise me what duty was placed upon cream separators?

Mr. McCUMBER. The duty was 25 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The PRESIDENT pro tempore. The Secretary will report the next amendment.

The ASSISTANT SECRETARY. On page 208, lines 21 and 22, strike out the words "whether specifically mentioned herein or not" and the comma and insert the words "not specially provided for," so as to read:

PAR. 1504. Agricultural implements: Plows, tooth or disk harrows, headers, harvesters, reapers, agricultural drills and planters, mowers (except lawn mowers), horserakes, cultivators, thrashing machines, cotton gins, machinery for use in the manufacture of sugar, wagons and carts, and all other agricultural implements of any kind or description, not specially provided for, whether in whole or in parts, including repair parts.

The amendment was agreed to.

The next amendment was, at the top of page 209, to insert the following proviso:

Provided, That no article specified by name in Title I shall be free of duty under this paragraph.

Mr. ROBINSON. I ask the chairman of the committee for an explanation of the amendment. What is the purpose and what is the effect of it?

Mr. McCUMBER. When we provided that an article should be dutiable we assumed that the Treasury Department would always rule that the article was dutiable, but it seems that there have been some holdings to the effect that the use for which a certain article was imported was to govern whether it should be free or dutiable. To place the question at rest, that where we fix a duty upon it it is to take that duty, no matter what the use may happen to be, if it is not otherwise specifically provided for, we have inserted this language to meet that ruling.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 209, line 2, after the word "paragraph," I move to amend by inserting a colon and the following:

Provided, That if any country, dependency, Province, or other subdivision of government impose a duty on any article specified in this paragraph when imported from the United States an equal duty shall be imposed upon such article coming into the United States from such country, dependency, Province, or other subdivision of government.

Mr. UNDERWOOD. The Senator is proposing that as a new amendment?

Mr. McCUMBER. As a new amendment, to follow what has just been agreed to.

Mr. UNDERWOOD. May I ask the Senator a question? There are certain forms of nitrogen used as fertilizer that are manufactured for fertilizer, and they come into this country from Canada, for instance. If Canada now imposes or should impose a duty on the article, then it comes off the free list by this provision.

Mr. McCUMBER. Will the Senator repeat the kind of article that it is supposed would come in under such conditions?

Mr. UNDERWOOD. For instance, air nitrogen is manufactured——

Mr. McCUMBER. But this paragraph is simply agricultural implements.

Mr. UNDERWOOD. Oh, I thought the provision applied to the whole title.

Mr. McCUMBER. Oh, no; just to this particular paragraph 1504.

Mr. UNDERWOOD. I beg the Senator's pardon. I was mistaken. I thought he intended the proviso to apply to Title I. I understand now that it applies only to this paragraph.

Mr. McCUMBER. That is correct.

Mr. SIMMONS. The paragraph applies specifically to agricultural implements and machinery. At what particular country is the Senator from North Dakota aiming in the amendment?

Mr. McCUMBER. I think that Canada, for instance, has a duty on quite a number of agricultural implements coming from the United States. Canada may purchase or have made or built in Canada, manufactured wholly there or partially manufactured and then imported, which would come into the United States free of duty as an agricultural implement mentioned in paragraph 8, where she would take a higher rate of duty if they came in from the United States.

Mr. SIMMONS. Are we importing any agricultural implements from Canada?

Mr. McCUMBER. Very few. The fact is, we are importing very few agricultural implements from any place on the face of the earth.

Mr. SIMMONS. We are making all we need and making them cheaper than they are making them anywhere else in the world. Why should we, therefore, under those circumstances, impose what is in the nature of a retaliatory provision against Canada when we are not importing anything from Canada and when we practically have never imported any of these implements from Canada?

Mr. McCUMBER. Oh, we do import implements from Canada. In 1920, I think it was, we imported nearly $6,000,000 worth from Canada. In 1921 the amount fell off very materially and was only about $1,000,000.

Mr. SIMMONS. What were the things which we chiefly imported from Canada?

Mr. McCUMBER. They are not segregated in the reports. They simply came in under the head "agricultural implements," so I can not tell the proportion of any particular kind. I want to say to the Senator, frankly, that so far as the chairman of the committee is concerned I think we are stretching a point in any case where we insist on a sort of retaliatory duty.

Mr. SIMMONS. I am very much opposed to any such provision.

Mr. McCUMBER. But we are doing it. I think it is contrary, I admit, to the spirit of our treaties, but we have done so in a great number of instances in past laws, and the committee have found it necessary to deviate from the view of the chairman upon that subject.

Mr. SIMMONS. I am quite sure of one thing. If we are importing agricultural implements or machinery from Canada it must be some particular implement or machine that is not manufactured in this country. If there is anything that seems to be ascertained with a degree of certainty it seems to be that we can manufacture agricultural implements and are manufacturing agricultural implements in this country as cheaply as in any other country in the world. If any are coming in here from Canada they must be machines or implements which we do not make, or they must be implements that are not sold below the American price. They could not be sold, in my judgment, below the American price because we can make them cheaper than they can in Canada, if I am correctly advised.

We have already in the agricultural schedule imposed duties that will largely exclude Canadian imports, that will affect very seriously and disastrously our export business to Canada, the finest we have in the world except that to Europe. It seems to me that we ought, where we possibly can, to desist from further stirring up resentment in a retaliatory spirit on the part of our neighbor, Canada. If there is no country other than Canada which we fear in competition in the sale of agricultural implements, it seems to me the committee would hardly be justified in imposing this retaliatory provision against Canada.

I wish the Senator might see his way clear not to insist upon that amendment.

Mr. McCUMBER. Mr. President, we have like reciprocal duties—I will use the word "reciprocal" rather than "retaliatory," for I think that is really the nature of those duties—in 10 or a dozen cases, I think, in this bill where it has been thought proper to insert them. After all there is little difference between the duties so provided and any reciprocal tariff arrangement. We say to another country, "If you will provide a duty of 20 per cent on our agricultural implements going into your country, we will allow your agricultural implements to come in at 20 per cent." But suppose the other country has already fixed its rate at 20 per cent, then we say, "Inasmuch as that country has fixed its rate at 20 per cent we will fix ours at 20 per cent," and in that instance we have simply met their duty. As I stated before, it is reciprocal. If

the other country takes its duty off, then, of course, the commodities are admitted free; but if they are not we are charging that country exactly what that country charges us. The only difference is that instead of making a difference by virtue of a treaty we have made it by virtue of the two laws of the two countries.

I agree with the Senator, however, that as a rule it is a wrong policy for this country to try to equalize with another country, because our conditions may be such that we may require a duty upon a specific article which the conditions of another country do not require. We should make our laws according to our own conditions and situation. When we do that ourselves I think we ought to allow other countries to do the same thing; but the committee is taking the view that we ought to have this sort of reciprocal agreement upon agricultural implements.

Mr. SIMMONS. Mr. President, if the Senator from North Dakota will pardon me just one second, he said that this was not the only provision of the kind in the pending bill, but that there were a number of them. I wish to ask if nearly all of the provisions of this kind embraced in the bill are not aimed at our commerce with Canada?

Mr. McCUMBER. The only two that have been agreed to to-day so far, of course, related to Canada. They related to brick and cement. I do not know just what we may yet insert.

Mr. ROBINSON. Mr. President, the Senator from North Dakota [Mr. McCUMBER], in my opinion, has just made an excellent argument against the adoption of the pending amendment. He has stated what I believe to be the correct principle upon this subject. I believe it would be unfortunate and it seems to me it would be unnecessary to adopt what is apparently a retaliatory provision with reference to the importation and exportation of agricultural implements. It seems to me that this amendment ought not to be agreed to. I think the personal view toward it entertained by the Senator from North Dakota [Mr. McCUMBER] is the correct one, rather than that asserted by the committee in this amendment. For those reasons I shall vote against the amendment.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment reported by the committee.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 209, after line 3, to insert:

PAR. 1505a. Ammonium nitrate.

Mr. McCUMBER. I ask that that amendment be disagreed to, as we have already put ammonium nitrate on the dutiable list at 1 cent a pound under paragraph 7.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 209, after line 4, to strike out:

PAR. 1506. Ambergris, castoreum, civet, and musk, grained or in pods.

The PRESIDENT pro tempore. The question is upon agreeing to the committee amendment.

Mr. SIMMONS. Why is that paragraph proposed to be stricken out?

Mr. McCUMBER. It is proposed to be stricken out because we have put ambergris in another paragraph and have given it a duty of 20 per cent ad valorem. The Senate has already passed upon that, and that, of course, necessitates the striking out of paragraph 1506.

Mr. ROBINSON. Are all of the articles which are embraced in paragraph 1506 placed upon the dutiable list?

Mr. McCUMBER. Yes.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 211, line 7, after the word "ore," to strike out "and needle or liquated antimony, but only as to the antimony content," so as to read:

PAR. 1509. Antimony ore.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

Mr. ROBINSON. Will not the Senator from North Dakota explain the reason for the amendment?

Mr. McCUMBER. Mr. President, we put needle or liquated antimony in the metal schedule at three-fourths of 1 cent per pound in paragraph 376.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 211, line 11, after the word "unprepared," to strike out the comma and "saffron and safflower," so as to make the paragraph read:

PAR. 1510. Annatto and all extracts of, archil or archil liquid, cochineal, cudbear, gambier, litmus prepared or unprepared; all of the foregoing not containing alcohol.

The amendment was agreed to.

The next amendment was, on page 213, line 16, after the word "and," to strike out "sand, or" and to insert "sand and," so as to make the paragraph read:

PAR. 1515. Asbestos, unmanufactured, asbestos crudes, fibers, stucco, and sand and refuse containing not more than 15 per cent of foreign matter.

The amendment was agreed to.

The next amendment was, on page 213, after line 17, to strike out:

PAR. 1516. Azides, fulminates, fulminating powder, and other like articles not specially provided for.

Mr. ROBINSON. Let us have an explanation of that amendment.

Mr. McCUMBER. I will state that paragraphs 1516 and 1517 have already been agreed to. The articles mentioned in paragraph 1516 have been placed upon the dutiable list.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The next amendment was, on page 214, after line 5, to insert:

PAR. 1517a. Bananas, green or ripe.

The amendment was agreed to.

The next amendment was, on page 214, line 14, after the word "hemp," to insert "henequen," so as to make the paragraph read:

PAR. 1521. All binding twine manufactured from New Zealand hemp, henequen, manila, istle or Tampico fiber, sisal grass, or sunn, or a mixture of any two or more of them, of single ply and measuring not exceeding 750 feet to the pound.

The amendment was agreed to.

The next amendment was, on page 214, after line 17, to strike out:

PAR. 1522. Bread: *Provided*, That no article shall be exempted from duty as bread unless yeast was the leavening substance used in its preparation.

Mr. McCUMBER. I ask that that amendment may be disagreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment was, on page 214, after line 20, to strike out:

PAR. 1523. Bismuth.

Mr. ROBINSON. Has bismuth been placed on the dutiable list?

Mr. McCUMBER. Bismuth has been made dutiable.

Mr. ROBINSON. I assume, then, it follows that it goes out here.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The next amendment was, on page 214, line 23, after the word "only," to insert "and unmanufactured," so as to make the paragraph read:

PAR. 1524. Fish sounds, crude, dried or salted for preservation only, and unmanufactured, not specially provided for.

The amendment was agreed to.

The next amendment was, on page 215, line 6, after the word "meal," to strike out "and bone ash," and to insert "bone ash, and animal carbon suitable only for fertilizing purposes," so as to make the paragraph read:

PAR. 1527. Bones: Crude, steamed, or ground; bone dust, bone meal, bone ash, and animal carbon suitable only for fertilizing purposes.

Mr. McCUMBER. On page 215, line 6, I move to strike out "bone ash" and insert in lieu thereof "and bone ash."

Mr. ROBINSON. Is the Senator proposing to change the amendment which the committee at first reported?

Mr. McCUMBER. Yes; so as to make it absolutely certain that bone ash will be placed upon the free list even though it may not be connected with "animal carbon, suitable only for fertilizing purposes."

The PRESIDENT pro tempore. The question is upon the amendment offered by the Senator from North Dakota to the amendment reported by the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 215, line 23, after the figures "1530," to strike out "Books" and to insert "Books and pamphlets printed wholly or chiefly in languages other than English; books," so as to make the paragraph read:

PAR. 1530. Books and pamphlets printed wholly or chiefly in languages other than English; books, pamphlets, and music, in raised print, used exclusively by or for the blind; Braille tablets, cubarithms, special apparatus and objects serving to teach the blind, including printing apparatus, machines, presses, and types for the use and benefit of the blind exclusively.

The amendment was agreed to.

The next amendment was, on page 216, line 11, after the word "duty," to strike out the comma and "not to exceed two copies of," so as to make the paragraph read:

PAR. 1531. Any society or institution incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or any college, academy, school, or seminary of learning in the United States, or any State or public library, may import free of duty any book, map, music, engraving, photograph, etching, lithographic print, or chart, for its own use or for the encouragement of the fine arts, and not for sale, under such rules and regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

The next amendment was, on page 216, line 16, after the figures "1532," to strike out "Books and libraries" and to insert "Books, libraries, usual and reasonable furniture, and similar household effects," and in line 20, after the word "sale," to strike out the comma and "and not exceeding $250 in value," so as to make the paragraph read:

PAR. 1532. Books, libraries, usual and reasonable furniture, and similar household effects of persons or families from foreign countries if actually used abroad by them not less than one year, and not intended for any other person or persons, nor for sale.

The amendment was agreed to.

The next amendment was, on page 216, line 22, after the word "crude," to strike out "and" and to insert "or," so as to make the paragraph read:

PAR. 1533. Borax, crude or unmanufactured and borate of lime, borate of soda, and other borate material, crude and unmanufactured, not specially provided for.

The amendment was agreed to.

The next amendment was, on page 217, after line 2, to insert:

PAR. 1534a. Brazilian beans.

Mr. McCUMBER. On page 217, line 3, after the word "Brazilian," I move to insert the word "pitchurim."

The PRESIDENT pro tempore. The Secretary will state the amendment to the amendment.

The READING CLERK. On page 217, in line 3, after the word "Brazilian" it is proposed to insert "pitchurim."

Mr. SIMMONS. Mr. President, what does that mean? I do not know what that means.

Mr. McCUMBER. I will read the report of the committee.

Mr. SIMMONS. No; I will not take the time for that, if the Senator has to read the report.

Mr. McCUMBER. I can tell the Senator what it means.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDENT pro tempore. The next amendment of the committee will be stated.

The next amendment was, on page 217, after line 7, to insert:

PAR. 1536a. Broom corn.

The amendment was agreed to.

The next amendment was, on page 217, after line 10, to strike out:

PAR. 1539. Cadmium.

The amendment was agreed to.

The next amendment was, on page 217, line 13, after the word "nitrogen," to strike out the colon and the following proviso:

Provided, That when any country, dependency, or other subdivision of government imposes a duty on calcium acetate imported from the United States, an equal duty shall be imposed upon such article coming into the United States from such country.

So as to make the paragraph read:

PAR. 1540. Calcium: Acetate, chloride, crude; nitrate, and cyanamid or lime nitrogen.

The amendment was agreed to.

The next amendment was, on page 217, line 18, before the word "and," to strike out "Cash registers, linotype," and to insert "Linotype," and in line 19, after the word "machines," to strike out "Sewing machines," so as to make the paragraph read:

PAR. 1541. Linotype and all typesetting machines, typewriters, shoe machinery, sand-blast machines, sludge machines, and tar and oil spreading machines used in the construction and maintenance of roads and in improving them by the use of road preservatives; all the foregoing whether in whole or in parts, including repair parts.

The amendment was agreed to.

The next amendment was, on page 217, line 25, before the word "or," to strike out "Cerium, cerite," and to insert "Cerite," so as to make the paragraph read:

PAR. 1542. Cerite or cerium ore.

The amendment was agreed to.

The next amendment was, on page 218, after line 2, to insert:

PAR. 1543a. Chestnuts, including marrons, crude, dried, baked, prepared, or preserved in any manner.

The amendment was agreed to.

The next amendment was, on page 218, line 9, after the word "form," to strike out the colon and the following proviso:

Provided, That when any country, dependency, or other subdivision of government imposes a duty on such articles imported from the United States, an equal duty shall be imposed upon such articles coming into the United States from such country.

The amendment was agreed to.

The next amendment was, on page 218, line 18, after the word "after," to strike out "removing" and to insert "the removal of," so as to make the paragraph read:

PAR. 1546. Coal-tar products: Acenaphthene, anthracene having a purity of less than 30 per cent, benzene, carbazole having a purity of less than 65 per cent, cumene, cymene, fluorene, methylanthracene, methylnaphthalene, naphthalene which after the removal of all the water present has a solidifying point less than 79° centigrade, pyridine, toluene, xylene, dead or creosote oil, anthracene oil, pitch of coal tar, pitch of blast-furnace tar, pitch of oil-gas tar, pitch of water-gas tar, crude coal tar, crude blast-furnace tar, crude oil-gas tar, crude water-gas tar, all other distillates of any of these tars which on being subjected to distillation yield in the portion distilling below 190° centigrade a quantity of tar acids less than 5 per cent of the original distillate, all mixtures of any of these distillates and any of the foregoing pitches, and all other materials or products that are found naturally in coal tar, whether produced or obtained from coal tar or other source, and not specially provided for in paragraph 25 or 26 of Title I of this act.

The amendment was agreed to.

The next amendment was, on page 219, line 19, after the word "and," to strike out "copper cement" and to insert "cement copper," so as to make the paragraph read:

PAR. 1553. Copper ore; regulus of, and black or coarse copper, and cement copper; old copper, fit only for remanufacture, copper scale, clippings from new copper, and copper in plates, bars, ingots, or pigs, not manufactured or specially provided for.

The amendment was agreed to.

The next amendment was, on page 220, line 4, after the figures "1557," to strike out "Cotton" and to insert "Cotton, not specially provided for," so as to make the paragraph read:

PAR. 1557. Cotton, not specially provided for, and cotton waste.

The amendment was agreed to.

The next amendment was, on page 220, after line 9, to insert:

PAR. 1559a. Curry and curry powder.

The amendment was agreed to.

Mr. McCUMBER. On page 220 I wish to reconsider the motion by which paragraph 1560a was agreed to; and in the last line of the paragraph, after the word "cyanide," I move to insert a comma and the words "not specially provided for." That can only be done by asking that the vote by which this amendment was adopted may be reconsidered.

Mr. ROBINSON. What is the paragraph?

Mr. McCUMBER. 1560a.

Mr. ROBINSON. We have no such paragraph in the print.

Mr. McCUMBER. It was added by the Senate some time ago.

The READING CLERK. On page 220, after line 11, there was added paragraph 1560a, as follows:

Cyanide: Potassium cyanide, sodium cyanide, all cyanide salts and cyanide mixtures, combinations, and compounds containing cyanide.

Mr. ROBINSON. What is the proposal?

Mr. McCUMBER. I propose to insert a comma and the words "not specially provided for." Those words should have been inserted in the original amendment.

The PRESIDENT pro tempore. The Chair desires to remind the Senator from North Dakota that the Senate has not yet reconsidered the vote by which the amendment was agreed to. Is there objection to the reconsideration of the vote? The Chair hears none, and it is reconsidered.

Mr. McCUMBER. Now, I offer the amendment.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The READING CLERK. After the word "cyanide," at the end of the paragraph, it is proposed to insert a comma and the words "not specially provided for."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDENT pro tempore. The Secretary will state the next amendment of the committee.

The next amendment was, on page 221, line 9, after the word "tanning," to strike out "whether crude or treated solely for proper packing or prevention of decay or deterioration pending manufacture," and to insert "all the foregoing, whether crude or advanced in value or condition by shredding, grinding, chipping, crushing, or any similar process," so as to make the paragraph read:

PAR. 1563. Dyeing or tanning materials: Fustic wood, hemlock bark, logwood, mangrove bark, oak bark, quebracho wood, wattle bark, divi-divi, myrobalans fruit, sumac, valonia, nutgalls or gall nuts, and all articles of vegetable origin used for dyeing, coloring, staining, or tanning, all the foregoing, whether crude or advanced in value or condition by shredding, grinding, chipping, crushing, or any similar process; all the foregoing not containing alcohol and not specially provided for.

The amendment was agreed to.

The next amendment was, on page 221, line 21, after the word "and," to strike out "corundum ore," and to insert "corundum, and crude artificial abrasives," so as to make the paragraph read:

PAR. 1565. Emery ore and corundum, and crude artificial abrasives.

Mr. McCUMBER. I move to add the word "ore" after the word "corundum," the last word on line 21.

The READING CLERK. So that it will read:

Corundum ore, and crude artificial abrasives.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 222, I desire to offer an amendment, after line 8, as follows:

PAR. 1569a. Fish imported to be used for purposes other than human consumption.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The next amendment of the committee will be stated.

The next amendment was, on page 222, line 12, after the word "skins," to insert "not specially provided for," so as to make the paragraph read:

PAR. 1573. Furs and fur skins, not specially provided for, undressed.

The amendment was agreed to.

The next amendment was, on page 222, line 16, after the word "manila," to strike out "sisal grass" and to insert "sisal, henequen," so as to make the paragraph read:

PAR. 1575. Grasses and fibers: Istle or Tampico fiber, jute, jute butts, manila, sisal, henequen, sunn, and all other textile grasses or fibrous vegetable substances, not dressed or manufactured in any manner, and not specially provided for.

The amendment was agreed to.

The next amendment was, on page 222, line 22, before the word "not," to insert "(including nonedible fish)," so as to read:

PAR. 1576. Guano, basic slag, ground or unground, manures, and all other substances used chiefly for fertilizer (including nonedible fish), not specially provided for.

Mr. McCUMBER. I ask that the Senate reject that amendment, because we have just included it in paragraph 1569a in a broader classification.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the committee.

The amendment was rejected.

The next amendment was, on page 222, line 22, to strike out "for" and insert "for: *Provided*, That no article specified by name in Title I shall be free of duty under this paragraph."

The amendment was agreed to.

The next amendment was, on page 223, line 1, after the word "resins," to strike out "Amber and amberoid, arabic or senegal, damar" and to insert "Damar," and in line 2, after the word "kauri," to strike out "and other copals" and to insert "copal," so as to make the paragraph read:

PAR. 1577. Gums and resins: Damar, kauri, copal, dragon's blood, kadaya, sandarac, tragacanth, tragasol, and other gums, gum resins, and resins, not specially provided for.

The amendment was agreed to.

Mr. McCUMBER. On lines 6 to 8, paragraph 1578, I desire to strike out all of that paragraph and to insert in lieu thereof the following:

Gunpowder, sporting power, and all other explosive substances not specially provided for: *Provided*, That if any country, dependency, Province, or other subdivision of government imposes a duty on any article specified in this paragraph when imported from the United States, an equal duty shall be imposed upon such article coming into the United States from such country, dependency, Province, or other subdivision of government.

On a division, the amendment was agreed to.

The next amendment was, on page 223, line 13, before the word "and," to strike out "ossein," and in the same line, after the word "glue," to strike out "stock" and to insert "stock, not specially provided for," so as to make the paragraph read:

PAR. 1580. Hide cuttings, raw, with or without hair, and all other glue stock, not specially provided for.

Mr. McCUMBER. I ask that that amendment be rejected.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The READING CLERK. Paragraph 1582 has been heretofore agreed to.

The next amendment was, on page 224, after line 8, to strike out:

PAR. 1591. Ivory tusks in their natural state or cut vertically across the grain only, with the bark left intact.

Mr. McCUMBER. I ask that that amendment be rejected.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McCUMBER. On page 224 I move to strike out line 17:

PAR. 1598. Lactarene or casein.

Mr. SIMMONS. What is the reason for that?

Mr. McCUMBER. Because it has been transferred to paragraph 17a and is given a duty at 4 cents per pound.

Mr. SIMMONS. I would be very glad if the clerk of the committee could furnish us with a statement showing where articles on the free list have been placed on the dutiable list. It would help us very much.

Mr. McCUMBER. I understand there have been no other transfers after this one. The clerk of the committee has been exceedingly busy, or he would have gotten out something in the way of an explanation.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was agreed to.

The READING CLERK. The amendment to strike out paragraph 1600 has been heretofore disagreed to.

The amendment to strike out paragraph 1601 has been heretofore disagreed to.

On page 225, line 4, paragraph 1603, the committee proposes to strike out "Limestone rock" and insert in lieu thereof "Limestone-rock."

The amendment was agreed to.

The READING CLERK. On page 225, after line 13, the committee proposes to insert a new paragraph, as follows:

PAR. 1607a. Manganese, oxide and ore of.

Mr. McCUMBER. The Senate having placed that upon the dutiable list, I ask that the committee amendment be disagreed to.

The amendment was rejected.

The READING CLERK. The amendment in paragraph 1610 was disagreed to August 3.

On page 226, line 4, the committee amendment was disagreed to August 3, and the committee amendment on line 9 was disagreed to the same date.

On page 226, line 24, the committee proposes to strike out paragraph 1612, as follows:

PAR. 1612. Meerschaum.

The amendment was agreed to.

The READING CLERK. On page 227, after line 11, the committee proposes to insert a new paragraph to read as follows:

PAR. 1615a. Molasses testing not above 56 per cent total sugars not imported to be commercially used for the extraction of sugar, or for human consumption.

Mr. BROUSSARD. I think there will be a record vote taken on this amendment, and I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Dial	Kellogg	New
Ball	Dillingham	Kendrick	Nicholson
Brandegee	Edge	Keyes	Norbeck
Broussard	Ernst	Lenroot	Oddie
Bursum	Fletcher	Lodge	Overman
Calder	Gooding	McCumber	Phipps
Cameron	Hale	McKellar	Ransdell
Capper	Heflin	McNary	Reed
Cummins	Jones, Wash.	Moses	Robinson

Sheppard	Smoot	Trammell	Warren
Shortridge	Stanley	Underwood	
Simmons	Sterling	Wadsworth	
Smith	Swanson	Walsh, Mont.	

Mr. JONES of Washington. I desire to announce that the senior Senator from Kansas [Mr. CURTIS] is detained on official business.

The PRESIDING OFFICER (Mr. NEW in the chair). Forty-nine Senators having answered to their names, a quorum is present.

Mr. McKELLAR. Mr. President, I want to say just a word upon the pending amendment. This is the so-called blackstrap-molasses item. Blackstrap is a by-product in the sugar mills, and is used principally for the purpose of making a food combination for live stock. Formerly it was supposed to be worthless and was thrown out of the mills, but in the last 15 years a large business has grown up through the importation of blackstrap molasses, principally from Cuba, and its use with hay and grain and other stuff as a combination food for live-stock. It makes one of the very best kinds of food for live stock, and the industry in the country has grown to very large proportions. I think there are about $200,000,000 invested in the business in the United States.

I call attention to the fact that there are mills producing this food in Kansas City, Mo.; St. Joseph, Mo.; Omaha, Nebr.; Clinton, Iowa; Cedar Rapids, Iowa; St. Louis, Mo.; East St. Louis, Cairo, Peoria, and Chicago, Ill.; Hammond, Ind.; Milwaukee, Wis.; Minneapolis, Minn.; Cincinnati, Pittsburgh, Buffalo; Memphis, Tenn.; Nashville, Tenn.; Little Rock, Ark.; and there are many other smaller mills.

Serious objection has been made by the Senator from Louisiana [Mr. BROUSSARD] to incorporating this item in the free list, that Senator saying that there ought to be protection to the sugar growers of Louisiana. It seems to me that the sugar growers of Louisiana have gotten enough in this bill to let the matter of blackstrap molasses go. Surely it is more important that the dairymen, the live-stock growers, and the farmers in this country should have blackstrap on the free list and have this combination feed made for the benefit of the farmers of the entire country than to give protection to a small portion of the people of Louisiana. Only a very small portion of this blackstrap molasses comes from Louisiana. Most of it comes from Cuba, and there is no reason in the world, in my judgment, why it should not be on the free list. I think the provision which has been made for it is a very proper one and ought to be agreed to.

I want to call the attention of the Senate to another thing in this connection. This industry has suffered very greatly in the last year or two, and especially in the last few months, because of the fact that freight rates have increased enormously, and the freight rate is a very important item in the industry, because blackstrap is a very heavy article. Then, again, it has to be hauled a long distance, which makes the freight rate very much more important.

Mr. President, I am not going to take up the time of the Senate on this matter. It seems to me that the article ought to be on the free list, and that no good reason has been presented why it should be taxed. Under the House provision the tax is very large—from 50 to, perhaps, 300 per cent—and would impose a very great burden upon the live-stock growers, the dairymen, and all the stock feeders of the country. Certainly there seems to be no good and valid reason why this great industry should be handicapped and manacled and perhaps destroyed for the benefit of a very small portion of growers of sugar cane in the State of my good friend from Louisiana. I hope no objection will be offered to the amendment.

Mr. BROUSSARD. Mr. President, I have already spoken very extensively on the subject when there was no limit on speeches, and I do not propose now to cover the ground which I covered at that time, especially in view of the fact that we are now limited to 15 minutes.

Paragraph 1615a reads as follows:

PAR. 1615a. Molasses testing not above 56 per cent total sugars not imported to be commercially used for the extraction of sugar, or for human consumption.

My friend the Senator from Tennessee [Mr. McKELLAR] has said that most of the molasses imported was used for the purpose of the manufacture of feedstuffs. As a matter of fact, I showed in my previous speech to the Senate that most of it has been used in recent years in the manufacture of industrial alcohol, and the statistics of the department are filled with the facts substantiating that statement. The only exemption made is if it is used for human consumption or used in the manufacture of feedstuffs. I wish to call the attention of Senators on both sides of the aisle, but especially on the other side, to the fact that under the Underwood law there was a 15 per cent ad valorem duty on blackstrap, which was superseded by the emergency tariff law enacted March 27, 1921. I wish to predicate my statement upon these facts in order that the Senate may follow and see what effect the tariff is having now on the price of blackstrap molasses.

I stated at the time I previously addressed the Senate that 56 per cent total sugar was too high and that it was possible to extract sugar from this molasses. I did not know at that time that anybody was engaged in the production of sugar from blackstrap molasses, but immediately after making the assertion on the floor I received letters from officers of the United States Syrup Co. Mr. Cutler has a patent under which he is now operating. This letter is addressed to me, dated June 23, 1922. The company states:

Since getting out the folder herewith inclosed—

The folder gives the full description of the details of the patent—

Since getting out the folder herewith inclosed we have discovered that we are able to produce in the laboratory approximately 500 pounds of sugar from each ton of the refuse molasses treated, and in addition thereto approximately 35 gallons of good, wholesome sirup in all respects fit for human consumption.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Tennessee?

Mr. BROUSSARD. I yield.

Mr. McKELLAR. The Senator does not contend that that could come in under this provision? It can not come in except for human consumption.

Mr. BROUSSARD. I know that very well; I know what the Senator is driving at; but I called attention at the time I made my previous argument that when an article is imported like blackstrap molasses, worth 1½ cents a gallon to-day, that we had not sufficient officers who could follow the blackstrap and prevent the extracting of sugar under this process. I did not say it was not exempt when used for the extraction of sugar for human consumption, but I made the assertion that it would be impossible to administer the law in order to safeguard those who produced it or safeguard the Government or safeguard other competitors who brought the sugar here and had to pay a duty to import it. That is the argument I am making now. If the blackstrap is sold in the New Orleans market or at Baltimore or New York at 1½ cents a gallon, the Government would have to expend all of the revenue they collect under the tariff bill altogether in order to follow each gallon of that blackstrap shipped all over the United States, to be dumped into barns and to be kept there until they are ready to feed it to the stock, in order to determine its ultimate destination.

It is impossible of administration. I made that statement. I have here a sample of the sugar which is produced from the blackstrap molasses and there is not a human being who can tell it from any other sugar. It is just as white and just as pure as any first sugar extracted anywhere from the beet in this country or any foreign country. The extraction is 500 pounds——

Mr. REED. What does it cost to extract it?

Mr. BROUSSARD. I have a lot of correspondence with Mr. Cutler and the company and they have not fully completed their operations, but they figure that they can get it for something like 3½ cents, but that is only speculative, because they have not finished their operations.

Mr. McKELLAR. It is not being extracted commercially up to date.

Mr. BROUSSARD. It is being extracted there.

Mr. McKELLAR. That is just an experiment.

Mr. BROUSSARD. No; it is not an experiment. It is beyond the experimental stage. It will cost them less than 4 cents to extract that sugar from the blackstrap molasses.

Mr. McCUMBER rose.

Mr. BROUSSARD. I must pass on very rapidly, and I will ask Senators not to interrupt me further. Did the Senator want to ask me a question?

Mr. McCUMBER. No; when the Senator gets through I shall reply very briefly.

Mr. BROUSSARD. I have only a very short time and I want to cover the subject very briefly. I made the statement previously that the only reason why blackstrap molasses was put on the free list was because there were certain agencies in the country that had started a propaganda and had a number of people advocating putting blackstrap molasses on the free list, when as a matter of fact all those people who appeared before the Ways and Means Committee of the House and the Finance Committee of the Senate were acting in a way diametrically opposed to their own interests and that they were being made the tools of the feed manufacturers of the country.

I want to say now that I have the documents here from many of the farm associations in the country and I have documents from the Dairymen's Association of the United States asking the committee to reverse itself and put a duty on blackstrap molasses, and they are asking a higher duty than I am asking when I request the Senate to disagree to the committee amendment and restore the Fordney rate.

At the time the bill went before the House Mr. FORDNEY, chairman of the Committee on Ways and Means, proposed a rate of three-quarters of 1 cent per gallon. One of the members of the committee, acting for the people who demanded a lower duty, proposed a rate of one-fourth of a cent per gallon. That request prevailed, but immediately after the rate was reduced to one-fourth of 1 cent per gallon the same people began an agitation before the Finance Committee of the Senate in order to have it put on the free list, but the one-fourth of 1 cent per gallon which the House put in the Fordney bill is absolutely what the representatives of those interests on the floor of the House demanded that the duty be reduced to.

I have here a letter from the Peoria County Farm Bureau, and I will only read part of it because my time is so very limited:

Mr. Jacob Younge who went to Washington representing us came back a few days ago. He had a conference with Mr. Fox and Mr. Howard, of the American Farm Bureau Federation, also Gray Silver, of the American Farm Bureau Federation, in Chicago yesterday. There is no question in our minds but what Mr. Howard and also Mr. Silver are for the import duty.

I was informed to-day that there would be filed this afternoon or to-morrow a brief, to be substituted for the brief previously filed and withdrawn in support of free blackstrap molasses, asking the committee to reverse itself.

I have here also a letter from the Tazewell County Farm Bureau of Illinois, as follows:

Mr. Jacob Younge, who went to Washington representing us, came bureaus in Illinois, has taken this matter up directly, and both Mr. Hedgecock and I feel that all further correspondence and further work should be between Mr. George A. Fox, the secretary of the Illinois Agricultural Association, and myself. We understand that Mr. Younge had an opportunity of meeting President Howard and Mr. Gray Silver at Chicago the first of the week and has been able to convince them completely that this matter should be attended to immediately.

I have a copy of a telegram addressed by Mr. Everett McClure, vice president of the Cotton Farmers' Association, to Mr. Atkeson, dated June 13, in which he said:

We corn growers hope that your committee is for substantial duty on blackstrap molasses. Please write position and oblige.

EVERETT MCCLURE,
Vice President Indiana Farmers' Association,
P. M. State Grange.

To which Mr. Atkeson replied as follows:

Mr. EVERETT MCCLURE,
Vice President Indiana Farmers' Association, Aurora, Ind.

DEAR BROTHER MCCLURE: I have your telegram relative to blackstrap molasses. We have been keeping quite closely in contact with this whole situation here and are familiar with the effort which has been made on behalf of the corn growers to secure proper tariff on this commodity.

At the beginning of the tariff discussion, representatives of different agricultural interests met here in the Grange office, and I have been guided largely in this matter by the wishes of the cane growers, who were able to make a complete case for a tariff on blackstrap molasses along with the tariff which they are asking for on sugar.

So I have been consistenly favoring a reasonable tariff on blackstrap from the beginning of this discussion.

If there is anything further I can do, I will be glad to be advised and will follow this matter up to the best advantage possible.

Yours fraternally,

T. C. ATKESON,
Washington Representative.

I have a letter addressed to me by the National Dairy Union, with offices here in Washington, reading as follows:

Hon. E. S. BROUSSARD,
Senate Office Building, Washington, D. C.

DEAR SIR: In answer to your inquiry relative to the position of the National Dairy Union on the matter of a tariff on blackstrap molasses, I would say that this organization has never taken this matter up officially, but I have been in correspondence with the other officers and directors and have been familiar very generally with the trend of sentiment among the dairymen of the United States on this subject and have no hesitation in expressing my personal belief that in a tariff bill in which protection to American industries is the accepted basic principle and in which the industry of agriculture is receiving fair consideration, this fair consideration ought to be extended to the sugar industry in all of its branches and that the dairymen generally believe that a fair and reasonable protective tariff on blackstrap molasses should be written into this bill, just as they believe a fair and reasonable tariff should be written in on other forms of sugar, on butter and competing dairy products, and on fruits, vegetables, and cereals generally, which are or may be imported into this country from countries of lower producing costs in injurious competition with American farm products.

I have not hesitated personally since the beginning of this tariff discussion to say that I was in favor of the tariff on blackstrap molasses.

Yours sincerely,

A. M. LOOMIS, *Secretary.*

I have a letter addressed to me by Mr. Atkeson, the Washington representative of the National Grange, reading as follows:

In response to your inquiry as to the attitude of the National Grange on the subject of a tariff on blackstrap molasses, I take pleasure in quoting herewith the action of the National Grange on the general subject of the tariff:

"The Grange has long declared for the principles of exact justice to agriculture in all matters of tariff legislation and now demands that the products of the farms be given tariff protection equal to the protection given products of other industries."

In accordance with this action of the National Grange, I believe that in forming a tariff law along protective lines and designed to promote American agriculture, as well as other industrial interests, blackstrap molasses should be given a fair and equitable protection.

Yours sincerely,

T. C. ATKESON,
Washington Representative.

I see that I am taking too much time in the reading of these letters. I have here many letters, all of them indorsing a duty on blackstrap molasses.

The reason for their indorsement of a duty on blackstrap molasses is very plain. I demonstrated, from the figures secured from the Department of Commerce and the Department of Agriculture, that blackstrap molasses comes into this market and displaces over 40,000,000 bushels of corn in the country. We export corn. The Finance Committee has been backed in its opinion in putting a duty on corn and corn meal, but what is the idea of putting a duty on one article that permits the importation of a cheap article of food which displaces over 40,000,000 bushels of corn, and permitting that cheap article to come in free? Those people find they have no protection of articles which easily displace it and which are considered to be superior to corn and other cereals are permitted to come in free.

Mr. President, I have here a telegram to the reading of which I shall ask every Member of the Senate to pay particular attention. The telegram is dated June 16 and is from Abbeville, La. It is from one of our sugar operators and reads as follows:

We quote from our letter to W. H. Tidwell, special custom agent——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BROUSSARD. I ask unanimous consent that I may speak five minutes longer, Mr. President.

Mr. MCCUMBER. I do not object, Mr. President, but I doubt if that may be done under the unanimous-consent agreement.

The PRESIDING OFFICER. The Chair does not think it may be done under the unanimous-consent agreement.

Mr. BROUSSARD. Then I will offer an amendment to paragraph 1615. I understand, however, there is an amendment pending which has been offered by the Senator from Illinois [Mr. MCKINLEY]. Would I not be permitted to speak on that amendment, Mr. President?

The PRESIDING OFFICER. There is no amendment pending to the paragraph which is now before the Senate.

Mr. BROUSSARD. I offer the amendment proposed by the Senator from Illinois [Mr. MCKINLEY], in his absence, and I wish to discuss it. The amendment is printed and on the table.

The PRESIDING OFFICER. The Senator from Louisiana then offers the amendment of the Senator from Illinois as an amendment to the amendment proposed by the committee?

Mr. BROUSSARD. I offer it as an amendment to the amendment proposed by the committee. I wish to read the telegram to which I have referred:

We quote from our letter to W. H. Tidwell, special custom agent——

The PRESIDING OFFICER. Will the Senator send the amendment to the desk?

Mr. BROUSSARD. The amendment is printed and is already at the desk. However, I can state what the amendment is.

Mr. NICHOLSON. I ask that by unanimous consent the time of the Senator from Louisiana may be extended.

The PRESIDING OFFICER. The Chair will hold that that can not be done under the unanimous-consent agreement. The amendment proposed by the Senator from Louisiana to the committee amendment will be stated.

The READING CLERK. On page 227 it is proposed to strike out lines 12, 13, and 14——

The PRESIDING OFFICER. That is in order.

Mr. BROUSSARD. I can simplify that matter. I offer an amendment as a substitute for the committee amendment, on page 227, line 12, to strike out paragraph 1615a and to insert:

PAR. 1615a. Molasses testing not above 48 per cent total sugars, twenty-five one-hundredths of 1 cent per gallon; testing above 48 per cent total sugars, two hundred and seventy-five one-thousandths of 1 cent additional for each degree.

The PRESIDING OFFICER. The Senator from Louisiana will proceed.

Mr. BROUSSARD. The telegram to which I refer reads as follows:

We quote from our letter to W. H. Tidwell, special customs agent, New Orleans, in matter of dumping Cuban blackstrap—

This is from the letter telegram which was addressed to the customs agent at New Orleans—

Unloading of Cuban blackstrap practically puts our product out of market, for the reason that our best offer is 1¼ cents gallon, just one-quarter cent above freight rate and duty on Cuban molasses. Our actual selling prices at factory for past nine years follow: 1912, 6¼ cents; 1913, 6¼ cents; 1914, 5 cents; 1915, 14 cents—

That was during the war period—

1916, 16 cents; 1917, 14 cents; 1918, 6¼ cents; 1919, 18 cents; 1920, 3 cents; 1921, 1922, offered 1¼ cents, with practically no market. Have had no trouble formerly in disposing of our blackstrap, but last year price dropped to 3 cents and this year to 1¼ cents, and it seemed doubtful for a time whether we could sell it at all. For a commodity whose average price was 6 cents before war and which fluctuated with sugar prices during and after the war, reaching 18 cents per gallon, to suddenly become practically worthless while the demand for it still exists, with the same competitors in the same markets, leads one to conclude that the change is due to the character of the competition; that is, that the Cubans are giving the blackstrap for nothing. We are in receipt of a trade circular giving the cost of delivering Cuban blackstrap as 1¼ cents, which covers freight and duty but not handling charges. Assuming the difference of one-quarter cent as margin for handling, it must appear that Louisiana factories are offered just what it costs to move the Cuban molasses, allowing nothing for the product. This is dumping to the limit.

Then he asks me—

Can you invoke antidumping law in our behalf?

V. L. CALDWELL.

Mr. President, I have demonstrated that all of this was nothing but propaganda; that there was nothing else to it. I have shown that the only people who have not reversed themselves on this proposition are the feed mixers; and I have shown by a table which I have here that they use 48 per cent total sugars in their mixtures, and that if they only use 40 per cent of blackstrap molasses, at that time costing them 3 cents a gallon, they were making $5.40 profit on the molasses alone. But, Mr. President, at this time instead of paying 3 cents for the molasses they are only paying a cent and a half for it. Although our molasses is superior to the Cuban molasses, we can not obtain one copper cent more than the Cuban molasses will bring on the New Orleans market. I have demonstrated that the feed manufacturers are absolutely profiteering on this molasses. They obtain it at the present time for a cent and a half a gallon—and there are 12 pounds to the gallon—so that when they mix it with straw and shucks—and sometimes I am tempted to say with shavings—and sell the mixture at about $28 a ton, which amounts to nearly one and a half cents a pound, the price received for the 1 pound of feedstuffs will pay for 12 pounds of our molasses which they use in the compound, and on the basis of 3 cents a gallon they are making net on the molasses alone $5.40 per ton on the stuff which they handle. Now the price is reduced to one-half.

I am sure the committee would not want to do an injustice in this matter. If we are not given protection, we can not get this by-product off of the farms, for it costs us over 1 cent to send it from the plantation to New Orleans, and that is the freight rate from Cuba to New Orleans. The importers pay the duty on it, pay the freight, and pay the handling charges, and then reduce our price to 1¼ cents per gallon.

I have shown that if they use the highest sugar content of blackstrap molasses, 56°, the only difference to the dairymen and to the stock feeder would be a difference of 34 cents per ton added cost under the proposed tariff. There is no reason for the mixer to add anything in addition to the present price, because he is already, at the rate of 3 cents, making $5.40, and to-day the cost is reduced one-half to him, so that when he comes here and asks the committee to put this molasses on the free list he has absolutely failed to make out a case.

At one time he was joined by the agriculturists of the country and by the dairymen, who then believed that it was proper to permit this molasses to come in free, but all of these people have demanded protection for themselves, and all of them now realize that there is nothing to be added to the price of feedstuffs if a small duty of a quarter of a cent per gallon is added to it.

I ask the committee now to state whether or not they do not think that they should agree to a reversal of their recommendation to the Senate? I know that the committee is wrong, and I think that the Senate will be wrong if it does not accept the Fordney rate as carried in the bill as passed by the House and as it came to the Senate. I shall take the sense of the Senate on the recommendation of the committee.

Mr. President, I do not care to occupy longer the time of the Senate on this subject. I think the Senate has been very kind to me, and I yield now to any other Senator who may desire to discuss the question.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Louisiana to the amendment reported by the committee.

Mr. McCUMBER. Mr. President, I know of no one item that was given greater consideration than that which is contained in paragraph 1615a, reading—

Molasses testing not above 56 per cent total sugars not imported to be commercially used for the extraction of sugar or for human consumption.

The committee very carefully considered the question of the amount of sucrose in a sirup which would allow the sugar to be extracted, and they arrived at the conclusion that anything that contained 56 per cent of sucrose, which would be the sugar content and the sugar inverts, as they are called, could not profitably be extracted.

The Senator from Louisiana now calls attention to some new patent that would indicate that a less percentage might subject the sirup to be utilized for the purposes of sugar, but, Mr. President, I want to call the Senator's attention to the fact that very much more sugar molasses testing above 56 per cent is imported than that which tests less than 56 per cent, and I want also to call his attention to the fact that it makes no difference whether they can extract sugar out of molasses testing 56 per cent or not, because if it is imported to extract the sugar then it is for human consumption and will bear the higher rate of duty. So if it is used for human consumption, for table purposes in any way, it could not come in free. The Senator, therefore, will understand that it is protected at least to some extent against free importation for any purposes except cattle feed and for the making of industrial alcohol.

Mr. BROUSSARD. Mr. President, will the Senator yield?

Mr. McCUMBER. I yield; certainly.

Mr. BROUSSARD. I should like to call the Senator's attention to the fact that after this molasses is imported into this country it will be an impossibility for the collector to follow it to its destinatiion and to find out whether it is used for the extraction of sugar, or for human consumption, or for cattle feeding. It will be impossible of administration.

Mr. McCUMBER. I think it is generally imported in very large tanks, and I think the officers of the Government will be able to follow it. At least, they think they can, and so informed the committee.

The Senator has stated, as one reason against allowing the importation, that it will be for the benefit of the corn raiser, because if this material is imported it will take the place of 40,000,000 bushels of corn. Mr. President, there were only about 36,000,000 gallons imported last year for all purposes—I mean, of that testing lower than 56 per cent—for the purposes of industrial alcohol and for feed purposes; and of the imports I have not definite information as to what percentage is used by the farmer—that is, used in making stock feeds. I anticipate that probably not more than 60 to 80 per cent, at most, is used for that purpose, giving the rest, 20 to 40 per cent, for all other purposes.

I do not think a gallon of molasses will go as far for feed as a bushel of shelled corn. It may have certain qualities that will make it more valuable than corn, but I do not think the Senator can say that it will displace 40,000,000 bushels of corn. However, even if that were true it would be but a drop in the bucket, and it helps to take care of a lot of other feeds that farmers produce that would not be edible, even for stock, unless they were sweetened up a little with this molasses.

Mr. President, I do not give a great deal of consideration to the fact that some of these agricultural societies will first send in a petition to have this material placed upon the free list, and then change and think they made a mistake and want it made dutiable, upon the theory that it will interfere with their corn product. I think, on the whole, the committee has carefully guarded the interest of the Senator from Louisiana by providing that everything shall pay a duty unless it is used only for the purpose of stock feeding or for industrial purposes; and therefore I, at least, shall vote to sustain the committee.

Mr. REED. Mr. President, the very language of the amendment precludes the manufacture of sugars from these blackstrap molasses. The language is:

Molasses testing not above 56 per cent total sugars not imported to be commercially used for the extraction of sugar or for human consumption.

That disposes of the entire argument made by the Senator from Louisiana that sugar can be made from these molasses. The Senator says that the law might be avoided. The same argument could be made with reference to a vast number of articles which we are permitting to come in under a particular tariff duty with the provision that they shall not be used for

any purpose except the one specified in the law. If there be danger of avoidance of the law all that it is necessary to do is to put in the proper safeguards to prevent an evasion of the law, and that is the way to reach the particular difficulty which the Senator has in mind—not to reach it by a general tax levied upon blackstrap molasses in general, irrespective of the uses to which they are put; so that that argument is without serious merit. If, however, it had any merit we have gone to the limit in taxing the American people for the benefit of the sugar industries of this country. We tax 110,000,000 people for the benefit of a comparatively few sugar producers, and it would seem to me that there ought to be some limit to the rapacity and the appetite for favors and benefits which any part of the country will demand as against the rest of the country.

I do not question the right of Senators to take the view that is entertained by my friend who has spoken so forcibly upon this question. Nobody entertains a kindlier feeling or a more friendly feeling for him than myself. I simply regret that he has permitted his enthusiasm for a particular industry of his particular State so far to control his general judgment, which, generally speaking, is uniformly good.

The Senator says that some of these molasses may be used to make alcohol. It seems to me, in view of the Senator's well-known views on that question, that he ought to welcome that particular use as highly desirable and strictly consistent with his theory in regard to liquids.

Mr. President, let us look at this matter from the farmer's standpoint. Here is an article that is not produced by the average American farmer at all. It is a by-product or a refuse product of some farmers who raise sugar beets, or, rather, of the mills that manufacture sugar beets into sugar, and of the cane mills in a small part of the country. They are already protected upon their principal product. This by-product makes a remarkably fine feed for the cattle and live stock which are raised in all parts of the United States. It would seem that an industry which is protected upon its principal product and to which every other farmer has to pay a very heavy tax ought not to complain if its by-product is sold in competition with the rest of the world, so that the farmer who pays the high tax upon the sugar at least is permitted to import a by-product to feed his cattle and get the benefit of a cheap food for his cattle.

That would seem to be only fair and just. Bear in mind, also, that everything that makes for the production of beef in this country makes for cheaper meats for all of our people, and enables the vast farming community of the United States—all of whom raise cattle, speaking broadly—to feed their cattle a little cheaper, to be in a better position to compete with the cattle of other countries, and to be in a better position to maintain themselves. They are asking no tax. They are simply asking the right to go into the open market of the world and buy the feed for the cattle, the surplus of which they are obliged to sell in the open market of the world.

It appears to me in this case that one very small part of the farmers of the United States who produce beets and sugar are asking that a burden be placed upon their brother farmers who do not produce beets and sugar upon a mere by-product; and that, it seems to me, can not be justified. Everything that can be done to make cheap feed for cattle in this country tends to make cheap meats. Everything that can be done to help the great mass of the farmers who raise live stock tends to benefit the entire farming community. We who live in the Corn Belt might with equal consistency ask that some sort of tax be devised that would deprive the sugar raisers of Louisiana of the privilege of buying corn in the open market. It is true that a tariff duty has been placed on corn, but that is a joke—a very extreme joke.

Mr. President, we are always talking about building up industries here. I am speaking to my friend from Louisiana [Mr. BROUSSARD], who is a protectionist, and I am speaking to my friend on the other side of the Chamber, the chairman of the committee [Mr. MCCUMBER], who is a protectionist. Here is an industry that is growing, and growing rapidly. We are getting some raw materials from abroad that are thrown away, or almost thrown away, over there, bringing them here, employing people, and producing cheap feed; and the industry is asking no protection upon its labor. Now it is proposed to tax this industry out of existence; that is all it amounts to, to tax these cheap foods out of existence. We are in exactly the same situation we would be in if we should pass a law denying ourselves water, something we all need, and doing it for the purpose of benefiting some individual who might be making some sort of a manufactured drink.

Mr. President, I think there ought to be no question about this article remaining on the free list.

Mr. BROUSSARD. Mr. President, I wish to withdraw the amendment I offered.

The PRESIDING OFFICER. The Senator from Louisiana withdraws his amendment to the amendment. The question therefore is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. BROUSSARD. I wish to reserve the right to bring this particular amendment to a separate vote in the Senate.

The PRESIDING OFFICER. The right is so reserved.

Mr. MCCUMBER. Mr. President, the committee desires to introduce a new paragraph, after line 18, page 227, as follows:

PAR. 1618a. Nets or sections of nets for use in otter trawl fishing if composed wholly or in chief value of manila or vegetable fiber.

Mr. REED. That is something in addition to the present language of the bill?

Mr. MCCUMBER. Yes; it simply covers what are called otter nets, which are little sacks, in addition to the large nets which are attached to it for the purpose of preventing all the weight in the fish catch from coming at one point. They are not produced in the United States, I understand.

Mr. REED. As it is an addition to the free list, I do not oppose it.

The amendment was agreed to.

The next amendment was, at the top of page 228, to strike out:

PAR. 1620. Nuts: Crude in the shell and broken coconut meat or copra, not shredded, desiccated, or prepared in any manner, and not specially provided for; palm nuts and palm-nut kernels.

And in lieu thereof to insert:

PAR. 1620. Oil-bearing seeds and nuts: Copra, hempseed, palm nuts, palm-nut kernels, tung nuts, rapeseed, perilla and sesame seed, and all other seeds and nuts, not specially provided for, when the oils derived therefrom are free of duty.

Mr. MCCUMBER. I wish to modify the committee amendment. I move, on line 5, after the word "Copra" and the comma, to insert the word "coconuts" and a comma, so that it will read:

Oil-bearing seeds and nuts: Copra, coconuts, etc.

The amendment to the amendment was agreed to.

Mr. MCCUMBER. On line 7 in the amendment I move to strike out the words "and all other seeds."

The amendment to the amendment was agreed to.

Mr. GOODING. I ask the Senator from North Dakota if it is not possible to let the copra amendment go over until to-morrow? I expect to offer an amendment to it. I had no idea it would be reached to-day, but I shall be ready to-morrow morning. I have not the figures here which I would like to discuss when my amendment is offered, and I am not prepared to discuss it now.

Mr. MCCUMBER. Again I call the attention of Senators to the fact that all the committee amendments must be disposed of by 4 o'clock to-morrow afternoon. I have tried my best to get Senators to remain here and have their amendments ready, so that we may dispose of the committee amendments by 4 o'clock to-morrow. Otherwise we are going to have a lot of committee amendments which will have to be voted on at some future day without any consideration whatever.

Mr. LODGE. They have to be voted on at 4 o'clock.

Mr. MCCUMBER. They have to be voted on by 4 o'clock to-morrow if they are committee amendments or they can not be offered at all as committee amendments. I will agree to pass over this amendment temporarily, until we get further along with the free list, but I ask the Senator from Idaho to see if he can not get ready this afternoon. I ask unanimous consent that paragraph 1620 may be passed over.

The PRESIDING OFFICER. Is there objection to the request preferred by the chairman of the Committee on Finance, the Senator from North Dakota? There being none, it is so ordered.

The READING CLERK. The amendment on page 228, line 15, was agreed to July 7.

The next amendment was, on page 228, line 18, after the word "lignaloe," to insert "or bois de rose," and in line 21, after the word "ylang-ylang," to insert "or cananga," so as to read:

PAR. 1625. Oils, distilled or essential: Anise, bergamot, bitter almond, camphor, caraway, cassia, cinnamon, citronella, geranium, lavender, lemon-grass, lime, lignaloe or bois de rose, neroli or orange flower, origanum, palmarosa, pettigrain, rose or attar of roses, rosemary, spike lavender, thyme, and ylang-ylang or cananga.

The amendment was agreed to.

The next amendment was, on page 229, line 10, after the word "or," to strike out "nickel, and" and to insert "nickel," so as to make the paragraph read:

PAR. 1628. Ores of gold, silver, or nickel; nickel matte; ores of the platinum metals; sweepings of gold and silver.

The amendment was agreed to.

The next amendment was, on page 229, after line 12, to insert:

PAR. 1628a. Decalcomania paper not printed.

Mr. McCUMBER. I move to strike out "Decalcomania" and insert in lieu thereof "Duplex decalcomania."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. After line 14, I move to insert a new paragraph, to read as follows:

PAR. 1629a. Pads for horses.

The amendment was agreed to.

The next amendment was, on page 229, line 18, after the word "effects," to strike out "not exceeding $300 in value," so as to make the paragraph read:

PAR. 1631. Personal effects, not merchandise, of citizens of the United States dying in foreign countries.

The amendment was agreed to.

The next amendment was, on page 229, after line 21, to insert:

PAR. 1632a. Pigeons, fancy and racing.

The amendment was agreed to.

The next amendment was, on page 230, line 2, after the word "bars," to insert "sheets, or," so as to make the paragraph read:

PAR. 1634. Platinum, unmanufactured or in ingots, bars, sheets, or plates not less than one-eighth of 1 inch in thickness, sponge, or scrap.

The amendment was agreed to.

The READING CLERK. The amendment on page 230, line 15, was agreed to August 8.

The next amendment was, on page 230, line 19, after the word "abroad," to strike out the comma and "not exceeding $250 in value." so as to read:

PAR. 1637. Professional books, implements, instruments, and tools of trade, occupation, or employment in the actual possession of persons emigrating to the United States owned and used by them abroad; but this exemption shall not be construed to include machinery or other articles imported for use in any manufacturing establishment, or for any other person or persons, or for sale, nor shall it be construed to include theatrical scenery, properties, and apparel; but such articles brought by proprietors or managers of theatrical exhibitions arriving from abroad, for temporary use by them in such exhibitions, and not for any other person, and not for sale, and which have been used by them abroad, shall be admitted free of duty under such regulations as the Secretary of the Treasury may prescribe; but bonds shall be given for the payment to the United States of such duties as may be imposed by law upon any and all such articles as shall not be exported within six months after such importation.

The amendment was agreed to.

The next amendment was, on page 231, line 22, before the word "no," to insert "and," so as to make the paragraph read:

PAR. 1641. Rag pulp; paper stock, crude, of every description, including all grasses, fibers, rags, waste, including jute, hemp and flax waste, shavings, clippings, old paper, rope ends, waste rope, and waste bagging, and all other waste not specially provided for, including old gunny cloth, and old gunny bags, used chiefly for paper making, and no longer suitable for bags.

The amendment was agreed to.

The next amendment was, on page 232, line 1, before the word "cleaned," to strike out "Rice" and insert "Patna rice," so as to make the paragraph read:

PAR. 1643. Patna rice cleaned for use in the manufacture of canned foods.

The amendment was agreed to.

The next amendment was, on page 232, line 3, after the word "crude," to strike out the comma and the words "and sago flour," so as to make the paragraph read:

PAR. 1644. Sago, crude.

Mr. McCUMBER. The committee asks that paragraph 1644 be passed over.

The PRESIDING OFFICER. Without objection, paragraph 1644 will be passed over.

Mr. LODGE. I do not think there will be any objection to the suggestion I am about to propose. I know it is not in order at this time, but it can be offered later. However, as we are passing it, we might as well dispose of it now. In paragraph 1645 I move to insert before the word "sea" the word "fresh," and after the word "and" the words "smelts and," so as to put smelts on the free list.

Mr. McCUMBER. I have no objection to that.

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. In paragraph 1645, page 232, line 6, before the word "sea," insert the word "fresh," and after the word "and" insert the words "smelts, and," so that it will read:

Fresh sea herring and smelts, and tuna fish, fresh, frozen, or packed in ice.

Mr. McCUMBER. It should read: "Fresh sea herring, smelts, and tuna fish, and so forth.

Mr. LODGE. The reason why I placed it that way was in order to have the smelts covered by the language "fresh, frozen, or packed in ice."

Mr. McCUMBER. Very well.

Mr. REED. Is this a proposition to tax salt herring or smoked herring?

Mr. LODGE. Smoked herring is already on the dutiable list.

Mr. REED. You simply make this language conform to the other?

Mr. LODGE. I limit it to fresh sea herring and add smelts.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 232, after line 3, to insert:

PAR. 1644a. Sausage casings, weasands, intestines, bladders, tendons, and integuments, not specially provided for.

The amendment was agreed to.

The next amendment was, on page 232, after line 7, to insert:

PAR. 1645a. Seeds: Chickpeas or garbanzos, cowpeas, and sugar beet.

The amendment was agreed to.

The next amendment was, on page 232, after line 11, to insert:

PAR. 1647a. Shingles.

The amendment was agreed to.

The next amendment was, on page 232, line 23, after the word "and," to strike out "hides" and to insert "hides, raw, uncured or undressed, or dried, salted or pickled, all of the foregoing," so as to make the paragraph read:

PAR. 1653. Skins of all kinds, raw, and hides, raw, uncured or undressed, or dried, salted or pickled, all of the foregoing not specially provided for.

Mr. McCUMBER. I wish to offer some amendments to paragraph 1653. I ask that the committee amendment be disagreed to, beginning on line 23.

The amendment was rejected.

Mr. McCUMBER. The next is paragraph 1653a.

The next amendment was, at the top of page 233, to insert:

PAR. 1653a. Skins of all kinds, not specially provided for, tanned but not finished.

The amendment was agreed to.

The next amendment was, on page 233, line 3, after the word "Sodium," to strike out "Cyanide, nitrate," and to insert "Nitrate," so as to make the paragraph read:

PAR. 1654. Sodium: Nitrate, sulphate, crude, or salt cake, and niter cake.

Mr. WALSH of Montana. I had the impression that by action of the Senate cyanide in all its forms was on the free list.

Mr. McCUMBER. We had cyanide already upon the free list in another section, paragraph 1560a.

Mr. WALSH of Montana. Does that include sodium cyanide?

Mr. McCUMBER. It does.

Mr. WALSH of Montana. May I ask how that section reads?

Mr. McCUMBER. It reads:

PAR. 1560a. Cyanide: Potassium cyanide, sodium cyanide, or cyanide salts, and cyanide mixtures, combinations, and compounds containing cyanide, not specially provided for.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 235, after line 4, to insert:

PAR. 1660a. Altars, pulpits, communion tables, baptismal fonts, shrines, or parts of any of the foregoing, and statuary, imported in good faith for presentation (without charge) to, and for the use of, any corporation or association organized and operated exclusively for religious purposes.

The amendment was agreed to.

The next amendment was, on page 235, line 11, after the word "quartzite," to insert "traprock," so as to make the paragraph read:

PAR. 1661. Stone and sand: Burrstone in blocks, rough or unmanufactured; quartzite; traprock; rottenstone, tripoli, and sand, crude or manufactured; cliff stone, freestone, granite, and sandstone, unmanufactured, and not suitable for use as monumental or building stone; all of the foregoing not specially provided for.

The amendment was agreed to.

The next amendment was, on page 235, line 23, after the figures "1666," to strike out "Tapioca, tapioca flour and cassava" and to insert "Cassava," so as to make the paragraph read:

PAR. 1666. Cassava.

Mr. McCUMBER. I will ask that paragraph 1666 be passed over with other tapioca flour until we can pass on the matter at our meeting this evening.

The PRESIDING OFFICER. Without objection, the paragraph will be passed over.

The next amendment was, on page 236, line 5, before the word "shall," to strike out "except mats," so as to read:

PAR. 1668. Tea not specially provided for, and tea plants: *Provided*, That all cans, boxes, and other immediate containers, including paper, and other wrappings of tea in packages of less than 5 pounds each, and all intermediate containers of such tea, shall be dutiable at the rate chargeable thereon if imported empty.

Mr. LODGE. Mr. President, the reading is so fast that it is impossible almost to follow it. I wanted to offer an amendment to paragraph 1660a, and the first thing I knew we were down at the bottom of the page.

The PRESIDING OFFICER. The paragraph referred to has been agreed to.

Mr. LODGE. I am aware of that now. I was not aware of it when it was up, though I was sitting here and trying to follow the action of the Senate.

Mr. McCUMBER. I ask unanimous consent that the vote by which paragraph 1660a was adopted may be reconsidered.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. LODGE. All I wished to do was to ask the chairman of the committee if he would be willing to withdraw or allow us to strike out the limitation "for presentation." I see no reason why "altars, pulpits, communion tables, baptismal fonts, shrines, or a part of any of the foregoing," which are allowed to come in free for use by any organization for religious purposes, should be confined to what is presented. I do not see why a church itself should not be allowed to bring them in also free. I think it is entirely proper that they should be free, but it seems to me that the limitation ought not to be placed upon them. I suggest simply the words "imported in good faith for the use of any corporation or association."

The PRESIDING OFFICER. Does the Senator offer that as an amendment to the amendment?

Mr. LODGE. I offer it as an amendment to the amendment of the committee.

Mr. McCUMBER. I want to know just what part the Senator proposes to strike out.

Mr. LODGE. I want to strike out the words "for presentation (without charge) to, and." I do not want to have that limitation. The paragraph allows only gifts to come free. If a church purchases an altar or communion table, I think it ought to come in free, just as if it were presented by somebody.

Mr. McCUMBER. That gets right back to the subject of whether we want to let almost everything that is manufactured if it goes into a church come in free. We allow those people who desired to make a free gift to a church the right to do so without being even taxed as a matter of importation, but as the number who probably would make a free gift compared with the amount that would be used for church purposes is almost infinitesimal we did not feel that we ought to open up the whole subject of importation and allow anything which was imported to go into a church to come in free of duty because it was used in the construction of a church or inside of a church.

Mr. FLETCHER. This would not open up everything. It specifies precisely the articles that are permitted to come in. I do not see that it opens up the whole field at all.

Mr. LODGE. We do not tax churches, at least we do not tax them in my State, and I do not believe in putting a duty on articles which go solely into churches. I know that that can not be adopted in regard to stained glass, but I can not see why churches, if they wish to import an altar, should not be allowed to do it if they are to be allowed to have it on presentation.

Mr. DILLINGHAM. Mr. President, I want to say a word about this matter, because it is a question that has been thrashed over in the committee and out of the committee. This paragraph was drawn to meet the exact conditions. I do not know that there is any more reason for failing to impose a duty on marble that goes into the structure of a church than there is upon the wood or brick or anything else.

It will be noticed that this relates to "altars, pulpits, communion tables, baptismal fonts, shrines, or parts of any of the foregoing." It does not relate to works of art. We have another paragraph which provides for them. The simple question comes up whether the marble manufacturers of America shall have to compete with the marble manufacturers of Italy on matters that are purely of utility in the construction of churches.

The fonts and other items mentioned in the paragraph are not works of art at all. They are a part of the structure. They are built on conventional lines. There is no more reason why we should exempt them from duty than anything else which enters into the church structure.

The marble dealers of Vermont and other sections of the country and representatives of the national association presented their views to the committee and made it very plain that they have to compete with Italian construction, and they objected seriously to being put to that sacrifice. I very much hope that the amendment reported by the committee will be adopted without amendment.

Mr. McCUMBER. Let me say, in addition to what the Senator from Vermont has stated, that the people who represented the church side of this matter were entirely satisfied with the provision as we have written it.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Massachusetts to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. LODGE. Now, as these are not covered by the general provision about works of art, I move to insert before the word "altars," in line 5, the words "works of art, whether serving a useful purpose or not."

Mr. WADSWORTH. May I ask the chairman of the committee if works of art are covered in another paragraph?

Mr. McCUMBER. They are.

Mr. LODGE. I do not think these are covered. This is a new paragraph.

Mr. WADSWORTH. Did I not see in the bill somewhere a paragraph relating to works of art?

Mr. LODGE. The Senator saw three.

Mr. McCUMBER. There are several very long ones, and I thought we included almost everything on earth in them that might be called works of art. The Senator will find them covered in paragraph 1685, page 240; paragraph 1686, page 241; paragraph 1687, page 241; paragraph 1688, page 242; and paragraph 1689, page 243. I think those paragraphs cover about everything that ought to be covered.

Mr. LODGE. That is the existing law. Those articles are on the free list very properly, but it seems to me, as the point had been made, that this amendment should be agreed to.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Massachusetts to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question is on the amendment of the committee, inserting paragraph 1660a.

The amendment was agreed to.

The PRESIDING OFFICER. The next amendment will be stated.

The READING CLERK. On page 236, line 21, insert a new paragraph, as follows:

PAR. 1670a. Tin in bars, blocks, or pigs, and grain or granulated and scrap tin.

Mr. McCUMBER. On page 236, line 23, after the word "tin" at the end of the paragraph, I move to insert a comma and the words "including scrap tin plate."

The amendment to the amendment was agreed to.

Mr. LODGE. I would like to ask the chairman of the committee whether any consideration was given by the committee to the proposed duty on tin urged by the smelters in this country?

Mr. McCUMBER. We certainly gave consideration to all matters which were presented to the committee.

Mr. LODGE. That was presented to the committee.

Mr. McCUMBER. All the tin ores have to be imported from abroad.

Mr. LODGE. Yes; I know that, but there was a proviso in the previous law giving the President certain powers. I presented the matter of pig tin to the committee and I wondered whether they had looked into the argument at all.

Mr. McCUMBER. I can not recall just now what the particular presentation was, but I think that we looked into every matter which came before the committee.

Mr. LODGE. With respect to the smelting of tin?

Mr. McCUMBER. Yes.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment as amended.

The amendment as amended was agreed to.

The next amendment was, at the top of page 237, to insert:

PAR. 1671a. Turmeric.

The amendment was agreed to.

The next amendment was, on page 237, after line 5, to insert:

PAR. 1675a. Wafers, not edible.

The amendment was agreed to.

The next amendment was, on page 237, line 7, after the figures "1676," to strike out "Wax, animal," and to insert "Wax: Animal," so as to make the paragraph read:

PAR. 1676. Wax: Animal, vegetable, or mineral, crude.

The amendment was agreed to.

Mr. McCUMBER. Mr. President, after the word "mineral," on line 8, I move to strike out "crude" and to insert the words "not specially provided for."

The amendment was agreed to.

The next amendment was, on page 237, line 11, after the word "purposes," to insert "shall be admitted free of duty under such regulations as the Secretary of the Treasury may prescribe," so as to make the paragraph read:

PAR. 1677. Disks of soft wax, commonly known as master records, or metal matrices obtained therefrom, for use in the manufacture of sound records for export purposes, shall be admitted free of duty under such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

Mr. McCUMBER. After the word "provided," on line 22, page 237, I move to insert the following:

That all jewelry and similar articles of personal adornment having a value of $300 or more, brought in by a nonresident of the United States, shall, if sold within three years after the date of the arrival of such person in the United States, be liable to duty at the rate or rates in force at the time of such sale, to be paid by such person: *Provided further,*

Mr. WADSWORTH. Does the Senator from North Dakota believe that the enforcement of that amendment would be practicable from the administrative standpoint?

Mr. McCUMBER. The officers think that, while they can not get such offenders at all now, if this provision shall be incorporated in the law they may get a considerable number of them.

Mr. WADSWORTH. Well, I wish them luck.

Mr. McCUMBER. So do I.

Mr. JONES of New Mexico. Mr. President, it seems to me if we are going to do anything of the sort which is here proposed we will have to provide for the entry in bond or something of that kind. We can never follow up the wearing apparel of individuals for three years in order to find out whether or not it is sold. I do not believe in the idea of enacting a law simply to catch somebody. There ought to be provided a practical method of dealing with the problem or else we should do nothing about it. It has been suggested that the officers thought they would get some of them. I do not believe that to attempt to ferret out and follow individuals for three years in order that the United States Government may find out if some little trinket or ornament or article of wearing apparel has been sold is practicable at all.

Mr. McCUMBER. Would the Senator require every nonresident who enters our ports and brings in $300 worth of jewelry to give bond that he shall not sell that jewelry within three years?

Mr. JONES of New Mexico. I think it an impractical proposition. It ought to be gone about in some other way.

Mr. McCUMBER. Under the present law, a foreign lady who enters the United States, bringing with her several thousand dollars' worth of jewelry, may come here and stay or she may conclude in a day or two that she does not wish to remain in the United States and may sell that jewelry in the United States, go back again, and repeat the operation several times in a year. It is to prevent such frauds as that that we are asking the change in the law. The jewelers who have considered the matter think that this paragraph will reasonably well protect them.

Mr. JONES of New Mexico. Mr. President, I think a better plan would be to amend the administrative part of the law. A case such as the Senator from North Dakota mentions would be a fraud upon the law. It would therefore be far better to amend the administrative feature of the law so that such persons could be prosecuted because of violating the customs laws.

Mr. McCUMBER. But such person is not in the United States; the individual gets out of the United States and he can not be reached.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was agreed to.

Mr. FLETCHER. Mr. President, I ask unanimous consent to have inserted in the RECORD an editorial from the New York Herald.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Herald, Monday, August 14, 1922.]

THE SUGAR WE EAT, THE CLOTHES WE WEAR.

After one year and one month of variegated discussion and complicated pulling of wires and rolling of logs the Senate is about ready to pass and send to conference the Fordney-McCumber tariff bill. The final vote is assigned by unanimous consent to Saturday next. The debates and other proceedings meanwhile during the present week are not likely to affect greatly the general complexion of a measure whereof the specially offensive features have been publicly exhibited by the New York Herald and other newspapers, to the amazement and indignation of good citizenship without regard to party.

Senator CALDER explained day before yesterday that the consideration impelling him to defend and support the price boosting Fordney-McCumber tariff bill was that "New York's interests as a port, great as they are, are minor compared with its interests as a factory. If there must be a choice," he continued, "between favoring, fostering, and benefiting New York as a factory or New York as a port the lesser must yield to the greater, for New York is the greatest manufacturing city in the world." Further on in his able speech the Senator referred to "the unanimous demand of the American people for a protective tariff."

With due respect to the requirements of loyalty to organized partisanship in legislative proceedings, the New York Herald must submit the idea that any definition of tariff protection is defective, and even specious, which ignores the plain distinction between a justly protective tariff and an outrageously profiteering tariff. It is the latter sort of a tariff which is proposed for infliction on a hundred and ten million people by the votes of statesmen in certain proven cases personally and pecuniarily interested in the inordinate boosting of taxation.

The exact balance between the demands of New York as a great port and New York as a great manufacturing city need not be ciphered out by any Senator as long as the immediate issue is concerned with neither. It is the clothes we wear, the sugar we eat that are now mainly demanding protection against exploitation in the form of excessive rates by the votes of chosen trustees of the public interest who do not hesitate to admit a direct personal interest in the unprecedented dig into the pockets of their clothes-wearing and sugar-eating fellow citizens.

The next amendment was, on page 238, at the beginning of line 6, to strike out "$250" and to insert "$100," so as to make the additional proviso read:

Provided further, That up to but not exceeding $100 in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission or intended for sale, shall be admitted free of duty.

The amendment was agreed to.

The next amendment was, on page 238, line 15, after the word "Wood:" to strike out "Logs and round, unmanufactured timber" and to insert "Logs; timber, round, unmanufactured, hewn, sided or squared otherwise than by sawing; round timber used for spars or in building wharves," so as to read:

PAR. 1683. Wood: Logs; timber, round, unmanufactured, hewn, sided or squared otherwise than by sawing; round timber used for spars or in building wharves.

Mr. McCUMBER. Mr. President, on page 238, line 17, after the semicolon and the word "sawing," I move to insert the words "pulp woods" and a semicolon.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on the same page, line 19, after the word "shingle," to strike out "bolts" and insert "bolts; and"; and in line 20, after the word "one," to strike out "side" and insert "side;" so as to read:

firewood, handle bolts, shingle bolts; and gun blocks for gunstocks, rough hewn or sawed or planed on one side; sawed boards, planks, deals, and other lumber, not further manufactured than sawed, planed, and tongued and grooved; clapboards, laths, ship timber; all of the foregoing not specially provided for.

The amendment was agreed to.

The next amendment was, on page 239, line 3, after the word "of," to strike out "government," and to insert "government", so as to make the proviso read:

Provided, That if there is imported into the United States any of the foregoing lumber, planed on one or more sides and tongued and grooved, manufactured in or exported from any country, dependency, province, or other subdivision of government which imposes a duty upon such lumber exported from the United States, the President may enter into negotiations with such country, dependency, province, or other subdivision of government to secure the removal of such duty, and if such duty is not removed he may by proclamation declare such failure of negotiations, and in such proclamation shall state the facts upon which his action is taken together with the rates imposed, and make declaration that like and equal rates shall be forthwith imposed as hereinafter provided; whereupon, and until such duty is removed, there shall be levied, collected, and paid upon such lumber, when imported directly or indirectly from such country, dependency, province, or other subdivision of government, a duty equal to the duty imposed by such country, dependency, province, or other subdivision of government upon such lumber imported from the United States.

The amendment was agreed to.

The next amendment was, on page 239, after line 19, to insert:

PAR. 1683a. Woods: Cedar, lignum-vitæ, lancewood ebony, box, granadilla, mahogany, rosewood, satinwood, Japanese white oak, Japanese maple, and all forms of cabinet woods, in the log, rough, or hewn only.

Mr. McCUMBER. After the word "lancewood," in line 20, I move to insert a comma.

The amendment was agreed to.

The next amendment was, on page 240, line 1, after the word "provided," to strike out "for in this section," and to insert "for," so as to make the paragraph read:

PAR. 1684. Woods: Sticks of partridge, hair wood, pimento, orange, myrtle, bamboo, rattan, india malacca joints, and other woods not specially provided for, in the rough, or not further advanced than cut into lengths suitable for sticks for umbrellas, parasols, sunshades, whips, fishing rods, or walking canes.

The amendment was agreed to.

The next amendment was, on page 240, at the beginning of line 7, to strike out "pen and ink or pencil and" and to insert "pen, ink, pencil, or," so as to make the paragraph read:

PAR. 1685. Original paintings in oil, mineral, water, or other colors, pastels, original drawings and sketches in pen, ink, pencil, or water colors, artists' proof etchings unbound, and engravings and woodcuts unbound, original sculptures or statuary, including not more than two replicas or reproductions of the same; but the terms "sculpture" and "statuary" as used in this paragraph shall be understood to include professional productions of sculptors only, whether in round or in relief, in bronze, marble, stone, terra cotta, ivory, wood, or metal, or whether cut, carved, or otherwise wrought by hand from the solid block or mass of marble, stone, or alabaster, or from metal, or cast in bronze or other metal or substance, or from wax or plaster, made as the professional productions of sculptors only; and the words "painting" and "sculpture" and "statuary" as used in this paragraph shall not be understood to include any articles of utility, nor such as are made wholly or in part by stenciling or any other mechanical process; and the words "etchings," "engravings," and "woodcuts" as used in this paragraph shall be understood to include only such as are printed by hand from plates or blocks etched or engraved with hand tools and not such as are printed from plates or blocks etched or engraved by photochemical or other mechanical processes.

The amendment was agreed to.

The next amendment was, on page 242, line 20, after the word "windows," to strike out "imported by houses of worship" and to insert "which are works of art and valued at $15 or more per square foot, when imported to be used in houses of worship," so as to make the paragraph read:

PAR. 1688. Works of art, productions of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution or to any State or municipal corporation or incorporated religious society, college, or other public institution, including stained or painted window glass or stained or painted glass windows which are works of art and valued at $15 or more per square foot, when imported to be used in houses of worship, and excluding any article, in whole or in part, molded, cast, or mechanically wrought from metal within 20 years prior to importation; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe.

Mr. WALSH of Montana. Mr. President, I very sincerely hope that the Committee on Finance will be constrained to withdraw this amendment, or at least to suffer a very important modification of it. The ordinary stained glass carries a duty of 60 per cent. The House proposed, however, to relieve from that duty stained-glass windows and works of art purchased for presentation to houses of worship. Bear in mind, Mr. President, that the window must be a work of art; secondly, the window must be presented by some one to the church; and, thirdly, it must be for use in the church. We have exempted, and very properly so, from all forms of duty all works of art, and we have just now adopted a provision, paragraph 1660a, putting on the free list—

Altars, pulpits, communion tables, baptismal fonts, shrines, or parts of any of the foregoing, and statuary, imported in good faith for presentation (without charge) to, and for the use of, any corporation or association organized and operated exclusively for religious purposes.

As pointed out, these need not even be works of art, but they are for the decoration of churches, usually some delicate work of sculpture, and they come in free; but when it comes to windows for the admiration of all people, works that challenge the admiration of travelers all over the world, those are subjected to a duty of 60 per cent unless, indeed, Mr. President, they cost more than $15 a square foot. That practically excludes everything except such windows as may be commanded by people of unlimited means or churches that have resources away beyond those of the ordinary religious organization. Just think of it! A window, we will say, 5 by 10 feet contains 50 square feet. Fifteen dollars per square foot would amount to $750. So the free-list provision would apply only to windows that cost more than $750.

The American manufacturers who are asking for this duty tell the committee that they do not make any stained-glass windows that cost more than $13 per square foot. So the result would be that churches of moderate means and individuals of moderate means, who would not be able to buy exceedingly expensive windows, would be burdened with this tax, while the men, especially the wealthy individuals, and churches that would buy the exceedingly high-priced windows would be entitled to have them admitted duty free. This provision I think ought to be left as the House of Representatives had it, reading as follows:

PAR. 1688. Works of art, productions of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution or to any State or municipal corporation or incorporated religious society, college, or other public institution, including stained or painted window glass or stained or painted glass windows imported by houses of worship, and excluding any article, in whole or in part, molded, cast, or mechanically wrought from metal within 20 years prior to importation; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe.

Mr. President, it has been repeatedly asserted that these duties are imposed upon these various commodities because of the difference in the rates of wages paid to labor in this country and abroad; but it will be borne in mind that these works must be works of art—not ordinary works of artisans, but works of artists. These are works of artists, and you can not compare wages paid to artists in one country with wages paid to artists in another country. Of course, these are the works of professionals, who have the same skill that a sculptor has, the same skill that a painter has, in the first place, in devising the figures and the allegorical illustrations which the windows present. I can not understand why this particular class of works of art should be treated in a manner different from other works of art. Second, Mr. President, I can not understand why these highly artistic productions for the beautification of temples for public worship should be taxed 60 per cent and the altars and pulpits and communion rails and baptismal fonts and other works of that character should be permitted to come in free. The thing is entirely inconsistent.

Mr. President, when one goes to buy a picture, the work of an artist, it would be ridiculous, would it not, to put a duty on works of art in order to compel the American purchaser to buy the work of an American artist? That is to debase art. When he goes to buy a work of art, he ought to be permitted to buy the work of art wherever he can find it. Of course, these are not matters of speedy consumption and production and all that kind of thing. These stand for ages. I speak feelingly about this matter, because we have just completed in my city a lovely cathedral that I am sure will awaken the admiration of people who come after us 300 to 500 years from now. Why should the people in making that beautiful temple be obliged to buy what they believe to be an article of inferior production in America for the beautification of this temple which they desire to erect?

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from New Jersey?

Mr. WALSH of Montana. I yield to the Senator.

Mr. FRELINGHUYSEN. I understand that the order for the imported glass for that cathedral has not been entirely delivered. Is not that true?

Mr. WALSH of Montana. That is quite true.

Mr. FRELINGHUYSEN. The committee, in considering that question, talked with one of the dignitaries of the church, and agreed that on any order which had not been delivered a sufficient time should be given to deliver the glass which had been ordered.

I want to say to the Senator from Montana that I do not think it is quite fair to classify the ordinary antique stained glass and other glassware of high artistic value with the cheaper glassware that is being utilized generally in churches and schools and libraries. That character of glass is being manufactured in this country to a large extent.

Mr. WALSH of Montana. Mr. President, will the Senator suffer an interruption?

Mr. FRELINGHUYSEN. Yes.

Mr. WALSH of Montana. I fully agree with the Senator about that and I make no complaint about that at all. This paragraph endeavors to make just exactly that distinction. Nothing will fall under this paragraph unless it is indeed a work of art. It is not an ordinary production that goes everywhere. The first requirement is that it be a work of art.

Mr. FRELINGHUYSEN. Mr. President, I have sent to my office for a piece of glassware that was made in this country by American workmen. It comes within this classification. It is partly etched and partly inlaid with lead. There are thousands of American workmen making that type of glassware in this country, and the competition in Europe of that type of glassware is extensive.

I myself wrote to a number of the dignitaries of the various churches in this country and asked them what their position was on this glassware question, and they said that on this cheap glassware manufactured in this country they did not believe they could take the position that the American workmen who are making that type of glassware should not be protected. That is the position of a large number of the churchmen of this country who are buying this class of glassware; and if we are to pursue the policy of protecting American workmen we must protect this cheaper type of glassware, which is in general commercial use, or else we must absolutely destroy the industry here by allowing it to come in without the protection. That is the situation. In a few moments I will have here a pane of

glass which has been made in this country, and while it is artistic, nevertheless it is made generally and commercially by American workmen by the etching process.

Mr. WALSH of Montana. Mr. President, the Senator from New Jersey has stated the position of those most directly interested in this provision as I understand it. They have nothing whatever to say, they do not care to express an opinion either one way or the other, about the rate of duty that ought to be or ought not to be imposed upon the ordinary stained glass, such as is referred to in the paragraph under the head of "Glassware." They are dealing only with those particular products which are justly classified as works of art. They assert, in that connection, that this provision is practically valueless. It excludes all windows that are used in even the better class of churches, and leaves only some exceptional thing that some one may care to pay an exorbitant price for, over $15 a square foot. Of course, everybody can realize upon the slightest reflection that a window that is worth more than $15 a square foot is not going to go into even a rather elaborate and expensive cathedral, so that the provision in the bill is valueless.

I think the amendment ought not to be agreed to by the Senate. It is entirely inconsistent with what the Senate has done repeatedly this afternoon in putting on the free list other examples of what might be spoken of as works of art, and also other structures for the decoration of houses of worship. If the committee thinks otherwise, certainly orders already placed ought not to be subject to this duty.

The PRESIDING OFFICER. The time of the Senator from Montana has expired.

Mr. McCUMBER. Mr. President, the Senator from Montana has not made very clear to us where he would have the line of demarcation between what he regards as works of art in stained-glass windows and what he does not regard as works of art. I assume that we shall have to accept as works of art practically everything in stained glass with images or pictures of any kind upon it. We may not admire the work, we may not think it is artistic, but nevertheless it would still be a work of art.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. McCUMBER. I yield.

Mr. WALSH of Montana. That is taken care of in the bill, because it is expressly provided there that "such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe"; so he is to prescribe the regulations as to what shall and what shall not constitute a work of art.

Mr. McCUMBER. Mr. President, I should hate to trust even the Secretary of the Treasury to determine what is a work of art in a stained-glass window. I think we would come nearer to it in fixing the limitation of $15 per square foot as that which may be received in presentation to any church. Why, Mr. President, there are people here who speak of these pictures in the Dome as being works of art—pictures that were painted a great many years ago, showing our great men of that time with effeminate faces that look more like those of 16-year-old schoolgirls than like the faces of strong, vigorous men, as we believe them to have been; and yet we regard these pictures generally as works of art.

I do not know who is to determine that question in the matter of a picture upon a stained-glass window. Most of the pictures that I have ever seen upon stained-glass windows of individuals who lived in the olden days do not look much like human beings who live to-day, and yet they are regarded as great works of art, and I am willing to concede that they are artistic. I mention the fact only to indicate that we ought to have a different standard than the idea of the Secretary of the Treasury or anyone else to determine what is artistic, and I think possibly the value determines that better than we can determine it in the Senate or by delegating that right to some one else.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I do.

Mr. REED. It is a very natural conclusion for any man who stands as the advocate of a high tariff that the real test of art is the money value.

Mr. McCUMBER. That seems to be the case.

Mr. REED. I understand; that is the natural conclusion.

Mr. McCUMBER. And I think that is the general acceptation of the American people.

Mr. REED. I will also agree with the Senator's argument that the Senate is absolutely incompetent to set up any standard of art except the money standard——

Mr. McCUMBER. I think that is right.

Mr. REED. Particularly while the Senator from North Dakota is chairman of the Finance Committee.

Mr. McCUMBER. Yes; and I think possibly that would apply if the Senator from Missouri were chairman of the committee.

Mr. REED. I think if I were to buy a picture I could do a little better than to ask for one 3 feet wide and 4 feet long and costing a certain amount of money.

Mr. McCUMBER. The Senator might take some other standard, but I think perhaps on this side of the Chamber we would not agree with him any better than he agrees with us.

Mr. REED. Mr. President, if the Senator will pardon me, since he is about to yield the floor, if we were to set up a money standard we would set up this sort of a test: An American millionaire goes over to Europe and falls into the hands of some European art promoter, and if that European art promoter can persuade him to pay a sufficiently high price the article will come in free of duty as a work of art; but if a man should go over there and buy something for what it was really worth, being actually a judge of art, he probably would have to pay a duty to get in.

We are confronted here only by an administrative feature. It seems to me it ought not to be difficult for the Treasury Department to establish rules and regulations which would differentiate between a work of commerce and a work of art. I am perfectly well aware that the head of the entire Treasury Department might be a better judge of rates of interest and discounts, but I apprehend that we can get somebody who is capable of passing upon this question. The truth about the matter is that this is a bunglingly drawn provision in the bill, and it would be well to clarify it a little before we pass on it.

Mr. WALSH of Montana. Mr. President, I hope the amendment will be rejected, but I move to amend the committee amendment.

The PRESIDING OFFICER. The Senator has discussed the amendment the allotted time.

Mr. WALSH of Montana. I am entitled to propose an amendment, am I not?

The PRESIDING OFFICER. If it is the purpose of the Senator from Montana to present an amendment, he certainly may do so.

Mr. WALSH of Montana. I move to amend by striking out "$15" in line 22 and substituting "$7.50."

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Montana to the committee amendment.

On a division the amendment to the amendment was rejected.

Mr. WALSH of Montana. I move to amend by transposing the concluding paragraph and otherwise amending, so that the amendment shall read:

Which are works of art when imported to be used in houses of worship and when ordered after the passage of this act, valued at $15 or more per square foot.

So that the restriction will not apply to orders heretofore placed. I believe that ought to be accepted.

Mr. FRELINGHUYSEN. The committee has an amendment prepared to take care of this situation, which is being considered now. The phraseology can not be presented to the Senate now.

Mr. McCUMBER. I do not object to the amendment to the committee amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 243, after line 11, to insert:

PAR. 1689a. Worm gut, unmanufactured.

Mr. McCUMBER. On page 243, line 12, after the word "unmanufactured" in the committee amendment, the committee proposes to insert a comma and the words "and surgical catgut."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. CALDER. Mr. President, I wish to give notice that I shall ask for a separate vote in the Senate on paragraphs 204a and 302.

Mr. McCUMBER. I desire now to return to paragraph 1620, on page 228, which was passed over.

The PRESIDING OFFICER. The Secretary will state the amendment.

The READING CLERK. On page 228, beginning with line 1, it is proposed to strike out:

PAR. 1620. Nuts: Crude in the shell and broken coconut meat or copra, not shredded, desiccated, or prepared in any manner, and not specially provided for; palm nuts and palm-nut kernels.

And to insert in lieu thereof:

PAR. 1620. Oil-bearing seeds and nuts: Copra, coconuts, hempseed, palm nuts, palm-nut kernels, tung nuts, rapeseed, perilla and sesame seed, and all other seeds and nuts not specially provided for when the oils derived therefrom are free of duty.

The amendment was agreed to.

Mr. McCUMBER. We have passed over a number of paragraphs, but I am going to ask that the Senate recess until to-morrow at 10 o'clock, and I hope we shall be able, with the concurrence of Senators, to pass along as rapidly as possible until we get all the committee amendments acted upon before 4 o'clock to-morrow.

I now ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 10 o'clock.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

Mr. CALDER and Mr. KELLOGG each submitted two amendments intended to be proposed by them to the pending bill, which were referred to the Committee on Finance and ordered to be printed.

Mr. WATSON of Indiana submitted an amendment intended to be proposed by him to the pending bill, which was referred to the Committee on Finance and ordered to be printed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. EDGE:

A bill (S. 3905) for the relief of First Lieut. Harry L. Rogers, jr.; to the Committee on Claims.

By Mr. BORAH:

A bill (S. 3906) granting a pension to Sevilla Heikenhorn; and

A bill (S. 3907) granting a pension to Malisa Honeycutt (with an accompanying paper); to the Committee on Pensions.

By Mr. STANLEY (for Mr. KING):

A bill (S. 3908) to extend the Market News Service to certain cities; to the Committee on Agriculture and Forestry.

COMPILATION OF LAWS RELATING TO NAVY.

On motion of Mr. HALE it was—

Ordered, That the compilation of existing laws relating to the Navy, Navy Department, and Marine Corps, with annotations showing how such laws have been construed and applied by the Navy Department, the Comptroller of the Treasury, the Attorney General, or the courts, transmitted to the Senate by the Acting Secretary of the Navy, in response to Senate Resolution 262, Sixty-third Congress, be printed as a Senate document.

EXECUTIVE SESSION.

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 6 o'clock and 55 minutes p. m.) the Senate, under the order previously made, took a recess until to-morrow, Tuesday, August 15, 1922, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate August 14 (legislative day of August 3), 1922.

PROMOTIONS IN THE CONSULAR SERVICE.

CONSUL OF CLASS 4 TO CONSUL OF CLASS 3.

Mahlon Fay Perkins, of California.

CONSULS OF CLASS 5 TO CONSULS OF CLASS 4.

James B. Young, of Pennsylvania.
Arthur C. Frost, of Massachusetts.
Edward A. Dow, of Nebraska.
John R. Putnam, of Oregon.
Harry Campbell, of Kansas.

CONSULS OF CLASS 6 TO CONSULS OF CLASS 5.

James B. Stewart, of New Mexico.
Carl R. Loop, of Indiana.
George C. Hanson, of Connecticut.
Lucien Memminger, of South Carolina.
Clement S. Edwards, of Minnesota.
Donald D. Shepard, of the District of Columbia.
Lowell C. Pinkerton, of Missouri.
Harold B. Quarton, of Iowa.

Felix Cole, of the District of Columbia, formerly a consul of class 5, to be a consul of class 5 of the United States of America.

CONSULS OF CLASS 7 TO CONSULS OF CLASS 6.

Parker W. Buhrman, of Virginia.
Dayle C. McDonough, of Missouri.
John R. Bradley, of Oklahoma.
Paul C. Squire, of Massachusetts.
H. Merle Cochran, of Arizona.
Joseph F. McGurk, of New Jersey.
Charles J. Pisar, of Wisconsin.
George A. Makinson, of California.
Renwick S. McNiece, of Utah.

John D. Johnson, of Vermont, now a drafting officer in the Department of State, to be a consul of class 6 of the United States of America.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY.

AIR SERVICE.

First Lieut. Russell Lowell Williamson, Infantry, with rank from February 19, 1920.

First Lieut. John Lamont Davidson, Infantry, with rank from July 2, 1920.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 14 (legislative day of August 3), 1922.

APPOINTMENTS IN THE REGULAR ARMY.

QUARTERMASTER GENERAL.

Col. William H. Hart, Quartermaster Corps, to be Quartermaster General for a period of four years from date of acceptance, with rank as major general from August 28, 1922.

ADJUTANT GENERAL.

Col. Robert Courtney Davis, Adjutant General's Department (Infantry), to be The Adjutant General for a period of four years from date of acceptance, with the rank of major general from September 1, 1922.

POSTMASTERS.

GEORGIA.

Robert W. Graves, Toccoa.

KENTUCKY.

Newell R. Downing, Mays Lick.

WISCONSIN.

Charles S. Brent, Oconomowoc.
Emil Klentz, Reeseville.

SENATE.

TUESDAY, *August 15, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. McCUMBER. Mr. President, from the Committee on Finance I report certain amendments, which have been printed, and I ask that they may lie on the table.

The PRESIDENT pro tempore. It is so ordered.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Moses	Smith
Ball	Harrison	Myers	Smoot
Calder	Heflin	Newberry	Sterling
Cameron	Kellogg	Nicholson	Trammell
Cummins	Kendrick	Phipps	Underwood
Curtis	Lodge	Pomerene	Warren
Dillingham	McCormick	Robinson	Watson, Ga.
Ernst	McCumber	Sheppard	Watson, Ind.
Frelinghuysen	McLean	Shortridge	
Gooding	McNary	Simmons	

Mr. CURTIS. I wish to announce that the Senator from Minnesota [Mr. NELSON] is absent on account of a death in his family.

I also desire to announce that the Senator from Nevada [Mr. ODDIE] is necessarily absent on official business.

Mr. POMERENE. I wish to announce that my colleague [Mr. WILLIS] is detained because of serious illness in his family. I ask that this announcement may stand for the day.

Mr. UNDERWOOD. I desire to announce that the Senator from Nevada [Mr. PITTMAN] is absent because of illness in his family.

The PRESIDENT pro tempore. Thirty-eight Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of absent Senators and the following Senators answered to their names when called:

Brandegee Norbeck

The following Senators entered the Chamber and answered to their names:

Bursum	Jones, Wash.	New	Wadsworth
Capper	Keyes	Pepper	
Dial	Lenroot	Stanfield	

The PRESIDENT pro tempore. Fifty Senators having answered to their names, there is a quorum present.

Mr. McCUMBER. Mr. President, I ask that the Senate now return to paragraph 1451, "Photographic cameras and parts thereof."

Mr. SIMMONS. Mr. President, I wish to ask the Senator from North Dakota if he will not let that paragraph go over for a few moments until I can send for the Senator from Missouri [Mr. REED]? The paragraph went over yesterday at his request. The Senator from Missouri stated that this morning he might be in a position where it would be necessary for him to discuss the matter, or that he might be in a position where he would consent to have action taken without discussion. The Senator from Missouri is not here, but I think he will be here in a few moments.

Mr. McCUMBER. The Senator from Missouri asked that the paragraph be passed over and we passed it over. We have disposed of all the other matters upon the free list except that which the Senator from Missouri desired to have passed over. We had a quorum call in order that Senators might be present. Now it seems to me that the Senator ought to be here this morning.

Mr. SIMMONS. I left the Chamber about 6 o'clock yesterday evening. I will ask the Senator if we finished all the items in the paragraph covering special provisions?

Mr. McCUMBER. On the free list I think there were two or three paragraphs passed over, and two of them, I know, were passed over at the request of the Senator from Missouri.

Mr. SIMMONS. Yes; but the Senator from North Dakota did not understand me. My inquiry was whether on yesterday we finished the consideration of the provisions under the section with reference to special provisions. We were operating under that section when I left the Chamber on yesterday evening, and there were a number of items which had not been finished in that section.

Mr. McCUMBER. There are a number of amendments yet to be offered to the administrative features. I will ask the Senator from Connecticut [Mr. McLEAN] if he is ready now to have the paragraphs in reference to laces taken up this morning?

Mr. McLEAN. Yes.

Mr. McCUMBER. Then, I ask to have paragraph 1451 passed over, and that the Senate may proceed to the consideration of paragraph 1430 and the amendment which I now send to the desk to come in on page 193 of the bill.

Mr. SIMMONS. I will state to the Senator from North Dakota that I am informed that the Senator from Missouri is on his way to the Chamber.

Mr. McCUMBER. Mr. President, I desire to state that the amendment to paragraph 1430, which I offer on behalf of the Committee on Finance, is, on page 193, to strike out all of the matter beginning with line 20 down to and including line 9, page 195—that includes the entire lace paragraph—and to insert in lieu thereof the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from North Dakota on behalf of the Committee on Finance will be stated.

The READING CLERK. On page 193, after line 19, it is proposed to strike out paragraph 1430, as originally proposed to be amended by the Committee on Finance, and in lieu thereof to insert the following:

PAR. 1430. Laces, lace window curtains, burnt-out laces and embroideries, capable of conversion into burnt-out laces, nets and nettings, embroidered or otherwise, veils, veilings, flouncings, all-overs, neck rufflings, flutings, quillings, ruchings, tuckings, insertions, galloons, edgings, trimmings, fringes, gimps, ornaments; braids, loom woven and ornamented in the process of weaving, or made by hand, or on any braid machine, knitting machine, or lace machine; and all fabrics and articles composed in any part, however small, of any of the foregoing fabrics or articles; all the foregoing, finished or unfinished (except materials and articles provided for in paragraphs 919, 1006, 1404, 1406, and 1424 of this act), by whatever name known, and to whatever use applied, and whether or not named, described, or provided for elsewhere in this act, when composed wholly or in chief value of yarns, threads, filaments, tinsel wire, lame, bullions, metal threads, beads, bugles, spangles, or products of cellulose provided for in paragraph 1215 of this act, 90 per cent ad valorem; embroideries not specially provided for, and all fabrics and articles embroidered in any manner by hand or machinery, whether with a plain or fancy initial, monogram, or otherwise, or tamboured, appliqued, scalloped, or ornamented with beads, bugles, or spangles, or from which threads have been omitted, drawn, punched, or cut, and with threads introduced after weaving to finish or ornament the openwork, not including straight hemstitching; all the foregoing, finished or unfinished, by whatever name known, and to whatever use applied, and whether or not named, described, or provided for elsewhere in this act, when composed wholly or in chief value of yarns, threads, filaments, tinsel wire, lame, bullions, metal threads, beads, bugles, spangles, or products of cellulose provided for in paragraph 1215, 75 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota.

Mr. SMITH. Mr. President, I do not believe there is a paragraph in this bill that is so wholly indefensible as the proposed amendment of the committee. If the facts which have been submitted to me even approximate the truth, the proposed amendment is absolutely unwarranted.

Mr. President, I have had submitted to me certain tables by the experts. They show that in the case of Swiss embroidery, for instance, the foreign cost in gold is 31 cents and under the present duty of 60 per cent the selling price in the United States is 62.5 cents a yard. The domestic cost is 34 cents; the selling price of the domestic article is 42.5 cents. The duty necessary to equalize the difference between the two would be 34 per cent.

On another form of the same article the foreign cost in gold is 26.5 cents; freight and landing charges, 0.0015 cent; selling price of the foreign article, 55 cents a yard; domestic cost, 28.8 cents; selling price of the domestic article, 36 cents; so that the duty that would be necessary to equalize the difference on this class of embroidery would be 35 per cent.

In the case of another sample of the same goods that is in ordinary commerce the foreign cost in gold is 8.8 cents, the freight is one-half of a cent, the selling price of the foreign article is 18 cents a yard. The cost of the domestic article is 8.83 cents, the selling price is 11 cents; no duty at all is needed.

The samples that I have indicate a duty to equalize the cost at home and abroad in one instance of 34 per cent, in another instance of 35 per cent, and no duty at all in another. Those are common forms of embroidery.

I have here laces made in Switzerland. The cost landed was $1.39 a yard. Manufactured in the United States, the cost was $1.19 a yard, showing that no duty was indicated on these forms of lace.

Now I call attention to the silk laces. The samples were furnished me by the experts. The foreign cost of these laces was $1.10; the landing charges were 5 cents; profit and overhead, 33⅓ per cent; selling price of the imported article, $2.43⅓. The selling price of the domestic article was $1.01. There was no duty required. That is lace from France. In the case of lace from England the cost was $1.01; selling price, $2.23⅓. The selling price of the domestic article comparable to that was 87 cents; no duty is required.

The fact of the matter is, Mr. President, that in this form of burnt-out laces, as everyone knows, the cloth is chemically treated, the lace is worked into the cloth, and then the cloth is submitted to an acid bath, and it burns out the cloth and leaves the lace. The facts in reference to that are that practically no duty is required.

Here is a curious condition. Here is a sample that has embroidery on the edge. The duty on the embroidery is here proposed to be 90 per cent. It is shown by this table that the cost delivered here is greater than the selling price of the article in this country, and yet under the language of the bill the cloth and the embroidery would carry a duty of 90 per cent. The cloth, under the textile schedule of the bill, bears a certain duty, which when connected with the embroidery would be equivalent to something like 300 per cent on the cloth, because the cloth would bear the same duty as the lace.

The fact of the matter is that save in the case of one or two of these articles there is no duty required. The 60 per cent provided for on certain of these classifications under the present law provided ample protection. We propose now to raise the 60 to 90 per cent and the 45 to 75 per cent.

The charge has been made that our lace factories in this country are standing idle. I charge that they are not standing idle on account of competition but are standing idle because of change of fashion. We get our designs from the Old World. Even the manufacturers of these articles have asked that the duty be such that these articles may come into this country, in order that the American designer may have the advantage of the foreign design.

Mr. McCUMBER. Mr. President, may I ask the Senator a question right there?

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from North Dakota?

Mr. SMITH. Just a minute; let me finish this. I charge that our factories making these embroideries are idle because of the change of fashion. The women's goods that heretofore have used these embroideries extensively for such purposes as edging for the garments are no longer used.

Now I yield. I want to put into the RECORD in a moment a telegram on this subject.

Mr. McCUMBER. I want to ask the Senator a question right there, and on that very subject. Women are wearing laces just as much now as they ever did; are they not? While the particular style may change, the lace is still worn. And is it not a fact that the laces are still coming in at about the usual proportion?

Mr. SMITH. I did not differentiate, as I should have. When I was speaking about the factories not running, I meant particularly in the case of the embroidery. As to the laces, I have shown by the actual figures furnished me by the experts that these silk laces are higher at the factory in the foreign country than they are here. The embroideries are costing more in foreign countries than they are here.

Now I am going to put into the RECORD a telegram from one of the manufacturers.

Mr. McCUMBER. Is that cotton or silk?

Mr. SMITH. The articles embraced in the tables that I have referred to are cotton and silk.

Mr. McCUMBER. Do the tables show that the cotton laces are costing more in the foreign country than in the United States?

Mr. SMITH. I was speaking of the embroidery. I want to get my terminology right. The embroideries upon which you are proposing to put a duty of 75 per cent are being made cheaper here than in foreign countries. We are making them cheaper than the foreign countries are making them, by actual tables. No duty whatever is required, and in the case of the silk laces they are costing more at the door of the factory in foreign countries than the selling price in this country.

Now I want to read a telegram.

Mr. McCUMBER. Again I want to call the Senator's attention to the fact that I think he is referring to silk all the time, both in the embroideries and in the laces which he has shown us.

Mr. SMITH. No; I am not. I will take the cotton table and read it, so that we will have no confusion as to the laces. There are some forms of laces as to which, as I said a moment ago, 60 per cent, the old rate, is indicated, and I will submit the table for the record.

Lace and embroidery, quality No. 2058, Switzerland: Foreign cost, 22 cents; profit and overhead, 50 per cent on cost, 33⅓ per cent on selling price. Selling price of the imported article, 56 cents. Selling price of the domestic article, 51 cents. Cost of production of domestic article, 34 cents. Rate of duty required to equalize, 53 per cent.

These are lace embroideries imported from Switzerland. I want to get this table in the RECORD, as it comes from official sources.

Quality No. 1981, Switzerland: Foreign price in the United States, gold, 55 cents; landing charges, 2.7 cents; profit and overhead, 50 per cent on cost, 33⅓ per cent on selling price. Selling price of the imported article, $1.37½. Selling price of domestic article, $1.12½. Cost of production of domestic article, 74 cents. Rate of duty required, 34 per cent.

The PRESIDENT pro tempore. The time of the Senator from South Carolina has expired.

Mr. SMITH. Mr. President, I ask permission to have these tables inserted in the RECORD.

There being no objection, the tables referred to were ordered to be printed in the RECORD, as follows:

Swiss embroideries, paragraph 1130.

(Present duty 60 per cent.)

Foreign pattern No. 12304:	
Foreign cost in gold	$0.265
Freight landing charges	.0015
Selling price foreign article	.550
Domestic pattern No. 1271:	
Domestic cost	.288
Selling price domestic article	.360
Duty necessary to equalize—35 per cent.	
Foreign pattern No. 14310:	
Foreign cost in gold	$0.314
Freight landing charges	.0017
Selling price foreign article	.625
Domestic pattern No. 1892:	
Domestic cost	.340
Selling price domestic article	.425
Duty necessary to equalize—34 per cent.	
Foreign pattern No. 10742:	
Foreign cost in gold	$0.886
Freight landing charges	.0051
Selling price foreign article	.18
Domestic pattern No. 1669:	
Domestic cost	.883
Selling price domestic article	.11
Duty necessary to equalize—no duty. Domestic cost less than foreign.	

Comparison of embroideries from St. Gall, Switzerland, with similar domestic articles.

Quality No.	Country from whence imported.	Foreign cost (in United States gold).	Landing charges.	Profit and overhead.	Selling price imported article.	Selling price domestic article.	Rate of duty required to equalize.
31179	France	$1.106	$0.055	33⅓ per cent	$2.433		None required. Free of duty, the landed cost of the imported article would greatly exceed the selling price of the domestic article.
03514						[1] $1.012	
03520/8						[1] .966	
8822	England	1.015	.0507	33⅓ per cent	2.23½		
03511						[2] .874	Do.

[1] The selling price of the domestic article is about 140 per cent lower than the selling price of the imported article. There is no competition.
[2] The selling price of the domestic article is about 150 per cent lower than the selling price of the imported article. There is no competition.

Comparison of imported silk laces with similar domestic articles—Continued.

Quality No.	Country from whence imported.	Foreign cost (in United States gold).	Landing charges.	Profit and overhead.	Selling price imported article.	Selling price domestic article.	Rate of duty required to equalize.
0/26999	France	$0.9595	$0.0816	33⅓ per cent	$2.15		None required. Free of duty, the landed cost of the imported article would exceed the selling price of the domestic article.
9/602						[1] $1.01	
0/27025	France	.7592	.06453	33⅓ per cent	1.70		None required. Allow 25 per cent of selling price for profit and overhead, which makes landing cost of imported article higher than cost of domestic article.
9/606						[2] 1.01	
19024	France	.9844	.1031	33⅓ per cent	2.20		None required. Free of duty, the landed cost of the imported article would only equal the selling price of the domestic article.[3]
90857						1.10	
29036	France	1.65	.2475	25 per cent	3.60		None required. Free of duty, the landed cost of the imported article would greatly exceed the selling price of the domestic article.
No quality number. Made by Liberty Lace Works and Louis Hamburger and others.						[4] 1.15	

[1] The selling price of the domestic article is 100 per cent lower than the selling price of the imported article. Absolutely no competition.
[2] The selling price of the domestic article is 69 per cent lower than the selling price of the imported article.
[3] Domestic superior in quality to imported article.
[4] The selling price of the domestic article is 200 per cent lower than the selling price of the imported article. There is no competition.

Mr. SMITH. I have here a telegram which, if the Senate will allow me, I should like to read before I take my seat. It is very short:

[Western Union telegram.]

The Glenham Embroidery Co., Beacon, N. Y., the largest embroidery factory in the United States, with bleaching facilities equal to the best Swiss standard, is at a complete standstill at present. Respectfully requests your consideration on the embroidery tariff schedule. Founded in 1911, with a capital investment of one and one-half millions of dollars, we reached an output of over $2,000,000. The war seriously curtailed the creation of fashions in Europe favoring embroideries, practically eliminating them as a fashionable article for women's wear. A higher duty would act as a boomerang to our domestic industry, as it would eliminate the importation of fashionable embroideries. The success of the domestic embroidery industry is reflected by the fashions shown in Europe and imported into the United States. A higher protective tariff would protect our industry to death. We respectfully suggest to uphold present rates of duty, on the basis of which we can successfully compete in the United States.

THE GLENHAM EMBROIDERY CO.,
Beacon, N. Y.

Mr. McLEAN. Mr. President, I shall occupy but a minute in my explanation of the rates in this paragraph.

I have no doubt that the Senator from South Carolina has been able to get a few selections that possibly may not require the rate recommended by the committee; but I want the Senate to understand that there are tens of thousands of varieties of lace, and there are very few items that do not warrant much higher duty than the committee have recommended.

In the first place, Mr. President, I want to call attention to the fact that laces are luxuries. They are not necessary to the comfort or welfare of the American people. Nevertheless, it is a legitimate industry that has contributed a great deal of pleasure to those who can afford to buy this article. It was established in this country in 1909, and a rate was imposed of 70 per cent ad valorem. That was sufficient to enable the American manufacturer to produce a few varieties of laces. Then the war came on, and, of course, the industry grew during the war; but since the war the industry has suffered a very severe depression.

If we are to base our protective duties upon the need of protection, these laces are not only entitled to the rate we recommend but in most instances double that rate. I want to call attention to the fact that the imports in 1914 were $48,134,985. In 1918 there was a falling off. The imports were only $22,314,665. In 1919 they began to increase, and reached the total of $30,811,353. In 1920 the imports of laces was $50,190,422. In 1921, owing to the general depression in business, they fell off somewhat, but in 1921 the imports were $42,200,738.

The total product of laces in 1921, as near as I can ascertain from the latest census report, did not exceed $12,000,000 in this country. So it can be seen that we have imports of more than three times the domestic production. It is very evident that the existing rate, which is only 60 per cent ad valorem, is of no value whatever as a protective rate.

Mr. President, the experts who secured the information for the Reynolds Commission in regard to this article probably secured more complete information than they did upon any other item in the bill.

Mr. SMITH. Will the Senator allow me to ask just a question?

Mr. McLEAN. I have only 10 minutes.

Mr. SMITH. Does the Reynolds report indicate the necessity of any such duty as is proposed by the Finance Committee?

Mr. McLEAN. The Reynolds report?

Mr. SMITH. Yes. I have the Reynolds report before me now.

Mr. McLEAN. I do not know how the Senator has made his estimates, but I call the Senator's attention to some of the items in this report. I would like to read them all, but there are a hundred or more. It is true that in regard to some of the very cheap cotton laces an average of 89 per cent ad valorem is all that is required, covered in the first 10 items in the Reynolds report. The next eight items, however, require 171 per cent. Then we come to the importations from France, and the Reynolds report shows that those items require 116 per cent. When we come to burnt-out laces, imported from Germany, let me read the figures as to two or three of them.

On the first item, the foreign value in United States currency is 3 cents per yard. The selling price of the American article is 9 cents a yard.

In the next item the foreign value is 3 cents a yard and the American price is 13 cents.

As to the next item the foreign value is 7 cents a yard and the American price is 18 cents a yard.

Then they begin to increase very rapidly. In the next item the foreign value is 6 cents and the American selling price 25 cents. As to the next article, the foreign value is 11 cents and the American selling price 32 cents, and so on. The average rate required on these burnt-out laces is 510 per cent.

It is all very well for the Senator from South Carolina to pick out a few very cheap laces, of embroidery and that sort of thing, as can be done, where the rate required is 75 per cent. But there is no way in which the committee can differentiate and identify these few items which would require possibly a little lower rate. Domestic competition has cut the prices of these goods so that to-day they are very much below the prices they brought when the industry was established. I am told upon good authority that you can buy an artificial silk lace dress in New York to-day for $9, the competition is so fierce. The wages paid are low, compared with other industries. Not only that, but all of the great lace industries of the country are almost out of commission to-day.

The Senator says the depression is due to the change in styles. All I need to say in reply to that argument is to call attention to the enormous importations. The Senator thinks this rate of 75 per cent on the embroidery and 90 per cent on the laces would operate as a boomerang and hurt the American industry. The American industry is dead; it can not be hurt any more seriously than it is hurt. There are thousands of its employees walking the streets, and my information is that the wages run from $12 to $16 a week for the portion of them who are employed. Inasmuch as the article is a luxury, and inasmuch as the importations are so enormous, it must be evident that unless we give a considerably higher rate than that in the present law there will be no relief. The rate is only 30 per cent above the 60 per cent in the present law. A rate of 70 per cent would be of no value, a rate of 80 per cent would be of no value.

The committee did not give anything like what the manufacturers said they must have, but they will try to live if we give

them this 90 per cent rate on the laces. If we do not give them a fairly protective rate, a rate under which they may possibly be able to compete with the foreign producer, then we will have imposed nothing but a sales tax upon these goods, and it seems to me that the rule which was urged in opposition to a high rate upon cheap gloves, which everybody wears, does not apply to this article, and even in that case if the 75 per cent rate is not protective it amounts to a sales tax upon that article, whereas if the rate had been put at a figure which would give protection and establish the domestic industry competition would probably have cut the price of those cheap gloves in the same way it has reduced the price of leather gloves.

Only a few years ago, in 1909, we put a protective rate on the leather glove and established the industry, and since that time the competition in this country has greatly reduced the price of leather gloves. So it will be with this article. Unless we maintain this industry the manufacturers will be driven out of business and the consumers of these goods in this country will be at the mercy of the foreign producer. The taste for the foreign lace, of course, exceeds that for the domestic article. Women like the foreign article, and it was shown to the committee that in many instances the importers would get the foreign lace at a low price and sell it in this country just under the American price.

Mr. REED. Mr. President, will the Senator yield for a question?

Mr. McLEAN. I yield.

Mr. REED. How long has this lace industry been established in this country?

Mr. McLEAN. It was established in 1909.

Mr. REED. It never existed before?

Mr. McLEAN. Not to any extent.

Mr. REED. Did it prosper under the tariff then existing?

Mr. McLEAN. In the cases of some varieties, under the 70 per cent rate they were able to make some laces; but conditions are different now. The spread in the cost of production in this country and abroad now is pretty nearly double what it was in 1909.

Mr. REED. At how many places are these laces made in the United States?

Mr. McLEAN. I think in five States.

Mr. REED. What is the total number of employees?

Mr. McLEAN. About 50,000.

Mr. REED. Almost all women and children?

Mr. McLEAN. A great many men, but more women.

Mr. REED. The Senator spoke of wages being $12 to $16. Is that for men or women or children, or is that the average?

Mr. McLEAN. It is the average.

Mr. REED. What does the cheap labor get in the mills?

Mr. McLEAN. Twelve dollars, I understand, is the lowest wage.

Mr. REED. The Senator thinks there are 50,000 employees?

Mr. McLEAN. About 50,000, I think. That is all I have to say, Mr. President.

Mr. REED. I wanted to ask one further question of the Senator. The wages of $12 or $16 paid now compare in what way with the wages paid prior to the war?

Mr. McLEAN. They are no higher. This industry is suffering very serious depression. They are keeping their organizations together and employing all the help they can with the hope that Congress will give them protection so that they can revive their business.

Mr. REED. The Senator thinks they have 50,000 employees now?

Mr. McLEAN. Probably not. I was speaking of normal times. Most of the employees are walking the streets now.

Mr. REED. The Senator would not be able to state how many they have now?

Mr. McLEAN. No; I would not.

Mr. FRELINGHUYSEN. Mr. President, the Senator from Connecticut has correctly stated that this industry was established under the Payne-Aldrich law of 1909 under a 70 per cent duty. During the war, or just prior to the war, the rate in the Underwood law, 60 per cent, went into operation.

At the time those two duties were enacted into law the mark was selling for 23 cents. The franc was selling for 20 cents. To-day the mark is worth one-seventh of 1 cent and the franc about 7 cents. So the reduction in the exchange value has created a much greater competition and menace in our effort to protect against these foreign goods.

Prior to 1909 there was 83 lace machines in the United States. To-day there are over 600 levers or go-through machines, and over 1,000 circular lace machines. This industry may be properly classified in two branches; one, the manufacture of embroideries, which dovetails in a way with lace making; and the other, lace making particularly.

There is to-day $30,000,000 invested in the embroidery business in this country, and there are in operation over 2,100 shuttle machines of the newest type, and approximately 1,500 embroidery machines in addition, operated by hand and foot power. Of that $30,000,000 invested in this embroidery industry the larger part of it is located in the northern part of Hudson County, N. J., where 60 per cent of that capital is invested, and 18,000 of the people who are trained in this art as artisans, who practically could do nothing else, are employed in those embroidery factories.

Many of them are shut down, closed principally because of foreign competition. Some of them are operating in part, but many of them are idle and the laborers are walking the streets. I have been appealed to time and time again, not only by the people who employ the labor, but by the laborers themselves, that we give a proper protective duty in order to protect their labor against the foreign competition.

In addition to that, in my State, in Connecticut, Rhode Island, Illinois, Pennsylvania, and Ohio is located this great industry which has been built up under the present tariff rate, first placed in the Payne-Aldrich law and after that in the Underwood law, both recognizing that we should maintain an independent industry of the character in the country. In the little town in New Jersey where I live, from my front lawn I can see a lace works which was established under this law, employing several hundred hands making laces, and for several years that concern prospered. I have here a letter from the owners of that factory showing that for six months of this year they sustained a $40,000 and last year they sustained a $130,000 loss, and that they were facing a complete close-down. For a year and a half that concern, with a generosity almost unknown, generally unknown among employers, has been assisting their employees. Why? Because they are specialists in operating the machines and they wish to keep this skilled labor and keep intact their organization, hoping for a tariff that will protect. Therefore, they are practically idle by reason of the fact that this is their art.

Mr. McLEAN. Two factories have gone into the hands of receivers within the last month.

Mr. FRELINGHUYSEN. As the Senator from Connecticut suggests, two factories have gone into the hands of receivers within the last month. I have here letters, which I shall not delay the Senate to read, from dozens of such factories testifying to the fact that they are face to face with this foreign competition and threatened with complete disaster.

The Senator from South Carolina [Mr. SMITH] has selected certain articles which he said need no protection. He has selected items here and there out of 150,000 different items in the lace schedule. But it must be realized that there is one item that is made in these factories which the Senator overlooked, and that was lace and lace articles, including lace edgings, insertions, and galloons.

The Department of Commerce records for 1921 show importations of nearly $8,000,000, and the equivalent duty figured by the exports to protect to the extent of the difference in cost between American production and European production is 108 per cent. So it goes through the other laces, metal laces requiring 200 per cent. If we go through the schedule it will be found that the rate of duty is absolutely necessary at the present low rate of exchange and low rate of wages in Germany and France, which is four to twenty times lower than our wages here.

Mr. SMITH. Mr. President, will the Senator allow me to ask him a question?

Mr. FRELINGHUYSEN. Certainly.

Mr. SMITH. Most of the laces are imported from Switzerland, are they not?

Mr. FRELINGHUYSEN. Oh, no; not at all. They come in part from Switzerland, in part from Germany, and in part from France.

Mr. SMITH. The part that comes from Switzerland is quite considerable in volume as shown by the table. The condition of labor in Switzerland is practically normal, the same as before the war, and the Swiss labor standard is very high. It has not changed. That is the report.

Mr. McLEAN. The cost in Switzerland is the highest of all.

Mr. SMITH. Precisely, and the greater part of our importations come from Switzerland.

Mr. McLEAN. Oh, no; a very small portion.

Mr. SMITH. Of the laces?

Mr. McLEAN. Yes. I do not know just what the proportion is.

Mr. SMITH. I think it can be ascertained. If the Senator from New Jersey will allow me, while he is looking for the item which he desires, the Senator from Connecticut and also the Senator from New Jersey have quoted the Reynolds report. Are they quoting from the figures revised to date or from the August, 1921, report?

Mr. FRELINGHUYSEN. I will answer the Senator. I am only going to take a moment more. The report from which I quoted was from the Department of Commerce, Bureau of the Census. It was not the Reynolds report at all.

Mr. SMITH. The Reynolds report, as revised and brought in by the United States customs officials to August 1, 1922, shows an average on all these articles, as furnished me by the department, of 48 per cent maximum and from that down, and yet it is proposed to put 90 per cent on laces.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Connecticut?

Mr. FRELINGHUYSEN. I yield to the Senator from Connecticut.

Mr. McLEAN. I do not think the figures of the Senator from South Carolina included the profits. As I have the figures brought down to date, the rate required is over 140 per cent. Of course, I do not know what expert secured the information which the Senator from South Carolina is reading to the Senate.

Mr. FRELINGHUYSEN. Mr. President, how much more time have I?

The PRESIDENT pro tempore. The Senator has four minutes remaining.

Mr. FRELINGHUYSEN. I regret that I can not yield further to the Senator.

If the Senator from South Carolina will turn to the reports on merchandise in the United States from Department of Commerce No. 53, he will find that the laces in large part come from France—I think the majority from France—and that the remainder are distributed among Austria, Belgium, Czechoslovakia, Germany, Italy, Switzerland, Sweden, and many other countries, including England.

Now, Mr. President, I desire to have inserted in the RECORD a statement showing the imports of laces for 1919, 1920, and 1921, with a statement that during six months of 1922 the importations of cotton embroideries and lace alone reached the sum of $4,550,000, and this is under greatly depressed economic conditions; that the imports for consumption under paragraph 333 of the act of 1913 of beaded and spangled goods for the calendar years 1919, 1920, and 1921 increased from $2,143,000 to $4,281,000.

Mr. President, I would not stand for any robber rates in this bill. I believe that if any of the rates are too high they should be revised. The provision I have been discussing has been written in the bill, but I would rather take my chance of having higher rates than too low rates and in that way destroy the industry. The question before the Senate in this rate is whether we want to keep the lace industry in this country or turn it over to our foreign competitors. The Senator from South Carolina has in his State none of the industry under consideration, yet he is very ably attacking the bill with information given him by the importers. I am not interested in the question of the importation of laces. I am interested in the question of the protection of the labor of 25,000 people employed in the embroidery industry in this country and the 30,000 people who are employed in the lace industry, which was established under a protective system. The question now is whether we shall give them sufficient duty to continue the industry in this country.

Mr. President, I ask that the table to which I have referred may be printed in the RECORD without reading.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Dutiable imports of all commodities, under paragraph 358, act of 1913, during the calendar years 1919, 1920, and 1921 as reported by the United States Department of Commerce, are as follows:

Imports of laces, etc.

Calendar year.	Total of all items under paragraph 358.	Laces and embroideries, etc. (except wearing apparel and braids), included in the foregoing figures.	Laces and embroideries constitute the following percentages of the total imports under paragraph 358.
1919	$27,896,676	$23,439,507	83
1920	42,192,152	35,548,753	84
1921	36,750,948	31,671,487	87

During 6 months of 1922 the importation of cotton embroideries and laces alone reached the sum of $4,550,209, and this under greatly depressed economic conditions.

Imports for consumption under paragraph 333, act of 1913, of beaded and spangled goods for calendar years 1919, 1920, and 1921:

1919	$2,143,177
1920	4,575,352
1921	4,281,419

Mr. REED. Mr. President, of course the Senator from South Carolina lives in the State of South Carolina and not in New Jersey; but I apprehend that he has an interest, as a citizen of the United States and as a representative of the consuming public, in this question. It would hardly do to establish it as a principle that the only man who has a right to say anything about a protective tax is the gentleman who lives in the immediate vicinity of the industry that is to collect the tax from the rest of the American people and apply it to its own benefit. The trouble with all this discussion is that in the opinion of the proponents of the bill the only person who has a right to be considered is the manufacturer and possibly the people who work in the factory and who have never been protected under any protective tariff law, and that outside of them nobody has any business to say anything.

The fact about the matter is that the only real parties whom we have any right to consider in any one of the bills are the public, the whole people of the United States, and unless it can be shown that a measure when passed would be beneficial to the public taken as a whole, that measure has no business upon the statute books of the United States. So I take it that even an obscure citizen of the State of South Carolina, who happened to get into the Senate of the United States and has served with some distinction, has a right to an opinion in regard to the levying of a tax which would be paid by his people in common with the rest of the people of the United States.

Mr. President, there is another heresy to which I wish to advert very briefly. The constant cry is made that Germany's money has been depreciated, that the rate of exchange is high because of that depreciation, and that that in some way gives Germany an advantage. There never was in my judgment a greater error made than to entertain that doctrine. It has never been acknowledged as a principle that the poorer the money a country had the greater advantage that country could maintain in competition with the rest of the world. If it be a fact that the poorer, the cheaper, the money of a country the greater its advantage in trade and commerce, then we ought to repeal all our financial laws, destroy our financial structure, start the printing presses and print a few billion dollars of rag money. Then we would be, according to the philosophy which I am discussing, in a position to compete with all mankind and to take the trade of the world away from all our competitors. The government with the biggest printing press would be the government of the nation that would finally conquer the industrial and commercial world.

Upon the contrary, the very opposite of that doctrine is true; that the country which is sound financially, which has a currency that is worth something, which is backed by something and is certain always to be worth a hundred cents, has the advantage in all international trade and in every kind of barter and commerce. To deny that is to assert that we are pursuing a foolish policy when we endeavor to maintain the credit and stability and the soundness of our financial structure.

The rates of exchange between the United States and foreign countries, barring some slight cornerings that may at times occur, speaking of the question broadly, which is the only way we can consider it, represent the difference in the stability or real value of the moneys of the respective countries. An exact parallel is furnished between the money of the Government of the United States and the money of the Confederate States during the Civil War. The gold of the Northern States, of course, always remained at par and furnished the standard of value. The greenback of the Northern States, being backed by credit and the power of redemption which most of the people of the world believed would ultimately take care of that money, while it depreciated to a certain extent, always remained a valuable money, while the money of the Confederate States, particularly in the days of the falling fortunes of the South, went practically to nothing.

Over in Germany, when they formerly had a money that was backed by substantial values, German money circulated at par with the money of England and the money of the United States, and the rate of exchange between the countries only represented the risk and the labor of the exchange of the money; but when Germany proceeded to print her marks by the billions and when they had back of them a State which stood in a desperate situation, when the world was not satisfied that the German Government would ever stand long enough to redeem

that money in any form, then the marks of Germany fell to a tremendously low level. Germany sought to remedy that by issuing more money, but every time she diluted the currency of the country with a greater amount of paper its value went down. However, speaking broadly again, that has meant the payment of larger amounts of that currency in wages. The people in Germany and in the other foreign countries who have to buy their raw material must pay for that raw material in gold or in gold's equivalent. Therefore, they encounter a disadvantage at once in the depreciated value of their currency; and it is a disadvantage which largely if not fully offsets an advantage which Senators may imagine they have in the sale of their goods thus made, in a country where the currency is depreciated, in another country where the currency is of higher value.

Mr. President, what I have said is abundantly exemplified by the illustration which I am about to give. England, of all the foreign countries, occupied the most stable position; of all the foreign countries she had least depreciated her money; but the rate of exchange between England and the United States, while high and while constantly decreasing, after all represented the estimate of the world as to the difference between the real value of English money and of American money.

Again Germany had depreciated her money more than had France. The rate of exchange between France and Germany represented the difference. So, step by step, we may follow this illustration from the actual facts, and we will find that the rate of exchange between countries, speaking broadly, and eliminating possible corners, as I have said, has represented the difference in the actual values of their money. There is nothing at all in the hope which for months it has been attempted to inspire in the American people as to the rate of exchange. The rate of exchange has represented differences in actual value or in potential value; that is, the power of the country afterwards to redeem and make good its money. Senators might just as well say we can not afford to trade with Germany or with England, because we are actually bartering goods and they have depreciated the quality of their goods so that it takes ten times as much of those depreciated goods to represent the value of our goods as it had formerly done, as to say we should not trade or that we are at a disadvantage because the money which represents the goods has been depreciated, as in my illustration I have supposed the goods to have been depreciated. The whole doctrine, the whole theory upon which these arguments are based is unsound, not to use a harsher term.

Now, Mr. President, coming to the particular question, Senators have talked here in this Chamber about importations from Germany as though Germany were the one country making these laces and other articles of trade and commerce which may be shipped into this country. Always it is the specter of the German merchant, just as in the World War it was the specter of the German Army, but there is no relation between the two. The fact of the matter is that the competition we have to fear in this matter is not from Germany, but from countries that have a high standard of living and a high rate of wage compared with the rates of Germany.

The table which my distinguished friend from New Jersey [Mr. FRELINGHUYSEN] introduced shows, first, a large amount of handmade laces imported into this country from China, but we are not dealing here with handmade laces. When we come to the machinemade laces we find that France exported to this country in the year 1919, $190,734,000 worth.

The PRESIDENT pro tempore. The time of the Senator from Missouri has expired.

Mr. REED. Mr. President, I ask unanimous consent to print as a part of my remarks the table found on page 53 of the document from which I have been quoting, and I should like to be indulged just long enough to say that the importations from England were greater than those from Germany and the importations from France were likewise greater than those from Germany.

The PRESIDENT pro tempore. Without objection, the table referred to by the Senator from Missouri will be printed in the RECORD.

The table referred to is as follows:

Laces and lace articles, other than handmade, including lace edgings, insertings, and galloons. (Dutiable.)

[1] July 1 to Dec. 31.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota [Mr. MCCUMBER] on behalf of the committee.

Mr. REED. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. REED. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk proceeded to call the roll, and called the name of Mr. ASHURST.

Mr. WADSWORTH. Mr. President, will the Senator withdraw his suggestion?

Mr. REED. Yes; if we can get the yeas and nays, I will withdraw the suggestion.

Mr. WADSWORTH. If the Senator will keep in the Chamber Senators on his side, he will have a sufficient number to order the yeas and nays.

The PRESIDENT pro tempore. The call of the roll having been begun, it is too late to dispense with it.

The reading clerk resumed and concluded the calling of the roll, and the following Senators answered to their names:

Ashurst	Ernst	McKellar	Rawson
Ball	Frelinghuysen	McLean	Reed
Borah	Gooding	McNary	Sheppard
Brandegee	Hale	Moses	Simmons
Calder	Harrison	New	Smith
Cameron	Heflin	Newberry	Smoot
Capper	Jones, Wash.	Nicholson	Sterling
Culberson	Kellogg	Oddie	Trammell
Cummins	Kendrick	Overman	Underwood
Curtis	Keyes	Pepper	Wadsworth
Dial	Lenroot	Phipps	Warren
Dillingham	Lodge	Pomerene	Watson, Ga.
Edge	McCumber	Ransdell	

The PRESIDENT pro tempore. Fifty-one Senators having answered to their names, there is a quorum present. The Senator from Missouri demands the yeas and nays upon the pending amendment.

Mr. SMITH. I desire to offer an amendment to the amendment proposed by the committee. I have not a copy of it before me; but, as I understand, it proposes a duty of 90 per cent upon the laces and 75 per cent upon the embroideries. I move to amend by striking out "90" and inserting "60" and by striking out "75" and inserting "60."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In lieu of "90" it is proposed to insert "60" and in lieu of "75" it is proposed to insert "60."

Mr. SMITH. If that is done, the rate will be 60 per cent on both. According to all the information that has been gathered that is ample protection.

The PRESIDENT pro tempore. Without objection, the two amendments will be considered as one and voted upon at the same time.

Mr. SMITH. I ask for the yeas and nays on the amendment I propose.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). I transfer my general pair with the junior Senator from Virginia [Mr. GLASS], who is necessarily absent, to the junior Senator from Delaware [Mr. DU PONT], and will vote. I vote "nay."

Mr. MCCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING]. I transfer that pair to the junior Senator from Washington [Mr. POINDEXTER], and this announcement of transfer may stand for every vote upon this calendar day. I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], who is absent, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "yea." I do not know how my colleague would vote on this question.

Mr. ROBINSON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Rhode Island [Mr. GERRY], I vote "yea."

Mr. TRAMMELL (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. COLT]. Being unable to obtain a transfer, I withhold my vote. If at liberty to vote, I should vote "yea."

The roll call was concluded.

Mr. HALE. I transfer my pair with the Senator from Tennessee [Mr. SHIELDS] to the Senator from Maryland [Mr. WELLER], and will vote. I vote "nay."

Mr. JONES of New Mexico. I transfer my general pair with the Senator from Maine [Mr. FERNALD] to the Senator from Nevada [Mr. PITTMAN], and ask that this announcement may stand for the day. I vote "yea."

Mr. ERNST. I transfer my general pair with my colleague, the senior Senator from Kentucky [Mr. STANLEY], to the junior Senator from Vermont [Mr. PAGE], and will vote. I vote "nay."

Mr. MCCORMICK. I desire to announce that my colleague [Mr. MCKINLEY], who is absent, would vote "nay" if he were present.

Mr. EDGE. I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. I transfer that pair to the senior Senator from Michigan [Mr. TOWNSEND], and will vote. I vote "nay."

Mr. HARRISON. I ask if the junior Senator from West Virginia [Mr. ELKINS] has voted?

The PRESIDENT pro tempore. He has not.

Mr. HARRISON. I have a pair with the junior Senator from West Virginia. Being unable to obtain a transfer I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 23, nays 36, as follows:

YEAS—23.

Ashurst	Heflin	Overman	Simmons
Borah	Jones, N. Mex.	Pomerene	Smith
Capper	Kellogg	Ransdell	Swanson
Culberson	Kendrick	Reed	Underwood
Dial	McKellar	Robinson	Walsh, Mont.
Fletcher	Myers	Sheppard	

NAYS—36.

Ball	Edge	Lenroot	Nicholson
Brandegee	Ernst	Lodge	Oddie
Broussard	France	McCormick	Phipps
Bursum	Frelinghuysen	McCumber	Rawson
Calder	Gooding	McLean	Shortridge
Cameron	Hale	McNary	Smoot

So Mr. SMITH's amendment to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question now is upon the amendment proposed by the committee.

Mr. SMITH. In the paragraph relating to laces, I move to strike out "90" and insert "75."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. In lieu of "90," it is proposed to insert "75" where it appears in the first portion of the paragraph.

Mr. SMITH. With reference to this amendment, I think it has been stated here, even by those on the other side, that a duty of 75 per cent was sufficient, in view of the fact that the

rate of duty prior to this has been 60 per cent, and on account of the importation of lace machines free our manufacture of these articles has greatly increased. Therefore I propose 75 per cent in place of 90 per cent, and on that I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from South Carolina to the amendment of the committee, on which the yeas and nays have been requested and ordered. The Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same transfer of my pair as before, I vote "nay."

Mr. EDGE (when his name was called). Transferring my general pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Vermont [Mr. PAGE], I vote "nay."

Mr. ERNST (when his name was called). I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the senior Senator from Michigan [Mr. TOWNSEND], and vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

Mr. ROBINSON (after having voted in the affirmative). I announce the same pair and transfer as on the last vote and allow my vote to stand.

Mr. HARRISON. I am paired with the Senator from West Virginia [Mr. ELKINS]. In his absence I withhold my vote. If permitted to vote, I would vote "yea."

Mr. TRAMMELL. Being unable to obtain a transfer of my pair, I withhold my vote. If permitted to vote, I would vote "yea."

Mr. POMERENE. Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

The result was announced—yeas 26, nays 33, as follows:

YEAS—26.

Ashurst	Heflin	Myers	Smith
Borah	Jones, N. Mex.	Overman	Swanson
Capper	Kellogg	Pomerene	Trammell
Culberson	Kendrick	Ransdell	Underwood
Cummins	Lenroot	Reed	Walsh, Mont.
Dial	McCormick	Robinson	
Fletcher	McKellar	Sheppard	

NAYS—33.

Ball	Ernst	McCumber	Phipps
Brandegee	France	McLean	Rawson
Broussard	Frelinghuysen	McNary	Shortridge
Bursum	Gooding	Moses	Smoot
Calder	Hale	New	Wadsworth
Cameron	Harreld	Newberry	Warren
Curtis	Jones, Wash.	Nicholson	
Dillingham	Keyes	Oddie	
Edge	Lodge	Pepper	

NOT VOTING—36.

Caraway	Hitchcock	Owen	Sterling

Glass	Nelson	Spencer	Weller
Harris	Norbeck	Stanfield	Williams
Harrison	Norris	Stanley	Willis

So Mr. SMITH'S amendment to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. GOODING. Mr. President, out of order I ask unanimous consent to send to the desk petitions from something over 100,000 citizens of Southern States who pray for a duty on vegetable oils and other southern products. These petitions represent a million agricultural producers in the South. I will not ask that any of them be read, but I ask that the letter to Mr. J. A. Arnold, secretary of the Southern Tariff Association, from Mr. W. W. Webb, president of the Georgia Peanut Growers' Association, be printed, and that the resolution of the Peanut Growers' Association of Georgia be printed without reading, and that all the petitions be referred to the Committee on Finance.

There being no objection, the letter and resolution were ordered to be printed in the RECORD and all the petitions were referred to the Committee on Finance, as follows:

GEORGIA PEANUT GROWERS' ASSOCIATION,
Hahira, Ga., August 2, 1922.

Mr. J. A. ARNOLD,
Tariff Association, Washington, D. C.

DEAR SIR: I am inclosing petitions with about 2,000 names with 1,000 peanut growers that I signed for, also a resolution by the Farmers' Union of Lowndes County, Ga., which has more than a thousand members. Our farmers in Georgia are unanimous for tariff on peanuts and vegetable oils, and if we fail to get it it will be a great calamity. If there is anything more that we can do let me know and I will do what I can. Our prosperity is dependent on protection. We must or we crumble and suffer.

I remain yours to cooperate,

W. W. WEBB,
President Georgia Peanut Growers' Association.

GEORGIA PEANUT GROWERS' ASSOCIATION.

Resolution by Farmers' Union of Lowndes County, Ga.

Whereas the farmers of Georgia are greatly disturbed about peanuts and vegetable oils being placed on the free list. If this is done our peanut industry will suffer irreparable damage. Oriental peanuts and oils will seriously affect our hog production also. The crippling of these two industries will be a calamity: Be it therefore

Resolved by Lowndes County Farmers' Union in session in Lowndes County, Ga., That we pray the Senators of Georgia of the United States Senate, and the Representatives in Congress of the United States, together with all the Senators and Congressmen, to give us a tariff on peanuts and vegetable oils. Our people are already crushed with the ravages of the boll weevil and are now threatened with this influx of oriental peanuts and oils which will put our farmers on a low level of the cheap oriental labor. Georgia farmers are unanimous for protection on farm products the same as manufactured articles.

S. E. JOHNSON, *Secretary.*

This 2d day of August, 1922.

Mr. McCUMBER. I ask that the Senate return to the consideration of paragraph 1451, page 202.

Mr. REED. The paragraph just referred to was carried over until to-day at my request. I have been unable to secure the particular information I wanted. I shall therefore content myself with reserving this item for a separate vote in the Senate, so the Senator in charge of the bill may proceed with the paragraph at this time. I shall not ask for further delay.

The PRESIDENT pro tempore. The Secretary will state the amendments of the committee to paragraph 1451.

The ASSISTANT SECRETARY. The first amendment in paragraph 1451 is on page 202, line 16, where the committee proposes to strike out "30" and insert in lieu thereof "20," and on line 17, to strike out the word "and" and insert "15 per cent ad valorem," so as to read:

PAR. 1451. Photographic cameras and parts thereof, not specially provided for, 20 per cent ad valorem; photographic dry plates, not specially provided for, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 202, line 19, to strike out "20 per cent ad valorem," and to insert in lieu thereof the following:

one-half of 1 cent per linear foot of the standard width of 1⅜ inches, and all other widths shall pay duty in equal proportion thereto.

Mr. McCUMBER. On behalf of the committee, on line 20, I move to change "one-half" to "four-tenths."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on line 25, to strike out the words "exposed, whether developed or not, and," and to insert in lieu thereof the words "exposed but not developed, 2 cents per linear foot; exposed and developed, 3 cents per linear foot"; on page 203, line 7, to strike out the words "30 per cent ad valorem," and to insert in lieu thereof "1 cent per linear foot"; on line 14, to strike out the words "25 per cent ad valorem" and insert in lieu thereof "1 cent per linear foot"; on line 17, to strike out the word "*Provided*," and to insert in lieu thereof the words "*Provided further*," so as to read:

photographic-film negatives, imported in any form, for use in any way in connection with moving-picture exhibits, or for making or reproducing pictures for such exhibits, exposed but not developed, 2 cents per linear foot; exposed and developed, 3 cents per linear foot; photographic-film positives, imported in any form, for use in any way in connection with moving-picture exhibits, including herein all moving, motion, motophotography, or cinematography film pictures, prints, positives, or duplicates of every kind and nature, and of whatever substance made, 1 cent per linear foot: *Provided*, That upon the importation of photographic and motion-picture films or film negatives taken from the United States and exposed in a foreign country by an American producer of motion pictures operating temporarily in said foreign country in the course of production of a picture 60 per cent or more of which is made in the United States the duty shall be 1 cent per linear foot, and the Secretary of the Treasury shall prescribe such rules and regulations as may be necessary for the entry of such films or film negatives under this proviso: *Provided further*, That all photographic films imported under this act shall be subject to such censorship as may be imposed by the Secretary of the Treasury.

The amendment was agreed to.

Mr. McCUMBER. I desire now to have the Senate go back to page 201, paragraph 1444.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 201, paragraph 1444, rosaries, chaplets, and similar articles of religious devotion, it has been agreed that the two amendments to the paragraph shall be considered as one.

The PRESIDENT pro tempore. The question is on agreeing to the amendment as amended.

Mr. REED. That was the proposition we were going to try to rewrite, but that has not been done. I reserve it for a separate vote in the Senate.

The amendment as amended was agreed to.

Mr. McCUMBER. I now ask that the Senate turn to page 204, paragraph 1453.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 204, beginning in line 15, the committee proposes to strike out paragraph 1453 in the following words:

PAR. 1453. Plush, black, known commercially as hatters' plush, composed of silk, or of silk and cotton, of the qualities and widths used generally in the making of men's hats, 10 per cent ad valorem.

The amendment was agreed to.

Mr. McCUMBER. I now ask that we turn to paragraph 1644, page 232.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 232, line 3, the committee proposes to strike out the words "and sago flour," so as to make the paragraph read:

PAR. 1644. Sago, crude.

The amendment was agreed to.

Mr. McCUMBER. I now ask that we turn to paragraph 1666, page 235.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 235, line 23, the committee proposes to strike out the words "Tapioca, tapioca flour, and cassava" and to insert the word "Cassava," so as to make the paragraph read:

PAR. 1666. Cassava.

The amendment was agreed to.

Mr. McCUMBER. Now I ask that we turn to page 115, paragraph 779a.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 115, after line 2, the committee proposes to insert a new paragraph, as follows:

PAR. 779a. Sago flour and tapioca flour, one-half of 1 cent per pound; tapioca flake or pearl, three-fourths of 1 cent per pound.

Mr. REED. That is a food, and why should it be taxed? Is there any of it produced in this country?

Mr. NEW. Mr. President, if the Senator from Missouri will permit me, I think I can answer that question. Most of this material is not used for food at all but is used in the manufacture of glue and takes the place of, if used in glue, of Missouri corn.

Mr. REED. Well, Missouri corn can stand it very easily. We can worry along with that kind of competition. The quantity of corn used in making glue is infinitesimal compared with the quantity used for another purpose.

Mr. NEW. This would take the place of from 3,000,000 to 6,000,000 bushels of American corn.

Mr. REED. That is terrible, because we produce only 3,000,000,000 bushels.

Mr. NEW. It is an item worthy of consideration.

Mr. REED. I inquire if this item does not cover tapioca that is used on the table?

Mr. NEW. Yes; that is also important; but, as I have said, the major part of it is used in the manufacture of glue.

Mr. REED. Since the Senator from Indiana is appearing as an explainer of this particular item, may I inquire who has asked for a tariff?

Mr. NEW. The request first came to me from farmers of Indiana.

Mr. REED. The farmers of Indiana were really afraid of this glue proposition?

Mr. NEW. Yes.

Mr. REED. Were there not some requests from the factories?

Mr. NEW. Yes.

Mr. REED. Manufacturers wanted a duty on their raw material?

Mr. NEW. Yes; just as they have on pretty nearly every other item that enters into the tariff bill.

Mr. REED. I have not seen any of them wanting a duty on their raw material.

Mr. NEW. My attention was first called to this by William H. Newsom, who is an officer of one of the farmers' organizations of Indiana. There have been other requests, of course, some of them from manufacturers, and some objections to it also.

Mr. GOODING. Mr. President, may I ask the Senator from Indiana if it is not a fact that there is a manufacturing establishment in his State for the making of glue that created quite a large local market for corn?

Mr. NEW. That is true.

Mr. REED. Is that the reason why the farmers are asking for it?

Mr. GOODING. That is my understanding. Information of that kind came to me.

Mr. REED. How many people does that factory employ?

Mr. NEW. I do not know, but it is a substantial industry.

Mr. REED. Where is it located?

Mr. NEW. It is located up in the northern part of the State.

Mr. REED. Of course, it goes without saying that everybody who uses glue ought to be taxed for the benefit of this factory which is located somewhere in Indiana. That is in keeping with the rest of the bill and probably no worse than the rest of it. I am not going to argue the question. There is no use in doing it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. McCUMBER. I ask to return to paragraph 7, page 4. The first two items in that paragraph have been agreed to, but there are two others which have not been agreed to.

Mr. SIMMONS. Mr. President, I find, very much to my surprise, that there are 35 to 40 paragraphs which have been passed over and which will have to be acted upon to-day before we reach the special provisions and the administrative provisions of the bill. If we were to take 10 minutes for each of the paragraphs which have been passed over it would consume the time that is allotted before we begin to vote. Under the circumstances I am going to do what I can to facilitate the matter as rapidly as possible, hoping that any wrong which may be done by reason of the haste may be corrected in conference. There is no other way to deal with it if we are to have any time left at all for the consideration of the administrative provisions and some very important special provisions.

The PRESIDENT pro tempore. The first amendment passed over in paragraph 7 will be stated.

The ASSISTANT SECRETARY. The first amendment passed over in paragraph 7 is on page 4, beginning in line 17. After the words "ammonium phosphate" the committee proposes to strike out "25 per cent ad valorem" and insert "1½ cents per pound."

The amendment was agreed to.

The ASSISTANT SECRETARY. The next amendment is, on page 4, in line 18, after the words "ammonium sulphate" and the comma, where the committee proposes to strike out "three-fifths" and insert "one-fourth," so it will read "one-fourth of 1 cent per pound."

The amendment was agreed to.

The PRESIDENT pro tempore. The Assistant Secretary advises the Chair that the other amendments in paragraph 7 have been agreed to.

Mr. McCUMBER. I desire now to return to page 6, paragraph 18, "chalk or whiting or Paris white." I ask unanimous consent to reconsider the vote by which the amendments in line 21, page 6, paragraph 18, were concurred in.

The PRESIDENT pro tempore. The Senator from North Dakota asks unanimous consent to reconsider the votes by which the amendments in line 21 of paragraph 18 were adopted. Is there objection? The Chair hears none, and it is so ordered. The next amendment will be stated.

The ASSISTANT SECRETARY. On page 6, in line 21, "15" was struck out and "20" was inserted.

Mr. McCUMBER. I now move to strike out "20" and insert "30."

The ASSISTANT SECRETARY. The Senator from North Dakota moves to strike out "20" and insert "30," so it will read "30 per cent ad valorem."

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. JONES of New Mexico. Mr. President, I think we are entitled to have some statement from the chairman of the committee as to why he is asking to make this change. The committee itself made the previous amendment reducing the rate from 35 to 20 per cent, and it was done evidently after some consideration. Now, why they should come in and ask to reconsider the rate and change it from 20 to 30 per cent I think calls for some explanation.

Mr. McCUMBER. I can explain it very briefly. The summary of conditions as reported by the United States Tariff Commission on August 1, 1922, showed as follows:

The weighted average cost of producing whiting for the first four months of 1922 was $18.47 per short ton. This represents a decrease of 9 per cent of the cost of $20.32 in 1921 and an increase of 108 per cent over the pre-war cost of $8.86 in 1914. It was found that the average cost of imported whiting c. i. f. New York, duty not paid, for the months of April and May was $12.80 per short ton. This cost for imported whiting, when contrasted with the average domestic cost in 1922, shows a margin of $5.72 per short ton in favor of the imported product.

The difference between the lowest domestic and the average imported cost was $3.99 per short ton. To equalize this at present differences in the cost of production, the selling price in the United States would require about 40 per cent ad valorem. The committee believes that the American price will go still lower. We are expecting a possibility of a rise in the foreign cost of production. We, therefore, gave considerably less than the Tariff Commission showed to be necessary.

Mr. JONES of New Mexico. May I ask the Senator from North Dakota how the Tariff Commission ascertained the cost of production of the chalk in the United States?

Mr. McCUMBER. I understand it was by personal investigation with special officers of that organization.

Mr. JONES of New Mexico. I do not wish, of course, to make any reflection, but if the Tariff Commission have made an investigation of any thorough nature, I do not know where they got the funds with which to do it or where they got the experts with whom to do it. If they ascertained by mere inquiry of the producers, that is one thing, but if they have ascertained the cost of production of this article, it is the only article mentioned in the whole bill where that has been done. I can not recall a single item in the bill which has been investigated to the extent of ascertaining the cost of production. There have been guesses as to the cost of production, but to make an investigation which would reveal the cost of production in dollars and cents has not been done with respect to a single item in the bill so far as I have any knowledge.

I should like to know how the investigation was made and when it was made. Apparently it was not made a few weeks ago when we were considering the bill. Members of the Tariff Commission and their experts since that time have been employed largely in working with members of the Finance Committee of the Senate and no attempt previous to that time had been made to go out and examine costs. I should like to know when the examination was made and how thorough it was.

Mr. McCUMBER. Mr. President, if the Senator will allow me, I will state that the investigation was made by Mr. de Long, of the Tariff Commission. It was made in response to a letter of mine dated May 18 requesting the Tariff Commission to secure all possible information along that line. The commission in writing to me has inclosed a very full statement, including the methods of their investigation and several tables which they have made a part of their report. I ask that their letter, together with their report, may be printed in 8-point type in the RECORD as a part of my remarks.

There being no objection, the matter referred to was ordered to be printed in the RECORD in 8-point type, as follows:

UNITED STATES TARIFF COMMISSION,
August 1, 1922.

Hon. P. J. McCUMBER,
United States Senate, Washington, D. C.

MY DEAR SENATOR McCUMBER: In replying further to your letter of May 18 concerning the cost of producing whiting in the United States, particularly along the Atlantic coast, the price at which imported whiting is being sold in this country, and other information which will aid the Committee on Finance in arriving at the proper rates for this commodity, we submit the inclosed report as the result of our investigation of the whiting industry.

We trust that this will give you the information you desire.

Very truly yours,

THOMAS O. MARVIN, *Chairman.*

PRODUCTION COSTS IN THE WHITING INDUSTRY DURING 1914, 1921, AND 1922 (4 MONTHS).

INTRODUCTION.

The Tariff Commission was requested by the Committee on Finance, United States Senate, under letter of May 18, 1922, to ascertain the cost of producing whiting and the price at which imported whiting is being sold in the United States, in order to "aid the committee in arriving at proper rates for this commodity."

Accordingly manufacturers of whiting were requested to submit their costs of production in accordance with a detailed schedule submitted by the Tariff Commission. The reports of the various manufacturers were tabulated and later verified by comparison with the books of the companies by members of the commission's staff.

The average costs of whiting shown in this report are in all cases the weighted average of the costs submitted by five domestic manufacturers—in no case have simple averages been used. It was found necessary to omit the costs reported by one producer, as the firm was unable for valid reasons to report for all of the periods requested, and as this firm also manufactured other products the segregation of their whiting costs from that of other articles would have been an estimation. Otherwise, the report includes the costs of all independent producers of whiting. No attempt was made to include paint manufacturers who may grind chalk for their own consumption.

The cost of imported whiting in the following pages was determined by a study of the invoices of shipments of whiting received at the port of New York for the months of April and May, 1922. The shipments for which detailed figures were obtainable represent more than one-third of the total quantity of whiting imported at New York during this period.

SUMMARY OF CONDITIONS IN THE INDUSTRY.

The weighted average cost of producing whiting for the first four months of 1922 was $18.47 per short ton. This represents a decrease of 9 per cent from the cost of $20.32 in 1921 and an increase of 108 per cent over the pre-war cost of $8.86 in 1914. It was found that the average cost of imported whiting, c. i. f. New York, duty not paid, for the months of April and May was $12.80 per short ton. This cost for imported whiting when contrasted with the average domestic cost in 1922 shows a margin of $5.72 per short ton in favor of the imported product. The difference between the lowest domestic and the average imported cost was $3.99 per short ton.

In connection with costs in the domestic industry, the commission must point out the evident lack of labor-saving devices in the grinding of chalk for the production of whiting. The manufacture of whiting is a comparatively simple operation involving the mechanical operations of grinding, floating with water to classify the production into various grades of fineness, filtering, drying, and further grinding of the finished product being packed for shipment. From a mechanical engineering viewpoint there is no reason why the product should be handled from the time the crude chalk enters the grinders until the finished product is packed. The production of whiting is an industry which has been long established in this country, and with a few exceptions there has evidently been a lack of effort to keep labor costs at a minimum by the installation of modern and improved machinery. This statement can not be applied to all manufacturers, as there are at least two firms who are working along progressive lines to install continuous apparatus which will result in a saving of labor and a reduction in cost. An examination of the costs by companies (Table 3) shows that the labor cost ranged from $2.23 to $5.16 per short ton during 1922. From this wide variation it is apparent that certain manufacturers can reduce costs by improved equipment and design of plant.

The wide spread between the domestic and imported cost of whiting is in no small part due to existing exchange rates and will decrease as the Belgian and French exchange approaches normal. A factor in favor of the domestic product, which is not shown in the cost figures, is the service to domestic consumers. The consumer in dealing with domestic manufacturers has the assurance that in the case of delivery of inferior goods immediate and satisfactory adjustment can be secured from the domestic producer, whereas in the case of the imported product it is evident that such adjustment is considerably more difficult. The point at which the price of imported whiting becomes sufficiently attractive to warrant a change from a reliable domestic source to an imported one can not be measured accurately. For tariff purposes care must therefore be exercised in basing duties wholly on the spread between the domestic cost and the cost of the imported product landed in the United States.

TABLE 1.—*Comparison of production and imports, 1914 to 1922, inclusive.*

Year.	Imports.[1]		Production.
	Short tons.	Percentage of production.	
1914	1,181	1.8	[2] 66,000
1915	2,693	.....	.....
1916	1,828	.....	.....
1917	1,074	.....	.....
1918	1,223	.....	.....
1919	765	.....	.....
1920	8,875	.....	.....
1921	8,826	20.6	43,104
1922 (4 months)	[3] 2,379	11.5	[4] 20,766

[1] Imports are fiscal years ending June 30 for 1914 to 1917 and from then on are calendar years.

[2] Figure is low, as does not include production of 1 firm.

[3] Total imports for first 3 months plus imports at New York for April.

[4] Includes production of 2 firms for 6 months and does not include output of 1 firm.

A comparison of production and imports of whiting shows that imports have increased greatly since 1919. Table 1 shows a comparison of imports and production from 1914 to 1922, inclusive. In 1914 imports represented approximately 2 per cent of the domestic production and prior to 1920 never exceeded 2,700 short tons. During 1920 and 1921 they approximated 9,000 tons per annum, or about 20 per cent of the domestic production during the latter year. A comparison of imports and production for the four months in 1922 shows that imports were approximately 12 per cent of the domestic output. It is apparent that domestic producers since 1919 have received active competition from imported whiting.

SUMMARY OF COSTS.

Table 2 compares the costs of whiting for 1922, four months, with 1921 and the pre-war year 1914. This table also shows the percentage of total cost represented by the items of material, direct labor, factory overhead, administration and selling, and packages. The total cost for 1922 was $18.47 per short ton. Of this total, $7.39, 40 per cent, was for material; $4.04, about 22 per cent, was direct labor; $3.87, 21 per cent, factory overhead; $3.05, 16½ per cent, administration and selling expenses; and 12 cents, less than 1 per cent, was for packages. The average net price received for whiting during 1922, four months, was $22.78 per short ton. A comparison of this price with the total cost indicates that the industry as a whole made an average profit of $4.31 per short ton, or about 23 per cent of the total cost. The cost for 1922 was more than double that of the pre-war year 1914. The material cost for 1922 was more than twice that of 1914; direct labor nearly two and one-half times as much; factory overhead about one and eight-tenths times; administration and selling about two and one-half times the same items in 1914. The average profit per ton of $4.31 in 1922 may be compared with $1.79 per ton in 1914; on the basis of percentage of total cost, however, the profit in 1922 was 23.3 per cent, as compared with 20.2 per cent in 1914.

TABLE 2.—*Comparison of the total whiting costs, 1914, 1921, and 1922 (four months).*

[Costs are per short ton.]

Period.	Production.	Sales.	Total cost.	Material.	Direct labor.	Factory overhead.	Administration and selling.	Packages.	Net price received.	Profit.
	Short tons.	*Short tons.*

[1] Includes production of 2 firms for 6 months.

COMPARISON OF COSTS BY COMPANIES.

Table 3 shows the variation in the cost of whiting according to companies. The costs listed under a given number are those of the same company for the three periods given.

A study of this table shows that the total cost in 1922 ranged from a low of $15.79 per short ton to a high of $21.89, a variation of about 40 per cent of the low cost. The greatest variation in the various items of cost occurs in that of direct labor. This item ranged from a minimum of $2.23 per short ton to a maximum of $5.16, or a variation of about 130 per cent of the low cost.

The net price (freights and commissions deducted) received for whiting during 1922 (four months) ranged from $19.16 to $27.66 per short ton.

This table also shows that the average profit during the four months of 1922 ranged from $2.11 per short ton to $6.45:

TABLE 3.—*Details of whiting cost, by companies, 1914, 1921, and four months 1922.*

DETAILS OF COST OF IMPORTED WHITING.

In Table 4 is shown the detail of representative shipments of whiting entered at the port of New York—the point at which most of the whiting is imported—during the months of April and May, 1922. This information was obtained from the original invoices on record at the New York customshouse. The shipments included in this tabulation represent in quantity a little over one-third of the total imports—1,981 short tons—at the port of New York for the months of April and May. By far the larger part of the whiting entering the United States at this time originated in Belgium, with France ranking second in importance. Very little whiting was imported from England and Germany.

This table shows that the weighted average cost of 10 shipments of whiting aggregating nearly 700 short tons was $12.80 c. i. f. New York, duty not paid. This cost may be compared with a cost of $9.36 per short ton at foreign ports packed ready for shipment.

It should be noted that the difference between these two costs is not represented by the items of freight, insurance, consular fees, and other expenses, as it will be seen from the table that these items were not available in the case of all shipments. They are, however, included in the total cost c. i. f. New York in all cases. A study of this table shows that the total cost at New York ranged from $9.89 to $20.52 per short ton.

TABLE 3.—*Detail of cost of whiting imported at New York, April and May, 1922.*

Country of origin.	Quantity (short tons).	Cost c. i. f. New York without duty (per short ton).	Ocean freight (per short ton).	Insurance, consular fees, other expenses (per short ton).	Cost f. o. b. foreign port packed (per short ton).	Packing cost (per short ton).

[2] Consular fee only.

Mr. HARRISON. Before the Senator from North Dakota takes his seat I desire to ask him a question. I wish to inquire of the Senator how many amendments have been offered to the pending bill on the recommendation of the committee since it was orginally reported by the committee from the time when we began the consideration of the bill?

Mr. McCUMBER. I can not state the number, but there have been a great many small amendments. If one amendment is made especially affecting a rate or a material, that necessitates a great many other amendments in order to preserve the balance. So the number of amendments which have been reported has been quite considerable.

Mr. HARRISON. The Senator from North Dakota this morning submitted a committee print of proposed amendments embracing I do not know how many amendments, but I presume a hundred amendments. Are those all committee amendments?

Mr. McCUMBER. They are all committee amendments, and many of them have been made necessary by changes which have been made in the bill on the floor of the Senate.

Mr. HARRISON. Were these amendments agreed to by the committee on yesterday?

Mr. McCUMBER. Yes; and after working most of the night.

Mr. HARRISON. Mr. President, I desire to say that this illustrates how sloppily this bill has been prepared. After we had entered into a unanimous-consent agreement that no committee amendments should be offered after a certain time, and the time being stated in the agreement when the bill would be reported to the Senate and voted on finally, the committee reommends practically a hundred amendments, and they are brought in here in a manner which will not allow their discussion to any extent before we are called upon to vote upon them. So, I repeat, this is a very clear illustration of the manner in which the bill has been prepared and considered in the Senate.

Mr. McCUMBER. Mr. President, it may be possible that the Senator from Mississippi, being possessed of all the wisdom in the world, could have done very much better than the committee has done. The committee, however, has had a very complex subject to deal with and it has had to deal with it under very abnormal conditions. At the time the unanimous-consent agreement was being considered the committee stated to those who were engaged in framing the agreement that there would be a number of amendments proposed in addition to those which had been passed over and had not yet been decided upon, and that there would necessarily be some changes in the administrative features of the bill which had not been as fully considered as we desired. I think the committee is composed of Senators of at least ordinary intelligence, possibly not so great as that of the Senator from Mississippi, but with the information they have had they have done the very best they could to get the bill in the best possible shape to conform to the divers amendments made on the floor of the Senate and to the conditions in trade as they have indicated to us that there ought to be some amendments made.

Mr. SIMMONS. Mr. President, I merely wish to make the point of order that there is no amendment pending upon which this discussion may properly take place under the unanimous-consent agreement. We have only a little over three hours remaining in which to finish up the amendments of the committee, and I think we had better confine ourselves strictly to them.

Mr. WADSWORTH. Question!

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 8, line 8, I move to strike out "15" and to insert in lieu thereof "10," so that it will read:

Chicle, crude, 10 cents per pound.

The amendment was agreed to.

Mr. McCUMBER. On page 8, line 6, I move to strike out "20" and insert in lieu thereof "15."

The amendment was agreed to.

Mr. McCUMBER. On page 10, line 4, after the word "distillate," I move to insert the following: "or which on being subject to distillation yield in the portion distilling below 215° C. a quantity of tar acids equal to or more than 75 per cent of the original distillate."

Mr. SIMMONS. Will that amendment have the effect of increasing the rate, I will ask the Senator from North Dakota?

Mr. SMOOT. Mr. President——

Mr. McCUMBER. This amendment is recommended by the Tariff Commission.

Mr. SIMMONS. But it does not increase the rate?

Mr. McCUMBER. No.

Mr. SMOOT. It relates to a new process.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 17, line 14, after the word "flowers," I move to strike out the comma and insert in lieu thereof a semicolon.

The amendment was agreed to.

Mr. McCUMBER. On page 18, line 23, I move to strike out "25" and insert in lieu thereof "15."

The amendment was agreed to.

Mr. McCUMBER. On page 18, lines 18 and 19, I understand the committee amendment has not been agreed to.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The SECRETARY. On page 18, line 13, after the word "quebracho" and the comma, it is proposed to insert the words "sumac, saffron, safflower, saffron cake."

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 20, line 17, I move to strike out "2½" and insert in lieu thereof "1½."

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota, on behalf of the committee.

The amendment was agreed to.

Mr. McCUMBER. On page 20, line 18, after the semicolon, I move to insert "chloride anhydrous, 1 cent per pound."

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota, on behalf of the committee.

The amendment was agreed to.

Mr. McCUMBER. On page 20, line 18, I ask unanimous consent to reconsider the vote by which the amendment was agreed to.

The PRESIDENT pro tempore. The Senator from North Dakota asks unanimous consent to reconsider the vote by which the amendment referred to by him was agreed to. Is there objection? The Chair hears none, and the vote is reconsidered.

Mr. McCUMBER. I now move, on page 20, line 18, before the word "one-half," to insert the words "not specially provided for."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 20, line 20, I move to strike out "7" and insert in lieu thereof "3½."

The amendment was agreed to.

Mr. McCUMBER. I ask unanimous consent to reconsider the vote by which the amendment on page 20, line 22, was agreed to.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote whereby the amendment referred to by the Senator from North Dakota was agreed to? The Chair hears none, and the vote is reconsidered.

Mr. McCUMBER. I now move to strike out the words "three-fourths of 1 cent" and insert in lieu thereof "3½ cents."

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

Mr. JONES of New Mexico. Mr. President, that is an enormous increase over the rate which the committee originally recommended, the increase being from three-fourths of 1 cent to 3½ cents a pound.

Mr. McCUMBER. Mr. President, we have reduced the 2½-cent rate on carbonate precipitated on line 17 to 1½ cents, making a reduction of 1 cent. Then, on line 20, the provision reads:

Oxide or calcined magnesia, medicinal, 7 cents per pound.

We have reduced that to 3½ cents per pound, which would be the proper relation with carbonate precipitated at 1½. Oxide or calcined magnesia not suitable for medicinal use costs more, according to the Tariff Commission's report, to produce, and, being practically the same as the medicinal, they held that the rate should not be reduced below the rate on the medicinal; in other words, that both should be upon the same basis. They are sold, as I understand, under the same standard of purity, and the only difference is that in the medicinal form after it arrives in this country it is put up in small packages for sale in drug stores, but it may be produced in bulk and imported in exactly the same way, whether it is for medicinal or other purposes. We have simply gone back in this instance to the Underwood rates on both.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. FRELINGHUYSEN. Mr. President, I ask leave to present an amendment to the pending bill for submission in the Senate. I ask that the proposed amendment may be printed and lie on the table.

The PRESIDENT pro tempore. The amendment intended to be proposed by the Senator from New Jersey will be received, printed, and lie on the table.

Mr. McCUMBER. Mr. President, on page 21, line 22, I move to strike out "44" and insert in lieu thereof "40."

The amendment was agreed to.

Mr. McCUMBER. I ask unanimous consent to reconsider the vote whereby the amendments in lines 22, 23, and 24, on page 21, were agreed to, and then I desire to ask that both amendments be rejected.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote by which the amendments referred to by the Senator from North Dakota were agreed to?

Mr. ROBINSON. Mr. President, just a moment, please. What will be the effect of the proposal of the Senator from North Dakota?

Mr. McCUMBER. It will leave the duty practically the same, although there may be some little increase. For instance, the 7½ cents per pound on contents without the weight of the containers is equivalent to 57 cents per gallon. The 6½ cents per pound on the contents without the weight of the container is equivalent to 49.4 cents per gallon. The relation in ad valorems is about the same in both instances.

Mr. ROBINSON. Mr. President, I inquire of the Senator from North Dakota, what is the object in coming in here at this time with a thousand amendments, some of which appear to be comparatively unimportant? In the case of the pending amendment the Senator states that it does not materially change the rates already agreed to. I inquire of the Senator why, then, he brings the amendment forward—why he takes the time of the Senate with it?

Mr. McCUMBER. After careful reconsideration, it was found that it was necessary to make the proper differential between the olive oil imported in small containers and that imported in bulk; and that could not be obtained without taking into consideration the container.

Mr. ROBINSON. Mr. President, I merely want to remark that when the Senate has discussed a proposition and reached a conclusion after a prolonged debate, it does not seem to me that the committee at this stage of the proceedings ought to ask to reconsider the action that the Senate has taken after great deliberation of the subject, and to adopt new amendments, unless some imperative necessity for it exists. It is almost a physical impossibility for anyone to comprehend what is now in progress in the Senate. We are proceeding so rapidly, and are under so much pressure, that it is very difficult to know the effect of the numerous amendments which are so recently proposed by the committee.

The PRESIDENT pro tempore. Is there objection to the reconsideration of the vote by which these amendments were adopted? The Chair hears no objection, and the vote is reconsidered.

Mr. McCUMBER. I now ask the Senate to reject the amendments.

The ASSISTANT SECRETARY. On line 22, the committee originally proposed to strike out "7½ cents per pound on contents and container" and the numeral "50" and to insert "60 cents per gallon" in lieu thereof.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

Mr. LENROOT. Mr. President, may the amendment be stated again?

The PRESIDENT pro tempore. The amendment will be restated.

The ASSISTANT SECRETARY. On May 15 last the committee agreed to the following amendment:

Page 21, line 22, strike out "7½ cents per pound on contents and container" and the numeral "50" and insert in lieu thereof "60 cents per gallon."

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The ASSISTANT SECRETARY. On line 24 of the same page, upon May 15, the committee struck out the words "6½ cents per pound" and the numeral "40" and inserted "50 cents per gallon."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was rejected.

Mr. McCUMBER. On page 25, line 12, I move to strike out "60" and to insert in lieu thereof "75."

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 25, line 12, it is proposed to strike out "60" and to insert "75," so that it will read:

PAR. 57. Perfumery, including cologne and other toilet waters, articles of perfumery, whether in sachets or otherwise, and all preparations used as applications to the hair, mouth, teeth, or skin, such as cosmetics, dentifrices, tooth soaps, pastes, theatrical grease paints, pomades, powders, and other toilet preparations, all the foregoing, if containing alcohol, 40 cents per pound and 75 per cent ad valorem—

And so forth.

Mr. JONES of New Mexico. Mr. President, I believe that amendment calls for some support. This paragraph is one which was not revised by the committee in the general consideration of the bill, and it comes in now as a proposal at the eleventh hour; and 60 per cent duty on almost anything seems to me to be very substantial.

Mr. ROBINSON. If the Senator will yield, there is also a specific duty of 40 cents per pound, and in addition to that a duty of 60 per cent ad valorem in the House provision. Now, the amendment proposes to increase the ad valorem rate to 75 per cent, with no explanation whatever, and no chance upon the part of the Senate to consider it.

Mr. SMOOT. The 40 cents per pound is for the alcohol that is contained in it. That is figured out on the pound basis as to the rate on alcohol to-day, and where these articles do not contain alcohol it is 60 per cent straight. The Senator will remember that all of the raw products for making these perfumes were put upon the dutiable list for revenue purposes.

Mr. JONES of New Mexico. I understand that; but it is quite apparent that many of these articles contain different amounts of alcohol, but if containing any alcohol the rate is 40 cents per pound and, the way it originally was, 60 per cent ad valorem. Now it is proposed to leave in the 40 cents per pound upon any article containing any alcohol and to increase the ad valorem duty to 75 per cent. We must take into consideration the large number of different articles included in this paragraph:

Perfumery, including cologne and other toilet waters, articles of perfumery, whether in sachets or otherwise, and all preparations used as applications to the hair, mouth, teeth, or skin, such as cosmetics, dentifrices, tooth soaps, pastes, theatrical grease paints, pomades, powders, and other toilet preparations, all the foregoing, if containing alcohol, 40 cents per pound and 75 per cent ad valorem—

As they now have it read; and I suppose the Senator will ask to change the "60" in the next line to "75." Of course, I do not know what the moving spirit is that calls for revision in that rate at this time.

Mr. McCUMBER. Mr. President, the House followed the sacred book of the Democratic Party, the Underwood tariff law, word for word in this paragraph. The only difference is that the ad valorem rate was based, as the House had it, upon the American valuation. The Underwood tariff provides:

and other toilet preparations, all the foregoing, if containing alcohol, 40 cents per pound and 60 per cent ad valorem.

That is just exactly as it appears here, and I think there was good reason that justified the former administration in fixing the rates at 40 cents a pound and 60 per cent ad valorem. The only difference, and that which would justify the added 15 per cent, is that we have added enormously to the ingredients that enter into these perfumeries in the coal-tar products. They are worth from 200 to 300 per cent more than they were in 1913. The duties which we have placed upon them now under an embargo are exceedingly high, and will be high if we are going to protect the chemical industry in the United States after this bill shall have become a law; and the committee believed that this should be taken care of in a 15 per cent increase in the ad valorem over the Underwood law.

Mr. JONES of New Mexico. Mr. President, I simply desire to observe that the Senator from North Dakota has now stated a principle of tariff making which I have felt all along was manifest in this bill throughout, but it has never been so clearly acknowledged before on the floor of the Senate. The Senator from North Dakota evidently lays down as his premise that those of us who are opposing these rates do so because the present law is at a certain rate. Now he practically confesses that he has raised the rate simply because on general principles he is raising rates above existing law.

In the first place, I do not believe under any general revision of the tariff that any rate should be considered sacred. I have stated time and again that some of the rates under existing law are too high, in all probability, and I know that some of the rates have been too low; but when we modify existing law there should always be a certain and well-defined reason for making the change. Apparently, however, this change has been made here not because of any well-defined reason but upon the general assumption that existing rates should be raised.

It is true that the Senator has referred to our having put some of the raw materials on the dutiable list, but there is no evidence that that necessitates an increase of this rate, and it looks to me as if this rate is raised above 60 per cent simply upon the general principle that all rates under existing law should be raised.

Mr. McCUMBER. Mr. President, the arguments of the Senator are very liable to be very reckless, and doubly so when he refers to the ground upon which some other Senator has based his reason for an increase.

I do not state that I was in favor of this increase of 15 per cent ad valorem over the Underwood law simply because I wanted an increase. I explained, in a way that it seems to me even the Senator from New Mexico could have understood, that the necessity of the increase grew out of the increase in the cost of the items entering into the production. The Senator

forgets that when we fixed the rate in the Underwood law at 60 per cent ad valorem alcohol—the chief ingredient in quantity—bore a rate of $1.75 per proof gallon. The same alcohol now bears a rate of $5 per proof gallon.

If that does not justify a raise of 15 per cent in the ad valorem duty, I do not know what on earth would justify it in the opinion of the Senator from New Mexico.

Mr. FRELINGHUYSEN. Mr. President, this is a compensatory duty and has not been raised simply for the sake of increasing the rate of duty. When the House text was amended, converting the House rates from the American valuation basis to the foreign valuation basis, the Finance Committee increased the rates on the coal-tar products from 35 per cent ad valorem to 60 per cent ad valorem. It transferred from the free list ambergris, castoreum, civet, and musk to paragraph 56—from the free list to a 20 per cent ad valorem duty. It increased the rates on other perfume materials not compounded, in paragraph 56, from 35 to 45 per cent, and the rate on the compounds from 40 per cent to 50 per cent.

Those commodities enter, in the degree of 80 per cent, into the manufacture of perfumery, and it is perfectly natural to assume that when you raise the rate on the ingredients of an article of that character it is entitled to a compensatory duty. These are luxuries. They are high-priced perfumes, and if you will take the importations you will see that they have been steadily mounting. In 1913 they were $1,846,000, and they steadily climbed until in 1921 the importations were $4,360,000. As far as the smell of some of these perfumes is concerned, I think we could forego our ancient traditions against an embargo and put an embargo on some of them.

I ask that the figures of imports, as compiled in this list, be inserted in the RECORD.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Imports of finished perfumery.

1913	$1,846,779
1914	1,658,588
1915	1,681,187
1916	2,100,682
1917	3,788,714
1918	3,518,150
1919	4,223,795
1920	3,981,877
1921	4,360,000

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. I move the same amendment in line 13.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 25, line 13, the committee proposes to strike out "60" and to insert in lieu thereof "75," so as to read:

If not containing alcohol, 75 per cent ad valorem.

The amendment was agreed to.

Mr. McCUMBER. On page 25, I move to strike out lines 23 to 25, inclusive, being paragraph 62, and to insert in lieu thereof:

PAR. 62. Paints, colors, and pigments commonly known as artists' paints or colors, whether in tubes, cakes, jars, pans, or other forms, and not assembled in paint sets, kits, or color outfits, 40 per cent ad valorem; paints, colors, and pigments in tubes, pans, cakes, or other forms, when assembled in boxes, kits, paint sets, or color outfits, with or without brushes, water pans, outline drawing, stencils, or other articles, 70 per cent ad valorem.

Mr. SIMMONS. Mr. President, this is a most remarkable amendment, if I properly understand it. I think this paragraph was pretty thoroughly discussed, and the rate of the House upon paints, colors, and so on, was raised from 25 to 35 per cent ad valorem.

At the very last minute, when it is impossible for the Senate to give due consideration to the subject, the committee brings in an amendment to increase those rates to 40 and 70 per cent ad valorem. They propose to raise the rate on paints and colors, whether in tubes, cakes, jars, pans, or in other forms, and not assembled in painting sets, to 40 per cent, but if they are assembled in painting sets they raise the rate to 70 per cent.

Mr. SMOOT. The Tariff Commission reported to the committee that it was an absolute impossibility to tell whether they were toy paints or whether they were artists' paints wherever they were put up in little boxes, and we had to do something to separate them, so that they would come under a higher rate.

Mr. SIMMONS. It may be that the same paint you tax at 40 per cent is put in a set, and because you can not tell exactly whether it is the same paint you have taxed at 40 per cent you assume that it is a different paint and you tax it at 70 per cent. That seems to me to be a very loose way of dealing with the subject, making that the ground for practically doubling the rate.

This is a mere illustration of a number of other amendments which are now offered by the committee to paragraphs which have been discussed heretofore and rates agreed upon. New rates, which in some instances, as in this, tremendously increase the rates of duty carried in the bill, are presented. I think this is hardly warranted under the circumstances. If the committee had waited until we got into the Senate, when we would have had a longer time to discuss it, it might have been different, but we are now going through a list of amendments made by the committee to correct rates which have heretofore been agreed upon, and after we get through with those it will probably bring us to 2 or 3 o'clock, and then we will have 40 paragraphs which have been passed over without action which we have to take up. The committee must have realized this situation, and it looks very much like not only a tremendous increase but an increase made under conditions which practically cut off debate.

Mr. LODGE. Mr. President, I desire to say a very few words in regard to this matter of paints. It is complicated with the question of toy paints, and I myself very much desired, in justice to the manufacturers, that toy paints and artists' colors should both be included in the toy paragraph. The Senate has already considered that paragraph, and we have put on a high rate.

The toy industry developed enormously during the war. We all know that the manufacture of toys is a German specialty, and since the war they have begun to invade the industry in this country to such an extent that it is threatened with extinction.

The committee planned to include the toy paints, but it is found that the artist colors and the toy paints in boxes, which we all know is a very common toy—some of them being very elaborate and some very simple—are precisely the same, and the committee decided finally to give those paints which are made from coal-tar products the duties in paragraph 26, and 40 per cent to those which are made from natural or mineral colors, like chrome and vermilion.

Personally, I think it is an inadequate protection. I should like to see the commodity more fully protected, but if we are to give any protection to the makers of these colors and the makers of toys, we must give them high rates.

The Germans, who have a great deal of foresight in business matters, have already changed the manufacture of paints from the coal-tar products to the mineral or natural colors, in order to come in under the lower rate, and they will bring in the toy boxes in the same way, under this low rate, thereby impairing, if not destroying, protection for the toys.

The committee have decided on this arrangement. I do not desire to delay the Senate at this moment any further, but it is very essential, if the industry engaged in the manufacture of artists' colors and toy colors, which are the same, is to be kept in this country at all, to give it this protection at least; and I do not know whether this rate will be sufficient to protect the industry.

Mr. JONES of New Mexico. Mr. President, I merely wish to express my opposition to these very high duties, where it does not appear by uncontroverted evidence that they are required in order to prevent injury to the American industry. The fact that these colors and paints are toys to my mind does not warrant any less consideration than if they were necessities of life. I believe that the children of this country should have every reasonable opportunity to obtain just such articles as these. They make for their education and for their diversion along right lines, and the sordid element in such matters should be eliminated as far as possible.

The only thing said in favor of this duty, an increase of 100 per cent upon the toy paints and only 40 per cent upon the artists' paints, is that some of them are coming in from Germany. Again we are confronted with this specter from Germany, when it does seem to me that enough has been said to convince any reasonable person that Germany is in a state of industrial collapse.

We all know that there can be no permanent great disparity in the production of such articles, which are mere compounds. But what I want to suggest is that we should do nothing in the bill for the selfish interests when it does not distinctly appear that it is necessary to be done to protect an industry; that we should not lose sight of the fact that we are putting an obstruction upon the power of some children in the country to get these things which we all know ought to be possessed by the children who are coming into their youth and their young manhood and young womanhood. Why should we

put this rate of duty of 70 per cent upon the toy paints and only 40 per cent upon the artists' paints?

The PRESIDENT pro tempore. The question is upon agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. McCUMBER. On page 26, lines 8 and 9, I ask the Senate to disagree to the committee amendment. The amendment was passed over and not acted on.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. In paragraph 64, page 26, lines 8 and 9, the committee proposes to strike out "$4" and insert "$5," so as to read:

Barytes ore, crude or unmanufactured, $5 per ton.

The amendment was rejected.

The ASSISTANT SECRETARY. On page 26, line 9, the committee proposes to strike out "$7.50" and insert "$10," so as to read:

Ground or otherwise manufactured, $10 per ton.

The amendment was rejected.

The ASSISTANT SECRETARY. On line 10 the committee proposes to strike out "1 cent" and insert "1½ cents," so as to read:

Precipitated barium sulphate or blanc fixe, 1½ cents per pound.

Mr. McCUMBER. I ask that the amendment be not agreed to.

The amendment was rejected.

Mr. McCUMBER. In paragraph 75, potassium, page 28, line 7, I move to strike out "1 cent" and insert in lieu thereof "2 cents."

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY On page 28, line 7, strike out "1 cent" and insert in lieu thereof "2 cents," so as to read:

Chlorate and perchlorate, 2 cents per pound.

Mr. LENROOT. Mr. President, the proposed change of the committee doubles the rate originally fixed by the House. It is an increase of 400 per cent over the present law and is equal to an ad valorem rate, according to the imports of 1921, of 40 per cent. According to the Tariff Survey the production in the United States in 1918, which seems to be the last year reported, amounted to 9,753,000 pounds, valued at $283,700. The imports during nine months of 1921 were 2,523,000 pounds, valued at $137,444, while for the same period the exports were 241,000 pounds, valued at $33,000.

It does not seem to me that this showing justifies an increase of 400 per cent over the present law, whereas 1 cent per pound is an increase of only 100 per cent. The value of the product in 1921 was only 5 cents a pound, so 1 cent a pound is an ad valorem equivalent of 20 per cent. I do not believe the committee or the Senate is justified in doubling the rate now.

Mr. McCUMBER. Mr. President, I believe I should give the latest data on the matter of importations, and so forth. The Senator from Wisconsin has already given the production in the United States and he gave the imports for nine months of 1921. The last report from the Tariff Commission in the form of a memorandum shows that during 1921 the imports amounted to 5,542,965 pounds, valued at $246,191, at a unit value of approximately 4½ cents a pound. This is considerably lower than the pre-war price, which ranged from 5.4 cents in 1913 to 8.4 cents in 1911. The proposed duty of 2 cents per pound on the low invoice value of 1921 would amount to approximately not 40 per cent, as the Senator stated, but 45 per cent, taking the whole year's importation, while based on the pre-war prices it would amount to between 20 and 35 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from North Dakota yield to the Senator from New Mexico?

Mr. McCUMBER. In a moment. It is a very uncommon thing to have the price of an imported commodity going very much below the pre-war price of 1912, 1913, and 1914, but the importations which are now coming in are very much less in value per pound than those which came in during the pre-war years, while the cost of production in this country has very greatly increased.

I yield now to the Senator from New Mexico.

Mr. JONES of New Mexico. I wanted to inquire where the importations are coming from.

Mr. McCUMBER. My information is that most of them come from Germany, but I am not certain about that. I am taking the Tariff Commission's report on that. They also come in, I am informed, from Japan.

Mr. JONES of New Mexico. I rather supposed they were coming in from Germany. I do not believe that the prices of the importations are reliable—I mean reliable as an index of what the purchaser actually pays. We all know that German exchange has been falling, and we do not know the amount of money which the importer actually paid for the commodity, because under the law the price of exchange is considered as of the date when the exports occurred. So as to the goods coming from Germany any cost taken as the basis for duty is no indication, or rather is no fixed fact, which would indicate the amount the importer actually paid for the commodity. But even with all the difference in exchange, the present imported cost on which the duty is levied is not much below the 1913 price. I do not think that presents a situation which warrants a change of law involving such an enormous increase as has been suggested by the Senator from Wisconsin.

Mr. KELLOGG. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. McCUMBER. I yield.

Mr. KELLOGG. I understand the Senator to say that within the last few months the importations have largely increased.

Mr. McCUMBER. Yes.

Mr. KELLOGG. Does the Senator have any idea that they would increase under the 1-cent duty named in the bill?

Mr. McCUMBER. Yes; they are increasing now and increasing enormously. Let me call the Senator's attention to the fact that under the present rate they are being forced into this country at a value very much below the pre-war price. We have shown by the Tariff Commission's report, which I have already read into the RECORD, that it would require at least the 2-cent duty.

Mr. KELLOGG. What is the present duty?

Mr. McCUMBER. The present duty is one-half cent.

Mr. KELLOGG. The bill as it now stands doubles that duty?

Mr. McCUMBER. Yes.

Mr. KELLOGG. I do not see why that is not sufficient.

Mr. McCUMBER. Two cents would be four times the present rate.

Mr. CALDER. Mr. President, because of the low duty and the consequent large importations, the concerns in this country engaged in the production of chlorate of potash have all been compelled to close their doors. They are not producing it at all. This protest against the duty comes from men who do not make the article. We have given them a substantial duty upon their commodity. This is the same rate that was carried in the Payne-Aldrich law. In this paragraph we have provided practically the same rate on every article as in the Payne-Aldrich law, believing that was the best under all circumstances. I think that if there is any rate in this particular paragraph that is justified, it is the one under consideration, and I hope there will be no objection to it.

Mr. JONES of New Mexico. Mr. President, I desire to call attention to the fact that even the imports mentioned by the Senator from North Dakota are relatively small as compared with the domestic production, and that the exports of those commodities have been made on a large scale.

Mr. McCUMBER. There are no exports now at the present time.

Mr. JONES of New Mexico. Information from the Tariff Commission indicates otherwise.

Mr. McCUMBER. Not at the present time.

Mr. JONES of New Mexico. The first nine months of 1921 are given and the years 1918, 1919, and 1920. It is true they may have ceased since that time. I have not the later information.

Mr. McCUMBER. In 1921 we had very considerable exports. In 1922 we have only $43,000 worth. Imports, on the other hand, are about 40 per cent of the production.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will report the next amendment to paragraph 75.

The ASSISTANT SECRETARY. On page 28, line 10, in the same paragraph, the committee proposes to strike out "10" and insert "8," so as to read:

Bromide, 8 cents per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On the same page, in line 11, the committee proposes to insert "1½ cents per pound," so as to read:

Bicarbonate, 1½ cents per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 28, line 11, after the word "carbonate," it is proposed to insert "three-fourths of 1 cent per pound," so as to read:

Carbonate, three-fourths of 1 cent per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 28, in line 12, after the word "potash," the committee proposes to insert "1 cent per pound," so as to read:

Hydroxide or caustic potash, 1 cent per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 28, in line 13, the committee proposes to insert "refined, one-half of 1 cent per pound," so as to read:

Nitrate or saltpeter, refined, one-half of 1 cent per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 28, line 14, after the word "permanganate," the committee proposes to strike out "25 per cent ad valorem" and insert in lieu "4 cents per pound," so as to read:

And permanganate, 4 cents per pound.

The amendment was agreed to.

The ASSISTANT SECRETARY. The committee now proposes, in line 15, beginning with the colon, to strike out the remainder of the paragraph, in the following words:

Provided, That for a period of five years beginning on the day following the passage of this act there shall be levied, collected, and paid in addition thereto on all the foregoing a duty of 15 per cent ad valorem.

The amendment was agreed to.

Mr. McCUMBER. In paragraph 86, page 30, in line 20, I desire to withdraw the committee amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the amendment is withdrawn.

Mr. McCUMBER. On page 30, line 21, I move to strike out "25" and insert in lieu thereof "30."

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 30, line 21, strike out "25" and insert "30," so as to read:

PAR. 86. Titanium potassium oxalate, and all compounds and mixtures containing titanium, 30 per cent ad valorem.

The amendment was agreed to.

Mr. McCUMBER. In paragraph 205, page 33, in lines 6 and 7, I move to strike out the words "crude, 25 cents per ton" and the semicolon.

The ASSISTANT SECRETARY. On page 33, lines 6 and 7, strike out "crude, 25 cents per ton" and the semicolon, so as to read:

Plaster rock or gypsum, ground or calcined, $1.40 per ton.

The amendment was agreed to.

Mr. McCUMBER. I ask unanimous consent that the vote by which the committee amendment in lines 20 and 21, on page 40, was agreed to may be reconsidered, and I shall then move to strike out the words "incandescent electric light bulbs, with or without filaments."

Mr. ROBINSON. What would be the effect of that amendment?

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent to reconsider the vote by which the amendment to which he refers was agreed to.

Mr. ROBINSON. Pending the request of the Senator from North Dakota, I inquire of the Senator what would be the effect of the amendment which he now proposes?

Mr. McCUMBER. The purpose is to transfer "incandescent electric light bulbs, with or without filaments," from under this provision to paragraph 229, with a duty of 35 per cent ad valorem.

Mr. KELLOGG. Is that an increase?

Mr. McCUMBER. No; it is a reduction of 10 per cent.

Mr. ROBINSON. I have no objection to the amendment.

The PRESIDING OFFICER. In the absence of objection, the request of the Senator from North Dakota to reconsider the vote by which the amendment referred to by him was adopted will be granted.

Mr. JONES of New Mexico. Mr. President, I merely wish to commend the proposal which the Committee on Finance now makes. When we originally considered this paragraph I called attention to the fact that there was absolutely no reason for putting electric light bulbs into a paragraph containing the other items which are embraced in that paragraph. I then insisted that they must have been put in by some one as a joker, for they certainly had no relation whatever to the other articles covered by the paragraph. I repeat, I commend the action of the Committee on Finance in now proposing to strike bulbs from that paragraph.

The PRESIDING OFFICER. Without objection, the amendment of the committee to the committee amendment is agreed to.

Without objection, the committee amendment as amended is agreed to.

Mr. McCUMBER. Mr. President, I ask unanimous consent to reconsider the vote by which the amendment on page 46, in lines 5 and 6, was agreed to, and then I shall ask that the amendment be disagreed to.

The PRESIDING OFFICER. Without objection, the vote whereby the amendment was agreed to will be reconsidered, and, without objection, the amendment will be disagreed to.

Mr. JONES of New Mexico. Mr. President, I should like, at some time, to have an opportunity to move to reduce the rate provided in the paragraph.

The PRESIDING OFFICER. The Senator has the opportunity now, as the vote whereby the committee amendment was agreed to has been reconsidered.

Mr. JONES of New Mexico. Mr. President, with regard to this amendment I desire to say that electric-light bulbs are produced in this country as cheaply as they are produced in any country on earth. There is an absolute monopoly, in my judgment, in the making of these bulbs. They are made by machinery. I can not see why the Committee on Finance should insist upon even such a high duty as 35 per cent upon incandescent electric-light bulbs, which, as we all know, are now in common use in all communities in the country where electric current may be had. As pointed out and as demonstrated by the information furnished when we were discussing the paragraph, there is a close organization which is producing these bulbs. I repeat they are made by machinery as cheaply in this country as they can be made anywhere on earth. I therefore move to strike out the rate of 35 per cent and insert 20 per cent.

Mr. McCUMBER. Mr. President, I wish to say very briefly in reply to the Senator from New Mexico that there was a great deal of testimony taken by the Committee on Finance with reference to the cost of production of these articles. Without going into the details I now recall that a committee composed of workmen in the glass works visited Europe, obtained figures as to the cost of production and the selling price there of incandescent bulbs as well as of a great many other products of the glass industry, and gave us the comparative cost in the United States.

If their testimony is to be at all relied upon it would require very much more than even 70 per cent ad valorem to equalize conditions, and 70 per cent ad valorem was what they desired at that time. The committee is giving just one-half of what they insisted upon and only a fraction of what their testimony showed to be the difference in the cost of production in foreign countries and in the United States.

Mr. JONES of New Mexico. Mr. President, I simply desire to observe further that the processes of making these bulbs have greatly changed and that the difference in cost to which the Senator from North Dakota referred does not apply to the machine-made bulbs which are in common use throughout the country.

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Mexico [Mr. JONES] to amend the committee amendment by striking out "35" and inserting "20."

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment to strike out the paragraph as amended.

The amendment was rejected.

Mr. McCUMBER. I ask unanimous consent to reconsider the vote by which the committee amendment, beginning at the end of line 12, on page 48, was agreed to.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the vote whereby the amendment was agreed to is reconsidered.

Mr. McCUMBER. I now move to strike out "$1.25" and in lieu thereof to insert "75 cents."

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. I ask unanimous consent to reconsider the vote by which the committee amendment on page 48, line 14, was agreed to.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the vote whereby the amendment was agreed to is reconsidered.

Mr. McCUMBER. I move to strike out "$1" and in lieu thereof to insert "75 cents."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 50, line 16, I move to strike out the word "tantalum" and the comma.

The amendment was agreed to.

Mr. McCUMBER. On page 50, line 22, after the words "ad valorem," I move to insert a semicolon and the words "ductile tantalum metal or ductile nonferrous alloys of tantalum metal, 40 per cent ad valorem."

The amendment was agreed to.

Mr. McCUMBER. On page 57, lines 8 and 9, I move to strike out "seven-twentieths" and in lieu thereof to insert "one-fifth."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. McCUMBER. I ask unanimous consent to reconsider the vote by which the first committee amendment, on page 57, line 12, was agreed to.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the vote whereby the amendment was agreed to is reconsidered.

Mr. McCUMBER. I now move to strike out "25" and insert in lieu thereof "20."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Dakota to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. LENROOT. Mr. President, I should like to ask the Senator a question. The Senate has now reduced the rate on pig iron below the House rates. That is true, is it not?

Mr. SMOOT. That is true.

Mr. LENROOT. Evidently the committee has not taken that into consideration with reference to the duties upon ingots, bars of iron, and so forth. Were the duties on those articles taken into consideration in fixing the rate now proposed? If the rate on pig iron is reduced below the House rate should not that reduction be carried throughout the schedule?

Mr. SMOOT. The committee has reduced the rate on pig iron from $1 a ton to 75 cents a ton.

Mr. LENROOT. That is from the House rate of $1.25.

Mr. SMOOT. When the rates on pig iron were changed from $1.25 a ton to $1 a ton, corresponding changes were made on account of that reduction throughout the schedule. It amounts to so little, however, that I hardly know how we could carry it throughout the schedule.

Mr. LENROOT. That can hardly be so, because when we come to steel ingots and other heavy steel products the weight is there just the same.

Mr. SMOOT. Yes; but I am speaking of the finished product.

Mr. LENROOT. I was not speaking of the finer finished products. I was saying that the committee now jumps from pig iron, on page 48, to page 57, leaving the rates on all the heavy steel, such as bar steel, ingots, muck bars, the next processes in the manufacture, at the same high levels. It seems to me, the committee having reduced the rate on pig iron, that reduction ought to be carried throughout the schedule.

Mr. SMOOT. I think the Senator knows that we produce about 50 per cent of all the pig iron in the world. The importations are of the heavy products made from the pig iron, but before becoming finished iron proper generally comes into this country as ballast. The committee did not think it worth while to take that class into consideration, but as we proceed, if it has not already been done, the Senator will notice that we cut the rate upon steel rails, and we also cut the rate on structural steel.

The Senator must also remember that we added considerable expense to the manufacture of steel in this country through what I call the very high rate upon the alloys.

Mr. LENROOT. But it does seem to me that, starting with pig iron and reducing the rate from $1.25 to 75 cents, the rates on most of these heavy steels, the next process of manufacture, ought to be reduced.

Mr. SMOOT. Mr. President, the rates upon the alloys far exceed the reduction that was made upon pig iron.

Mr. LENROOT. Not the increased rates made in the Senate over the report of the committee.

Mr. SMOOT. Yes; if the Senator will figure it out, I think he will find that to be the case.

Mr. LENROOT. The increases made against the recommendations of the committee?

Mr. SMOOT. I am speaking about the rates on the alloys.

Mr. LENROOT. I am speaking of the alloys, too.

Mr. SMOOT. I have not any doubt but that they are greater.

Mr. LENROOT. What increases have been made?

Mr. SMOOT. The rates on magnesite, magnesia, tungsten, and some of the carbons—I do not remember just how many—have all been increased.

Mr. LENROOT. Except as to magnesite, the increases made were not very substantial over the rates proposed by the committee. The increase on magnesite was, I think.

Mr. SMOOT. Yes; that is true as to tungsten, too. I think we agreed about that.

Mr. LENROOT. I think so.

Mr. SMOOT. As far as the billets are concerned, the importations into this country are very, very slight, indeed; and they are only specialties, and most of them come in from Sweden. They would come no matter what the rate was, because they enter into a certain kind of iron and steel.

Mr. LENROOT. Yes; but, of course, as the Senator well understands, while we have not any monopoly of steel in this country, there is one corporation that fixes the price, and the higher the rate the greater their ability to fix the price to the American consumer.

Mr. SMOOT. I know the situation just about in the same way that the Senator does, I think. If it were simply for the United States Steel Corporation, these rates would not be as high as they are. I frankly admit that; I think the United States Steel Corporation themselves will admit it; but the independents are fearful that the prices here will drive them out of business.

Mr. LENROOT. No; but my point was that the Senator indicated that it did not make any difference whether the rates were higher than necessary or not, because there would be no imports.

Mr. SMOOT. If I said that, I certainly did not intend that it should be put that way.

Mr. LENROOT. Of course, the Senator will admit that the higher the rate the greater the ability to fix a higher price.

Mr. SMOOT. All I had in mind was that even at the present rates the importations of billets into the United States are very small, and they are specialties that are coming in mostly from Sweden, and enter into a certain kind of steel that is made in this country.

Mr. LENROOT. All I can say is that I am very sorry the committee has not seen fit to carry on the reductions in the heavy ingots and bars of steel that they have now given with reference to pig iron, which is the base. They have reduced the rate on pig iron nearly 50 per cent from that originally adopted by the Senate and recommended by the committee; but then we get no reduction, as I read the bill and the proposed amendments, until we get to structural steel.

Mr. JONES of New Mexico. Mr. President, may I ask the Senator from Wisconsin if he believes that we need any duty on these heavy steels?

Mr. LENROOT. I do not.

The PRESIDING OFFICER. The question is on the committee amendment as amended.

The amendment as amended was agreed to.

Mr. SMOOT. Mr. President, I now ask that we turn to page 61, line 7, and reconsider the vote by which the committee amendment was rejected striking out "20" and inserting in lieu thereof "25."

The PRESIDING OFFICER. Is there objection to reconsidering the vote by which the committee amendment was rejected?

Mr. LENROOT. Mr. President, I insist that these amendments be stated.

The PRESIDING OFFICER. Is there objection to reconsidering the vote by which the amendment was rejected? The Chair hears none. Now, the question is on the committee amendment.

Mr. SMOOT. Now, I will make a brief statement as to why this change was made.

Mr. ROBINSON. What is the change that the committee proposes?

Mr. SMOOT. The change was to disagree to the amendment on line 7.

Mr. JONES of New Mexico. What page?

Mr. SMOOT. Page 61; the committee having agreed to 20 per cent instead of 25 per cent. There were presented to the committee numerous statements showing that this woven-wire cloth—that is, the gauze, fabric, or screen made of wire composed of steel, brass, copper, bronze, or any other metal or alloy, not specially provided for, with meshes not finer than 30 wires to the linear inch in warp or filling—would certainly require a rate of 25 per cent. The statements made to the committee showed that the process was one, I suppose, that is no more difficult in this country than in any other country; I suppose it is woven in the same way; but from the importations

coming in under the present rate the committee felt that it was justified in giving the 25 per cent as the House had given 20 per cent on the American valuation.

Mr. LENROOT. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Wisconsin?

Mr. SMOOT. I do.

Mr. LENROOT. I notice that the original recommendation was 25 per cent. Did the Senate reject that or did the committee ask that it be rejected?

Mr. SMOOT. The committee asked that it be rejected, and we went back to the 20 per cent. Now, with the additional testimony that was given to the committee, the committee feels that in this particular case it made an error and asks that it be made 25 per cent.

Mr. JONES of New Mexico. Mr. President, that is indicative of a very peculiar process of tariff-making legislation. In this case the House put on a duty of 20 per cent ad valorem, based, of course, on the American valuation. The Finance Committee of the Senate, when it originally considered all of these paragraphs in the bill, concluded that the duty should be 25 per cent on the foreign valuation. When we came to consider the paragraph in the Senate the Finance Committee itself, according to my recollection, asked that its amendment be rejected, so that the rate should be 20 per cent on the foreign valuation—mind you, a change of only 5 per cent. The committee evidently had considered the matter with great care and the Senate had become convinced that the 20 per cent on the foreign valuation was sufficient. Mind you, there was, first, the original investigation by the committee; then followed another investigation by the committee, and a report and recommendation to the Senate, and the Senate acted upon it; and now we have this third performance, with the committee coming in and asking to have the original recommendation restored.

By what process of investigation has this result occurred? What influence has been exerted? I do not mean improper or contaminating influence, but what influence is it? Where is the new evidence?

It strikes me that it is really a pitiable situation when tariff rates of duty affecting the cost of commodities shall be fixed in such a sporadic way as appears here.

Mr. ROBINSON. Mr. President, in addition to what has been said by the Senator from New Mexico, the Summary of Tariff Information furnished the Senate by the Tariff Commission does not justify the proposed increase in this rate. The present rate under the Underwood tariff law is 15 and 20 per cent, there being two classifications under that rate, and, considering the production, the exports, and the imports, there is not a circumstance brought to the attention of the Senate in the information to which I have referred that justifies this increase.

The committee, by receding from its proposed increase in the beginning, prevented the debate which would have resulted in the Senate repudiating its amendment increasing this rate; and now, when the debate is practically concluded, the Senate is confronted with the spectacle of the Finance Committee coming in here and bringing in countless rates which contemplate a reversal of the action of the Senate, taken after deliberate consideration, and in many instances taken after prolonged debate, as I shall show in a few minutes, respecting some other amendments accompanying this proposal on the part of the Finance Committee.

There is no justification for this proposed increase. The business does not require it. Under the present rates the business in this country is prosperous, the importations are not excessive, and no circumstance has been brought to the attention of the Senate which justifies the third position on the subject which the Finance Committee is taking. It first proposed to increase the rate to 25 per cent; it then receded from that position and consented to the House rate; and now it proposes to ask the Senate to reverse its action heretofore taken and adopt the increased rate originally proposed.

Mr. JONES of New Mexico. Mr. President, may I suggest to the Senator from Arkansas that the reduction of the rate proposed by the committee on the original examination was brought about by reason of the discussion. That paragraph was thoroughly discussed at the time it was originally before the Senate, and by reason of that discussion and the overwhelming evidence, some of which the Senator from Arkansas has just referred to, the Finance Committee recommended that reduction. I should like to know what influence it is that has brought about this change.

Mr. SMOOT. Mr. President, the committee is unable to find out what the importations were. Nobody can tell what the importations were or what was imported, whether it was a small mesh or a large mesh. Under existing law it fell under the basket clause of 20 per cent ad valorem, and we gave a rate of 20 per cent ad valorem, thinking perhaps that was sufficient. The House had given it upon the American valuation, and we thought that the 20 per cent would be sufficient upon the foreign valuation. The Tariff Commission recommended that the change be made here for statistical purposes hereafter.

Mr. President, the existing law places a duty of 20 per cent upon this material, and, as I stated, the testimony that was shown before the committee, brought there by one of the Senators of the United States, convinced the majority of the committee last evening that it was necessary, in order to protect this industry, to have 20 per cent upon the coarser mesh and 35 per cent upon the other.

I wish I had the statistics, so that I could place them before the country; but we have not them. Therefore I can say no more than I have said, that the majority of the committee last evening thought, with the testimony that was shown to them, that the rate ought to be 25 per cent instead of 20.

Mr. ROBINSON. Mr. President, that is a very remarkable statement. After this question has been pending before the Senate for 90 days or more, after the Senate had receded from its position something like 90 days ago asking an increase in this rate, on the expiration of the debate last evening some Senator, whose name is not disclosed, appeared before the committee——

Mr. FRELINGHUYSEN. Mr. President——

Mr. ROBINSON. Just one moment—and presented to the committee evidence which the committee can not present to the Senate, and convinced the committee that it was right in the beginning and is wrong in this instance.

Mr. SMOOT. No, Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Utah?

Mr. ROBINSON. I do.

Mr. SMOOT. Not that it can not be presented to the Senate; the Senator from Utah never made that statement.

Mr. FRELINGHUYSEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from New Jersey?

Mr. ROBINSON. Yes; I yield to the Senator.

Mr. FRELINGHUYSEN. Mr. President, I think the Senator from Arkansas knows me, and knows that any effort I may make to impose a tariff rate is based upon a sincere belief in the reasonableness of the rate.

Mr. ROBINSON. Will the Senator from New Jersey, in my own time, permit me to say that his interruption is the first intimation that I or any Member of the Senate has had as to what Senator it was who appeared before the Finance Committee on yesterday and succeeded in getting its action reversed?

Mr. FRELINGHUYSEN. I say to the Senator that these industries are in my State, and I will be very glad to state to the Senator the reasons why this increase of rate was asked for.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Arkansas?

Mr. FRELINGHUYSEN. I yield.

Mr. ROBINSON. I want to say to the Senator from New Jersey and to the Senator from Utah that the time to have met this issue was when the paragraph was before the Senate in the beginning, when I and others discussed it. Instead of receding from its position and accepting the position of the opposition to the increase as correct, the Senator from New Jersey might very well have given the Senate the information then upon which the Finance Committee now seeks to justify a reversal of its action.

Mr. FRELINGHUYSEN. Mr. President, I do not think the Senator should question the motives of the committee or any Senator——

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Arkansas?

Mr. FRELINGHUYSEN. I yield.

Mr. ROBINSON. I point out to the Senator from New Jersey that I have not questioned the motives of any Senator or of any committee. I have pointed out the fact that the course which this matter has taken in debate is extraordinary, and I have asked for an explanation of it. But the Senator, if he understands the rules of the Senate, if he understands the plain import of the language I have employed, will not attribute to me a violation of the rules of the Senate.

I have neither done nor contemplated anything of the kind. I have said, within the proper limitations of debate, that it was an extraordinary course for the Finance Committee to bring

into the Senate an amendment proposing an increase in this rate, and then, when the issue was presented, recede from it, and back down, and when we are about to take the final vote on the bill come in and seek to establish the original proposition. I have impugned nobody's motives.

Mr. FRELINGHUYSEN. The Senator has criticized the action of the committee, then, in making a change in their position on these rates in the woven-wire cloth paragraph. The facts are these:

There are in New Jersey, and I think in one or two other States, factories making this very fine woven mesh wire cloth. This matter was investigated by the House, and they placed a duty of 20 per cent, American valuation, on gauze fabric or screen made wire, composed of steel or brass. The Finance Committee increased that rate to 25 per cent on the foreign valuation, and the rate on meshes finer than 30 they increased from 30 to 40 per cent ad valorem. That was agreed to at the time the information was presented to the Finance Committee in the first instance.

During my absence from the committee those rates were reduced, and finally on the floor the rate was made 20 per cent on the woven-wire cloth gauze and 30 per cent on the meshes finer than 30, two separate classifications.

On July 18 one interest in my State, a company of moderate size, not a very large company, and another similar in size, called my attention to the fact that under the present condition of exchange and wages these new rates were not sufficient to protect them in the manufacture of this special type of wire mesh they were making, requiring skilled workmanship. The wire is so fine that a square foot costs $9 or $10 to manufacture, and they asked that the rates be restored to the House rates, which were based on the American valuation, and that the House rates should be applied on the foreign valuation.

In the letter they spoke of the manufacturing of this cloth as carrying a large labor cost on account of the many processes through which it had to go. They spoke of the workingmen in this factory, who assembled and asked that this rate be restored. They showed conclusively that already, under the present rate of duty of 15 per cent, there were large importations, and I read now from their letter of July 18:

> We have record of importations through the port of New York alone during the month of June of 45 cases of this special cloth—

That is, this fine wire mesh—

> which, if the cases contain the usual average in importation, would amount close to 50,000 square feet. It could run over or under this amount according to the size of the rolls.
>
> This would be the capacity of a good-sized factory. These importations are continuing through July very strong and we do not know yet how strong Germany is coming back into this market. She has only just commenced to make the larger shipments and she has loom capacity enough to close up a number of good factories in this country. A man in our trade has just returned from a trip through Germany, Scotland, France, and England. The writer in a personal talk with him received the following figures:
>
> The weavers in Germany are getting $6 per week American money and all other wage earners in the same proportion in these factories.
>
> In Scotland they are getting a little more than double this amount and the Scotch manufacturers reported to him that their wages would be reduced very shortly.
>
> In the make-up of this wire cloth there is an enormous amount of labor. There is labor in casting the billets, rolling it into rods, drawing it down from the rods to the fine sizes, spooling it, rehandling it in annealing, putting it on to the loom beams, threading it in to get ready to weave. After the cloth is woven it is carefully inspected, goes through a springing process, and is edged and sewed by girls. Following this it goes on the finishing tables and is finished for boxing.
>
> Our weavers and, in fact, all of our help is high-grade American labor. Many of our men have worked all their lives in the trade and practically all of them live here in Belleville—

That is a suburb of Newark—

> We have no cheap labor in the factory. This applies, as far as we know, to every shop of our kind in this country.
>
> Before the war we feel safe in stating that there was hardly a factory in our line making sufficient money to declare any kind of a dividend. A number of the small factories failed and a number of the larger ones were very close on the verge of failing. Previous to the change in the old tariff we believe our rate was 45 per cent and Germany matched and in some cases undersold slightly at that time. This schedule was thrown into the basket clause and placed at 15 per cent, and to-day we need all of 40 per cent, and there is not a factory in this country that would be satisfied with less. Our men in the factory are getting upset over the importations coming in with what they may have to face later. We assure you it is a serious proposition to our industry throughout the country.

This concern is the Eastwood Wire Manufacturing Co., an excellent concern, of good reputation, and they have asked that the proper rates of duty be fixed. There are, I think, figures in this letter to show the difference in the cost. I am informed that the Reynolds report shows 40 to 45 per cent.

It may be wrong in practice and method to change a rate at the last moment. I have nothing to say regarding that. I am only asking that a fair duty be placed upon this product, in accordance with the records which we have and the figures which we present. I did not restore this rate to the rate in the bill as it passed the House, which was 20 per cent on the foreign valuation and 40 per cent on the American valuation. I placed the rate at 25 per cent, raising it only 5 per cent, and 35 per cent on the foreign valuation on the finer sizes. If that is not justified by the figures, if that is not justified by the record in this paragraph in the bill, I do not know what is justified.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Does the Senator from Utah desire a reconsideration of the vote by which the amendment in line 9, page 61, was agreed to?

Mr. SMOOT. I do, Mr. President.

The PRESIDING OFFICER. Without objection, the vote will be reconsidered. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 61, line 9, the committee proposes to strike out "30" and to insert "40."

Mr. SMOOT. I move to amend that by inserting "35."

Mr. ROBINSON. The effect of this amendment would be to increase by 5 per cent the tariff on the commodities to which it applies. It also relates to woven-wire cloth, and all that has been said regarding the course which this tariff item has taken applies with equal force to the pending amendment. It may be true that since the Senate adopted an increase in the first class, that would be urged by some as a justification for an increase in this class of woven-wire commodities, but I do not believe that any rate on woven-wire cloth higher than that now in force is justified, and for that reason I shall vote against the amendment.

Mr. JONES of New Mexico. Mr. President, I merely want again to call attention to this method of tariff making. The statement of the Senator from New Jersey a while ago presents a concrete illustration of just how it is done. A manufacturer comes before the committee or writes a letter to one member of the committee, as was done in this case, telling what the wages are in Germany and that some of these commodities have come in. He said himself that the importations are not regular. He speaks of only one shipment of 45 cases. That is all the letter stated, merely giving the difference in wages in Germany and the fact that a small amount of the commodity came into the United States. The manufacturer suggests that, perhaps, at some time in the future Germany will revive her industry and begin regular shipments to the United States, and it is that one fear of what may happen in the future which forms the basis for the framing of this bill.

Mr. ROBINSON. Not so much to protect against competition that actually exists, but against possible competition which may arise in the future.

Mr. JONES of New Mexico. And the possibilities of that competition arising in the future are so small that it does seem to me that a man who is keeping pace with events in Germany ought not to be influenced at all. That matter has been discussed here time and again.

However, I desire especially to call attention to the speech made by the Senator from New Jersey and to the evidence he has presented here as illustrative of the very many monstrosities contained in the entire bill as it has been made, because that is only a mere illustration of thousands of rates affecting the thousands of items in the bill. I just wonder how any Senator who has the responsibility of framing this great revenue measure could arise in this Chamber and admit that he is influenced and is voting for rates upon such flimsy pretexts as are presented here by the Senator from New Jersey.

Mr. FRELINGHUYSEN. Mr. President, the Senator from New Mexico is not only unfair but he is unjust when he makes such a charge as that. There have been Senators upon both sides who have come to the committee asking for the revision of rates. The Senator shows his ignorance of the conditions regarding the industry when he says that the imports are inconsiderable. If he had listened to my speech he would have known that the imports were not inconsiderable, but that in one shipload alone there was sufficient in quantity to close one factory.

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. FRELINGHUYSEN. I do.

Mr. ROBINSON. What was the amount of importations?

Mr. FRELINGHUYSEN. There were 45,000 cases in the one importation that I spoke of. I do not know what they are generally.

Mr. ROBINSON. I supposed that was true.

Mr. FRELINGHUYSEN. But I do know that one importation was enough to close that factory.

Mr. ROBINSON. The Senator knows there was one considerable importation. He is unable to give any information as to the total imports. I thought that would prove to be so.

Mr. FRELINGHUYSEN. I want to say that it is owing to the way the Underwood law was written that we have no statistics.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. On page 62, in line 5, I move to strike out "seven-fortieths" and insert in lieu thereof "one-tenth."

The ASSISTANT SECRETARY. On page 62, line 5, the Senator from Utah moves to strike out "seven-fortieths" and insert in lieu thereof "one-tenth," so as to read:

Rail braces, and all other railway bars made of iron or steel, and railway bars made in part of steel, T rails, and punched iron or steel flat rails, one-tenth of 1 cent per pound.

The amendment was agreed to.

Mr. SMOOT. In paragraph 339, page 67, in line 17, I move to strike out the word "similar" before the word "hollow."

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT SECRETARY. On page 67, in line 17, strike out the word "similar," so as to read:

Table, household, kitchen, and hospital utensils, and hollow or flat ware, not specially provided for.

The amendment was agreed to.

Mr. SMOOT. I understand that the balance of the amendments in the paragraph were passed over.

The PRESIDING OFFICER. That is correct. The next amendment in the paragraph will be stated.

The ASSISTANT SECRETARY. On page 67, in line 19, the committee proposes to strike out "30" and insert "50," so as to read:

PAR. 339. Table, household, kitchen, and hospital utensils, and hollow or flat ware, not specially provided for; composed of iron or steel and enameled or glazed with vitreous glasses, 5 cents per pound and 50 per cent ad valorem.

Mr. ROBINSON. What was the request of the Senator from Utah?

Mr. SMOOT. The request was to strike out the word "similar," in line 17.

Mr. ROBINSON. I understood that.

Mr. SMOOT. Then the balance of the amendments in the paragraph were passed over and have not been acted upon by the Senate and I wanted the Senate to act upon them now.

Mr. ROBINSON. Very well.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in line 19, striking out "30" and inserting "50."

Mr. JONES of New Mexico. Mr. President, when we were considering the bill in its regular order I made rather an extended investigation of this paragraph. The paragraph ought to be discussed at length. There are many articles in the paragraph which are not only manufactured in this country as cheaply as in any other but we are sending those articles in vast quantities to the four quarters of the globe. The paragraph covers "table, household, kitchen, and hospital utensils, and hollow or flat ware, composed of iron or steel and enameled or glazed with vitreous glasses." It is the kind of product that is used in every household in the land.

At this time, when the matter can only be discussed for a few moments, we are confronted with this enormously important paragraph and asked without information simply to agree to the high rates of duty which the committee propose of 50 per cent ad valorem—think of it!—and then seeking to pass it by a mere wave of the hand.

It is impossible now to take up the paragraph and discuss it as it should be discussed. It would be impossible under the limitation of the unanimous-consent agreement to do it. It seems to me that the paragraph should have been considered when we had unlimited time for debate. I was prepared to discuss it at length and the Senator from North Dakota asked that it go over. They wanted to reconsider it. Now, the only reconsideration is that they come in here and strike out the word "similar," a mere technicality, and then ask that the rate be accepted without any explanation whatsoever, involving such items as these and such enormous increases above the present law, yet there is not a word of justification for it.

Mr. President, upon this amendment I ask for the yeas and nays.

Mr. SMOOT. Mr. President, I want to say to the Senator from New Mexico that I wish we did have time to discuss the paragraph. It went over and nothing was done upon it until the unanimous-consent agreement was entered into, as the Senator has said. I think it is worthy of discussion. I do not want to say anything more about it now. I do not know what it will look like when it comes out of conference. I can not say, of course, because I do not know; but I do want to say that I agree with the Senator from New Mexico that it ought to have been discussed at length.

Mr. ROBINSON. Mr. President, in the statement of the Senator from Utah I catch a gleam of light. This is an outrageous provision. Considering the character of the articles, the generality of their use, the imposition of substantially 60 per cent ad valorem on importations is unreasonable from any standpoint. I submit, in view of the conditions and the history of the paragraph, that we ought to disagree to the committee amendment. I shall, therefore, ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment, on which the yeas and nays have been demanded.

Mr. ROBINSON. I am willing, if the other Senators are, to take a vote upon the committee amendments as a whole, increasing the rate as a whole, and let one record vote dispose of it.

Mr. SMOOT. That would be satisfactory, although I wish to say to the Senator that the second bracket—15 cents a pound and 60 per cent ad valorem upon those articles wholly or in chief value of aluminum—has a different bearing than the other two brackets.

Mr. JONES of New Mexico. I was going to suggest that we divide the question.

Mr. SMOOT. If we divide the question and have the vote apply to the first bracket and the third bracket, they would fall in the same class, but the middle bracket is quite different.

Mr. ROBINSON. I think that is a good suggestion. I was trying to save time by offering to vote on them as a whole. The Senator from New Mexico, I think, intends to offer an amendment.

Mr. JONES of New Mexico. I think the first item in line 19 is at least twice too high, because there is 5 cents a pound specific duty on all table, household, hospital, and kitchen utensils, and hollow or flat ware, composed of iron or steel and enameled or glazed with vitreous glasses, and the committee recommends 50 per cent ad valorem. I think 25 per cent would be ample. I move to strike out 50 and insert 25.

Mr. ROBINSON. On that I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on the adoption of the amendment offered by the Senator from New Mexico to the amendment of the committee, on which the yeas and nays have been demanded.

The yeas and nays were ordered and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as on the last vote, I vote "nay."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "nay."

Mr. CURTIS (when Mr. PEPPER's name was called). I wish to announce that the Senator from Pennsylvania is detained on official business.

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. ROBINSON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Rhode Island [Mr. GERRY], I vote "yea."

Mr. TRAMMELL (when his name was called). I announce my pair as before. Being unable to obtain a transfer, I withhold my vote. If at liberty to vote I would vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the Senator from Pennsylvania [Mr. PEPPER], I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before as to my pair and transfer, I vote "nay."

Mr. HARRISON. On this vote I have a general pair with the junior Senator from West Virginia [Mr. ELKINS], who is absent. I am unable to obtain a transfer. If permitted to vote, I would vote "yea."

The result was announced—yeas 23, nays 34, as follows:

YEAS—23.

Ashurst	Jones, Wash.	Pomerene	Smith
Culberson	Kellogg	Ransdell	Stanley
Dial	Kendrick	Reed	Swanson
Fletcher	McKellar	Robinson	Underwood
Heflin	Myers	Sheppard	Walsh, Mont.
Jones, N. Mex.	Overman	Simmons	

NAYS—34.

Ball	Ernst	McCumber	Rawson
Brandegee	France	McLean	Shortridge
Bursum	Frelinghuysen	McNary	Smoot
Calder	Gooding	Moses	Sterling
Cameron	Hale	New	Wadsworth
Capper	Harreld	Newberry	Warren
Curtis	Keyes	Nicholson	Watson, Ind.
Dillingham	Lenroot	Oddie	
Edge	Lodge	Phipps	

NOT VOTING—38.

Borah	Harris	Norbeck	Sutherland
Broussard	Harrison	Norris	Townsend
Caraway	Hitchcock	Owen	Trammell
Colt	Johnson	Page	Walsh, Mass.
Cummins	King	Pepper	Watson, Ga.
du Pont	Ladd	Pittman	Weller
Elkins	La Follette	Poindexter	Williams
Fernald	McCormick	Shields	Willis
Gerry	McKinley	Spencer	
Glass	Nelson	Stanfield	

So the amendment of Mr. JONES of New Mexico to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question is now on the first committee amendment on page 67, in line 19, to strike out "30" and insert "50." [Putting the question.] In the opinion of the Chair, the "noes" have it, and the amendment is rejected. The next amendment will be stated.

The next amendment of the Committee on Finance was, on page 67, paragraph 339, line 20, after the word "aluminum," to strike out the numeral "28" and to insert "15 cents per pound and 60," so as to read:

Composed wholly or in chief value of aluminum, 15 cents per pound and 60 per cent ad valorem.

Mr. JONES of New Mexico. Mr. President, I move to strike out the numeral "60," on page 67, line 21, before the words "per centum," and in lieu thereof to insert the numeral "30," so that the rate on the ware provided for will be 30 per cent ad valorem.

Mr. President, this item relates to aluminum ware. The House of Representatives fixed the rate at 28 per cent ad valorem; the Senate committee recommends a rate of 15 cents per pound and 60 per cent ad valorem on aluminum ware. Of course, under the existing limitation we have not an opportunity to present this case as it should be presented, but from my examination of the subject, which was as thorough as I could make it for the purpose of discussing this paragraph when we were originally considering this schedule of the bill, I think I may state that the aluminum business of the United States is about as near a lead-pipe cinch monopoly as can be found; and, except for sporadic shipments of some aluminum ware from Germany, there is absolutely no reason on earth why the aluminum industry of the United States should not compete with the world. We had some exhibits which were presented here as a part of a side show which we witnessed on certain occasions in this Chamber, but the evidence of comparability was lacking, and evidence that this country is threatened with importations from abroad in any considerable quantity was absolutely lacking. Such a condition does not exist. As I have said, we can not, on account of the limitation of time, produce the evidence in this case, but I wish to repeat that if there is any one industry in this country which is controlled by an absolute monopoly, which has prospered beyond the dreams of anyone during the last 10 or 20 years, it is the aluminum industry. While the House of Representatives imposed an ad valorem rate of only 28 per cent upon this ware, the Senate Finance Committee comes in here and proposes a rate of 15 cents per pound specific and in addition 60 per cent ad valorem. A more monstrous proposition I do not believe has been presented to the Senate. To protect the product of a monopoly by such an exorbitant rate is absolutely indefensible.

The PRESIDING OFFICER. The amendment proposed by the Senator from New Mexico [Mr. JONES] to the amendment of the Committee on Finance will be stated.

The ASSISTANT SECRETARY. On page 67, paragraph 339, line 21, the Senator from New Mexico proposes to strike out the numeral "60," before the words "per cent" in the committee amendment, and in lieu thereof to insert "30."

The PRESIDING OFFICER. The question is on the adoption of the amendment of the Senator from New Mexico [Mr. JONES] to the amendment of the committee. [Putting the question.] The "ayes" have it, and the amendment to the amendment is agreed to. The question recurs on agreeing to the amendment as amended.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The next committee amendment will be stated.

The next amendment of the Committee on Finance was, on page 67, paragraph 339, line 21, after the word "valorem," to insert "composed wholly or in chief value of copper, brass, steel, or other metal, not specially provided for, 50 per cent ad valorem."

The PRESIDING OFFICER. The question is on the adoption of the committee amendment.

Mr. LENROOT. Mr. President, I should like to know what action was taken on the aluminum amendment?

Mr. SMOOT. The committee amendment was agreed to.

Mr. ROBINSON. Mr. President, we can not hear anything that is going on in the Chamber. I ask for order.

Mr. SMOOT. I will say that in paragraph 374 the rates on aluminum metal are provided at 5 cents per pound and 9 cents per pound, according to the nature of the article, and in paragraph 339 the committee proposed to impose a duty of 15 cents per pound as a compensatory duty upon hollow ware, table, household, kitchen, and hospital utensils.

Mr. LENROOT. The amendment of the Senator from New Mexico was rejected, was it?

Mr. SMOOT. No; but the committee amendment was agreed to.

The PRESIDING OFFICER. No; the Senator is mistaken about that. The amendment of the Senator from New Mexico was agreed to, and then the committee amendment as amended was agreed to.

Mr. LENROOT. There certainly was a misunderstanding over in this part of the Chamber, Mr. President.

The PRESIDING OFFICER. That was the announcement of the Chair on the vote.

Mr. SMOOT. I did not hear the Chair so announce.

The PRESIDING OFFICER. The Chair did make that announcement, and made it as plainly as he could, and that was the result of that vote as the Chair understood it.

Mr. LENROOT. Then I move to reconsider the votes whereby the amendment of the committee as amended and the amendment of the Senator from New Mexico to the committee amendment were agreed to.

The PRESIDING OFFICER. Is there objection to the request to reconsider the vote by which the amendment as amended was agreed to? The Chair hears none. Is there objection to reconsidering the vote whereby the amendment of the Senator from New Mexico to the committee amendment was agreed to? The Chair hears none, and the vote is reconsidered.

Mr. LENROOT. I should like to say to the Senator from New Mexico that the difficulty with this paragraph is primarily the duty upon raw aluminum. If this amendment is adopted he does not propose to give any greater rate of duty upon the manufactured utensil than he does upon the raw aluminum. Surely the Senator from New Mexico does not favor that kind of a proposition.

Mr. JONES of New Mexico. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from New Mexico?

Mr. LENROOT. I yield.

Mr. JONES of New Mexico. I do not have in mind just for the moment what the duty on raw aluminum is.

Mr. LENROOT. It is 25 per cent.

Mr. JONES of New Mexico. This amendment gives a specific duty of 15 cents per pound, and I propose to make the ad valorem rate 30 per cent, so I think there is sufficient differential afforded to meet the rate of duty upon the metal.

Mr. SMOOT. Mr. President, the specific duty upon aluminum will be found——

The PRESIDING OFFICER. The Senator from Wisconsin has the floor. If the Senator from Wisconsin does not desire to retain the floor the Chair will recognize the Senator from Utah.

Mr. SMOOT. Mr. President, I wish to call attention to the fact that the duty upon "aluminum, aluminum scrap, and alloys of any kind in which aluminum is the component material of chief value, in crude form," is 5 cents per pound. That will be found in paragraph 374. That covers the crude form of aluminum. Then, in the same paragraph, on "coils, plates, sheets, bars, rods, circles, disks, blanks, strips, rectangles, and squares" there is a duty of 9 cents a pound.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Arkansas?

Mr. SMOOT. I yield.

Mr. ROBINSON. The specific duty which the amendment of the Senator from New Mexico [Mr. JONES] leaves in the bill, namely, 15 cents a pound, is more than adequate to take care

of the duty on the raw material, for in one instance the duty on the raw material is only 5 cents a pound and in the case of plates it is 9 cents a pound.

Mr. SMOOT. The sheets and rods, of course, are used in manufacturing the utensils.

The loss in manufacture from sheets to the finished product averages 50 per cent, according to the testimony given before the committee. I do not know why on earth the House fixed the duty as they did, at 28 per cent, but the Senate committee made that 15 cents a pound and then gave them a protective duty of 60 per cent ad valorem. The Senator from New Mexico moves to strike out the numeral "60" and to insert in lieu thereof the numeral "30."

Mr. JONES of New Mexico. That will leave a specific duty of 15 cents a pound and an ad valorem duty of 30 per cent.

Mr. LENROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Wisconsin?

Mr. SMOOT. Yes.

Mr. LENROOT. I should like to ask the Senator from New Mexico if on aluminum ware a duty of 30 per cent is provided, whether kitchen and other ware, not specially provided for or composed of iron and steel, and so forth, likewise should not bear a duty of 30 per cent? We have just adopted a 50 per cent ad valorem duty on those articles.

Mr. JONES of New Mexico. We adopted a rate of 30 per cent.

Mr. SMOOT. Oh, no.

Mr. ROBINSON. Mr. President, the Senator from Utah evidently was not observing what was occurring in the Senate then, because the Chair held that the committee amendment was not agreed to.

The PRESIDING OFFICER. The amendment in line 19, page 67, was not agreed to.

Mr. SMOOT. Does the Chair mean that the committee amendment was not agreed to?

The PRESIDING OFFICER. The committee amendment was not agreed to.

Mr. ROBINSON. So that the 30 per cent of the House provision remains in the bill in line 19.

Mr. SMOOT. I did not so understand.

Mr. ROBINSON. So that the suggestion of the Senator from Wisconsin [Mr. LENROOT] is entirely met. Now the proper thing to do is to vote in the amendment of the Senator from New Mexico, and the whole paragraph will be harmonious.

Mr. JONES of New Mexico. Mr. President, this question arises now: The Senate has already voted into the bill the numeral "30," and the question now before the Senate is on agreeing to the committee amendment as amended, as I understand.

Mr. ROBINSON. No.

The PRESIDING OFFICER. The question now, of course, is on the amendment of the Senator from New Mexico to the amendment of the committee.

Mr. LODGE. That was reconsidered.

Mr. SMOOT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SMOOT. I understood that a yea-and-nay vote was called for upon the amendment on line 19.

The PRESIDING OFFICER. No.

Mr. SMOOT. That was not granted——

The PRESIDING OFFICER. No; there was no yea-and-nay vote.

Mr. SMOOT. And the Chair announced that the amendment of the Senator from New Jersey had been agreed to.

The PRESIDING OFFICER. No; the Senator is mistaken. In the case of the amendment on line 19, upon the viva voce vote clearly the "noes" had it, and the Chair so announced, and no question was made as to it at the time. The clerks at the desk, the Chair understands, have all marked it "rejected." The question is on the amendment of the Senator from New Mexico to the amendment of the committee.

Mr. McCUMBER. Mr. President, I want to be heard for a moment. There is such a thing as trying to hurry these matters too much and losing a whole lot of time; and the Chair can present the matter so rapidly that the Senate can not keep up with him, either in knowing what the question is or in knowing what the result of the vote is. I think if we could have just a little more deliberation in clearly presenting the matter under consideration it would conduce to real progress.

The PRESIDING OFFICER. The Chair has presented this matter just about as clearly as he possibly could.

Mr. McCUMBER. Very well; but some of us did not understand it, and I was one among the "some of us."

The PRESIDING OFFICER. Of course the Chair can not help that.

Mr. McCUMBER. I desire now to make an inquiry. On line 19, is the rate "50" or "30"?

The PRESIDING OFFICER. It is "30."

Mr. McCUMBER. Then the Senate amendment was rejected?

The PRESIDING OFFICER. It was.

Mr. SMOOT. Mr. President, I will say that I think as far as the number that voted was concerned the Chair's announcement was perhaps correct, because there were very few Senators in the Chamber.

Mr. McCUMBER. Mr. President, may I inquire what is the question now before the Senate?

The PRESIDING OFFICER. The amendment of the Senator from New Mexico [Mr. JONES] to strike out "60" in line 21 and insert "30."

Mr. McCUMBER. Let us vote on that, then.

The PRESIDING OFFICER. The question is on the amendment of the Senator from New Mexico to the amendment of the committee.

Mr. ROBINSON. On that I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "nay."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. ROBINSON (when his name was called). Making the same announcement of my pair and its transfer as on the last vote, I vote "yea."

Mr. WATSON of Indiana (when his name was called). Transferring my pair with the senior Senator from Mississippi [Mr. WILLIAMS] to the senior Senator from Michigan [Mr. TOWNSEND], I vote "nay."

The roll call was concluded.

Mr. EDGE. Making the same announcement as before, I vote "nay."

Mr. OVERMAN (after having voted in the affirmative). I inquire if the senior Senator from Wyoming [Mr. WARREN] has voted?

The PRESIDING OFFICER. He has not.

Mr. OVERMAN. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. WALSH of Montana (after having voted in the affirmative). I observe that the Senator from New Jersey [Mr. FRELINGHUYSEN] has not voted. I have a pair with that Senator, and not being able to obtain a transfer I withdraw my vote.

Mr. McCORMICK. I desire to announce that if my colleague [Mr. MCKINLEY] were present, he would vote as I have voted.

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. HARRISON. Making the same announcement as before, I withhold my vote.

The result was announced—yeas 22, nays 34, as follows:

YEAS—22.

Ashurst	Jones, N. Mex.	Pomerene	Smith
Capper	Jones, Wash.	Ransdell	Stanley
Culberson	Kellogg	Reed	Swanson
Dial	Kendrick	Robinson	Underwood
Fletcher	McKellar	Sheppard	
Heflin	Myers	Simmons	

NAYS—34.

Ball	France	McLean	Rawson
Brandegee	Gooding	McNary	Shortridge
Bursum	Hale	Moses	Smoot
Calder	Harreld	New	Stanfield
Cameron	Keyes	Newberry	Sterling
Curtis	Lenroot	Nicholson	Wadsworth
Dillingham	Lodge	Oddie	Watson, Ind.
Edge	McCormick	Pepper	
Ernst	McCumber	Phipps	

NOT VOTING—39.

Borah	Glass	Norbeck	Townsend
Broussard	Harris	Norris	Trammell
Caraway	Harrison	Overman	Walsh, Mass.
Colt	Hitchcock	Owen	Walsh, Mont.
Cummins	Johnson	Page	Warren
du Pont	King	Pittman	Watson, Ga.
Elkins	Ladd	Poindexter	Weller
Fernald	La Follette	Shields	Williams
Frelinghuysen	McKinley	Spencer	Willis
Gerry	Nelson	Sutherland	

So the amendment of Mr. JONES of New Mexico to the committee amendment was rejected.

The PRESIDING OFFICER. The question now is on the committee amendment.

The amendment was agreed to.

The ASSISTANT SECRETARY. On page 67, line 21, after the words "ad valorem" and the semicolon, the committee proposes to insert:

composed wholly or in chief value of copper, brass, steel, or other metal, not specially provided for, 50 per cent ad valorem.

Mr. ROBINSON. I move to amend the committee amendment by striking out "50" in line 23 and inserting in lieu thereof "30," so that it will read "30 per cent ad valorem."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The ASSISTANT SECRETARY. On page 67, line 23, in the committee amendment, it is proposed to strike out "50" and insert "30."

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Arkansas to the amendment of the committee.

Mr. ROBINSON. On that I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "nay."

Mr. HARRISON (when his name was called). I transfer my general pair with the Senator from West Virginia [Mr. ELKINS] to the Senator from Missouri [Mr. REED] and will vote. I vote "yea."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the last vote, I vote "yea."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Texas [Mr. CULBERSON] and vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same announcement with reference to my pair and transfer as on the previous vote, I vote "nay."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "nay."

Mr. ERNST. I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from North Dakota [Mr. LADD] and vote "nay."

The result was announced—yeas 24, nays 31, as follows:

YEAS—24.

Ashurst	Heflin	McKellar	Sheppard
Capper	Jones, N. Mex.	Myers	Simmons
Cummins	Jones, Wash.	Overman	Smith
Dial	Kellogg	Pomerene	Swanson
Fletcher	Kendrick	Ransdell	Trammell
Harrison	McCormick	Robinson	Underwood

NAYS—31.

Ball	Ernst	McLean	Rawson
Brandegee	France	McNary	Shortridge
Bursum	Frelinghuysen	Moses	Smoot
Calder	Gooding	New	Stanfield
Cameron	Hale	Newberry	Wadsworth
Curtis	Keyes	Nicholson	Warren
Dillingham	Lenroot	Oddie	Watson, Ind.
Edge	McCumber	Pepper	

NOT VOTING—40.

Borah	Harreld	Norbeck	Stanley
Broussard	Harris	Norris	Sterling
Caraway	Hitchcock	Owen	Sutherland
Colt	Johnson	Page	Townsend
Culberson	King	Phipps	Walsh, Mass.
du Pont	Ladd	Pittman	Walsh, Mont.
Elkins	La Follette	Poindexter	Watson, Ga.
Fernald	Lodge	Reed	Weller
Gerry	McKinley	Shields	Williams
Glass	Nelson	Spencer	Willis

So Mr. ROBINSON'S amendment to the committee amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. McCUMBER. I ask the Senate to turn to paragraph 389, page 82, the automobile paragraph, which was passed over.

The PRESIDENT pro tempore. The Secretary will report the amendment.

The ASSISTANT SECRETARY. The proposition of the committee to strike out the proviso beginning on line 20 and ending on line 3, page 83, is the pending question in this paragraph. The language proposed to be stricken out is as follows:

Provided, That if there be imported into the United States any of the foregoing articles manufactured in or exported from any country which imposes a duty greater than 25 per cent ad valorem upon similar articles exported from the United States, there shall be levied, paid, and collected upon such articles a duty equal to the duty imposed by such country upon such articles imported from the United States, but not to exceed in any case 50 per cent ad valorem.

Mr. McCUMBER. The question is on the reciprocal tariffs, and I ask that the committee amendment may be agreed to, to the end that all of these matters of reciprocal tariffs may go before the committee of conference.

Mr. SIMMONS. My recollection is that when we reached that paragraph the committee indicated that they might desire to change the form of the proviso and that the paragraph was taken back to the committee for that purpose. I understand, now, the Senator in charge of the bill indicates that he does not desire to change the proviso as originally written.

Mr. McCUMBER. I desire to have the committee amendment striking out the language agreed to so that the matter may be in conference.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On page 83, paragraph 371, we have the same amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. In paragraph 371, page 83, beginning on line 8, the committee proposes to strike out the proviso, or the remainder of the paragraph, as follows:

Provided, That if there be imported into the United States any of the foregoing articles manufactured in or exported from any country which imposes a duty greater than 30 per cent ad valorem upon similar articles exported from the United States, there shall be levied, paid, and collected upon such articles a duty equal to the duty imposed by such country upon such articles imported from the United States, but not to exceed in any case 50 per cent ad valorem.

The amendment was agreed to.

Mr. SMOOT. On page 87, line 14, after the words "ad valorem," I move to insert a semicolon and the words which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. The Senator from Utah proposes to insert the following words:

And in addition thereto, on all of the foregoing, if cold rolled, cold drawn, or cold worked, 10 per cent ad valorem.

Mr. SIMMONS. The substantive duty imposed upon these products is 25 per cent ad valorem. Now it is proposed to impose an additional duty of 10 per cent if cold rolled, cold drawn, and so forth. I ask the Senator if that process of cold rolling would justify about a 40 per cent increase in the duty?

Mr. SMOOT. I call the Senator's attention to the fact that in paragraph 309, where we provide for plates and sheets of iron or steel, where it is cold rolled, not polished, the rate shall be two-tenths of 1 cent per pound more than the rates provided on corresponding thicknesses of common or black sheet iron or steel. In other words, it is very much more expensive to cold roll than it is to put the metal through a hot roll.

Mr. SIMMONS. I have no doubt that it is somewhat expensive to cold roll it, but this is an increase of 40 per cent in the duty where this process is used. I ask the Senator in all frankness, in proposing a tremendous increase as the result of this additional process, did the committee investigate the cost of this additional process as compared with the cost of fabricating the article itself?

Mr. SMOOT. The only evidence we have is to the effect that it costs more than 10 per cent would cover; but I do not believe it does. I believe 10 per cent covers it all. If the Senator will go through the bill, he will find that wherever the cold-rolled process is used, a higher rate is given than where it is hot rolled. It is very much more expensive. It can not be done so quickly, and it is very much more expensive than hot rolling.

Mr. SIMMONS. May I ask the Senator if this information with reference to the additional cost came from parties who were interested in getting the additional duty, or did it come from the Tariff Commission?

Mr. SMOOT. The request was that instead of 10 per cent they be given 30 per cent, and they claimed that it was necessary; but the committee did not feel that they ought to give any more than that upon the other metal, such as common iron and sheet iron and that class of goods, and therefore we gave only 10 per cent.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HARRISON. I do not know whether it is necessary, but I do not want to be foreclosed; so I desire to reserve the right to have a separate vote when the bill gets to the Senate, on paragraph 501, Schedule 5, page 95, the rate on sugar.

Mr. SMOOT. On page 88, I move to strike out all after the word "mattes," in line 1, down to and including the

word "Treasury," in line 4, and to insert in lieu thereof the following:

Unless actually recovered.

Mr. WALSH of Montana. I ask that the committee amendment be now read as it would be if the amendment to the amendment were agreed to.

The Assistant Secretary read as follows:

PAR. 388. Lead-bearing ores and mattes of all kinds, 1½ cents per pound on the lead contained therein: *Provided*, That such duty shall not be applied to the lead contained in copper mattes unless actually recovered.

Mr. SMOOT. I will say to the Senator from Montana that that is to conform with the request he made in the Senate when this schedule was under consideration.

Mr. WALSH of Montana. I ask the Senator how the customs officers would know whether it was recovered.

Mr. SMOOT. It all comes in in bond, and as they have to keep an account it can be very easily accounted for, I am told by the Treasury Department.

Mr. WALSH of Montana. Would it come in in bond without any provision in the law for it?

Mr. SMOOT. It comes in in bond, and when it comes in the assay is made of the ore when it goes in bond.

Mr. WALSH of Montana. Under the provision as it reads copper mattes come in free, but a duty is to be paid upon the copper recovered, under the amendment offered by the Senator. In order to get that duty it must come in in bond?

Mr. SMOOT. Yes.

Mr. WALSH of Montana. Will the customs officers be authorized to exclude it without bond under this amendment?

Mr. SMOOT. No; this is under the bond provision, and when the ore comes in they assay it, and they will know of every pound of lead that it produced, and wherever it is recovered they will have to pay the duty upon it.

Mr. WALSH of Montana. I am not concerned about the process. I am concerned about the language. I am concerned about the question as to whether the customs officers would be justified in excluding it unless a bond were put up, the statute saying nothing whatever about a bond.

Mr. SMOOT. I suppose that would come under the rules and regulations to be prescribed by the Secretary of the Treasury provided for in the language which follows the very words I ask the Senate to agree to.

Mr. WALSH of Montana. That is the question I propound to the Senator: Will the Secretary be authorized to say that copper mattes can not be introduced unless a bond is put up, to the end that the duty on whatever lead content is recovered shall be paid?

Mr. SMOOT. There is no doubt about it.

Mr. WALSH of Montana. Upon what basis does the Senator tell me there is no doubt about it?

Mr. SMOOT. Because it says "the copper contained therein, under rules and regulations to be prescribed by the Secretary of the Treasury." That is the way it will read. Of course if there is any recovered he will collect the duty upon it, and they will know it if it is recovered, because it is in bond, and every pound that is recovered will have to pay the duty.

Mr. WALSH of Montana. That is a matter which appears somewhat serious to me, because the question is, Will it come in in bond without some provision in the law to that effect?

Mr. SMOOT. It reads:

Provided, That such duty shall not be applied to the lead contained in copper mattes unless actually recovered, to be allocated under rules and regulations to be prescribed by the Secretary of the Treasury: *Provided further*, That on all importations of lead-bearing ores and mattes of all kinds the duties shall be estimated at the port of entry and a bond given in double the amount of such estimated duties for the transportation, etc.

Mr. WALSH of Montana. Does that remain in the bill?

Mr. SMOOT. All of that remains. That is the proviso.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. SMOOT. On page 93, line 8, after the word "roughhewn," I move to insert "roughshaped," so as to read:

PAR. 406. Hubs for wheels, posts, heading bolts, stave bolts, last blocks, wagon blocks, oar blocks, heading blocks, and all like blocks or sticks, roughhewn, roughshaped, sawed, or bored, 10 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMOOT. On page 94, line 24, after the word "baskets," I move to insert "chair seats," so as to read:

PAR. 413. Porch and window blinds, baskets, chair seats, curtains, shades, etc.

The amendment was agreed to.

Mr. SMOOT. On page 101, in line 7, after the word "gallon," I move to insert the proviso which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 101, in line 7, after the word "gallon," insert a colon and the following:

Provided, That fresh or sour milk containing more than 7 per cent of butter fat shall be dutiable as cream, and cream containing more than 45 per cent of butter fat shall be dutiable as butter.

Mr. WADSWORTH. Mr. President, will the Senator in charge of the bill have the kindness to explain the proposed change?

Mr. SMOOT. I think the Senator from Vermont [Mr. DILLINGHAM] has a letter from the Tariff Commission asking that this be done, and he can explain it or have the letter read.

Mr. DILLINGHAM. Mr. President, it will be observed that the Senate has already fixed a duty upon milk, upon cream, and upon butter. The Tariff Commission recommend that the pending amendment be adopted as an addition to the section for the purpose simply of defining what is milk, what is cream, and what is butter, so as to prevent any violation of the law or any confusion at the customs ports. They say in their letter:

In drafting this proviso to paragraph 707 we have consulted the Chief of the Dairy Division of the United States Department of Agriculture, who states that no natural milk contains more than 7 per cent of butter fat and that commercial cream never contains more than 45 per cent of butter fat. It will be seen therefrom that there should be no difficulty in the expeditious passage through the customs of importations of milk or cream, large or small, on the frontiers.

Mr. SIMMONS. Mr. President, I wish to ask the Senator from Vermont a question. The Senator said a little while ago that somebody had recommended the amendment.

Mr. DILLINGHAM. The Tariff Commission recommended it.

Mr. SIMMONS. Did they recommend the amendment?

Mr. DILLINGHAM. Yes.

Mr. SIMMONS. Is the letter to which the Senator has referred from the Tariff Commission?

Mr. DILLINGHAM. It was a letter from the Tariff Commission which I read. I will say to the Senator that the matter arose in this way: A ruling was made that an importation from Canada containing slightly less than 18 per cent of butter fat was milk, and the ruling was sustained by the department. As a matter of fact, milk as a commodity contains as a rule considerably less than 7 per cent of butter fat. It was claimed that unless there was a provision defining what milk is and what butter is importers could take cream of a high degree of butter fat, reduce it, and bring it in at the milk rate and, having done that, reseparate it and avoid the duty which should have been paid upon the butter.

Mr. SIMMONS. That may be true, but here it is proposed to put a rate on fresh milk of 2½ cents per gallon. As I understand the amendment, if milk has 7 per cent of butter fat in it although it is fresh milk, it becomes dutiable as cream.

Mr. DILLINGHAM. Yes.

Mr. SIMMONS. That is a very strange situation, to my mind. Fresh milk takes a rate of 2½ cents per gallon. Then there is sour milk and buttermilk taking a rate of 1 cent per gallon. Then there is cream with a rate of 22½ cents per gallon. If the sour milk, which the paragraph provides shall pay 1 cent per gallon, happens to have 7 per cent of butter fat in it, then it is to be taxed as cream and pay 22½ cents a gallon. I suppose most milk has a large amount of butter fat in it and probably if we would analyze it we might find it had 7 per cent of butter fat. Then what becomes of the fresh milk duty of 2½ cents per gallon, and likewise what becomes of the sour milk which has butter fat in it, although it is sour, but upon which we provide for only 1 cent per gallon? If, therefore, it can be ascertained that the sour milk happens to have 7 per cent of butter fat in it, although it may not be extracted from it, then it becomes subject to a duty of 22½ cents a gallon. Why would not that apply to all the fresh milk that comes in and all the sour milk that comes in, provided it has that amount of butter fat in it? Would not that necessarily nullify the lower duties on fresh milk and on sour milk?

Mr. DILLINGHAM. The matter arose something in this way: I received a letter from the commissioner of agriculture of the State of Vermont telling me that a certain dairy company was importing milk from Canada which tested just under 18 per cent butter fat. He then said:

I am informed that at the outset customs officials ruled that this was cream and duty must be paid accordingly. However, the Treasury Department after investigation made the ruling that anything under 18 per cent butter fat was not cream and therefore could be entered as milk. If this is not remedied in the pending tariff measure, so that milk will be defined so as to exclude this practice, the following result will be possible. An importer may import a gallon of 17 per cent milk paying a duty on this as milk of 2½ cents. This milk will contain 1.3 pounds of butter fat, which will make about 1½ pounds of butter. Therefore the importer will pay 1.6 cents duty per pound of

butter imported in this kind of milk, while if the butter was manufactured in Canada he would be subjected to a duty of 8 cents. This 17 per cent "milk" could be reseparated upon arrival in this country and concentrated to 34 per cent cream, with the result that a gallon of 34 per cent cream could be landed here with a duty of 5 cents in this way, while imported in the form of cream it would be subjected to a duty of 22½ cents. It seems to me that your tariff bill should define milk in some way to prevent this practice.

The matter was submitted to the Tariff Commission, and the amendment is the recommendation which they made.

Mr. SIMMONS. Is not this patent to the Senator's mind? We will assume, as I suppose is true, that all good, nice, fresh milk contains 7 per cent of butter fat. If because of the fact that milk has 7 per cent of butter fat in it it has to be taxed as cream, although we have not skimmed the cream off of it, why put any duty on fresh milk at all, and why put a duty on sour milk at all? Why not say that all good milk has 7 per cent of butter fat in it and tax it as butter, or that it has so much cream in it and tax it as cream? That is what it would amount to, in effect, where the provision is invoked. Of course, I understand a great deal of fresh milk would come in and nobody would make this point, but wherever the point was made if the milk is good, instead of fresh milk taking a duty of 2½ cents a gallon as provided, it would take a duty of 22½ cents a gallon.

Mr. DILLINGHAM. It was suggested at some time during the consideration of the matter that various degrees should be considered, but that would require much to be done in all kinds of weather at every little port on the Canadian border and it was utterly impracticable as a matter of administration.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the committee.

Mr. SIMMONS. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "yea."

Mr. EDGE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. POMERENE (when his name was called). Announcing my pair with my colleague [Mr. WILLIS] as heretofore, I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as upon the last vote, I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as to my pair and transfer as on the last vote, I vote "nay."

The roll call was concluded.

Mr. HALE. Making the same announcement as before, I vote "yea."

Mr. ERNST. Making the same announcement as on the last vote, I vote "yea."

Mr. HARRISON. I transfer my pair with the junior Senator from West Virginia [Mr. ELKINS] to the senior Senator from Missouri [Mr. REED] and vote "nay."

Mr. CURTIS. I desire to announce the following pairs:

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 39, nays 18, as follows:

YEAS—39.

Ball	Ernst	McCumber	Phipps
Brandegee	Frelinghuysen	McLean	Ransdell
Bursum	Gooding	McNary	Rawson
Calder	Hale	Moses	Shortridge
Cameron	Jones, Wash.	New	Smoot
Capper	Kellogg	Newberry	Stanfield
Cummins	Kendrick	Nicholson	Sterling
Curtis	Keyes	Norbeck	Wadsworth
Dillingham	Lenroot	Oddie	Warren
Edge	Lodge	Pepper	

NAYS—18.

Ashurst	Jones, N. Mex.	Robinson	Trammell
Dial	McKellar	Sheppard	Underwood
Fletcher	Myers	Simmons	Walsh, Mont.
Harrison	Overman	Smith	
Heflin	Pomerene	Swanson	

NOT VOTING—38.

Borah	Culberson	France	Harris
Broussard	du Pont	Gerry	Hitchcock
Caraway	Elkins	Glass	Johnson
Colt	Fernald	Harreld	King
Ladd	Owen	Spencer	Watson, Ind.
La Follette	Page	Stanley	Weller
McCormick	Pittman	Sutherland	Williams
McKinley	Poindexter	Townsend	Willis
Nelson	Reed	Walsh, Mass.	
Norris	Shields	Watson, Ga.	

So the amendment of the committee was agreed to.

Mr. ODDIE. Mr. President, I ask permission to submit two amendments relating to pulp wood and newsprint paper, and request that they be printed and lie on the table, to be considered when individual amendments shall be in order.

The PRESIDENT pro tempore. The amendments presented by the Senator from Nevada will be received, printed, and lie on the table.

Mr. BURSUM. I present an amendment to the pending bill, and ask that it be printed and lie on the table.

The PRESIDENT pro tempore. The amendment intended to be proposed by the Senator from New Mexico will be printed and lie on the table.

Mr. SMOOT. On behalf of the committee I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Utah will be stated.

The ASSISTANT SECRETARY. On page 110, line 13, after the words "per pound," it is proposed to insert a semicolon and the words "almond paste, 15 cents per pound."

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. SHORTRIDGE. Mr. President, I ask leave to present an amendment, to be printed and lie on the table, affecting matters specifically set out in the proposed amendment.

The PRESIDENT pro tempore. The amendment submitted by the Senator from California will be printed and lie on the table.

Mr. HARRISON. A parliamentary inquiry, Mr. President.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. HARRISON. Under the unanimous-consent agreement which has been adopted by the Senate would it be permissible for a Senator to discuss a matter—for instance, I have in mind the subject of sugar—for 10 minutes when the amendment is not pending, having been voted on as in Committee of the Whole, but as to which a separate vote has been asked when the bill reaches the Senate?

The PRESIDENT pro tempore. The Chair presumes that the Senator from Mississippi refers to an amendment to be offered in the Senate?

Mr. HARRISON. Yes.

The PRESIDENT pro tempore. The unanimous-consent agreement provides that there shall be debate not exceeding 10 minutes on amendments in the Senate.

Mr. HARRISON. Yes. Then, I may, if I desire, speak 10 minutes on the sugar question when the bill reaches the Senate?

The PRESIDENT pro tempore. If the Senator offers an amendment, he may do so.

Mr. HARRISON. When the bill reaches the Senate will it be permissible for me to offer an amendment to reduce the rate which was adopted as in Committee of the Whole?

The PRESIDENT pro tempore. As a general principle, the Chair thinks it would be.

Mr. SMOOT. On page 111, line 7, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Utah will be stated.

The ASSISTANT SECRETARY. On page 111, line 7, after the words "ad valorem," following the committee amendment already agreed to, it is proposed to add the following words: "Nut and kernel paste not specially provided for, 15 cents per pound."

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMOOT. On page 112, line 9, after the word "pound" where it first occurs, I move to insert a simicolon and the words "mushroom spawn, 1 cent per pound."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 112, line 13, I desire to withdraw the committee amendment and move to strike out "4" and insert in lieu thereof "6."

The PRESIDENT pro tempore. The Chair is of the opinion that the amendment having been already agreed to, must be

reconsidered and disagreed to before the amendment now proposed may be offered by the Senator from Utah.

Mr. McCUMBER. I understand that the amendment fixing the rate on flower seed at 4 cents a pound was passed over and has not yet been agreed to.

Mr. SMOOT. It has not yet been agreed to; and therefore I ask to withdraw the committee amendment and to offer another amendment in its stead.

The PRESIDENT pro tempore. The Chair is in error. Without objection, the amendment heretofore proposed by the Committee on Finance is disagreed to.

The question is upon agreeing to the amendment proposed by the Senator from Utah; amendment to strike out "4" and insert "6," in line 13, page 112.

The amendment was agreed to.

Mr. SMOOT. On page 112, in lines 14 and 15, I move to strike out "20 per cent ad valorem" and to insert in lieu thereof "6 cents per pound."

Mr. SIMMONS. I desire to ask the Senator from Utah if that will increase the rate of duty?

Mr. SMOOT. Perhaps it will do so in some cases, which are not specially provided for, but the farmers all feel that it is almost impossible to fix a proper ad valorem duty on these seeds, and they therefore ask for a specific duty of 6 cents a pound.

Mr. SIMMONS. Did any farmers come before the committee in reference to this matter?

Mr. SMOOT. Oh, yes; I will say to the Senator from North Carolina that a good many of the farmers came before the committee.

Mr. SIMMONS. Then I was absent.

Mr. SMOOT. Yes; the Senator was absent at that time.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Utah.

The amendment was agreed to.

Mr. SMOOT. On page 121, line 2, I move to strike out "100" and to insert "80."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Utah.

Mr. ROBINSON. Mr. President, this amendment and the six amendments immediately following it which are proposed by the Committee on Finance relate to cotton yarns. The effect of all these amendments is to increase the duty on those yarns heretofore prescribed by the Senate after full consideration. Some of the amendments accomplish the purpose of an increase by reducing the yarn numbers; others expressly increase the rate to be levied on the importations of cotton yarn.

No subject in connection with this bill was more fully discussed than the rates pertaining to cotton yarn. After the Senate had reached its conclusion, repudiating the advances proposed by the committee in almost every instance, the committee to-day in connection with 61 other amendments bring into the Senate these 7 amendments, the effect of which, as already stated, is very materially to increase the rate on cotton yarns. It would seem, after the matter was thrashed out on the floor, the committee beaten, and the House rate in most instances as affected by these 7 amendments of which I am now speaking restored, that the committee would have been content to let the matter rest there. There is not time now to go over the subject in great detail; it can not be discussed as it ought to be discussed; but, in my judgment, there is no justification for the attempt to provide in the amendments now proposed by the committee to override the conclusion of the Senate respecting these important subjects.

I have not the slightest doubt but that an effort will be made to justify them, or some of them, on the ground that it is necessary in order to harmonize the provisions sought to be amended with other provisions of the bill, but it is regrettable that the policy of the committee is always, or usually, to harmonize upward as respects commodities which enter into the daily consumption and use of the American people. There are a great many subjects connected with this bill involved in committee amendments which after 4 o'clock we will be required to vote on without further debate, and, as has just been stated, the increases now proposed in the rates on cotton yarns can not be adequately considered. I shall content myself with moving to lay on the table the amendment of the committee.

Mr. UNDERWOOD. Will the Senator from Arkansas withhold his motion for a moment?

Mr. ROBINSON. I withhold it.

Mr. SMOOT. I, too, would be glad to have the Senator withhold it.

Mr. ROBINSON. If the Senator wants to discuss the question, I will withhold the motion.

Mr. UNDERWOOD. Mr. President, I asked the Senator from Arkansas to withhold his motion for a moment because the pending amendment is pertinent to what I desire to say.

So far as the discussion of the committee amendments is concerned, the time for their discussion will expire at 4 o'clock, half an hour from now. We have had this bill under consideration since the 28th day of April, and I think the bill rested in the Finance Committee, whether or not it was considered during that time, for more than a year before it was brought to the Senate. It seems to me that a reasonable time for the Finance Committee to consider this bill and determine what rates it desired to make was afforded within the year, and certainly the period from the 20th of April to the middle of August should have afforded ample time for the committee to make up its mind as to the legislative intent in reference to the items of this bill; but here on the last day, at the last hour, after a unanimous-consent agreement has been entered into to close debate, the committee brings before the Senate a number of amendments—I have not counted them, but I imagine from looking at them that they run into the hundreds—which they propose to offer at the last minute, knowing that many of them can not be discussed. Some days ago when they proposed their rule for a unanimous-consent agreement for a vote they suggested in the rule a provision allowing them to offer amendments for the consideration of the Senate after the time of debate had expired, when the Senate would be gagged by the unanimous-consent rule.

Mr. President, when the committee proposed the rule and asked that it might still continue to offer amendments, I imagined that these amendments would be of a technical nature, amendments merely to perfect the text, to guard against mistakes that might have been made; but here we find the committee at the last minute, without any justification whatever—if a period of four months is ample time for men and the Senate to consider a bill of this kind—not only bringing before the Senate material amendments to this bill but reproposing subject matters that have already been passed on by the Senate and on which the Senate has expressed its final judgment.

This morning we had aluminum, which was amply and thoroughly discussed by the Senate months ago and the Senate's conclusion was reached. Now we have cotton yarn, which was discussed by the Senate weeks ago when this subject matter was before the Senate and a conclusion reached; and here at the eleventh hour, when the gong has sounded, when in a few minutes there will be no opportunity to debate, when there will be no opportunity to point out what the amendment means and where it is going to lead, it is expected that the Senate will be hurried in here under a party whip and by a party majority and asked to vote on these amendments "sight unseen."

Just to illustrate, in the last part of these amendments it is proposed to amend the Revised Statutes of the United States by striking out of them sections 2609, 2610, 2772, 2796, 2805, 2831, 2850, 2876, 2877, 2888, 2889, 2890, 2945, 2950, 2988, 2989, 3021, 3039, 3040, 3042, 3043, and 3065; and then a section of the Revised Statutes that they had already proposed to repeal they now propose to put back, section 2942.

Mr. President, probably the Senator from North Dakota and the Senator from Utah and one or two other members of the committee understand what it is proposed to repeal. I happen to understand, because I am more or less familiar with these statutes, that these whole sections of the Revised Statutes, which it is proposed to repeal, relate to the administrative features of the customs law; but I doubt whether there were half a dozen Senators in the whole Senate, outside of the Senators I have named, who knew what these repealing features related to; and yet without debate, at the last hour, the committee brings in these new amendments and asks a partisan majority of the Senate to repeal these statutes blindly without knowing what they are. I happen to know what they relate to, but at this last hour it would be impossible for me to know and determine the reason for their repeal and the effect of putting something else in their place, which I do not know but which I assume the committee has done. It must have done so; but if it has put something else in the place of these statutes, why is it repealing them at the last minute? When the committee inserted substantive legislation in their place, why did it not say then that it proposed to repeal these statute laws?

Mr. President, these statutes that are being blindly repealed govern the honesty and the integrity of the collection of the customs revenues of the United States. It may be that some one in the departments has made this recommendation. It may be that some chief clerk or some one in higher authority thinks it would be wise to repeal these statutes for some

reason; and I do not pass now on the wisdom or the unwisdom of the situation, because I do not know. It is only since this morning that these amendments were filed, and it has been impossible for me in that length of time to consider what will happen by virtue of this repeal. All I want to point out is that the Senate is not giving legislative consideration to this bill, and it has not done so from the beginning. It is not being passed on by the legislative will or the legislative mind. It is being passed on and considered by the order of those in charge of this bill in the majority party.

I do not charge the Senators on the other side with intending to put any "joker" in this bill, or to put anything improper in the bill. I have no doubt they have been advised by some one out of the Congress that it is a proper thing to do; but I should like to know how the Members of the Senate know it is a proper thing to do when it is proposed that we meet these questions without consideration and without opportunity for debate, and vote on them blindly, because the committee says it ought to be done.

That may be an intelligent way to pass a bill amending the laws relating to customs revenue. It may be an intelligent way to pass new laws protecting the integrity of the revenues of the Government. Of course, they may be recommended to the committee by men who the committee believe have more judgment about this matter than they believe the United States Senate has. Nevertheless, the people of the United States elected a United States Senate to legislate for them, not chief clerks in customs offices. Chief clerks may be very excellent gentlemen from whom to receive advice and consider it, but the people of the United States have not elected chief clerks in customs offices to pass their laws for them.

When these sections are agreed to, so far as the United States Senate is concerned, with the possible exception of the Senator from Utah [Mr. SMOOT] and the Senator from North Dakota [Mr. MCCUMBER] and one or two other Senators on the committee, the intelligence that is exercised in regard to whether or not these laws shall be repealed that are on the statute books, some of them ancient in their operation, the intelligent will and effort that will take them under consideration for repeal will be that of the chief clerk or other person in the customs service who has advised the committee and not the intelligence of the Senate.

Mr. President, I would have had no objection to some of these amendments that are merely for the purpose of correcting clerical errors, but I do not think it was justice to the Senate or the country that at this last hour the committee having this bill in charge should have brought substantial amendments before the Senate that must be voted on either "yea" or "nay," making laws, some of them criminal laws, for the people of the United States, without an opportunity for consideration and amendment here by the Senate to voice their approval or disapproval and give their reasons. We may have reached a time——

The PRESIDENT pro tempore. The time of the Senator from Alabama has expired.

Mr. MCCUMBER. Mr. President, we have now wasted 15 minutes in the discussion of a matter that is not before the Senate. If the Senator had asked for an explanation of why the additional sections should be added which we are seeking to repeal, we could have explained it in a quarter of the time that has been wasted by the Senator in this discussion. We have had time enough to discuss these matters if we would stick to our text and to the amendment; and the Senator himself is responsible, as well as the rest of us, for making the unanimous-consent agreement.

In addition to the particular sections which have been repealed and which are necessarily repealed because they become obsolete in the change of a tariff law, the several departments at the last moment send up to us recommendations for other changes on matters that are also regarded as obsolete. There is time enough; explanations can be given; but we can not give them if we are to take 15 or 18 minutes in the discussion of a matter that is not before the Senate.

Mr. UNDERWOOD. Mr. President, if the Senator will allow me, I think I have occupied as little time as any man on the floor of the Senate who has tried to discuss this bill at all. All I wanted to point out—and I am not criticizing the Senator——

Mr. MCCUMBER. The Senator's time is up now, Mr. President.

Mr. UNDERWOOD. I think the Senator is thoroughly correct. You should gag your victims and lead them to the slaughter without further consideration.

Mr. MCCUMBER. Oh, no, Mr. President; I do not think the Senator is justified in saying that. We have a certain amendment before us, and we want to get through as many as possible while we can.

Mr. SMITH. Mr. President, as I understand, the committee proposes to reduce the count from 100 to 80, so that the excess duty shall begin at 80. I should like to ask the Senator from Utah [Mr. SMOOT] if that would not reflect itself in the cloth schedule as well?

Mr. SMOOT. No; Mr. President. That is exactly why I want the change made. I never thought there would be a single, solitary objection on either side of this Chamber, because it has been brought to my attention several times, and I have been asked that it be taken care of in conference, and I thought this was the proper place to make the change.

The four amendments in the two paragraphs of the yarn schedule changed the rates from 80 to 100 count. That threw out all of the harmony between the rate of the lowest count yarn up to the cloth in the gray. The cloth in the gray was not changed, the low point was not changed, and, therefore, the two changes simply meant that there would be a jog in the regular harmonious straight line, and the Treasury Department says what we all know to be true, that if that were ever put into the law hereafter there would be no real comparison possible between the counts of yarns in 1909, or in any previous year, and those which would come in future years.

Mr. SMITH. I want to call attention to the fact that, as everyone familiar with this business knows, with the improvement of the staple of the cotton, not only in this country but elsewhere, the count of the yarns used by our great cotton mills have had a tendency to become finer and finer each year on account of the staple adjusting itself more readily to the finer counts. I venture the assertion that the greater per cent of our ordinary brown domestics and bleaches are made out of finer counts of yarn. Even cotton cloths are made out of finer counts of yarns to-day than they were when the staple of our cotton was not as universally improved as now.

The effect of this amendment will be that from 80's up to 100 you have 20 counts. You provided that there shall be one-fifth of 1 per cent ad valorem, or an addition of 4 per cent, which means 9 per cent, and then you provide that on all of the numbers exceeding, not 100, but if it should be amended, 80, less than 30 per cent ad valorem. So that the result of your amendment will be to include from 80's up to the very highest and finest counts an addition of 30 per cent over those which are below 80.

Mr. ROBINSON. The end sought—that is, the restoration of so-called harmony between the cloth schedule and the yarn schedule—can be accomplished by reducing the rate on the cloth.

Mr. SMOOT. That can not be done.

Mr. ROBINSON. Why?

Mr. SMOOT. That is exactly what we are up against now. Between the coarse yarns and the fine yarns there are two breaks in the line. Yet the last comes up to where the yarn is as we have it in the bill. There is the picture, exactly as it will be. [Exhibiting.] You can not get rid of it in that way.

Mr. ROBINSON. That may be very clear to the Senator from Utah, and I have no doubt it is, but it is totally incomprehensible to me.

Mr. SMITH. The Senator from Utah must admit that the accommodation of the cloth schedule to this schedule would be infinitely easy, or just as practicable as to attempt, by amending this, lowering your amount of yarn to 80 and then increasing the percentage above 80 to accommodate it to the duty you have now imposed upon the goods which are made from 80 and above.

Mr. SMOOT. The Senator does not quite understand it yet, I see. If this is not amended and we went to work and tried to amend all of the yarn provisions to take this low point caused by the first amendment, we would have to start from the beginning and change the rates to conform to that first point, and you can not do it unless you do that. In order to do that you would have to begin and change every single rate in the bill from the first low bracket up to the finished cloth, and that is the only way you would have of harmonizing the rate from the low-count yarn to the finished product.

Mr. SMITH. In constructing this bill the House constructed its schedules of yarns and cloths on the basis of 100. We have amended the bill right along, both as to cloth and yarn, upon the basis of 100. The effect of lowering it to 80 will simply be to increase the cost of the cloth that is made from these yarns from 80 to 100.

Mr. SMOOT. The Senator must know that in adjusting the duties from the American valuation to foreign valuation those rates were absolutely changed, and changed to conform to the duties proposed in the original Senate amendment; and in-

stead of changing all of them, from the first to the last, clear through all of the yarn paragraphs, only two of them have been altered, and all of the balance of the yarns and cloths are left as they were.

Mr. SMITH. The classification of the counts of the yarn is not based upon any foreign or domestic classification. The value of the thing is based upon the count of the yarns as set forth in the bill, and the basis was 100. Now you are attempting to lower it from 100 to 80 and give a margin of 20 points to increase the duty on the cloth.

Mr. ROBINSON. It can have no other effect.

Mr. SMOOT. Mr. President, every piece of cloth is based upon the 80 count, and the original yarns were based upon the bracket of 80, not a hundred. So that if you are going to make one continuous straight rate to harmonize from the beginning with the finished cloth you have to change the rates on the cloth and also change the rates on the yarns in those paragraphs where they were not changed.

Mr. SMITH. One hundred was the basic line upon which you made the calculation that this extra duty should come. The extra amount you proposed to levy on yarns was from 80 to 100. You put an extra duty on. Now you have lowered it back to 80 and put the extra duty that you were going to allow on 100 down to 80, so that you have a cumulative excess from 80 to 100. So that the rates of duty that these yarns and cloths made from these yarns bear shall be those that you have calculated upon 100. Now you put that extraordinary duty upon 80. I presume you mean to leave the 20 points difference between the 60 and 80, but you have taken out the 100 differential and placed it at 80, so that all cloths made from now on shall bear the extra amount you intended to go on 100 on 80 and above.

This whole cloth and yarn schedule is absolutely indefensible. The American spinner and the American weaver can spin and weave the ordinary cotton cloths without fear of competition, from any source whatsoever. So far as any duty is concerned, I believe that if the spinners of this country were to voice their honest convictions and knowledge they would say there is not a spot on the globe where cotton used in the ordinary consumption in human affairs can be spun and woven in competition with America. This is but one other subterfuge to increase the selling price of American cotton goods made out of American cotton, which has not a competitor on the globe.

Mr. SIMMONS. Mr. President, my information, gathered from cotton operators, without any reference to the question of protection, is that it would be a great injustice if the yarns are taxed upon one basis and the cloth upon a different basis, and to my mind their contention in that respect is sound. My understanding is that the majority members of the committee adopted 80 as the basis.

Mr. SMOOT. Clear through.

Mr. SIMMONS. Clear through, both for cloth and for yarn. When the bill got into the Committee of the Whole the 80 basis for the cloth was not changed, but the Senate changed the yarn basis to 100, bringing about this disparity.

Now, the proposition of the Senator from Utah is to place the yarn upon the 80 basis, just as the cloth is, for the purpose of harmonizing.

As the Senator from Arkansas [Mr. ROBINSON] has very aptly said, it would have been very much better if we could have reduced the rate on the cloth down to the yarn basis instead of raising the yarn basis up to the basis of the cloth. But we are in the hands of the majority in this matter, and I think that in the interest of common justice this matter ought to be remedied and the parity which should as a matter of justice obtain be restored, either by the one process or the other. I would prefer the process suggested by the Senator from Arkansas.

Mr. ROBINSON. I withdraw the motion to table and will let the vote come immediately on the committee amendment.

Mr. SMOOT. Mr. President, I have been appealing to both sides of the Chamber to do this and to let it go to conference. The committee were following out the wishes of this body, having learned how unscientific the rates in this schedule would appear, making it absolutely impossible, in the future, to compare the imports of one year with those of another on an equal basis. Therefore there was only one thing to do, and that was to offer these amendments to harmonize the rates, beginning with the lowest-count yarns and ending with the finest of the cloth. That is what the committee has done, and I think that the Senate ought to sustain them, and whatever changes may be made, make them as a whole, rather than to try to make them as was done in the Senate.

Mr. ROBINSON. I withdrew the motion to table because I thought it would not be just, after discussing the matter myself, to deny to other Senators an opportunity of discussing it. But the debate has convinced me of the correctness of the position I first asserted. The cloth amendments already referred to have the practical effect of increasing the rate on the yarns, which is justified on the ground that the rate on the cloth is substantially too high. We had better pursue the other course, and decrease the rate on the cloth, but I realize that is an impossibility.

Mr. SMOOT. I ask unanimous consent that the vote may apply to the four amendments found on page 6 of the printed amendments, because they are all one and the same.

Mr. ROBINSON. I have no objection to that.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 121, line 2, the committee proposes to strike out "100" and insert "80"; and proposes the same amendment on line 5, on line 15, and on line 18.

The PRESIDENT pro tempore. By unanimous consent, these amendments will be voted upon at the same time.

The amendments were agreed to.

Mr. SMOOT. On page 121, lines 15 and 16, I ask that the vote by which the amendment to strike out "7" and insert in lieu thereof "10" was disagreed to be reconsidered.

Mr. ROBINSON. What is the amendment?

The PRESIDENT pro tempore. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 121, in line 15, originally the committee proposed to strike out "7" and insert "10," which was disagreed to on July 13.

The PRESIDENT pro tempore (at 4 o'clock p. m.). The Chair desires to say that there is to be no further debate upon any committee amendment, and no committee amendments can be reported that are not already reported.

Is there objection to the request of the Senator from Utah? The Chair hears no objection, and the vote by which the amendment was disagreed to is reconsidered. The question now is upon agreeing to the amendment.

Mr. REED. Mr. President, before the vote is taken——

The PRESIDENT pro tempore. There is to be no debate.

Mr. REED. I desire to ask the Chair a question.

The PRESIDENT pro tempore. The Senator from Missouri will state it.

Mr. REED. I understood the Chair to rule that no further committee amendments could be offered.

The PRESIDENT pro tempore. The Chair, unless otherwise convinced, will be compelled to rule that under the unanimous-consent agreement committee amendments which were not reported by the committee prior to 4 o'clock can not now be reported.

Mr. REED. But those which were reported——

The PRESIDENT pro tempore. They will be considered and voted upon.

Mr. REED. Does that include the printed amendments in leaflet form? Are they considered as reported?

The PRESIDENT pro tempore. The Chair holds that it includes those amendments.

Mr. REED. I want to inquire what the record is on those amendments?

The PRESIDENT pro tempore. They were reported during an earlier hour of the day by the chairman of the Finance Committee. The question is upon agreeing to the committee amendment, which will again be reported.

The ASSISTANT SECRETARY. On page 121, in line 15, in the paragraph relating to cotton yarn, the committee propose to strike out "7" and insert "10," so as to read:

Provided, That none of the foregoing, of numbers not exceeding No. 100, shall pay less duty than 10 per cent ad valorem——

And so forth.

Mr. REED. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before, I vote "yea."

Mr. HARRISON (when his name was called). Transferring my pair with the Senator from West Virginia [Mr. ELKINS] to the senior Senator from Montana [Mr. MYERS], I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as on the last vote with regard to my pair and transfer, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. OVERMAN. I have a general pair with the senior Senator from Wyoming [Mr. WARREN]. He being absent and I being unable to obtain a transfer, I withhold my vote.

Mr. ROBINSON. Announcing the same transfer of my pair as on the previous vote, I vote "nay."

Mr. ERNST. Making the same announcement as before with reference to my pair and transfer, I vote "yea."

Mr. EDGE. Making the same announcement as before, I vote "yea."

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Minnesota [Mr. KELLOGG] with the Senator from North Carolina [Mr. SIMMONS];

The Senator from California [Mr. JOHNSON] with the Senator from Georgia [Mr. WATSON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Minnesota [Mr. NELSON] with the Senator from Massachusetts [Mr. WALSH];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS]; and

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE].

The result was announced—yeas 29, nays 20, as follows:

YEAS—29.

Ball	France	McNary	Shortridge
Brandegee	Frelinghuysen	Moses	Smoot
Bursum	Hale	New	Stanfield
Calder	Keyes	Newberry	Sterling
Curtis	Lodge	Norbeck	Watson, Ind.
Dillingham	McCormick	Oddie	
Edge	McCumber	Phipps	
Ernst	McLean	Rawson	

NAYS—20.

Ashurst	Fletcher	Kendrick	Sheppard
Borah	Harrison	McKellar	Swanson
Capper	Heflin	Ransdell	Trammell
Cummins	Jones, N. Mex.	Reed	Underwood
Dial	Jones, Wash.	Robinson	Walsh, Mont.

NOT VOTING—46.

Broussard	Harris	Norris	Stanley
Cameron	Hitchcock	Overman	Sutherland
Caraway	Johnson	Owen	Townsend
Colt	Kellogg	Page	Wadsworth
Culberson	King	Pepper	Walsh, Mass.
du Pont	Ladd	Pittman	Warren
Elkins	La Follette	Poindexter	Watson, Ga.
Fernald	Lenroot	Pomerene	Weller
Gerry	McKinley	Shields	Williams
Glass	Myers	Simmons	Willis
Gooding	Nelson	Smith	
Harreld	Nicholson	Spencer	

So the amendment of the committee was agreed to.

Mr. SMOOT. On page 121, line 4, I ask unanimous consent to reconsider the vote by which the committee amendment was disagreed to and to strike out "one-fifth" and insert in lieu thereof "one-fourth."

Mr. UNDERWOOD. Is the Senator proposing this or is it a committee amendment?

Mr. SMOOT. It is a committee amendment.

Mr. UNDERWOOD. I ask that the committee amendments may be reported by the Secretary, so that we may keep up with them.

The PRESIDENT pro tempore. The Senator from Utah asks unanimous consent for the reconsideration of the vote by which the amendment on page 121, line 4, was agreed to. Is there objection? The Chair hears none, and the vote is reconsidered. The question is now upon agreeing to the amendment, which will be stated.

The ASSISTANT SECRETARY. On page 121, in paragraph 901, cotton yarn, in line 4, the committee proposes to strike out "one-fifth" and insert "one-fourth."

The amendment was agreed to.

Mr. SMOOT. On page 121, in line 17, I ask unanimous consent to reconsider the vote by which the committee amendment was disagreed to and to strike out "one-fifth" and insert in lieu thereof "one-fourth."

The PRESIDENT pro tempore. The Senator from Utah asks unanimous consent for the reconsideration of the vote by which the amendment in line 17, page 121, was disagreed to. Is there objection?

Mr. UNDERWOOD. Mr. President, I do not wish to object to a vote on the proposition, but I understood that we had reached the point where there would be no more amendments proposed by the committee.

The PRESIDENT pro tempore. The Senator is correct. The amendments have been reported, the Chair is informed.

Mr. UNDERWOOD. They have been reported?

The PRESIDENT pro tempore. If they had not been reported the Chair would hold that they could not be now reported.

Mr. LODGE. They were all reported and are in print.

Mr. UNDERWOOD. What I want to understand is why it is necessary to ask unanimous consent.

The PRESIDENT pro tempore. The particular amendment was disagreed to, and the Senator from Utah has asked unanimous consent and has received it for the reconsideration of that vote.

Mr. ROBINSON. Otherwise it would be necessary to move to reconsider.

The PRESIDENT pro tempore. Therefore the question is upon the amendment as originally reported by the committee.

Mr. UNDERWOOD. As I understand it, under the unanimous-consent agreement it is not in order to move to reconsider votes which have already been taken in Committee of the Whole and thereby bring about another vote.

The PRESIDENT pro tempore. The Chair would be inclined to agree with the Senator from Alabama, but the request was for unanimous consent. The question is upon agreeing to the amendment, which will be stated.

The ASSISTANT SECRETARY. On page 121, in the paragraph relating to cotton yarn, in line 17, the committee proposes to strike out "one-fifth" and insert in lieu thereof "one-fourth."

The amendment was agreed to.

Mr. SMOOT. On page 121, line 18, strike out "100" and insert in lieu thereof "80."

The PRESIDENT pro tempore. The Chair is advised that the amendment has already been made.

Mr. SMOOT. That is true. On page 121, line 18, I ask unanimous consent to reconsider the vote by which the committee amendment was disagreed to and strike out "27" and insert in lieu thereof "35."

The PRESIDENT pro tempore. The Senator from Utah asks unanimous consent that the vote by which the amendment was disagreed to shall be reconsidered. Is there objection? The Chair hears none and the vote is reconsidered. The question now is upon agreeing to the amendment, which will be stated.

The ASSISTANT SECRETARY. On page 121, in the paragraph relating to cotton yarn, in line 18, the committee proposes to strike out "35" in the committee amendment and insert "30," so as to read:

Nor of numbers exceeding No. 100, less than 30 per cent ad valorem.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. On page 131, paragraph 919 was passed over. I ask for its reconsideration.

The PRESIDENT pro tempore. The Secretary will report the amendment.

The ASSISTANT SECRETARY. On page 131, paragraph 919, passed over, the first amendment is, after the word "sets," in line 5, to insert "and all other articles and fabrics, by whatever name known, plain or Jacquard figured," so as to read:

Lace window curtains, nets, nettings, pillow shams, and bed sets, and all other articles and fabrics, by whatever name known, plain or Jacquard figured—

And so forth.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. REED. Mr. President, I desire to make a point of order against all these amendments. I understand the Chair ruled that no amendments could be considered except committee amendments. I affirm that these are not committee amendments. The committee was not called in session. The Democratic members of the committee were not notified. What we have here is a report by some Senators, not the formal action of the committee in any respect. I insist upon the point.

The PRESIDENT pro tempore. The Chair understands that the amendment just voted upon was originally reported by the committee and was printed in the bill. It had therefore been reported and it was in order to vote upon it.

Mr. REED. Is it not brought up here as a part of the sheet of printed amendments to which I have referred? If it is not, then my point is not well taken, but I shall insist upon it as soon as we get into the open.

The PRESIDENT pro tempore. The Secretary will state the next committee amendment.

The ASSISTANT SECRETARY. On page 131, line 7, after the word "unfinished," it is proposed to insert "wholly or partly manufactured, for any use whatsoever."

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. SMOOT. On behalf of the Committee on Finance, on page 131, line 9, after the word "counting," I move to insert the words "not more than," so that it will read "when counting not more than 5 points or spaces between the warp threads to the inch."

The PRESIDENT pro tempore. The Secretary will state the amendment which is now proposed by the Senator from Utah on behalf of the committee.

The ASSISTANT SECRETARY. It is proposed by the committee, on page 131, line 9, at the end of the line, after the word "when," to insert the words "not more than."

Mr. REED. One moment.

The PRESIDENT pro tempore. The Chair desires to say with respect to the amendment just stated that if the Senator from Missouri desires to raise the point of order upon it, it will be received by the Chair.

Mr. REED. I make the point of order, Mr. President, that under the unanimous-consent agreement as construed by the Chair no amendment may be received after 4 o'clock to-day which was not reported by the Committee on Finance prior to 4 o'clock to-day, and that this amendment has not been so reported by the committee.

The PRESIDENT pro tempore. The Chair——

Mr. McCUMBER. Mr. President, it will be found that the amendment was reported by the committee on line 12, page 7, of the list of amendments which were offered this morning and ordered to lie on the table.

The PRESIDENT pro tempore. The Chair is compelled to say that the unanimous-consent agreement is not clear, but it reads as follows:

> It is agreed by unanimous consent that at not later than 4 o'clock p. m. on the calendar day of Tuesday, August 15, 1922, the Senate will proceed to vote in the Committee of the Whole, without further debate, upon reported amendments of the Finance Committee to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, that remain undisposed of (and in regular order) and upon any motion or motions that may be made in relation to the same.

The Chair believes that it was the intent of the unanimous-consent agreement that the Finance Committee might report proposed amendments at any time before 4 o'clock, and holds that the amendments so reported this morning are within the unanimous-consent agreement and may be considered.

Mr. REED. But the point that I make goes back of that. I maintain that this document which is handed us here with a large number of proposed amendments printed upon it is not the report of the Finance Committee; that the Finance Committee has not been called in session; that this document is a mere list of amendments reported in by the Senator from North Dakota [Mr. McCUMBER], who has no more authority, in his own right, of course, to make these reports than has any other member of the committee; that there has been no meeting of the Finance Committee; there has been no action of the Finance Committee; there has been no opportunity afforded to members of the Finance Committee to meet and pass upon these several amendments. This document, therefore, does not come as a report of the Finance Committee; it does not even purport to be the report of the Finance Committee. It is entitled "Amendments intended to be proposed by Mr. McCUMBER." They are amendments of the Senator from North Dakota; they are not the amendments of the Finance Committee. The Finance Committee has not been called together. I am a member of the Finance Committee, and I never heard of these amendments until they appeared in this document. The other Democratic members of the Finance Committee, so far as I know, were not present when this document was prepared. Therefore, there has been no action by the Finance Committee; so there is no amendment by the Finance Committee; but we have here a document prepared by the eminent Senator from North Dakota. It purports to be his work; it does not purport to be anything else. So I insist that under the rule the amendments are not now in order.

The PRESIDENT pro tempore. The Chair is unadvised with regard to the facts.

Mr. McCUMBER. If the President pro tempore will allow me, I desire to say that I presented the amendments on behalf of the committee; and if the Chair will take the trouble to look at the RECORD of this morning's proceedings, when the amendments were presented, he will find that they were presented as amendments on behalf of the committee and it was requested that they lie on the table.

Of course, as to whether or not the Senator from Missouri [Mr. REED] was present at the committee meeting I do not care about arguing, because everyone knows that this bill has been framed by the majority members of the Committee on Finance, as has been usual with such bills.

Mr. REED. Let me ask the Senator, was there any call issued for the committee to consider these amendments?

Mr. McCUMBER. Mr. President, yes. I notified those members of the committee who meet to consider amendments every evening. When the Senate concluded its session last evening those members of the committee were notified that we would meet. We took a recess until this morning at 9 o'clock.

Mr. REED. What members of the committee were notified?

Mr. McCUMBER. The Republican members.

Mr. REED. And no Democratic members?

Mr. McCUMBER. Not a Democrat.

Mr. REED. Then, Mr. President, it is not the action of the committee.

Mr. McCUMBER. I will let that matter be passed on by the Chair.

Mr. REED. It is action by a few members on one side. It is not the action of the committee. The committee is composed of a certain number of Senators, and the Democrats are as much members of the committee as are the Republicans. No legal committee meeting can be held unless there is a proper notice.

Mr. WATSON of Indiana. Mr. President, I dislike very much to interfere with my friend from Missouri, but I think he is transgressing the rule, because under the rule questions of order must be decided without debate.

Mr. REED. I am making my point of order and trying to develop the facts. Now, I wish to ask, how many members on the Republican side were present when this particular document was passed on?

The PRESIDENT pro tempore. The Chair sustains the point of order made by the Senator from Indiana [Mr. WATSON]. The question must be decided without debate. The Chair is of the opinion that it has no authority to inquire into the question of fact. The Senator from North Dakota [Mr. McCUMBER] acting in behalf of the committee or assuming to act in behalf of the committee reported these amendments. If he was not authorized to report them, then was the time, if the Chair had any authority over the matter, to make the objection. The point of order is overruled.

Mr. REED. Mr. President——

Mr. McCUMBER. Question!

Mr. REED. I call the Chair's attention to the fact that it does not purport to be the action of the committee.

The PRESIDENT pro tempore. The Senator from North Dakota when the amendments were sent to the desk accompanied them with a statement that he reported the amendments on behalf of the Finance Committee.

Mr. REED. I appeal from the decision of the Chair.

The PRESIDENT pro tempore. The Senator from Missouri appeals from the decision of the Chair.

Mr. WATSON of Indiana. Mr. President, I move to lay the appeal on the table, and on that I demand the yeas and nays.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Indiana to lay on the table the appeal of the Senator from Missouri from the decision of the Chair. On that question the yeas and nays are demanded.

The yeas and nays were ordered, and the Assistant Secretary proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "yea."

Mr. HALE (when his name was called). Making the same announcement as before with regard to my pair and its transfer, I vote "yea."

Mr. HARRISON (when his name was called). Making the same announcement as before with reference to my pair and its transfer, I vote "nay."

Mr. POMERENE (when his name was called). Again announcing my pair with my colleage [Mr. WILLIS], I transfer that pair to the Senator from Nebraska [Mr. HITCHCOCK], and vote "nay."

Mr. ROBINSON (when his name was called). Announcing the same pair and transfer as on the previous votes, I vote "nay."

Mr. TRAMMELL (when his name was called). Making the same announcement as on the previous vote with regard to the transfer of my pair, I vote "nay."

Mr. WATSON of Indiana (when his name was called). Making the same announcement as before, I vote "yea."

The roll call was concluded.

Mr. EDGE. Making the same announcement as to transfer, I vote "yea."

Mr. OVERMAN. I have a general pair with the Senator from Wyoming [Mr. WARREN]. Not being able to get a transfer, I withhold my vote.

The result was announced—yeas 38, nays 20, as follows:

YEAS—38.

Ball	France	McCumber	Phipps
Brandegee	Frelinghuysen	McLean	Rawson
Bursum	Gooding	McNary	Shortridge
Calder	Hale	Moses	Smoot
Cameron	Jones, Wash.	New	Stanfield
Capper	Kellogg	Newberry	Sterling
Curtis	Keyes	Nicholson	Wadsworth
Dillingham	Lenroot	Norbeck	Watson, Ind.
Edge	Lodge	Oddie	
Ernst	McCormick	Pepper	

NAYS—20.

Ashurst	Heflin	Ransdell	Stanley
Broussard	Jones, N. Mex.	Reed	Swanson
Dial	Kendrick	Robinson	Trammell
Fletcher	McKellar	Sheppard	Underwood
Harrison	Pomerene	Simmons	Walsh, Mont.

NOT VOTING—37.

Borah	Harreld	Norris	Townsend
Caraway	Harris	Overman	Walsh, Mass.
Colt	Hitchcock	Owen	Warren
Culberson	Johnson	Page	Watson, Ga.
Cummins	King	Pittman	Weller
du Pont	Ladd	Poindexter	Williams
Elkins	La Follette	Shields	Willis
Fernald	McKinley	Smith	
Gerry	Myers	Spencer	
Glass	Nelson	Sutherland	

So the appeal from the decision of the Chair was laid on the table.

The ASSISTANT SECRETARY. On page 131, in paragraph 919, line 9, after the words "when counting," it is proposed to insert the words "not more than."

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 14, page 131, it is proposed to strike out "17" and insert "30."

The amendment was agreed to.

The ASSISTANT SECRETARY. On line 16 it is proposed to strike out "40" and insert "60."

The amendment was agreed to.

Mr. SMOOT. On page 165 I ask to reconsider the vote by which the committee amendment, beginning in line 11, was agreed to, and in the first line thereof I move to strike out "10 cents per pound" and insert in lieu thereof "10 per cent ad valorem."

The PRESIDENT pro tempore. The Chair desires to ask the Senator from Utah whether the amendment as now proposed is in the printed list of amendments submitted this morning?

Mr. SMOOT. It is, on page 7.

Mr. REED. Let the amendment be stated.

The PRESIDENT pro tempore. The Senator from Utah asks unanimous consent for the reconsideration of the vote by which the amendment on page 165 was agreed to.

Mr. REED. I object.

Mr. SMOOT. Then, Mr. President, I move that we reconsider the vote by which the amendment was agreed to.

The PRESIDENT pro tempore. Does the Senator from Utah move to reconsider?

Mr. SMOOT. Yes; if, under the rule, I can.

Mr. REED. I make the point of order that a motion can not be entertained.

The PRESIDENT pro tempore. The unanimous-consent agreement provides that:

> The Senate will proceed to vote in the Committee of the Whole without further debate upon reported amendments of the Finance Committee * * * and upon any motion or motions that may be made in relation to the same.

The Chair is of the opinion that a motion made to reconsider the vote by which an amendment was agreed to is a motion in relation to the committee amendment.

Mr. REED. It is in relation to the old action of the Senate, but it has no relation to the new committee amendment.

Mr. LODGE. Mr. President, I desire to call attention to the unmistakable agreement that all questions of order under this agreement shall be decided by the Presiding Officer without debate.

The PRESIDENT pro tempore. That matter has been called to the attention of the Chair. The Chair is of the opinion that the motion is in order.

Mr. SMOOT. Then I move, on page 165, to reconsider the vote by which the committee amendment beginning in line 11 was agreed to, and in the first line thereof to strike out "10 cents per pound" and insert in lieu thereof "10 per cent ad valorem."

The PRESIDENT pro tempore. The Senate has not yet disposed of the motion to reconsider. [Putting the question.] The "ayes" have it, and the motion to reconsider is agreed to. The question now is on agreeing to the amendment to the amendment.

Mr. ROBINSON. Mr. President, a parliamentary inquiry. Where is the amendment in the printed bill?

Mr. SMOOT. On page 165, beginning in line 11.

Mr. ROBINSON. It does not appear in the print.

The ASSISTANT SECRETARY. On page 165, the committee struck out all of paragraph 1215 and inserted a new paragraph 1215. On the first line of that paragraph, on behalf of the committee and in the printed schedule of amendments, the following amendment is proposed:

> Strike out "10 cents per pound" and insert "10 per cent ad valorem."

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. On page 168, line 9, I move to add the new sentence which I send to the desk and ask to have read.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. On page 168, at the end of line 9, or as a new paragraph, it is proposed to insert:

> If any country, dependency, Province, or other subdivision of government imposes a duty on any article specified in this paragraph when imported from the United States in excess of the duty herein provided, there shall be imposed upon such article, when imported either directly or indirectly from such country, dependency, Province, or other subdivision of government, a duty equal to that imposed by such country, dependency, Province, or other subdivision of government on such article imported from the United States.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

Mr. SIMMONS. Mr. President, on that I ask for a division. I shall not ask for a yea-and-nay vote, but I ask for a division.

On a division the amendment was agreed to.

Mr. SMOOT. On page 175, line 10, I move to strike out "3" and insert in lieu thereof "1½."

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. In a proposed amendment of the committee which has not been agreed to, on page 175, line 10, paragraph 1309, it is proposed to strike out "3" and insert "1½," so that the amendment will read "1½ cents per pound and."

Mr. SHEPPARD. That is the specific rate for wall paper?

Mr. SMOOT. Yes; reducing it from 3 to 1½ cents per pound.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMOOT. On page 195, lines 10 to 13, both inclusive, I move to reconsider the vote by which the committee amendment was adopted, and in line 12, after the word "leather" and the comma, where it first appears in the line, I move to insert "bag, strap, case, football."

The PRESIDENT pro tempore. Does the Senator from Utah ask to reconsider?

Mr. SMOOT. I ask unanimous consent for a reconsideration.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the vote by which the amendment was agreed to is reconsidered.

The ASSISTANT SECRETARY. On line 12, after the word "leather" and the comma, it is proposed to insert "bag, strap, case, football."

The amendment was agreed to.

Mr. SMOOT. On page 195, line 13, after the word "crust," I move to insert the matter which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The ASSISTANT SECRETARY. In the same paragraph, on line 13, after the word "crust" and the comma, it is proposed to insert:

> and seal, sheep, goat, calf, and pig leather, dressed and finished, other than shoe leather.

The amendment was agreed to.

Mr. SMOOT. On page 197, line 25, I ask that the vote by which the committee amendment was agreed to be reconsidered, and that before the word "and" the following be inserted:

> Not specially provided for.

The PRESIDENT pro tempore. Without objection, the vote will be reconsidered, and the Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 197, line 25, after the word "thereof," insert the words "not specially provided for."

The amendment was agreed to.

Mr. SMOOT. On page 198, after line 4, I move to insert the following:

PAR. 1435a. Harness valued at more than $70 per set, saddles valued at more than $40 each, saddlery, and parts (except metal parts) for any of the foregoing, 35 per cent ad valorem.

The amendment was agreed to.

Mr. SMOOT. On page 229, after line 25, I move to insert a new paragraph, as follows:

PAR. 1633a. Plaster rock or gypsum, crude.

The amendment was agreed to.

Mr. McCUMBER. In the committee amendment inserting section 304, page 252, line 14, I move to strike out the word "every" and insert in lieu thereof the words "That every."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 253, line 5, I move to strike out the words "prescribe: *Provided*, That," and to insert in lieu thereof the words "prescribe. Unless the article is exported under customs supervision."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 253, line 5, I move to strike out the word "collected" and to insert the words "levied, collected, and paid."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On line 9, after the word "thereof," I move to strike out the words "unless the article is exported under customs supervision" and insert in lieu thereof the words "or if such article is free of duty there shall be levied, collected, and paid upon such article a duty of 10 per cent of the appraised value thereof."

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question now is upon agreeing to the amendment as amended.

The amendment as amended was agreed to.

Mr. McCUMBER. In the committee amendment inserting section 308, page 259, line 17, I move to strike out the word "purposes" and the semicolon and to insert the words "purposes, and upon satisfactory proof to the Secretary that any such article has been destroyed because of its use for experimental purposes such bond may be canceled without the payment of duty" and a semicolon.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 259, line 20, the committee proposes to strike out the words "and team" and to insert the word "team."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 259, line 23, the committee proposes to strike out the word "and," the last word in the line.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 260, after line 3, the committee proposes to insert the following subsection:

(8) Containers for compressed gases which comply with the existing regulations for transport of such compressed gases in the country from which the containers are exported.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 262, line 8, the committee proposes to strike out, in the House text, the words "No articles" and to insert the word "Articles."

The amendment was agreed to.

Mr. McCUMBER. On page 262, line 9, the committee proposes to strike out the word "shall" in the House text and to insert the words "or articles manufactured therefrom may."

The amendment was agreed to.

Mr. McCUMBER. On the same page, line 10, the committee proposes to strike out the word "except," the second word in the line.

The amendment was agreed to.

Mr. McCUMBER. On line 18 the committee proposes to strike out the words "waste material or."

The amendment was agreed to.

Mr. McCUMBER. On line 24, after the word "country" and before the period, the committee proposed to insert a comma and the following:

Provided, That all waste material may be destroyed under Government supervision.

The amendment was agreed to.

Mr. McCUMBER. On page 263, line 19, in the House text, the committee proposes to strike out the word "cigars" and to insert the words "cigars, cigarettes, and tobacco."

The amendment was agreed to.

Mr. McCUMBER. On line 20 the committee proposes to strike from the House text the words "of tobacco imported from any one country" and to insert the words "or in part of imported tobacco."

The amendment was agreed to.

Mr. McCUMBER. On page 264, line 1, the committee proposes to strike out the word "cigars" and to insert the words "cigars, cigarettes, and tobacco."

The amendment was agreed to.

Mr. McCUMBER. On page 264, line 1, the committee proposes to strike from the House text the following words:

withdrawn, and the boxes or packages containing such cigars shall be stamped to indicate their character, origin of tobacco from which made, and place of manufacture," and to insert the word "withdrawn."

The amendment was agreed to.

Mr. McCUMBER. On page 268, line 25, in section 313, the proposed committee amendment, the committee proposes to strike out the word "by" after the words "United States," and to insert the word "with."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 270, in the House text, on line 10, beginning with the word "used," the committee proposes to strike out that word and down to and including the word "preparations" on line 13, and to insert the word "used."

The amendment was agreed to.

Mr. McCUMBER. On page 278, line 24, in section 316, the committee amendment, after the word "certiorari," the committee proposes to insert the words "applied for" in the committee amendment.

Mr. SIMMONS. I did not catch that amendment.

The PRESIDENT pro tempore. The amendment just proposed occurs in an amendment already agreed to, and it will be necessary to reconsider the vote by which it was agreed to before the amendment can be considered. Without objection, the vote by which the amendment was agreed to is reconsidered, and the question now is upon the amendment to the amendment, which the Secretary will state.

The ASSISTANT SECRETARY. On page 278, line 24, after the word "certiorari," before the word "within," insert the words "applied for," so that it will read:

That the judgment of said court shall be final, except that the same shall be subject to review by the United States Supreme Court upon certiorari applied for within three months after such judgment of the United States Court of Customs Appeals.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 286, line 16, in the House text, after the Roman numeral "IV," the committee proposes to insert a semicolon and the words "nor of subsection 30 of section 28 of the act of August 5, 1909."

The amendment was agreed to.

Mr. McCUMBER. After line 16 the committee proposes to insert a new section, as follows:

SEC. 321. That all automobiles, automobile bodies, automobile chassis, and parts thereof, including tires, exported prior to February 11, 1919, from the United States of America for the use of the American Expeditionary Forces or the Governments associated with the Government of the United States of America in the war with Germany and Austria, and which have been sold or delivered to any foreign government, individual, partnership, corporation, or association by the United States Liquidation Commission, or by any other agent or official of the United States of America, when reimported into the United States of America shall pay a duty of 90 per cent ad valorem, the value of such articles to be fixed on a basis equivalent to the original value of such articles in the United States, under rules and regulations to be prescribed by the Secretary of the Treasury.

The amendment was agreed to.

Mr. McCUMBER. On page 289, in the proposed committee amendment, line 13, the committee proposes to strike out the words "subject to the jurisdiction."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. McCUMBER. On page 291, line 7, in the proposed committee amendment, section 402, the committee proposes to strike out the word "or" and to insert the word "and."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 291, beginning with the word "or," on line 9, the committee proposes to strike out that word and all down to and including the word "purchasers" and the comma, on line 11.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 291, line 19, in the committee amendment heretofore offered, the committee proposes to strike out the words "for in" and to insert the words "in subdivision (b)."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 291, line 22, after the word "be," the first word in the line, the committee proposes to insert the words "the market value or."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 292, line 5, at the end of the line, after the words "shall be," the committee moves to insert the words "the market value or."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 292, line 15, the committee proposes to strike out all of the matter beginning with the comma where it first appears in the line, down to and including line 22, and insert in lieu thereof a period and the following:

If in the ordinary course of trade imported merchandise is shipped to the United States to an agent of the seller, or to the seller's branch house, pursuant to an order or an agreement to purchase (whether placed or entered into in the United States or in the foreign country), for delivery to the purchaser in the United States, and if the title to such merchandise remains in the seller until such delivery, then such merchandise shall not be deemed to be freely offered for sale in the principal markets of the country from which exported for exportation to the United States within the meaning of this subdivision.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 292, in line 24, the committee proposes to strike out the word "that" and insert in lieu thereof "at which."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 292, line 25, after the word "sale," the committee moves to insert "packed for delivery."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 293, line 9, strike out all of the matter, beginning with the comma, down to and including the word "delivery" in line 12, as follows:

and including the cost of all containers and coverings of whatever nature, and all other costs, charges, and expenses incident to placing the merchandise in condition packed ready for delivery.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 293, line 17, the committee proposes to strike out the words "producing, identical or substantially identical" and insert in lieu thereof "producing such or similar."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 293, lines 23 and 24, the committee proposes to strike out the words "identical or substantially identical" and insert in lieu thereof "such or similar."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 294, line 10, the committee proposes to strike out all of the matter after the word "the," where it first appears in the line, down to and including the word "particular," in line 11, and insert in lieu thereof "production or manufacture of merchandise of the same class or kind."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 294, line 21, the committee propose, after the word "quantities," to insert "in such markets."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 294, line 22, the committee propose to strike out the word "and" and insert in lieu thereof the word "or."

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question now is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, on page 297, at the beginning of line 8, to strike out "packages" and to insert "pieces of baggage," and, in the same line, after the word "each," to strike out "respectively" and to insert "and a list of all baggage not accompanied by passengers," so as to make the paragraph read:

Fifth. The names of the several passengers aboard the vessel, stating whether cabin or steerage passengers, with their baggage, specifying the number and description of the pieces of baggage belonging to each, and a list of all baggage not accompanied by passengers.

The amendment was agreed to.

The next amendment was, on page 297, line 15, after the word "stores," where it occurs the first time, to strike out "ship" and to insert "ship's," so as to make the paragraph read:

SEC. 432. Sea and ship's stores: The manifest of any vessel arriving from a foreign port or place shall separately specify the articles to be retained on board of such vessel as sea stores, ship's stores, or bunker coal or bunker oil, and if any other or greater quantity of sea stores, ship's stores, bunker coal, or bunker oil is found on board of any such vessel than is specified in the manifest, or if any such articles, whether shown on the manifest or not, are landed without a permit therefor issued by the collector, all such articles omitted from the manifest or landed without a permit shall be subject to forfeiture, and the master shall be liable to a penalty equal to the value of the articles.

The amendment was agreed to.

The next amendment was, on page 298, line 2, after the word "of," to strike out "an American vessel" and to insert "a vessel of the United States"; at the beginning of line 5, to strike out "of entry"; in line 8, after the word "customhouse," to strike out the colon and "*Provided*, That vessels belonging to regular lines may be given general permits to proceed to the port of destination without reporting at the first port of arrival"; in line 11, after the word "regulations," to strike out "and conditions"; and at the beginning of line 12 to strike out "the Treasury" and to insert "Commerce," so as to make the section read:

SEC. 433. Report of arrival: Within 24 hours after the arrival of any vessel from a foreign port or place, or of a foreign vessel from a domestic port, or of a vessel of the United States carrying bonded merchandise, or foreign merchandise for which entry has not been made, at any port or within any harbor or bay at which such vessel shall come to, the master shall, unless otherwise provided by law, report the arrival of the vessel at the customhouse under such regulations as the Secretary of Commerce may prescribe.

The amendment was agreed to.

The next amendment was, on page 298, line 14, after the word "law," to insert "and under such regulations as the Secretary of Commerce may prescribe"; in line 16, after the word "of," to strike out "an American vessel" and to insert "a vessel of the United States"; in line 24, after the word "original," to insert "and one copy of the"; and in line 25, after the word "oath," to strike out the comma and "in a form prescribed by the Secretary of the Treasury," so as to make the section read:

SEC. 434. Entry of American vessels: Except as otherwise provided by law, and under such regulations as the Secretary of Commerce may prescribe, the master of a vessel of the United States arriving in the United States from a foreign port or place shall, within 48 hours after its arrival within the limits of any customs collection district, make formal entry of the vessel at the customhouse by producing and depositing with the collector the vessel's crew list, its register, or document in lieu thereof, the clearance and bills of health issued to the vessel at the foreign port or ports from which it arrived, together with the original and one copy of the manifest, and shall make oath that the ownership of the vessel is as indicated in the register and that the manifest was made out in accordance with section 431 of this act.

The amendment was agreed to.

The next amendment was, on page 299, line 8, after the word "of," to strike out "an American vessel" and to insert "a vessel of the United States," so as to read:

SEC. 435. Entry of foreign vessels: The master of any foreign vessel arriving within the limits of any customs collection district shall, within 48 hours thereafter, make entry at the customhouse in the same manner as is required for the entry of a vessel of the United States, except that a list of the crew need not be delivered, and that instead of depositing the register or document in lieu thereof such master may produce a certificate by the consul of the nation to which such vessel belongs that said documents have been deposited with him.

The amendment was agreed to.

The next amendment was, on page 299, line 20, after the word "who," to strike out "shall fail" and to insert "fails"; in the same line, after the word "make," to strike out "such" and to insert "the"; in line 21, after the word "in," to strike out "the three immediately preceding sections" and to insert "section 433, 434, or 435 of this act"; and in line 23, after the word "of," to strike out "$500" and to insert "not more than $1,000," so as to make the section read:

SEC. 436. Failure to report or enter vessel: Every master who fails to make the report or entry provided for in section 433, 434, or 435 of this act shall, for each offense, be liable to a fine of not more than $1,000.

The amendment was agreed to.

The next amendment was, on page 299, line 25, after the word "The," to strike out "register and other documents" and to insert "register, or document in lieu thereof," and on page 300, at the beginning of line 1, to insert "of this act," so as to make the section read:

SEC. 437. Documents returned at clearance: The register, or document in lieu thereof, deposited in accordance with section 434 or 435 of this act shall be returned to the master or owner of the vessel upon its clearance.

The amendment was agreed to.

The next amendment was, on page 300, line 5, after the word "the," to strike out "register or other papers" and to insert "register, or document in lieu thereof"; in line 6, after the word "him," to strike out "pursuant to" and to insert "in accordance with"; in line 7, after the word "of," to strike out "the preceding"; in line 8, after the word "section," to insert "435 of this act"; in line 11, after the words "shall be," to strike out "fined" and to insert "liable to a fine of"; and in line 12, after the word "than," to strike out "$500" and to insert "$5,000," so as to make the section read:

SEC. 438. Unlawful return of ship's papers: It shall not be lawful for any foreign consul to deliver to the master of any foreign vessel the register, or document in lieu thereof, deposited with him in accordance with the provisions of section 435 of this act until such master shall produce to him a clearance in due form from the collector of the port where such vessel has been entered. Any consul offending against the provisions of this section shall be liable to a fine of not more than $5,000.

The amendment was agreed to.

The next amendment was, on page 300, line 18, after the word "the," to strike out "naval officer" and to insert "comptroller of customs"; in line 22, after the word "said," to strike out "naval officer" and to insert "comptroller of customs"; in line 25, after the word "who," to strike out "shall neglect

or fail" and to insert "fails"; and on page 301, line 2, after the word "of," to insert "not more than," so as to make the section read:

SEC. 439. Failure to deliver manifest: Immediately upon arrival and before entering his vessel, the master of a vessel from a foreign port required to make entry shall mail to the Comptroller General of the United States at Washington, D. C., or shall mail or deliver to the comptroller of customs, if any be located in such district, a copy of the manifest, and shall on entering his vessel make affidavit that a true and correct copy was so mailed or delivered, and he shall also mail to said Comptroller General, or mail or deliver to said comptroller of customs a true and correct copy of any correction of such manifest filed on entry of his vessel. Any master who fails so to mail or deliver such copy of the manifest or correction thereof shall be liable to a penalty of not more than $500.

The amendment was agreed to.

The next amendment was, on page 301, line 3, after the word "If," to insert "there is"; at the beginning of line 4 to strike out "shall be found" and to insert "or baggage"; in the same line, after the word "vessel," to insert "which is"; in line 5, after the word "or," to strike out "agreeing" and to insert "which does not agree"; in line 6, after the word "the," where it occurs the first time, to strike out "master, owner, or agent" and to insert "master"; and, at the beginning of line 9, to strike out "naval officer" and to insert "comptroller of customs"; so as to make the section read:

SEC. 440. Post entry: If there is any merchandise or baggage on board such vessel which is not included in or which does not agree with the manifest, the master of the vessel shall make a post entry thereof, and mail a copy to the Comptroller General of the United States or mail or deliver a copy to the comptroller of customs, if any, and for failure so to do shall be liable to a penalty of $500.

The amendment was agreed to.

The next amendment was, in section 441, on page 301, line 17, after the word "in," where it occurs the second time, to strike out "trade." and to insert "trade;" so as to read:

SEC. 441. Vessels not required to enter: The following vessels shall not be required to make entry at the customhouse:

(1) Vessels of war and public vessels employed for the conveyance of letters and dispatches and not permitted by the laws of the nations to which they belong to be employed in the transportation of passengers or merchandise in trade;

The amendment was agreed to.

The next amendment was, in section 441, on page 301, line 19, after "(2)," to strike out "Vessels used exclusively as ferryboats carrying passengers, baggage, and merchandise, or" and to insert "Passenger"; in line 22, after the word "foreign," to strike out "port" and to insert "port, or vessels used exclusively as ferryboats, carrying passengers, baggage, or merchandise"; so as to read:

(2) Passenger vessels making three trips or oftener a week between a port of the United States and a foreign port, or vessels used exclusively as ferryboats, carrying passengers, baggage, or merchandise.

The amendment was agreed to.

The next amendment was, on page 301, line 24, after the word "That," to insert "the master of any"; in the same line, after the word "such," to strike out "vessels" and to insert "vessel"; and in line 26, after the word "after," to strike out "arrival." and to insert "arrival;" so as to make the proviso read:

Provided, That the master of any such vessel shall be required to report such baggage and merchandise to the collector within 24 hours after arrival;

The amendment was agreed to.

The next amendment was, on page 302, line 1, after "(3)," to strike out "Vessels under" and to insert "Yachts of"; in the same line, after the word "tons," to insert "or under"; at the beginning of line 2, strike out "enrolled or licensed as yachts and"; and in line 3, after the word "for," to strike out "hire." and to insert "hire;" so as to make the paragraph read:

(3) Yachts of 15 gross tons or under not permitted by law to carry merchandise or passengers for hire;

The amendment was agreed to.

The next amendment was, on page 302, line 4, after the word "arriving," to insert "in distress or," so as to read:

(4) Vessels arriving in distress or for the purpose of taking on bunker coal, bunker oil, or necessary sea stores and which shall depart within 24 hours after arrival without having landed or taken on board any merchandise other than bunker coal, bunker oil, or necessary sea stores.

The amendment was agreed to.

The next amendment was, on page 302, line 13, after the word "on," to strike out "board." and to insert "board; and," so as to make the paragraph read:

Provided, That the master, owner, or agent of such vessel shall report under oath to the collector the hour and date of arrival and departure and the quantity of bunker coal, bunker oil, or necessary sea stores taken on board; and

The amendment was agreed to.

The next amendment was, on page 302, line 16, after the word "vessels," to insert "which are," so as to make the paragraph read:

(5) Tugs enrolled and licensed to engage in the foreign and coasting trade in the northern, northeastern, and northwestern frontiers when towing vessels which are required by law to enter and clear.

The amendment was agreed to.

The next amendment was, in section 442, page 302, line 20, after the word "entry," to strike out "required by law shall have been made" and to insert "of such vessel under the provisions of this act," and in line 24, after the word "same," to strike out "or" and to insert "and without the," so as to read:

SEC. 442. Residue cargo: Any vessel having on board merchandise shown by the manifest to be destined to a foreign port or place may, after the report and entry of such vessel under the provisions of this act, proceed to such foreign port of destination with the cargo so destined therefor, without unlading the same and without the payment of duty thereon. Any vessel arriving from a foreign port or place having on board merchandise shown by the manifest to be destined to a port or ports in the United States other than the port of entry at which such vessel first arrived and made entry may proceed with such merchandise from port to port or from district to district for the unlading thereof:

The amendment was agreed to.

The next amendment was, on page 303, line 19, after the word "ports," to insert "of entry," and in line 26, after the word "port," to insert "of entry," so as to make the section read:

SEC. 443. Cargo for different ports: Merchandise arriving in any vessel for delivery in different districts or ports of entry shall be described in the manifest in the order of the districts or ports at or in which the same is to be unladen. Before any vessel arriving in the United States with any such merchandise shall depart from the port of first arrival, the master shall obtain from the collector a permit therefor with a certified copy of the vessel's manifest showing the quantities and particulars of the merchandise entered at such port of entry and of that remaining on board.

The amendment was agreed to.

The next amendment was, on page 304, line 5, after the word "with," strike out "said" and to insert "the," so as to make the paragraph read:

SEC. 444. Entry at another port: Within 24 hours after the arrival of such vessel at another port of entry, the master shall make entry with the collector at such port and shall produce the permit issued by the collector at the port of first arrival, together with the certified copy of his manifest.

The amendment was agreed to.

The next amendment was, on page 304, line 14, after the word "of," to insert "not more than," so as to make the section read:

SEC. 445. Failure to obtain or to produce permit: If the master of any such vessel shall proceed to another port or district without having obtained a permit therefor and a certified copy of his manifest, or if he shall fail to produce such permit and certified copy of his manifest to the collector at the port of destination, or if he shall proceed to any port not specified in the permit, he shall be liable to a penalty for each offense of not more than $500.

The amendment was agreed to.

The next amendment was, in section 446, on page 304, line 26, after the word "collector," to insert "and under customs supervision"; and on page 305, line 2, after the word "owner," to insert "and engaged in the foreign trade," so as to make the proviso read:

Provided, That bunker coal, bunker oil, ships' stores, sea stores, or the legitimate equipment of vessels belonging to regular lines plying between foreign ports and the United States, which are delayed in port for any cause, may be transferred under a permit by the collector and under customs supervision from the vessel so delayed to another vessel of the same line, and owner, and engaged in the foreign trade, without the payment of duty thereon.

The amendment was agreed to.

The next amendment was, in section 447, on page 305, line 8, after the word "of," where it occurs the first time, to strike out "the Treasury" and to insert "Commerce," so as to make the proviso read:

Provided, That upon good cause therefor being shown, the Secretary of Commerce may permit entry of any vessel to be made at a place other than a port of entry designated by him, under such conditions as he shall prescribe.

The amendment was agreed to.

The next amendment was, in section 447, on page 305, line 11, after the word "with," to strike out "coal, lumber, or other"; in line 12, after the word "in," to strike out "bulk," and to insert "bulk"; and in line 13, after the word "such," to strike out "vessel" and to insert "vessel," so as to make the additional proviso read:

And provided further, That any vessel laden with merchandise in bulk may proceed after entry of such vessel to any place designated by the Secretary of the Treasury for the purpose of unlading such cargo, under the supervision of customs officers if the collector shall consider the same necessary, and in such case the compensation and expenses of such officers shall be reimbursed to the Government by the party in interest.

The amendment was agreed to.

The next amendment was, in section 448, on page 305, line 19, after the word "permit," to strike out "No" and to insert "Except as provided in section 441 of this act, no," so as to read:

SEC. 448. Same—Preliminary entry—Permit: Except as provided in section 441 of this act, no merchandise, passengers, or baggage shall be unladen from any vessel or vehicle arriving from a foreign port or place until entry of such vessel or report of the arrival of such vehicle has been made and a permit for the unlading of the same issued by the collector.

The amendment was agreed to.

The next amendment was, in section 448, on page 306, line 4, after the word "who," to strike out "shall board" and to insert "boards"; at the beginning of line 7, to strike out "law" and to insert "this act"; in line 9, after the word "the," to strike out "master" and to insert "master of the vessel, or to the"; at the beginning of line 10, to strike out "conductor, or other"; in the same line, after the word "charge," to strike out "thereof" and to insert "of the vehicle"; in line 11, before the word "but," to strike out "its cargo" and to insert "merchandise or baggage"; in the same line, after the word "merchandise," to insert "or baggage"; in line 12, after the word "retained," to strike out "on the dock or pier of the importing vessel or vehicle" and to insert "at the place of unlading"; in line 13, after the word "until," to strike out "such time as"; in line 14, after the word "therefor," to strike out "shall have been" and to insert "is"; in line 16, after the word "merchandise," to strike out "shall be" and to insert "is"; in line 19, after the word "from," to strike out "the pier or dock" and to insert "the place of unlading"; in line 21, before the word "so," to insert "or baggage"; in line 24, after the word "time," to strike out "shall be" and to insert "is"; in line 25, after the word "section," to strike out "490" and to insert "484"; on page 307, line 2, after the word "the," to strike out "owner thereof" and to insert "consignee in the case of merchandise and of the owner in the case of baggage"; in line 3, after the word "until," to strike out "proper"; in line 4, after the word "entry," to strike out "therefor" and to insert "thereof"; and in the same line, before the word "made," to strike out "shall have been" and to insert "is," so as to make the proviso read:

Provided, That the master may make a preliminary entry of a vessel by making oath or affirmation to the truth of the statements contained in the vessel's manifest and delivering the manifest to the customs officer who boards such vessel, but the making of such preliminary entry shall not excuse the master from making formal entry of his vessel at the customhouse, as provided by this act. After the entry, preliminary or otherwise, of any vessel or report of the arrival of any vehicle the collector may issue a permit to the master of the vessel or to the person in charge of the vehicle to unlade merchandise or baggage, but merchandise or baggage so unladen shall be retained at the place of unlading until entry therefor is made and a permit for its delivery granted, and the owners of the vessel or vehicle from which any imported merchandise is unladen prior to entry of such merchandise shall be liable for the payment of the duties accruing on any part thereof that may be removed from the place of unlading without a permit therefor having been issued. Any merchandise or baggage so unladen from any vessel or vehicle for which entry is not made within 48 hours, exclusive of Sunday and holidays, from the time of the entry of the vessel or report of the vehicle, unless a longer time is granted by the collector, as provided in section 484, shall be sent to the public stores and held as unclaimed at the risk and expense of the consignee in the case of merchandise and of the owner in the case of baggage until entry thereof is made.

The amendment was agreed to.

The next amendment was, on page 307, line 5, after the word "emergency," to strike out: "No merchandise shall be unladen from any vessel or vehicle from any foreign port or place except at the port or place designated in the manifest of such vessel or vehicle as the destination of such merchandise: *Provided*, That if any vessel from a foreign port or place is compelled by pursuit of enemies, stress of weather, or accident, to put into any port of the United States other than the port to which such vessel is destined, or if such vessel is prevented by ice, shallow water, stress of weather, accident, or other cause from proceeding to its port of destination, the master of such vessel may, upon report to the collector, if the collector is satisfied as to the merits of the case, receive a permit for the unlading of the cargo of such vessel or any part thereof," and to insert: "Except as provided in sections 442 and 447 of this act, merchandise and baggage imported in any vessel by sea shall be unladen at the port of entry to which such vessel is destined, unless (1) such vessel is compelled by any cause to put into another port of entry, and the collector of such port issues a permit for the unlading of such merchandise or baggage, or (2) the Secretary of the Treasury, because of an emergency existing at the port of destination, authorizes such vessel to proceed to another port of entry"; on page 308, line 2, after the word "merchandise," to insert "and baggage"; in line 4, before the word "and," to insert "or baggage"; in the same line, after the word "merchandise," to insert "or baggage," so as to make the paragraph read:

SEC. 449. Same—Emergency: Except as provided in sections 442 and 447 of this act, merchandise and baggage imported in any vessel by sea shall be unladen at the port of entry to which such vessel is destined, unless (1) such vessel is compelled by any cause to put into another port of entry, and the collector of such port issues a permit for the unlading of such merchandise or baggage, or (2) the Secretary of the Treasury, because of an emergency existing at the port of destination, authorizes such vessel to proceed to another port of entry. Merchandise and baggage so unladen may be entered in the same manner as other imported merchandise or baggage and may be treated as unclaimed merchandise or baggage and stored at the expense and risk of the owner thereof, or may be reladen without entry upon the vessel from which it was unladen for transportation to its destination.

The amendment was agreed to.

The next amendment was, on page 308, line 8, after the word "Same," to strike out "Sunday, and so forth," and to insert "Sundays and holidays."; in line 9, after the word "merchandise," to insert "baggage, or passengers"; in line 11, after the word "merchandise," to insert "or baggage"; and in line 14, after the word "license," to strike out ", as follows: Upon or prior to the arrival at any port in the United States of any vessel or vehicle from a foreign port or place, either direct or by way of another port, or upon the arrival from another port of the United States of any vessel or vehicle having on board merchandise under bond, the master, owner, or agent of such vessel or vehicle may apply to the collector for a special license to unlade the cargo of such vessel or vehicle at night or on Sunday or on a holiday, and the collector may thereupon grant a license so to do after entry or arrival of the vessel or vehicle, as the case may be," and to insert "granted by the collector under such regulations as the Secretary of the Treasury may prescribe," so as to make the paragraph read:

SEC. 450. Same—Sundays and holidays: No merchandise, baggage, or passengers arriving in the United States from any foreign port or place, and no bonded merchandise or baggage being transported from one port to another, shall be unladen from the carrying vessel or vehicle on Sunday, a holiday, or at night, except under special license granted by the collector under such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

The next amendment was, on page 309, line 2, before the word "agent," to insert "or"; at the beginning of line 3, to strike out "or consignee"; in line 7, after the word "to," strike out "reimburse the Government for," and to insert "pay"; in line 10, after the word "holiday," to insert "in accordance with the provisions of section 5 of the act entitled 'An act to provide for the lading or unlading of vessels at night, the preliminary entry of vessels, and for other purposes,' approved February 13, 1911, as amended"; at the beginning of line 15, to strike out the colon and "*Provided*, That in," and to insert "In"; at the beginning of line 16, to strike out "or consignee," and in the same line, after the word "any," to insert "vessel or vehicle or," so as to make the paragraph read:

SEC. 451. Same—Bond: Before any such special license to unlade shall be granted, the master, owner, or agent of such vessel or vehicle shall be required to give a bond in a penal sum to be fixed by the collector conditioned to indemnify the United States for any loss or liability which might occur or be occasioned by reason of the granting of such special license and to pay the compensation and expenses of the customs officers and employees whose services are required in connection with such unlading at night or on Sunday or a holiday in accordance with the provisions of section 5 of the act entitled "An act to provide for the lading or unlading of vessels at night, the preliminary entry of vessels, and for other purposes," approved February 13, 1911, as amended. In lieu of such bond the owner, or agent, of any vessel or vehicle or line of vessels or vehicles may execute a bond in a penal sum to be fixed by the Secretary of the Treasury to cover and include the issuance of special licenses for the unlading of vessels or vehicles belonging to such line for a period of one year from the date thereof.

The amendment was agreed to.

The next amendment was, on page 310, line 6, before the word "laden," to strike out "shall be" and to insert "or baggage is"; in line 7, after the word "vehicle," to strike out "contrary to the provisions of the seven preceding sections" and to insert "without a special license or permit therefor issued by the collector"; in line 9, after the word "master," to strike out "or other" and to insert "of such vessel or the"; in line 10, after the word "such," to strike out "vessel or"; in line 12, after the word "merchandise," to insert "or baggage"; in line 14, after the word "merchandise," to insert "or baggage"; in line 15, after the word "merchandise," to insert "or baggage"; and in line 16, after the word "thereof," to strike out "shall amount to" and to insert "is," and in the same line, after "$500," to insert "or more," so as to make the paragraph read:

SEC. 453. Penalty for violation: If any merchandise or baggage is laden on, or unladen from, any vessel or vehicle without a special license or permit therefor issued by the collector, the master of such vessel or the person in charge of such vehicle and every other person who knowingly is concerned, or who aids therein, or in removing or

otherwise securing such merchandise or baggage, shall each be liable to a penalty equal to the value of the merchandise or baggage so laden or unladen, and such merchandise or baggage shall be subject to forfeiture; and if the value thereof is $500 or more, the vessel or vehicle on or from which the same shall be laden or unladen shall be subject to forfeiture.

The amendment was agreed to.

The next amendment was, on page 310, line 19, after the word "boarding," to insert "and discharging"; in line 22, after the word "district," to strike out "or" and to insert "and if necessary"; on page 311, line 4, after the word "other," to insert "customs"; in line 9, after the word "the," to insert "inspector or other"; in line 10, after the word "other," to insert "customs"; at the beginning of line 11, to strike out "of the customs"; at the beginning of line 13, to strike out "or other" and to insert "unfavorable"; in the same line, after the word "weather," to insert "or any"; in line 15, after "Any," to strike out "such inspector or other officer who shall quit his station or otherwise neglect or fail to perform his duties, or any"; in line 17, after the word "officer," to insert "owner, agent of the owner"; at the beginning of line 18, to strike out "on board"; in the same line, after the word "who," to strike out "shall obstruct or hinder" and to insert "obstructs or hinders any"; in line 19, after the word "other," to insert "customs"; in line 21, after the word "of," to insert "not more than"; and at the end of the same line, to strike out "$100" and to insert "$500," so as to make the paragraph read:

SEC. 454. Boarding and discharging inspectors: The collector for the district in which any vessel or vehicle arrives from a foreign port or place may put on board of such vessel or vehicle while within such district, and if necessary while going from one district to another, one or more inspectors or other customs officers to examine the cargo and contents of such vessel or vehicle and superintend the unlading thereof and to perform such other duties as may be required by law or the customs regulations for the protection of the revenue. Such inspector or other customs officer may, if he shall deem the same necessary for the protection of the revenue, secure the hatches or other communications or outlets of such vessel or vehicle with customs seals or other proper fastenings while such vessel is not in the act of unlading, and such fastenings shall not be removed without permission of the inspector or other customs officer. Such inspector or other customs officer may require any vessel or vehicle to discontinue or suspend unlading during the continuance of unfavorable weather or any conditions rendering the discharge of cargo dangerous or detrimental to the revenue. Any officer, owner, agent of the owner, or member of the crew of any such vessel who obstructs or hinders any such inspector or other customs officer in the performance of his duties shall be liable to a penalty of not more than $500.

The amendment was agreed to.

The next amendment was, on page 311, line 23, after the word "inspector," to strike out "of customs" and to insert "or other customs officer"; on page 312, line 3, after the word "such," to insert "inspector or customs"; in line 4, after the word "such," where it occurs the third time, to insert "inspector or customs"; and in line 6, after the word "passengers," to strike out "so far as the state or condition of such vessel or vehicle will permit," so as to make the paragraph read:

SEC. 455. Compensation, etc., of inspectors: The compensation of any inspector or other customs officer, stationed on any vessel or vehicle while proceeding from one port to another and returning therefrom, shall be reimbursed to the Government by the master or owner of such vessel, together with the actual expense of such inspector or customs officer for subsistence, or in lieu of such expenses such vessel or vehicle may furnish such inspector or customs officer the accommodations usually supplied to passengers.

The amendment was agreed to.

The next amendment was, on page 312, line 9, before the word "on," to strike out "shall remain" and to insert "remains"; in the same line, after the word "board," to strike out "of"; in line 16, after the word "of," to insert "any"; and at the beginning of line 17, to insert "inspector or customs," so as to make the paragraph read:

SEC. 456. Cargo not unladen: Whenever any merchandise remains on board any vessel or vehicle from a foreign port more than 25 days after the date on which report of said vessel or vehicle was made, the collector may take possession of such merchandise and cause the same to be unladen at the expense and risk of the owners thereof, or may place one or more inspectors or other customs officers on board of said vessel or vehicle to protect the revenue. The compensation and expenses of any such inspector or customs officer for subsistence while on board of such vessel or vehicle shall be reimbursed to the Government by the owner or master of such vessel or vehicle.

The amendment was agreed to.

The next amendment was, on page 312, at the beginning of line 21, to strike out "owner or"; in line 22, after the word "or," to insert "the person in charge of the"; on page 313, line 1, after the word "the," where it occurs the second time, to strike out "owner" and to insert "consignee"; in line 2, after the word "until," to strike out "such time as," and in the same line, after the word "thereof," to strike out "shall have been" and to insert "is," so as to make the paragraph read:

SEC. 457. General order: At the request of the consignee of any merchandise, or of the owner or master of the vessel or the person in charge of the vehicle in which the same is imported, any merchandise may be taken possession of by the collector after the expiration of one day after the entry of the vessel or report of the vehicle and may be unladen and held at the risk and expense of the consignee until entry thereof is made.

The amendment was agreed to.

The next amendment was, on page 313, at the beginning of line 6, to strike out "coal, salt, sugar, hides, or other cargo," and to insert "merchandise," and in line 13, after the word "of," where it occurs the first time, to strike out the figures "25" and to insert the words "twenty-five," so as to make the paragraph read:

SEC. 458. Bulk cargo: The limitation of time for unlading shall not extend to vessels laden exclusively with merchandise in bulk consigned to one consignee and arriving at a port for orders, but if the master of such vessel requests a longer time to discharge its cargo, the compensation of the inspectors or other customs officers whose services are required in connection with the unlading shall, for every day consumed in unlading in excess of twenty-five days from the date of the vessel's entry, be reimbursed by the master or owner of such vessel.

The amendment was agreed to.

The next amendment was, on page 313, after line 14, to strike out:

SEC. 459. Imports from contiguous countries: All vessels or vehicles, and merchandise imported therein, arriving in the United States from a contiguous country shall be subject to all the provisions of law relating to vessels and merchandise imported therein from other countries by sea, unless otherwise provided by law or by regulations prescribed by the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 313, line 22, to change the number of the section from 460 to 459; in the same line, to strike out the word "same" and to insert "imports from contiguous countries"; in line 24, after the word "five," to insert "net"; in the same line, after the word "tons," to strike out "net-tonnage" and to insert "carrying merchandise"; at the beginning of line 25, to strike out "conductor, driver, or"; on page 314, line 9, after the word "any," to strike out "cargo" and to insert "merchandise"; in line 11, after the word "master," to insert "of any such vessel"; at the beginning of line 12, to strike out "conductor, driver"; in the same line, after the word "or," to strike out "other" and to insert "the"; at the beginning of line 13, to strike out "vessel or"; in the same line, after the word "who," to strike out "shall fail" and to insert "fails"; in line 16, after the word "merchandise," to insert "or baggage"; and in the same line, before the word "unladen," to strike out "shall be" and to insert "is," so as to make the paragraph read:

SEC. 459. Reports from contiguous countries—Report: The master of any vessel of less than 5 net tons carrying merchandise and the person in charge of any vehicle arriving in the United States from a contiguous country shall immediately report his arrival to the customs officer at the port of entry or customhouse which shall be nearest to the place at which such vessel or vehicle shall cross the boundary line or shall enter the territorial waters of the United States, and if such vessel or vehicle have on board any merchandise, shall produce to such customs officer a manifest as required by law, and no such vessel or vehicle shall proceed farther inland nor shall discharge or land any merchandise, passengers, or baggage without receiving a permit therefor from such customs officer. The master of any such vessel or the person in charge of any such vehicle who fails to report arrival in the United States as required by the provisions of this section shall be subject to a fine of $100 for each offense, and if any merchandise or baggage is unladen or discharged from any such vessel or vehicle without a permit therefor, the same, together with the vessel or vehicle in which imported, shall be subject to forfeiture.

The amendment was agreed to.

The next amendment was, on page 314, line 20, to change the number of the section from 461 to 460; in line 21, after the word "merchandise," to strike out "shall be" and to insert "is"; in the same line, after the word "imported" to insert "or brought"; in line 25, after the word "master," to insert "of the vessel"; in the same line, after the word "or," to strike out "other person having charge thereof" and to insert "the person in charge of the vehicle"; on page 315, line 3, after the word "the," to strike out "owner, master, or other person having charge" and to insert "the master"; and in line 4, after the word "or," to insert "the person in charge of such," so as to make the paragraph read:

SEC. 460. Same—Failure to report: If any merchandise is imported or brought into the United States in any vessel or vehicle from a contiguous country without being so reported to the collector, or in case of the neglect or failure of the master of the vessel or the person in charge of the vehicle to file a manifest therefor, such merchandise and the vessel or vehicle shall be subject to forfeiture, and the master of such vessel or the person in charge of such vehicle shall be liable to a penalty equal to the value of the merchandise imported in such vessel or vehicle which was not reported to the collector or included in the manifest.

Mr. McCUMBER. I move to amend the committee amendment on page 315, line 4, before the word "master," by striking out the word "the."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, on page 315, line 8, to change the number of the section from

462 to 461; in the same line after the word "All," to strike out "merchandise, baggage, and other articles" and to insert "merchandise and baggage," and at the beginning of line 10 to insert "or brought in," so as to make the paragraph read:

SEC. 461. Same—Inspection: All merchandise and baggage imported or brought in from any contiguous country, except as otherwise provided by law or by regulations of the Secretary of the Treasury, shall be unladen in the presence of and be inspected by a customs officer at the first port of entry at which the same shall arrive; and such officer may require the owner, or his agent, or other person having charge or possession of any trunk, traveling bag, sack, valise, or other container, or of any closed vehicle, to open the same for inspection, or to furnish a key or other means for opening the same.

The amendment was agreed to.

The next amendment was, on page 315, line 20, to change the number of the section from 463 to 462; in line 25, after the word "duty," to insert "or any article the importation of which is prohibited"; on page 316, before the word "found," to strike out "shall be" and to insert "is"; and in line 2, after the words "shall be," to strike out "forfeited to the United States" and to insert "subject to forfeiture," so as to make the paragraph read:

SEC. 462. Same—Forfeiture: If such owner, agent, or other person shall fail to comply with his demand, the officer shall retain such trunk, traveling bag, sack, valise, or other container or closed vehicle, and open the same, and, as soon thereafter as may be practicable, examine the contents, and if any article subject to duty or any article the importation of which is prohibited is found therein, the whole contents and the container or vehicle shall be subject to forfeiture.

The amendment was agreed to.

The next amendment was, on page 316, line 4, to change the number of the section from 464 to 463, and line 4, after the word "cars." to strike out "To avoid inspection at the port of arrival of railroad cars laden with merchandise destined to a port in the United States, any customs or consular officer of the United States stationed in a contiguous country may, upon application by the owner of the merchandise, or his agent, or the agent of the carrier, close and seal the car; whereupon the car may proceed to the port of destination for entry under such regulations and requirements as the Secretary of the Treasury shall prescribe, without entry or inspection at the frontier port, if the seals are found intact at the time of arrival at the said port," and in lieu thereof to insert:

To avoid unnecessary inspection of merchandise imported from a contiguous country at the first port of arrival, the master of the vessel or the person in charge of the vehicle in which such merchandise is imported may apply to the customs or consular officer of the United States stationed in the place from which such merchandise is shipped, and such officer may seal such vessel or vehicle. Any vessel or vehicle so sealed may proceed with such merchandise to the port of destination under such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

The next amendment was, on page 316, line 24, to change the number of the section from 465 to 464, and in line 24, after the word "delivery," to strike out "Any conductor or other person in charge of any such merchandise who shall fail to proceed promptly with the same to the port of destination and deliver the same, together with the manifest therefor, to the collector at the port of destination, shall be liable to a penalty equal to the value of the merchandise, if subject to duty, or to a penalty not to exceed $25 if the merchandise be free of duty," and to insert:

If the master of such vessel or the person in charge of any such vehicle fails to proceed with reasonable promptness to the port of destination and to deliver such vessel or vehicle to the proper officers of the customs, or fails to proceed in accordance with such regulations of the Secretary of the Treasury, or unlades such merchandise or any part thereof at other than such port of destination, or disposes of any such merchandise by sale or otherwise, he shall be guilty of a felony and upon conviction thereof shall be fined not more than $1,000 or imprisoned for not more than five years, or both; and any such vessel or vehicle, with its contents, shall be subject to forfeiture.

The amendment was agreed to.

The next amendment was, on page 317, line 18, to change the number of the section from 466 to 465, and in line 19, after the name "States," to strike out "enrolled and licensed" and to insert "documented," so as to make the paragraph read:

SEC. 465. Same—Supplies, etc.: The master of any vessel of the United States documented to engage in the foreign and coasting trade on the northern, northeastern, and northwestern frontiers shall, upon arrival from a foreign contiguous territory, file with the manifest of such vessel a detailed list of all supplies or other merchandise purchased in such foreign country for use or sale on such vessel, and also a statement of the cost of all repairs to and all equipment taken on board such vessel. The conductor or person in charge of any railway car arriving from a contiguous country shall file with the manifest of such car a detailed list of all supplies or other merchandise purchased in such foreign country for use in the United States. If any such supplies, merchandise, repairs, or equipment shall not be reported, the master, conductor, or other person having charge of such vessel or vehicle shall be liable to a fine of not less than $100 and not more than $500, or to imprisonment for not more than two years, or both.

The amendment was agreed to.

The next amendment was, on page 318, after line 10, to insert a new section as follows:

SEC. 466. That sections 3114 and 3115 of the Revised Statutes are amended to read as follows:

"SEC. 3114. The equipments, or any part thereof, including boats, purchased for, or the repair parts or materials to be used, or the expenses of repairs made in a foreign country upon a vessel documented under the laws of the United States to engage in the foreign or coasting trade, or a vessel intended to be employed in such trade, shall, on the first arrival of such vessel in any port of the United States, be liable to entry and the payment of an ad valorem duty of 50 per cent on the cost thereof in such foreign country; and if the owner or master of such vessel shall willfully and knowingly neglect or fail to report, make entry, and pay duties as herein required, such vessel, with her tackle, apparel, and furniture, shall be seized and forfeited.

"SEC. 3115. If the owner or master of such vessel, however, furnishes good and sufficient evidence that such vessel, while in the regular course of her voyage, was compelled, by stress of weather or other casualty, to put into such foreign port and purchase such equipments, or make such repairs, to secure the safety of the vessel to enable her to reach her port of destination, then the Secretary of the Treasury is authorized to remit or refund such duties, and such vessel shall not be liable to forfeiture, and no license or enrollment and license, or renewal of either, shall hereafter be issued to any such vessel until the collector to whom application is made for the same shall be satisfied, from the oath of the owner or master, that all such equipments and repairs made within the year immediately preceding such application have been duly accounted for under the provisions of this and the preceding sections, and the duties accruing thereon duly paid; and if such owner or master shall refuse to take such oath, or take it falsely, the vessel shall be seized and forfeited."

The amendment was agreed to.

Mr. McCORMICK. I ask unanimous consent to send to the desk and have printed and lie on the table two proposed amendments.

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). Without objection, the amendments will be received, printed, and lie on the table; and the present occupant of the chair makes a similar request.

The Secretary will state the next amendment of the committee.

The next amendment was, under "Part 3.—Ascertainment, collection, and recovery of duties," on page 319, after line 21, to strike out:

SEC. 481. Certified invoice when required: Except as provided in sections 488, 506, 552, and 553 of this act, no merchandise shall be admitted to entry without the production of an invoice therefor, certified and verified as hereinafter provided, unless the person making entry shall file an application, under oath, showing that he is unable to produce such invoice, and shall present with such application a pro forma invoice or statement of cost or value in the form of an invoice covering the merchandise so entered. If the collector of customs shall be satisfied that the failure to produce a certified invoice is due to causes beyond the control of the importer, he may permit entry on such pro forma invoice, provided a bond shall be given by the importer in a penalty to be fixed by the Secretary of the Treasury for the production, within six months, of a certified invoice and for the payment of any increased duties that may be found due upon liquidation of the entry and for the payment of the penalty so fixed as liquidated damages in case the invoice is not produced.

The amendment was agreed to.

The next amendment was, on page 320, after line 14, to strike out:

SEC. 482. Same—To be in triplicate and signed.—All certified invoices shall be made out in triplicate, shall name the port of entry in the United States, and shall be signed by the seller of the merchandise, if shipped in pursuance of a purchase, or by the manufacturer or owner of the merchandise, if shipped otherwise than in pursuance of a purchase: *Provided*, That such invoice may be signed by the agent of such seller, manufacturer, or owner, who shall state on the invoice the name of his principal.

The amendment was agreed to.

The next amendment was, on page 320, after line 23, to strike out:

SEC. 483. Same—Disposition.—The original of the invoice shall be filed in the office of the consular officer by whom it was certified, to be there kept until the Secretary of State shall authorize its destruction. The duplicate shall be delivered to the exporter to be forwarded to the consignee for use in making entry of the merchandise, and the triplicate shall be promptly transmitted by the consular officer to the collector of customs at the port of entry named in the invoice.

The amendment was agreed to.

The next amendment was, on page 321, after line 6, to strike out:

SEC. 484. Same contents: If the merchandise is to be shipped in pursuance of a purchase, the invoice must be made out in the currency of the purchase and must set forth the purchase price of the merchandise, and specify all charges thereon itemized by name and amount when known to the seller or shipper, or specify by name what charges (including commissions, insurance, freight, and cost of packing) are included therein when the amount for each charge is unknown to the seller or shipper. Such invoice shall also show when, where, and from whom the merchandise was purchased, the name of the purchaser, and shall separately itemize any drawbacks or bounties allowed upon the exportation of such merchandise. If the merchandise is to be shipped otherwise than in pursuance of a purchase, the invoice must be made out in the currency in which such or similar merchandise is ordinarily bought and sold or is freely offered for sale in the country or place from which the merchandise is shipped to the United States and must set forth the actual market value of the merchandise in such country

or at such place at the time of certification. All invoices must be made out in the weights or measures of the country or place from which the merchandise is exported to the United States or in weights and measures of the United States, and shall contain a correct, complete, and detailed description of the merchandise and of the packages or wrappings or other containers or coverings thereof, including the name by which each item is known to the trade in the country of exportation, and a statement of the grade or quality, and of the marks, numbers, or symbols by which such merchandise is sold by the seller or manufacturer thereof in the usual course of trade. When the merchandise has been purchased in different consular districts for shipment to the United States and is assembled for shipment and embraced in a single invoice certified at the shipping point, the invoice must have attached thereto the original bills or invoices received by the shipper, or extracts therefrom, showing the actual prices paid or to be paid for such merchandise.

The amendment was agreed to.

The next amendment was, on page 322, after line 19, to insert a new section, as follows:

SEC. 481. Contents of invoice: (a) That all invoices of merchandise to be imported into the United States shall set forth—

(1) The port of entry to which the merchandise is destined;

(2) The time when, the place where, and the person by whom and the person to whom the merchandise is sold or agreed to be sold, or if to be imported otherwise than in pursuance of a purchase, the place from which shipped, the time when and the person to whom and the person by whom it is shipped;

(3) A detailed description of the merchandise, including the name by which each item is known, the grade or quality, and the marks, numbers, or symbols under which sold by the seller or manufacturer to the trade in the country of exportation, together with the marks and numbers of the packages in which the merchandise is packed;

(4) The quantities in the weights and measures of the country or place from which the merchandise is shipped, or in the weights and measures of the United States;

(5) The purchase price of each item in the currency of the purchase, if the merchandise is shipped in pursuance of a purchase or an agreement to purchase;

(6) If the merchandise is shipped otherwise than in pursuance of a purchase or an agreement to purchase, the foreign value for each item, in the currency of the country of exportation or, in the absence of such value, the price in such currency that the manufacturer, seller, shipper, or owner would have received, or was willing to receive, for such merchandise if sold in the ordinary course of trade and in the usual wholesale quantities in the country of exportation;

(7) The kind of currency, whether gold, silver, or paper;

(8) All charges upon the merchandise, itemized by name and amount when known to the seller or shipper; or all charges by name (including commissions, insurance, freight, cases, containers, coverings, and cost of packing) included in the invoice prices when the amounts for such charges are unknown to the seller or shipper;

(9) All rebates, drawbacks, and bounties, separately itemized, allowed upon the exportation of the merchandise; and

(10) Any other facts deemed necessary to a proper appraisement, examination, and classification of the merchandise that the Secretary of the Treasury may require.

(b) If the merchandise is shipped to a person in the United States by a person other than the manufacturer, otherwise than by purchase, such person shall state on the invoice the time when, the place where, the person from whom such merchandise was purchased, and the price paid therefor in the currency of the purchase, stating whether gold, silver, or paper.

(c) When the merchandise has been purchased in different consular districts for shipment to the United States and is assembled for shipment and embraced in a single invoice which is produced for certification under the provisions of paragraph (2) of subdivision (a) of section 482 of this act, the invoice shall have attached thereto the original bills or invoices received by the shipper, or extracts therefrom, showing the actual prices paid or to be paid for such merchandise. The consular officer to whom the invoice is so produced for certification may require that any such original bill or invoice be certified by the consular officer for the district in which the merchandise was purchased.

Mr. McCUMBER. On page 323, line 21, I move to strike out "foreign."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On lines 21 and 22 I move to strike out "of the country of exportation" and insert in lieu thereof "in which the transactions are usually made."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 325, after line 9, to strike out:

SEC. 485. Same declarations. Every such invoice shall be produced to the consular officer of the United States for the consular district from which the merchandise is to be shipped and shall have indorsed thereon, when so produced, a declaration signed and sworn to before an officer authorized to administer oaths under the laws of the place where signed and sworn to, by the seller, manufacturer, or owner, or by his or their agent having knowledge of the facts. If the merchandise is to be shipped in pursuance of a purchase, such declaration shall state that the invoice is in all respects correct and true and was made at the place from which the merchandise is to be exported to the United States; that it contains the names of the seller and of the purchaser and of the port at which the merchandise is to be entered, the time when and the place where the merchandise was purchased, and the purchase price of the merchandise at the place of purchase, with all charges thereon itemized by name and amount when known to the seller (including commissions, insurance, freight, and cost of packing), and by name when the amount of each charge is unknown to the seller; that the currency in which the invoice is made out is the currency of purchase or agreement to purchase, and that no discounts, rebates, or commissions have been or are to be paid or received, except those stated in the invoice, and that all drawbacks or bounties received or to be received are shown therein. When the merchandise is shipped otherwise than in pursuance of a purchase, such declaration shall state that the invoice is in all respects correct and true and was made at the place from which the merchandise is shipped to the United States and shows the actual market value of the merchandise packed ready for shipment to the United States, and that such market value is the price at which the merchandise described in the invoice is freely offered for sale in the country from which exported. If such merchandise is not freely offered for sale to all purchasers in the principal markets of the country from which exported, or if the cost of production be stated instead of the market value, the declaration shall so state and shall set forth the terms and conditions under which the merchandise is shipped to the United States, and in such case the invoice shall be made out in the currency of the country or place from which the merchandise is imported into the United States.

And in lieu thereof to insert:

SEC. 482. Declarations accompanying certified invoices: (a) Every invoice covering merchandise exceeding $100 in value shall, at or before the time of the shipment of the merchandise, or as soon thereafter as the conditions will permit, be produced for certification to the consular officer of the United States—

(1) For the consular district in which the merchandise was manufactured or purchased, or from which it was to be delivered pursuant to contract;

(2) For the consular district in which the merchandise is assembled and repacked for shipment to the United States, if it has been purchased in different consular districts.

(b) Such invoices shall have indorsed thereon, when so produced, a verified declaration, in a form prescribed by the Secretary of the Treasury, stating whether the merchandise is sold or agreed to be sold, or whether it is shipped otherwise than in pursuance of a purchase or an agreement to purchase, that there is no other invoice differing from the invoice so produced, and that all the statements contained in such invoice and in such declaration are true and correct.

(c) Every certified invoice shall be made out in triplicate and shall be signed by the seller or shipper, or the agent of either. Where any such invoice is signed by an agent, he shall state thereon the name of his principal.

The amendment was agreed to.

The next amendment was, on page 328, after line 4, to strike out:

SEC. 486. Same certification: The consular officer before whom the declaration above provided for was made shall certify on the invoice that he is satisfied that the person signing the declaration was the identical person whom he represented himself to be and that the declaration was signed and sworn to at the time and place indicated. If such consular officer knows any material statements in the invoice to be untrue he shall refuse to certify the same and shall so notify the collector of customs at the port to which such merchandise is destined for entry. If in doubt as to the truth or correctness of any invoice, he may certify the same and transmit to the collector of customs, as marginal notations on the triplicate copy or otherwise, a statement of such information as he may have in the matter.

The amendment was agreed to.

The next amendment was, on page 328, after line 18, to insert:

(d) Such invoices shall be certified in accordance with the provisions of existing law.

(e) The original of the invoice shall be filed in the office of the consular officer by whom it was certified, to be there kept until the Secretary of State authorizes its destruction. The duplicate shall be delivered to the exporter, to be forwarded to the consignee for use in making entry of the merchandise, and the triplicate shall be promptly transmitted by the consular officer to the collector of customs at the port of entry named in the invoice.

The amendment was agreed to.

The next amendment was, on page 329, at the beginning of line 4, to strike out "SEC. 487. Same." and to insert (f), so as to read:

(f) When merchandise is to be shipped from a place so remote from an American consulate as to render impracticable certification of the invoice by an American consular officer, such invoice may be certified by a consular officer of a nation at the time in amity with the United States, or if there be no such consular officer available such invoice shall be executed before a notary public or other officer having authority to administer oaths and having an official seal: *Provided*, That invoices for merchandise shipped to the United States from the Philippine Islands or any of its other possessions may be certified by the collector of customs or the person acting as such, or by his deputy.

The amendment was agreed to.

The next amendment was, on page 329, after line 15, to strike out:

SEC. 488. Cost of production: When necessary to the appraisement of any merchandise, the collector may require a statement signed and verified, as in the case of a declaration to the invoice, by the manufacturer or producer showing the cost of production of the merchandise, including the cost of materials and of all manipulation, fabrication, or other manufacture, and of general expenses thereof, together with the expense of packing such merchandise ready for shipment, and all other costs and charges, including packages. Such statement may be accepted in lieu of the certified invoice hereinbefore provided for, or may be required in addition to such invoice, in the discretion of the collector of customs at the port of entry. In like manner the collector may require upon the entry of merchandise consigned for sale by or on account of a person other than the manufacturer a statement signed by the consignor showing the time when, the place where, and from whom he purchased the merchandise, and in detail the price paid therefor in the currency of the purchase. All such statements shall be made in triplicate and shall bear the attestation of the consular officer of the United States resident within the consular district from which the merchandise was shipped, one copy thereof to be delivered to the person making the statement, one copy to be transmitted with the triplicate invoice of the merchandise to the collector at the port in the United States to which the merchandise is consigned, and the remaining copy to be filed in the consulate.

The amendment was agreed to.

The next amendment was, on page 330, line 20, after the word "this," to strike out "act" and to insert "title," so as to read:

SEC. 483. Ownership for entry: All merchandise imported into the United States shall, for the purposes of this title, be held to be the property of the person to whom the same is consigned; and the holder of a bill of lading duly indorsed by the consignee therein named, or, if consigned to order, by the consignor, shall be deemed the consignee thereof. The underwriters of abandoned merchandise and the salvors of merchandise saved from a wreck at sea or on or along a coast of the United States may, for such purposes, be regarded as the consignees.

The amendment was agreed to.

The next amendment was, on page 331, after line 2, to strike out:

SEC. 490. Entry: The consignee of any imported merchandise, either in person or by an agent authorized by him in writing, shall make entry thereof at the customhouse within 48 hours, excluding Sundays and holidays, after the entry of the importing vessel or report of the vehicle or after the arrival at the port of destination of merchandise transported in bond, unless a longer time shall be expressly allowed therefor by the collector of customs, and in his entry shall specify the name of the importing vessel, the port or place from which such merchandise is imported, the date of arrival, the marks, numbers, and character of the packages or containers of such merchandise, and a description of the merchandise in terms of the tariff laws of the United States, and the value of each item or lot according to its dutiable classification, together with all costs, charges, and expenses included in such value separately itemized. Such entry shall be signed by the person making the same, and shall be accompanied with the invoice or invoices covering such merchandise in the same condition in which it or they were received, with the bills of lading for the same, and such certificates and documents as may be required by law or by the customs regulations to be filed upon the entry of imported merchandise: *Provided*, That the consignee named in the manifest of the importing vessel or vehicle, or in the certified invoice for any merchandise, may make entry thereof, without the production of a bill of lading, upon giving a bond in a penal sum equal to double the estimated value of such merchandise, with sureties to be approved by the collector of customs, conditioned for the production, within 30 days thereafter, of the bill of lading covering the merchandise.

And in lieu thereof to insert:

SEC. 484. Entry: (a) Except as provided in sections 490, 498, 552, and 553 and in subsection (d) of section 315 of this act, the consignee of imported merchandise shall make entry therefor either in person or by an agent authorized by him in writing under such regulations as the Secretary of the Treasury may prescribe. Such entry shall be made at the customhouse within 48 hours, exclusive of Sundays and holidays, after the entry of the importing vessel or report of the vehicle, or after the arrival at the port of destination in the case of merchandise transported in bond, unless the collector authorizes in writing a longer time.

(b) No merchandise shall be admitted to entry under the provisions of this section without the production of a certified invoice therefor, except that entry may be permitted if—

(1) The collector is satisfied that the failure to produce such invoice is due to causes beyond the control of the person making entry;

(2) Such person makes a declaration in writing that he is unable to produce such invoice and (A) files therewith a seller's or shipper's invoice, or (B) if he is not in possession of a seller's or shipper's invoice files therewith a statement of the value, or the price paid, in the form of an invoice; and

(3) Such person gives a bond in a penal sum to be fixed by the Secretary of the Treasury for (A) the production of such certified invoice within six months, (B) the payment of any increased duties found due upon the liquidation of the entry, and (C) the payment of the penal sum so fixed as liquidated damages in the event that such invoice is not so produced or such increased duties are not so paid.

(c) The consignee shall produce the bill of lading at the time of making entry. If the collector is satisfied that no bill of lading has been issued, the shipping receipt or other evidence satisfactory to the collector may be accepted in lieu thereof.

(d) Such entry shall be signed by the consignee, or his agent, and shall set forth such facts in regard to the importation as the Secretary of the Treasury may require for the purpose of assessing duties and to secure a proper examination, inspection, appraisement, and liquidation, and shall be accompanied by such certificates and documents as are required by law and regulations promulgated thereunder.

(e) The Secretary of the Treasury and the Secretary of Commerce are authorized and directed to establish from time to time for statistical purposes an enumeration of articles in such detail as in their judgment may be necessary, comprehending all merchandise imported into the United States, and as a part of the entry there shall be attached thereto or included therein an accurate statement specifying, in terms of such detailed enumeration, the kinds and quantities of all merchandise imported and the value of the total quantity of each kind of article.

(f) If any of the certificates or documents necessary to make entry of any part of merchandise arriving on one vessel or vehicle and consigned to one consignee have not arrived, such part may be entered subsequently, and notation of the packages or cases to be omitted from the original entry shall be made thereon. One or more packages arriving on one vessel or vehicle addressed for delivery to one person and imported in another package containing packages addressed for delivery to other persons may be separately entered, under such rules and regulations as the Secretary of the Treasury may prescribe. All other merchandise arriving on one vessel or vehicle and consigned to one consignee shall be included in one entry.

(g) Under such regulations as the Secretary of the Treasury may prescribe, the collector or the appraiser may require a verified statement from the manufacturer or producer showing the cost of production of the imported merchandise, when necessary to the appraisement of such merchandise.

Mr. McCUMBER. On page 333, after the word "for" in line 7, I move to strike out all of the matter down to and including the period in line 12, and insert in lieu thereof the following:

The production of such certified invoice within six months, and the payment of the penal sum so fixed as liquidated damages in the event such invoice is not so produced.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 333, I also move to strike out all of lines 13 to 17, inclusive, and to insert in lieu thereof the following:

(c) The consignee shall produce the bill of lading at the time of making entry, except that—

(1) If the collector is satisfied that no bill of lading has been issued, the shipping receipt or other evidence satisfactory to the collector may be accepted in lieu thereof; and

(2) The collector is authorized to permit entry and to release merchandise from customs custody without the production of the bill of lading if the person making such entry gives a bond satisfactory to the collector, in a sum equal to not less than one and one-half times the invoice value of the merchandise, to produce such bill of lading, to relieve the collector of all liability, to indemnify the collector against loss, to defend every action brought upon a claim for loss or damage, by reason of such release from customs custody or a failure to produce such bill of lading and to entitle any person injured by reason of such release from customs custody to sue on such bond in his own name, without making the collector a party thereto. Any person so injured by such release may sue on such bond to recover any damages so sustained by him.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On line 23, page 333, after the word "such," I move to insert "invoices, bills of lading."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 335, after line 4, to strike out:

SEC. 491. Declaration: There shall be filed with every entry of imported merchandise exceeding $100 in value a declaration, upon a form to be prescribed by the Secretary of the Treasury, which shall be signed by the owner, importer, consignee, or his agent under regulations prescribed by the Secretary of the Treasury: *Provided*, That the Secretary of the Treasury may make regulations by which books, magazines, and other periodicals published and imported in successive parts, numbers, or volumes, and entitled to be imported free of duty, shall require but one declaration for the entire series. The Secretary of the Treasury and the Secretary of Commerce are hereby authorized and directed to establish from time to time for statistical purposes a list or enumeration of articles in such detail as in their judgment may be necessary, comprehending all merchandise imported into the United States, and as a part of the entry herein provided for there shall be either attached thereto or included therein an accurate statement specifying, in terms of the said detailed list or enumeration, the kinds and quantities of all merchandise imported and the value of the total quantity of each kind of article.

The amendment was agreed to.

The next amendment was, at the top of page 336, to strike out:

SEC. 492. Owner's declaration: Whenever any entry covering merchandise subject to duty and valued at more than $100 is made by an agent or person other than the person to whom such merchandise actually belongs or is ultimately consigned, the collector of customs shall require a bond to be given, in a penalty to be fixed by the Secretary of the Treasury, for the production of a declaration of the actual owner or ultimate consignee respecting the merchandise in a form prescribed by the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 336, after line 9, to insert:

SEC. 485. Declaration: (a) Every consignee making an entry under the provisions of section 484 of this act shall make and file therewith, in a form to be prescribed by the Secretary of the Treasury, a declaration under oath, stating—

(1) Whether the merchandise is imported in pursuance of a purchase or an agreement to purchase, or whether it is imported otherwise than in pursuance of a purchase or agreement to purchase;

(2) That the prices set forth in the invoice are true, in the case of merchandise purchased or agreed to be purchased; or in the case of merchandise secured otherwise than by purchase or agreement to purchase, that the statements in such invoice as to foreign value are true to the best of his knowledge and belief;

(3) That all other statements in the invoice or other documents filed with the entry, or in the entry itself, are true and correct; and

(4) That he will produce at once to the collector any invoice paper, letter, document, or information received showing that any such prices or statements are not true or correct.

(b) The Secretary of the Treasury is authorized to prescribe regulations for one declaration in the case of books, magazines, newspapers, and periodicals published and imported in successive parts, numbers, or volumes, and entitled to free entry.

(c) In the event that an entry is made by an agent under the provisions of section 484 of this act, and such agent is not in possession of such declaration of the consignee, such agent shall give a bond, in a form and of a penal sum prescribed by the Secretary of the Treasury, to produce such declaration.

(d) A consignee shall not be liable for any additional or increased duties if (1) he declares at the time of entry that he is not the actual owner of the merchandise, (2) he furnishes the name and address of such owner, and (3) within 90 days from the date of entry he produces a declaration of such owner and a bond of such owner conditioned that he will pay all additional and increased duties, under such regulations as the Secretary of the Treasury may prescribe. Such owner shall possess all the rights of a consignee.

(e) The Secretary of the Treasury shall prescribe separate forms for the declaration in the case of merchandise which is imported in pursuance of a purchase or agreement to purchase and merchandise which is imported otherwise than in pursuance of a purchase or agreement to purchase.

Mr. McCUMBER. On page 337, line 20, I move to strike out "and a bond of such owner."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 338, line 4, before the word "whenever," to insert "(f)"; in the same line, after the word "is," to strike out "ultimately"; and at the end of line 8, to strike out the word "ultimate," so as to read:

(f) Whenever such merchandise is consigned to a deceased person, or to an insolvent person who has assigned the same for the benefit of his creditors, the executor or administrator, or the assignee of such person or receiver or trustee in bankruptcy, shall be considered as the consignee; when consigned to a partnership the declaration of one of the partners only shall be required, and when consigned to a corporation such declaration may be made by any officer of such corporation or by any other person specifically authorized by the board of directors of such corporation to make the same.

The amendment was agreed to.

The next amendment was, on page 338, after line 14, to strike out:

SEC. 493. Scope of entry: All merchandise arriving on one vessel and consigned to one consignee shall be included in one entry: *Provided*, That if the documents necessary to make entry of any part of such merchandise shall not have been received, such part may be entered subsequently, and notation of the packages or cases to be omitted from the original entry shall be made thereon: *And provided further*, That one or more packages addressed for delivery to one person and imported in another package containing packages addressed for delivery to other persons may be separately entered, under regulations prescribed by the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 339, line 3, after the word "appraisal," to strike out "or for which the importer or consignee desires to make entry but is not in possession of the invoices and other documents required by law or regulations to be produced upon entry, the importer or" and to insert "the"; in line 14, after the word "collector," to strike out "of customs"; in line 17, after the word "collector," to strike out "of customs"; and in line 20, after the name "States," to strike out the comma and "and further conditions that the obligors shall pay to the collector of customs any increased or additional duties which may be found due upon final liquidation of such entry," so as to read:

SEC. 486. Bond: Upon entry of any merchandise, none of which or a part only of which is sent to the public stores for inspection, examination, or appraisal, the consignee shall give a bond, conditioned that he will produce all invoices, declarations, and other documents or papers required by law or regulations made in pursuance thereof upon the entry of imported merchandise; and that he will comply with all the requirements of the laws or regulations made in pursuance thereof relating to the importation and admission of such merchandise and will return to the collector, when demanded by such collector, not later than 10 days after the appraiser's report, such of the merchandise as was not sent to the public stores, and also will return to the collector, on demand by him, any and all merchandise found not to comply with the law and regulations governing its admission into the commerce of the United States. Such bond shall be given in a form and in a penalty to be prescribed by the Secretary of the Treasury, the penalty thereof to be paid as liquidated damages.

The amendment was agreed to.

The next amendment was, on page 340, line 1, after the word "That," to strike out "such bond may be canceled, after payment of all duties found due upon final liquidation, under such conditions as the Secretary of the Treasury may direct: *And provided further*, That"; and in line 6, after the word "any," to strike out "importer or," so as to make the proviso read:

Provided, That instead of a bond upon each entry the Secretary of the Treasury may prescribe a bond to be taken from any consignee to cover all importations entered by him within a period of one year from the date thereof.

The amendment was agreed to.

The next amendment was, on page 340, after line 8, to insert a new section as follows:

SEC. 487. The consignee, or his agent, may, at the time entry is made or at any time before the invoice or the merchandise has come under the observation of the appraiser, make such additions in the entry to or such deductions from the cost or value given in the invoice as in his opinion may raise or lower the same to the value of such merchandise.

Mr. McCUMBER. On page 340, line 12, after the word "appraiser," I move to insert "for the purpose of appraisement."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 340, after line 15, to insert a new section as follows:

SEC. 488. The collector within whose district any merchandise is entered shall cause such merchandise to be appraised.

The amendment was agreed to.

Mr. McCUMBER. On page 341, line 1, I move to strike out the word "or" and insert in lieu thereof the word "for."

The PRESIDING OFFICER. There is a misprint there, and without objection the letter "f" will be added.

The next amendment was, on page 341, line 2, after the word "entry," to strike out the colon and "*Provided*, That such" and to insert "Such"; in line 11, after the word "duties," to insert "shall not be construed to be penal and"; and in line 13, after the word "except," to insert "in the case of a manifest clerical error," so as to read:

Such additional duty shall apply only to the particular article or articles in each invoice that are so advanced in value upon final appraisement and shall not be imposed upon any article upon which the amount of duty imposed by law on account of the final appraised value does not exceed the amount of duty that would be imposed if the final appraised value did not exceed the entered value, and shall be limited to 75 per cent of the final appraised value of such article or articles. Such additional duties shall not be construed to be penal and shall not be remitted nor payment thereof in any way avoided, except in the case of a manifest clerical error, etc.

Mr. McCUMBER. On page 341, line 13, I move to insert a comma after the word "error."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the committee was, on page 341, in line 14, after the word "or," to insert "in any case"; and in line 15, after the word "Appraisers," to insert "upon a petition filed and supported by satisfactory evidence under such rules as the board may prescribe," so as to make the paragraph read:

SEC. 489. Additional duties: If the final appraised value of any article of imported merchandise which is subject to an ad valorem rate of duty or to a duty based upon or regulated in any manner by the value thereof shall exceed the entered value, there shall be levied, collected, and paid, in addition to the duties imposed by law on such merchandise, an additional duty of 1 per cent of the total final appraised value thereof for each 1 per cent that such final appraised value exceeds the value declared in the entry. Such additional duty shall apply only to the particular article or articles in each invoice that are so advanced in value upon final appraisement and shall not be imposed upon any article upon which the amount of duty imposed by law on account of the final appraised value does not exceed the amount of duty that would be imposed if the final appraised value did not exceed the entered value, and shall be limited to 75 per cent of the final appraised value of such article or articles. Such additional duties shall not be construed to be penal and shall not be remitted nor payment thereof in any way avoided, except in the case of a manifest clerical error upon the order of the Secretary of the Treasury, or in any case upon the finding of the Board of General Appraisers, upon a petition filed and supported by satisfactory evidence under such rules as the board may prescribe, that the entry of the merchandise at a less value than that returned upon final appraisement was without any intention to defraud the revenue of the United States or to conceal or misrepresent the facts of the case or to deceive the appraiser as to the value of the merchandise.

The amendment was agreed to.

Mr. McCUMBER. On page 341, after the period, in line 22, I move on behalf of the committee to insert:

If the appraised value of any merchandise exceeds the value declared in the entry by more than 100 per cent, such entry shall be presumptively fraudulent, and the collector shall seize such merchandise and proceed as in case of forfeiture for violation of the customs laws; and in any legal proceeding other than a criminal prosecution that may result from such seizure, the undervaluation as shown by the appraisal shall be presumptive evidence of fraud, and the burden of proof shall be on the claimant to rebut the same, and forfeiture shall be adjudged unless he rebuts such presumption of fraud by sufficient evidence.

The amendment was agreed to.

The next amendment was, on page 342, line 3, after the word "drawback," to strike out the comma and "except as above prescribed"; at the beginning of line 5, to strike out "duties" and to insert "merchandise"; in line 7, after the words "with a," to strike out "pro forma" and to insert "seller's or shipper's"; in line 15, after the word "contention," to strike out "in said pending cases"; at the beginning of line 20, to strike out "part" and to insert "part, and the collector shall liquidate the entry in accordance with the final appraisement"; and, in line 21, to strike out "after exportation and before entry for consumption or warehouse of any imported merchandise the owner, consignee, or agent may file with the collector a tentative entry thereof, together with a copy of the invoice or statement in the form of an invoice, accompanied with any evidence he may have tending to establish value, and whenever practicable verified samples of the merchandise, whereupon the collector shall with the utmost expedition, by the case permitted, cause an advisory appraisement, with all rights of appeal provided by law in appraisement cases, to be made thereupon in aid of entry, the appraising officer therein proceeding as in all other cases by law provided: *Provided*, That in the absence of fraud, concealment, or misrepresentation, when merchandise is entered in accordance with any such advisory appraisement, no penalties or other than ascertained increased duties shall be assessed for any variance between said entered value and the final appraised value of such merchandise: *Provided further*, That all declarations and statements (other than statements in the form of invoices) required by law to be presented and filed upon entry, if filed for entry upon advisory appraisement, may be therein referred to as part thereof, and thereupon shall be deemed and become such and, to the extent the legal requirements relating thereto are complied with, shall be held sufficient," so as to make the paragraph read:

Upon the making of such order or finding, the additional duties shall be remitted or refunded, wholly or in part, and the entry shall be liquidated or reliquidated accordingly. Such additional duties shall not be refunded in case of exportation of the merchandise, nor shall they be subject to the benefit of drawback. All additional duties, penalties, or forfeitures applicable to merchandise entered in connection with a certi-

fied invoice shall be alike applicable to merchandise entered in connection with a seller's or shipper's invoice or statement in the form of an invoice. Duties shall not, however, be assessed upon an amount less than the entered value, except in a case where the importer certifies at the time of entry that the entered value is higher than the value as defined in this act, and that the goods are so entered in order to meet advances by the appraiser in similar cases then pending on appeal for reappraisement or re-reappraisement, and the importer's contention shall subsequently be sustained, wholly or in part, by a final decision on reappraisement or re-reappraisement, and it shall appear that the action of the importer on entry was so taken in good faith, after due diligence and inquiry on his part, and the collector shall liquidate the entry in accordance with the final appraisement.

The amendment was agreed to.

The next amendment was, on page 344, line 1, after the word "incomplete," to strike out "for want of an invoice" and to insert "because of"; in line 2, after the word "duties," to insert "or whenever, in the opinion of the collector, entry of such merchandise can not be made for want of proper documents"; at the beginning of line 5, to strike out "of customs shall have good reason to believe" and to insert "believes"; in line 7, after the word "send," to strike out "the same" and to insert "it"; in line 9, after the word "the," to strike out "owner or"; in the same line, after the word "entry," to strike out "therefor shall have been" and to insert "is"; in line 10, after the word "and," to strike out "the invoices or other" and to insert "the proper"; in line 11, after the word "documents," to strike out "required by law or regulations shall have been" and to insert "are"; in line 12, after the word "bond," to insert "given"; and at the end of line 13, to strike out "given," so as to make the section read:

SEC. 490. Incomplete entry: Whenever entry of any imported merchandise is not made within the time provided by law or the regulations prescribed by the Secretary of the Treasury, or whenever entry of such merchandise is incomplete, because of failure to pay the estimated duties, or whenever, in the opinion of the collector, entry of such merchandise can not be made for want of proper documents or other cause, or whenever the collector believes that any merchandise is not correctly and legally invoiced, he shall take the merchandise into his custody and send it to a bonded warehouse or public store, to be held at the risk and expense of the consignee until entry is made or completed and the proper documents are produced, or a bond given for their production.

The amendment was agreed to.

The next amendment was, on page 344, line 15, after the word "collector," to strike out the comma and "under the preceding section or other provisions of law,"; and in line 20, after the word "collector," to strike out "of customs," so as to make the section read:

SEC. 491. Unclaimed goods: If any merchandise of which possession has been taken by the collector shall remain in bonded warehouse or public store for one year without entry thereof having been made and the duties and charges thereon paid, such merchandise shall be appraised by the appraiser of merchandise and sold by the collector at public auction as abandoned to the Government, under such regulations as the Secretary of the Treasury shall prescribe. All gunpowder and other explosive substances and merchandise liable to depreciation in value by damage, leakage, or other cause to such extent that the proceeds of sale thereof may be insufficient to pay the duties, storage, and other charges, if permitted to remain in public store or bonded warehouse for a period of one year, may be sold forthwith, under such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

The next amendment was, on page 345, line 6, after the word "forfeited," to strike out "Any" and to insert "Except as provided in section 3369 of the Revised Statutes, as amended, any," so as to make the section read:

SEC. 492. Merchandise abandoned or forfeited: Except as provided in section 3369 of the Revised Statutes, as amended, any merchandise abandoned or forfeited to the Government under the preceding or any other provision of the customs laws, which is subject to internal-revenue tax and which the collector shall be satisfied will not sell for a sufficient amount to pay such taxes, shall be forthwith destroyed under regulations to be prescribed by the Secretary of the Treasury, instead of being sold at auction.

The amendment was agreed to.

The next amendment was, on page 345, line 15, after the word "surplus," to strike out the comma and "if any there be,"; in line 16, after the word "of" where it occurs the second time, to strike out "such," and in the same line, after the word "sales," to insert "under section 491 of this act"; and in line 20, after the word "collector," to strike out "of customs," so as to make the section read:

SEC. 493. Proceeds of sale: The surplus of the proceeds of sales under section 491 of this act, after the payment of storage charges, expenses, duties, and the satisfaction of any lien for freight, charges, or contribution in general average, shall be deposited by the collector in the Treasury of the United States, if claim therefor shall not be filed with the collector within 10 days from the date of sale, and the sale of such merchandise shall exonerate the master of any vessel in which the merchandise was imported from all claims of the owner thereof, who shall, nevertheless, on due proof of his interest, be entitled to receive from the Treasury the amount of any surplus of the proceeds of sale.

The amendment was agreed to.

The next amendment was, on page 346, line 7, after the word "the," to strike out "owner, agent, or," so as to make the section read:

SEC. 494. Expense of weighing, etc.: In all cases in which the invoice or entry does not state the weight, quantity, or measure of the merchandise the expense of ascertaining the same shall be collected from the consignee before its release from customs custody.

The amendment was agreed to.

The next amendment was, on page 346, after line 17, to strike out:

SEC. 502. Baggage—Declaration: In order to ascertain what articles contained in the baggage or carried on the person or persons arriving in the United States are subject to the payment of duty the collector of customs may require a declaration and entry thereof, under regulations prescribed by the Secretary of the Treasury, to be made by the owner or his agent, in which all articles intended for sale or for commercial use or belonging to or intended for other persons, and in the case of returning residents of the United States all articles obtained by them while abroad shall be particularly described, and the price paid for each article, if purchased, or the foreign market value thereof, if obtained otherwise than by purchase, shall be stated.

The amendment was agreed to.

The next amendment was, on page 347, after line 5, to strike out:

SEC. 503. Same bond: Whenever the declaration and entry provided for in the preceding section shall include any article belonging to any other person, the collector of customs may require a bond in a form prescribed by the Secretary of the Treasury, to be given by the person making such declaration in a sum equal to the estimated duties on like articles when subject to duty, conditioned for the production to the collector of customs within one year thereafter of a declaration by the owner of the articles.

The amendment was agreed to.

The next amendment was, on page 347, line 15, before the word "examination," to strike out "same"; in line 16, after the word "collector," to strike out "of customs"; in line 18, after the word "articles," to insert "are"; in the same line, after the word "therein," to strike out "are," and to insert "and whether"; in line 19, after the word "duty," to insert "free of duty, or prohibited"; and in line 20, after the word "therefor," to strike out "shall have" and to insert "has"; so as to make the section read:

SEC. 496. Examination of baggage: The collector may cause an examination to be made of the baggage of any person arriving in the United States in order to ascertain what articles are contained therein, and whether subject to duty, free of duty, or prohibited notwithstanding a declaration and entry therefor has been made.

The amendment was agreed to.

The next amendment was, on page 347, line 22, before the word "forfeiture," to strike out "same"; in the same line, after the word "any," to strike out "such"; in line 23, after the word "made," to strike out "or" and to insert "and"; at the beginning of line 24, to strike out "subsequently and"; in line 25, before the word "mentioned," to insert "not"; on page 348, line 1, to strike out "nor mentioned by such person to the customs officer before examination of the baggage was begun," and to insert "or orally"; in line 3, after the word "if," to insert "written"; in line 4, after the word "be," to strike out "forfeited" and to insert "subject to forfeiture"; and in line 5, after the words "to a," to strike out "further"; so as to make the section read:

SEC. 497. Forfeiture: Any article not included in the declaration and entry as made, and, before examination of the baggage was begun, not mentioned in writing by such person, if written declaration and entry was required, or orally if written declaration and entry was not required, shall be subject to forfeiture, and such person shall be liable to a penalty equal to the value of such article.

The amendment was agreed to.

The next amendment was, on page 348, after line 6, to strike out:

SEC. 506. Merchandise treated as not imported: Merchandise not exceeding $100 in value, merchandise damaged by fire or marine casualty on the voyage of importation, articles imported through the mails, articles recovered from a wrecked or stranded vessel, personal and household effects used abroad, not imported in pursuance of a purchase or agreement for purchase and not intended for sale, articles sent by persons in foreign countries as gifts or presents to persons in the United States, may be entered under such conditions and regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

The next amendment was, on page 348, after line 17, to insert a new section as follows:

SEC. 498. Entry under regulations: (a) The Secretary of the Treasury is authorized to prescribe rules and regulations for the declaration and entry of—

(1) Merchandise not exceeding $100 in value, including such merchandise imported through the mails;

(2) Merchandise damaged by fire or marine casualty on the voyage of importation;

(3) Merchandise recovered from a wrecked or stranded vessel;

(4) Household effects used abroad and personal effects, not imported in pursuance of a purchase or agreement for purchase and not intended for sale;

(5) Articles sent by persons in foreign countries as gifts to persons in the United States;

(6) Articles carried on the person or contained in the baggage of a person arriving in the United States;
(7) Tools of trade of a person arriving in the United States;
(8) Personal effects of citizens of the United States who have died in a foreign country;
(9) Merchandise within the provisions of sections 465 and 466 of this act at the first port of arrival; and
(10) Merchandise when in the opinion of the Secretary of the Treasury the value thereof can not be declared.
(b) The Secretary of the Treasury is authorized to include in such rules and regulations any of the provisions of section 484 or 485 of this act.

Mr. McCUMBER. On page 349, line 13, I move to strike out the word "and" where it appears at the end of the line.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 349, line 15, I move to strike out the period and insert in lieu thereof a semicolon and the word "and."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 349, after line 15, I move to insert:

(11) Merchandise within the provisions of the act entitled "An act to expedite the delivery of imported parcels and packages, not exceeding $500 in value," approved June 8, 1896.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 349, line 19, to strike out "Appraisement" and to insert "Examination of merchandise"; in line 20, before the word "merchandise," to strike out "No imported" and to insert "Imported"; in line 22, after the word "shall," to insert "not"; at the beginning of line 24, to strike out "the same" and to insert "it"; on page 350, line 2, after the word "the" where it occurs the second time, to strike out "statutes" and to insert "laws"; in line 3, after the word "collector," to strike out "of customs"; at the beginning of line 8, to insert "the Secretary of the Treasury shall by regulation prescribe the number of packages or the quantity of merchandise to be so designated, but not less than one package out of each invoice and not less than one package of each class or kind of merchandise. The collector or the appraiser may require such additional packages or quantities as either of them may deem necessary"; in line 14, after the word "package," to strike out "be" and to insert "is"; in line 16, after the word "he," to strike out "shall report" and to insert "reports"; in line 20, after the word "appraiser," to strike out "shall report" and to insert "reports"; in line 23, after the word "deficiency," to strike out "shall be" and to insert "is"; and in line 25, after the word "package," to insert "by customs officers," so as to make the section read:

SEC. 499. Examination of merchandise: Imported merchandise required by law or regulations made in pursuance thereof to be inspected, examined, or appraised, shall not be delivered from customs custody, except as otherwise provided in this act, until it has been inspected, examined, or appraised and is reported by the appraiser to have been truly and correctly invoiced and found to comply with the requirements of the laws of the United States. The collector shall designate the packages or quantities covered by any invoice or entry which are to be opened and examined for the purpose of appraisement or otherwise and shall order such packages or quantities to be sent to the public stores or other places for such purpose. The Secretary of the Treasury shall by regulation prescribe the number of packages or the quantity of merchandise to be so designated, but not less than one package out of each invoice and not less than one package of each class or kind of merchandise. The collector or the appraiser may require such additional packages or quantities as either of them may deem necessary. If any package is found by the appraiser to contain any article not specified in the invoice and he reports to the collector that in his opinion such article was omitted from the invoice with fraudulent intent on the part of the seller, shipper, owner, or agent, the contents of the entire package in which such article is found shall be liable to seizure, but if the appraiser reports that no such fraudulent intent is apparent then the value of said article shall be added to the entry and the duties thereon paid accordingly. If a deficiency is found in quantity, weight, or measure in the examination of any package by customs officers, report thereof shall be made to the collector, who shall make allowance therefor in the liquidation of duties.

The amendment was agreed to.

Mr. McCUMBER. On page 350, I move to strike out all of the matter, beginning with line 8, down to and including the period on line 12, and to insert in lieu thereof the following:

Not less than 1 package of every invoice and not less than 1 package of every 10 packages of merchandise shall be so designated unless the Secretary of the Treasury, from the character and description of the merchandise, is of the opinion that the examination of a less proportion of packages will amply protect the revenue and by special regulation permit a less number of packages to be examined.

The amendment was agreed to.

Mr. McCUMBER. On page 350, line 25, I move to strike out the words "by customs officers."

The amendment was agreed to.

The next amendment was, on page 351, after line 2, to strike out—

SEC. 508. Same—Appraiser's report: It shall be the duty of the appraiser, in person or by such of his subordinates as may be designated, by or under regulations prescribed by the Secretary of the Treasury, to examine all merchandise ordered or designated by the collector for examination, to compare the same with the invoices received therefor, and when the merchandise is subject to an ad valorem duty or to a duty based upon or regulated in any manner by its value, to use all reasonable ways and means in his power to estimate, determine, or ascertain and to report to the collector the value of such merchandise in its condition as imported and the number of yards or other quantity. The appraiser shall also in his report describe in terms of the tariff laws all merchandise designated for examination in order that the collector may determine the dutiable classification thereof, including a finding as to the component material of chief value in such merchandise if necessary to the classification thereof.

And in lieu thereof to insert:

SEC. 500. Duties of the appraiser, assistant appraiser, and examiner: (a) It shall be the duty of the appraiser under such rules and regulations as the Secretary of the Treasury may prescribe—
(1) To appraise the merchandise and the number of yards, parcels, or quantities, by ascertaining or estimating the value thereof by all reasonable ways and means in his power, irrespective of any statement of cost or cost of production in any invoice, affidavit, declaration, or other document;
(2) To ascertain the number of yards, parcels, or quantities of the merchandise ordered or designated for examination;
(3) To ascertain whether the merchandise has been truly and correctly invoiced;
(4) To describe the merchandise in order that the collector may determine the dutiable classification thereof; and
(5) To report his decisions to the collector.
(b) At ports where there are assistant appraisers provided for by law the appraiser shall have power to review and to revise and correct the reports of such assistant appraisers.
(c) It shall be the duty of an assistant appraiser—
(1) To examine and inspect such merchandise as the appraiser may direct, and to report to him the value thereof;
(2) To revise and correct the reports and to supervise and direct the work of such examiners and other employees as the appraiser may designate; and
(3) To assist the appraiser, under such regulations as the Secretary of the Treasury or the appraiser may prescribe.
(d) It shall be the duty of an examiner to examine and inspect the merchandise and report the value and such other facts as the appraiser may require in his appraisement or report, and to perform such other duties as may be prescribed by rules and regulations of the Secretary of the Treasury or the appraiser.
(e) The Secretary of the Treasury is authorized to designate an officer of the customs as acting appraiser at a port where there is no appraiser. Such acting appraiser shall take the oath, perform all the duties, and possess all the powers of an appraiser.

Mr. McCUMBER. On page 351 I move to strike out all of the matter beginning with line 25, down to and including line 3, page 252, and insert in lieu thereof the following:

(1) To appraise the merchandise in the unit of quantity in which the merchandise is usually bought and sold by ascertaining or estimating the value thereof by all reasonable ways and means in his power, any statement of cost or cost of production in any invoice, affidavit, declaration, or other document to the contrary notwithstanding.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 353, line 12, after the word "reappraisement," to strike out "shall be taken" and to insert "is filed with or mailed to the Board of General Appraisers"; in line 14, after the word "within," to strike out "thirty" and to insert "sixty"; in the same line, after the word "days," to strike out "thereafter, or by" and to insert "after the date of the appraiser's report, or filed by"; in line 15, after the word "the," to strike out "importer,"; in line 16, after the word "or," to strike out "agent" and to insert "his agent, with the collector"; in line 17, after the word "date," to insert "of personal delivery, or if mailed the date of mailing,"; in line 18, after the word "of," to strike out "the" and to insert "written"; in line 18, after the word "appraisement," to insert "to the consignee, his agent, or his attorney. No such appeal filed by the consignee, or his agent, shall be deemed valid, unless he has complied with all the provisions of this act relating to the entry and appraisement of such merchandise."; in line 23, after the word "the," to strike out "invoice and"; in the same line, after the word "entry," to insert "and the accompanying papers"; in line 24, after the word "collector," to strike out "of customs"; and on page 354, line 12, after the word "considered.", to insert "Copies of official documents, when certified by an official duly authorized by the Secretary of the Treasury, may be admitted in evidence with the same force and effect as original documents.", so as to read:

SEC. 501. Reappraisement: The decision of the appraiser shall be final and conclusive upon all parties unless a written appeal for a reappraisement is filed with or mailed to the Board of General Appraisers by the collector within sixty days after the date of the appraiser's report or filed by the consignee, or his agent, with the collector within ten days after the date of personal delivery, or if mailed the date of mailing of written notice of appraisement to the consignee, his agent, or his attorney. No such appeal filed by the consignee, or his agent, shall be deemed valid, unless he has complied with all the provisions of this act relating to the entry and appraisement of such merchandise. Every such appeal shall be transmitted with the entry and the accompanying papers by the collector to the Board of General Appraisers and shall be assigned to one of the general appraisers, who shall ascertain aud return the value of the merchandise and shall give reasonable notice to the importer and to the person designated to repre-

sent the Government in such proceedings of the time and place of the hearing, at which the parties and their attorneys shall have an opportunity to introduce evidence and to hear and cross-examine the witnesses of the other party and to inspect all samples and all papers admitted or offered as evidence. In finding such value affidavits of persons whose attendance can not reasonably be had, price lists, catalogues, reports of consuls, special agents, collectors, appraisers, and other officers of the Government may be considered. Copies of official documents, when certified by an official duly authorized by the Secretary of the Treasury, may be admitted in evidence with the same force and effect as original documents.

Mr. McCUMBER. On page 354, line 10, afer the word "reports," I move to insert the words "or depositions."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 354, line 11, after the word "appraisers," I move to insert the words "assistant appraisers, examiners."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 354, line 16, after the word "appraiser," to strike out "as to the value of such merchandise"; in line 22, after the word "collector," to strike out "of customs"; in line 23, after the word "Treasury," to insert "and a copy of such application mailed to the consignee, or his agent or attorney"; in line 25, after the word "the," to strike out "importer"; in the same line, after the word "or," to strike out "agent," and to insert "his agent or attorney"; in line 26, after the word "collector," to strike out "of customs"; on page 355, line 6, after the word "and," to insert "after argument on the part of the interested parties if requested by them or either of them"; at the beginning of line 12, to strike out "of customs"; in line 15, after the word "unless," to strike out "within 30 days thereafter"; and in line 16, after the word "taken," to insert "by either party"; so as to make the paragraph read:

The decision of the general appraiser, after argument on the part of the interested parties if requested by them or by either of them, shall be final and conclusive upon all parties unless within 10 days from the date of the filing of the decision with the collector an application for its review shall be filed with or mailed to said board by the collector or other person authorized by the Secretary of the Treasury, and a copy of such application mailed to the consignee, or his agent or attorney, or filed by the consignee, or his agent or attorney, with the collector, by whom the same shall be forthwith forwarded to the Board of General Appraisers. Every such application shall be assigned by the Board of General Appraisers to a board of three general appraisers, who shall consider the case upon the samples of the merchandise, if there be any, and the record made before the general appraiser, and, after argument on the part of the interested parties if requested by them or either of them, shall affirm, reverse, or modify the decision of the general appraiser or remand the case to the general appraiser for further proceedings, and shall state its action in a written decision, to be forwarded to the collector, setting forth the facts upon which the finding is based and the reasons therefor. The decision of the Board of General Appraisers shall be final and conclusive upon all parties unless an appeal shall be taken by either party to the Court of Customs Appeals upon a question or questions of law only within the time and in the manner provided by section 198 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

Mr. McCUMBER. On page 355, line 7, in the clause inserted by the committee, I move to strike out the word "interested" before "parties."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 355, line 21, after the word "appraisement," to insert "and classification"; in line 22, before the word "The," to insert "(a)"; line 24, after the word "law," to insert "and may disseminate such information"; in line 26, after the word "merchandise," to insert "and the classification and assessment of duties thereon"; and on page 356, line 2, after the word "appraiser," to insert "assistant appraiser," so as to read:

SEC. 502. Regulations for appraisement and classification: (a) The Secretary of the Treasury shall establish and promulgate such rules and regulations not inconsistent with the law, and may disseminate such information as may be necessary to secure a just, impartial, and uniform appraisement of imported merchandise and the classification and assessment of duties thereon at the various ports of entry, and may direct any appraiser, deputy appraiser, assistant appraiser, or examiner of merchandise to go from one port of entry to another for the purpose of appraising or assisting in appraising merchandise imported at such port.

The amendment was agreed to.

The next amendment was, on page 356, after line 5, to insert:

(b) No ruling or decision once made by the Secretary of the Treasury giving construction to any law imposing customs duties shall be reversed or modified adversely to the United States by the same or a succeeding Secretary, except in concurrence with an opinion of the Attorney General recommending the same or a final decision of the Board of General Appraisers.

The amendment was agreed to.

The next amendment was, on page 356, after line 12, to insert:

(c) It shall be the duty of all officers of the customs to execute and carry into effect all instructions of the Secretary of the Treasury relative to the execution of the revenue laws; and in case any difficulty arises as to the true construction or meaning of any part of the revenue laws, the decision of the Secretary shall be binding upon all officers of the customs.

The amendment was agreed to.

The next amendment was, on page 356, line 24, after the word "may," to strike out "be" and insert "be, together with all other items by law constituting parts of dutiable value," so as to make the section read:

SEC. 503. Dutiable value: Whenever imported merchandise is subject to an ad valorem rate of duty or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the value returned by the appraiser, general appraiser, or Board of General Appraisers, as the case may be, together with all other items by law constituting parts of dutiable value. If there shall be used for covering or holding imported merchandise, whether dutiable or free of duty, any unusual material, article, or form designed for use otherwise than in the bona fide transportation of such merchandise to the United States, additional duties shall be levied upon such material, article, or form at the rate or rates to which the same would be subjected if separately imported.

Mr. McCUMBER. I ask that the amendment be disagreed to.

The amendment was rejected.

The next amendment was, on page 357, line 8, after the word "The," to strike out "importer" and to insert "consignee"; in line 9, after the word "collector," to strike out "of customs"; in line 10, after the word "merchandise," to strike out "be" and to insert "is"; in the same line, after the word "entered," to strike out "in or under bond" and to insert "for warehouse or transportation, or under bond,"; and in line 13, after the word "appraiser's," to strike out "return" and to insert "report," so as to make the section read:

SEC. 504. Payment of duties: The consignee shall deposit with the collector, at the time of making entry, unless the merchandise is entered for warehouse or transportation, or under bond, the amount of duty estimated to be payable thereon. Upon receipt of the appraiser's report and of the various reports of landing, weight, gauge, or measurement, etc.

The amendment was agreed to.

Mr. McCUMBER. On page 357, line 15, after the word "shall," I move to strike out the words "liquidate the duties accruing on such entry" and insert in lieu thereof the words "ascertain, fix, and liquidate the rate and amount of duties to be paid on such merchandise as provided by law."

The amendment was agreed to.

The next amendment was, on page 357, after line 19, to strike out:

SEC. 513. Shortage, etc.: No allowance shall be made in the estimation and liquidation of duties for shortage or nonimportation caused by decay, destruction, or injury to fruit or other perishable articles imported into the United States whereby their commercial value has been destroyed, except when constituting 10 per cent or more of the invoice quantity and then only under regulations prescribed by the Secretary of the Treasury, nor shall any allowance be made for damage to any imported merchandise, but the importer may, at any time within 10 days after entry, abandon to the United States all or any portion of the merchandise included in any invoice, and be relieved of the payment of duties thereon: *Provided*, That the portion so abandoned shall amount to 5 per cent or more of the total value or quantity of the invoice, and shall be delivered by the importer thereof at such place within the port of entry as the collector of customs may direct. The right of abandonment herein provided for may be exercised whether the merchandise abandoned has been damaged or not, and whether or not the same has any commercial value. An allowance for duties may be made upon imported fruit or other perishable articles, if condemned at the port of original entry, within 10 days after landing, by health officers or other legally constituted authorities: *Provided further*, That the importers or their agents shall, within 48 hours after such condemnation, lodge with the collector of customs notice thereof, in writing, together with an invoiced description of the articles condemned, their location, and the name of the vessel in which imported. Upon receipt of such notice, the collector shall verify the claims therein made, under regulations to be prescribed by the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, at the top of page 359, to insert a new section as follows:

SEC. 505. Abandonment and damage: Allowance shall be made in the estimation and liquidation of duties under regulations prescribed by the Secretary of the Treasury in the following cases:

(1) Where the importer abandons, within 10 days after entry, to the United States all or any portion amounting to 10 per cent or more of the total value or quantity of merchandise in any invoice, and delivers the portion so abandoned to such place as the collector directs.

(2) Where at the time of importation 5 per cent or more of the total value or quantity of fruit or other perishable merchandise in any invoice is decayed or injured so that its commercial value has been destroyed.

(3) Where fruit or other perishable merchandise has been condemned at the port of entry, within 10 days after landing, by the health officers or other legally constituted authorities, and the consignee, within five days after such condemnation, files with the collector written notice thereof, an invoiced description, and the location thereof, and the name of the vessel or vehicle in which imported.

Mr. McCUMBER. On page 359, line 9, after the word "directs," I move to insert the following: "unless the collector is satisfied that it is so far destroyed as to be nondeliverable."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 360, after line 2, to strike out:

SEC. 515. Liquors, etc., marketing, etc.: All distilled spirits, wines, and malt liquors imported in pipes, hogsheads, tierces, barrels, casks, or similar packages shall, before delivery from customs custody, be marked or branded by customs officers and a stamp affixed thereto in a form prescribed by the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 360, after line 8, to strike out:

SEC. 516. Same—Stamping: Any pipe, hogshead, tierce, barrel, or cask, or other package not in the custody of an officer of the customs, which is found to contain imported liquor or purporting to contain such liquor, without having thereon a stamp as required by the preceding section, shall be, with its contents, forfeited; and whenever any cask or package of imported distilled spirits of not less than five wine gallons capacity is filled for shipment, sale, or delivery on the premises of any wholesale liquor dealer, the same shall be stamped with a special stamp for imported spirits in the manner prescribed by the Commissioner of Internal Revenue.

The amendment was agreed to.

The next amendment was, on page 360, after line 19, to strike out:

SEC. 517. Same—Branding: In addition to stamping, the customs officers shall require each package to be branded, stenciled, or otherwise permanently marked with the date of its importation, the name of the importing vessel, the name of the port from which imported, the serial number of such cask or other container, and the number of gallons contained therein, and the proof, if spirits.

The amendment was agreed to.

The next amendment was, at the top of page 361, to strike out:

SEC. 518. Same—Destruction of stamps, etc.: Every person who empties or draws off, or causes to be emptied or drawn off, the contents of any package of imported distilled spirits, liquors, or wines stamped or marked as above required shall, at the time of such emptying, efface, obliterate, or destroy the stamp thereon and the other marks or brands placed thereon. Every cask or other package of imported distilled spirits, liquors, or wines from which the stamp or marks placed thereon shall not be effaced, obliterated, or destroyed on emptying such package may be seized by any officer of the internal revenue or by any officer of the customs wherever found and forfeited.

The amendment was agreed to.

The next amendment was, on page 361, after line 12, to strike out:

SEC. 519. Same—Revised Statutes applicable: All the provisions of sections 3324, 3325, and 3326 of the Revised Statutes shall be applicable to imported distilled spirits, liquors, and wines and the containers thereof and to the marks, brands, or stamps thereon, and to the defacing or obliteration of such marks, brands, or stamps, and the penalties prescribed in said statutes shall be imposed in cases affecting or relating to imported wines, liquors, and spirits, as well as to wines, liquors, and spirits of domestic production.

The amendment was agreed to.

The next amendment was, on page 362, line 14, after the word "person," to strike out "touching," and insert "upon"; in line 20, after the word "contracts," to strike out "or"; in the same line, after the word "invoices," to insert "or other documents"; in line 23, after the word "and," to strike out "preserved for use or reference until the final decision of the collector, appraiser, general appraiser, or board of general appraisers shall be made respecting the valuation or classification of said merchandise, as the case may be:", and to insert "preserved, under such rules as the Board of General Appraisers may prescribe"; so as to make the section read:

SEC. 508. Examination of importer and others: Collectors, appraisers, general appraisers, and boards of general appraisers may cite to appear before them or any of them and to examine upon oath, which said officers or any of them are hereby authorized to administer, any owner, importer, consignee, agent, or other person upon any matter or thing which they, or any of them, may deem material respecting any imported merchandise then under consideration or previously imported within one year, in ascertaining the classification or the value thereof or the rate or amount of duty; and they, or any of them, may require the production of any letters, accounts, contracts, invoices, or other documents relating to said merchandise, and may require such testimony to be reduced to writing, and when so taken it shall be filed and preserved, under such rules as the Board of General Appraisers may prescribe and such evidence may be given consideration in all subsequent proceedings relating to such merchandise.

Mr. McCUMBER. On page 363, line 3, after the word "prescribe" I move to insert a comma.

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

The next amendment was, on page 363, at the beginning of line 14, to insert "whether made by an appraiser, a general appraiser, or a board of general appraisers," so as to make the section read:

SEC. 569. Penalties: If any person so cited to appear shall neglect or refuse to attend, or shall decline to answer, or shall refuse to answer in writing any interrogatories, and subscribe his name to his deposition, or to produce such papers when so required by a general appraiser, or a board of general appraisers, or a local appraiser, or a collector, he shall be liable to a penalty of not less than $20 nor more than $500; and if such person be the owner, importer, or consignee, the appraisement last made of such merchandise, whether made by an appraiser, a general appraiser, or a board of general appraisers, shall be final and conclusive against such person; and any person who shall willfully and corruptly swear falsely on an examination before any general appraiser, or board of general appraisers, or local appraiser or collector, shall be deemed guilty of perjury; and if he is the owner, importer, or consignee, the merchandise shall be forfeited, or the value thereof may be recovered from him.

The amendment was agreed to.

The next amendment was, on page 363, after line 21, to strike out:

SEC. 523. Inspection of records: If any person engaged in the importation of merchandise into the United States, or engaged in dealing with such imported merchandise shall fail or refuse to submit to the inspection of a duly accredited investigating officer of the United States, upon request so to do from the chief officer of customs at the port where such merchandise is entered, any or all of his books, records, or accounts, correspondence, or other documents or papers pertaining to the value or classification of any such imported merchandise, then the Secretary of the Treasury in his discretion is authorized, while such failure or refusal continues, to assess an additional duty of 15 per cent on all merchandise consigned to or imported by or shipped or intended for delivery to such person so failing or refusing.

The amendment was agreed to.

The next amendment was, on page 364, after line 9, to insert a new section, as follows:

SEC. 510. Inspection of exporter's books: If any person manufacturing, producing, selling, shipping, or consigning merchandise exported to the United States fails, at the request of the Secretary of the Treasury, or an appraiser, or person acting as appraiser, or a collector, or a general appraiser, or the Board of General Appraisers, as the case may be, to permit a duly accredited officer of the United States to inspect his books, papers, records, accounts, documents, or correspondence, pertaining to the market value or classification of such merchandise, then while such failure continues the Secretary of the Treasury, under regulations prescribed by him (1) shall prohibit the importation into the United States of merchandise manufactured, produced, sold, shipped, or consigned by such person, and (2) may instruct the collectors to withhold delivery of merchandise manufactured, produced, sold, shipped, or consigned by such person. If such failure continues for a period of one year from the date of such instructions the collector shall cause the merchandise, unless previously exported, to be sold at public auction as in the case of forfeited merchandise.

The amendment was agreed to.

The next amendment was, on page 365, after line 4, to insert:

SEC. 511. Inspection of importer's books: If any person importing merchandise into the United States or dealing in imported merchandise fails, at the request of the Secretary of the Treasury, or an appraiser, or person acting as appraiser, or a collector, or a general appraiser, or the Board of General Appraisers, as the case may be, to permit a duly accredited officer of the United States to inspect his books, papers, records, accounts, documents, or correspondence pertaining to the value or classification of such merchandise, then while such failure continues the Secretary of the Treasury, under regulations prescribed by him (1) shall prohibit the importation of merchandise into the United States by or for the account of such person, and (2) shall instruct the collectors to withhold delivery of merchandise imported by or for the account of such person. If such failure continues for a period of one year from the date of such instructions the collector shall cause the merchandise, unless previously exported, to be sold at public auction as in the case of forfeited merchandise.

The amendment was agreed to.

The next amendment was, on page 365, after line 22, to strike out:

SEC. 524. Legal tender: Unless otherwise provided by law, all duties upon imports shall be collected in lawful money of the United States: *Provided*, That certified checks drawn on national or State banks and on trust companies may be received during such time and under such regulations as the Secretary of the Treasury shall prescribe.

The amendment was agreed to.

The next amendment was, on page 366, line 5, after the word "collector," to strike out "of customs," so as to make the section read:

SEC. 512. Deposit of duties: All moneys paid to any collector for unascertained duties or for duties paid under protest against the rate or amount of duties charged shall be deposited to the credit of the Treasurer of the United States and shall not be held by the collectors to await any ascertainment of duties or the result of any litigation in relation to the rate or amount of duties legally chargeable and collectible in any case where money is so paid.

The amendment was agreed to.

The next amendment was, on page 366, line 14, after the word "other," to strike out "officer of the"; and in the same line, after the word "customs," to insert "officer," so as to make the section read:

SEC. 513. Collector's immunity: No collector or other customs officer shall be in any way liable to any owner, importer, consignee, or agent or any other person for or on account of any rulings or decisions as to the appraisement or the classification of any imported merchandise or the duties charged thereon, or the collection of any dues, charges, or duties on or on account of said merchandise, or any other matter or thing as to which said owner, importer, consignee, or agent might under this act be entitled to protest or appeal from the decision of such collector or other officer.

The amendment was agreed to.

The next amendment was, on page 366, line 24, before the word "All," to strike out "review of decisions" and to insert

"protest"; in line 25, after the word "collector," to strike out "of customs"; on page 367, line 3, after the word "character," to strike out "except duties on tonnage" and to insert "within the jurisdiction of the Secretary of the Treasury"; in line 8, after the word "drawback," to insert "or his refusal to reliquidate any entry for a clerical error discovered in any entry or liquidation within one year after the date of entry, or within 60 days after liquidation when liquidation is made more than 10 months after the date of entry"; in line 13, after the word "all," to strike out "parties" and to insert "persons"; in line 22, after the word "thereto," to strike out "and stating how the merchandise should have been classified, or what drawback should have been paid, or what charges or exaction should have been made, or why the merchandise should not have been excluded from entry or delivery. If"; on page 368, line 1, before the word "the," to insert "and if"; in line 2, after the word "merchandise," to strike out "was" and to insert "is"; in the same line, after the word "consumption," to strike out "such protest shall be deemed to be finally waived and abandoned unless, within 30 days from the date of the filing thereof" and to insert "shall pay"; in line 5, after the word "of," to strike out "liquidated duties shall be paid" and to insert "duties and charges ascertained to be due thereon. A protest may be amended at or before trial under such rules as the Board of General Appraisers may prescribe," so as to make the section read:

SEC. 514. Protest: All decisions of the collector, including the legality of all orders and findings entering into the same, as to the rate and amount of duties chargeable, and as to all exactions of whatever character, within the jurisdiction of the Secretary of the Treasury, and his decisions excluding any merchandise from entry or delivery, under any provision of the customs revenue laws, and his liquidation of any entry, or refusal to pay any claim for drawback, or his refusal to reliquidate any entry for a clerical error discovered in any entry or liquidation within 1 year after the date of entry, or within 60 days after liquidation when liquidation is made more than 10 months after the date of entry, shall be final and conclusive upon all persons, unless the importer, consignee, or agent of the person paying such charge or exaction, or filing such claim for drawback, or seeking such entry or delivery, shall, within 60 days after, but not before such liquidation or decision, as well in cases of merchandise entered in bond as for consumption, file a protest in writing with the collector setting forth distinctly and specifically, and in respect to each entry, payment, claim, or decision, the reasons for the objection thereto, and if the merchandise is entered for consumption, shall pay the full amount of duties and charges ascertained to be due thereon. A protest may be amended at or before trial under such rules as the Board of General Appraisers may prescribe.

Mr. McCUMBER. On page 367, line 2, I move to insert a comma after the word "chargeable."

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 367, lines 4 and 5, I move to inclose in parentheses the matter printed in italic.

The amendment to the amendment was agreed to.

Mr. McCUMBER. On page 368, I move, beginning with the word "duties" in line 5, to strike out all of the matter down to and including line 8, and insert in lieu thereof the following: "duties, charges, and exactions ascertained to be due thereon. Under such rules as the Board of General Appraisers may prescribe, and in its discretion, a protest may be amended at any time prior to the first docket call thereof."

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

The next amendment was, on page 368, line 21, after the word "the," to strike out "invoice and"; in the same line, after the word "entry," to insert "and the accompanying papers"; in line 22, after the word "the," to strike out "papers and"; and on page 369, line 2, after the word "decision," to insert "and judgment order," so as to make the section read:

SEC. 515. Same: Upon the filing of such protest and payment of duties and other charges the collector shall within 60 days thereafter review his decision, and may modify the same in whole or in part and thereafter refund any duties, charge, or exaction found to have been collected in excess, or pay any drawback found due, of which notice shall be given as in the case of the original liquidation, and against which protest may be filed within the same time and in the same manner and under the same conditions as against the original liquidation or decision. If the collector shall, upon such review, affirm his original decision, or, upon the filing of a protest against his modification of any decision, the collector shall forthwith transmit the entry and the accompanying papers, and all the exhibits connected therewith, to the Board of General Appraisers for due assignment and determination, as provided by law. Such determination shall be final and conclusive upon all persons, and the papers transmitted shall be returned, with the decision and judgment order thereon, to the collector of customs, who shall take action accordingly, except in cases in which an appeal shall be filed in the United States Court of Customs Appeals within the time and in the manner provided by law.

Mr. McCUMBER. On page 369, line 3, I move to strike out the words "of customs" after "collector."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 369, after line 6, to strike out:

SEC. 529. Appeal or protest by American producers: Whenever it shall appear to the satisfaction of a board of three general appraisers that it is impracticable for a manufacturer or producer in the United States to make, in his own name, or by agent, an importation of merchandise for the purpose of having determined the dutiable value or classification thereof, such manufacturer or producer shall have the right to appear and to be heard as a party in any case involving the disputed question of fact or law; or, in the absence of such a case, the manufacturer or producer, or the Assistant Attorney General in charge of customs litigation for the Government, may state in a written notice to the appraiser or the collector what he claims to be the proper value or classification, as the case may be, of such merchandise, and if the appraiser or the collector shall not accept such valuation or classification as correct, such manufacturer, producer, or Assistant Attorney General shall have the right to appeal for reappraisement or to make a protest, and to be heard as a party, the same as the importer would have, in any subsequent appraisal or classification involving the same question of fact or law. No manufacturer or producer shall have the right to inspect any documents or papers disclosing any information which the general appraiser or the board of three general appraisers shall deem improper to be disclosed to him. In every such proceeding the importer or his agent shall be notified by the manufacturer, producer, or Assistant Attorney General, whichever is the moving party, of his intention to appear and shall be apprised of all hearings in accordance with the rules of procedure.

And in lieu thereof to insert:

SEC. 516. Appeal or protest by American producers: (a). Whenever an American manufacturer, producer, or wholesaler believes that the appraised value of any imported merchandise of a class or kind manufactured, produced, or sold at wholesale by him is too low he may file with the Secretary of the Treasury a complaint setting forth the value at which he believes the merchandise should be appraised and the facts upon which he bases his belief. The Secretary shall thereupon transmit a copy of such complaint to the appraiser at each port of entry where the merchandise is usually imported. Until otherwise directed by the Secretary, the appraiser shall report each subsequent importation of the merchandise, giving the entry number, the name of the importer, the appraised value, and his reasons for the appraisement. If the Secretary does not agree with the action of the appraiser he shall instruct the collector to file an appeal for a reappraisement as provided in section 501 of this act, and such manufacturer, producer, or wholesaler shall have the right to appear and to be heard as a party in interest under such rules as the Board of General Appraisers may prescribe. The Secretary shall notify such manufacturer, producer, or wholesaler of the action taken by such appraiser, giving the port of entry, the entry number, and the appraised value of such merchandise and the action he has taken thereon. If the appraiser advances the entered value of merchandise upon the information furnished by the American manufacturer, producer, or wholesaler, and an appeal is taken by the consignee, such manufacturer, producer, or wholesaler shall have the right to appear and to be heard as a party in interest under such rules as the Board of General Appraisers may prescribe. If the American manufacturer, producer, or wholesaler is not satisfied with the action of the Secretary, or the action of the appraiser thereon, he may file, within five days after the date of the mailing of the Secretary's notice, an appeal for a reappraisement in the same manner and with the same effect as an appeal by a consignee under the provisions of section 501 of this act.

(b) The Secretary of the Treasury shall, upon written request by an American manufacturer, producer, or wholesaler, furnish the classification of and the rate of duty, if any, imposed upon designated imported merchandise of a class or kind manufactured, produced, or sold at wholesale by him. If such manufacturer, producer, or wholesaler believes that the proper rate of duty is not being imposed he may file a complaint with the Secretary of the Treasury setting forth a description of the merchandise, the classification, and the rate or rates of duty he believes proper, and the reasons for his belief. If the Secretary believes that the classification of or rate of duty imposed upon the merchandise is not correct, he shall notify the collectors as to the proper classification and rate of duty and shall so inform such manufacturer, producer, or wholesaler, and such higher rate of duty shall be assessed upon all merchandise imported or withdrawn from warehouse after 30 days after the date of such notice to the collectors. If the Secretary believes that the classification and rate of duty are correct he shall so inform such manufacturer, producer, or wholesaler. If dissatisfied with the action of the Secretary, such manufacturer, producer, or wholesaler may file with him a notice that he desires to protest the classification or the rate of duty imposed upon the merchandise, and upon receipt of such notice the Secretary shall furnish him with such information as to the entry, the consignee, and the port of entry as will enable him to protest the classification of or the rate of duty imposed upon the merchandise when liquidated at any port of entry. Upon written request therefor by such manufacturer, producer, or wholesaler, the collector of such port of entry shall notify him immediately of the date of liquidation. Such manufacturer, producer, or wholesaler may file, within 60 days after the date of liquidation, with the collector of such port a protest in writing setting forth a description of the merchandise and the classification and the rate of duty he believes proper, with the same effect as a protest of a consignee filed under the provisions of sections 514 and 515 of this act.

(c) A copy of every appeal and every protest filed by an American manufacturer, producer, or wholesaler under the provisions of this section shall be mailed by the collector to the consignee within five days after the filing thereof, and such consignee shall have the right to appear and to be heard as a party in interest before the Board of General Appraisers. The collector shall transmit the entry and all papers and exhibits accompanying or connected therewith to the Board of General Appraisers for due assignment and determination of the proper value or of the proper classification and rate of duty. The decision of the Board of General Appraisers upon any such appeal or protest shall be final and conclusive upon all parties unless an appeal is taken by either party to the Court of Customs Appeals, as provided in sections 501 and 515 of this act.

(d) In proceedings instituted under the provisions of this section an American manufacturer, producer, or wholesaler shall not have the right to inspect any documents or papers of the consignee or importer disclosing any information which the general appraiser or the Board of General Appraisers shall deem unnecessary or improper to be disclosed to him.

Mr. McCUMBER. I move the following amendments to the amendment.

On page 371, line 18, strike out the word "five" and insert in lieu thereof "ten."

On page 372, line 3, strike out the word "imposed" and insert in lieu thereof "assessed."

On page 372, line 8, strike out the word "imposed" and insert in lieu thereof "assessed."

On page 372, line 11, strike out the word "higher."

On page 373, line 11, after the word "consignee" insert "or his agent."

On page 373, line 12, after the word "consignee" insert "or his agent."

The amendments to the amendment were agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 374, line 9, after the word "section," to strike out "509 or 527" and to insert "501, 514, 515, or 516," so as to read:

SEC. 517. Frivolous protest or appeal: Upon motion of the counsel for the Government, it shall be the duty of the Board of General Appraisers to decide whether any appeal for reappraisement or protest filed under the provisions of section 501, 514, 515, or 516 of this act is frivolous, and if said board shall so decide, a penalty of not less than $5 nor more than $250 shall be assessed against the person filing such appeal for reappraisement or protest.

The amendment was agreed to.

The next amendment was, on page 376, line 16, after the word "assent," to strike out "on such assignments away"; in line 17, after "New York," to insert "on official business"; in line 21, after the word "collectors," to insert "A board of three general appraisers shall have power to order an analysis of imported merchandise and reports thereon by laboratories or bureaus of the United States"; on page 377, line 9, after the word "case," to insert "or an individual general appraiser deciding an appeal for a reappraisement"; in line 11, after the word "within," to strike out "30" and to insert "thirty"; and in line 13, after the word "board" to insert "or said general appraiser," so as to make the paragraph read:

SEC. 518. Board of General Appraisers.—The Board of General Appraisers shall consist of nine members as now constituted, and all vacancies in said board shall be filled by appointment by the President, by and with the advice and consent of the Senate, not more than five of whom shall be appointed from the same political party and each of whom shall receive a salary of $9,000 a year. They shall not engage in any other business, vocation, or employment, and shall hold their office during good behavior, but may, after due hearing, be removed by the President for the following causes and no other: Neglect of duty, malfeasance in office, or inefficiency. The office of said board shall be at the port of New York, and the board and each member thereof shall have and possess all the powers of a district court of the United States for preserving order, compelling the attendance of witnesses, the production of evidence, and in punishing for contempt. Said board shall have power to establish from time to time such rules of evidence, practice, and procedure, not inconsistent with law, as may be deemed necessary for the conduct of its proceedings, in securing uniformity in its decisions and in the proceedings and decisions of the members thereof, and for the production, care, and custody of samples and of the records of said board. One of the members of said board designated for that purpose by the President of the United States shall act as president of the board, or the acting president in his absence, shall have control of the fiscal affairs and of the clerical force of appraisers to each of the said boards and shall designate which member shall be chairman thereof. The president of the board shall be competent to sit as a member of any board or to assign one or two other members to any of such boards in the absence or disability of any one or two members of such board. A majority of any board shall have full power to hear and decide all cases and questions arising therein or assigned thereto. The board of three general appraisers deciding a case or an individual general appraiser deciding an appeal for a reappraisement may, upon the motion of either party made within 30 days next after such decision, grant a rehearing or retrial of said case when, in the opinion of said board or said general appraiser the ends of justice so require.

Mr. McCUMBER. I move to amend as follows: On page 376, line 22, after the word "appraisers" insert "or a general appraiser," and on page 377, line 9, strike out the words "an individual" and insert in lieu thereof "a."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 378, after line 11, to strike out:

SEC. 533. Refund of excessive duties: Whenever it is found upon the final liquidation of any entry that more money has been deposited with or paid to the collector of customs than was required by law to be deposited or paid, the same shall be refunded to the importer or consignee, under regulations to be prescribed by the Secretary of the Treasury, and the necessary moneys for such refunds are hereby appropriated, and this appropriation shall be deemed a permanent indefinite appropriation. The Secretary of the Treasury is hereby authorized to correct manifest clerical errors in any entry or liquidation for or against the United States, and also to refund duties paid in excess upon personal or household effects, at any time within one year after the date of such entry or payment, notwithstanding that no protest may have been filed against the liquidation of such duties within the time and in the manner prescribed by law.

And in lieu thereof to insert:

SEC. 520. Refund of excessive duties: (a) The Secretary of the Treasury is hereby authorized to refund duties and correct errors in liquidation of entries in the following cases:

(1) Whenever it is ascertained on final liquidation or reliquidation of an entry that more money has been deposited or paid than was required by law to be so deposited or paid;

(2) Whenever it is determined in the manner required by law that any fees, charges, or exactions, other than duties, have been erroneously collected;

(3) Whenever a manifest clerical error is discovered in any entry or liquidation within one year after the date of entry, or within 60 days after liquidation when liquidation is made more than 10 months after the date of entry; and

(4) Whenever duties have been paid on household or personal effects which by law were not subject to duty, notwithstanding a protest was not filed within the time and in the manner prescribed by law.

(b) The necessary moneys to make such refunds are hereby appropriated, and this appropriation shall be deemed a permanent and indefinite appropriation.

The amendment was agreed to.

The next amendment was, on page 379, after line 23, to strike out:

SEC. 534. Reliquidation of duties: Whenever the Secretary of the Treasury shall find that any merchandise has been passed through the customs upon the payment of a less amount of duties than legally accrued thereon he may at any time within one year after the date of the entry of such merchandise order a reliquidation of the duties thereon and the collection of the increased duties found due, but whenever any entry has been liquidated and the merchandise covered thereby has been released from customs custody such liquidation shall, after the expiration of one year from the date of entry, in the absence of fraud or of protest, be final and conclusive upon all parties: *Provided*, That when the collector shall find that there is probable cause to believe there is fraud in the case he may reliquidate within two years after date of the entry.

And in lieu thereof to insert:

SEC. 521. Reliquidation of duties: Whenever any merchandise has been entered and passed free of duty, and whenever duties upon any imported merchandise have been liquidated and paid and the merchandise has been delivered to the consignee or his agent, such entry and passage free of duty and such settlement of duties shall, after the expiration of one year from the date of entry, or after the expiration of 60 days after the date of liquidation when liquidation is made more than 10 months after the date of entry, in the absence of fraud and in the absence of protest by the consignee or his agent, or by an American manufacturer, producer, or wholesaler, be final and conclusive upon all parties. If the collector finds probable cause to believe there is fraud in the case, he may reliquidate within two years after the date of entry, or after the date of liquidation when liquidation is made more than 10 months after the date of entry.

Mr. McCUMBER. On page 380, line 25, I move, after the word "wholesaler," to insert a comma.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 381, after line 5, to strike out:

SEC. 535. Cooperation of Government agencies: Any information which shall be obtained by executive departments and independent establishments of the Government which may be helpful in the appraisement of imported merchandise shall be furnished to appraising officers upon request of the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 381, after line 11, to insert a new section, as follows:

SEC. 522. Conversion of currency: (a) That section 25 of the act of August 27, 1894, entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes," as amended, is reenacted without change as follows:

"SEC. 25. That the value of foreign coin as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint and be proclaimed by the Secretary of the Treasury quarterly on the 1st day of January, April, July, and October in each year."

(b) For the purpose of the assessment and collection of duties upon merchandise imported into the United States on or after the day of the enactment of this act, wherever it is necessary to convert foreign currency into currency of the United States, such conversion, except as provided in subdivision (c), shall be made at the values proclaimed by the Secretary of the Treasury under the provisions of section 25 of such act of August 27, 1894, as amended, for the quarter in which the merchandise was exported.

(c) If no such value has been proclaimed, or if the value so proclaimed varies by 5 per cent or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate. For the purposes of this subdivision such buying rate shall be the buying rate for cable transfers payable in the foreign currency so to be converted, and shall be determined by the Federal Reserve Bank of New York and certified daily to the Secretary of the Treasury, who shall make it public at such times and to such extent as he deems necessary. In ascertaining such buying rate such Federal reserve bank may in its discretion (1) take into consideration the last ascertainable transactions and quotations, whether direct or through the exchange of other currencies, and (2) if there is no market buying rate for such cable transfers, calculate such rate from actual transactions and quotations in demand or time bills of exchange.

The amendment was agreed to.

The next amendment was, on page 383, after line 2, to insert a new section, as follows:

SEC. 523. Comptrollers of customs: Naval officers of customs now in office and their successors shall hereafter be known as comptrollers of customs.

Comptrollers of customs shall examine and audit all of the collector's accounts of receipts and disbursements of money and receipts and disposition of merchandise and certify same thereafter to the Secretary. They shall perform such other duties as the Secretary of the Treasury may from time to time prescribe and direct, and their supervision shall extend to all customs districts that may be assigned to them by that officer.

Comptrollers of customs shall ascertain and verify all assessments of duties and allowances of drawbacks made by collectors before the final liquidation thereof and certify the same when correct, or shall return them to said collectors for correction when errors or differences are found. In cases of disagreement between a collector and a comptroller of customs, the latter shall report the facts to the Secretary of the Treasury for instructions as to settlement.

This section shall not be construed to affect the manner of appointment, the terms of office, or the compensation of any such officer as now provided by law, nor to affect the provisions of the budget and accounting act, 1921, approved June 10, 1921.

The amendment was agreed to.

The next amendment was, at the top of page 384, to insert a new section, as follows:

SEC. 524. Receipts from reimbursable charges for labor, services, and other expenses connected with the customs shall be deposited as a refund to the appropriation from which paid instead of being covered into the Treasury as miscellaneous receipts, as provided by the act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes," approved March 4, 1907.

The amendment was agreed to.

The next amendment was, on page 384, after line 8, to insert a new section, as follows:

SEC. 525. In connection with the enforcement of this act, the Secretary of the Treasury is authorized to use in the District of Columbia not to exceed eight persons detailed from the field force of the customs service and paid from the appropriation for the expense of collecting the revenue from customs.

The amendment was agreed to.

Mr. McCUMBER. At that point in the bill, I move to amend by inserting a new section to be known as section 526.

Mr. MOSES. Mr. President, I rise to a parliamentary inquiry. I inquire whether the amendment printed on the list of amendments on page 12, beginning in line 9, proposing to insert a new section, section 526, is not the same amendment which was disagreed to when section 26 of the bill was under consideration?

The PRESIDING OFFICER. To what page does the Senator from New Hampshire refer?

Mr. MOSES. I am referring now to page 12, line 9, of the printed amendments submitted by the Senator from North Dakota.

The PRESIDING OFFICER. The Chair is unable to answer the parliamentary inquiry unless the Senator will refer to the page of the bill.

Mr. MOSES. I refer to page 384 of the bill, after line 14, where it is proposed to amend by inserting section 526.

Mr. McCUMBER. May I suggest to the Senator that the amendment intended to be proposed at that point, while it relates to the same subject, is not the same amendment as that which was formerly disagreed to?

Mr. MOSES. I might inquire, Mr. President, in view of the ruling just made by the President pro tempore, whether the amendment is offered by the Senator from North Dakota or by the committee, but my parliamentary inquiry was for the purpose of ascertaining whether the amendment could now be proposed, its effect being the same as that of an amendment which has been disagreed to?

Mr. McCUMBER. These amendments are all offered on behalf of the committee.

Mr. MOSES. I make the point of order that the amendment now proposed may not be offered as in Committee of the Whole, inasmuch as an amendment the effect of which was the same has been disagreed to.

Mr. ASHURST. On what page is that?

Mr. MOSES. The amendment, I will say to the Senator from Arizona, will be found on page 12 of the committee print of amendments, beginning in line 9, where it is proposed to insert section 526 as an amendment on page 384, after line 14.

The PRESIDING OFFICER. Will the Senator point out the section of the bill which he says was stricken out and to which the amendment now proposed is similar?

Mr. MOSES. In paragraph 26 of the bill, the second proviso on page 14, beginning in line 15, which was stricken out as in Committee of the Whole, will be found to be exactly the same in its result as the amendment which the committee now proposes. If I may be permitted to say so, Mr. President, I am not raising this point of order for the purpose of preventing the consideration of the amendment, because I know it may be offered when the bill goes from the Committee of the Whole to the Senate, and, in any event, I shall reserve a separate vote upon it if it is agreed to. However, the effect of this amendment is exactly the same as the effect of the second proviso on page 14, in paragraph 26, which was disagreed to in Committee of the Whole, and I raise the point of order that it may not now be offered again in the Committee of the Whole.

The PRESIDING OFFICER. The point of order must be decided without debate.

Mr. MOSES. I do not intend to debate it.

The PRESIDING OFFICER. It will take the present occupant of the chair some little time to read both of the provisions, to study them and see if they are identical in their meaning.

Mr. MOSES. Mr. President——

The PRESIDING OFFICER. Just a moment. The Chair suggests to the Senator from North Dakota that perhaps the same amendment might be offered in the Senate or a second vote had upon the former amendment in the Senate; otherwise the occupant of the chair will have to pause and read the provisions through.

Mr. McCUMBER. Mr. President, the amendment now proposed is not the same as that to which the Senator from New Hampshire refers. It is broader in its scope.

The PRESIDING OFFICER. Debate is out of order.

Mr. McCUMBER. A point of order has been made, and unless the Chair wishes to hear one Senator and does not wish to hear another——

The PRESIDING OFFICER. But the unanimous-consent agreement imposes upon the Chair the duty of ruling without debate.

Mr. McCUMBER. I will be very glad to have the Chair do so, but there has been debate.

The PRESIDING OFFICER. The Chair endeavored to stop it; that is all. The Chair wants to enforce the unanimous-consent agreement. The Chair rules that the amendment is in order. The Secretary will state the amendment.

The ASSISTANT SECRETARY. On page 384, after line 14, it is proposed to insert the following new section:

SEC. 526. (a) That it shall be unlawful to import into the United States any merchandise if such merchandise, or the label, sign, print, package, wrapper, or receptacle, bears a trade-mark registered in the Patent Office by a person domiciled in the United States, under the provisions of the act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same," approved February 20, 1905, as amended, if a copy of the certificate of registration of such trade-mark is filed with the Secretary of the Treasury, in the manner provided in section 27 of such act, and unless written consent of the owner of such trade-mark is produced at the time of making entry.

(b) Any such merchandise imported into the United States in violation of the provisions of this section shall be subject to seizure and forfeiture for violation of the customs laws.

(c) Any person dealing in any such merchandise may be enjoined from dealing therein within the United States or may be required to export or destroy such merchandise or to remove or obliterate such trade-mark and shall be liable for the same damages and profits provided for wrongful use of a trade-mark, under the provisions of such act of February 20, 1905, as amended.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Dakota on behalf of the committee.

Mr. MOSES. I ask for a division on that amendment.

On a division the amendment was agreed to.

Mr. MOSES. I give notice that I shall reserve the right to have a separate vote on the amendment in the Senate.

The next amendment was, under "Part 4.—Transportation in bond and warehousing of merchandise," at the top of page 385, to strike out:

SEC. 552. Immediate transportation: Any merchandise, other than explosives, shown by the invoice, bill of lading, manifest, shipping receipt, or other documents to be destined to a port of entry other than that at which such merchandise shall first arrive in the United States, may be forwarded by a bonded carrier, under such regulations and conditions as the Secretary of the Treasury shall prescribe, from the port of arrival to such port of destination. Such merchandise shall not be subject to appraisement or the payment of duties at the port of first arrival, but the same entry, examination, and appraisement thereof shall be required and made at the port of destination as would have been made at the port of first arrival if such merchandise had not been so forwarded.

And in lieu thereof to insert:

SEC. 552. Immediate transportation: Any merchandise, other than explosives and merchandise the importation of which is prohibited, arriving at a port of entry in the United States may be entered, under such rules and regulations as the Secretary of the Treasury may prescribe, for transportation in bond without appraisement to any other port of entry designated by the consignee, or his agent, and by such bonded carrier as he designates, there to be entered in accordance with the provisions of this act.

The amendment was agreed to.

The next amendment was, on page 385, line 25, after the word "explosives," to insert "and merchandise the importation of which is prohibited"; on page 386, line 3, after the word "be," to strike out "forwarded" and to insert "entered for transportation in bond"; in line 7, after the word "effects," to insert "not containing merchandise the importation of which is prohibited"; in line 11, after the word "be," to strike out "forwarded" and to insert "entered for transportation in bond"; and, in line 13, after the word "without," to strike out "entry"

and to insert "appraisement," so as to make the paragraph read:

SEC. 553. Transit goods: Any merchandise, other than explosives and merchandise the importation of which is prohibited, shown by the manifest, bill of lading, shipping receipt, or other document to be destined to a foreign country, may be entered for transportation in bond through the United States by a bonded carrier without appraisement or the payment of duties and exported under such regulations as the Secretary of the Treasury shall prescribe, and any baggage or personal effects not containing merchandise the importation of which is prohibited arriving in the United States destined to a foreign country may, upon the request of the owner or carrier having the same in possession for transportation, be entered for transportation in bond through the United States by a bonded carrier without appraisement or the payment of duty, under such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

The next amendment was, on page 386, line 18, before the word "in," to strike out "whether"; in line 22, after the word "prescribe," to strike out the colon and "*Provided*, That merchandise transported by water from one port of the United States to another, or transported by water from a port of the United States to a foreign port and thence by water to the port of reentry into the United States, shall be transported only in vessels documented as vessels of the United States," and to insert, "unless such transportation is in violation of section 4347 of the Revised Statutes, as amended, section 27 of the merchant marine act, 1920, or section 588 of this act," so as to make the paragraph read:

SEC. 554. Transportation through contiguous countries: With the consent of the proper authorities, imported merchandise, in bond or duty paid, and products and manufactures of the United States, may be transported from one port to another in the United States through contiguous countries under such regulations as the Secretary of the Treasury shall prescribe unless such transportation is in violation of section 4347 of the Revised Statutes, as amended, section 27 of the merchant marine act, 1920, or section 588 of this act.

The amendment was agreed to.

The next amendment was, on page 387, line 24, after the word "warehouse," to strike out: "All the expenses of handling merchandise in such warehouses shall be borne by the warehouse proprietor or by the owner of the merchandise, and the compensation of the storekeeper and other officers appointed to supervise the receipts of merchandise into such warehouses and deliveries therefrom shall be reimbursed to the Government by the proprietors of such warehouses," and to insert: "Except as otherwise provided in this act, bonded warehouses shall be used solely for the storage of imported merchandise and shall be placed in charge of a proper officer of the customs, who, together with the proprietor thereof, shall have joint custody of all merchandise stored in the warehouse; and all labor on the merchandise so stored shall be performed by the owner or proprietor of the warehouse, under supervision of the officer of the customs in charge of the same, at the expense of the owner or proprietor," so as to make the paragraph read:

SEC. 555. Bonded warehouses: Buildings or parts of buildings and other inclosures may be designated by the Secretary of the Treasury as bonded warehouses for the storage of imported merchandise entered for warehousing, or taken possession of by the collector, or under seizure, or for the manufacture of merchandise in bond, or for the repacking, sorting, or cleaning of imported merchandise. Such warehouses may be bonded for the storing of such merchandise only as shall belong or be consigned to the owners or proprietors thereof and be known as private bonded warehouses, or for the storage of imported merchandise generally and be known as public bonded warehouses. Before any imported merchandise not finally released from customs custody shall be stored in any such premises the owner or lessee thereof shall give a bond in such sum and with such sureties as may be approved by the Secretary of the Treasury to secure the Government against any loss or expense connected with or arising from the deposit, storage, or manipulation of merchandise in such warehouse. Except as otherwise provided in this act, bonded warehouses shall be used solely for the storage of imported merchandise and shall be placed in charge of a proper officer of the customs, who, together with the proprietor thereof, shall have joint custody of all merchandise stored in the warehouse; and all labor on the merchandise so stored shall be performed by the owner or proprietor of the warehouse, under supervision of the officer of the customs in charge of the same, at the expense of the owner or proprietor.

The amendment was agreed to.

Mr. McCUMBER. On page 388, line 14, after the word "proprietor," I move on behalf of the committee to insert:

The compensation of such officer of the customs and other customs employees appointed to supervise the receipt of merchandise into any such warehouse and deliveries therefrom shall be reimbursed to the Government by the proprietor of such warehouse.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McCUMBER. On behalf of the committee, I move, on page 388, line 15, to strike out "Exportations from warehouse," and insert in lieu thereof "Bonded warehouses and exportations therefrom."

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 388, line 17, after the word "necessary," to insert "for the establishment of bonded warehouses and," so as to read:

SEC. 556. Bonded warehouses and exportations therefrom: The Secretary of the Treasury shall from time to time establish such rules and regulations as may be necessary for the establishment of bonded warehouses and to protect the interests of the Government in the conduct, management, and operation of such warehouses and in the withdrawal of and accounting for merchandise deposited therein.

The amendment was agreed to.

The next amendment was, on the same page, in line 21, after the word "therein," to strike out:

Provided, That no landing certificate shall be required for merchandise exported from the United States, except where the Secretary of the Treasury shall have good reason to believe that such certificate is necessary for the protection of the revenue, and shall specifically order the production of such certificate.

Mr. McCUMBER. I ask that the committee amendment beginning in line 21, page 388, which proposes to strike out the proviso, may be rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The next amendment was, on page 389, line 3, before the words "Warehouse period," to insert "Storable goods," so as to read:

SEC. 557. Storable goods—Warehouse period—Drawback, etc.

The amendment was agreed to.

The next amendment was, on page 390, line 2, after the word "refunded," to strike out the proviso in the following words:

Provided, That such merchandise shall be exported in the original packages in which the same was imported.

The amendment was agreed to.

The next amendment was, on page 390, after line 4, to insert:

Merchandise entered under bond, under any provision of law, may be destroyed, at the request and at the expense of the consignee, within the bonded period under customs supervision, in lieu of exportation, and the consignee relieved of the payment of duties thereon.

The amendment was agreed to.

The next amendment was, on page 390, line 10, after the figures "558," to strike out "Drawback" and to insert "Refund after delivery of goods," so as to make the paragraph read:

SEC. 558. Refund after delivery of goods: No refund or drawback of duty shall be allowed on the exportation of any merchandise after its release from the custody or control of the Government except in case of the exportation of articles manufactured or produced in whole or in part from imported materials on which a drawback of duties is expressly provided for by law.

The amendment was agreed to.

The next amendment was, on page 390, line 17, after the word "abandonment," to insert "of warehoused goods," and in line 24, after the word "section," to strike out "499" and to insert "493," so as to make the paragraph read:

SEC. 559. Abandonment of warehoused goods: Merchandise remaining in bonded warehouse beyond three years from the date of importation shall be regarded as abandoned to the Government and be sold under such regulations as the Secretary of the Treasury shall prescribe, and the proceeds of sale paid into the Treasury, as in the case of unclaimed merchandise covered by section 493 of this act, subject to the payment to the owner or consignee of such amount, if any, as shall remain after deduction of duties, charges, and expenses.

The amendment was agreed to.

The next amendment was, on page 392, at the beginning of line 14, to strike out "shall appear" and to insert "appears"; in the same line, after the word "collector," to strike out "of customs"; in the same line, after the word "it," to strike out "shall be" and to insert "is," so as to read:

SEC. 562. Manipulation in warehouse: Unless by special authority of the Secretary of the Treasury, no merchandise shall be withdrawn from bonded warehouse in less quantity than an entire bale, cask, box, or other package; or, if in bulk, in the entire quantity imported or in a quantity not less than 1 ton weight. All merchandise so withdrawn shall be withdrawn in the original packages in which imported unless, upon the application of the importer, it appears to the collector that it is necessary to the safety or preservation of the merchandise to repack or transfer the same.

The amendment was agreed to.

The next amendment was, on page 392, line 18, after the word "Treasury," to insert "and under customs supervision, at the expense of the proprietor," ; and, in line 25, after the word "warehouse," to insert "The scouring or carbonizing of wool shall not be considered a process of manufacture within the provisions of this section," so as to make the proviso read:

Provided, That upon permission therefor being granted by the Secretary of the Treasury, and under customs supervision, at the expense of the proprietor, merchandise may be cleaned, sorted, repacked, or otherwise changed in condition, but not manufactured, in bonded warehouses established for that purpose and be withdrawn therefrom for exportation, without payment of the duties, or for consumption, upon payment of the duties accruing thereon, in its condition at the time of with-

drawal from warehouse. The scouring or carbonizing of wool shall not be considered a process of manufacture within the provisions of this section.

The amendment was agreed to.

The next amendment was, on page 393, line 8, after the word "to," to strike out "him" and to insert "the Board of General Appraisers of"; in line 16, after the word "vehicle," to strike out "the Secretary of the Treasury" and to insert "such board"; in line 17, after the word "to," to strike out "abate" and to insert "order an abatement"; in line 18, after the word "be," to insert "and the Secretary of the Treasury is authorized to pay,"; and in line 21, after the word "paid," to strike out "or accruing thereon," so as to read:

SEC. 563. Allowance for loss—Abandonment: In no case shall there be any abatement or allowance made in the duties for any injury, deterioration, loss, or damage sustained by any merchandise while remaining in a bonded warehouse: *Provided*, That upon the production of satisfactory proof to the Board of General Appraisers of actual injury or destruction, in whole or in part, of any merchandise by accidental fire or other casualty, while in bonded warehouse, or in the appraiser's stores undergoing appraisal, or while in transportation under bond from one port to another, or while in the custody of the officers of the customs, although not in bond, or while within the limits of any port of entry, and before the same has been landed from the importing vessel or vehicle, such board is hereby authorized to order an abatement or refund, as the case may be, and the Secretary of the Treasury is authorized to pay, out of any moneys in the Treasury not otherwise appropriated, the amount of duties paid:

Mr. McCUMBER. On page 393, line 21, I move to amend the amendment by striking out the word "paid" and insert in lieu thereof "paid. Notice in writing shall be filed with the collector of the district in which such actual injury or destruction was sustained or occurred, and the collector shall transmit such notice, together with all papers and documents, to the board for due assignment and determination, and such determination shall be final and conclusive upon all persons interested therein except in cases where an appeal may be filed by either party in the United States Court of Customs Appeals within the time and in the manner provided by law."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 393, line 22, after the word "the," to strike out "importer may" and to insert "consignee may, with the consent of the Secretary of the Treasury," so as to make the additional proviso read:

And provided further, That the consignee may, with the consent of the Secretary of the Treasury, at any time prior to three years from the date of original importation, abandon to the Government any merchandise in bonded warehouse and be relieved of the payment of duties thereon.

The amendment was agreed to.

The next amendment was, on page 395, line 11, after the word "enforcement," to strike out "of the customs laws" and to insert "provisions," so as to read:

Part 5.—Enforcement provisions.

The amendment was agreed to.

The next amendment was, on page 395, line 15, after the word "the," to insert "Secretary of the"; in the same line, after the word "Treasury," to strike out "Department"; and, in line 16, after the word "collector," to strike out "of customs," so as to make the paragraph read:

SEC. 581. Boarding vessels: Officers of the customs or of the Coast Guard, and agents or other persons authorized by the Secretary of the Treasury or appointed for that purpose in writing by a collector, may at any time go on board of any vessel or vehicle at any place in the United States or within four leagues of the coast of the United States, without as well as within their respective districts, to examine the manifest and to inspect, search, and examine the vessel or vehicle, and every part thereof, and any person, trunk, or package on board, and to this end to hail and stop such vessel or vehicle, if under way, and use all necessary force to compel compliance; and if it shall appear that any breach or violation of the laws of the United States has been committed, whereby or in consequence of which such vessel or vehicle, or the merchandise or any part thereof on board of or imported by such vessel or vehicle, is liable to forfeiture, it shall be the duty of such officer to make seizure of the same and to arrest, or, in case of escape or attempted escape, to pursue and arrest any person engaged in such breach or violation.

The amendment was agreed to.

The next amendment was, on page 396, after line 7, to insert:

Officers of the Department of Commerce and other persons authorized by such department may go on board of any vessel at any place in the United States or within four leagues of the coast of the United States and hail, stop, and board such vessels in the enforcement of the navigation laws and arrest or, in case of escape or attempted escape, pursue and arrest any person engaged in the breach or violation of the navigation laws.

The amendment was agreed to.

The next amendment was, on page 396, line 18, after the word "and," where it occurs the second time, to strike out "for the employment of," and to insert "he is authorized to employ," so as to make the paragraph read:

SEC. 582. Examination of baggage: The Secretary of the Treasury may prescribe regulations for the search of persons and baggage, and he is authorized to employ female inspectors for the examination and search of persons of their own sex; and all persons coming into the United States from foreign countries shall be liable to detention and search by authorized officers or agents of the Government under such regulations.

The amendment was agreed to.

The next amendment was, on page 396, line 25, after the word "vessel," to strike out "or," and to insert "and the person in charge of every"; on page 397, line 1, after the word "port," to strike out "of," and to insert "or place in," so as to make the paragraph read:

SEC. 583. Certification of manifest: The master of every vessel and the person in charge of every vehicle bound to a port or place in the United States shall deliver to the officer of the customs or Coast Guard who shall first demand it of him, the original and one copy of the manifest of such vessel or vehicle, and such officer shall certify on the back of the original manifest to the inspection thereof and return the same to the master or other person in charge.

The amendment was agreed to.

The next amendment was, on page 397, line 8, before the word "person," to strike out "or other" and to insert "of any vessel and any"; at the beginning of line 9, to strike out "vessel or"; in line 9, after the word "who," to strike out "shall" and to insert "does"; in line 12, before the word "found," to strike out "shall be" and to insert "is"; in the same line, afer the word "of," to insert "or after unlading from"; in line 13, after the word "which," to strike out "shall" and to insert "is"; in the same line, after the word "not," to strike out "be"; in line 14, after the word "or," to insert "does not"; in line 15, after the word "master," to insert "of such vessel"; in the same line, after the word "or," to strike out "other" and to insert "the"; in line 16, after the word "such," to strike out "vessel or"; in line 17, after the word "of," to strike out "such" and to insert "the"; in the same line, after the word "merchandise," to insert "so found or unladen"; in line 20, after the word "be," to strike out "forfeited" and to insert "subject to forfeiture"; in line 22, after the word "manifest," to strike out "shall be" and to insert "is," so as to read:

SEC. 584. Falsity or lack of manifest: Any master of any vessel and any person in charge of any vessel bound to the United States who does not produce the manifest to the officer demanding the same shall be liable to a penalty of $500, and if any merchandise, including sea stores, is found on board of or after unlading from such vessel or vehicle which is not included or described in said manifest or does not agree therewith, the master of such vessel or the person in charge of such vehicle shall be liable to a penalty equal to the value of the merchandise so found or unladen, and any such merchandise belonging or consigned to the master or other officer or to any of the crew of such vessel, or to the owner or person in charge of such vehicle, shall be subject to forfeiture, and if any merchandise described in such manifest is not found on board the vessel or vehicle the master or other person in charge shall be subject to a penalty of $500.

The amendment was agreed to.

The next amendment was, on page 398, after line 5, to insert:

If any of such merchandise so found consists of smoking opium or opium prepared for smoking, the master of such vessel or the person in charge of such vehicle shall be liable to a penalty of $25 for each ounce thereof so found. Such penalty shall constitute a lien upon such vessel, which may be enforced by a libel in rem. Clearance of any such vessel may be withheld until such penalty is paid or until a bond, satisfactory to the collector, is given for the payment thereof. The provisions of this paragraph shall not prevent the forfeiture of any such vessel or vehicle under any other provision of law.

The amendment was agreed to.

The next amendment was, on page 398, line 18, after the word "vehicle," to insert "from a foreign port or place"; at the end of the same line, to strike out "having arrived" and to insert "arrives"; in line 19, after the word "district," to insert "and"; in line 21, after the word "necessity," to strike out "before report or entry shall have been made" and to insert "without making a report or entry under the provisions of this act"; in line 23, after the word "merchandise," to strike out "shall be" and to insert "is"; at the beginning of line 24, to strike out "without a permit therefor" and to insert "before such report or entry"; on page 399, line 1, after the word "master," to insert "of such vessel"; at the beginning of line 2, to insert "and the person in charge of such vehicle shall be liable to a penalty of $500, and any such vessel or vehicle shall be subject to forfeiture"; in line 4, after the word "any," to strike out "collector" and insert "customs"; and in line 5, after the word "vessel," to insert "or vehicle," so as to make the paragraph read:

SEC. 585. Departure before report or entry: If any vessel or vehicle from a foreign port or place arrives within the limits of any collection district and departs or attempts to depart, except from stress of weather or other necessity, without making a report or entry under the provisions of this act, or if any merchandise is unladen therefrom before such report or entry, the master of such vessel shall be liable to a penalty of $5,000, and the person in charge of such vehicle shall be liable to a penalty of $500, and any such vessel or vehicle shall be subject to forfeiture, and any customs or Coast Guard officer may cause such vessel or vehicle to be arrested and brought back to the most convenient port of the United States.

The amendment was agreed to.

The next amendment was, on page 399, line 7, after the word "unlawful," to strike out "landing" and to insert "unlading—exception"; in line 9, after the word "who," to strike out "shall allow" and to insert "allows"; in line 11, after the word "within," to strike out "the waters" and to insert "4 leagues of the coast"; in line 13, after the word "of," to strike out "cargo" and to insert "such merchandise"; at the beginning of line 14, to insert "before he"; in line 15, after the word "to," to insert "twice"; in line 16, after the word "merchandise," to insert "but not less than $1,000, and such vessel," so as to read:

SEC. 586. Unlawful unlading—Exception: The master of any vessel from a foreign port or place who allows any merchandise (including sea stores) to be unladen from such vessel at any time after its arrival within 4 leagues of the coast of the United States and before such vessel has come to the proper place for the discharge of such merchandise, and before he has received a permit to unlade, shall be liable to a penalty equal to twice the value of the merchandise but not less than $1,000, and such vessel and the merchandise shall be subject to seizure and forfeiture:

The amendment was agreed to.

The next amendment was, on page 400, at the beginning of line 4, to strike out "shall be," and to insert "is," so as to make the proviso read:

Provided, That whenever any part of the cargo or stores of a vessel has been unladen or transshipped because of accident, stress of weather, or other necessity, the master of such vessel shall, as soon as possible thereafter, notify the collector of the district within which such unlading or transshipment has occurred, or the collector within the district at which such vessel shall first arrive thereafter, and shall furnish proof that such unlading or transshipment was made necessary by accident, stress of weather, or other unavoidable cause, and if the collector is satisfied that the unlading or transshipment was in fact due to accident, stress of weather, or other necessity the penalties above described shall not be incurred.

The amendment was agreed to.

The next amendment was, on page 400, line 8, before the word "unladen," to strike out "or stores," and to insert "(including sea stores)"; in the same line, after the word "unladen," to strike out "from any vessel, contrary to law," and to insert "in violation of the provisions of section 586 of this act"; in line 10, before the word "transshipped," to strike out "shall be," and to insert "is"; in line 12, after the word "merchandise," to strike out "or stores shall be," and to insert "is"; in the same line, after the word "placed," to strike out "or" and to insert "and"; in line 14, after the word "to," to insert "twice"; in the same line, after the word "merchandise," to insert "but not less than $1,000"; and in line 15, after the word "vessel," to insert "and such merchandise," so as to make the paragraph read:

SEC. 587. Unlawful transshipment: If any merchandise (including sea stores) unladen in violation of the provisions of section 586 of this act is transshipped to or placed in or received on any other vessel, the master of the vessel on which such merchandise is placed, and any person aiding or assisting therein, shall be liable to a penalty equal to twice the value of the merchandise, but not less than $1,000, and such vessel and such merchandise shall be liable to seizure and forfeiture.

The amendment was agreed to.

The next amendment was, on page 400, line 18, after the word "merchandise," to strike out "shall be" and to insert "is"; in the same line, after the word "port," to insert "or place"; in line 20, after the word "and," to strike out "shall be" and insert "is"; in line 21, after the word "port," to insert "or place"; in line 25, after the word "port," to insert "or place"; on page 401, line 1, after the word "port," to insert "or place"; in line 4, after the word "port," to insert "or place"; at the beginning of line 6, after the word "per," to insert "net"; and in the same line, after the word "ton," to strike out "on her admeasurement," so as to make the paragraph read:

SEC. 588. Transportation between ports: If any merchandise is laden at any port or place in the United States upon any vessel belonging wholly or in part to a subject of a foreign country, and is taken thence to a foreign port or place to be reladen and reshipped to any other port in the United States, either by the same or by another vessel, foreign or American, with intent to evade the provisions relating to the transportation of merchandise from one port or place of the United States to another port or place of the United States in a vessel belonging wholly or in part to a subject of any foreign power, the merchandise shall, on its arrival at such last-named port or place, be seized and forfeited to the United States, and the vessel shall pay a tonnage duty of 50 cents per net ton.

The amendment was agreed to.

The next amendment was, on page 401, line 11, after the word "thereof," to strike out "shall be" and to insert "is"; in line 15, after the word "therein," to insert "and such merchandise"; and at the beginning of line 17, to strike out "for illegally introducing merchandise into the United States," so as to make the paragraph read:

SEC. 589. Unlawful relanding: If any merchandise entered or withdrawn for exportation without payment of the duties thereon, or with intent to obtain a drawback of the duties paid, or of any other allowances given by law on the exportation thereof, is relanded at any place in the United States without entry therefor having been made, the same shall be considered and treated as having been imported into the United States contrary to law, and all persons concerned therein and such merchandise shall be liable to the same penalties as are prescribed by section 593 of this act.

The amendment was agreed to.

The next amendment was, on page 401, line 19, after the word "shall," to insert "knowingly and willfully"; in line 20, after the word "drawback," to insert "allowance, or refund of duties"; at the beginning of line 25, to insert "allowance"; on page 402, at the beginning of line 2, to insert "shall be guilty of a felony, and upon conviction thereof"; in line 3, after the word "be," to strike out "subject to the payment of" and to insert "punished by"; in the same line, after the word "fine," to strike out "not to exceed" and to insert "or not more than"; in line 4, after the word "or," to strike out "to" and to insert "by"; in the same line, after the word "for," to strike out "a term not to exceed" and to insert "not more than"; in line 6, after the word "merchandise," to insert "or the value thereof," so as to make the paragraph read:

SEC. 590. False drawback claim: If any person shall knowingly and willfully file any false or fraudulent entry or claim for the payment of drawback, allowance, or refund of duties upon the exportation of merchandise, or shall knowingly and willfully make or file any false affidavit, abstract, record, certificate, or other document, with a view to securing the payment to himself or others of any drawback, allowance, or refund of duties, on the exportation of merchandise, greater than that legally due thereon, such person shall be guilty of a felony, and upon conviction thereof shall be punished by a fine of not more than $5,000 or by imprisonment for not more than two years, or both, and the merchandise or the value thereof to which such false entry or claim, affidavit, abstract, record, certificate, or other document relates shall be subject to forfeiture.

The amendment was agreed to.

The next amendment was, on page 402, line 9, after the word "Personal," to strike out "If any consignor, seller, owner, importer, consignee, agent, or other person or persons shall enter or introduce, or attempt to enter or introduce, into the commerce of the United States any merchandise by means of any fraudlent or false invoice, declaration, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or appliance whatsoever, or if such person or persons shall be guilty of any willful act or omission by means whereof the United States shall or may be deprived of any part of the duties legally accruing upon the merchandise or any portion thereof affected by such act or omission, or if any person or persons shall make any false statement, or shall aid or procure the making of any such false statement, in the declarations required to be filed upon, or in connection with, the entry of imported merchandise as to any material matter, without reasonable cause to believe the truth of such statement, such person or persons shall upon conviction be fined for each offense a sum not exceeding $5,000 or be imprisoned for a term not exceeding two years, or both," and in lieu thereof to insert:

If any consignor, seller, owner, importer, consignee, agent, or other person or persons enters or introduces, or attempts to enter or introduce, into the commerce of the United States any imported merchandise by means of any fraudulent or false invoice, declaration, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or appliance whatsoever, or makes any false statement in any declaration under the provisions of section 485 of this act without reasonable cause to believe the truth of such statement, or aids or procures the making of any such false statement as to any matter material thereto without reasonable cause to believe the truth of such statement, or is guilty of any willful act or omission by means whereof the United States shall or may be deprived of the lawful duties, or any portion thereof, accruing upon the merchandise, or any portion thereof, embraced or referred to in such invoice, declaration, affidavit, letter, paper, or statement, or affected by such act or omission, such person or persons shall upon conviction be fined for each offense a sum not exceeding $5,000, or be imprisoned for a time not exceeding two years, or both, in the discretion of the court: *Provided*, That nothing in this section shall be construed to relieve imported merchandise from forfeiture by reason of such false statement or for any cause elsewhere provided by law.

The amendment was agreed to.

The next amendment was, on page 404, line 4, after the word "goods," to strike out: "If any consignor, seller, owner, importer, consignee, agent, or other person or persons shall enter or introduce, or attempt to enter or introduce, into the commerce of the United States any merchandise by means of any fraudulent or false invoice, declaration, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or appliance whatsoever, or if such person or persons shall be guilty of any willful act or omission by means whereof the United States shall or may be deprived of any part of the duties legally accruing upon the merchandise or any portion thereof affected by such act or omission, or if any person or persons shall make any false statement, or shall aid or procure the making of any such false statement, in the declarations required to be filed upon, or in connection with, the entry of

imported merchandise as to any material matter, without reasonable cause to believe the truth of such statement, such merchandise, or the value thereof, to be recovered from such person or persons shall be forfeited: *Provided*, That such forfeiture shall only apply to the whole of the merchandise, or the value thereof, in the case or package containing the particular article or articles of merchandise to which such fraud, false paper, or statement, or act or omission relates," and in lieu thereof to insert:

If any consignor, seller, owner, importer, consignee, agent, or other person or persons enters or introduces, or attempts to enter or introduce, into the commerce of the United States any imported merchandise by means of any fraudulent or false invoice, declaration, affidavit, letter, paper, or by means of any false statement, written or verbal, or by means of any false or fraudulent practice or appliance whatsoever, or makes any false statement in any declaration under the provisions of section 485 of this act without reasonable cause to believe the truth of such statement, or aids or procures the making of any such false statement as to any matter material thereto without reasonable cause to believe the truth of such statement, or is guilty of any willful act or omission by means whereof the United States is or may be deprived of the lawful duties or any portion thereof accruing upon the merchandise or any portion thereof, embraced or referred to in such invoice, declaration, affidavit, letter, paper, or statement, or affected by such act or omission, such merchandise, or the value thereof, to be recovered from such person or persons, shall be subject to forfeiture, which forfeiture shall only apply to the whole of the merchandise or the value thereof in the case or package containing the particular article or articles of merchandise to which such fraud or false paper or statement relates. The arrival within the territorial limits of the United States of any merchandise consigned for sale and remaining the property of the shipper or consignor, and the acceptance of a false or fraudulent invoice thereof by the consignee or the agent of the consignor, or the existence of any other facts constituting an attempted fraud, shall be deemed, for the purposes of this paragraph, to be an attempt to enter such merchandise notwithstanding no actual entry has been made or offered.

The amendment was agreed to.

The next amendment was, on page 406, line 10, after the word "importations," to strike out "If any person shall smuggle or clandestinely introduce into the United States any merchandise, or shall knowingly import or bring into the United States any merchandise contrary to law; or shall aid, assist, or abet in the importation or bringing into the United States of any merchandise contrary to law; or shall receive, conceal, buy, sell, or transport, or in any manner facilitate the transportation, concealment, or sale of such merchandise, knowing the same to have been imported or brought into the United States contrary to law, such merchandise shall be forfeited, and the offender shall be fined in a sum not exceeding $5,000 nor less than $50 or be imprisoned for a term not exceeding two years, or both. Whenever on trial for a violation of this section the defendant is shown to have or to have had possession of such goods, such possession shall be deemed evidence sufficient to authorize a conviction, unless the defendant shall explain the possession to the satisfaction of the jury," and in lieu thereof to insert:

(a) If any person knowingly and willfully, with intent to defraud the revenue of the United States, smuggles, or clandestinely introduces, into the United States any merchandise which should have been invoiced, or makes out or passes, or attempts to pass, through the customhouse any false, forged, or fraudulent invoice, every such person, his, her, or their aiders and abettors, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be fined in any sum not exceeding $5,000, or imprisoned for any term of time not exceeding two years, or both, at the discretion of the court.

(b) If any person fraudulently or knowingly imports or brings into the United States, or assists in so doing, any merchandise, contrary to law, or receives, conceals, buys, sells, or in any manner facilitates the transportation, concealment, or sale of such merchandise after importation, knowing the same to have been imported or brought into the United States contrary to law, such merchandise shall be forfeited and the offender shall be fined in any sum not exceeding $5,000 nor less than $50, or be imprisoned for any time not exceeding two years, or both. Whenever, on trial for a violation of this section, the defendant is shown to have or to have had possession of such goods, such possession shall be deemed evidence sufficient to authorize conviction, unless the defendant shall explain the possession to the satisfaction of the jury.

The amendment was agreed to.

The next amendment was, on page 408, after line 2, to strike out:

SEC. 594. Searches and seizures: Officers and persons authorized to make searches and seizures, or persons assisting them or acting under their direction may at any time, if they deem the same necessary, enter into or upon, or pass through, the lands, inclosures, or buildings, other than a dwelling house, of any person whomsoever, and such officers or persons may stop, search, and examine any vehicle, beast, or person on which or whom they shall suspect there is merchandise introduced into the United States contrary to law, whether by the person in possession or in charge of such vehicle or beast, or otherwise, and may search any trunk, container, or package in which they have reasonable cause to suspect there is merchandise imported contrary to law.

The amendment was agreed to.

The next amendment was, on page 408, after line 15, to strike out:

SEC. 595. Same—Obstruction: If any master of a vessel, or the person driving or conducting or having charge of any beast or vehicle, or other person, shall refuse to stop or allow search and examination to be made when called upon to do so by such officer or person, or shall intentionally cause any obstruction or hindrance to any such officer or person in the performance of his duties, he shall, for every such offense, be subject to a fine of not more than $1,000 nor less than $50.

The amendment was agreed to.

The next amendment was, at the top of page 409, to strike out:

SEC. 596. Authority: Every officer or other person authorized to make searches and seizures by this act shall, at the time of executing any of the powers conferred upon him, make known his character as an officer or agent of the Government, and if requested shall show his official badge, commission, letter of appointment, or authorization. All such officers and persons shall have authority to demand that any person within a distance of 3 miles assist them in making any arrest, search, or seizure authorized by law, if such assistance be necessary; and if such person shall, without reasonable excuse, refuse or neglect so to assist on proper demand, he shall be deemed guilty of a misdemeanor, punishable by a fine of not more than $200 nor less than $5.

The amendment was agreed to.

The next amendment was, on page 409, line 14, after the figures "594," to strike out "Same—Guilt" and to insert "Seizure of vessels and vehicles," so as to read:

SEC. 594. Seizure of vessels and vehicles: Whenever a vessel or vehicle, or the owner or master, conductor, driver, or other person in charge thereof, has become subject to a penalty for violation of the customs revenue laws of the United States, such vessel or vehicle shall be held for the payment of such penalty and may be seized and proceeded against summarily by libel to recover the same.

The amendment was agreed to.

The next amendment was, on page 409, line 22, after the word "person," to strike out "or corporation," so as to make the proviso read:

Provided, That no vessel or vehicle used by any person as a common carrier in the transaction of business as such common carrier shall be so held or subject to seizure or forfeiture under the customs laws, unless it shall appear that the owner or master of such vessel or the conductor, driver, or other person in charge of such vehicle was at the time of the alleged illegal act a consenting party or privy thereto.

The amendment was agreed to.

The next amendment was, on page 410, line 5, before the word "warrant," to strike out "same," so as to read:

SEC. 595. Warrant: If any collector of customs or other officer or person authorized to make searches and seizures shall have cause to suspect the presence in any dwelling house, store, or other building or place of any merchandise upon which the duties have not been paid, or which has been otherwise brought into the United States contrary to law, he may make application, under oath, to any justice of the peace, to any municipal, county, State, or Federal judge, or to any United States commissioner, and shall thereupon be entitled to a warrant to enter such dwelling house in the daytime only, or such store or other place at night or by day, and to search for and seize such merchandise.

The amendment was agreed to.

The next amendment was, on page 410, line 23, after the word "who," to strike out "shall have received or deposited" and to insert "receives or deposits"; in line 25, after the word "or," to strike out "carried" and to insert "carries any merchandise"; on page 411, line 1, after the word "same," to strike out "any merchandise," and in the same line, after the word "or," to strike out "shall have aided" and to insert "aids," so as to make the paragraph read:

SEC. 596. Buildings on boundary: Any person who receives or deposits in such building upon the boundary line between the United States and any foreign country, or carries any merchandise through the same, or aids therein, in violation of law, shall be punishable by a fine of not more than $5,000 or by imprisonment for not more than two years, or both.

The amendment was agreed to.

The next amendment was, on page 411, after the word "Concealment," to strike out the comma and "and so forth"; in line 6, after the word "merchandise," to strike out "shall be" and to insert "is"; in line 9, after the word "obliterated," to strike out "the same" and to insert "such merchandise and packages"; in line 10, after the word "be," to strike out "forfeited to the United States" and to insert "subject to forfeiture"; and in line 16, after the word "act," to strike out "for the illegal introduction of merchandise into the United States," so as to make the paragraph read:

SEC. 597. Concealment: If any merchandise is fraudulently concealed in, removed from, or repacked in any bonded warehouse, or if any marks or numbers placed upon packages deposited in such a warehouse be fraudulently altered, defaced, or obliterated, such merchandise and packages shall be subject to forfeiture, and all persons convicted of the fraudulent concealment, repacking, or removal of such merchandise, or of altering, defacing, or obliterating such marks and numbers thereon, and all persons aiding and abetting therein, shall be liable to the same penalties as are imposed by section 593 of this act.

The amendment was agreed to.

The next amendment was, on page 411, line 18, after the word "Seals," to strike out the comma and "and so forth"; in the same line, after the word "any," to strike out "authorized" and to insert "unauthorized"; in line 19, after the word "person," to strike out "shall affix or attach" and to

insert "affixes or attaches"; in line 20, after the word "willfully," to strike out "assist or encourage" and to insert "assists or encourages"; in line 24, after the word "person," to strike out "shall"; at the beginning of line 25, to strike out "remove, break, injure, or deface" and to insert "removes, breaks, injures, or defaces"; on page 412, at the beginning of line 3, to insert "or baggage"; in the same line, after the word "bond," to insert "or in customs custody"; in the same line, after the word "or," to strike out "shall aid or abet or encourage" and to insert "willfully aids, abets, or encourages"; at the beginning of line 7, to strike out "shall"; in the same line, after the word "maliciously," to strike out "enter" and to insert "enters"; in line 10, after the word "merchandise," to insert "or baggage"; in the same line, after the word "or," to strike out "shall"; in line 11, before the words "to be," to strike out "remove or cause" and to insert "removes or causes"; in line 12, after the word "merchandise," to insert "or baggage"; at the beginning of line 14, to strike out "shall aid or assist" and to insert "aids or assists"; in the same line, after the word "person," to strike out "shall receive or transport" and to insert "receives or transports"; in line 15, after the word "merchandise," to insert "or baggage"; in line 19, after the word "are," to strike out "prescribed in" and to insert "imposed by"; and in line 20, after the word "act," to strike out "for the illegal introduction of merchandise into the United States," so as to make the paragraph read:

SEC. 598. False seals: If any unauthorized person affixes or attaches or in any way willfully assists or encourages the affixing or attaching of a customs seal or other fastening to any vessel or vehicle, or of any seal, fastening, or mark purporting to be a customs seal, fastening, or mark; or if any unauthorized person willfully or maliciously removes, breaks, injures, or defaces any customs seal or other fastening placed upon any vessel, vehicle, warehouse, or package containing merchandise or baggage in bond or in customs custody, or willfully aids, abets, or encourages any other person to remove, break, injure, or deface such seal, fastening, or mark; or if any person maliciously enters any bonded warehouse or any vessel or vehicle laden with or containing bonded merchandise with intent unlawfully to remove or cause to be removed therefrom any merchandise or baggage therein, or unlawfully removes or causes to be removed any merchandise or baggage in such vessel, vehicle, or bonded warehouse or otherwise in customs custody or control or aids or assists therein; or if any person receives or transports any merchandise or baggage unlawfully removed from any such vessel, vehicle, or warehouse, knowing the same to have been unlawfully removed, he shall be guilty of a felony and liable to the same penalties as are imposed by section 593 of this act.

The amendment was agreed to.

Mr. McCUMBER. On page 412, beginning with the word "No," in line 22, I move to strike out all of the matter down to and including line 17, on page 413, and to insert in lieu thereof the following:

No person employed under the authority of the United States in the collection of duties on imports or tonnage shall own, either in whole or in part, any vessel, or act as agent, attorney, or consignee for the owner or owners of any vessel, or of any cargo or lading on board the same; nor shall any such person import, or be concerned directly or indirectly in the importation, of any merchandise for sale into the United States. Every person who violates this section shall be liable to a penalty of $500.

The amendment was agreed to.

The next amendment was, on page 413, line 19, after the word "who," to strike out "shall"; in line 20, after the word "law," to strike out "solicit, demand, exact, or receive" and to insert "solicits, demands, exacts, or receives"; on page 414, line 2, after the word "of," to strike out "merchandise, including" and to insert "merchandise or"; in line 3, after the word "shall," to insert "be guilty of a misdemeanor and"; in line 4, after the word "thereof," to strike out "be fined" and to insert "shall be punished by a fine"; in line 5, after the word "or," to strike out "be imprisoned" and to insert "by imprisonment"; and in line 8, after the word "be," to strike out "regarded as," so as to make the paragraph read:

SEC. 600. Gratuity: Any officer or employee of the United States who, except in payment of the duties or exactions fixed by law, solicits, demands, exacts, or receives from any person, directly or indirectly, any gratuity, money, or thing of value for any service performed under the customs laws, or in consideration of any official act to be performed by him, or of the omission of performance of any such act, in connection with or pertaining to the importation, entry, inspection or examination, or appraisement of merchandise or baggage, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment for not more than two years, or both, and evidence satisfactory to the court in which the trial is had of such soliciting, demanding, exacting, or receiving shall be prima facie evidence that the same was contrary to law.

The amendment was agreed to.

The next amendment was, on page 414, line 10, after the word "who," to strike out "shall give" and to insert "gives"; in line 11, after the word "or," where it occurs the first time, to strike out "offer" and to insert "offers"; in the same line, after the word "or," where it occurs the second time, to strike out "promise" and to insert "promises"; in line 16, after the word "of," to strike out "goods, wares, or"; in the same line, after the word "merchandise," to strike out the comma and "including herein any" and to insert "or"; in line 18, after the word "or," where it occurs the first time, to strike out "shall"; in line 19, after the word "character," to strike out "attempt" and to insert "attempts"; in line 21, after the word "shall," to strike out "be liable to" and to insert "be guilty of a misdemeanor and on conviction thereof shall be punished by"; in line 23, after the word "or," to insert "by"; in line 25, before the word "offering," to strike out "or"; in the same line, after the word "give," to insert "or attempting to influence or control"; and on page 415, line 2, after the word "be," to strike out "regarded as," so as to make the section read:

SEC. 601. Bribery: Any person who gives or offers to give, or promises to give, any money or thing of value, directly or indirectly, to any officer or employee of the United States in consideration of or for any act or omission contrary to law in connection with or pertaining to the importation, appraisement, entry, examination, or inspection of merchandise or baggage, or of the liquidation of the entry thereof, or by threats or demands or promises of any character attempts to improperly influence or control any such officer or employee of the United States as to the performance of his official duties, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000 or by imprisonment for a term not exceeding two years, or both, and evidence of such giving, offering, or promising to give, or attempting to influence or control, satisfactory to the court in which such trial is had, shall be prima facie evidence that the same was contrary to law.

The amendment was agreed to.

The next amendment was, on page 415, line 6, after the word "merchandise," to insert "or baggage"; in line 7, after the word "seizure," to strike out "and forfeiture"; in line 8, after the word "laws," to strike out "immediately upon the detection of the violation of such laws"; in line 9, after the word "report," to strike out "the same" and to insert "every such seizure immediately"; in line 10, after the word "collector," to strike out "of customs"; at the beginning of line 12 to strike out "of customs"; in the same line, after the word "vehicle," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; and in line 13, after the word "him," to insert "and to report immediately to such collector every violation of the customs laws," so as to make the section read:

SEC. 602. Seizure procedure—Report: It shall be the duty of any officer, agent, or other person authorized by law to make seizures of merchandise or baggage subject to seizure for violation of the customs laws, to report every such seizure immediately to the collector for the district in which such violation occurred, and to turn over and deliver to such collector any vessel, vehicle, merchandise, or baggage seized by him, and to report immediately to such collector every violation of the customs laws.

The amendment was agreed to.

The next amendment was, on page 415, line 16, after the word "collector," to strike out "of customs," so as to make the section read:

SEC. 603. Same—Facts to report: It shall be the duty of the collector whenever a seizure of merchandise has been made for a violation of the customs laws to report the same to the Solicitor of the Treasury, and promptly also to report any such seizure or violation of the customs laws to the United States attorney for the district in which such violation has occurred, or in which such seizure was made, including in such report a statement of all the facts and circumstances of the case within his knowledge, with the names of the witnesses, and citation of the statute or statutes believed to have been violated, and on which reliance may be had for forfeiture or conviction.

The amendment was agreed to.

The next amendment was, on page 416, line 3, after the word "collectors," to strike out "of customs," and in line 12, after the word "attorney," to strike out "shall decide" and to insert "decides," so as to make the section read:

SEC. 604. Same—Prosecution: It shall be the duty of every United States district attorney immediately to inquire into the facts of cases reported to him by collectors and the laws applicable thereto, and if it appears probable that any fine, penalty, or forfeiture has been incurred by reason of such violation, for the recovery of which the institution of proceedings in the United States district court is necessary, forthwith to cause the proper proceedings to be commenced and prosecuted, without delay, for the recovery of such fine, penalty, or forfeiture in such case provided, unless, upon inquiry and examination, such district attorney decides that such proceedings can not probably be sustained or that the ends of public justice do not require that they should be instituted or prosecuted, in which case he shall report the facts to the Secretary of the Treasury for his direction in the premises.

The amendment was agreed to.

The next amendment was, on page 416, at the beginning of line 18, to strike out "and," and in the same line, after the word "merchandise," to insert "and baggage," so as to make the section read:

SEC. 605. Same—Custody: All vessels, vehicles, merchandise, and baggage seized under the provisions of the customs laws, or laws relating to the navigation, registering, enrolling or licensing, or entry or clearance, of vessels, unless otherwise provided by law, shall be placed and remain in the custody of the collector for the district in which the seizure was made to await disposition according to law.

The amendment was agreed to.

The next amendment was, on page 416, line 25, after the word "appraiser," to strike out "of merchandise to appraise" and to insert "to determine"; on page 417, line 1, after the word "the," to insert "domestic"; in the same line, after the word "value," to insert "at the time and place of appraisement"; in line 2, after the word "vehicle," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; in line 3, before the word "seized," to strike out "so"; and in the same line, after the word "seized," to insert "under the customs laws," so as to make the section read:

SEC. 606. Same—Appraisement: The collector shall require the appraiser to determine the domestic value, at the time and place of appraisement, of any vessel, vehicle, merchandise, or baggage seized under the customs laws.

The amendment was agreed to.

The next amendment was, on page 417, line 4, after the word "If," to strike out "the" and to insert "such"; in line 5, after the word "vehicle," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; in line 6, before the word "not," to strike out "shall" and to insert "does"; and in line 10, after the word "direct," to strike out "by general regulations or otherwise," so as to make the section read:

SEC. 607. Same—Value $1,000 or less: If such value of such vessel, vehicle, merchandise, or baggage returned to the appraiser, does not exceed $1,000, the collector shall cause a notice of the seizure of such articles and the intention to forfeit and sell the same to be published for at least three successive weeks in such manner as the Secretary of the Treasury may direct.

The amendment was agreed to.

The next amendment was, on page 417, line 13, before the word "merchandise," to strike out "or"; in the same line, before the word "may," to insert "or baggage"; in line 14, after the word "within," to strike out "20" and to insert "twenty"; in line 16, after the word "interest," to strike out "in the articles seized" and to insert "therein," so as to make the section read:

SEC. 608. Same—Claims: Any person claiming such vessel, vehicle, merchandise, or baggage may at any time within twenty days from the date of the first publication of the notice of seizure file with the collector a claim stating his interest therein. Upon the filing of such claim, and the giving of a bond to the United States in the penal sum of $250, with sureties to be approved by the collector, conditioned that in case of condemnation of the articles so claimed the obligor shall pay all the costs and expenses of the proceedings to obtain such condemnation, the collector shall transmit such claim and bond, with a duplicate list and description of the articles seized, to the United States attorney for the district in which seizure was made, who shall proceed to a condemnation of the merchandise or other property in the manner prescribed by law.

The amendment was agreed to.

The next amendment was, on page 418, line 3, after the word "claim," to strike out "shall be" and to insert "is"; in line 5, after the word "vehicle," to strike out "or"; in line 6, after the word "merchandise," to insert "or baggage"; and, in line 10, after "United States.", to strike out "The collector, however, shall have power to adjourn such sale from time to time for a period not exceeding 30 days in all.", so as to make the section read:

SEC. 609. Same—Sale: If no such claim is filed or bond given within the 20 days hereinbefore specified, the collector shall declare the vessel, vehicle, merchandise, or baggage forfeited, and shall sell the same at public auction in the same manner as merchandise abandoned to the United States is sold, and shall deposit the proceeds of sale, after deducting the actual expenses of seizure, publication, and sale, in the Treasury of the United States.

The amendment was agreed to.

The next amendment was, on page 418, line 15, after the word "vehicle," to strike out "or"; in line 16, after the word "merchandise," to insert "or baggage," and in the same line, after the word "seized," to strike out "shall be" and to insert "is," so as to make the section read:

SEC. 610. Same—Value more than $1,000: If the value returned by the appraiser of any vessel, vehicle, merchandise, or baggage so seized is greater than $1,000 the collector shall transmit a report of the case, with the names of available witnesses, to the United States attorney for the district in which the seizure was made for the institution of the proper proceedings for the condemnation of such property.

The amendment was agreed to.

The next amendment was, on page 418, after line 21, to strike out:

SEC. 614. Delivery under bond: Any person having or claiming to have an interest in any vessel, vehicle, or merchandise, whether valued at more or less than $1,000, under seizure for a violation of the customs laws or of the laws relating to the entry or clearance of vessels or to their navigation or equipment, or to the registering, enrolling, or licensing of vessels, or to the payment of tonnage tax thereon may file his petition with the United States district court for the district in which the seizure was made for the delivery of such vessel, vehicle, or merchandise to him. Upon the filing of such petition, and of a certificate from the collector of customs for the district in which the seizure was made that the duty or tonnage tax on such vessel, vehicle, or merchandise has been paid, and the filing of a bond with sureties to be approved by the court in a sum equal to the value of such vessel, vehicle, or merchandise, plus a further amount estimated by the court to cover the costs of the court in such proceedings, the court shall, by rule, order such vessel, vehicle, or merchandise to be delivered to the claimant pending the final determination of the condemnation proceedings. If the claimant or the district attorney shall be dissatisfied with the value of the merchandise as found by the appraiser, the court may, upon the motion of either party, cause a new appraisement to be made at the expense of the moving party by three disinterested persons to be appointed by the court, whose appraisement shall be conclusive for the purposes of this section. If final judgment is in favor of the claimant, the court shall cause the bond to be canceled, but if judgment is against the claimant as to the whole or any part of such vessel, vehicle, or merchandise, and the claimant does not within 20 days after the entry of such judgment pay into court the amount of the value of the vessel, vehicle, or merchandise so condemned, with the costs, judgment shall be entered on the bond, on motion in open court, without further delay.

The amendment was agreed to.

The next amendment was, on page 420, line 8, after the word "any," to insert "vessel, vehicle"; in the same line, after the word "merchandise," to insert "or baggage"; in line 11, after the word "located," to insert "or if a sale may be made more advantageously in any other district"; in line 13, after the word "order," to strike out "the same" and to insert "such vessel, vehicle, merchandise, or baggage"; in line 16, after the word "Treasury," to strike out "shall be" and to insert "is"; and in line 18, after the word "order," to strike out the words "the merchandise to be destroyed" and to insert "a destruction," so as to read:

SEC. 611. Same—Conditional sales: If the sale of any vessel, vehicle, merchandise, or baggage forfeited under the customs laws in the district in which seizure thereof was made be prohibited by the laws of the State in which such district is located, or if a sale may be made more advantageously in any other district, the Secretary of the Treasury may order such vessel, vehicle, merchandise, or baggage to be transferred for sale in any customs district in which the sale thereof may be permitted. And if the Secretary of the Treasury is satisfied that the proceeds of sale will not be sufficient to pay the costs thereof he may order a destruction by the customs officers:

The amendment was agreed to.

The next amendment was, on page 421, line 1, after the word "it," to strike out "shall appear" and to insert "appears"; in line 2, after the word "collector," to strike out "of customs"; in line 3, before the word "merchandise," to strike out "or"; in the same line, before the word "seized," to insert "or baggage"; in line 7, after the word "vehicle," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; at the end of the same line to strike out "is less than" and to insert "as determined by the appraiser under section 606 of this act does not exceed"; in line 9, after "$1,000," to strike out "and no bond has been given as provided in section 614 of this act" and to insert "and such vessel, vehicle, merchandise, or baggage has not been delivered under bond, the collector shall"; in line 13, after the word "return," to strike out "the collector shall"; in line 16, after the word "if," to strike out "the" and to insert "such"; in line 17, before the word "merchandise," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; at the end of the same line to strike out "shall be or exceed" and to insert "exceeds"; in line 21, before the word "merchandise," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; on page 422, line 3, after the word "vehicle," to strike out "or"; and in the same line, after the word "merchandise," to insert "or baggage," so as to make the section read:

SEC. 612. Summary sale: Whenever it appears to the collector that any vessel, vehicle, merchandise, or baggage seized under the customs laws is liable to perish or to waste or to be greatly reduced in value by keeping, or that the expense of keeping the same is disproportionate to the value thereof, and the value of such vessel, vehicle, merchandise, or baggage, as determined by the appraiser under section 606 of this act, does not exceed $1,000, and such vessel, vehicle, merchandise, or baggage has not been delivered under bond, the collector shall, within 24 hours after the receipt by him of the appraiser's return proceed forthwith to advertise and sell the same at auction under regulations to be prescribed by the Secretary of the Treasury. If such value of such vessel, vehicle, merchandise, or baggage exceeds $1,000 the collector shall forthwith transmit the appraiser's return and his report of the seizure to the United States district attorney, who shall petition the court to order an immediate sale of such vessel, vehicle, merchandise, or baggage, and if the ends of justice require it the court shall order such immediate sale, the proceeds thereof to be deposited with the court to await the final determination of the condemnation proceedings. Whether such sale be made by the collector or by order of the court, the proceeds thereof shall be held subject to claims of parties in interest to the same extent as the vessel, vehicle, merchandise, or baggage so sold would have been subject to such claim.

The amendment was agreed to.

The next amendment was, on page 422, line 6, before the word "merchandise," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; in line 10, after the word "Treasury," to insert "if the forfeiture and sale was under the customs laws, or to the Secretary of Commerce if the forfeiture and sale was under the navigation laws";

in line 21, after the word "Treasury," to insert "or the Secretary of Commerce"; in line 24, after the word "duties," to insert "if any"; and in the same line after the word "merchandise," to insert "or baggage"; on page 423, line 2, after the words "restoration," to strike out "shall be" and to insert "is"; in line 4, after the word "Treasury," to insert "or the Secretary of Commerce," and at the end of line 5 to strike out "distribute" and to insert "disposed of," so as to read:

SEC. 613. Disposition of proceeds: Any person claiming any vessel, vehicle, merchandise, or baggage, or any interest therein, which has been forfeited and sold under the provisions of this act, may at any time within three months after the date of sale apply to the Secretary of the Treasury if the forfeiture and sale was under the customs laws, or to the Secretary of Commerce if the forfeiture and sale was under the navigation laws, for a remission of the forfeiture and restoration of the proceeds of such sale, or such part thereof as may be claimed by him. Upon the production of satisfactory proof that the applicant did not know of the seizure prior to the declaration or condemnation of forfeiture, and was in such circumstances as prevented him from knowing of the same, and that such forfeiture was incurred without any willful negligence or intention to defraud on the part of the applicant, the Secretary of the Treasury or the Secretary of Commerce may order the proceeds of the sale, or any part thereof, restored to the applicant, after deducting the cost of seizure and of sale, the duties, if any, accruing on the merchandise or baggage, and any sum due on a lien for freight, charges, or contribution in general average that may have been filed. If no application for such remission or restoration is made within three months after such sale, or if the application be denied by the Secretary of the Treasury or the Secretary of Commerce, the proceeds of sale shall be disposed of as follows:

The amendment was agreed to.

The next amendment was, on page 423, line 7, before the word "proper," to strike out "All" and to insert "For the payment of all," and at the beginning of line 12 to strike out "court." and to insert "court;", so as to read:

(1) For the payment of all proper expenses of the proceedings of forfeiture and sale, including expenses of seizure, maintaining the custody of the property, advertising and sale, and if condemned by a decree of a district court and a bond for such costs was not given, the costs as taxed by the court;

The amendment was agreed to.

The next amendment was, on page 423, line 13, after "(2)," to strike out "Liens" and to insert "For the satisfaction of liens"; in line 14, before the word "notice," to strike out "of which"; in the same line, after the word "notice," to insert "of which"; and in line 15, after the word "law." to insert "law;", so as to read:

(2) For the satisfaction of liens for freight, charges, and contributions in general average, notice of which has been filed with the collector according to law;

The amendment was agreed to.

The next amendment was, on page 423, line 16, after "(3)," to strike out "The" and to insert "For the payment of the"; in line 17, after the word "merchandise," to insert "or baggage," and in the same line, after the word "to," to strike out "duty" and to insert "duty; and," so as to read:

(3) For the payment of the duties accruing on such merchandise or baggage, if the same is subject to duty; and

The amendment was agreed to.

The next amendment was, on page 423, line 18, after the word "residue," to strike out "of the proceeds of sale," and at the beginning of line 20, to strike out "receipt" and to insert "or navigation fine," so as to read:

(4) The residue shall be deposited with the Treasurer of the United States as a customs or navigation fine.

The amendment was agreed to.

The next amendment was, on page 423, line 22, after the word "vehicle," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; in line 23, after the word "Act," to strike out "shall offer" and to insert "offers"; in line 24, after the word "vehicle," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage, as determined under section 606 of this act"; in the same line, after the word "it," to strike out "shall appear" and to insert "appears"; on page 424, line 3, after the word "Treasury," to insert "if under the customs laws, or the Secretary of Commerce if under the navigation laws"; in line 5, after the word "vehicle," to strike out "or"; in line 6, before the word "seized," to insert "or baggage," and at the beginning of line 8, to strike out the figures "617" and to insert "613," so as to make the paragraph read:

SEC. 614. Release: If any person claiming an interest in any vessel, vehicle, merchandise, or baggage seized under the provisions of this act offers to pay the value of such vessel, vehicle, merchandise, or baggage, as determined under section 606 of this act, and it appears that such person has in fact a substantial interest therein, the collector may, subject to the approval of the Secretary of the Treasury if under the customs laws, or the Secretary of Commerce, if under the nagivation laws, accept such offer and release the vessel, vehicle, merchandise, or baggage seized upon the payment of such value thereof, which shall be distributed in the order provided in section 613 of this act.

The amendment was agreed to.

The next amendment was, on page 424, line 10, after the word "vehicle," to strike out "or"; in line 11, before the word "seized," to insert "or baggage"; in line 16, after the word "vehicle," to strike out "or"; and in the same line, after the word "merchandise," to insert "or baggage," so as to read:

SEC. 615. Burden of proof: In all suits or actions brought for the forfeiture of any vessel, vehicle, merchandise, or baggage seized under the provisions of any law relating to the collection of duties on imports or tonnage, where the property is claimed by any person, the burden of proof shall lie upon such claimant; and in all suits or actions brought for the recovery of the value of any vessel, vehicle, merchandise, or baggage seized for violation of any such law, the burden of proof shall be upon the defendant: *Provided*, That probable cause shall be first shown for the institution of such suit or action, to be judged of by the court.

The amendment was agreed to.

The next amendment was, on page 424, line 22, after the word "officer," to strike out "or officers"; at the beginning of line 25, to insert the word "such"; in the same line, after the word "officer," to strike out "or person"; in the same line, after the word "who," to strike out "shall so compromise or abate" and to insert "compromises or abates"; on page 425, line 1, after the word "or," to strike out "attempt" and to insert "attempts"; in line 2, after the word "manner," to strike out "relieve or attempt" and to insert "relieves or attempts"; in line 4, before the word "merchandise," to strike out "or"; in the same line, before the word "from," to insert "or baggage"; in line 5, after the word "be," to strike out "liable to" and to insert "guilty of a felony and upon conviction thereof shall be punished by," so as to read:

SEC. 616. Compromise of claims: It shall not be lawful for any officer of the United States to compromise or abate any claim of the United States arising under the customs laws for any fine, penalty, or forfeiture, and any such officer who compromises or abates any such claim or attempts to make such compromise or abatement, or in any manner relieves or attempts to relieve any person, vessel, vehicle, merchandise, or baggage from any such fine, penalty, or forfeiture shall be guilty of a felony and upon conviction thereof shall be punished by a fine of not more than $5,000 or by imprisonment for a term of not exceeding two years: *Provided*, That the Secretary of the Treasury shall have power to remit or mitigate any such fine, penalty, or forfeiture, or to compromise the same in the manner provided by law.

The amendment was agreed to.

The next amendment was, on page 425, line 12, after the word "collector," to strike out "of customs"; and in line 15, after the word "claim," to strike out "was" and to insert "is," so as to make the paragraph read:

SEC. 617. Same: Upon a report by a collector, district attorney, or any special attorney or agent, having charge of any claim arising under the customs laws, showing the facts upon which such claim is based, the probabilities of a recovery and the terms upon which the same may be compromised, the Secretary of the Treasury is hereby authorized to compromise such claim, if such action shall be recommended by the Solicitor of the Treasury.

The amendment was agreed to.

The next amendment was, on page 425, at the beginning of line 22, to strike out "or"; in the same line, before the word "seized," to insert "or baggage"; in line 24, before the word "with," to strike out "shall file" and to insert "files"; in line 25, after "Treasury," to insert "if under the customs laws and with the Secretary of Commerce if under the navigation laws"; on page 426, line 2, before the word "merchandise," to strike out "or"; in the same line, after the word "merchandise," to insert "or baggage"; in line 4, after the word "Treasury," to insert "or the Secretary of Commerce"; in line 5, after the word "he," to strike out "shall find" and to insert "finds"; in line 6, after the word "without," to insert "willful negligence or without"; in line 8, after the word "or" where it occurs the second time, to strike out "shall find" and to insert "finds"; and at the beginning of line 12, to strike out "shall deem" and to insert "deems," so as to read:

SEC. 618. Remission or mitigation of penalties: Whenever any person interested in any vessel, vehicle, merchandise, or baggage seized under the provisions of this act, or who has incurred, or is alleged to have incurred, any fine or penalty thereunder, files with the Secretary of the Treasury if under the customs laws, and with the Secretary of Commerce if under the navigation laws, before the sale of such vessel, vehicle, merchandise, or baggage a petition for the remission or mitigation of such fine, penalty, or forfeiture, the Secretary of the Treasury, or the Secretary of Commerce, if he finds that such fine, penalty, or forfeiture was incurred without willful negligence or without any intention on the part of the petitioner to defraud the revenue or to violate the law, or finds the existence of such mitigating circumstances as to justify the remission or mitigation of such fine, penalty, or forfeiture, may remit or mitigate the same upon such terms and conditions as he deems reasonable and just, or order discontinuance of any prosecution relating thereto. In order to enable him to ascertain the facts, the Secretary of the Treasury may issue a commission to any special agent, collector, member of the Board of United States General Appraisers, or United States commissioner, to take testimony upon such petition.

The amendment was agreed to.

The next amendment was, on page 426, line 19, after the word "compensation," to strike out "which shall have been," so as to make the proviso read:

Provided, That nothing in this section shall be construed to deprive any person of an award of compensation made before the filing of such petition.

The amendment was agreed to.

The next amendment was, on page 426, line 22, after the word "who," to strike out "shall detect and seize" and to insert "detects and seizes"; in line 23, after the word "any" to insert "vessel, vehicle"; and, in the same line, after the word "merchandise," to insert "or baggage"; in line 25, after the word "who," to strike out "shall report" and to insert "reports"; on page 427, line 1, after the word "who," to strike out "shall furnish" and to insert "furnishes"; in line 4, after the word "revenue," to insert "or a violation of the customs laws"; in line 6, before the word "to," to strike out "shall lead" and to insert "leads"; at the beginning of line 9, to insert "of 25 per cent of the net amount recovered, but"; in line 10, after the word "exceed," to strike out "$5,000" and to insert "$50,000"; and, in line 11, after "purpose," to insert "For the purposes of this section, an amount recovered under a bail bond shall be deemed a recovery of a fine incurred," so as to make the section read:

SEC. 619. Award of compensation: Any person not an officer of the United States who detects and seizes any vessel, vehicle, merchandise, or baggage subject to seizure and forfeiture under the customs laws and who reports the same to an officer of the customs, or who furnishes to a district attorney, to the Secretary of the Treasury, or to any customs officer original information concerning any fraud upon the customs revenue, or a violation of the customs laws perpetrated or contemplated, which detection and seizure or information leads to a recovery of any duties withheld, or of any fine, penalty, or forfeiture incurred, may be awarded and paid by the Secretary of the Treasury a compensation of 25 per cent of the net amount recovered, but not to exceed $50,000 in any case, which shall be paid out of moneys appropriated for that purpose. For the purposes of this section, an amount recovered under a bail bond shall be deemed a recovery of a fine incurred.

The amendment was agreed to.

The next amendment was, on page 427, line 15, after the word "who," to strike out "shall"; in line 16, after the word "indirectly," to strike out "receive, accept, or contract" and to insert "receives, accepts, or contracts"; in line 19, after the word "shall," to insert "be guilty of a felony and"; in line 20, after the word "thereof," to strike out "be liable to" and to insert "shall be punished by"; in the same line, after the word "fine," to strike out "not exceeding $5,000" and to insert "of not more than $10,000"; and in line 24 to insert "Any such person who pays to any such officer, or to any person for the use of such officer, any portion of such money, or anything of value for or because of such money, shall have a right of action against such officer or his legal representatives, or against such person or his legal representatives, and shall be entitled to recover the money so paid or the thing of value so given," so as to make the section read:

SEC. 620. Same—United States officers: Any officer of the United States who, directly or indirectly, receives, accepts, or contracts for any portion of the money which may accrue to any person making such detection and seizure, or furnishing such information, shall be guilty of a felony and, upon conviction thereof, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than two years, or both, and shall be thereafter ineligible to any office of honor, trust, or emolument. Any such person who pays to any such officer, or to any person for the use of such officer, any portion of such money, or anything of value for or because of such money, shall have a right of action against such officer or his legal representatives, or against such person or his legal representatives, and shall be entitled to recover the money so paid or the thing of value so given.

The amendment was agreed to.

The next amendment was, on page 428, line 9, after the word "action," to strike out "shall be" and to insert "is," and in line 10, after the word "forfeiture," to strike out "shall have," so as to read:

SEC. 621. Limitation of actions: No suit or action to recover any pecuniary penalty or forfeiture of property accruing under the customs laws shall be instituted unless such suit or action is commenced within five years after the time when such penalty or forfeiture accrued: *Provided*, That the time of the absence from the United States of the person subject to such penalty or forfeiture, or of any concealment or absence of the property, shall not be reckoned within this period of limitation.

The amendment was agreed to.

The next amendment was, on page 428, line 15, after the word "war," to strike out "and so forth," so as to make the section read:

SEC. 622. Emergency of war: Whenever the President shall by proclamation declare an emergency to exist by reason of a state of war, or otherwise, he may authorize the Secretary of the Treasury to extend during the continuance of such emergency the time herein prescribed for the performance of any act.

The amendment was agreed to.

Mr. McCUMBER. On page 428, after line 20, on behalf of the committee, I move to insert a new section, as follows:

SEC. 623. General regulations: In addition to the specific powers conferred by this act, the Secretary of the Treasury is authorized to make such rules and regulations as may be necessary to carry out the provisions of this act.

The amendment was agreed to.

The next amendment was, under "Part 6—Repealing provisions," on page 429, line 1, after the word "civil" to insert "or criminal," so as to make the section read:

SEC. 641. Rights and liabilities: The repeal of existing laws or modifications thereof embraced in this act shall not affect any act done, nor any right accruing or accrued, nor any suit or proceeding had or commenced in any civil or criminal case prior to said repeal or modifications, but all liabilities under said laws shall continue and may be enforced in the same manner as if said repeal or modifications had not been made. All offenses committed and all penalties, forfeitures, or liabilities incurred prior to the taking effect hereof, under any statute embraced in, or changed, modified, or repealed by this act, may be prosecuted and punished in the same manner and with the same effect as if this act had not been passed. No acts of limitation now in force, whether applicable to civil causes and proceedings or to the prosecution of offenses or for the recovery of penalties or forfeitures embraced in, modified, changed, or repealed by this act shall be affected thereby so far as they affect any suits, proceedings, or prosecutions, whether civil or criminal, for causes arising or acts done or committed prior to the taking effect of this act, which may be commenced and prosecuted within the same time and with the same effect as if this act had not been passed.

The amendment was agreed to.

The next amendment was, on page 429, after line 18, to strike out—

SEC. 642. Judicial and criminal codes: Nothing in this act shall be construed as repealing any of the provisions of the act approved March 3, 1911, chapter 231, entitled "An act to codify, revise, and amend the laws relating to the judiciary," and known as "the Judicial Code," or of the act approved March 4, 1909, chapter 321, entitled "An act to codify, revise, and amend the penal laws of the United States," and known as "the Criminal Code," nor any other acts or parts of acts not inconsistent with the provisions of this act which are not herein specifically repealed.

The amendment was agreed to.

The next amendment was, on page 430, line 6, after the word "Statutes," to insert "as amended," and in line 7, after "repealed:" to strike out "3, 4, 959, 965, 1715, 2463, 2517, as amended by the act of February 27, 1877, chapter 69; 2518, as amended by the act of February 27, 1877, chapter 69; 2519, as amended by the act of February 27, 1877, chapter 69; 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2528, 2529, 2531, as amended by the act of February 18, 1875, chapter 80, section 1; 2532, 2533, 2534, 2535, 2536, as amended by the act of February 27, 1877, chapter 69; 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, as amended by the act of February 27, 1877, chapter 69; 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, as amended by the act of February 27, 1877, chapter 69; 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2569, 2570, as amended by the act of March 3, 1897, chapter 389, section 16; 2571, as amended by the act of March 3, 1897, chapter 389, section 16; 2572, as amended by the act of March 3, 1897, chapter 389, section 16; 2573, as amended by the act of March 3, 1897, chapter 389, section 16; 2574, as amended by the act of March 3, 1897, chapter 389, section 16; 2575, as amended by the act of March 3, 1897, chapter 389, section 16; 2577, 2578, as amended by the act of February 27, 1877, chapter 69, and the act of September 25, 1890, chapter 917, section 1; 2579, as amended by the act of February 27, 1877, chapter 69, and the act of September 25, 1890, chapter 917, section 1; 2580, 2581, 2582, as amended by the act of February 27, 1877, chapter 69; 2583, 2584, as amended by the act of March 3, 1897, chapter 389, section 16; 2585, as amended by the act of February 27, 1877, chapter 69, and by the act of March 3, 1897, chapter 389, section 16; 2586, 2587, as amended by the act of February 27, 1877, chapter 69; 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, as amended by the act of February 27, 1877, chapter 69; 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2609, 2610, 2624, 2634, 2642, 2650, 2653, 2655, 2656, 2657, 2658, 2659, as amended by the act of February 27, 1877, chapter 69; 2660, as amended by the act of February 27, 1877, chapter 69; 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, as amended by the act of February 27, 1877, chapter 69; 2676, 2677, 2678, 2679, 2680, 2681, 2682, 2683, 2684, 2685, 2686, 2688, 2689, 2690, 2691, as amended by the act of February 27, 1877, chapter 69; 2692, 2693, 2694, 2695, 2696, 2697, 2698, 2699, 2700, 2701, 2702, as amended by the act of February 27, 1877, chapter 69; 2703, 2704, 2705, 2706, 2707, 2708, 2709, 2710, 2711, as amended by the act of February 18, 1875, chapter 80, section 1; 2712, 2713, 2714, 2715, 2716, 2717, 2718, 2719, 2720, as amended by the act of February 27, 1877, chapter 69; 2721, 2722, 2723, 2724, 2725, 2726, 2728, 2729, 2730, as amended by the act of February 18, 1875, chapter 80, section 1; 2731, 2732, 2734, 2735, 2736, 2738, 2739,

2740, 2741, 2742, as amended by the act of February 27, 1877, chapter 69; 2743, 2744, 2745, 2746, as amended by the act of February 27, 1877, chapter 69; 2766, 2767, 2768, 2770, 2771, 2772, 2773, 2774, 2775, 2776, as amended by the act of June 26, 1884, chapter 121, section 29; 2777, 2778, 2779, 2780, 2781, 2782, 2783, 2784, 2785, 2786, 2787, as amended by the act of March 2, 1905, chapter 1306; 2788, 2789, 2790, 2791, 2794, 2795, 2797, as amended by the act of March 3, 1897, chapter 389, section 17; 2798, 2799, 2800, 2801, 2802, 2803, 2806, 2807, as amended by the act of June 3, 1892, chapter 86, section 1; 2808, 2809, 2810, as amended by the act of February 27, 1877, chapter 69; 2811, 2812, 2813, 2814, 2815, 2816, 2817, 2818, 2819, as amended by the act of February 27, 1877, chapter 69; 2820, as amended by the act of February 27, 1877, chapter 69; 2821, as amended by the act of February 27, 1877, chapter 69; 2822, as amended by the act of February 27, 1877, chapter 69; 2823, 2824, 2825, 2826, as amended by the act of February 27, 1877, chapter 69; 2827, 2828, 2829, 2830, 2831, 2834, as amended by the act of March 3, 1897, chapter 389, section 15; 2836, 2837, 2840, 2842, 2844, as amended by the act of June 28, 1906, chapter 3569; 2846, 2847, 2848, 2849, 2850, 2852, 2855, as amended by the act of June 10, 1880, chapter 190, section 4; 2857, 2859, 2861, 2864, as amended by the act of February 18, 1875, chapter 80, section 1; 2865, as amended by the act of February 27, 1877, chapter 69; 2867, 2868, 2869, as amended by the act of June 5, 1894, chapter 92, section 2; 2870, 2872, as amended by the act of June 26, 1884, chapter 121, section 25; 2873, 2874, 2875, 2876, 2877, 2878, 2879, 2880, as amended by the act of May 9, 1896, chapter 164; 2881, as amended by the act of June 3, 1892, chapter 86, section 2; 2882, 2883, 2884, 2885, 2886, 2887, 2891, 2892, 2893, 2894, 2895, 2896, 2898, 2899, 2901, 2904, 2906, 2910, 2911, 2912, 2913, 2914, 2915, 2916, 2920, 2921, 2925, 2926, 2928, 2933, 2935, 2936, as amended by the act of February 27, 1877, chapter 69; 2937, 2946, 2948, 2949, 2950, 2951, 2953, 2954, 2955, 2956, 2957, 2958, 2959, 2960, 2961, 2962, 2963, 2964, 2965, 2966, as amended by the act of June 26, 1884, chapter 121, section 24; 2967, 2968, 2969, 2970, 2971, 2972, 2973, 2974, 2975, 2976, 2977, 2978, as amended by the act of February 27, 1877, chapter 69; 2979, 2980, 2981, as amended by the act of June 10, 1880, chapter 190, section 10, and by the act of May 21, 1896, chapter 217; 2982, 2983, 2984, as amended by the act of February 27, 1877, chapter 69; 2985, 2986, 2987, 2988, as amended by the act of February 27, 1877, chapter 69; 2989, as amended by the act of February 27, 1877, chapter 69; 2998, 2999, 3000, 3001, as amended by the act of February 27, 1877, chapter 69; 3123, 3128, 3129, 4209, 4210, 4211, 4213, as amended by the act of June 26, 1884, chapter 121, section 13; 4218, as amended by the act of August 20, 1912, chapter 307, section 2; 4379, 5292, as amended by the act of February 27, 1877, chapter 69; and 5293, as amended by the act of February 27, 1877, chapter 69"; and in lieu thereof to insert:

909, 2581, 2588, 2589, 2590, 2637, 2638, 2652, 2770, 2771, 2773, 2774, 2775, 2776, 2777, 2778, 2779, 2780, 2781, 2782, 2783, 2784, 2785, 2786, 2787, 2788, 2789, 2790, 2791, 2794, 2795, 2797, 2798, 2799, 2800, 2801, 2802, 2803, 2806, 2807, 2808, 2809, 2810, 2811, 2812, 2813, 2814, 2815, 2816, 2817, 2818, 2819, 2820, 2821, 2822, 2823, 2824, 2825, 2826, 2827, 2828, 2829, 2830, 2832, 2833, 2834, 2836, 2837, 2840, 2842, 2844, 2846, 2847, 2848, 2849, 2852, 2857, 2859, 2864, 2865, 2867, 2868, 2869, 2870, 2872, 2873, 2874, 2875, 2878, 2879, 2880, 2881, 2882, 2883, 2884, 2887, 2891, 2892, 2893, 2894, 2896, 2898, 2899, 2901, 2906, 2910, 2911, 2912, 2913, 2914, 2915, 2920, 2921, 2925, 2926, 2928, 2933, 2935, 2936, 2937, 2939, 2942, 2946, 2947, 2948, 2949, 2953, 2954, 2955, 2956, 2957, 2958, 2959, 2960, 2961, 2962, 2963, 2964, 2965, 2966, 2967, 2968, 2969, 2970, 2971, 2972, 2973, 2974, 2975, 2976, 2977, 2978, 2980, 2981, 2982, 2983, 2984, 2985, 2986, 2987, 2998, 3000, 3001, 3002, 3003, 3004, 3005, 3006, 3007, 3008, 3010, 3015, 3016, 3017, 3018, 3019, 3020, 3022, 3023, 3024, 3025, 3026, 3028, 3029, 3030, 3031, 3032, 3033, 3034, 3035, 3036, 3037, 3038, 3041, 3044, 3045, 3046, 3047, 3049, 3050, 3051, 3052, 3053, 3054, 3055, 3056, 3057, 3058, 3059, 3060, 3063, 3064, 3066, 3067, 3069, 3070, 3074, 3075, 3076, 3077, 3078, 3079, 3080, 3081, 3082, 3083, 3084, 3085, 3086, 3088, 3090, 3096, 3097, 3098, 3099, 3100, 3101, 3102, 3103, 3104, 3105, 3106, 3107, 3108, 3110, 3120, 3121, 3123, 3128, 3129, 4209, 4210, 4211, 5292, and 5293.

Mr. McCUMBER. I move to amend the amendment as follows: Beginning on page 434, line 15, insert the following in the proper numerical order: "2609, 2610, 2772, 2796, 2805, 2831, 2850, 2876, 2877, 2888, 2889, 2890, 2945, 2950, 2988, 2989, 3021, 3039, 3040, 3042, 3043, 3065." On page 435, line 2, strike out "2942."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 435, line 21, after the figure "4," to strike out "5"; in the same line, after the figures "22," to strike out "23"; in line 22, after the figures "136," to insert "sections 2 and 4"; in line 23, after the figures "89,' to strike out the comma and "sections 1 and 2"; in line 24, after the word "amended," to strike out "by the act of August 28, 1894, entitled 'An act to reduce taxation, to provide revenue for the Government, and for other purposes,' section 70; act of March 1, 1879, chapter 125, section 11, section 12 as amended by the act of May 28, 1880, chapter 108, section 12, and section 13 as amended by the act of May 28, 1880, chapter 108, section 13"; on page 436, line 6, after the figures "190," to insert "as amended"; in the same line, to strike out "section 1 as amended by the act of June 14, 1880, chapter 214, and by the act of June 20, 1884, chapter 103, sections 2, 3, 4, and 5, as amended by the act of July 2, 1884, chapter 142, and by the act of February 23, 1887, chapter 215, section 6, as amended by the act of July 2, 1884, chapter 142, section 7, as amended by the act of June 20, 1884, chapter 103, by the act of February 9, 1887, chapter 123, and by the act of June 30, 1892, chapter 137, and section 9"; in line 15, after "34," to strike out "act of January 9, 1883, chapter 17"; in line 17, after the figures "1890," to insert "chapter 407, as amended, except sections 12 and 22"; at the end of line 18, to strike out "entitled 'An act to simplify the laws in relation to the collection of the revenues,' except section 12 therein as amended by the act of May 27, 1908, chapter 105, by the act of August 5, 1909, entitled 'An act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes,' section 28, and by the act of October 3, 1913, entitled 'An act to reduce tariff duties and to provide revenue for the Government, and for other purposes,' Section III"; on page 437, line 2, after the figures "177," to strike out "sections 5 and" and to insert "chapter 9"; in line 3, after the figures "371," to strike out "sections 1, 2, 3, and 4; act of May 14, 1898, chapter 299, section 14"; in line 5, after "84," to strike out "Act of March 8, 1902, chapter 140, sections 7 and 8; act of March 3, 1905, chapter 1413, sections 1 and 2"; in line 7, after "471," to strike out "Act of June 10, 1910, chapter 283, sections 1, 2, 3, 4, and 5"; in line 10, after the figures "1913," to strike out "entitled 'An act to reduce tariff duties and to provide revenue for the Government, and for other purposes,'" and to insert "chapter 16"; and in line 12, after "Section III," to strike out "Act of June 28, 1916, chapter 180, and act of May 27, 1921, chapter 14, Title III," and to insert "and Titles I and III of the act entitled 'An act imposing temporary duties upon certain agricultural products to meet present emergencies, and to provide revenue; to regulate commerce with foreign countries; to prevent dumping of foreign merchandise on the markets of the United States; to regulate the value of foreign money; and for other purposes,' approved May 27, 1921, as amended," so as to make the section read:

SEC. 643. Statutes at Large: The following acts and parts of acts are hereby repealed: The act of March 24, 1874, chapter 65; act of June 22, 1874, chapter 391, sections 3, 4, 6, 7, 15, 17, 18, 19, 20, 21, 22, 24, and 25; act of March 3, 1875, chapter 136, sections 2 and 4; act of May 1, 1876, chapter 89; act of June 20, 1876, chapter 136, as amended; act of June 10, 1880, chapter 190, as amended; act of February 8, 1881, chapter 84; act of February 23, 1887, chapter 218; act of June 10, 1890, chapter 407, as amended, except sections 12 and 22; act of March 2, 1895, chapter 177, section 9; act of June 8, 1896, chapter 371; act of February 2, 1899, chapter 84; act of February 6, 1907, chapter 471; act of February 13, 1911, chapter 46, sections 1, 2, 3, and 4; act of October 3, 1913, chapter 16, Section III; and Titles I and III of the act entitled "An act imposing temporary duties upon certain agricultural products to meet present emergencies, and to provide revenue, to regulate commerce with foreign countries, to prevent dumping of foreign merchandise on the markets of the United States, to regulate the value of foreign money, and for other purposes," approved May 27, 1921, as amended.

Mr. McCUMBER. I move to amend the amendment as follows:

On page 435, line 22, strike out the comma after "136" and "sections 2 and 4."

On page 437, line 3, strike out "act of June 8, 1896, chapter 371."

On page 437, line 7, strike out "act of February 6, 1907, chapter 471."

On page 437, line 14, strike out "imposing" and insert in lieu thereof "Imposing."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 437, after line 20, to strike out:

SEC. 645. Rule of construction: The provisions of this title are hereby declared to be a revision and codification of the laws herein modified or repealed and are to be so held and construed.

The amendment was agreed to.

The next amendment was, on page 438, line 11, before the word "otherwise," to strike out "That unless" and to insert "Unless," so as to make the section read:

SEC. 646. Unless otherwise herein specially provided, this act shall take effect on the day following its passage.

The amendment was agreed to.

The next amendment was, on page 438, after line 13, to insert:

SEC. 647. This act may be cited as the "Tariff act of 1922."

The amendment was agreed to.

Mr. McCUMBER. I ask now to return to page 243. There are a number of amendments in Titles III and IV in the printed amendments in the bill which have not yet been agreed to.

The PRESIDENT pro tempore. The amendments will be stated in their order.

The next amendment of the Committee on Finance was, under "Title III. Special provisions," on page 243, after line 15, to strike out:

SEC. 301. That whenever the President of the United States, with a view to securing reciprocal trade with any foreign country, dependency, colony, province, or other political subdivision of government, shall enter into a commercial treaty therewith concerning the admission into any such country, dependency, colony, province, or other political subdivision of government, of the goods, wares, and merchandise of the United States and their use and disposition therein, deemed to be for the interests of the United States, and in such treaty, in consideration of the advantages accruing to the United States therefrom, shall provide for the reduction of the duties imposed by this act upon such goods, wares, or merchandise as may be designated therein of the country, dependency, colony, province, or other political subdivision of government with which such treaty shall be made as in this section provided; or shall provide for the transfer from the dutiable list of this act to the free list thereof of such goods, wares, and merchandise, being the natural products of such foreign country, dependency, colony, province, or other political subdivision of government and not of the United States; or shall provide for the retention upon the free list of this act of such goods, wares, and merchandise now included in said free list as may be designated therein; and when any such treaty shall have been duly ratified by the Senate and approved by Congress, and public proclamation made accordingly, then and thereafter the duties which shall be collected by the United States upon any of the designated goods, wares, and merchandise from the foreign country, dependency, colony, province, or other political subdivision of government with which such treaty has been made shall be the duties specified and provided for in such treaty, and none other.

The amendment was agreed to.

The next amendment was, on page 244, after line 22, to strike out:

SEC. 302. That with a view to securing reciprocal trade and regulating the commerce of the United States with countries, dependencies, colonies, provinces, or other political subdivisions of government, producing and exporting to the United States any article or merchandise upon which a duty is imposed by the laws thereof and for these purposes, whenever and so often as the President shall be satisfied that the government of any country, dependency, colony, province, or other political subdivision thereof, imposes duties or other exactions, limitations, or embargoes upon like or similar products of the United States, which, in view of the duties imposed thereupon when imported into the United States, he may deem to be higher and reciprocally unequal and unreasonable, he shall have the power, and it shall be his duty, to suspend by proclamation said provisions of the laws of the United States imposing the duties upon such article of merchandise of such country, dependency, colony, province, or other political subdivision of government, when and for such time as he shall deem just, and in such cases and during such suspension, upon the importation of any such or similar article or merchandise into the United States whether the same is imported in the same condition as when exported from the country of exportation or has been changed in condition by manufacture or otherwise and whether the same has been imported directly from the country of production or otherwise, duties shall be levied, collected, and paid upon such article or merchandise the product of such designated country, which shall by the President be ascertained and proclaimed to be equal to the duties or other exactions, limitations, or embargoes imposed thereupon when exported from the United States to such country, dependency, colony, province, or other political subdivision of government.

The amendment was agreed to.

The next amendment was, on page 246, line 5, after the figures "303," to strike out:

That whenever the President of the United States, with a view to securing reciprocal trade with foreign countries shall, within the period of three years from and after the passage of this act, conclude an agreement with any other country or countries concerning the admission into any such country or countries of the goods, wares, and merchandise of the United States, deemed to be for the interests of the United States, and in such agreement, in consideration of the advantages accruing to the United States therefrom shall provide for the reduction during a specified period not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof, upon such goods, wares, or merchandise as may be designated therein of the country or countries with which such agreement shall be made as in this section provided for, and when proclamation by the President of such agreement shall have been made, then and thereafter the duties which shall be collected by the United States upon any of the designated goods, wares, and merchandise from the foreign country with which such agreement has been made shall during the period provided for be the duties specified and provided for in such agreement.

The amendment was agreed to.

The next amendment was, on page 247, after line 2, to strike out:

To secure information to assist the President in the negotiation of such agreements as are provided for in such section, and to estimate the amount by which the duties specified in the agreement shall be lower than the duties provided for in other sections of this act, in order to be a fair equavalent of the concessions granted by any other country or countries under the terms of the agreement, the President shall direct the United States Tariff Commission to make such investigations and to prepare such reports as may be deemed necessary.

The amendment was agreed to.

The next amendment was, on page 250, line 18, after the word "government," to insert "person, partnership, association, cartel, or corporation"; and in line 20, before the word "of," to insert "or export," so as to make the section read:

SEC. 303. That whenever any country, dependency, colony, province, or other political subdivision of government, person, partnership, association, cartel, or corporation shall pay or bestow, directly or indirectly, any bounty or grant upon the manufacture or production or export of any article or merchandise manufactured or produced in such country, dependency, colony, province, or other political subdivision of government, and such article or merchandise is dutiable under the provisions of this act, then upon the importation of any such article or merchandise into the United States, whether the same shall be imported directly from the country of production or otherwise, and whether such article or merchandise is imported in the same condition as when exported from the country of production or has been changed in condition by remanufacture or otherwise, there shall be levied and paid, in all such cases, in addition to the duties otherwise imposed by this act, an additional duty equal to the net amount of such bounty or grant, however the same be paid or bestowed. The net amount of all such bounties or grants shall be from time to time ascertained, determined, and declared by the Secretary of the Treasury, who shall make all needful regulations for the identification of such articles and merchandise and for the assessment and collection of such additional duties.

The amendment was agreed to.

The next amendment was, on page 254, line 17, after the word "ticket," to insert "or any printed paper that may be used as a lottery ticket,"; in line 24, after the word "contained," to strike out "in the course of importation"; and on page 255, line 2, after the word "collector," to strike out "of customs," so as to read:

SEC. 305. (a) That all persons are prohibited from importing into the United States from any foreign country any obscene book, pamphlet, paper, writing, advertisement, circular, print, picture, drawing, or other representation, figure, or image on or of paper or other material, or any cast, instrument, or other article of an immoral nature, or any drug or medicine, or any article whatever for the prevention of conception or for causing unlawful abortion, or any lottery ticket, or any printed paper that may be used as a lottery ticket, or any advertisement of any lottery. No such articles, whether imported separately or contained in packages with other goods entitled to entry, shall be admitted to entry; and all such articles shall be proceeded against, seized, and forfeited by due course of law. All such prohibited articles and the package in which they are contained shall be detained by the officer of customs, and proceedings taken against the same as hereinafter prescribed, unless it appears to the satisfaction of the collector that the obscene articles contained in the package were inclosed therein without the knowledge or consent of the importer, owner, agent, or consignee.

The amendment was agreed to.

The next amendment was, on page 255, line 9, after the word "That," to strike out "whoever, being an" and to insert "any"; in line 10, after the name "United," to strike out "States" and to insert "States who," so as to make the paragraph read:

(b) That any officer, agent, or employee of the Government of the United States who shall knowingly aid or abet any person engaged in any violation of any of the provisions of law prohibiting importing, advertising, dealing in, exhibiting, or sending or receiving by mail obscene or indecent publications or representations, or means for preventing conception or procuring abortion, or other articles of indecent or immoral use or tendency, shall be deemed guilty of a misdemeanor, and shall for every offense be punishable by a fine of not more than $5,000, or by imprisonment at hard labor for not more than 10 years, or both.

The amendment was agreed to.

The next amendment was, on page 255, line 20, after the word "any," to strike out "circuit or"; in line 22, after the word "of," where it occurs the second time, to strike out "the two preceding sections" and to insert "subsections (a) or (b) of this section"; in line 23, after the word "made," to strike out "to the satisfaction of such judge, and founded on knowledge or belief, and if upon belief setting forth the grounds of such belief," and to insert "founded upon probable cause"; on page 256, line 3, after the word "the," to insert "United States"; in the same line, after the word "or," to strike out "any"; in line 4, after the word "district," to insert "or to a duly accredited customs officer"; in line 6, after the word "any," to strike out "such"; and at the beginning of line 7 to strike out "in the two preceding sections" and to insert "in such subsections," so as to make the paragraph read:

(c) That any district judge of the United States, within the proper district, before whom complaint in writing of any violation of subsections (a) or (b) of this section is made, founded upon probable cause and supported by oath or affirmation of the complainant, may issue, conformably to the Constitution, a warrant directed to the United States marshal or deputy marshal in the proper district or to a duly accredited customs officer, directing him to search for, seize, and take possession of any article or thing mentioned in such subsections, and to make due and immediate return thereof, to the end that the same may be condemned and destroyed by proceedings, which shall be conducted in the same manner as other proceedings in the case of municipal seizure, and with the same right of appeal or writ of error.

The amendment was agreed to.

The next amendment was, on page 256, after line 12, to strike out:

SEC. 309. (a) That the importation of neat cattle and the hides of neat cattle from any foreign country into the United States is prohibited: *Provided*, That the operation of this section shall be suspended as to any foreign country or countries, or any parts of such country or countries, whenever the Secretary of the Treasury shall officially determine, and give public notice thereof, that such importation will not tend to the introduction or spread of contagious or infectious diseases among the cattle of the United States; and the Secretary of the Treasury is hereby authorized and empowered, and it shall be his duty, to make all necessary orders and regulations to carry this section into effect, or to suspend the same as herein pro-

vided, and to send copies thereof to the proper officers in the United States and to such officers or agents of the United States in foreign countries as he shall judge necessary.

And in lieu thereof to insert:

SEC. 306. (a) That the importation of neat cattle and the hides of neat cattle from any foreign country into the United States is prohibited under such rules of inspection as the Secretary of Agriculture may determine.

(b) If the Secretary of Agriculture shall determine that such importations will not tend to the introduction or spread of contagious or infectious diseases among the cattle of the United States, he shall officially notify the Secretary of the Treasury and give public notice that the operation of subsection (a) of this section shall be suspended as to any foreign country or countries, or any parts of such country or countries.

The amendment was agreed to.

The PRESIDENT pro tempore. The Chair asks the chairman of the Finance Committee whether there are any other amendments which have been reported?

Mr. McCUMBER. There are a number which we have not yet reached in these titles.

Mr. SMOOT. The next amendment is on page 264.

The next amendment of the Committee on Finance was, on page 264, after line 8, to strike out:

SEC. 315. That the works of manufacturers engaged in smelting or refining, or both, of ores and crude metals may, upon the giving of satisfactory bonds, be designated as bonded smelting warehouses. Ores or crude metals may be removed from the vessel or other vehicle in which imported, or from a bonded warehouse, into a bonded smelting warehouse without the payment of duties thereon and there smelted or refined, or both, together with ores or crude metals of home or foreign production: *Provided*, That the bonds shall be charged with the amount of duties payable upon such ores and crude metals at the time of their importation, and the several charges against such bonds may be canceled upon the exportation or delivery to a bonded manufacturing warehouse established under paragraph M of this section of an amount of the same kind of metal equal to the actual amount of dutiable metal producible from the smelting or refining, or both, of such ores or crude metals as determined from time to time by the Secretary of the Treasury: *Provided further*, That the said metals so producible, or any portion thereof, may be withdrawn for domestic consumption, or transferred to a bonded customs warehouse, and withdrawn therefrom, and the several charges against the bonds canceled upon the payment of the duties chargeable against an equivalent amount of ores or crude metals from which said metal would be producible in their condition as imported: *Provided further*, That on the arrival of the ores and crude metals at such establishments they shall be sampled according to commercial methods and the sample assayed by wet assay, without deduction, under the supervision of Government officers, to be appointed by the Secretary of the Treasury and at the expense of the manufacturer: *Provided further*, That antimonial lead produced in said establishments may be withdrawn for consumption upon the payment of the duties chargeable against it under existing law: *Provided further*, That all labor performed and services rendered pursuant to this section shall be under the supervision of an officer of the customs, to be appointed by the Secretary of the Treasury, and at the expense of the manufacturer: *Provided further*, That all regulations for the carrying out of this section shall be prescribed by the Secretary of the Treasury.

And in lieu thereof to insert:

SEC. 312. That the works of manufacturers engaged in smelting or refining, or both, of ores and crude metals may, upon the giving of satisfactory bonds, be designated as bonded smelting warehouses. Ores or crude metals may be removed from the vessel or other vehicle in which imported, or from a bonded warehouse, into a bonded smelting warehouse without the payment of duties thereon, and there smelted or refined, or both, together with ores or crude metals of home or foreign production: *Provided*, That the bonds shall be charged with a sum equal in amount to the regular duties which would have been payable on such ores and crude metals if entered for consumption at the time of their importation, and the several charges against such bonds shall be canceled upon the exportation or delivery to a bonded manufacturing warehouse established under the preceding section of this title of a quantity of the same kind of metal equal to the quantity of metal producible from the smelting or refining, or both, of the dutiable metal contained in such ores or crude metals, due allowance being made of the smelter wastage as ascertained from time to time by the Secretary of the Treasury: *Provided further*, That the said metals so producible, or any portion thereof, may be withdrawn for domestic consumption or transferred to a bonded customs warehouse and withdrawn therefrom and the several charges against the bonds canceled upon the payment of the duties chargeable against an equivalent amount of ores or crude metals from which said metal would be producible in their condition as imported: *Provided further*, That on the arrival of the ores and crude metals at such establishments they shall be sampled and assayed according to commercial methods under the supervision of Government officers: *Provided further*, That all labor performed and services rendered pursuant to this section shall be under the supervision of an officer of the customs, to be appointed by the Secretary of the Treasury, and at the expense of the manufacturer: *Provided further*, That all regulations for the carrying out of this section shall be prescribed by the Secretary of the Treasury: *And provided further*, That the several charges against the bonds of any smelting warehouse established under the provisions of this section may be canceled upon the exportation or transfer to a bonded manufacturing warehouse from any other bonded smelting warehouse established under this section of a quantity of the same kind of metal, in excess of that covered by open bonds, equal to the amount of metal producible from the smelting or refining, or both, of the dutiable metal contained in the imported ores and crude metals, due allowance being made of the smelter wastage as ascertained from time to time by the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 270, line 5, before the word "the," to strike out "That on" and to insert "On"; and in the same line, after the word "of," to insert "flavoring extracts," so as to read:

On the exportation of flavoring extracts, medicinal or toilet preparations (including perfumery) hereafter manufactured or produced in the United States in part from domestic alcohol on which an internal-revenue tax has been paid, there shall be allowed a drawback equal in amount to the tax found to have been paid on the alcohol so used.

The amendment was agreed to.

The next amendment was, on page 270, line 24, after the word "further," to strike out "That exporters" and to insert "That upon the exportation"; on page 271, line 2, after the word "imported," to strike out "salt shall" and to insert "salt, there shall be refunded from the Treasury"; and at the beginning of line 6 to strike out "have refunded to them from the Treasury," so as to make the additional proviso read:

Provided further, That upon the exportation of meats, whether packed or smoked, which have been cured in the United States with imported salt, there shall be refunded from the Treasury, upon satisfactory proof, under such regulations as the Secretary of the Treasury shall prescribe, that such meats have been cured with imported salt, the duties paid on the salt so used in curing such exported meats, in amounts not less than $100.

The amendment was agreed to.

The next amendment was, on page 271, at the beginning of line 9, to strike out "That the" and insert "The," and in line 10, after the word "materials," to insert "imported and," so as to make the paragraph read:

The provisions of this section shall apply to materials imported and used in the construction and equipment of vessels built for foreign account and ownership, or for the Government of any foreign country, notwithstanding that such vessels may not within the strict meaning of the term be articles exported.

The amendment was agreed to.

The PRESIDENT pro tempore. Is there any other amendment which the committee has reported which has not been acted upon?

Mr. SMOOT. On page 285 is the next amendment.

The next amendment of the Committee on Finance was, on page 285, line 7, after the word "act," to strike out "contained"; at the beginning of line 8, to strike out "so"; in the same line, after the word "construed," to strike out "as"; and in line 11, after the word "act," to strike out "of Congress heretofore passed for the execution of the same except as to the proviso of article 8 of said treaty, which proviso is hereby abrogated and repealed," and to insert "of December 17, 1903, chapter 1," so as to make the section read:

SEC. 319. That nothing in this act shall be construed to abrogate or in any manner impair or affect the provisions of the treaty of commercial reciprocity concluded between the United States and the Republic of Cuba on December 11, 1902, or the provisions of the act of December 17, 1903, chapter 1.

The amendment was agreed to.

The next amendment was, on page 285, line 16, after the word "of," to strike out "An act entitled 'An act to reduce tariff duties and to provide revenues for the Government, and for other purposes,' approved" and to insert "the act of"; in line 18, after the figures "1903," to insert "chapter 16, as amended"; in line 19, to strike out "as amended by the act of April 27, 1916, chapter 93, section 1; by Titles V and VI of the act of September 8, 1916, chapter 463; and by the act of April 23, 1920, chapter 158"; in line 22, after the figures "1911," to strike out "chapter 3, entitled 'An act to promote reciprocal trade relations with the Dominion of Canada, and for other purposes'," and to insert "chapter 3"; on page 286, line 5, after the word "lead," to strike out "ores;" and to insert "ores," and at the beginning of line 6 to strike out "section 3022 of the Revised Statutes, relative to salt for curing fish; and Title I of the act of May 27, 1921, chapter 14," so as to read:

SEC. 320. That, except as hereinafter provided, Sections I and IV of the act of October 3, 1913, chapter 16, as amended; the act of July 26, 1911, chapter 3; so much of section 4132 of the Revised Statutes as amended by the act of August 24, 1912, chapter 390, as relates to the free admission of materials for the construction or repair of vessels and the building or repair of their machinery and articles for their outfit and equipment; and so much of the sundry civil appropriation act of March 2, 1895, chapter 189, as relates to the sampling and assaying of lead ores are hereby repealed.

The amendment was agreed to.

The next amendment was, under "Title IV. Administrative provisions. Part 1. Definitions," on page 286, line 23, after the word "this," to strike out "act" and to insert "title," so as to make the paragraph read:

SEC. 401. When used in this title—

The amendment was agreed to.

The next amendment was, on page 286, line 25, after the word "other," to strike out "artificial," and at the beginning of line 27 to strike out "on or," and in the same line, after the word "water," to insert "or in water and in air," so as to read:

(a) Vessel: The word "vessel" includes every description of water craft or other contrivance used, or capable of being used, as a means of transportation in water or in water and in air.

The amendment was agreed to.

The next amendment was, on page 287, line 2, after the word "other," to strike out "artificial," so as to read:

(b) Vehicle: The word "vehicle" includes every description of carriage or other contrivance used, or capable of being used, as a means of transportation on land or through the air.

The amendment was agreed to.

The next amendment was, on page 287, after line 4, to strike out:

(c) Port: The word "port" means a place designated as a port of entry at which vessels may enter and clear or at which merchandise may be entered and the duties thereon collected.

The amendment was agreed to.

The next amendment was, on page 287, line 9, before the word "merchandise," to strike out "(d)" and insert "(c)"; at the beginning of line 10 to strike out "includes" and to insert "means"; and, in line 11, after the word "description," to strike out "capable of being imported" and to insert "and includes merchandise the importation of which is prohibited," so as to make the paragraph read:

(c) Merchandise: The word "merchandise" means goods, wares, and chattels of every description and includes merchandise the importation of which is prohibited.

The amendment was agreed to.

The next amendment was, on page 287, line 13, before the word "Person," to strike out "(e)" and insert "(d)"; in the same line, after the word "person," to strike out "shall include" and to insert "includes"; and, in line 14, after the word "corporations," to strike out the comma and "and the reference to any officer shall include any person authorized by law to perform the duties of such office, unless the context shows that such word was intended to be used in a more limited sense," so as to read:

(d) Person: The word "person" includes partnerships, associations, and corporations.

The amendment was agreed to.

The next amendment was, on page 287, line 19, before the word "Master," to strike out "(f)" and insert "(e)"; in the same line, after the word "master," to strike out "includes any" and to insert "means the"; in line 20, after the word "the," where it occurs the first time, to strike out "chief charge or"; in the same line, after the word "command," to strike out "of the employment and navigation"; and in line 21, after the word "of," to strike out "a" and to insert "the," so as to read:

(e) Master: The word "master" means the person having the command of the vessel.

The amendment was agreed to.

The next amendment was, on page 287, line 22, before the word "Day," to strike out "(g)" and insert "(f)"; in the same line, after the word "Day," to strike out "'day' is" and to insert "the word 'day' means," so as to read:

(f) Day: The word "day" means the time from 8 o'clock a. m. to 5 o'clock p. m.

The amendment was agreed to.

The next amendment was, on page 287, line 25, before the word "Night,' to strike out "(h)" and insert "(g)"; in the same line, after the word "Night," to strike out "'night' is" and to insert "the word 'night' means," so as to read:

(g) Night: The word "night" means the time from 5 o'clock p. m. to 8 o'clock a. m.

The amendment was agreed to.

The next amendment was, on page 288, line 1, before the word "collector," to strike out "(i)" and insert "(h)"; in the same line, after the word "'collector,'" to strike out "shall include the person appointed as" and to insert "means the"; at the beginning of line 3 to strike out "or" and to insert "and includes"; and in the same line, after the word "customs," to strike out the comma and the word "or" and to insert "and," so as to read:

(h) Collector: The word "collector" means the collector of customs and includes a deputy collector of customs and any person authorized by law or by regulations of the Secretary of the Treasury to perform the duties of collector of customs.

The amendment was agreed to.

The next amendment was, on page 288, line 6, before the word "Appraiser," to strike out "(j)" and insert "(i)"; in the same line, after the word "word," to strike out "'appraiser,' or term 'appraiser of merchandise,' shall mean" and to insert "'appraiser' means"; and in line 10, after the word "thereof," to strike out the comma and "or the person directed by the Secretary of the Treasury to perform such acts during the sickness, disability, or absence of the appraiser," so as to make the paragraph read:

(i) Appraiser: The word "appraiser" means the person authorized by law or by the Secretary of the Treasury to appraise imported merchandise and to make a return of the value thereof.

The amendment was agreed to.

The next amendment was, on page 288, after line 12, to strike out:

(k) Date of exportation: The date of exportation shall mean, in the case of shipment by water, the date of the clearance of the importing vessel, and in the case of shipment by land, or in part by land and in part by water, the date when the merchandise began its journey to the United States.

The amendment was agreed to.

The next amendment was, on page 288, after line 18, to strike out:

(l) Proof spirit: "Proof spirit" is alcoholic liquor containing one-half its volume of alcohol of a specific gravity of 0.7939 at 60° F.

The amendment was agreed to.

The next amendment was, on page 288, after line 21, to strike out:

(m) Proof gallon: "Proof gallon" is a gallon of proof spirits as defined in the preceding section.

The amendment was agreed to.

The next amendment was, on page 288, after line 23, to strike out:

(n) Wine gallon: "Wine gallon" is the liquid measure containing 231 cubic inches.

The amendment was agreed to.

The next amendment was, at the top of page 289, to strike out:

(o) Ton: Unless otherwise provided by law, the word "ton" shall be interpreted as meaning 20 hundredweight, each hundredweight being 112 pounds avoirdupois.

The amendment was agreed to.

The next amendment was, on page 289, after line 4, to strike out:

(p) United States: The term "United States" means the United States and any territory, or other places subject to the jurisdiction thereof, except the Philippine Islands, the Virgin Islands, the islands of Guam and Tutuila, and the Panama Canal Zone, which for the purposes of this act, except as otherwise provided by law, or as ordered by the President, shall be treated as foreign countries.

And in lieu thereof to insert:

(j) The term "United States" includes all Territories and possessions subject to the jurisdiction of the United States, except the Philippine Islands, the Virgin Islands, and the islands of Guam and Tutuila.

The amendment was agreed to.

Mr. SMOOT. Those are all the committee amendments, Mr. President.

The PRESIDENT pro tempore. The Chair understands that now all the committee amendments which were reported prior to 4 o'clock to-day have been disposed of.

Mr. SMOOT. That is as I understand it.

Mr. JONES of Washington. I desire to offer an individual amendment as a new section and ask that it may be printed in the RECORD, instead of now having it read, in order that it may be pending when the Senate proceeds to the consideration of amendments to-morrow. I will state that it is the foreign trade zone amendment.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment proposed by Mr. JONES of Washington is as follows:

SEC. —. That when used in this section—

The term "Secretary" means the Secretary of Commerce;

The term "public corporation" means a State, a legal subdivision thereof or a municipality, or a lawfully authorized public agency of a State or a municipality;

The term "applicant" means a public corporation applying for the right to establish, operate, and maintain a foreign trade zone;

The term "grantee" means a public corporation to which the privilege of establishing, operating, and maintaining a foreign trade zone has been granted.

The term "zone" means a "foreign trade zone" as provided in this section.

The Secretary is hereby authorized, subject to the conditions and restrictions of this section and of the rules and regulations made thereunder, upon application as hereinafter provided, to grant to public corporations the privilege of establishing, operating, and maintaining foreign trade zones in or adjacent to ports of entry under the jurisdiction of the United States. Not more than one zone shall be authorized in or adjacent to any port of entry, except that when a port of entry is located within the confines of more than one State a zone may be authorized in each State in the territory comprised in such port of entry.

Foreign and domestic merchandise of every description, except such as is prohibited by law, may, without being subject to the customs laws of the United States, except as otherwise provided in this section, be brought into a zone and there stored, exhibited, broken up, repacked, assembled, distributed, sorted, refined, graded, cleaned, mixed with foreign or domestic merchandise, or otherwise manipulated, and be exported, and foreign merchandise may be sent into customs territory of the United States therefrom, in the original package or otherwise; but when foreign merchandise is so sent from a zone into customs territory of the United States it shall be subject to the laws and regulations of the United States affecting imported merchandise: *Provided*, That when the privilege shall be requested the collector of cus-

toms shall supervise the unlading of foreign merchandise in the zone, cause such merchandise or any portion thereof to be appraised, and the duties liquidated thereon. Thereafter it may be stored or manipulated under the supervision and regulations prescribed by the Secretary of the Treasury, and within two years after such unlading such merchandise, whether mixed with domestic merchandise or not, may be sent into customs territory upon the payment of such liquidated duties thereon.

The Secretary of the Treasury shall assign to the zone the necessary customs officers and guards to protect the revenue and to provide for the admission of foreign merchandise into customs territory.

Vessels entering or leaving a zone shall be subject to the operation of all of the laws of the United States, except as otherwise provided in this section, and vessels leaving a zone and arriving in customs territory of the United States shall be subject to such regulations to protect the revenue as may be prescribed by the Secretary of the Treasury.

Each application shall state in detail—

(1) The location and qualifications of the area in which it is proposed to establish a zone, showing (a) the land and water or land or water area or land area alone if the application is for its establishment in or adjacent to an interior port; (b) the means of segregation from customs territory; (c) the fitness of the area for a zone; and (d) the possibilities of expansion of the zone area;

(2) The facilities and appurtenances which it is proposed to provide and the preliminary plans and an estimate of the cost thereof, and the existing facilities and appurtenances which it is proposed to utilize;

(3) The time within which the applicant proposes to commence and complete the construction of the zone and facilities and appurtenances;

(4) The methods proposed to finance the undertaking;

(5) Such other information as the Secretary may require.

The Secretary may upon his own initiative or upon request permit the amendment of the application. Any expansion of the area of an established zone shall be made and approved in the same manner as an original application.

If the Secretary finds that the proposed plans and location are suitable for the accomplishment of the purpose of a foreign trade zone under this section, and that the facilities and appurtenances which it is proposed to provide are sufficient, he shall make the grant. If the Secretary refuses the grant, the applicant may appeal to a board consisting of the Secretary of Commerce, the Secretary of the Treasury, and the Secretary of War, whose decision shall be rendered within three months from the filing of such appeal and be final as to the grant of the application.

The Secretary shall prescribe such rules and regulations not inconsistent with the provisions of this section or the rules and regulations of the Secretary of the Treasury made hereunder and as may be necessary to carry out this section.

The Secretary shall cooperate with the State, subdivision, and municipality in which the zone is located in the exercise of their police, sanitary, and other powers in and in connection with the free zone. He shall also cooperate with the United States Customs Service, the Post Office Department, the Public Health Service, the Bureau of Immigration, and such other Federal agencies as have jurisdiction in ports of entry described in the seventh paragraph of this section.

For the purpose of facilitating the investigations of the Secretary and his work in the granting of the privilege, in the establishment, operation, and maintenance of a zone, the President may direct the executive departments and other establishments of the Government to cooperate with the Secretary, and for such purpose each of the several departments and establishments is authorized, upon direction of the President, to furnish to the Secretary such records, papers, and information in their possession as may be required by him, and temporarily to detail to the service of the Secretary such officers, experts, or engineers as may be necessary.

If the title to or right of user of any of the property to be included in a zone is in the United States, an agreement to use such property for zone purposes may be entered into between the grantee and the department or officer of the United States having control of the same, under such conditions approved by the Secretary and such department or officer, as may be agreed upon.

Each grantee shall provide and maintain in connection with the zone—

(a) Adequate slips, docks, wharves, warehouses, loading and unloading, and mooring facilities where the zone is adjacent to water; or, in the case of an inland zone, adequate loading, unloading, and warehouse facilities;

(b) Adequate transportation connections with the surrounding territory and with all parts of the United States, so arranged as to permit of proper guarding and inspection for the protection of the revenue;

(c) Adequate facilities for coal or other fuel and for light and power;

(d) Adequate water and sewer mains;

(e) Adequate quarters and facilities for the officers and employees of the United States, State, and municipality whose duties may require their presence within the zone;

(f) Adequate inclosures to segregate the zone from customs territory for protection of the revenue, together with suitable provisions for ingress and egress of persons, conveyances, vessels, and merchandise;

(g) Such other facilities as may be required by the Secretary of Commerce, the Secretary of War, and the Secretary of the Treasury, acting jointly.

The grantee may, with the approval of the Secretary of Commerce and the Secretary of the Treasury, and under reasonable and uniform regulations for like conditions and circumstances to be prescribed by them, permit private persons, firms, corporations, or associations to erect such buildings and other structures within the zone as will meet their particular requirements: *Provided*, That such permission shall not constitute a vested right as against the United States, nor interfere with the regulation of the grantee or the permittee by the United States, nor interfere with or complicate the revocation of the grant by the United States: *And provided further*, That in the event of the United States or the grantee desiring to acquire the property of the permittee no good will shall be considered as accruing from the privilege granted to the zone: *And provided further*, That such permits shall not be granted on terms that conflict with the public use of the zone as set forth in this section.

Each zone shall be operated as a public utility, and all rates and charges for all services or privileges within the zone shall be fair and reasonable, and the grantee shall afford to all who may apply for the use of the zone and its facilities and appurtenances uniform treatment under like conditions, subject to such treaties or commercial conventions as are now in force or may hereafter be made from time to time by the United States with foreign Governments.

No person shall be allowed to reside within the zone except Federal, State, or municipal officers or agents whose resident presence is deemed necessary by the Secretary.

The Secretary shall prescribe rules and regulations regarding employees and other persons entering and leaving the zone. All rules and regulations concerning the protection of the revenue shall be approved by the Secretary of the Treasury.

The Secretary may at any time order the exclusion from the zone of any goods or process of treatment that in his judgment is detrimental to the public interest, health, or safety.

No retail trade shall be conducted within the zone except under permits issued by the grantee and approved by the Secretary. Such permittees shall sell no goods except such as are brought into the zone from customs territory.

The form and manner of keeping the accounts of each zone shall be prescribed by the Secretary.

Each grantee shall make to the Secretary annually, and at such other times as he may prescribe, reports containing a full statement of all the operations, receipts, and expenditures, and such other information as the Secretary may require.

The Secretary shall make a report to Congress on the first day of each regular session containing a summary of the operation and fiscal condition of each zone and transmit therewith copies of the annual report of each grantee.

The grant shall not be sold, conveyed, transferred, set over, or assigned.

In the event of repeated violations of any of the provisions of this section by the grantee, the Secretary of Commerce, the Secretary of War, and the Secretary of the Treasury, or a majority of them, may revoke the grant after four months' notice to the grantee and affording it an opportunity to be heard. The testimony taken before the Secretaries shall be reduced to writing and filed in the records of the Department of Commerce, together with the decision reached thereon.

In the conduct of any proceeding under this section for the revocation of a grant the Secretaries may compel the attendance of witnesses and the giving of testimony and the production of documentary evidence, and for such purpose may invoke the aid of the district courts of the United States.

An order under the provisions of this section revoking the grant issued by the Secretaries shall be final and conclusive, unless within 90 days after its service the grantee appeals to the circuit court of appeals for the circuit in which the zone is located by filing with the clerk of said court a written petition praying that the order of the Secretaries be set aside. The clerk of the court in which such a petition is filed shall immediately cause a copy thereof to be delivered to the Secretaries, and they shall forthwith prepare, certify, and file in the court a full and accurate transcript of the record in the proceedings held before them under this section, the charges, the evidence, and the order revoking the grant. The testimony and evidence taken or submitted before the Secretaries, duly certified and filed as a part of the record, shall be considered by the court as the evidence in the case.

On such appeal the court shall review the record of proceedings before the Secretaries and, if a decision of said Secretaries shall be supported by evidence, shall only make decision on errors of law.

That in case of a violation of this section or any regulation of the Secretary under this section by the grantee, any officer, agent, or employee thereof responsible for or permitting any such violation shall be subject to a fine of not more than $1,000. Each day during which a violation continues shall constitute a separate offense.

That if any provision of this section or the application of such provision to certain circumstances be held invalid, the remainder of the section and the application of such provisions to circumstances other than those as to which it is held invalid shall not be affected thereby.

That the right to alter, amend, or repeal this section is hereby reserved.

Mr. CALDER. Mr. President, I give notice that I shall ask for a separate vote in the Senate on paragraph 371.

Mr. LODGE. Mr. President, it is perfectly proper for the Senator to give such a notice, but I desire to suggest that notice of a reservation may be given up to the time the bill goes into the Senate.

The PRESIDENT pro tempore. A reservation or a demand for a separate vote upon an amendment which has been adopted as in Committee of the Whole may be made up to the time the amendments are voted upon en bloc in the Senate.

Mr. LODGE. Exactly.

Mr. SMOOT. Mr. President, I ask unanimous consent that the Secretary may be allowed to change all of the paragraph numbers in the bill without formal action upon them. There will be a number of them which it will be necessary to change. Such changes I suggest will be merely numerical.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SMOOT. I also ask that the Secretary may have similar authority with reference to changing the numbers of sections, if that shall be found necessary.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. NEWBERRY, Mr. MCCORMICK, and Mr. WADSWORTH each submitted two amendments intended to be proposed by them to the pending bill, which were ordered to lie on the table and to be printed.

Mr. FRELINGHUYSEN and Mr. PHIPPS each submitted an amendment intended to be proposed by them to the pending bill, which were ordered to lie on the table and to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, communicated to the Senate the resolutions of the House unanimously adopted as a tribute to the memory of Hon. WILLIAM E. CROW, late a Senator from the State of Pennsylvania.

The message also communicated to the Senate the resolutions of the House unanimously adopted as a tribute to the

memory of Hon. MOSES P. KINKAID, late a Representative from the State of Nebraska.

The message further communicated to the Senate the intelligence of the death of Hon. LEMUEL PHILLIPS PADGETT, late a Representative from the State of Tennessee, and transmitted resolutions of the House thereon.

ENROLLED BILL SIGNED.

The message announced that the Speaker of the House had signed the enrolled bill (S. 848) to amend section 22 of the interstate commerce act, as amended, and it was thereupon signed by the President pro tempore.

REPORTS OF COMMITTEES.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (H. R. 2003) for the relief of Hubert Reynolds, reported it without amendment and submitted a report (No. 852) thereon.

He also, from the same committee, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

A bill (H. R. 2722) for the relief of W. W. McGrath (Rept. No. 853); and

A bill (H. R. 3034) for the relief of Lizzie Askel (Rept. No. 854).

Mr. CAPPER (for Mr. SPENCER), from the Committee on Claims, to which was referred the bill (S. 3738) authorizing the Court of Claims of the United States to hear, determine, and render final judgment in the claim of Elwood Grissinger, reported it with amendments and submitted a report (No. 855) thereon.

Mr. WADSWORTH, from the Committee on Military Affairs, to which was referred the bill (S. 3890) to amend an act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, as amended by the act of June 4, 1920, reported it without amendment and submitted a report (No. 856) thereon.

Mr. NEW, from the Committee on Claims, to which was referred the bill (S. 3609) for the relief of F. J. Belcher, jr., trustee for Ed Fletcher, reported it without amendment and submitted a report (No. 857) thereon.

He also, from the same committee, to which was referred the bill (S. 2582) for the relief of George Hewitt Myers, reported it with an amendment and submitted a report (No. 858) thereon.

He also, from the same committee, to which was referred the bill (S. 2388) for the relief of Augusta Reiter, reported it with amendments and submitted a report (No. 859) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McNARY:

A bill (S. 3909) granting an increase of pension to John J. Swain; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3910) granting a pension to Dennis Donovan, alias Dan Dubois; and

A bill (S. 3911) granting an increase of pension to Eli Newsom; to the Committee on Pensions.

By Mr. CUMMINS:

A bill (S. 3912) granting an increase of pension to Ann J. Alexander (with accompanying papers); to the Committee on Pensions.

EXECUTIVE SESSION.

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 5 minutes spent in executive session the doors were reopened and (at 7 o'clock and 25 minutes p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Wednesday, August 16, 1922, at 10 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 15 (legislative day of August 3), 1922.

GOVERNOR OF THE VIRGIN ISLANDS.

Henry H. Hough to be Governor of the Virgin Islands.

PROMOTIONS IN THE ARMY.

Benjamin Alvord to be assistant to The Adjutant General with rank of brigadier general.

John Ferral McBlain to be first lieutenant, Air Service.

James Lemuel Blakeney to be chaplain with rank of captain.

John Joseph Byrne to be chaplain with rank of captain.

Francis Forbes Donnelly to be chaplain with rank of captain.

HOUSE OF REPRESENTATIVES.

TUESDAY, *August 15, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, our Heavenly Father, as we lift our voice to Thee may all hearts shape themselves in praise and thanksgiving. From Thy throne echo the love and mercy which encircle us; we therefore beseech Thee to accept our prayer of gratitude. Raise all minds to a plane of noble peace and happiness. Bless the relationship which we sustain to our country, and may it be that of servant and student. O may it be our wedded love and our keenest desire to serve and protect it. Awaken among all citizens the sublime thought of their inheritance. O speak unto them and direct them lest they become the wandering heirs of freedom. May all men look with clear vision and self-surrender upon the stately altars of our country's life. Bestow upon this assembly that wisdom which knows the right and endures and is unassailed by fear. In all deliberations may the tenets of free government be upheld and preserved and may its succoring arm reach the farthest section of the Republic. Direct our President; unveil the way that we should go; may the rights of man be triumphant in the richest blessings to the remotest border and the humblest citizen of our land, through Jesus Christ, our Lord. Amen.

The Journal of the proceedings of Friday, June 30, 1922, was read and approved.

RESIGNATION OF REPRESENTATIVE WALSH.

The SPEAKER laid before the House the following communication:

HOUSE OF REPRESENTATIVES,
Washington, D. C.

Hon. FREDERICK H. GILLETT,
Speaker, House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: Having been honored by the Governor of Massachusetts with an appointment as a justice of the superior court of said Commonwealth and having qualified for said office, I beg to advise that I have transmitted to his excellency, the governor, my resignation as a Representative in Congress from the sixteenth district of Massachusetts, effective this day.

With assurances of high personal regard and with sincere good wishes to my former colleagues, I remain,

Respectfully,

JOSEPH WALSH.

NEW BEDFORD, MASS., *August 2, 1922.*

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3793. An act to authorize the Gary Tube Co. to construct a bridge across the Grand Calumet River in the State of Indiana.

S. 3834. An act to authorize the Chicago, Lake Shore & Eastern Railway Co. to construct a bridge across the Grand Calumet River in the State of Indiana.

S. J. Res. 216. Joint resolution providing for the consent of the Congress of the United States of America to a compact and agreement between the State of Kansas and the State of Missouri respecting the erection, maintenance, and operation of the water-works plants of the cities of Kansas City, Kans., and Kansas City, Mo.; the taxation thereof, and exercise of eminent domain in connection therewith by each State.

S. 3733. An act granting the consent of Congress to the city of Warren, in the State of Ohio, its successors and assigns, to construct, maintain, and operate a dam across the Mahoning River in the State of Ohio.

S. 3840. An act to amend section 5147 of the Revised Statutes.

S. 2984. An act for the relief of Thurston W. True.

S. 3103. An act to amend section 2294, United States Revised Statutes, relating to homesteads.

S. 3519. An act defining the rights of the Mescalero Apache Indians in the Mescalero Indian Reservation, providing for an allotment of certain lands therein in severalty to the Mescalero Apache Indians, and creating and defining the All Year National Park, and for other purposes.

S. 3531. An act to amend section 9 of the Federal reserve act.

S. 3721. An act providing for the erection of additional suitable and necessary buildings for the National Leper Home.

S. 3757. An act authorizing the Department of Commerce to collect and publish additional cotton statistics and information.

S. 3808. An act authorizing the Secretary of the Interior to investigate and report to Congress upon the Columbia Basin irrigation project.

S. J. Res. 223. Joint resolution authorizing the Federal Reserve Bank of Kansas City to enter into contracts for the erection of a building for its branch office at Denver, Colo.

S. J. Res. 229. Joint resolution authorizing the Federal Reserve Bank of Chicago to enter into contracts for the erection of a building for its branch office in Detroit, Mich.

S. J. Res. 234. Joint resolution authorizing the Federal Reserve Bank of Atlanta to enter into contracts for the erection of a building for its branch office in Jacksonville, Fla.

The message also announced that the Senate had passed the following resolution:

Senate Resolution 329.

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. WILLIAM E. CROW, late a Senator from the State of Pennsylvania.

Resolved, That a committee of eight Senators be appointed by the President pro tempore to attend the funeral.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased the Senate do now adjourn.

The message also announced that the Senate had passed, with amendments, bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 4. An act granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses.

H. R. 858. An act for the relief of Alfred P. Reck.

H. R. 10248. An act authorizing the lease of surplus power developed under the Salt River reclamation project, Ariz.

H. R. 5775. An act for the relief of Liberty loan subscribers of the North Penn Bank, of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers & Merchants State Bank, Kenmare, N. Dak.

H. J. Res. 322. Joint resolution favoring the establishment in Palestine of a national home for the Jewish people.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 848) to amend section 22 of the act entitled "An act to regulate commerce," approved February 4, 1887, as amended.

The message also announced that the Senate had passed, without amendment, bills of the following titles:

H. R. 314. An act for the relief of Forrest R. Black.

H. R. 6817. An act to authorize the Secretary of the Interior to issue patent to the State of Michigan, in trust, of a certain described tract of land to be used as a game refuge.

H. R. 7598. An act authorizing the Secretary of the Interior to dedicate and set apart as a national monument certain lands in Riverside County, Calif.

H. R. 7812. An act to extend the time for cutting timber in the Coconino and Tusayan National Forest, Ariz.

H. R. 8244. An act permitting Frances Mack Mann to purchase certain public lands;

H. R. 8845. An act for the relief of Mattie Alexander;

H. R. 9048. An act to authorize the California Débris Commission to reimburse the city of Sacramento, Calif., for money expended by said city in the construction of the Sacramento weir;

H. R. 9257. An act to permit adjustment of conflicting claims to certain lands in Mohave County, Ariz.;

H. R. 9746. An act for the relief of Emmett Otto Cooney;

H. R. 9814. An act amending the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service;

H. R. 10517. An act providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation in Cameron Parish, La., now abandoned;

H. R. 10957. An act to rebuild the school building of the Indian school near Tomah, Wis.;

H. R. 11054. An act to validate certain deeds executed by members of the Five Civilized Tribes, and for other purposes;

H. R. 11233. An act authorizing the Secretary of Commerce to convey certain land to the county of Muscatine, Iowa;

H. J. Res. 170. Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association and lands contiguous thereto that may be acquired for that purpose as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence; and

H. J. Res. 316. Joint resolution authorizing the reappointment of Frederick Mears as a commissioned officer of the Regular Army and making him available when so reappointed for service as chairman and chief engineer of the Alaskan Engineering Commission.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. DUPRÉ, indefinitely, on account of important business.

To Mr. RAKER, indefinitely, on account of illness.

To Mr. CONNELL, indefinitely, on account of illness.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. HAWES] be granted indefinite leave of absence on account of personal illness.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the gentleman from Missouri [Mr. HAWES] be granted indefinite leave of absence on account of illness. Is there objection?

There was no objection.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that on June 30 they presented to the President of the United States, for his approval, the following bills:

H. R. 11298. An act amending existing law which authorizes the construction of a public building at Paris, Tex., so as to authorize and empower the Secretary of the Treasury to acquire a new site for same by exchanging therefor land and property now owned by the United States Government in said city, and to authorize the erection on said new site, when acquired, of a public building suitable for post-office purposes, and for other purposes;

H. R. 11588. An act to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors and marines";

H. R. 11214. An act authorizing the President to scrap certain vessels in conformity with the provisions of the treaty limiting naval armament, and for other purposes;

H. R. 11244. An act authorizing the construction of a bridge across White River in the State of Arkansas;

H. R. 12090. An act making appropriations to supply deficiencies in appropriations for the fiscal year ending June 30, 1922, and prior fiscal years, supplemental appropriations for the fiscal year ending June 30, 1923, and for other purposes;

H. R. 12092. An act granting the consent of Congress to the Louisiana Development Co. to construct a bridge across the Red River at or near Grand Ecore, La.;

H. R. 12120. An act granting the consent of Congress to the county court of Lafayette County, in the State of Missouri, to construct a bridge across the Missouri River;

H. R. 12121. An act granting the consent of Congress to the county court of Saline County, in the State of Missouri, to construct a bridge across the Missouri River;

H. R. 8767. An act for the relief of F. E. Taylor and B. C. Broom; and

H. J. Res. 353. Joint resolution authorizing the Secretary of War to loan certain tents, cots, chairs, etc., to the executive committee of the Louisiana Department of the American Legion for use at the national convention of the American Legion, to be held at New Orleans, La., in October, 1922.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 848. An act to amend section 22 of the interstate commerce act as amended.

DEATH OF REPRESENTATIVE KINKAID.

Mr. ANDREWS of Nebraska. Mr. Speaker, it becomes my unwelcome duty to announce the death of Hon. MOSES P. KINKAID, late a Representative in Congress from the State of Nebraska. At some future time we hope to have opportunity to pay suitable tribute to his memory and public service. For the present I send to the Clerk's desk the following resolution and move its adoption.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 398.

Resolved, That the House has heard with profound sorrow of the death of Hon. MOSES P. KINKAID, a Representative from the State of Nebraska.

Resolved, That the Clerk communicate these resolutions to the Senate, and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

DEATH OF REPRESENTATIVE PADGETT.

Mr. GARRETT of Tennessee. Mr. Speaker, Hon. LEMUEL PHILLIPS PADGETT, Representative in Congress from the seventh district of Tennessee, died in this city in the early morning of August 2. I make this announcement with profound personal sorrow. Of course the membership of the House knew the value of Mr. PADGETT's services. His district knew the value of his services. His district pointed with pride to the great career that he made for himself, for his district, for his State, and his country.

I shall not say more at this time. Later a request will be made that a time be set apart during which there may be given expression of the appreciation of his colleagues of his services to the country.

I offer the resolution which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 399.

Resolved, That the House has heard with profound sorrow of the death of Hon. LEMUEL PHILLIPS PADGETT, a Representative from the State of Tennessee.

Resolved, That the Clerk communicate these resolutions to the Senate, and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

DEATH OF SENATOR CROW.

Mr. CRAGO. Mr. Speaker, I offer the following resolution, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 400.

Resolved, That the House has heard with profound sorrow of the death of Hon. WILLIAM E. CROW, late a Senator of the United States from the State of Pennsylvania.

Resolved, That the Clerk communicate these resolutions to the Senate, and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT.

Mr. CRAGO. Mr. Speaker, I offer the following resolution.

The SPEAKER. The gentleman from Pennsylvania offers the resolution which the Clerk will report.

The Clerk read as follows:

House Resolution 401.

Resolved, That as a further mark of respect to the memory of the late Representatives KINKAID and PADGETT and the late Senator CROW the House do now adjourn.

The motion was agreed to.

Accordingly (at 12 o'clock and 25 minutes p. m.) the House adjourned until Wednesday, August 16, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

660. A letter from the Secretary of War, transmitting a draft of a bill to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, so as to include certain employees of the Panama Canal Zone; to the Committee on Reform in the Civil Service.

661. A letter from the Secretary of War, transmitting a request for the authorization for the printing of the final report of the Arlington Memorial Amphitheater Commission, transmitted to the Speaker of the House by the Secretary of War on March 3, 1921; to the Committee on Printing.

662. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination of Kill Van Kull and Newark Bay, N. Y. and N. J., with a view to securing a channel 30 feet in depth and of suitable width to the bridge of the Central Railroad Co. of New Jersey between Elizabeth and Bayonne, including the removal of Bergen Point Ledge; to the Committee on Rivers and Harbors.

663. A letter from the Secretary of State, transmitting request for the passage of a bill (H. R. 11986) for the relief of the Royal Italian Government for losses sustained by collision of the U. S. S. *Buford* with the barge *Anode;* to the Committee on Foreign Affairs.

664. A letter from the Secretary of Commerce, transmitting a report of the sale of 2,765 pounds of useless papers by the Steamboat Inspection Service for the amount of $6.50; to the Committee on Disposition of Useless Executive Papers.

665. A letter from the Secretary of Commerce, transmitting a report on the disposition of about 21,921 pounds of useless papers for approximately $230; to the Committee on Disposition of Useless Executive Papers.

666. A letter from the chairman of the Federal Trade Commission, transmitting explanatory and statistical material supporting the preliminary report of the commission on investment and profit in soft-coal mining, 1916–1921 (S. Doc. No. 207); to the Committee on Interstate and Foreign Commerce.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 10686) granting an increase of pension to Elizabeth Sizemore; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11787) granting a pension to Frederick B. Eldridge; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11793) granting a pension to Jerome P. Murphy; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 11906) granting a pension to Spencer E. Graves; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 12176) granting an increase of pension to Celia Oates; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. KNUTSON: A bill (H. R. 12274) to compensate the Chippewa Indians of Minnesota for lands disposed of under the provisions of the free homestead act; to the Committee on Indian Affairs.

By Mr. RIORDAN: A bill (H. R. 12275) to regulate the pay, allowances, and grades of certain officers in the United States Navy; to the Committee on Naval Affairs.

By Mr. COLE of Iowa: A bill (H. R. 12276) to amend the act of Congress approved July 17, 1916, known as the Federal farm loan act; to the Committee on Banking and Currency.

By Mr. CLARK of Florida: A bill (H. R. 12277) to provide for the levy and collection of taxes on certain real estate in the District of Columbia; to the Committee on the District of Columbia.

By Mr. HILL: A bill (H. R. 12278) making eligible for retirement under certain conditions officers of the United States Army, other than officers of the Regular Army, who incurred physical disability in line of duty while in the service of the United States during the war; to the Committee on Military Affairs.

By Mr. SANDERS of Indiana: Joint resolution (H. J. Res. 371) authorizing the Secretary of War to loan certain cots, blankets, tents, chairs, etc., to the executive committee of the American Legion for the Department of Indiana for use at the State convention of the American Legion to be held at Terre Haute, Ind., September 25, 26, and 27, 1922; to the Committee on Military Affairs.

By Mr. MALONEY: Resolution (H. Res. 402) for investigation of labor conditions existing in the cotton industry in New England; to the Committee on Rules.

By Mr. ANDREWS of Nebraska: Resolution (H. Res. 403) providing for the payment of one month's salary to Laurence H. Malone and Florence M. Malone, clerks to the late Hon. Moses P. Kinkaid; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURROUGHS: A bill (H. R. 12279) for the relief of Veranus D. Drew; to the Committee on Military Affairs.

Also, a bill (H. R. 12280, granting an increase of pension to Lucinda M. Fuller; to the Committee on Invalid Pensions.

By Mr. CANNON: A bill (H. R. 12281) granting a pension to Robert Fletcher; to the Committee on Invalid Pensions.

By Mr. COLE of Iowa: A bill (H. R. 12282) granting a pension to Ada G. Sherwood; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 12283) granting a pension to Julia Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12284) granting a pension to George E. Reed; to the Committee on Pensions.

By Mr. DRIVER: A bill (H. R. 12285) granting a pension to Eliza Hill; to the Committee on Invalid Pensions.

By Mr. FAUST: A bill (H. R. 12286) granting a pension to Margaret A. Medley; to the Committee on Invalid Pensions.

By Mr. FITZGERALD: A bill (H. R. 12287) granting a pension to Julia B. Cole; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12288) granting a pension to Edith Hampel; to the Committee on Pensions.

Also, a bill (H. R. 12289) granting a pension to Huldah A. E. Dutton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12290) granting a pension to Mary B. Elliott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12291) granting a pension to Addie Wilson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12292) granting a pension to Pearl J. Carrier; to the Committee on Pensions.

Also, a bill (H. R. 12293) granting a pension to Anna Hagans; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 12294) granting a pension to Flora Bryson Eiselstein; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12295) granting a pension to Mary A. Morris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12296), granting a pension to Sarah F. Champlin; to the Committee on Invalid Pensions.

By Mr. HAWES: A bill (H. R. 12297) granting a pension to Lucy May Raymond; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 12298) granting an increase of pension to Elizabeth J. Wright; to the Committee on Invalid Pensions.

By Mr. KENNEDY: A bill (H. R. 12299) granting an increase of pension to Clarice Fly; to the Committee on Invalid Pensions.

By Mr. KING: A bill (H. R. 12300) granting a pension to Francis S. Reedy; to the Committee on Invalid Pensions.

By Mr. MILLSPAUGH: A bill (H. R. 12301) granting a pension to Mary Underwood; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12302) granting an increase of pension to Nancy E. Alward; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12303) granting an increase of pension to Emily French; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 12304) granting an increase of pension to Mary A. Ramsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12305) granting a pension to Emma V. Wilkerson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12306) granting an increase of pension to Flora B. Warren; to the Committee on Pensions.

By Mr. REECE: A bill (H. R. 12307) granting an increase of pension to Sarah A. Blevins; to the Committee on Invalid Pensions.

By Mr. RHODES: A bill (H. R. 12308) granting an increase of pension to Margaret E. Myers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12309) granting an increase of pension to Mary Reilly; to the Committee on Invalid Pensions.

By Mr. SINNOTT: A bill (H. R. 12310) granting an increase of pension to Sarah E. Leavitt; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 12311) for the relief of Robert Laird, sr.; to the Committee on Claims.

Also, a bill (H. R. 12312) granting an increase of pension to Mary E. Higley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12313) granting an increase of pension to Clara J. Gillespie; to the Committee on Pensions.

By Mr. TEN EYCK: A bill (H. R. 12314) granting a pension to Sarah A. Atherton; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 12315) for the relief of the owners of the schooner *T. K. Bentley;* to the Committee on Claims.

By Mr. WILLIAMSON: A bill (H. R. 12316) granting a pension to Michael Halloran; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6143. By the SPEAKER (by request): Petition of sundry citizens of Chicago, Ill., opposing the passage of House bills 9753 and 4388 and Senate bill 1948 and other sundry bills; to the Committee on the District of Columbia.

6144. Also (by request), petition of Mrs. William J. Downing, 700 Park Street, Salisbury, Md., regarding world peace; to the Committee on Foreign Affairs.

6145. Also (by request), petition of the Minnesota State Federation of Labor, urging the passage of the Fitzgerald workmen's compensation bill; to the Committee on the District of Columbia.

6146. Also (by request), petition of sundry citizens of Lithuanian descent of Waukegan and North Chicago, Ill., expressing gratitude to the United States for the recognition of the Lithuanian Republic; to the Committee on Foreign Affairs.

6147. Also (by request), petition of Wisconsin State Federation of Labor, favoring the recognition of the Government of Mexico; to the Committee on Foreign Affairs.

6148. Also (by request), petition of the president of the American Federation of Labor, favoring the recognition of the Government of Mexico; to the Committee on Foreign Affairs.

6149. Also (by request), petition of Chamber of Commerce of Porto Rico, regarding the tariff on Porto Rican coconuts; to the Committee on Ways and Means.

6150. Also (by request), petition of sundry Wisconsin farmers, favoring legislation in favor of beer and light wines; to the Committee on the Judiciary.

6151. Also (by request), petition of Third Church of Christ, Scientist, of Brooklyn, N. Y., regarding the treatment of the Christian people in Asia Minor; to the Committee on Foreign Affairs.

6152. Also (by request), petition of the National Indian War Veterans, Oklahoma City, Okla., favoring the passage of the Capper bill, the Morgan bill, and the Spanish-American soldiers' bill; to the Committee on Pensions.

6153. Also (by request), petition of the Lebanon Chamber of Commerce, Lebanon, Pa., condemning the Herrin massacre; to the Committee on the Judiciary.

6154. Also (by request), petition of the Jewish National Council, Jerusalem, thanking the Congress of the United States for the passage of the resolution relative to the creation of Palestine as the national home for Jewish people; to the Committee on Foreign Affairs.

6155. Also (by request), petition of the United Spanish War Veterans, Monterey, Calif., urging that Mare Island be kept up to the standard of a first-class naval base; to the Committee on Naval Affairs.

6156. By Mr. CROWTHER: Petition of employees of the United States arsenal at Watervleit, N. Y., favoring an amendment to the civil service laws which will take care of certain employees of said arsenal; to the Committee on Reform in the Civil Service.

6157. Also, petition of Martin McMartin Post, No. 257, Grand Army of the Republic, of the city of Johnstown, N. Y., urging the immediate passage of the Bursum and Morgan pension bill; to the Committee on Invalid Pensions.

6158. Also, petition of Schenectady Post, No. 357, Veterans of Foreign Wars, urging the passage of House bill 11623, providing for the incorporation of the Veterans of Foreign Wars; to the Committee on the Judiciary.

6159. Also, petition of the New York Chapter, Military Order of the World War, urging adequate appropriation for the training personnel of the Officers' Reserve Corps and enlisted reserve; to the Committee on Appropriations.

6160. By Mr. DARROW: Petition of the Philadelphia Board of Trade, favoring a reduction in the cost of issuing passports; to the Committee on Foreign Affairs.

6161. By Mr. GRAHAM of Pennsylvania: Petition of the Philadelphia Board of Trade, indorsing H. Res. 314 and objecting to H. R. 11548; to the Committee on Banking and Currency.

6162. By Mr. KISSEL: Petition of Geo. Borgfeldt & Co., New York City, regarding flood disasters on the Mississippi River; to the Committee on Flood Control.

6163. By Mr. YOUNG: Petition of Mr. G. A. Stillman, Washburn, N. Dak., and 51 others, asking that Congress take action to protect the Armenians against the Turks; to the Committee on Foreign Affairs.

6164. Also, petition in the shape of a resolution adopted at the Fourth Irrigation Congress of the North Dakota Irrigation Association, held at Bismarck, N. Dak., on July 8, 1922, in which it was declared that inasmuch as settlers by the thousand, in utmost good faith, have been distressed by erratic and uncertain climatic conditions, it is highly important and imperative to their continued residence and success that available water, under a Missouri-Yellowstone project, be made immediately available to their use and that priority of consideration of right belongs to these settled lands as against vast unsettled arid areas of less certain agricultural value; to the Committee on Irrigation of Arid Lands.

6165. Also, petition of the Bergen National Farm Loan Association of Bergen, N. Dak., urging an amendment to the Federal farm loan act; to the Committee on Banking and Currency.

SENATE.

WEDNESDAY, *August 16, 1922.*

(Legislative day of Thursday, August 3, 1922.)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

Mr. McCUMBER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ball	Edge	McNary	Sheppard
Broussard	Ernst	Moses	Shortridge
Bursum	Gooding	Myers	Smoot
Calder	Harreld	Nicholson	Sterling
Cameron	Jones, N. Mex.	Norbeck	Sutherland
Capper	Jones, Wash.	Overman	Trammell
Cummins	Kellogg	Pepper	Walsh, Mont.
Curtis	Kendrick	Pomerene	Warren
Dial	McCumber	Rawson	Watson, Ga.
Dillingham	McKellar	Robinson	

Mr. CURTIS. I wish to announce the necessary absence of the Senator from Minnesota [Mr. NELSON] on account of a recent death in his family.

I also wish to announce that the Senator from Ohio [Mr. WILLIS] is necessarily absent because of illness in his family.

Mr. HARRISON. I desire to announce that the Senator from Nevada [Mr. PITTMAN] is necessarily absent owing to illness in his family.

The PRESIDENT pro tempore. Thirty-nine Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and the following Senators answered to their names when called:

Harrison	Ransdell	Smith

The following Senators entered the Chamber and answered to their names:

Ashurst	Keyes	Oddie	Watson, Ind.
Fletcher	McCormick	Phipps	
Hale	McLean	Stanfield	
Heflin	Newberry	Wadsworth	

The PRESIDENT pro tempore. Fifty-five Senators have answered to their names. There is a quorum present.

SENATOR FROM PENNSYLVANIA.

Mr. PEPPER. Mr. President, I desire to present the credentials of Maj. DAVID A. REED, appointed by the Governor of Pennsylvania a Senator from that State.

The PRESIDENT pro tempore. The credentials will be read.

The reading clerk read the credentials, as follows:

IN THE NAME AND BY AUTHORITY OF THE COMMONWEALTH OF PENNSYLVANIA,
Executive Department.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Pennsylvania, I, William Cameron Sproul, the Governor of said State, do hereby appoint David A. Reed a Senator from said State to represent said State in the Senate of the United States, until the vacancy therein, caused by the death of the Hon. William E. Crow, is filled by election, as provided by law.

Witness his excellency our governor, and our seal hereto affixed at Harrisburg, this 8th day of August, in the year of our Lord 1922.

[SEAL.] WM. C. SPROUL, *Governor.*

By the Governor:
BERNARD J. MYERS,
Secretary of the Commonwealth.

The PRESIDENT pro tempore. The credentials will be placed on the files of the Senate.

Mr. PEPPER. Mr. President, Major REED is present and ready to take the oath of office.

The PRESIDENT pro tempore. The Senator appointed will present himself at the desk and take the oath.

Mr. REED, escorted by Mr. PEPPER, advanced to the Vice President's desk, and, the oath prescribed by law having been administered to him, he took his seat in the Senate.

THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes.

Mr. STERLING. I desire to present an amendment intended to be proposed by me to the pending bill, which I ask may lie on the table and be printed.

The PRESIDENT pro tempore. It is so ordered.

The Chair desires to make one observation. Under a unanimous-consent agreement already entered into the junior Senator from Oklahoma [Mr. HARRELD] has the right to address the Senate for an hour upon an amendment which he will present.

Mr. HARRELD. Mr. President, I send to the desk two amendments, which I desire may be stated by the Secretary.

The PRESIDENT pro tempore. The Secretary will state the amendments as requested.

The READING CLERK. It is proposed, on page 229, line 6, to strike out "crude, fuel, or," and on page 23, after line 20, to insert the following new paragraph:

PAR. 54a. Oils, mineral: Petroleum, crude, 35 cents per barrel of 42 gallons; fuel oil, 25 cents per barrel of 42 gallons.

Mr. HARRELD. Mr. President, the amendments which I have just presented, and which have been read at the Secretary's desk, were first offered by me some time ago. They prescribe the same duties on crude petroleum and fuel oil which were provided for by the pending bill when it was reported out of the Ways and Means Committee to the House of Representatives. However, the provisions as reported favorably were stricken out in the House. I desire, therefore, to address the Senate for a while concerning the amendments.

It might be well, Mr. President, for me at the outset to say a word or two about my personal interest in the question which is involved in the amendments. There may be some Members of the Senate, and especially some newspaper men, who are very prudish, and who think that I should not present this matter and should not vote for these amendments because I have a small personal interest in the oil business. For their benefit I desire to say that several years ago I sold all the production of crude petroleum of which I was then the owner, and at the present time my only interest in the oil business consists of the ownership of some stock in several independent oil concerns, of more or less uncertain value; also some stock in a small independent refinery, which, perhaps, has very small value; and, in addition to that, a small royalty interest, the oil from which I sell to the Standard Oil Co. to-day for 75 cents per barrel. They refine it, take out 25 per cent in the way of the high products, and sell the residue for fuel oil in the same vicinity for $1.25 per barrel. That will give an idea of my interest in the oil business and perhaps a reason for my activities if any one wants to know.

However, my interest is so insignificant as compared with the importance to the independent oil producers of the country and to the public generally, of the matter embraced in the amendments which I have offered, that I am impelled, in spite of criticisms which may come, to advocate and to vote for this proposed tariff on crude petroleum; for the interest of the general public, in my opinion, as well as that of the independent producers of crude petroleum, is so much more important than my personal interest that the argument that I am disqualified to vote on this question entirely loses its force.

Mr. President, I am not one of those who are continually railing at big business. My judgment is that aggregations of capital ought to be a blessing to the public. It is only when they cease to be a blessing to the public that I will be heard from as I am going to be heard from this morning. It stands to reason that a large amount of capital invested, for instance, in the making of farm implements, employing up-to-date machinery and labor-saving methods and devices ought to make it cheaper for the public to buy plows than it used to be when they were made in the forge of the small blacksmith. The shoemaking industries, with all of their machinery and labor-saving devices, ought to produce shoes cheaper than the old cobbler used to produce them, but they do not do it. The packing plants of this country, with their immense capital invested, ought to make the products of the farm in the form of meats cheaper to the public. When they did not do it the Government reached out and put a restraining hand on the shoulder of the packers and said, "We are going to make you do it." So, I repeat, it is not my purpose to arraign aggregations of capital in any sense of the word. It is only, as I have said, when they cease to be a benefit to the public; it is only when they commit acts which are not in the interest of the public that I will be heard to lift my voice in the Senate against them.

Mr. President, on the 23d day of last August I spoke at some length in favor of the proposed tariff on crude petroleum and its products. It is not my purpose to reiterate the statements contained in that speech. I then charged that a few producing companies were attempting to acquire a monopoly of the petroleum production and that these few companies which are both producing and purchasing companies had deliberately reduced the price of crude from $3.50 per barrel on the 1st day of January, 1921, to $1 per barrel on the 1st of July, 1921. I then charged that this was being done in furtherance of a conspiracy to bankrupt the 21,000 independent oil producers in this

country with a view to purchasing their properties and thus gaining a monopoly of the oil production. They have had a monopoly upon the oil-purchasing business for some time. In order to bring about this reduction in price I charged that they were importing vast volumes of Mexican crude into this country, both as a means of profit and as a justification of their reduction in prices. I showed that practically the same people who have had a throttle hold on the oil industry in this country were the principal producers of oil in Mexico, where they are able to produce oil at 11 cents a barrel, as against a cost of $1.56 per barrel in the United States.

I wish to say that when at that time I said that it cost $1.56 to produce oil in the United States I was perhaps wrong, for, in my judgment, it costs more than that.

I offered at that time a resolution proposing an inquiry into the existence of this conspiracy and seeking to show that immense sums of money had been borrowed from the Federal reserve banks of this country to purchase independent properties from owners who were embarrassed because of the condition they had brought about by the reduction of the price of crude. I introduced this resolution in good faith expecting to prosecute it vigorously, but before I could get an opportunity to do so I was forced to go to a hospital for an operation, which kept me confined for seven weeks and from which I have not yet fully recovered. When I had recovered to such an extent that I was able to take up the fight again I discovered that for some reason, whether because of the proposed investigation I am not able to say, the monopolists referred to had increased the price of crude to $2.25 per barrel, although there had been practically no change in production and importation records and in the conditions surrounding the oil business which justified either the reduction in the first place or the increase in the second place, thus clearly showing that I was right when I charged that the market prices were being manipulated by the monopolist oil companies for a purpose.

If further proof of that fact is wanting, it is had in the fact that the price of gasoline remained steady during all this time, thus showing clearly that there is no relation between the price of crude and the price of gasoline, and that the price in each case is fixed arbitrarily by the oil monopolists. I mention this fact to show that the argument that a tariff on crude petroleum will increase the price of gasoline to the consuming public is a fallacy.

In that connection I want to say, Mr. President, that in voting for certain high rates during the progress of this bill in the Senate I was actuated to vote for some of those amendments by one reason and for some by another. I was actuated to vote for some of those rates because they were needed to protect some infant industry. In some cases I thought the duty would be a good revenue producer. In other cases I voted for the high rates because of the fact that the price of the product on which the tariff was to be imposed was controlled by some monopolistic concern and the market was being made to pay all that it would bear.

I was interested in the speech which the Senator from Utah [Mr. SMOOT] made and the charts which he introduced on the sugar question. The three charts that he introduced showed that in three instances where the tariff on sugar had been altered it made practically no difference in the price of that product. Why? Because the Sugar Trust make the people of this country pay the last cent that the market will stand. The only limit to the price they fix on sugar is a price which would cause the American public to go on strike and quit buying sugar. That is the only place where they stop. That argument is peculiarly applicable to the product of the refineries of oil in this country. They make the public pay the last cent that the public will stand for and not go on strike and quit buying, and that is the reason why I am in favor of a tariff on oil, because when you levy a tariff on an article of that sort, no matter how high, it is not passed on to the public. It can not be passed on to the public. It comes out of the profits of the profiteers that are manufacturing and putting that product on the market.

Mr. HARRISON. Mr. President, will the Senator yield, or does he desire not to be interrupted?

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Mississippi?

Mr. HARRELD. I will yield.

Mr. HARRISON. Does the Senator mean to tell the Senate that a tariff laid on the importation of sugar is not reflected in the price to the consumer?

Mr. HARRELD. That is my judgment. My judgment is that the Sugar Trust of this country to-day make the public pay every cent it will stand for.

Mr. HARRISON. The price, though, will be increased, whether it goes into the pockets of the trust or whether it goes into somebody else's pocket. Does the Senator think that?

Mr. HARRELD. I said that the charts which the Senator from Utah [Mr. SMOOT] introduced on the floor of the Senate and pointed to the other day showed that it had not had that effect in the past.

Mr. HARRISON. That it had not increased to the consumer the price of sugar?

Mr. HARRELD. It had not done it.

Mr. HARRISON. And that was the reason why the Senator voted for a large increase in the duty on sugar?

Mr. HARRELD. That entered into the considerations that led me to vote for a tariff on sugar, because that tariff will be collected from the profits of the Sugar Trust and not from the public.

Mr. NICHOLSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Colorado?

Mr. HARRELD. I do; for just a minute.

Mr. NICHOLSON. If the Senator from Oklahoma will yield, I should like to answer the question asked by the distinguished Senator from Mississippi.

When the Underwood tariff bill was enacted and the duty on sugar was lowered, the refineries and the Cuban producers absorbed the larger part of the reduction that took place in the tariff. When the duty was raised they likewise absorbed the raise to the extent of about 65 or 70 per cent, 30 or 35 per cent being absorbed by the consumer. The large part of the raise, however, was absorbed by the Cuban producers and the refiners, and when the tariff was lowered they absorbed the larger part of the decrease.

Mr. HARRISON. May I say——

Mr. HARRELD. I shall have to decline to yield further, because I have not the time. I did not want to branch off into the sugar argument, except as it applied to the products of oil; and unless the Senator will be very brief I shall have to decline to yield further.

Mr. HARRISON. I merely want to say, in response to that, that if the Senator from Oklahoma and the Senator from Colorado think they can put that over on the American people they are very much fooled. The American people know that the tariff increase will be reflected in the price to the American consumer of sugar.

Mr. HARRELD. Mr. President, the Senator from Mississippi and I do not agree on that point; but that is beside the issue. I insist, however, that for that very reason a tariff put on the refined products of oil will not be felt by the consuming public at all.

It is true that recently gasoline has been reduced in price; but an examination of the facts will disclose that within 60 days before this reduction was made the price of gasoline had been advanced practically the same amount that it has now been reduced, and I charge now that the increase in the price of gasoline was made for the purpose of following it up with the reduction in order to produce a false psychological effect. Gasoline is still as high as it was during the most of the time for the last 12 months, while oil has ranged from $3.50 to $1, back to $2.25, and down to $1.25 again in the same period of time.

It is the policy of these monopolists to buy the crude as cheaply as possible and to sell it for all the public will pay, and that will continue to be their policy, and we need not, therefore, decline to make them pay a tariff to furnish much-needed revenue to the Government because of an unwarranted belief that this tax will be passed on to the consumer. The purchaser will be compelled to pay all that he can be forced to pay by the monopolists whether this tariff is added or not.

When my confinement in the hospital was over, I decided that it would not be wise to press my resolution while the oil monopoly was, from its goodness of heart, paying to the producer $2.25 per barrel, which the independent producer needed so badly to enable him to meet his obligations, pay his debts, and thus save his properties from the avaricious maw of the monopolists. In other words, I did not press it because I felt it was better to leave well enough alone until the independent operators had, by reason of the increased prices, an opportunity to relieve themselves from the embarrassment incident to the price of $1 per barrel which had so recently been in effect. However, during the interval the monopolists did succeed in purchasing the holdings of a great many independent operators at practically forced sales, and at a very small percentage of the value of such properties. While production has increased in the United States in the meantime, imports from Mexico

have also increased, and while imports from Mexico at that time amounted to 250,000 barrels per day, they now amount to about 400,000 barrels per day, and it is predicted that they will amount to 195,000,000 barrels this year as against 130,000,000 barrels in 1921.

I stated then that the Standard Oil companies, the Edward L. Doheny companies, and the Royal Dutch Shell companies had a monopoly upon the Mexican production and that the same three companies were seeking to obtain a monopoly of the production in the United States. They at that time owned about 50 per cent of the production in the United States. Since that time the Royal Dutch Shell Co., I am informed, has merged with the Union Oil Co. of Delaware, thus getting control of $75,000,000 worth of properties, besides the many smaller companies which it has acquired. Here I want to say that I have made every effort I can to confirm that. It is hard to get these people to tell you what they are doing. It is hard for the Government itself to ascertain what these people are doing, but I think I am right in making the statement that they have acquired that company. At least, negotiations were on and an attempt was made to acquire it.

It was also reported some time ago that the Royal Dutch Shell had taken a controlling interest in the Producers' and Refiners' Corporation, a $20,000,000 concern, with holdings in the mid-continent fields worth perhaps a hundred million dollars. I have not been able to ascertain the truthfulness of this report, except that I am sure it was under consideration, and that F. E. Kistler, the president of the corporation, went to London to conclude the sale. It is also well known that the Royal Dutch Shell Co. has acquired an interest in, if not control of, the E. W. Marland properties, with valuable holdings in the Osage Nation of Oklahoma worth many millions of dollars. The Edward L. Doheny companies and the Standard Oil group have acquired the Teapot Dome, in Wyoming, estimated to be the richest oil pool in the world, and other valuable holdings in California, and I am informed they have also made many smaller purchases. I understand that the Standard Oil Co. of Indiana has acquired 99 per cent of the stock of the Midwest Refining Co., which controls the output of the refined products of the Wyoming oil fields; and there are many other cases of this kind that I could go on and tell the Senate about that have taken place within the last 12 months, since I delivered my former speech almost a year ago. So that, to some extent at least, the prophecy I made at that time that these three large groups of producing and purchasing companies were seeking to get a monopoly of the oil production has been justified. The reason is clear. If these monopolists could corner practically all of the production in the United States, leaving themselves to pay only a one-eighth royalty to the landowners, they would then have it in their power to reduce the price to $1 per barrel, as they have done heretofore, thus reducing the amount of royalty they would have to pay, and justify their acts by the claim that it was made necessary by importations from Mexico, which importations they also have it in their power to make or not make as they see fit.

The people of the United States should wake up to the importance of this move to monopolize the oil industry. The lengths to which they will go to carry out their purpose are surprising. Since making my speech in August of last year, great pressure has been brought on me to desist in my efforts to curb the rapacity of these monopolists, and I have felt the effects of their efforts directed against my promotion in this body.

All this is perhaps somewhat beside the question, but it serves to show that it is futile for Members of the Senate to argue that the tariff which I desire to have imposed on crude oil and its products will affect the prices of those products to the consuming public. On the contrary, an exhibition tending to show that this Government is not controlled or influenced unduly by these monopolists would be refreshing to the public at large. The passage of this tariff bill would convince the people of this country that the Standard Oil Co. is not intrenched in Washington, as some of them now believe it is. Only a few days ago a friend of mine, a member of the Finance Committee of the Senate, asked me why the oil monopolists were not opposing this tariff. He said they did not appear before the Senate Finance Committee in opposition to the tariff, and that he had been told by the leading officials of one of the monopoly companies that they were not interested in the tariff and did not care whether it is passed or not.

This again shows how completely and shrewdly these people operate. Although I was ill at the time, I attended the hearings on the oil tariff before the Senate Finance Committee. It is true that the monopolists did not appear before the Senate Finance Committee and oppose this tariff, but there was a reason. For two years prior to that hearing these same monopolists had been insisting to the public by widespread propaganda that the reason for keeping up the price of gasoline at the same time that they were reducing the price of crude so drastically was that they could not sell the other products manufactured from crude; that they were having to store naphtha, kerosene, and other products, and especially residue fuel oil, and that gasoline was having to bear the entire expense of refining; and, therefore, they were justified in increasing the price of gasoline rather than reducing it in proportion to the reduction in the price of crude. To have appeared before the Finance Committee opposing this tariff, therefore, would have been embarrassing to them, because they knew that I was there to question them in this regard. They could not right about face and say to the committee that the importation of this Mexican oil, which is of a low grade and largely fit for fuel oil only, was necessary to supply the fuel market, when they had been preaching all this time that they had fuel oil stored which they could not sell and therefore must needs keep gasoline at a high price.

They, therefore, did the only thing which they could consistently do. They had consumers of fuel oil appear before the committee in the form of railroad companies, represented by one Mr. Thom, and various other users of fuel oil from various parts of the country, and oppose the imposition of this tariff and say that they were opposed to it because they could not get fuel oil from the refiners of this country for their use, and that if they did it would be sold to them at higher prices than those for which they could buy Mexican fuel oil.

I might add here that they also induced the American Automobile Association to oppose it. I may pay my respects to the American Automobile Association later if I have time.

I asked some of those consumers of fuel oil what they were paying for Mexican fuel oil and they said they were paying approximately $1.50 per barrel on the Gulf coast. This same oil is produced in Mexico at a cost of 11 cents per barrel, as I showed in my speech of August 23, 1921, which has been undisputed to this date. It is unloaded at the Gulf ports by these same people at a total cost of 53 cents per barrel, which covers both production costs and shipment charges to Gulf ports in the United States, and sold to the consumers at that place at $1.50 per barrel.

This shows what will happen if we surrender ourselves to the tender mercies of the monopolists, who not only produce this oil themselves but ship it in their own vessels, unload it in their own tanks on the Gulf coast, and deliver same to the consumer in their own pipe lines and tank vessels at a net profit to themselves of 97 cents per barrel, almost 200 per cent.

I am able to show that at the very same time that this fuel oil was being sold on the Gulf coast by these monopolists at $1.50 per barrel the independent refiners were offering for sale at St. Louis, Mo., residue fuel oil from their refineries at 27 cents per barrel, but could not compete with the Mexican importers because of freight rates effective between St. Louis and the points where same was to be consumed.

It is clear, by the activities of these monopolists outside the Finance Committee room in bringing consumers of Mexican oil here to testify, that they are not so disinterested in this tariff as they try to make it appear. However, if they are disinterested, as they claim they are, then I see no reason why the Senate should hesitate to impose this tariff, because I have shown conclusively that it would not affect the price to the consumer; on the other hand, it would add very materially to the revenues of the Government.

In fact, from the standpoint of revenue alone this tariff is justified. I have shown that this oil is being shipped to this country and sold at a profit of 97 cents per barrel. The imposition of this tariff at 35 cents per barrel would, therefore, simply reduce the profits which the importers make from 97 cents per barrel to 62 cents, which on an investment of 53 cents—the cost of producing and delivering to Gulf port points—it seems to me would be adequate profit to satisfy the avarice of any set of men. This tariff of 35 cents per barrel upon the 195,000,000 barrels of oil which will be shipped into this country from Mexico this year will produce a handsome revenue, amounting to more than $68,000,000. That would enable us to reduce the excess-profits tax that is levied on the people at home, and it would leave an adequate profit to the importers of this oil from Mexico, to whom this Government owes nothing; in fact, it would be nothing but right for these companies, who have been such an expense to this Government, resulting from the trouble they have caused the State Department by fomenting troubles

in Mexico, which has seriously impaired our general trade with Mexico and created a distrust of this country in the hearts of our neighbors which it will take years to eradicate. Why should they not pay a part of the expense of this Government the same as the independent producers do?

Mr. JONES of New Mexico. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from New Mexico?

Mr. HARRELD. I yield.

Mr. JONES of New Mexico. Has the Senator stated the domestic consumption and the American production of oil?

Mr. HARRELD. No; I have not. I introduced figures showing that in the RECORD a few days ago in the form of a letter I received from Gen. Willis J. Hulings. I will say to the Senator that the production of oil in the United States at the present time amounts to about a million and a half barrels per day. Importations from Mexico amount to about 450,000 barrels per day. If the Senator will read that letter, it will give him the information he desires. It was introduced in the RECORD last Saturday, and I had it inserted in the RECORD in order that I would not have to go into that to-day in this discussion.

Mr. JONES of New Mexico. The point I wanted to be informed about was whether or not any of the oil imported into the United States is exported or whether the consumption takes it all up, whether we refine it here and export it?

Mr. HARRELD. That letter will show the exports of refined products. We are exporting very little crude oil, and for the information of the Senator I will say that at the present time they are refining as much oil in Mexico as we were refining in the United States in 1906 in addition to what they ship here in the form of crude petroleum. The truth of it is that for the last year or two the monopolists of this country have been storing this high-grade oil and using the Mexican fuel oil, and the high-grade oil is now in tanks in this country in storage. There is a great deal of high-grade oil in this country stored by these oil monopolists. But I can not stop just now to give the figures on that. I have them here, but I can not carry them in my mind.

I repeat this tariff is justified as a tariff for revenue; it is justified as a tariff for protection of home industries, as I showed in my former argument; and it is justified because it protects the American oil-field laborers against the cheap labor of Mexico which is used in the production of the commodity which comes in competition with this same commodity at home, and I urge that it be imposed for that if for no other reason.

In that connection I want to call attention to an article which appeared in the newspapers a few days ago. To give an idea of what is paid to laborers in the oil fields of Mexico, I will read this. It is as follows:

DOHENY CUTS WAGES OF MEXICAN WORKERS.

TAMPICO, MEXICO, May 25.—The Huasteca Petroleum Co. (Doheny interests) on April 26 cut the wages of its 5,800 employees 12½ per cent. This leaves the unskilled peon with a daily wage of $3.28 Mexican money, or $1.68 in United States currency.

Tampico is a place of high prices. A bar of Ivory soap brings in American money 30 cents; a pint of milk in a lunch room, 35 cents. Rents are high, a single room in the better part of the city bringing $50.

* * * * * * *

Those fellows are producing oil in Mexico and paying their laborers $1.68 a day in United States currency, while like labor in the United States costs from $6 to $12 a day. If for no other reason, this tariff ought to be imposed to protect the hundreds of thousands of men who are engaged in the labor of producing oil in this country.

Mr. JONES of New Mexico. Can the Senator advise us as to the ratio of the labor cost to the value of the product produced?

Mr. HARRELD. The labor cost is a large element. I do not know that I can tell the Senator the percentage. It is perhaps the largest element in the cost. I do not know that I could tell just to what extent it enters, but if the Senator would go through the fields of the mid-continent and up through the fields of Pennsylvania and see the hundreds and thousands of oil men to-day who are out of jobs, he would think it was important in this country, in solving the labor problem and in solving the problem of unemployment, to have these companies running.

Mr. JONES of New Mexico. Most of those people are skilled laborers, however, are they not?

Mr. HARRELD. There are both skilled and unskilled.

Mr. JONES of New Mexico. The amount of so-called common labor, such as the Senator was then referring to as being employed in Mexico, is rather small when you are considering the wage question, is it not?

Mr. HARRELD. Most of the oil-field laborers are unskilled. I do not know the relative percentages, however.

If the Senate and the public generally want more evidence of what will be the result should this monopoly of production be gained by those seeking it, I would respectfully call their attention to the fact that in Wyoming, where the Standard Oil Co. owns and controls 80 per cent of the production, 42 gravity oil was recently selling at 50 cents per barrel.

So much for the arguments made and the testimony offered before the committee presided over by the Senator from Oregon [Mr. MCNARY] that the law of supply and demand governs the price of oil. At the time this was selling for 50 cents the same oil in the mid-continent was selling for $1.50.

From this oil the Government obtains a royalty of from 25 to 30 per cent, which, of course, would be five times as much as it is at the present time if this oil was selling for the normal price of $2.25 per barrel. By reducing this price they are thus materially reducing the income of the Government. This is another proof that they need no protection from this Government.

In order that the Senate and the public generally may know the ramifications of the monopoly ownership of oil properties, I desire to insert the following information, which was furnished me by the National Association of Independent Oil Producers, which I quote in part:

First. Quarterly tax reports of the State of Oklahoma, for the quarter ending June 30, 1921, disclose that there was reported as having been produced in the State of Oklahoma for that period the total of 26,617,879 barrels of oil, of which the following companies produced the following amounts:

Carter Oil Co. (Standard Oil group)	1,290,034
Prairie Oil & Gas (Standard Oil group)	1,327,181
Magnolia Petroleum (Standard Oil group)	1,231,288
Tidal Oil Co. (Standard Oil group)	497,722
Guffey-Gillispie (Standard Oil group)	234,342
Eddystone Oil Co. (Standard Oil group)	10,742
Atlantic Oil Products (Standard Oil group)	86,000
Mid-Kansas Oil Co. (Standard Oil group)	57,426
Wolverine Oil Co. (Standard Oil group)	402,681
Wolverine et al. (Standard Oil group)	19,360
Texas Co. (Transportation group)	1,158,416
Gypsy Oil Co. (Gulf Pipe Line Co.)	862,795
Gypsy Oil Co. (Gulf Pipe Line Co.)	118,085
Roxana Petroleum Co. (Shell-Dutch Co.)	816,238
Amerada Petroleum Co. (Shell-Dutch Co.)	471,675
Sinclair Oil & Gas	647,976
Exchange Oil Co. (Sinclair companies)	336,375
	9,568,336

In order that the Senate may fully understand the relation of the above-named companies, I give the following information concerning their relationship. I again quote from statements furnished me by the National Association of Independent Oil Producers:

Carter Oil Co. is owned by the Standard Oil Co. of New Jersey; Prairie Oil & Gas Co. is a producing and purchasing company under the same management as the Prairie Pipe Line Co. and is owned by the same stockholders as the Standard Oil Co. of New Jersey. Approximately 80 per cent or more of the Magnolia Petroleum Co. is owned by the Standard Oil Co. of New York. The controlling interest in the Guffey-Gillispie Oil Co. is owned by the Tidal Oil Co. and 32 per cent of the stock of the Tidal Oil Co. is owned by the Standard Oil Co. of New Jersey. Atlantic Oil Producing Co. is a subsidiary of the Atlantic Refining Co., which is another member of the Common Ownership Trust, commonly referred to as the Standard Oil Co. Mid-Kansas Oil & Gas Co. is a subsidiary of the Ohio Oil Co. The Wolverine is a subsidiary of the Union Oil Co., of Delaware, the stockholders of which are largely composed of the stockholders of the Standard Oil Co. The Texas Co. is a producing company owning pipe lines which extend from Oklahoma and north Texas points to the seaboard. As to who the stockholders of the Texas Co. are and in what other companies they are interested, I am not familiar. The Gypsy Oil Co. is a subsidiary of the Gulf Oil Corporation, and the Gulf Oil also has pipe lines extending from Kansas, Oklahoma, north Texas, and Louisiana points to the seaboard. As to what, if any, relation it is to the Standard Oil Co. I am not familiar. Both the Roxana and the Amerada are subsidiaries or allied with the Shell-Dutch Co., which is a 54 per cent British-controlled company. Sinclair Oil & Gas Co. operates pipe lines from north Texas and Oklahoma points to Whiting, Ind., near Chicago, the Standard Oil Co. owning one-half, if not all, of the pipe-line companies standing in the name of this company. The Exchange Oil Co. is a subsidiary of the Sinclair Oil & Gas Co.

The tax reports for the amount of production for the State of Texas for the quarter ending June 30, 1921, disclose that there was produced in that State during that quarter 21,801,449 barrels of oil, and that of this total production the following companies produced the following amounts:

Humble Oil & Refining Co. (Standard Oil group)	3,465,691
Magnolia Petroleum Co. (Standard Oil group)	1,020,487
Mid-Kansas Oil Co. (Standard Oil group)	344,383
Atlantic Production Co. (Standard Oil group)	160,721
Prairie Oil & Gas Co. (Standard Oil group)	343,848
Galena Signal Oil Co. (Standard Oil group)	163,951
Gulf Production Co. (Gulf Pipe Line Co.)	2,472,822
Sinclair Oil & Gas Co. (Standard Oil group)	319,379
Texas Co. (Transportation group)	2,969,131
Total	11,260,413

The Gulf Production Co. is the producing branch of the Gulf Oil Corporation in Texas. The Humble Oil & Refining Co. is controlled by the Standard Oil Co. of New Jersey. The Magnolia is a subsidiary of the Standard Oil Co. of New York. Mid-Kansas Oil & Gas Co. is a subsidiary of the Ohio Oil & Gas Co. The Atlantic Production Co. is

a subsidiary of the Atlantic Refining Co. The Galena Oil Co., formerly one of the subsidiaries of the Standard Oil Co., is now a member of the common ownership trust.

This statement shows that for one quarter of 1921 there were twenty-six and a half million barrels of oil produced in Oklahoma, and of that the Standard Oil companies, whose names I give, produced nine and a half million. It also shows the interlocking stock ownership of the various Standard Oil companies which operate in Oklahoma. It also shows that the State of Texas for the same quarter, ending June 30, 1921, produced 21,800,000 barrels of oil, of which the Standard group produced 11,000,000. It sets out just what Standard Oil companies produced that 11,000,000, and shows how they interlocked with each other.

The total production for the State of Louisiana for the week ending September 6, according to the Oil Weekly, a well-known and authentic trade journal printed at Houston, Tex., was 63,820 barrels of oil per day, of which the following companies belonging to the monopolistic group produce as follows:

	Barrels.
Standard Oil Co	11,550
Ohio Oil Co. (Standard group)	5,800
Fortuna Oil Co. (Standard group)	1,250
Sinclair Oil Co. (Transportation group)	800
Gulf Refining Co. (Transportation group)	11,050
Texas Co. (Transportation group)	4,560
Total	35,100

These data disclose that the percentage of the entire oil output produced by the Standard Oil group is as follows:

	Per cent.
Oklahoma	35.9
Texas	51.2
Louisiana	56
Wyoming	80
California	40
All other States (estimated)	50

This estimate does not take into account the percentage of output controlled by the Royal Dutch Shell Co. or any of the other monopolists.

This same group of monopolists controls practically all of the Mexican output. Besides it owns practically all the pipe lines and controls the price to be paid to the independents for crude as well as the price to be paid by the consumers for gasoline and other by-products. It will be seen that they are already pretty well intrenched.

Right here I want to say that if you give me the pipe lines of this country I can control the price of crude and the price of its products, whether I own one single acre or barrel of production or not, and that is exactly what the monopolists of this country are doing.

This monopoly continues to grow stronger and the resistance to it continues to grow weaker, because it is not protected by laws of Congress calculated to foster and protect the independent oil industry. Unless some sort of protection is afforded independent oil producers within the next 10 years the entire industry will have passed into the hands of a few large corporations, held together by the common-stock ownership and with but one purpose—that purpose being to make the public pay all the traffic will bear for petroleum and its products.

No wonder the Federal Trade Commission, in its report printed in the CONGRESSIONAL RECORD on July 13, 1922, states:

> Price initiative to-day seems to be left generally to the Standard companies, and competition is apparently more directed to developing facilities for getting business than in seeking to obtain it by underselling.

In that connection I want to say that that kind of competition is not very good for the buying public. The only competition to-day in the selling of refined products of oil in this country is competition between the manager of one refinery and the manager of another, trying to get the most money they can for their companies, and that means that they want to get the highest price possible for their products, which is not very good competition for the public.

It is no wonder also that they recommend as follows:

> The commission is of the opinion that this situation can not be effectually remedied by existing laws and that adequate relief can only be secured through additional legislation. With a view of remedying the situation in Montana and throughout the United States the commission therefore reiterates a recommendation previously made to Congress, namely, "abolition, by legislation, of common-stock ownership in corporations which have been members of a combination dissolved under the Sherman law." The foregoing proposition is stated in a concise and general form in order to show more clearly the fundamental idea, but in actually framing legislation it would be necessary, of course, to express this idea with great care in order to prevent evasion of the intended prohibition. A suggested draft is appended to this report. The merit of this remedy is that it appears to offer the only prompt and effective means hitherto suggested of terminating monopolistic control in cases like that presented by the Standard Oil group.
>
> Respectfully,
>
> NELSON B. GASKILL, *Chairman.*
> VICTOR MURDOCK.
> HUSTON THOMPSON.

I desire also to call attention of the Senate to resolution adopted by the Venango County branch of the Pennsylvania Oil and Gas Men's Association at a meeting of that organization held on June 10, 1922, which shows that the Pennsylvania producers have awakened to the importance of this tariff on crude.

> *Resolved*, That the Venango County branch of the Pennsylvania Oil and Gas Men's Association heartily commends the action of Senator JOHN W. HARRELD, of Oklahoma, in introducing an amendment to the tariff bill removing crude oil from the free list and subjecting it to a tariff of 35 cents per barrel.
>
> We urge upon Pennsylvania's representatives in the United States Senate the importance of according their warmest support to Senator HARRELD's amendment.
>
> The oil producer in western Pennsylvania has been operating at a loss since February, 1921, and, with the enormous importations of crude oil now taking place, supplemented by the prospect of further heavy importations from South and Central America, no future possibility for the production of oil at a profit in this district exists until a duty is levied on imported oil.
>
> TARIFF PAID ON MACHINERY.
>
> The producer pays protective tariff rates on all his machinery and supplies, his labor and everything else he buys, even to the clothes upon his back, and he demands a tariff on imported crude oil as a matter of common justice.
>
> And, finally, the secretary is instructed to forward a copy of these resolutions to Senator JOHN W. HARRELD, of Oklahoma, a copy to Senator GEORGE WHARTON PEPPER, of Pennsylvania, and a copy to Senator PORTER J. MCCUMBER, of North Dakota, chairman of the Finance Committee of the United States Senate.

I call attention to the fact that this association states that the oil producer in western Pennsylvania has been operating at a loss since February, 1921, and that they charge this to the enormous importations of crude oil now being shipped into this country. At this meeting, Gen. Willis J. Hulings, of Oil City, Pa., addressed the association and his speech is so timely that I desire to read a part of it into this record. It is as follows:

> In this presence it is not worth while to discuss the protective tariff, as that policy is a settled conviction in the minds of a great majority of the American people and especially of Pennsylvania.
>
> As men who are deeply interested in the general welfare of the country, and perhaps with a particular slant which we may admit in favor of that great body of citizens engaged in the production of petroleum, of whom we are a part, we have a right to call upon Congress for a measure of that protection which is the settled policy of the country and is the chief boast of the party in power, and which is extended to every other great industry in the country.
>
> The need for protection is so obvious that I have every confidence that if the facts shall be shown to Congress a reasonable protective tariff will be levied on petroleum imports. Several months ago I made a study of the situation, which convinced me that the great importation of Mexican crude was disastrous to American producers. Since then the situation is becoming worse and worse.
>
> GIVES FIGURES ON PRODUCTION.
>
> To-day, according to the latest reports, the basic facts are about as follows:
>
> Production in the United States is 1,500,000 barrels daily. Importations from Mexico are 450,000 barrels daily, or a total of 1,950,000 barrels visible supply daily. Consumption and exports total 1,600,000 barrels daily, leaving an excess and surplus of 350,000 barrels daily. This is being piled up in tankage and during the last month the surplus has averaged 333,000 barrels daily, although the consumption increased 196,000 barrels in May.
>
> Such conditions surely spell lower prices in the mid-continent field, which will be reflected in the price of Pennsylvania crude even though it be greatly in demand on account of its superior quality.
>
> There are in the United States about 280,000 producing wells that average about 5.4 barrels daily. Of these there are 70,000 in Pennsylvania that average 0.4 of a barrel daily. Figures are not accessible showing the average cost of producing oil in the United States, but the cost is probably in the neighborhood of $2.50 a barrel. Of course, there are differences in cost, but $2.50 is probably the average cost in all the fields.
>
> Now, when you consider that nearly half a million barrels that do not cost over 25 cents per barrel to produce are being imported every day, the effect upon the American producer is apparent. The Mexican oil is produced largely by the Standard Oil Co. and its subsidiaries and by large independent concerns.
>
> GOVERNMENT NEEDS REVENUE.
>
> Every barrel produced in the United States has a heavy burden of Federal, State, and local taxation. The Mexican importations come in scot free. And coming in free its effect is to hammer down the price of our domestic crude below the cost of production.
>
> The Government needs revenues. It is betwixt the devil and the deep sea in its efforts to reduce taxes, which the administration has been so loudly promising, and at the same time to secure revenues to pay the expenses of government. The American producer is heavily taxed. Cheap Mexican crude invades our markets and compels ruinous competition.
>
> Now, what could be more sensible than a tariff which would require the concerns that are flooding the market with Mexican crude to make each barrel of imported Mexican oil contribute as much to the expenses of government as the Government imposes in taxes on each barrel of American oil? To say nothing at all about the policy of protecting the American producer against ruinous Mexican competition, it is just plain horse sense that the Mexican seeking a market

in the United States should contribute to the Government as much as the American producer pays in the shape of taxes.

As I have stated heretofore, I visited Washington several months ago on my own hook to advocate a tariff on petroleum imports. When I left I had the promise of the chairman of the Ways and Means Committee that the bill would include a tariff on oil and the bill was reported with a tariff of 35 cents per barrel. But Mr. MONDELL, the floor leader, who was very urgent to lay a tariff on hides to protect Wyoming cattle raisers against foreign hides, insisted that petroleum should come in free, and read a letter from President Harding opposing a tariff on petroleum on the ground that we should use Mexican oil and save our own oil for future generations with the idea, I suppose, that the present generations of American oil producers should live on snow balls until the Mexican supply should be exhausted.

REFERS TO "BIG FELLOWS."

The President's letter showed such misconceptions of the situation that one can not resist the suspicion that the big fellows that are importing this enormous flood of Mexican oil put one over on him.

Now, I am just Irish enough to suspect that the big fellows that are now negotiating with the Mexican Government respecting their operations in Mexico are using as a powerful argument with the Mexicans the idea that if their Government will do what the big fellows want there will be no tariff and Mexican oil can come in free. Perhaps I am all wrong about this, but I can conceive of no other reason why the President should go out of his way to urge Congress to put no tariff on petroleum, except that the great concerns interested in Mexican oil misrepresented the situation to the President and he, in his innocence, let big business work him.

And isn't it the most natural thing that the President should take such views when entirely surrounded by people who knew exactly what they wanted? And what they did not want was a tariff of 35 cents a barrel on the 450,000 barrels they are fetching into the country every day, because it would cost them $157,000 tariff every day, to be paid into the Treasury of the United States. But I firmly believe that if the producers had had a man in Congress to present the plain facts, petroleum would not have been put on the free list. The producers were asleep at the switch. They had nobody on the floor who could present the facts.

BILL BEFORE SENATE.

The bill is now before the Senate and the Senate committee has reported it with petroleum on the free list, having simply followed the House bill.

The Government needs revenues. Thirty-five cents a barrel on present imports would amount to more than $57,000,000 a year, and I believe that if producers will make a concerted effort to impress the plain facts on the Senate the amendment for 35 cents duty now proposed in the Senate will be adopted by both Houses.

Mr. HEFLIN. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Alabama?

Mr. HARRELD. Yes; for a question.

Mr. HEFLIN. The Senator is aware of the fact that to impose a tax on oil imported would raise the price of illuminating gas to every consumer in the country and the price of gasoline to every farmer who uses an auto truck and to everybody who uses an automobile in the country, is he not?

Mr. HARRELD. On the contrary, if the Senator had been following my argument he would know that I have tried to make it clear that the people who have a monopoly of the refined product are absolutely making the market to-day pay every dollar it will bear, and that they could not make it any higher because if they did the American people would go on a strike and not buy.

Mr. HEFLIN. Does the Senator take the position that by shutting out foreign oil, which does now make some competition in the market at home, it would reduce the price?

Mr. HARRELD. It does not shut it out.

Mr. HEFLIN. And make it easier for them to have a monopoly at home?

Mr. HARRELD. But it does not shut it out at all. It lets it come in, and it makes them pay a revenue to the Government, which needs it badly. So why not collect the revenue when it will not, as I argue, increase the price to the general public?

Mr. HEFLIN. Did the Senator say a moment ago that we export a great deal of this oil?

Mr. HARRELD. Yes; we are exporting the refined oil.

Mr. HEFLIN. Does the Senator know how much we exported up to June 30, 1921?

Mr. HARRELD. I have the figures here, but do not carry them in my mind.

Mr. HEFLIN. It was 3,035,000,000 gallons.

Mr. HARRELD. Most of that, however, was Mexican oil, and the toppings were shipped to Europe, leaving the fuel oil on our market.

Mr. HEFLIN. And the Senator thinks, when we can export and sell in competition with oil on the foreign market to the extent of 3,035,000,000 gallons, that we need protection against the oil that is being imported?

Mr. HARRELD. I call the Senator's attention to the fact that the oil production of this country to-day is very largely in excess of the consumption. Outside of the oil that is being shipped into this country from Mexico, the production in this country is very largely in excess of the consumption. If there was no oil being shipped into this country from Mexico, we would still have to export oil.

Mr. HEFLIN. If that statement is true, it is the strongest argument the Senator has made against the proposition, because if that is true it shows that we are going on to exhaust our oil supply. Why not conserve some of our oil supply as we are trying to conserve our forests and other natural resources?

Mr. HARRELD. Last year there was exported out of this country $450,000,000 worth of oil. I wish now to answer the question just propounded. Will the Senator state it again?

Mr. HEFLIN. I ask the Senator if he does not think that we should conserve our oil supply at home instead of shutting out some of the oil that our people are using in order that we may have these great reservoirs of oil in some emergency at some time in the future? Does the Senator think the Government should employ the short-sighted policy of permitting men who want to get rich quick to drain all of these reservoirs in the United States?

Mr. HARRELD. I think that the policy I am recommending would conserve the oil.

Mr. HEFLIN. By having it consumed more rapidly?

Mr. HARRELD. It would conserve the oil, because it would establish these 71,000 men in Pennsylvania, who, as I have shown, are losing money with their small wells for the last 12 months. They would be protected and permitted to produce oil under the policy that I am recommending. The policy I recommend is protecting the oil, but the policy of not protecting the oil is the thing that is destroying production in this country. The small wells can not live and they are going out of business. The wells are being shut down. They are letting them dry up, wells that would be producing thousands of barrels of oil if it were not for that fact.

Mr. HEFLIN. Would it not be better to let some of them go out of business rather than tax the whole mass of consumers in this country by the pending bill?

Mr. HARRELD. Then the Senator gets back to the same point.

I think I have shown that the selling of these products on the market for all the market will bear precludes the possibility of this tariff being passed on to the consumer.

Mr. HEFLIN. The Commerce Department has just notified me that we exported 2,800,000,000 gallons of oil up to June 30 of this year. In the face of that the Senator asks the Senate to vote a tax against imports of oil, when he stated in the outset of his speech that he is a large holder in the oil business himself and advocating a tax upon the American people that will put money into his own pockets.

Mr. HARRELD. Mr. President, I did not yield for the Senator to make a speech. I only yielded for a question.

The PRESIDENT pro tempore. The Senator must protect himself in that regard.

Mr. HARRELD. I will say to the Senator that we would to-day be exporting just as much of this oil if we had the tariff as we are exporting now, because the Mexican oil men would still continue to ship the same amount of oil into this country that they are. I would not stop one single barrel of oil from being shipped into the country.

Mr. HEFLIN. Did not the Senator——

The PRESIDENT pro tempore. The Senator from Alabama is out of order. Does the Senator from Oklahoma yield to the Senator from Alabama?

Mr. HARRELD. I shall have to go on. I have not time to yield further.

Mr. HEFLIN. Did not the Senator state that he owned oil stock——

The PRESIDENT pro tempore. The Senator from Alabama is out of order.

Mr. HARRELD. I insist I am arguing for a policy which will protect the American consumer, which is of more interest than my private affairs.

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Alabama?

Mr. HARRELD. If the Senator will ask a question I yield.

Mr. HEFLIN. I want to ask the Senator if he is not interested in the oil business and would not profit by this tax?

Mr. HARRELD. My profit by this tax would be insignificant. Compared with the profits that the public generally would have and would receive, my profit would be absolutely insignificant.

Mr. HEFLIN. Does the Senator think that he ought to vote——

The PRESIDENT pro tempore. The Senator from Alabama is out of order. Does the Senator from Oklahoma yield to the Senator from Alabama?

Mr. HARRELD. I do not yield. I did not yield for that purpose.

The PRESIDENT pro tempore. The Senator from Oklahoma declines to yield. The Chair desires to observe that, literally speaking, the time of the Senator from Oklahoma has expired. But inasmuch as the Senate consumed 15 minutes in securing a quorum this morning, the time of the Senator will now expire at 11.15.

Mr. HARRELD. I think I can conclude in that time.

Recently the propaganda has again been going the rounds to the effect that salt water was destroying the production in Mexico. This bugaboo has been held up intermittently for the last two years. No further proof of the falsity of this statement is needed than the figures given herein, which show that steadily during the last two years Mexican production has been increasing and likewise importations into this country have been increasing. Whenever there is any talk derogatory of the manipulations of the monopolists, or any talk of the passage of this tariff schedule, they bring from cold storage this false information to hoodwink the American public as to their real intention. In fact, this propaganda has two purposes. It is promulgated for the purpose of defeating this movement for a tariff and to keep the people in ignorance of their real intentions regarding the Mexican production and importation, but it is also promulgated for the purpose of stock manipulations on the New York Curb.

Recently Mexican oil stocks have been so manipulated on the New York Curb as to make millions for certain individuals. Not content with making 200 per cent profits on their crude oil production; not content with their contemptible methods, which to a large extent have destroyed the independent oil producers of the United States, these monopolists must needs manipulate the stock market so as to make millions for themselves and their friends. This manipulation of the stock market has been going on for more than a year, and I desire to read an account thereof from a certain newspaper for the purpose of shedding light upon the intentions and conscienceless methods used by these monopolists. Perhaps Senators and the public generally will not be willing to trust the fate of the oil industry in the hands of these monopolists when they get a true vision of their rapacity.

[Clipping from Boston Herald, September 22, 1921.]

MEXICAN PETROLEUM BUT FOOTBALL OF GAMBLERS.

What is the mattter with Mexican Petroleum?

Last January it was 167½. August 25, it was 84½. A week ago it was 119½. Yesterday it was 98⅝.

The trouble with Mexican Petroleum is, it is now nothing but the football of stock gamblers. False statements are put out regarding it, and it is broken down in the market. Other statements, whether equally false one can not tell, are put out in regard to it, and the stock is run up. It is run up and down in the market so rapidly and so frequently, that now the "street" has no confidence in the stock, and has no confidence in the statements which are put out regarding it, whether good or bad, nor in the men who put them out.

Mexican Petroleum has come to be a disturbing element in the whole stock market. It is a time when confidence in securities is justified, and when it should be fostered, for the whole country is suffering to-day from an evil, common in every period of depression, a lack of confidence in everything. Such gyrations as those taking place in Mexican Petroleum break confidence in values, for they show how small a part real values may play in the movement of stock prices. It keeps the whole market stirred up.

It is about time for the committee on business conduct of the New York Stock Exchange to investigate the transactions in Mexican Petroleum. It would not be the first time that committee has taken action in regard to a stock which is obviously being artificially manipulated, nor would it be the first time for Mexican Petroleum and the gang operating its market movements to be under fire.

In the autumn of 1918 Mexican Petroleum was so flagrantly manipulated that the stock exchange authorities investigated it. The stock had been run up from 116 on October 8 to 192 on October 18.

Secretary Ely, of the stock exchange, on instructions from the committee on business conduct, asked members to report details regarding all the transactions they had in Mexican Petroleum. Nothing, however, apparently came of it.

If the stock exchange authorities instead of glossing over some of these manipulations would forget the possible loss in commissions, as a result of their action, and throw the stocks off the board, it would have a quieting effect on some of the gamblers who by their tactics are responsible for giving the uninitiated throughout the country an idea that the stock exchange is nothing but a glorified roulette wheel.

While this quotation is several months old, only recently another stock manipulation was had in Mexican Petroleum stock on the New York curb by which one man was reported to have made $3,000,000. The bears first get in their work by talking of salt water in Mexico, only to be followed up by a bullish movement incident to reports of immense new wells being brought in. The truth lies somewhere between the statements of the two extremes, but the fact remains that the importation of Mexican oil still remains a menace to the production of oil in this country by the independent operators, and it will be a sorry day when the independent oil operators, with their ability to stabilize prices in crude oil and its properties, are put out of business by such tactics on the part of the monopolists.

Further answering the Senator from Alabama, the Mexican oil imported into this country, instead of stabilizing these things, makes them more speculative.

Mr. President, within the last 60 days crude oil has undergone three distinct cuts of 25 cents per barrel, thus bringing the price down to $1.25, and I am informed that other cuts are contemplated. This is a reduction of 37½ per cent on crude petroleum. During the last few months gasoline has been raised 3½ cents per gallon and then reduced 4 cents per gallon, making a net reduction of one-half cent per gallon, or about 2 per cent. Thus, while crude oil has decreased in price 37½ per cent, the gasoline price has decreased 2 per cent. During this same period the Standard Oil Co. has raised the price of bunker fuel to the Government 25 cents per barrel, almost simultaneously with a cut of 50 cents per barrel on crude.

Since making these figures I have learned that they are inaccurate; that the gasoline prices have been raised 4½ cents and reduced 4 cents, and the gasoline is now one-half cent higher than it has been covering most all of the last year.

In this connection, I read an excerpt from an article appearing in the Tulsa World of July 24, 1922, written by W. H. Gray, president of the National Association of Independent Oil Producers, which reads as follows:

Will they lower the price of gasoline right in the midst of a shortage looming up? No; they won't do that. What was done was really this: Having decided to cut the price of crude 50 cents, the marketing companies were instructed a few days before the cut to mark up the price of gasoline from 1 to 2 cents, and then, as soon as the price of crude was cut, to mark it back down again, and this is what was done.

Take, for instance, the Standard of Indiana. It marked up the tank-wagon price 1 cent on June 27; the crude price was cut on July 15, and the tank-wagon price was moved back to 2 cents on the 19th; however, the tank-wagon price had already been raised 2½ cents per gallon since the price of crude had been changed.

Thus it will be seen that the Chicago tank-wagon price is still 1½ cents higher than it was when the price of crude was put up to $2.

In eastern territory the same tactics have been followed regarding the price of gasoline, with even less concessions to the public and more camouflage—camouflage at the expense of the producer.

Bear in mind, gasoline has been cut 2 cents more since this interview was published; thus gasoline has had an actual reduction of one-half of 1 cent to date.

In conclusion, Mr. President, I was never more earnest in my life than I am when I state that this tariff is absolutely necessary for the welfare of the independent oil producers of the United States. I am certain that the welfare of the independent operators in the United States is absolutely necessary to the stabilizing of oil and its products. There is no other way by which a stabilized price can be obtained except to take such measures as will enable the independent operator and independent refiner to live and to continue to produce oil and refine it into gasoline. Something must be done to protect us from the gradual monopolizing of the oil business by a few companies, and the first step in that direction, in my judgment, is the passage of this tariff amendment, imposing a tariff of 35 cents per barrel on crude petroleum imported into this country and 25 cents per barrel upon fuel oil imported into this country.

I wish I had the time to talk about all the hue and cry that has been raised that this will interfere with furnishing a supply of oil to our Government ships and to our people. Our Government ships can buy the Mexican crude in Mexico and pay the duty, so what difference does it make? The duty would go into the Public Treasury. It would make no difference at all in the cost of the oil that is used in our Government ships.

There is much more that can be said. I have not the time to say more except to make the prediction that if this protection is not afforded to the independent producers and refiners at this time that it will only be a matter of a few years until we feel the iron heel of the monopolist even more strongly than we feel it to-day.

Mr. President, I see that my time has expired.

The PRESIDENT pro tempore. The time of the Senator from Oklahoma has expired.

Mr. HARRELD. I ask for the yeas and nays on my amendment.

Mr. HEFLIN. Mr. President, I ask for recognition.

The PRESIDENT pro tempore. One moment. The pending question is upon the amendment offered by the Senator from Washington [Mr. JONES]. The Chair recognizes the Senator from Alabama. It is understood, however, that the debate is confined to the pending question, which, the Chair repeats, is the amendment offered by the Senator from Washington.

Mr. HEFLIN. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Alabama will state it.

Mr. HEFLIN. The Senator from Oklahoma [Mr. HARRELD] has advocated the imposition of a tariff upon oils that are imported into our country. I raise the question that the Senator from Oklahoma himself is financially interested in that proposition. I wish to reply to his speech before the Senate votes upon the question, and challenge his right to vote upon it.

The PRESIDENT pro tempore. The Senator from Alabama will have an opportunity to speak upon the amendment which the Senator from Oklahoma will propose whenever it shall be before the Senate. It is not before the Senate at this time, however.

Mr. HEFLIN. And the Chair holds that I can not now discuss this question?

The PRESIDENT pro tempore. The Chair so holds, under the unanimous-consent agreement.

Mr. HARRELD. I think I offered the amendment which I have sent to the desk this morning the beginning of last week and that it is pending.

The PRESIDENT pro tempore. The Senator from Oklahoma presented the amendment to be read, but, without unanimous consent, it can not be voted upon at this time, in view of the fact that there is an amendment pending, which was offered by the Senator from Washington [Mr. JONES] last night.

Mr. HARRELD. I ask unanimous consent that my amendment may be disposed of at this time.

The PRESIDENT pro tempore. The Senator from Oklahoma asks unanimous consent that the amendment on which he has addressed the Senate be disposed of and voted on at this time. Is there objection?

Mr. JONES of Washington. Mr. President, my amendment is pending; no one knows how long the debate may take on the amendment which has been proposed by the Senator from Oklahoma; so I think that we ought to dispose of the pending amendment.

Mr. HARRELD. I withdraw my request.

The PRESIDENT pro tempore. The request is withdrawn. In order that there may be no misunderstanding, the Chair advises the Senate that, in its opinion, each Senator has a right to speak for 15 minutes upon any amendment on which he desires to speak which may be pending at any time.

Mr. JONES of Washington obtained the floor.

Mr. NICHOLSON. Will the Senator from Washington yield to me?

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from Colorado?

Mr. JONES of Washington. The Senator from Colorado, I understand, desires to offer some amendments and have them printed, and I yield to him for that purpose.

Mr. NICHOLSON. I merely desire to offer two amendments, one pertaining to graphite and the other pertaining to mica, which I desire to have printed and to offer later.

The PRESIDENT pro tempore. The amendments will be received, printed, and lie on the table.

The question is on the amendment offered by the Senator from Washington [Mr. JONES], which will be stated.

The READING CLERK. It is proposed to insert in the proper place in the bill a new section, as follows:

SEC. —. That when used in this section—

The term "Secretary" means the Secretary of Commerce;

The term "public corporation" means a State, a legal subdivision thereof or a municipality, or a lawfully authorized public agency of a State or municipality;

The term "applicant" means a public corporation applying for the right to establish, operate, and maintain a foreign-trade zone;

The term "grantee" means a public corporation to which the privilege of establishing, operating, and maintaining a foreign trade zone has been granted.

The term "zone" means a "foreign trade zone" as provided in this section.

The Secretary is hereby authorized, subject to the conditions and restrictions of this section and of the rules and regulations made thereunder, upon application as hereinafter provided, to grant to public corporations the privilege of establishing, operating, and maintaining foreign trade zones in or adjacent to ports of entry under the jurisdiction of the United States. Not more than one zone shall be authorized in or adjacent to any port of entry, except that when a port of entry is located within the confines of more than one State a zone may be authorized in each State in the territory comprised in such port of entry.

Foreign and domestic merchandise of every description, except such as is prohibited by law, may, without being subject to the customs laws of the United States, except as otherwise provided in this section, be brought into a zone and there stored, exhibited, broken up, repacked, assembled, distributed, sorted, refined, graded, cleaned, mixed with foreign or domestic merchandise, or otherwise manipulated, and be exported, and foreign merchandise may be sent into customs territory of the United States therefrom, in the original package or otherwise; but when foreign merchandise is so sent from a zone into customs territory of the United States it shall be subject to the laws and regulations of the United States affecting imported merchandise: *Provided*, That when the privilege shall be requested the collector of customs shall supervise the unlading of foreign merchandise in the zone, cause such merchandise or any portion thereof to be appraised, and the duties liquidated thereon. Thereafter it may be stored or manipulated under the supervision and regulations prescribed by the Secretary of the Treasury, and within two years after such unlading such merchandise, whether mixed with domestic merchandise or not, may be sent into customs territory upon the payment of such liquidated duties thereon.

The Secretary of the Treasury shall assign to the zone the necessary customs officers and guards to protect the revenue and to provide for the admission of foreign merchandise into customs territory.

Vessels entering or leaving a zone shall be subject to the operation of all of the laws of the United States, except as otherwise provided in this section, and vessels leaving a zone and arriving in customs territory of the United States shall be subject to such regulations to protect the revenue as may be prescribed by the Secretary of the Treasury.

Each application shall state in detail—

(1) The location and qualifications of the area in which it is proposed to establish a zone, showing (a) the land and water or land or water area or land area alone if the application is for its establishment in or adjacent to an interior port; (b) the means of segregation from customs territory; (c) the fitness of the area for a zone; and (d) the possibilities of expansion of the zone area;

(2) The facilities and appurtenances which it is proposed to provide and the preliminary plans and an estimate of the cost thereof, and the existing facilities and appurtenances which it is proposed to utilize;

(3) The time within which the applicant proposes to commence and complete the construction of the zone and facilities and appurtenances;

(4) The methods proposed to finance the undertaking;

(5) Such other information as the Secretary may require.

The Secretary may upon his own initiative or upon request permit the amendment of the application. Any expansion of the area of an established zone shall be made and approved in the same manner as an original application.

If the Secretary finds that the proposed plans and location are suitable for the accomplishment of the purpose of a foreign trade zone under this section, and that the facilities and appurtenances which it is proposed to provide are sufficient, he shall make the grant. If the Secretary refuses the grant, the applicant may appeal to a board consisting of the Secretary of Commerce, the Secretary of the Treasury, and the Secretary of War, whose decision shall be rendered within three months from the filing of such appeal and be final as to the grant of the application.

The Secretary shall prescribe such rules and regulations not inconsistent with the provisions of this section or the rules and regulations of the Secretary of the Treasury made hereunder and as may be necessary to carry out this section.

The Secretary shall cooperate with the State, subdivision, and municipality in which the zone is located in the exercise of their police, sanitary, and other powers in and in connection with the free zone. He shall also cooperate with the United States Customs Service, the Post Office Department, the Public Health Service, the Bureau of Immigration, and such other Federal agencies as have jurisdiction in ports of entry described in the seventh paragraph of this section.

For the purpose of facilitating the investigations of the Secretary and his works in the granting of the privilege, in the establishment, operation, and maintenance of a zone, the President may direct the executive departments and other establishments of the Government to cooperate with the Secretary, and for such purpose each of the several departments and establishments is authorized, upon direction of the President, to furnish to the Secretary such records, papers, and information in their possession as may be required by him, and temporarily to detail to the service of the Secretary such officers, experts, or engineers as may be necessary.

If the title to or right of user of any of the property to be included in a zone is in the United States, an agreement to use such property for zone purposes may be entered into between the grantee and the department or officer of the United States having control of the same, under such conditions approved by the Secretary and such department or officer, as may be agreed upon.

Each grantee shall provide and maintain in connection with the zone—

(a) Adequate slip, docks, wharves, warehouses, loading and unloading, and mooring facilities where the zone is adjacent to water; or, in the case of an inland zone, adequate loading, unloading, and warehouse facilities;

(b) Adequate transportation connections with the surrounding territory and with all parts of the United States, so arranged as to permit of proper guarding and inspection for the protection of the revenue;

(c) Adequate facilities for coal or other fuel and for light and power;

(d) Adequate water and sewer mains;

(e) Adequate quarters and facilities for the officers and employees of the United States, State, and municipality whose duties may require their presence within the zone;

(f) Adequate inclosures to segregate the zone from customs territory for protection of the revenue, together with suitable provisions for ingress and egress of persons, conveyances, vessels, and merchandise;

(g) Such other facilities as may be required by the Secretary of Commerce, the Secretary of War, and the Secretary of the Treasury, acting jointly.

The grantee may, with the approval of the Secretary of Commerce and the Secretary of the Treasury, and under reasonable and uniform regulations for like conditions and circumstances to be prescribed by them, permit private persons, firms, corporations, or associations to erect such buildings and other structures within the zone as will meet their particular requirements: *Provided*, That such permission shall not constitute a vested right as against the United States, nor interfere with the regulation of the grantee or the permittee by the United States, nor interfere with or complicate the revocation of the grant by the United States: *And provided further*, That in the event of the United States or the grantee desiring to acquire the property of the permittee no good will shall be considered as accruing from the privilege granted to the zone: *And provided further*, That such permits shall not be granted on terms that conflict with the public use of the zone as set forth in this section.

Each zone shall be operated as a public utility, and all rates and charges for all services or privileges within the zone shall be fair and reasonable, and the grantee shall afford to all who may apply for the use of the zone and its facilities and appurtenances uniform treatment under like conditions, subject to such treaties or commercial conventions as are now in force or may hereafter be made from time to time by the United States with foreign governments.

No person shall be allowed to reside within the zone except Federal, State, or municipal officers or agents whose resident presence is deemed necessary by the Secretary.

The Secretary shall prescribe rules and regulations regarding employees and other persons entering and leaving the zone. All rules and regulations concerning the protection of the revenue shall be approved by the Secretary of the Treasury.

The Secretary may at any time order the exclusion from the zone of any goods or process of treatment that in his judgment is detrimental to the public interest, health, or safety.

No retail trade shall be conducted within the zone except under permits issued by the grantee and approved by the Secretary. Such permittees shall sell no goods except such as are brought into the zone from customs territory.

The form and manner of keeping the accounts of each zone shall be prescribed by the Secretary.

Each grantee shall make to the Secretary annually, and at such other times as he may prescribe, reports containing a full statement of all the operations, receipts, and expenditures, and such other information as the Secretary may require.

The Secretary shall make a report to Congress on the first day of each regular session containing a summary of the operation and fiscal condition of each zone and transmit therewith copies of the annual report of each grantee.

The grant shall not be sold, conveyed, transferred, set over, or assigned.

In the event of repeated violations of any of the provisions of this section by the grantee, the Secretary of Commerce, the Secretary of War, and the Secretary of the Treasury, or a majority of them, may revoke the grant after four months' notice to the grantee and affording it an opportunity to be heard. The testimony taken before the Secretaries shall be reduced to writing and filed in the records of the Department of Commerce, together with the decision reached thereon.

In the conduct of any proceeding under this section for the revocation of a grant the Secretaries may compel the attendance of witnesses and the giving of testimony and the production of documentary evidence, and for such purpose may invoke the aid of the district courts of the United States.

An order under the provisions of this section revoking the grant issued by the Secretaries shall be final and conclusive, unless within 90 days after its service the grantee appeals to the circuit court of appeals for the circuit in which the zone is located by filing with the clerk of said court a written petition praying that the order of the Secretaries be set aside. The clerk of the court in which such a petition is filed shall immediately cause a copy thereof to be delivered to the Secretaries, and they shall forthwith prepare, certify, and file in the court a full and accurate transcript of the record in the proceedings held before them under this section, the charges, the evidence, and the order revoking the grant. The testimony and evidence taken or submitted before the Secretaries, duly certified and filed as a part of the record, shall be considered by the court as the evidence in the case.

On such appeal the court shall review the record of proceedings before the Secretaries and, if a decision of said Secretaries shall be supported by evidence, shall only make decision on errors of law.

That in case of a violation of this section or any regulation of the Secretary under this section by the grantee, any officer, agent, or employee thereof responsible for or permitting any such violation shall be subject to a fine of not more than $1,000. Each day during which a violation continues shall constitute a separate offense.

That if any provision of this section or the application of such provision to certain circumstances be held invalid, the remainder of the section and the application of such provisions to circumstances other than those as to which it is held invalid shall not be affected thereby.

That the right to alter, amend, or repeal this section is hereby reserved.

Mr. JONES of Washington. Mr. President, the amendment which I have offered, and which is pending, I consider a very important one. It relates to what is known as foreign trade zones. It is a proposition which has been pending, more or less, since 1895, but only during the last four or five years have the commercial and business organizations of the country taken a special interest in it. I ask the attention of Senators to a brief statement with reference to the amendment and the action which has heretofore been taken upon it.

The Finance Committee has had the subject under consideration, but it has not deemed it wise to report it favorably to the Senate. I do not wonder that they have not taken the time to consider the matter because they have had so many various things under consideration; but I wish to state that the amendment as now proposed is identical in form to a bill which is on the calendar, reported unanimously from the Commerce Committee of the Senate. So it is not a proposition that has not had consideration.

We had very extensive hearings upon this proposition in the Sixty-sixth Congress. Prior to those hearings a very elaborate report had been made by the Tariff Commission with reference to the matter and transmitted to the Commerce Committee of the Senate by a letter in the second session of the Sixty-fifth Congress.

The Tariff Commission recommends this legislation very strongly. It points out in its report the conditions in Europe and the conditions in this country and the advantages of this proposal and the disadvantages of the present system. I wish I had the time to read this part of their report.

Briefly, the proposition is to authorize the establishment of places at the various ports within which, under proper regulations and precautions to protect the Treasury of the United States, goods that are designed not for domestic consumption, but for transshipment, may be landed without the various restrictive regulations which now apply to such goods in the bonded warehouses; and then, when the time has come for transshipment to the place where they are intended to go, they may be taken out without further restriction.

In other words, if some one, for instance in Europe, desires to send 500 tons of goods to South America, and that is all he has to ship, and a vessel bound from Europe to New York can take on that 500 tons as a part of its cargo, it may do so, bring in the 500 tons of goods, and discharge them in the zone, where they may be kept until there is a ship ready to take them to South America as a part of its cargo. That, in brief, is the idea of the measure.

In the brief time that we have to consider this amendment it is difficult to pick out the arguments to present in favor of it out of so many which may be advanced. It will facilitate the assembling and the transshipment of commodities, which constitute a very large item in the world's commerce. It is estimated that such business amounts to about $4,000,000,000 a year. That is a tremendous sum. While it would seem from its situation and location that our country should do a great part of that assembling and redistribution and transshipment, it does a very little of it. We are midway between the Orient and Europe, and we ought to be the distributer of the products of the one to the other. On the contrary, much of the oriental products for this country come from European ports. The purpose of this measure is to encourage the United States to do its part of the world commerce. We believe that it can be done.

A great deal of our direct business heretofore has been done in a sort of triangular way; in other words, much of our produce in the years past destined for South America has left this country and gone to Europe and then gone to South America through transshipment in foreign ships. We want to avoid that; we not only want to avoid that, but we want to do much of the business from Europe to South America by making our ports one apex of the triangle. We want to encourage the shipment of goods to this country which are destined for South America and then transport them to South America. It would not only give us the business in this country but it would also furnish cargoes for our ships. One of the great difficulties we encounter in connection with maintaining our merchant marine is in securing cargoes on our ships bound for this country. There is no trouble about cargoes going out, but the difficulty is securing cargoes on the return voyage. In the opinion of experienced shipping men these foreign trade zones are essential to the successful operation of our merchant marine. Common sense and business principles lead to the same conclusion. Much of the transshipment business done by other nations furnishes incoming cargoes for their ships when it should furnish incoming as well as outgoing cargoes for our ships.

Mr. STERLING. Mr. President, will the Senator permit just one question?

The PRESIDENT pro tempore. Does the Senator from Washington yield to the Senator from South Dakota?

Mr. JONES of Washington. I will yield, although my time is very short.

Mr. STERLING. I merely desire to inquire whether the goods sent from foreign countries to this country intended for transshipment are subject to duty?

Mr. JONES of Washington. Such goods can come in and be placed in a bonded warehouse, but they have to pay the duty and then a rebate of 99 per cent is provided under the present law when the goods are reshipped. There are restrictions of all sorts thrown around such transactions. I should like to have the time to call attention to some of the restrictions to which we are subjected now; but if Senators will take the bill now pending and read the provisions relating to bonded warehouses, drawbacks, and so on, they will find the restrictions that are imposed upon business of that nature. Those provisions are all right for the purpose for which they are intended, but they do seriously affect the character of business which it is the object of the amendment offered by me to seek to encourage. The amendment which I propose will not in any way interfere with the proper administration of the restrictions in the law, but will be merely supplemental to them and care for a business not encouraged by the present provisions of the bill or of law. It will provide an easy way, without such restrictions, to handle the goods that are wholly intended for transshipment and redistribution.

I wish to say that when the foreign trade zone bill was being considered by the Commerce Committee and hearings were being held, it provided for carrying on manufacturing in the foreign trade zones. There was very strong opposition to that proposal; in fact, that is the principal opposition that developed to the bill, and the committee, desiring to avoid any really controversial matter, eliminated all provisions permitting the manufacturing, and the amendment which I have does not cover that. I have presented the amendment just as the Commerce Committee recommended the measure to the Senate.

Mr. SIMMONS. Mr. President, if the Senator has time, I should like to ask him a question; otherwise I will not ask it.

Mr. JONES of Washington. Of course, my time is very brief, but I will yield to the Senator.

Mr. SIMMONS. I was not present when the Senator began his remarks. Will he briefly tell, as concisely as he may, the things which are permitted to be done in the proposed free zone which may not be done now in a port of entry?

Mr. JONES of Washington. The main thing is not to provide for what can not now be done, but is to remove the restrictions under which goods intended for transshipment must be placed in bonded warehouses and comply with the drawback provisions as provided by law and in the pending bill. I tried at the outset to explain just what the method will be under the amendment.

The idea is simply this: If somebody in Europe wants to send 500 tons of goods to South America by way of New York, for instance, and he sends them there, when they arrive at New York, under present conditions they have to be dealt with according to bonded warehouse and drawback provisions. The Senator is well acquainted with those restrictions and the requirements. The Senator knows that a bond is required; that the goods can not be taken away from the ship until various things have been done. The idea is to relieve such shipments from all those restrictions and simply let the goods be landed at a zone where wharfage facilities must be provided by the locality, by the municipality, or by the corporation, not at the expense of the Government at all but at the expense of the corporation, and when ready transship them to their destination without restriction or delay. There are ample safeguards and provisions made so that when the goods are landed in the zone they can not get out into the United States without the payment of duty and complying fully with the import laws.

Mr. SIMMONS. I understand the Senator.

Mr. JONES of Washington. If it is desired to send the goods on to South America, all that it is necessary to do is to land them from the ship and put them on another ship when the opportunity offers. It does away with all of the various restrictions as to bond and all that sort of thing. That is the great advantage of it. That is the kind of encouragement by means of which ports in Europe have been built up. The great port of Hamburg—and the Tariff Commission describes the various facilities of the port of Hamburg—has been built up largely in that way. Of course, Hamburg is the great port of Germany, yet it will appear that the facilities which are supplied there for handling transshipment trade makes Hamburg the great distributing point almost of the world. Although to-day shipping is languishing, yet I have a clipping here which shows that ships are landing by the hundreds at Hamburg from all parts of the world. It is again taking its commanding position in the world's commerce and is doing a large part in rehabilitating the German merchant marine. Ships come there because they can come from all parts of the world and distribute their cargoes and take out cargoes to the various points of the world.

There is no reason why we should not have ports in this country to do those very things. It will not only encourage and develop our business and employ our labor, but it will be one of the greatest means of upbuilding and maintaining the merchant marine that we can provide for in this country. This proposition is urged by the commercial bodies all over the United States. Practically no opposition was presented to it in the hearings before the committee. I want to say to the Republicans that the main opposition to it was presented by some protectionists who believed that it would interfere with the protective system.

The Republican members of this committee met by themselves, because they considered this a proposition for Republicans, as we were interested in the protective principle, and considered it from that standpoint. The Republican members of the committee were unanimous in the conclusion that this proposition not only did not interfere with the policy of protection, but that it was in fact a strong aid and instrument or agency to carry out the policy of protection. The principle of it has been recognized in tariff bills in the past and is contained in the bill that is pending. This proposal is simply an expansion of the drawback system and the bonded-warehouse system. It provides a freer and better facility for the distribution of goods to the markets of the world. It facilitates commerce, and whatever does that is a good thing. The bonded-warehouse system and the drawback system are necessary for the protection of the domestic market, and we do not seek to interfere with it.

I want to say that this does not mean the entailment of any great expense upon the Government of the United States. Under this amendment these zones must be established, maintained, and operated by a State or a subdivision of a State, or by a municipality, or by a corporation authorized by the municipality or by the State, and the corporation must operate the zone as a public utility. Its charges must be just and reasonable and fair. All the expense of preparing wharves, docking facilities, and everything of that kind must be borne by the municipality. It may be that not many of them will be established. The expense will be considerable and, as I said awhile ago, our business in the transshipment business of the world is very small thus far, but there are ports that believe that they could establish these zones, maintain them in the proper way, develop this business, and take a great part in the world's transshipment business. We want to give them a chance to try it.

The PRESIDENT pro tempore. The time of the Senator from Washington has expired.

Mr. RANSDELL. Mr. President, the Senator from Washington [Mr. JONES] has covered this matter so fully that I do not know that I can add anything.

Some philosopher has said that one concrete illustration is better than a hundred generalizations; so I am going to present a very apt illustration by reading briefly from the report of the United States Tariff Commission made to the senior Senator from Florida [Mr. FLETCHER] as chairman of the Committee on Commerce on November 20, 1918, in which it speaks particularly of the great port of Hamburg, just alluded to by the Senator from Washington [Mr. JONES]. It is very brief, and I ask Senators to listen to it, because it shows exactly what the Germans have done in regard to a free zone in their great port and how successful it has been.

I read:

GROWTH OF THE FREE PORT AT HAMBURG.

"Of modern free ports, their management, character, and successful operation, Hamburg furnishes the best illustration. This city has always been dependent on its commerce, and as long as it was an independent Republic it arranged its customs regulations with a view to the least possible interference with trade compatible with fiscal requirements. The formation of the German Empire in 1871, with a tariff system common to all the component States and administered by the Imperial Government, threatened to destroy Hamburg's prosperity and to divert much of her commerce to the rival ports of England and Holland. The city, therefore, long refused to enter the imperial customs union. In 1882 a compromise was effected, by the terms of which Hamburg was permitted to maintain an area, accessible by both land and water, where goods from all parts of the world might be landed, handled, and reembarked without any interference whatsoever from customs officials. This area was to be a free port, and only when goods passed through its gates into the interior of the country were the duties levied under the German tariff to be collected on them. In addition to the privilege thus accorded, Hamburg received a cash payment of 40,000,000 marks, and the money was used by the municipal authorities to improve the site selected on the river bank and to construct facilities for the most efficient handling of a great commerce. They planned largely, anticipating rapid growth, but development so far outstripped their expectations that several times within a generation both space and equipment had to be greatly increased. Without doubt the growth was due in largest measure to the economic development of the German Empire, for which Hamburg serves as the chief port, and the direct trade between Germany and foreign countries is conducted, of course, under the ordinary customs regulations. But equally, without doubt, it was the creation of the free port that enabled the city to become an important center for the commerce between other nations and a great consignment market for products from almost all parts of the world. Unfortunately, official statistics make no distinction between German goods and foreign goods shipped from the port, but a careful estimate for the last year before the war puts at $200,000,000 the value of the foreign products exported. These figures illustrate only the importance of the transshipment trade; they give no indication of the advantage to German manufacturers of having at their door a convenient assembling place for the materials which they need nor of the degree to which the markets for German goods were extended through Hamburg's ability to receive and dispose of the products of other countries."

Mr. President and Senators, I might read in extenso from this report of the United States Tariff Commission, and also from resolutions of a great many boards and commercial bodies in this country. If anyone opposes this idea I have not heard from him. I know of no opposition to it. It does not conflict in the slightest degree with any of the facilities for commerce which now exist.

As the Senator from Washington explained, we have the drawback system, the bonded-warehouse system, and the bonded manufacturing warehouse system, under all three of which

goods may be brought in from foreign countries and handled in this country for reshipment abroad. A familiar case is that of sugar, shipped in immense quantities from Cuba and other foreign countries into the United States and refined. Of course, in that instance the full duty on the sugar is paid, and when it is refined the refiners receive from the Government a drawback of 99 per cent of the amount of duty which they paid when the sugar came in. To the same extent that is done in other cases, but it is a cumbersome, expensive, and troublesome matter.

This free zone has been well likened to the case of a ship which is wrecked, and temporarily the freight on that ship is landed on the shore. It was never intended for that freight to enter the commerce of this country. Who would think of charging any duties on the cargo of a stranded ship held temporarily for reshipment? Of course, it is guarded by customs officials to see it does not enter our commerce, and then is loaded on another ship and goes to its destination.

I am convinced, sirs, that the establishment of these free zones—perhaps two or three on the Atlantic, one on the Gulf, and one or more on the Pacific, just as many as our commerce needs—would be of immense advantage in building up our trade with foreign countries. It is not going to cost the Government a large sum of money, because all facilities for these zones must be provided by the local communities. If the great city of New York decides to establish a free zone, New York must pay for the warehouses, the docks, the wharves, the ground necessary for that purpose; and the only expense to the Government, as I understand, would be the necessary supervision to see that there was not an entry from that zone of commerce into this country without paying the regular customs duties.

Mr. President and Senators, this measure does not interfere with the customs regulations of our country. It does not interfere with the duties which are collected under Democratic tariffs or those collected under Republican tariffs. It is a clean-cut business proposition. It is not a political one in any sense of the word. It is a facility for commerce which ought to be provided, and I sincerely hope, sirs, that Congress is going to enact this measure.

In conclusion, I ask to have published in 8-point type, as part of my remarks, a very interesting extract from an argument made before the Commerce Committee, when we were holding hearings, by Mr. Arthur McGuirk, an eminent lawyer of New Orleans, special counsel for the board of commissioners of the port of New Orleans. He has been a great student of the subject, and covers it very fully and interestingly. I also ask that the extracts I have heretofore read from the report of the Tariff Commission may be printed in 8-point type.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to, from Mr. McGuirk, is as follows:

"A free zone is the necessary complement of a protective-tariff system; the higher the tariff the more essential. Without such facility no high-tariff country can successfully compete in world trade with foreign nations, because the terms are not equal and they are not fair. American merchants in foreign trade carry a handicap. That handicap results from the imposition of the customs system with its consequent expense and necessary delays to trade which does not enter but merely touches or is deposited in the country at different points. By so much as the American merchant pays the customs on goods intended for reexport and not for domestic consumption is he handicapped and discriminated against. As the goods can not enter the country without payment of duty the situation as to domestic producers and manufacturers will remain unchanged. They remain protected as before. The free zone as to them is extraterritorial; it is foreign country. The customs officers are simply transferred from the ship to the gates of the zone. The same customs duties are collected, only they are collected at a different place; dutiable goods taken from the zone into the country pay the duty just as before. The free zone or area is an inclosed district, free of customs restrictions, without resident population, equipped with wharves and warehouses where vessels may enter and leave, and where goods may be deposited and reexported either in their original state or changed by manufacture. In legal contemplation it is foreign country. It affords a stopping place for goods in transit. Freedom of transportation and manufacture afforded by transshipment or transit zones implies only exemption from charges other than such as are imposed by way of compensation for the use of the property employed or for facilities afforded for its use. Commerce may be carried on in the zone and commodities may be purchased, sold, exchanged, and manufactured therein. Anything may be done with the goods in the zone that could be done outside of it, only they can not be brought from the zone into the United States without paying the same duties or being subjected to the same regulations as in the customs part of the port. There would be no more reason to collect duties upon transit goods than upon goods in a ship stranded upon Cape Hatteras on a voyage from Halifax to Rio Janeiro. In that case the goods unloaded to trim the ship are deposited as the result of an involuntary act; in the zone as the result of a voluntary act, but in neither case would the policy of protection or the receipts of the customs be affected adversely or otherwise.

"The power to regulate commerce with foreign nations 'is the power to prescribe the rules by which it shall be governed—that is, the conditions upon which it shall be conducted—to determine when it shall be free and when subject to duties or other exactions.' Of course, it is within the power of Congress to so regulate foreign trade as practically to exclude it altogether from the borders of this country, or to impose a tax so heavy as to amount to the same thing; but that is not the policy of the law. On the contrary, the policy is, by the use of bonded warehouses, bonded manufacturing warehouses, and the drawback, to permit the deposit and manufacture of property in transit and not to tax it with customs duties so long as it does not become blended with the domestic business or commerce of the United States. The goods, like the ship, are only temporarily here while engaged in lawful foreign trade and commerce. The foreign ships themselves remaining in our ports only long enough to land passengers, mail, and freight, or to dock and repair, are not taxed. So far as respects the ports and harbors of the United States the foreign ships themselves may freely enter and clear exempt from domestic taxation, independently of any control over them except as respects the public health, public safety, and public morals, and the same rule should be extended to the transit freight which they carry.

"Goods in interstate commerce are not taxable by the States through which they pass in transit. The power to tax is the power to destroy. If goods in interstate commerce were subjected to taxation at every point they touched in their transit through the States, interstate commerce would be effectively destroyed. But this power has not been left to be exercised in the discretion of the several States. The Constitution, laws, and jurisprudence of the country wisely inhibit its exercise. If the principle is sound as to interstate commerce, it is equally sound as to foreign commerce. Goods in transit in foreign commerce should enjoy the same exemption and freedom as the ships which carry them. Both ships and freight are property, and there is no sound reason to discriminate between the two classes of property or to lay a burden upon one which is not laid upon the other.

"The policy of this country has not been unfavorable to the freight. It is more favorable, however, to the ships that carry it. Much of the freight belongs to American citizens. Few of the ships did. They were foreign owned. Yet the discrimination has been in favor of foreign-owned ships and against domestic-owned freight. Obviously, it has been the intention of this Government to relieve reexport trade from the expense and restrictions incident to the administration of the tariff and customs laws; but that relief has been superficial. It did not reach the source of the complaint. The diagnosis was correct, but the remedy was not a specific. The drawback, by which, theoretically, the exporter draws back 99 per cent of the duties paid is very much more costly in practice, and the merchant has often been subjected to an expense of from 30 to 50 per cent of the amount of the duties in order to obtain the return of the money advanced in said duties. He has been out of pocket the interest on the money for months at a time because of the incidental delays in the administration of the system; and he has run the risk of heavy fines, consequent upon his unfamiliarity with the routine of the system and his failure or neglect to conform to some of the multiplicity of rules established to protect the revenue and prevent smuggling. The bonded warehouse is good as far as it goes; so is the bonded manufacturing warehouse. A mere glance at the regulations governing the bonded warehouse sufficiently indicates its limited usefulness so far as export trade is concerned. Even more stringent are those applying to the manufacturing bonded warehouse. With few exceptions the output can not be disposed of in the domestic market, even upon payment of duty. In the bonded warehouse handling, sorting, mixing, or repacking of the goods is prohibited. Only where serious damage is threatened can the original package be opened, and then it must be done under customs supervision and by special permission. Once the package is on the floor of a certain place it must remain there undisturbed, in accordance with certain

well-defined regulations, and except during business hours the warehouse is closed by a Government lock, and to enter it at any other time requires special permission and payment for the overtime presence of a customs agent. From the time the goods enter port until they are reshipped they are under constant customs control and supervision. No step may be taken without the presence of the officials, and the delay and annoyance caused by necessary certificates, documents, oaths, inspections, and the operation of the system generally have been so great as to discourage and finally deter the average merchant from engaging in the reexport, transit, or foreign trade.

"These conditions can not continue to exist. The sooner they are changed the better. As the change involves no change of principle, but merely one of procedure, practice, and system, the sooner it is brought about, as it certainly must and will be, the better for all concerned. We must take a leading and not a secondary place in foreign trade. Our necessities demand it. Our merchant marine and changed postwar conditions must inevitably bring it about.

"Considering the question in another aspect:

"Free or transshipment zones provide neutral, inclosed, and guarded areas, devoted to foreign trade, without resident population, which are physically within but legally without customs territory. Goods, wares, and merchandise may be deposited therein for reexport either in their original form or as changed by manufacture or manipulation with foreign or domestic materials. Free ports being, in effect, foreign territory, ships arriving and goods sent therefrom into the customs territory of the United States are subject to the customs system and pay the same duties as if imported from a foreign country. The economic value of such utilities in the foreign trade and commerce of the United States has not been, as yet, legislatively perceived. Their powerful stimulus to port development visibly appears in foreign harbors enjoying such benefits. The establishment of free zones in the United States is the logical evolution of the drawback, bonded warehouses, and bonded manufacturing warehouse system. The new forward step proposed and now earnestly advocated is in no sense antagonistic to or exclusive of the old system, which will still continue to thrive and grow in the customs part of the port. That is the sphere of usefulness of the drawback, the bonded warehouse, and the bonded manufacturing warehouse comprising the old system. Both systems will continue to exist independently but complementarily of each other, be mutually helpful, and thrive because of the greater volume of trade created by the free zone.

"The freedom alluded to in connection with free zones does not, of course, imply exemption from charges for services rendered the ship or the goods. The customary tariff of port charges will still be collected by local officials in the zone as elsewhere. The repair, furnishing, and equipment of ships; the manufacture, manipulation, and storage of goods will give steady and remunerative employment to labor and capital, and, what is more, our ocean gateways will be transformed from one to two way ports, busy the year round.

"The United States is a protected zone. The country is covered by a protective tariff system imperfectly balanced by a system of drawbacks, bonded warehouses, and bonded manufacturing warehouses, so as to afford some limited scope to foreign commerce. Without some such device Congress would not have regulated but would have prohibited and wholly crushed foreign commerce. Commerce is of two kinds—foreign and domestic. The framers of the Constitution contemplated our engaging freely in both under sensible regulations, but example as well as precept in government demands the use of modern and up-to-date facilities in commerce and transportation. The free zone is a well-recognized institution in world commerce. It has passed the experimental stage. It is the necessary adjunct of the protected zone; but it does not exist in the United States. If the tariff is a protective as well as a revenue system, if its object is to protect domestic trade and commerce, so will a free-zone system be a protective system, protecting by encouraging, safeguarding, and promoting foreign trade and commerce. Combined, they will form a harmonious, logical, well-balanced commercial system for the development of both foreign and domestic commerce.

"The prophet has said, 'There is nothing new under the sun,' and yet history teaches us that even the most ambitious, intelligent, and aggressive peoples are often blind to their own real interests. Apotheosizing mediocrity for its own sake or following false prophets, their sea power has been the result of accident rather than of design and has been developed always in the teeth of the most active and determined opposition. This is a truth of almost universal application. The authorities teach us of the growth of the Phœnician, Carthaginian, and Roman sea power and of that of Spain, France, Holland, England, Germany, Italy, and Japan. We know our countrymen are equally at home upon land and sea; that they are as expert and daring navigators and seamen as they are brave, intelligent, and chivalrous soldiers. We are told that Rome's domain was confined to Italy until she copied the Carthaginian trireme. Says Mr. Hughes in his Handbook of Admiralty Law, speaking of the rise of Roman sea power:

"'When maritime skill supplemented military prowess and placed at her command new and easier lines of advance, she overran the world. The mart soon replaced the camp; for it is a teaching of history that in the providence of God the havoc of war but opens new avenues for the arts of peace.'

"And so it is with the United States, at the end of the Great War, with hundreds of ships, manned by youthful, eager, and vigorous mariners, full of the spirit of adventure, and anxious to compete in world trade. 'We have the men, we have the ships, we have the money, too.' It therefore becomes our manifest duty to quickly provide the facilities without which the operation of the ships and the employment of our sailors in foreign commerce will be practically impossible. Under such circumstances it would be a public disgrace to revert to pre-war conditions when 90 per cent of our foreign commerce was carried in foreign bottoms. Our merchant marine must be preserved. Our future safety depends upon it. The control of the transportation of a country means the political control of that country. Neither our land carriers nor our sea carriers should be foreign owned. It is as essential to control our sea lanes as it is to control our public highways. Both are vital to national sovereignty."

Mr. WADSWORTH. Mr. President, I hope Senators will endeavor to visualize the commerce at a great port, and, as they do so, realize the extent of the regulations and restrictions which by one measure or another of a legislative character we have imposed upon commerce not only at our great ports but upon practically all commerce and all the transactions of business. If there is one thing that is to-day a nuisance to people who try to do business, it is governmental interference. With regulations and inspections and investigations imposed by one, two, three, or four governmental agencies at the same time and at the same place, it is about all that a man can do to carry on a business and preserve his temper.

I am glad to support this amendment, because in one respect at least it withdraws from a perfectly legitimate business a portion at least of governmental interference and regulation. The amendment will, I believe, facilitate commerce, and anything that will facilitate commerce without doing injury to the people engaged in the industries of the United States I am for.

This is not an experiment. It is not new. It is not strange. There is nothing mysterious about it. It has been tried abroad in countries whose Governments, I may say, in some instances are just as devoted to the protection of their industries and the living standards of their people as we are. It has been found to work to the great advantage of commerce generally.

I call the attention of Senators who may be interested in this to the paragraph on the bottom of page 2, which, as much as any other in the amendment, indicates what might be done in the way of facilitating commerce. It will take only a moment, and I am going to read it. It commences on line 14 and reads as follows:

> Foreign and domestic merchandise of every description, except such as is prohibited by law, may, without being subject to the customs laws of the United States, except as otherwise provided in this section, be brought into a zone and there stored, exhibited, broken up, repacked, assembled, distributed, sorted, refined, graded, cleaned, mixed with foreign or domestic merchandise or otherwise manipulated, and be exported, and foreign merchandise may be sent into customs territory of the United States therefrom, in the original package or otherwise; but when foreign merchandise is so sent from a zone into customs territory of the United States it shall be subject to the laws and regulations of the United States affecting imported merchandise.

Further on it provides:

> The Secretary of the Treasury shall assign to the zone the necessary customs officers and guards to protect the revenue and to provide for the admission of foreign merchandise into customs territory.

Of course, in accordance with the laws of the United States.

Once more, I hope Senators can visualize what this may mean. It means not only that a zone so erected may be used as a storage point from which the goods, without change in packages or grading, may be reshipped out of the United States, but it also means that such a zone can be used, as it were, as an international commercial market place where people can come and see the goods which have been allowed entry into this foreign trade zone, purchase them if they so desire, ship them out of the country, or bring them into the United States, or combine them with goods of domestic production and ship the combination of goods out of the United States or bring them

into the United States, always in accordance with the customs laws of the United States.

To-day, as the Senator from Washington and the Senator from Louisiana have indicated, such a thing is practically impossible. To-day goods which come from abroad—and, of course, goods will always come from abroad in great quantities—before they can be exhibited to the discriminating judgment or gaze of American purchasers, before any calculations or arrangements can be made for their handling again in foreign commerce, or their handling in domestic commerce in combination with goods of domestic production, must be put into a bonded warehouse, or the duty must be paid upon them, and they must be held, sealed, as it were, in places which can not be easily visited by those engaged in merchandising.

A large financial burden must be borne by people who are carrying goods in bonded warehouses, even though it may be the intention of those people to reship into foreign commerce. Why impose that burden upon them? Americans are interested in facilitating commerce at our own ports just as much as foreigners are interested in facilitating commerce at their ports, and even more so.

I can see no danger in this thing. I can see no prospect of the customs laws of the United States being evaded or violated. The Government will have just as strict jurisdiction and just as strict control over the foreign trade zone as it does over the Government bonded warehouse. It can check in every article and package which arrives. It can keep track of every article and package while it is in the zone. It can check it out again if it goes again into foreign commerce, and it can check it into the United States, collecting the duties upon it, if any duties are to be collected, when it comes out of the zone into customs territory.

I just sum it up in the one sentence, Mr. President—this thing does not violate any of the traditions or policies of the people or the Government of the United States; it is no experiment; there is nothing strange or new about it; it has been done in many other ports abroad, and it will facilitate the commerce of the United States and its people. That, to my mind, is its principal virtue.

Mr. FLETCHER. Mr. President, I very cordially agree with those who have discussed the subject, and join in favoring this measure. As the Senator from New York observed in closing, this is no new proposition. We are proposing to do what the older countries of Europe have done for a great many years, and have been most successful in arranging in connection with their foreign trade. They found it necessary to provide these free zones or neutral zones in respect to handling, upbuilding, and extending their commerce.

It involves no new principle. It is merely an extension, an enlargement, a liberalizing, in a way, of the present policy and principle of warehouses and drawbacks, which are in effect in the United States, and have been for years.

As the Senator from Louisiana observes, it is recommended by the various chambers of commerce and boards of trade throughout the country. The Commerce Committee of the Senate gave rather extended hearings on the subject, and experts of the departments and from various portions of the country appeared in advocacy of the plan. So far as I know, no opposition developed in the hearing.

On May 25, 1921, the Secretary of Commerce said:

> The general purpose of the bill is, of course, admirable and vitally necessary if we are to develop our foreign commerce.

The Secretary of the Treasury, in commenting on this bill under date of May 18, 1921, said:

> The main purpose of the bill is to encourage foreign trade by providing a simple and ready means for the reexportation of foreign goods brought to the United States and for combining such foreign goods as deemed necessary with domestic products prior to their export from this country.

He further said:

> The plan proposed will not eliminate either the bonded warehouse or the drawback system, although it will, if adopted, necessarily lead to a considerable reduction in their value, for while the bonded warehouse, the bonded manufacturing warehouse, and the drawback law serve most useful purposes they are not entirely adequate to meet the needs of a nation having a great foreign commerce.

Mr. J. H. Rossiter, who is a recognized authority on the whole subject of shipping and trade, and who was at one time in charge of the Shipping Board operation of vessels, stated at the hearings:

> In stating an affirmative to strengthening our merchant marine would like to add that I believe it is almost an essential to the successful establishment of our merchant marine. It would not only be an advantage but it is an essential.

Such an opinion, coming from a high authority like that, it seems to me ought to impress us with the importance of this proposed legislation.

The Tariff Commission, reporting on the advantages of this system and conditions generally, referred to the matter in this way:

> A free port or free zone is a place, limited in extent, that differs from adjacent territory in being exempt from the customs laws as affecting goods destined for reexport; it means simply that, as regards customs duties, there is freedom unless and until imported goods enter the domestic market.

I am handed by the senior Senator from New York [Mr. WADSWORTH] a letter from the Merchants' Association of New York, addressed to him, and I ask to have it inserted in connection with my remarks. It favors the enactment of this legislation.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW YORK, *August 10, 1922.*

Hon. JAMES WADSWORTH, Jr.,
United States Senate, Washington, D. C.

MY DEAR SENATOR WADSWORTH: The Merchants' Association of New York has just learned that probably the Senate will consider the free zone amendment to the tariff bill about the 15th of August.

Our association has for many years been an active advocate of the inauguration and operation of foreign trading zones at the ports of the United States. This position is based upon a careful study of all factors entering into the operation of such zones, this study having been continued over an extended period.

We are on record in favor of the enactment of the proposed amendment to the tariff bill. This position has been taken because it is our belief that such zones will increase the volume of transshipment business at the leading ports of the country, thereby bringing about more favorable terms and conditions in connection with all overseas commerce. The zones would, moreover, do much to further the development of the United States as a market and trading center for many commodities of foreign commerce. The proposed plan contemplates provisions which will, we believe, thoroughly safeguard the interests of the United States and is in full accord with the protective policy of the Republican Party.

Please be assured that it will be highly appreciated if you find it possible to support the amendment in question on the floor of the Senate.

Thanking you in anticipation, we are,
Very truly yours,

THE MERCHANTS' ASSOCIATION OF NEW YORK,
By S. C. MEAD, *Secretary.*

Mr. FLETCHER. Mr. President, I read further from the Tariff Commission:

> A free zone may be defined as an isolated, inclosed, and policed area in or adjacent to a port of entry, without resident population, furnished with the necessary facilities for lading and unlading, for supplying fuel and ship's stores, for storing goods, and for reshipping them by land and water; an area within which goods may be landed, stored, mixed, blended, repacked, manufactured, and reshipped without payment of duties and without the intervention of customs officials. It is subject equally with adjacent regions to all the laws relating to public health, vessel inspection, postal service, labor conditions, immigration, and indeed everything except the customs.
>
> The purpose of the free zone is to encourage and expedite that part of a nation's foreign trade which its government wishes to free from the restrictions necessitated by customs duties. In other words, it aims to foster the dealing in foreign goods that are imported, not for domestic consumption, but for reexport to foreign markets, and for conditioning, or for combining with domestic products previous to export.

The commission gave various reasons for this legislation, showing the advantages of it. I will not have time to discuss in detail their analysis of the bill. At present we are under a good many difficulties in connection with our foreign trade, and we are confronted with problems which our competitors have solved in the past by the establishment of such free zones. For instance, in the hearings one American exporter testified that his firm found it necessary to take goods from bonded warehouses in the United States and ship them to a West Indian port where they might be repacked and thence forwarded to their destination. We ought to provide those facilities here in our own country, and we can easily do so.

The commission reported, regarding the volume of trade that would be affected favorably by such facilities as this measure would make possible, as follows:

> Statistics are not available for an accurate statement of the amount of goods thus handled, but estimates putting their annual value in normal years at approximately $4,000,000,000 do not seem exaggerated. They consist in the main of the raw materials of those countries that have not attained a high stage of industrial development and that are dependent on the maritime nations for the transportation of their products and the supply of their necessities.

They said further:

> In the annual reports of the Bureau of Commerce and Navigation, Table 8 combines the value of the goods transshipped and the value of goods in transit that merely cross United States territory in bond from one foreign country to another. Altogether in 1914 they amounted to the considerable value of $198,303,232, but not less than $155,847,478 of this was for goods in transit to and from Canada.

The spread of this free-port policy in Europe is most interesting. Not only have such zones been established in Hamburg and in Cadiz but at Copenhagen, at Lisbon, and other ports, all named in this report of the commission.

The advantages expected from an American free-zone system are:

1. In simplifying entry and clearance.
2. In equalizing inbound and outbound traffic.
3. In facilitating dealings in foreign products.
4. In stimulating certain branches of manufacturing.
5. In stabilizing transshipment trade under varying tariff policies.
6. Miscellaneous advantages.

As the Senator from Washington has said, the bill eliminates the manufacturing feature, so that we need not consider that.

Mr. Rosseter, in the hearing on the bill then pending before the Commerce Committee of the same purport as this proposed amendment, said:

I have had the opportunity, based on frequent visits abroad, to see the workings of the so-called free-zone systems, and, more to the point, have experienced its effect in commerce and shipping from the absence of such facilities in our own country.

My long experience as a ship operator has made me intimately acquainted with our own system.

The conclusions I have reached from a comparison of the two systems are based on long reflection and study. They are not sudden; they have grown slowly, in my mind, which gives me added confidence in my convictions.

* * * * * * *

Let us briefly consider the first branch, that covering freighting operations. The proposed system tends strongly to ease, quickness, and cheapness of the complex operations involved in the loading and unloading of cargo, its dispatch inland by trucks or car, for transshipment or reexport in handling by lighter, or manually, in bonded and in unbonded warehouses located near the wharves within the zone.

This is accomplished by the simple physical device of making and preparing a place especially devoted to foreign trade, roomy enough and adequately equipped.

Then he discussed in a very interesting way the details of the subject, favoring the invasion, based upon his experience as a shipper, and as an operator of ships in foreign trade for a great many years and as knowing the whole subject of foreign trade. Others testified in the same way in the hearings, all in support of the bill as it is now reported by the Senator from Washington and proposed as an amendment to the pending measure.

Without saying more, I earnestly hope that the Senate will take advantage of the opportunity to include the amendment in the bill and write it into our permanent law. It would mean a very great deal for our merchant marine, for the development of our shipping, and for the extension of our foreign trade. It would afford opportunity to foreign buyers to come right here to this zone in our own country and select what they want out of all the material that would be gathered there from all parts of the world. It would afford business for our ships coming in and business for our ships going out.

Let me take the time to state just one illustration showing what is meant by that idea. It is mentioned under the subject of rice and the handling of rice:

Rice, for instance, which in the pre-war days was grown in Indo-China and in Siam was sent in patty form to Germany and there hulled and sorted and cleaned and in turn reexported to the entire world. The German ship carried it from Siam to Hamburg and German ships from Hamburg carried it to Central America, to South America, to the United States, and, in fact, to all parts of the world. Thus through their free-zone system they had the double advantage of increasing their inward business and stimulating their export trade.

I submit that there can be no reasonable objection, in my judgment, to the amendment.

Mr. CALDER. Mr. President, as a member of the Committee on Commerce of the Senate it was my privilege to have a part in the hearings on the bill creating free port zones; and I desire to express my hearty approval of this amendment, for it incorporates the fundamentals of that bill.

At that time there appeared before the committee representatives of the leading business organizations of the country. At New York we have the New York and New Jersey Port Commission, a body whose membership is appointed by the Governors of New York and New Jersey. This amendment meets with their hearty approval. There appeared before the committee also the leading business organizations of New York, including the chamber of commerce, the merchants' association, the board of trade of transportation, all of them giving it hearty approval.

The thing that seemed to me to be most important in the investigation of the subject was the fact that it would be helpful to our merchant marine. In these days, when the merchant marine needs assistance, I know of nothing that we could do in connection with the bill that would be more helpful. For that reason also I am in favor of the amendment.

It is an extension of the same principles for facilitating foreign trade that we find in the bonded warehouse, in the drawback system, and in the bonded manufacturing warehouse. It is merely an extension of this principle to make it broader, larger, freer, easier and cheaper in operation, more frictionless; to allow more elbowroom for freighting operations and to allow merchants who are engaged in transshipping business more freedom in their mercantile treatment and manipulation of cargoes.

There are many practices, such as cleaning, refining, assorting, blending, and so forth, that are done to goods in the transshipping trade that can not be done under the present system of bonded warehouses at all.

I hope the amendment will meet the approval of the Senate.

Mr. McCUMBER. Mr. President, this provision was offered yesterday in the Senate as an amendment to the pending bill and is printed this morning. Of course, the committee has not had time carefully to consider it. I have looked it over this morning to ascertain, if I could, its general purposes.

I note first that we are to establish zones as distinguished from bonded warehouses. I can not see that we gain one thing in this respect more than we would gain if we would amend the bonded warehouse provision of the law so that the articles which are put into the bonded warehouse and which are mixed or changed therein may be imported as well as exported. Under the present law we may mix them; but if we do that, if we manipulate them, if we change the articles, we must export them. The only change which is made in that respect is that we may import the product from this neutral zone.

As has been suggested by the junior Senator from New York [Mr. CALDER], we may possibly have a bigger zone and a little more elbowroom in which to operate. I find from a reading of the amendment that the size of the zone is not fixed, but that it shall be no larger than is necessary. I would say there might be danger of absorbing the State of Delaware under this provision, except the principal city of that State, Wilmington. We could not take in Wilmington, because no one is allowed to reside in the zone or to come into the zone except the Federal officers and the State officers, nor are we allowed to sell any merchandise in that zone. The Federal officer would not be permitted to purchase a cup of coffee or a sandwich in the zone. He must take his dinner pail with him if he expects to get his lunch in the zone. I simply mention this as indicating that the matter seems to be overly guarded in some respects and possibly not sufficiently guarded in other ways.

Now, what may we do in the zone? I will read the paragraph on page 2 of the printed amendment, beginning with line 14:

Foreign and domestic merchandise of every description—

Now, mark you that it is both foreign and domestic merchandise of any description—

except such as is prohibited by law—

Which necessarily means intoxicating liquors—

may, without being subject to the customs laws of the United States, except as otherwise provided in this section, be brought into a zone and there stored, exhibited, broken up, repacked, assembled, distributed, sorted, refined—

And I especially call attention to that—

refined, graded, cleaned, mixed with foreign or domestic merchandise, or otherwise manipulated, and be exported, and foreign merchandise may be sent into customs territory of the United States therefrom in the original package or otherwise.

Now, we have fixed duties in the bill, as in every other tariff bill, upon some of the articles that may come in. They may be specific duties, they may be ad valorem duties, or the article may be free of any import duty; but after we get them into this zone we may mix any of the articles, we may change the lead ore, which may come in free, into lead, we may change other ores which are on the free list and refine them and bring them into the United States, not without the payment of duty, to be sure, because there is a provision to guard against bringing those articles in free.

But what are the provisions? The provisions are that we will take the article as it is brought into the zone and determine what duty that article should pay if it came into the zone in the particular condition in which it is brought from the foreign country, which may be free or may bear a duty. Now suppose we mix or manipulate the free article with a dutiable article and we bring in a different product, we pay the duty, of course, when it is brought into the United States for final consumption upon the basis of the duty that would be paid upon the product as it came here, and not as it would be paid if the article as changed was imported in the first instance.

Taking a case of ad valorem duty, we have to determine what the ad valorem duty should be. It is quite simple to ascertain what a finished product which is brought into this country is sold for in a foreign country. We can fix an ad valorem duty upon that, but what ad valorem duty can we fix upon a combination which is not imported at all as an article that is described, but is brought into the free zone in the shape of sev-

eral different articles which are combined and a new article produced?

Mr. WADSWORTH. Mr. President, will the Senator yield?

Mr. McCUMBER. I yield.

Mr. WADSWORTH. Do not the customs authorities have to meet that very same question now?

Mr. McCUMBER. No.

Mr. WADSWORTH. Are not foreign articles mixed before they leave foreign shores?

Mr. McCUMBER. Yes; and when they are mixed they produce an article, and that article has a market there. Now, you might produce and mix things in this place that are not mixed abroad, and you would have no standard by which to gauge your price.

Mr. McLEAN. Mr. President, I would like to ask the Senator from New York a question, if the Senator from North Dakota will permit me.

Mr. McCUMBER. Certainly.

Mr. McLEAN. Suppose a manufacturer should bring in the wrapper from Cuba and then manufacture a cigar with an American filler, what duty would that cigar pay?

Mr. WADSWORTH. I should think it would pay the duty in proportion to the contents of the different articles.

Mr. McLEAN. But how is anybody going to tell?

Mr. WADSWORTH. It is done right there under the eyes of the customs inspector. We are raising up here ghosts and men of straw. Other countries that have protective duties and ad valorem duties do this.

Mr. McCUMBER. Other countries have their own peculiar methods of dealing with all tariff matters, which we have not. We deal with them through Congress. We can not change a rule or make a rule overnight that will affect or change the tariff, but other countries can do so.

Mr. WADSWORTH. This bill is full of rules to govern the appraisers and the Secretary of the Treasury.

Mr. McCUMBER. That is a mere matter of the present, Mr. President.

Mr. WADSWORTH. The whole question is one of the present.

Mr. McCUMBER. When we determine what a duty on a cigar shall be if it is made of certain material, the duty is fixed upon the value of the cigar as it comes from a foreign country and not upon the particular constituents or number of constituents which go into that cigar. It is not a ghost that we are raising. This may be satisfactory; it may be something that may easily be adjusted in conference; but it does raise a number of serious questions affecting the tariff laws and the revenue laws of the United States. I do not want to have it passed by as something that is so simple and so clear that it does not require any further consideration whatever.

Mr. FLETCHER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Florida?

Mr. McCUMBER. I yield.

Mr. FLETCHER. May I suggest, with reference to the question raised by the Senator from Connecticut [Mr. McLEAN], that we now have a law which provides for cigars being manufactured in bond? The law now provides for that, and this would not affect that situation at all.

Mr. McLEAN. Yes; but as the law now reads it is confined to importations from a certain country—Cuba—and, of course——

Mr. FLETCHER. That is all covered by a special statute.

Mr. McLEAN. A record is kept of the invoice, and the duty is easily collected.

Mr. FLETCHER. The establishment of free zones would not affect that at all.

Mr. McLEAN. I think that the provision covering that subject should be very carefully drawn, because after the cigar is made nobody can tell where the product originated.

Mr. FLETCHER. Cigars are made now under Government inspection; the Government inspectors are right there. When the tobacco comes in, it is inspected as the cigar is being made. That is under a special law, and this would not affect that situation at all.

Mr. McCUMBER. Mr. President, in closing I desire to say that I have no objection to the provision going in as an amendment, but I wish to call the attention of the Senate to some of the serious problems that it will raise affecting the tariff laws, although if the amendment shall be agreed to we may so frame it in the committee of conference that it will take care of all of the cases which I have mentioned.

Mr. GOODING. Mr. President, I find myself unable to get a clear understanding of this amendment. I have no doubt about its importance, and I have confidence in the Senators who have advocated the amendment, but it does seem to me that it is unfortunate that a measure of this kind shall be brought in here as an amendment when there is practically no time for its discussion, the Senate operating under a rule which limits debate. So I can not satisfy myself as to the merits of the amendment sufficiently to enable me to vote for it. I shall, therefore, be compelled to vote against the amendment.

Mr. JONES of New Mexico. Mr. President, it is evident that this amendment has been considered by the Committee on Commerce of the Senate.

Mr. RANSDELL. It has been very fully considered by them.

Mr. JONES of New Mexico. I have noticed that all of the members of that committee who are here have heartily advocated the adoption of the amendment. I should like, however, to obtain some information regarding it.

The amendment provides that the trade zones shall be under the supervision of public corporations and that they shall be public utilities. I should like to inquire if the Government of the United States will retain any authority or supervision over those public utilities which are to be provided for by States or municipalities?

Mr. RANSDELL. Absolutely, as I understand the provision. In the first place, the amendment provides that the Secretary of the Treasury, upon the recommendation of the Secretary of Commerce, may "grant to public corporations the privilege of establishing, operating, and maintaining foreign trade zones in or adjacent to ports of entry under the jurisdiction of the United States."

Then they are to be operated entirely in accordance with the customs laws and regulations of the Government. The purpose is not to interfere in the slightest way with the customs laws, but, on the contrary, to have every safeguard thrown around the proposed zones in order that commerce may be facilitated without interfering with the collection of customs dues. The customs officials will be in entire control and charge of the whole matter all the time; that is the spirit and intention; and, I will say, if the language does not so provide as it now stands, I sincerely hope that the chairman of the Committee on Finance will see that wording of that kind is inserted before the provision is finally agreed to, for that is what we all contemplate and is what we are entirely willing to have.

Mr. McCUMBER. Will the Senator from New Mexico permit me to ask a question of the Senator from Louisiana?

Mr. JONES of New Mexico. I gladly yield to the Senator from North Dakota.

Mr. McCUMBER. I merely wish to ask the Senator from Louisiana this question: As the bill is now drawn, is there anything to prevent the Standard Oil Co. from erecting a refinery in such a zone, bringing in crude oil from Mexico or from any other place and storing it there, and, if the United States markets will give it a better price, then importing it into the United States, and if the foreign market will give it a better price then exporting it? Would not that be true also as to any other manufacturer who wishes to change a raw material, such as lead ore, into lead or any of the other minerals, which may be done by refining, and so forth, and then take his choice as between the American market or the foreign market? The proposition opens up that broad vista, does it not?

Mr. RANSDELL. I believe it does open that broad vista.

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Louisiana?

Mr. JONES of New Mexico. I yield.

Mr. RANSDELL. If the Senator will allow me, I desire to say to the Senator from North Dakota that practically we have such a situation now under the drawback system, as illustrated by me in my brief speech. Crude sugar is brought into this country very extensively from Cuba and other places; the molasses is washed out of it; and when it is shipped abroad a drawback of 99 per cent of the duty paid when it comes in is refunded by the Government to the refiner. Now, I do not understand that we pay any duty on oil, and I do not know the reason why, under the provisions of this proposed act, it would not be all right for the Standard Oil Co., if it wished to import Mexican oil into this country, to take it into one of these free zones, refine it there, thus affording much work to American labor, and then ship it abroad; or, as the Senator has said, if the American market needs it and is willing to pay for it, all right, bring it in; and if we impose any duty on oil, of course, pay that customs duty. It would simply afford a facility, but it would not interfere with the customs laws in any way that I can see.

Mr. JONES of New Mexico. I should like to ask one further question. Will the public corporations be permitted to derive

substantial revenue from the granting of privileges within the foreign trade zones?

Mr. RANSDELL. I do not so understand. I understand that all duties and charges of every kind will be regulated, so that the utilities must make a very light charge. I understand the intention is that they shall be public facilities.

Mr. WADSWORTH. Public facilities.

Mr. RANSDELL. Absolutely public utility corporations, and the charges and fees are to be fixed by public agencies. It is not intended, I will say to the Senator, that they should make any substantial revenue.

Mr. JONES of New Mexico. While the amendment requires that these public corporations shall charge a reasonable fee for privileges accorded, it seems to me that, being public utilities of the State, they would be controlled in that respect only by the State laws, whatever they may be. I presume that it will require legislation on the part of the State to bring about the adoption or utilization of the privileges of the proposed amendment. I do not know of any State or municipality or public utility which now has authority to perform this kind of service, and I assume that there will be legislation in the various States where ports may be located under which adequate restrictions will be provided; but I think we must recognize the fact that that will put the control of these zones and the services to be rendered by them under the jurisdiction of the States, and I am inclined to think that the revenue derived by the public utility which will be authorized to conduct these free zones will be very substantial. Whether that is a good thing or a bad thing, I must say that I have not considered sufficiently to reach a definite conclusion.

Mr. LODGE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Massachusetts?

Mr. JONES of New Mexico. I yield.

Mr. LODGE. I merely want to ask a question at that point.

Mr. RANSDELL. Mr. President, if the Senator will permit me, I was going to say that this bill provides that the Secretary of the Treasury, in cooperation with the Secretary of Commerce, shall provide such regulations as may be necessary for the purpose of selecting foreign trade zones, maintaining adequate facilities for the transaction of business therein, protecting the revenue, and regulating the entry and clearance of vessels into and from foreign trade zones, and shall prescribe the conditions for the granting of a concession for the establishment of a foreign trade zone, as well as the conditions for revoking such a grant, and also any other regulation which may be necessary for carrying into effect the provisions of this section.

So it seems to me from that provision that the whole matter will be in charge of the Treasury Department and the Department of Commerce, in conjunction, I will say, with the local authorities. For instance, if the city of New York wanted to establish a free zone similar to the 2,500-acre free zone at Hamburg, I assume that there would be——

The PRESIDENT pro tempore. The Senator from Louisiana has exhausted all the time which under the rule he may occupy on this amendment.

Mr. JONES of New Mexico. Mr. President, I should like to make another suggestion, and I ask unanimous consent that I may proceed for five minutes longer.

Mr. LODGE. I desire to ask a question, and I think I have the right to take the floor. I have not spoken at all upon the amendment.

The PRESIDENT pro tempore. The Senator from New Mexico has not as yet exhausted his time.

Mr. LODGE. I thought the Chair announced his time had expired.

The PRESIDENT pro tempore. The Chair announced that the Senator from Louisiana had exhausted his time. The Chair, however, desires to be understood that one Senator can not by yielding to another Senator to ask a question give that Senator, if he has exhausted his time, an opportunity to make another address.

Mr. JONES of New Mexico. How much time have I remaining, Mr. President?

The PRESIDENT pro tempore. The Chair is informed the Senator has five minutes remaining.

Mr. JONES of New Mexico. Mr. President, I wish to make this suggestion: I do not see anything in this amendment which applies to the Panama Canal Zone. When this subject is dealt with it seems to me that that situation should receive earnest consideration, for if there is a place on earth where there should be a free zone and where there should be adequate facilities for the purpose of the exchange of commodities, reshipments, and other arrangements to facilitate world commerce, it is upon the Panama Canal Zone; and there should be put into this amendment some machinery whereby that zone may be opened up to the commerce of the world. We have built that canal at great expense to the United States, and thus far we have received no return upon our investment; but if the Canal Zone be opened up as a free zone for the purposes contemplated by this amendment it will bring business to the canal, it will bring revenue to the Federal Government, and will, as I say, open up and make of that zone the one great exchange of commerce for the world. It will bring in revenue there through the use of the canal. It will enable the ships from California to take their produce to the Canal Zone, divide their cargoes, send such portions as they desire to South America and the other portions to North America, to Europe, or to any other section of the world; likewise ships from Australia, from China, from Japan, and from every other country on the earth.

I sincerely hope that this amendment will be modified so as to open up that zone and make it the one great commercial mart of the world. It will bring revenues to the Government of the United States through the use of the canal. The Government of the United States controls the ground there. It controls the privileges which may be granted to anybody to carry on this great method of commercial exchange. In my judgment, the possibilities of such procedure are unlimited for the good, not only of the United States but of the commerce of the world; and I sincerely trust that the Senator from Washington will amend this provision in some way so as to provide for that result.

Mr. JONES of Washington. Mr. President, I want to suggest to the Senator that I do not believe that is excluded by the amendment. If there is any municipality there that wants to furnish this facility, it can do it.

Mr. JONES of New Mexico. But the Senator from Washington knows that there is not any municipality there with facilities to do it.

Mr. JONES of Washington. Then we would have to provide, as a separate proposition, that they should be furnished by the Government of the United States; we would have to make appropriations for the purpose; and we do not contemplate anything of that kind.

Mr. JONES of New Mexico. Every business carried on in the zone is carried on by the United States. The laundries, the ice-cream factories, the grocery stores, the hotels, and everything are carried on by the United States; and if anything is to be done there it must be done under special legislation by the Congress.

Mr. LODGE. Mr. President, I take the floor simply to ask the Senator in charge of the amendment whether it is intended, in this free zone, to enter on such changes as amount to manufacture; to import cotton or wool, for instance, and proceed to make clothing out of it?

Mr. JONES of Washington. It is not, Mr. President. The bill originally contained the word "manufacture," and the committee struck out that word.

Mr. LODGE. Does the Senator think that is sufficiently protected?

Mr. JONES of Washington. I am inclined to think so.

Mr. LODGE. The language of the amendment is pretty general—pretty loose.

Mr. JONES of Washington. It is fairly general; but all of this language and the word "manufacture" were in the original bill recommended by the Tariff Commission, and we cut out that word.

Mr. LODGE. The word "manipulate" is a pretty broad word.

Mr. JONES of Washington. It is pretty broad, but I want to suggest to the Senator that the committee in conference can look into this matter very carefully, and if they think the language is too broad they can change it. I want to say, however, that our committee went into it pretty carefully, and we thought on the whole that under this language they could not establish regular manufacturing establishments in the sense in which we use that term. At least it was intended to exclude that.

Mr. LODGE. There are a good many industries that it would affect very seriously. Hides, of course, are on the free list and have no duties to pay, but on wool and cotton and things like that, if they could build factories in this zone and then export, it would be a very serious competition for every established industry in the trade.

Mr. JONES of Washington. We did not intend to permit that. We excluded that.

Mr. GOODING. Mr. President, I should like to ask the chairman of the Commerce Committee if his committee had hearings on this bill?

Mr. JONES of Washington. We did—very extensive hearings.

Mr. GOODING. Have they been printed?

Mr. JONES of Washington. Yes; the hearings have been printed.

Mr. GOODING. I regret that I find myself in a position where I must vote against the amendment. I think there is a great deal of merit in it, but I am not able to understand it clearly enough to support it.

Mr. SWANSON. Mr. President, I am earnestly in favor of this amendment, and think it will accomplish a great deal of good in connection with our export business. I desire to call the attention of the chairman of the Commerce Committee, who offers the amendment, to an amendment which I should like to offer to it.

This amendment provides that where there are two State lines in a port two zones can be established. There are a great many places—for instance, like Hampton Roads—where the physical conditions are such that two zones would be much better than one, where there are two large cities separated by the waters of the port. I should like to offer an amendment to the effect that where the physical conditions of the port of entry are such that the Secretary of the Treasury thinks two zones would be better than one he can authorize their establishment. I do not see any trouble that would accrue to the Government, and it would greatly facilitate the use of this free zone.

I therefore offer this amendment to the amendment and hope the Senator from Washington will accept it.

Mr. JONES of Washington. Mr. President, I will say to the Senator that I personally see no objection to that. When it comes to work out practically I do not believe more than one zone will be established in a port, but I see no objection to having a provision in the amendment that if a locality desires to maintain and go to the expense of operating an additional zone, the Secretary of the Treasury, if he deems it wise, can authorize it. I see no particular objection, at any rate, to letting it go in and be considered by the conferees.

Mr. SWANSON. I thank the Senator very much.

I offer the amendment which I send to the desk to the amendment of the Senator from Washington.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The READING CLERK. At the end of line 16, page 2, before the period, it is proposed to insert a comma and the following words:

Also except that when in the judgment of the secretary the physical conditions of any port of entry are such that it would be more convenient and advantageous, he is authorized to grant the privilege of establishing zones in such port of entry.

Mr. JONES of New Mexico. Mr. President, I should like to ask the Senator from Washington if he would not be willing to have this matter passed over for a while? I think an amendment ought to be proposed taking care of the Canal Zone, putting it within the power of the Government control there to grant permits——

Mr. SWANSON. Mr. President, I should like to have my amendment disposed of first before the other question comes up.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Virginia to the amendment of the Senator from Washington.

The amendment to the amendment was agreed to.

Mr. LENROOT. Mr. President, I do not care to occupy the time of the Senate except to say, as a member of the subcommittee of the Committee on Commerce to which this bill was referred, that we made very extensive investigations, held very lengthy hearings, and, as I recollect, the report was unanimous from the committee; so there is not any partisanship whatever involved in this question.

I want to make just one point, Mr. President. While this proposed free zone is very valuable, no matter what theory or tariff policy may be pursued, whether it be the Democratic theory of a tariff for revenue only or the Republican theory of protection, it is even more important from the Republican theory of protection than it is from the Democratic theory of revenue, because the higher the rates imposed upon products coming into this country the more important does this free zone become.

To illustrate that, we now have the system of a drawback which refunds 99 per cent of the duties that have been levied where the imported product is reexported; but the consignee or the importer must first pay the entire duty. He has that money out without its drawing interest, and, in addition, he finally has to pay 1 per cent of the entire duty, even though he reexports; and just to that extent it is a handicap against the American in competing with the rest of the world in our foreign trade.

Then, Mr. President, there is one other very important feature. If we expect to have a permanent and growing foreign trade we ought to look forward to our becoming a great world market—and that we can not be under any existing law. I know of no way by which it can be secured in competition with Europe except through the free-zone, free-port system.

To illustrate that, we have a shipload of exports going to Europe, and there are not cargoes available for domestic use to bring that ship back at a profit. There is a cargo that could be secured for South America. If we have this free zone, an American can enter into that business; he can purchase that foreign product; it can come to the American free-port zone, and then can be transshipped to South America. We can have Americans engaging in this foreign business, where under the handicaps that now exist Americans can not compete with Europeans or with other parts of the world. It has no injurious effect whatever upon the protective system, because whenever anything in this free zone goes out of that zone for consumption in the United States it has to pay the full duty just exactly as though it were imported in the first instance.

Then, from the standpoint of our merchant marine, if our ships can not get full cargoes back, they are handicapped just to the extent that they are unable to secure full cargoes to this country, being loaded with full cargoes to Europe with our exports. This free-zone system will enable those ships to have full cargoes back to the United States. They can not afford to take a cargo to Liverpool and a part of a cargo to South America and then back to New York, but under this they can have part of their cargo for domestic use in the United States and part of their cargo for reexport to South America and elsewhere, and to that extent it will afford full cargoes for our own merchant marine.

So from every standpoint, Mr. President, this plan can be nothing more than beneficial to the United States. The Committee on Commerce has given it very thorough consideration. It has the support of all the members of the committee, Democrats and Republicans, and, while I do not think the conference committee, upon full consideration, will care to make any changes in it, yet, if they should desire to make some changes in it, they will have the opportunity to do so in conference, because, if adopted here as an amendment, the entire subject will be open to amendment in conference by the conferees. I hope the amendment will be agreed to.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from Washington as amended.

The amendment as amended was agreed to.

Mr. JONES of Washington. The letter of the Tariff Commission is only in the form of a committee print. I ask that it may be printed as a Senate document, and that the report of the Commerce Committee may be printed in the RECORD as a part of my remarks.

The PRESIDENT pro tempore. Without objection, the letter will be printed as a document, and the report of the Committee on Commerce will be printed in the RECORD. The Chair hears no objection, and it is so ordered.

Mr. JONES of Washington subsequently said: Mr. President, consent was given a while ago for me to have printed a letter from the Tariff Commission relative to foreign trade zones. There is, however, an illustration in the document to the printing of which I understand the Senate has to give consent before it may be done. I ask unanimous consent that the illustration may be printed with the document.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Is there objection to the illustration to which the Senator from Washington refers being printed with the document? The Chair hears none, and it is so ordered.

The report submitted by Mr. JONES of Washington, from the Committee on Commerce, August 15, 1921, is as follows:

Report No. 257. [To accompany S. 2391.]

The Committee on Commerce, to whom was referred the bill (S. 2391) to provide for the establishment, operation, and maintenance of foreign trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes, having considered the same, report favorably thereon and recommend that the bill do pass without amendment.

The prosperity of a nation depends upon the extent and activity of domestic and foreign trade. We are peculiarly situated, however. If all foreign trade were shut off, business would be affected disastrously for a while, but after a readjustment to suit the conditions prosperity would return and establish itself on a stable basis. No nation, however capable of maintaining itself upon its own resources, will interdict all foreign trade. World relations are becoming more and more intimate and interdependent. The more perfect the means of intercourse the better it is for business, and the nation that has the most efficient instruments of commerce will secure the greatest good from foreign trade.

So long as tariffs are levied ports of entry must be maintained and special steps taken for the collection of such tariffs. Tariffs levied solely for revenue are more easily determined and collected than when they are levied for both revenue and protection. Whether levied for revenue or for protection, or for both revenue and protection, the simpler and less vexatious the means necessary to protect the Government, the better the system will be for business.

We now have in connection with our tariff system the bonded warehouse, the drawback, and the bonded manufacturing warehouse. There is a great deal of vexatious delay in the handling of goods through these agencies. Vessels are delayed in unloading. Complex regulations hinder transshipment or reexport. Much difficulty is met in working out drawbacks. Any system that will remove any of the obstructions to commerce that now exist should be welcome and will be welcomed by all business people who have to deal with the present system and who do not now possess some special advantage that might be affected.

This bill provides a means to do away with many of the evils of the present system. It does not do away with the present agencies, but it does open the way for another agency that may be made use of to avoid many of the vexations of the present system.

The only substantial objection that has been urged to this measure is that it is a subtle device to undermine the protective tariff system. The Republican members of the Commerce Committee gave this objection special consideration. They are protectionists from principle and would not favor any measure inimical to that system. They came to the conclusion that this measure does not affect in any way the principles of a tariff either for revenue or for protection. It provides for a very valuable instrument in connection with either system. If it has any special relation to either system, it is especially desirable in connection with the enforcement of a protective tariff and will strengthen rather than weaken that policy. Action under it will add greatly to the value of protection. This is the view of every man who came before the committee urging its adoption. As a matter of fact, it presents no new principle. It broadens and simplifies the principle or policy embraced in the present warehouses and drawbacks of exsiting law and has been applied for years.

Special investigation with reference to foreign trade zones has been made by the Tariff Commission, and the results of their investigation are embraced in a letter from the Tariff Commission, which made, in compliance with the request of the Senate Committee on Commerce, a report upon this policy, submitted in the second session of the Sixty-fifth Congress in connection with the analysis by the Tariff Commission of Senate bill 4153 of that Congress. The Tariff Commission held extensive hearings and presented a summary of the present system and of the purposes and advantages of the system proposed by this measure, and it is deemed wise to embrace this summary in this report:

"DEFINITION AND PURPOSE OF A FREE ZONE.

"The word 'free' in connection with 'port' or 'zone' is apt to be misleading. It is proper to note, therefore, that the term has no relation either to port charges or to any policy of 'free trade' or 'protection' in this case. Conventional nomenclature is in this case misleading. A 'neutral' zone would be more properly descriptive. A free port or free zone is a place, limited in extent, that differs from adjacent territory in being exempt from the customs laws as affecting goods destined for reexport; it means simply that, as regards customs duties, there is freedom unless and until imported goods enter the domestic market.

"A free zone may be defined as an isolated, inclosed, and policed area in or adjacent to a port of entry, without resident population, furnished with the necessary facilities for lading and unlading, for supplying fuel and ship's stores, for storing goods, and for reshipping them by land and water; an area within which goods may be landed, stored, mixed, blended, repacked, manufactured, and reshipped without payment of duties and without the intervention of customs officials. It is subject equally with adjacent regions to all the laws relating to public health, vessel inspection, postal service, labor conditions, immigration, and, indeed, everything except the customs.

"The purpose of the free zone is to encourage and expedite that part of a nation's foreign trade which its government wishes to free from the restrictions necessitated by customs duties. In other words, it aims to foster the dealing in foreign goods that are imported not for domestic consumption but for reexport to foreign markets, and for conditioning or for combining with domestic products previous to export.

"Although the free zone is naturally conceived to be on deep water, and is commonly regarded as in many ways an extension of the open sea, there is none the less a possibility of its establishment in an interior location where rail and inland waters may bring about the assembling of foreign and domestic goods destined for export. It is pertinent to note that Switzerland is contemplating the establishment of a free zone at Basle, which is close to the industrial districts of France, Italy, Austria-Hungary, and the German Empire.

THE POLICY OF THE UNITED STATES.

"The policy of the United States has not been unfavorable to the kind of commerce that the free zone is designed to promote. On the contrary, it has been the obvious intention of the Government to relieve reexport trade from the restrictions incident to the administration of the tariff and customs laws, and to that end three institutions have been devised.

"(1) The bonded warehouse, where goods intended for reexport may be entered and held free of duty.

"(2) The bonded manufacturing warehouse, where without payment of duty imported goods may be handled, altered, or manufactured solely for export, either with or without the admixture of domestic materials and parts.

"(3) The drawback, which is a repayment of 99 per cent of the duties paid on imported goods when they are exported.

"The provision and retention of these three devices show clearly that it has not been the purpose of the United States Government to place unnecessary obstacles in the way of its citizens when engaged in international trade. That such obstacles have arisen is due to the fact that the three devices mentioned were inadequate wholly to relieve foreign commerce from the regulations and restrictions placed upon the importation of foreign goods for domestic consumption. It would therefore involve no change of policy to supplement these devices by a system of free ports or free zones such as have proved singularly effective in other countries.

INADEQUACY OF BONDING AND DRAWBACK.

"There are certain features in the present bonded warehouse and drawback systems which detract from their usefulness in facilitating foreign commerce. Some of these features are inherent in the nature of the case; others consist of seemingly unnecessary hardships which can be ameliorated by a revision of the customs laws and the regulations accompanying them.

"In accordance with the mandate of the law creating the United States Tariff Commission, we have studied the customs administrative laws, to the end of securing simplification and granting relief from what seems unnecessary procedure, and reported on August 26, 1918, our findings and recommendations. In so far as changes suggested in that report affect the procedure under bonding and drawback, attention is called to the parenthetical notes herein.

"The purposes of the bonded storage warehouse are to relieve importers from the payment of duty on foreign products that in unchanged form are destined for reexport and also to permit the postponement of payment of such duties until the time when, during a period of three years, the owner desires to remove them. It can not aid in expediting the entry and clearance of shipping or the handling of merchandise, for vessels must submit to the same formalities and requirements, whether they bring dutiable goods or goods to be placed in bond, and the goods themselves, whatever their destination, must be valued, sampled, weighed, and tested before removal from the dock. Much of the delay necessarily incident to the proper assessment of duties on imports for domestic consumption is equally imposed on goods destined to be reshipped. (In the case of a ship landing part of its cargo in an American customs port and desiring to continue its voyage with the remainder of its cargo to a foreign port, the practice and the regulations make entry of such dutiable goods en route a simple matter. In the case of a vessel entering a port having part of its cargo destined for reshipment to a foreign port, it can transport its reshipment cargo to another vessel through bonded lighterage, with merely nominal customs procedure.)

"(a) To protect the public revenue from unauthorized entry of goods into domestic trade, the owner of the goods is required, under present procedure, to give bond in double the amount of duty, which is forfeited if the goods are stolen, lost, destroyed, or fraudulently removed. (The suggested revision of the customs laws relieves the owner of the goods of this specific bonding, and looks to the owner of the bonded warehouse for safeguards against such removal.)

"(b) Even drayage between dock and warehouse must be done under bond.

"(c) In addition, from the time they enter port until they are reshipped the goods are under constant customs control and supervision.

"(d) While in the warehouse they must be placed and arranged in accordance with certain well-defined regulations, so that they may at any time be checked and inspected by special agents of the Treasury Department.

"(e) Permits must be obtained for their reception and delivery, and strict accounts must be kept of all warehouse transactions.

"(f) Except during the usual business hours the warehouse is closed by a Government lock, and to enter it at any other time requires special permission and payment for the overtime presence of a customs agent.

"(g) Handling, sorting, mixing, or repacking of the goods is prohibited; only where serious damage is threatened can the original package be opened, and even then it must be done by special permission and under customs supervision. (The proposed revision provides permission for repacking, mixing, blending, cleaning, sorting, and in fact practically every process short of actual manufacture.)

"(h) Subject to these regulations, the expense of which it should be noted is made a charge upon the goods, an owner may leave his merchandise in bond for three years, but at the end of that time if duties are not paid they are considered, to use a technical expression, as 'abandoned to the Government,' to be sold by the Government, accruing charges and expenses deducted, and the remaining proceeds turned over to the owner. (Under the proposed revision the President is given the power to extend this three-year term under war or any other emergency.)

"The usefulness of the bonded warehouse is sometimes further restricted by the tariff practice of the country to which bonded goods are reexported. Thus the Canadian law treats goods that have been held in American bonded warehouses exactly as if they had entered American domestic commerce. When imported from this country to Canada, such goods are assessed for duty at the foreign value increased by the amount of the duty they would have paid if they had entered the United States for domestic consumption. The effect of this regulation finds illustration in the business of a certain American firm dealing in foreign embroideries. In order to fill a Canadian order this firm found it necessary to send goods from a bonded warehouse in New York to England, where the goods were reinvoiced and thence shipped direct to Canada.

BONDED MANUFACTURING WAREHOUSE.

"The mere statement of the regulations sufficiently indicates the limited usefulness, so far as export trade is concerned, of the bonded storage warehouse. Even more stringent are those applying to the bonded manufacturing warehouse. In the latter institution foreign materials may be entered free of duty and worked up into manufactures ready for consumption.

"(a) Production can be carried on in such a warehouse for export only. With a few special exceptions, the output can not be disposed of in the domestic market, even on payment of duty. (The proposed revision permits withdrawal for consumption of all goods produced from bonded manufacturing warehouses.) The most important exceptions are metal from ore smelted in bond, and cigars 'made in whole from tobacco imported from one country.' Minor exceptions are found in a provision for the entry of Mexican peas, or Garbanzo, which have been cleaned at such warehouses, and in the permission to sell for domestic consumption by-products and waste arising in the manufacture of goods for export, provided duty is first paid on such articles as if imported from abroad.

"(b) Before beginning operations the proprietor must file with the Treasury Department and with the collector of customs a statement of all the articles he intends to manufacture, giving the names of the articles, the exact kind and quantity of ingredients, and the formula of manufacture, and he must adhere rigidly to the formulæ set forth.

"(c) He must also give bond in double the value of the goods he intends to produce.

"(d) From beginning to end materials and operations are under strict customs supervision. A multitude of restrictions make the procedure

intricate and expensive, and the penalties for violation are very heavy. Only in the most highly standardized industries is it possible to avoid frequent disputes and misunderstandings.

DRAWBACK.

"The law authorizing what is known as drawback permits an importer, instead of placing his goods in bond, to pay duty on their entry and then to draw back from the Treasury on their reexportation 99 per cent of the amount paid. This provision, of course, can not any more than the bonded warehouse relieve commerce from the delays and other burdens incident to customs enforcement. The intent of the law is to aid production for foreign markets by relieving from customs dues imported materials that are manufactured or finished in this country and then shipped abroad. But the relief thus afforded, except in the sugar and tin-plate industries, has been relatively small, as may be seen from the following table:

Principal imported articles used in the manufacture of articles exported upon which drawback was paid.

[For years ending June 30.]

Total	5,445,151		6,637,602		6,182,375		6,402,603		4,543,536		3,165,082		7,339,236		15,275,685	

"It is obvious from these figures that scores of industries in this country that now use foreign materials to produce goods for export do not exercise the drawback privilege at all. The reason is that, for the prevention of fraud, the privilege is so hedged about with exacting and intricate regulations that the amount of the drawback very often does not pay for the labor and cost of collecting it.

"(a) To prove the identity of goods on which drawback is claimed requires a minute checking of imported elements entering into the manufacture, with the right and oftentimes with the need of examining into factory management, sometimes threatening the disclosure of trade secrets of importance. So complicated is the procedure in making claim and proving identity that many producers do not find it worth while to apply for drawback at all. Large-scale industries, like sugar refineries and those compelling the use of large quantities of tin plate, go to the expense of employing experts permanently to look after their drawback interests.

"(b) Every step must be taken subject to customs inspection, and oaths are required from importers, superintendents, and exporters.

"(c) Even after reshipment, before drawback can be recovered, evidence must be given of the actual landing of the goods in a foreign country. (Under the proposed revision of the customs laws, the landing certificate requirement is abolished, excepting when, in specific instances for reasons assigned, the Secretary of the Treasury shall call for such procedure.)

"(d) At best, under the smoothest operation of the law, that part of the owner's capital advanced in payment of duties is tied up in the Treasury from the time the goods are imported until 30 days after they are reshipped.

ILLUSTRATIONS OF THE INADEQUACY OF THE PRESENT SYSTEM.

"At the hearings conducted by the Tariff Commission and in the replies to its questionnaire numerous instances were adduced illustrating the inadequacy of the bonding and drawback system. To a few of these attention may be here directed.

"Rice milling is an industry for the successful prosecution of which all conditions appear to be favorable in the United States except a sufficient supply of raw material. The industry is now limited almost entirely to the preparation of the domestic product for domestic consumption, and this does not furnish full employment. It requires expensive specialized machinery and much skilled labor that must be engaged by the year. But testimony was presented showing that the largest mills are idle much of the time, because the domestic crop can keep them in operation for only half the year. Efforts have been made to use the idle months in cleaning and milling oriental rice, the supply of which is very large, for reexport to the West Indies and Spanish America. To do this work profitably the rice must be imported in full ships' cargoes and handled in bulk through grain elevators. These cargoes usually are about 6,000 tons, and, as there is an average duty of one-half cent a pound on rice, the duty that must be paid on a full cargo is $60,000. The importer, of course, would be entitled to a drawback on such quantity of the rice as was reexported; but it was the unanimous testimony of the mill officials interviewed that the business had to be discontinued because of the difficulty, delay, and expense of securing the drawback.

"Again, it was found that imported flowers and feathers and imitation feathers are extensively used in this country for trimming women's hats, the model or frame of which is an article of domestic production. Also Panama and imitation Panama hats for the use of both men and women are imported from Central and South America and finished in the United States with the use of domestic materials. The industry has been almost entirely limited to supplying the domestic market, for our manufacturers have found themselves hampered in competing for foreign markets by the restrictions of our bonding and drawback system.

"The effect of these systems on dealers in highly finished goods is perhaps best seen in the case of laces and embroideries. These are manufactures for which Spanish America offers a large and lucrative market which heretofore has been almost entirely supplied from Europe. Commodities of this character are apt to be included in the same order with a variety of other goods, and the order naturally goes to the dealer who can fill it as a whole at the lowest price, in the shortest time, and in the most convenient form. The order often includes specialties covered by trade-mark that are produced in different countries. To engage successfully in this trade, therefore, the merchant must be able not only to furnish the goods of his own country but also to assemble, sort, and repack foreign merchandise for convenient delivery. This kind of commerce American merchants are precluded from entering except under the greatest difficulties. In many parts of South America merchandise has to be transported for long distances in carts or on the backs of mules or llamas. It must be packed, therefore, with the least possible weight, and in such form that the packages may be evenly balanced. Furthermore, dry goods are usually dutiable in those countries at specific rates by weight, so that the lighter the carton or covering the lower the duty will be. But our bonding system does not permit the original packages received from Europe to be broken and rearranged. And if American manufacturers of clothing use imported laces and embroideries in making women's wear, the difficulty of identification and the expense of collecting a drawback are so great that when they export such goods they frequently prefer to forego the claim. One American exporter testified that his firm found it necessary to take goods from bonded warehouses in the United States and ship them to a West Indian port, where they might be repacked and thence forwarded to destination.

"Such are specific illustrations brought out at the hearings and in the correspondence conducted by the Tariff Commission showing the need of American industry and commerce for more liberal arrangements in handling and transshipping foreign products. Before pointing out how this can be accomplished through the establishment of free zones, it should be said with the greatest emphasis that the advantages to be enumerated can be attained in full measure only through the observance of certain prerequisites such as are set forth in the bill, comment on which forms the second part of this report. The free zone or port that is here contemplated is one of the character provided for in that bill.

THE FREE ZONE AND IMPROVED PORT FACILITIES.

"The most important prerequisite is that such a port shall provide properly coordinated, modern, and efficient physical facilities for the lading and unlading of cargoes, the entry and clearance of vessels, and the handling of merchandise. In the main, wharves, docks, piers, terminal facilities, and other necessary features of American ports have developed with few exceptions by a process of planless accretion. They are exposed to frequent fluctuations between slackness and congestion, and recent experience has proved them altogether unprepared for emergency. The uncertainties of business discouraged the installation of costly modern equipment, and this in turn increases the direct labor charge and adds to the expense of trade. The privileges of a free zone, through the promotion of commerce in regions naturally adapted for it, would attract capital to the creation of the facilities that should in every case be made an indispensable prerequisite. The detailed specification of these facilities should be made by the Secretary of Commerce, and might well vary somewhat from port to port, with a view to proper adjustment, both to topographic conditions and to the volume and character of the commerce to be handled. In the judgment of the Tariff Commission, it is highly important that the necessary capital should be provided, not by the Federal Government but by the State or municipality within which the free zone is established. The necessity of meeting the cost of construction and equipment from local resources would go far to limit the application for free zone privileges to those ports where there is a prospect that the acquisition of them would be justified by the results; while, on the other hand, the hope of securing a Government appropriation would attract an application from every handling place on the coast.

EFFECT OF NEW FACILITIES.

"The subject of providing new facilities can not be dismissed without reference to its probable effect on facilities already existing and the investments that have been made in them. The prospect that a publicly financed free zone with its elaborate equipment would destroy the usefulness of the facilities already constructed at great cost in our ports would arouse a widespread and not unjustified opposition to its establishment. The inquiries of the Tariff Commission, however, lead to the belief that no such destruction would be entailed. The experience of foreign countries has been that the growth of business in a free zone has been accompanied by a material

although smaller increase in the use also of the previously existing facilities. The trade, for example, in the free port of Copenhagen grew in seven years by 400 per cent, while at the same time the trade of the old, or customs, port not only escaped a loss but actually showed some gain. The purpose of a free port is not to divert business from those that now transact it but to provide for new business that under present circumstances can not grow as it might. The testimony of men familiar with present arrangements was emphatic to the effect that there would be little or no diversion of the passenger traffic or of the handling of dutiable goods and of the few goods that now make substantial use of the drawback and bonding system. Some diversion, indeed, might well be wished for by all concerned, in view of the congestion witnessed in recent months at American ports and the obvious incapacity of existing facilities to handle the present commerce with convenience and dispatch.

THE BUSINESS PROPER TO A FREE ZONE.

"The questions now arise, Whence is the new business destined for a free zone to come, and in what way will it profit the country? Partial replies have already been suggested in what was said above with regard to the bonding and drawback system. The business proper to a free zone consists in receiving and manipulating foreign products and reshipping them in the direction and at the time to take advantage of the best foreign markets. This is not only a profitable business, it is also becoming a necessary business to our industrial growth. For however wide the range of goods we produce and however effective our methods of production, we can sell our products to best advantage only when the purchasers are able to pay for them with products of their own. If we do not accept their products, they must sell them in some third country and transfer to us the credit they thus acquire—unless, indeed, they forego buying our goods at all and make their purchases in the country where they make their sales.

IMPORTANCE OF TRANSSHIPMENT TRADE.

"In the modern maritime nations the business of assembling and preparing the products of foreign countries for transshipment and redistribution abroad has grown steadily in volume and importance. Statistics are not available for an accurate statement of the amount of goods thus handled, but estimates putting their annual value in normal years at approximately $4,000,000,000 do not seem exaggerated. They consist in the main of the raw materials of those countries that have not attained a high stage of industrial development and that are dependent on the maritime nations for the transportation of their products and the supply of their necessities. To some extent, however, manufactured and partly manufactured goods enter the trade. This occurs when the country conducting the trade does not itself produce the particular manufactures that are demanded. In such a case the goods are purchased where they are produced, transshipped in the trading country, and sold where they are wanted. It is well known that only by such a triangular route and through the hands of foreign dealers have many American specialties entered the markets of South America and the Orient. Obviously a country engaged in this business benefits from it in a number of ways. It receives the profits on merchandising and transportation; its producers have first choice at lowest prices of the materials handled; and it can sometimes gradually build up a preference for its own products in supplying foreign markets. How small is the share of the United States in these benefits is indicated by the fact that the transshipment trade has not been deemed important enough to deserve separate statistical statement. In the annual reports of the Bureau of Commerce and Navigation, Table 8 combines the value of the goods transshipped and the value of goods in transit that merely cross United States territory in bond from one foreign country to another. Altogether in 1914 they amounted to the considerable value of $198,308,232, but not less than $155,847,478 of this was for goods in transit to and from Canada.

DECLINE OF TRANSSHIPMENT TRADE OF THE UNITED STATES.

"Our part in this business has not always been so insignificant. A little more than a century ago Europe was involved in a war almost as paralyzing to commerce as that now in progress. During its continuance, except for the period of our second war with England, not only the trade of this country but a great part of the whole seaborne commerce of the world was conducted by American merchants, carried on American ships, and financed by American capital. After the coming of peace, however, in spite of the swift growth of international trade, her share of it steadily diminished, until in the present generation her ships have carried less than 10 per cent even of her own foreign commerce. Numerous causes contributed to the decline; prominent among them, of course, was the strengthening competition in time of peace of those maritime countries whose absorption in war had given America her easy supremacy. Chaotic banking conditions in this country also long played an equally important part. An added disadvantage was found in the change from wooden ships, which had been built cheaply in America and of better quality than elsewhere, to iron and steel vessels, in the construction of which American enterprise was lagging. Finally, during the Civil War the hazards of foreign trade led not only to the wholesale transfer of American tonnage to foreign registry but also to the almost complete withdrawal from that field of American capital and enterprise. But while these and other things contributed to the same result, the most potent and continuous cause for the decline of maritime commercial interests in the United States lay in the more attractive opportunities found in other fields of industry. The settlement of the interior, the growth of manufacturing, the building of railroads, the development of internal resources of many kinds created a demand for labor and capital and offered rewards that foreign trade under competitive conditions did not afford. Commercially the United States became passive instead of active. Exports and imports, it is true, continued to grow; but the management, the direction, the transportation, and other mercantile operations connected even with her own trade, together with the profits arising from them, in large measure passed to foreigners, while her share in other branches of international trade was almost entirely lost. In the early years of the nineteenth century the value of foreign products reexported from America was nearer a half than a third of the value of her total annual imports; in the early years of the twentieth century the ratio was only about 3 per cent.

THE NECESSITY OF RECOVERING IT.

"The chief causes for the decline of American maritime enterprise now no longer operate. The outbreak of the present war has again forced the United States into a position of prominence in international trade. It has devolved upon this country to find capital, to furnish ships, to modify her own production, and to assemble and redistribute many products of other lands. Widespread interest has been aroused and considerable investments have been made in this long-neglected field. For the promotion of foreign trade new corporations have been formed and old ones expanded, a great merchant marine is under construction, the banks have extended their foreign agencies and created new ones; indeed, it is not too much to say that American business as a whole tends to be reorganized on the basis of a permanent widespread and varied foreign commerce in which Americans shall be active participants. Even before the war it was already generally recognized that industry was becoming constantly more dependent on foreign markets and that to secure and maintain these it was necessary not only to provide goods that foreigners might want but also to furnish in return a market for their products. And since for many of these products there was no demand in the United States, it followed, if they were to be received by American merchants in exchange for American goods, that these merchants should find a way to dispose of them in some other country where a demand did exist. It was already clear that industrial prosperity at home would be advanced if this country should play a larger part in the organization and conduct of international commerce as a whole, and this larger participation appeared equally desirable under conditions of peace as in time of war. The present war, therefore, by no means created the need for commercial expansion, but it has emphasized the need for it and has powerfully stimulated the growth of it. It has enabled, and indeed compelled, the United States to occupy a place in the world's commerce the retention and improvement of which will greatly contribute to her future welfare. Thoughtful men everywhere now see in the expansion of our foreign trade an added benefit to our internal prosperity.

TENDENCY FOR THIS BRANCH OF TRADE TO CONCENTRATE AT FREE PORTS.
